Section A: Overview

California SNAP-Ed
Statewide Goals & Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

State Level Goals and Objectives

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** By September 30, 2019, improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population (consistent with the current *Dietary Guidelines for Americans)* by 3%.

- **Objective 1b:** By September 30, 2019, increase consumption of fruits and vegetables among the SNAP-Ed eligible population by 3%.

- **Objective 1c:** By September 30, 2019, decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population by 3%.

Goal 2: Increase Physical Activity

- **Objective 2:** By September 30, 2019, increase time spent in physical activity among the SNAP-Ed eligible population by 3% (consistent with the current *Physical Activity Guidelines for Americans)*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually at least 80% of surveyed SNAP-Ed adult participants report improving at least one resource management behavior[1].

- **Objective 3b**: Annually at least 30% of surveyed SNAP-Ed adult resource management participants report increased food security[2].

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal[3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve[4] food environments in at least 500 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).

- **Objective 4b:** By September 30, 2019, at least 75% of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved food environments.

Goal 5: Increase access to and/or appeal[3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve environments and opportunities for physical activity in at least 200 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).

- **Objective 5b:** By September 30, 2019, at least 75% of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved environments and opportunities for physical activity.

---

[1] *Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.*
[2] *Defined as not running out of food at the end of the month.*
[3] *Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion*.
[4] *Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.*

California Department of Social Services
Supplemental Nutrition Assistance Program Nutrition-Education (SNAP-Ed)
State Plan Federal Fiscal Year (FFY) 2017–2019
Executive Summary

The mission of the California Supplemental Nutrition Assistance Program Education (SNAP-Ed), funded by the United States Department of Agriculture (USDA) - Food and Nutrition Service (FNS), is to increase healthy eating and active living by inspiring and empowering underserved Californians through awareness, education, and community change through diverse partnerships resulting in healthy eating and active living. The need for such programs and services in California is great. There are approximately 12.6 million Californians eligible for SNAP-Ed, which is about 34% of California's population. In California, 67% of low-income adults are overweight or obese[1], and 42% of low-income Californians were unable to afford food in 2015[2]. Furthermore, only 14% of teens (ages 12–17) and 30% of children (ages 5–11) of low-income are physically active for one hour or more every day.[3]

California is operating under a three-year SNAP-Ed State Plan that is active from FFY 2017 to FFY 2019 (October 1, 2016–September 30, 2019). This is California's first three-year SNAP-Ed State Plan. This transition to a multi-year Plan allows California to strengthen its statewide partnerships and supports ongoing collaboration among its SNAP-Ed programs as California aims to meet its state objectives.

California's evaluation efforts have demonstrated an overall positive impact of SNAP-Ed on the two topic areas that have been a long-term focus of many of the state's initiatives. Recent publication of population level results from the CDPH Comprehensive Survey in the *Journal of Nutrition Education and Behavior,* authored by key California SNAP-Ed evaluators, demonstrated significantly increased fruit and vegetable intake and decreased sugar-sweetened beverage intake in low-income mothers in California's high-reach census tracts. In addition, targeted program evaluation within counties demonstrated improved eating behaviors and physical activity, as well as antecedents to these behavior changes, In FFY 2018, California's evaluation plan will integrate findings from the individual SIA projects into an overarching system that will reflect the cumulative effect of the individual interventions.

State Implementing Agency Summary
Advancing an Integrated SNAP-Ed Agenda

California SNAP-Ed is administered by the California Department of Social Services (CDSS) as the oversight agency. CDSS oversees its State Implementing agencies that consist of the California Department of Public Health (CDPH), University of California CalFresh Nutrition Education Program (UC CalFresh), California Department of Aging (CDA), and Catholic Charities of California, Inc. (CCC). Collectively, these state-level agencies represent the California's five SNAP-Ed State Implementing Agencies (SIAs). SIAs oversee the implementation of local SNAP-Ed programs and services by providing directives, support, and guidance to their respective Local Implementing Agencies (LIAs). As a result of California's

[3] California Department of Public Health, Nutrition Education and Obesity Prevention Branch. California SNAP-Ed Profile (2017). Available at: https://archive.cdph.ca.gov/programs/NEOPB/Documents/2017%20County%20Profiles%20-%20California.pdf

Rev. 07/21/17

state and local structure for SNAP-Ed, services are provided in all but one county in the state (57 of 58 counties).

State and local implementing agencies worked collaboratively to create an effective and integrated service delivery system that benefits SNAP-Ed participants where they live, learn, eat, work, play, and shop. This work is accomplished by employing strategies that build upon a solid existing foundation of evidence-based and comprehensive policy, systems, and environmental (PSE) change strategies, including direct education, which is strengthened by the Healthy Hunger Free Kids Act of 2010. California SNAP-Ed delivers quality, evidenced-based interventions and strategies tailored to SNAP-Ed eligible youth, adults, and seniors. Services are participant-centered and linguistically and culturally appropriate.

Overseen by CDSS, collaboration among California's SIAs is fostered through collaborative efforts such as the SNAP-Ed 2.0 meetings and state-level workgroup participation. SIAs also participate/present at local and regional SNAP-Ed coordinated trainings and at national conferences like the USDA-FNS Regional meetings and webinars, Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies (ASNNA), and Childhood Obesity Conference, amongst others.

Throughout FFY 2017–2019 and in accordance with USDA-FNS Guidance, California SNAP-Ed will continue to provide to state and local implementing agencies:

- **Education:** Evidence-based nutrition education and physical activity interventions to support obesity prevention
- **Media and Messaging:** Statewide social marketing campaigns, media campaigns, and public relations
- **Capacity Building:** Training and technical assistance to build state and local capacity
- **Program and Partnership Development**
- **Evaluation**

The efforts listed above and subsequent projects described within California's SNAP-Ed State Plan are designed to achieve both the desired behavioral outcomes and physical and social environment outcomes of the statewide SNAP-Ed goals and objectives.

Behavioral Outcomes

- Goal 1: Increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages.
- Goal 2: Increase physical activity.
- Goal 3: Improve food resource management.

Physical & Social Environment Outcomes

- Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.
- Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

State Plan Highlights and Program Progress

A multi-year State Plan has numerous benefits including the ability to develop longer-term objectives with supporting strategies, activities, and partnerships to work toward significant change. Moving into the second year of California's multi-year State plan in FFY 2018, California SNAP-Ed will continue to advance the application of comprehensive educational programming that is designed to facilitate individuals and communities adopting informed food choices and a more physically active lifestyle. The following section describes a sampling of State Plan highlights in the areas of program progress, partnerships, and evaluation.

Program Progress

Local Integrated Work Plans

California's SNAP-Ed State Plan is enhanced with the inclusion of 60 local integrated work plans (IWPs) that detail the coordinated delivery of comprehensive SNAP-Ed services at the local level. The development and implementation of IWPs are executed in partnership with LIAs and subcontractors. IWPs are designed to support the overarching three-year SNAP-Ed local objectives that align with larger community change goals. Long-term goals and annual objectives are achieved through implementation of PSE strategies, supported by curricula and materials, and facilitated by programmatic interventions, and then evaluated with a mix of data collection activities.

In response to LIA needs, California has a standardized IWP Revision Process for making changes to an existing and approved IWP throughout the FFY 2017–2019 work plan period. Since its inception, the IWP Revision Process has been successful in providing local jurisdictions the flexibility needed to respond to changing community needs while upholding the program integrity of SNAP-Ed.

Each LIA delivering SNAP-Ed services is supported by a primary California SNAP-Ed SIA staff member. Designated SIA staff members provide LIAs with regular technical assistance on the primary intervention categories of their IWPs, including: 1) Community/Nutrition and Physical Activity Education Direct (CED), 2) Community/ Nutrition and Physical Activity Education Indirect (CEI), 3) Media, Social Media, Public Relations and Messaging (MPR), 4) Training and Technical Assistance (TTA), and 5) Coordination and Collaboration (C&C). Further, large-scale technical assistance, training, and information dissemination are provided to LIAs through statewide and regional calls and webinars, including the SNAP-Ed LIA Forum. In FFY 2018, California SNAP-Ed will once again bring together more than 600 SNAP-Ed leaders and partners from throughout the state to receive resources, training, and technical assistance for sustaining the multi-year statewide SNAP-Ed work.

Health Equity

Improving health and achieving health equity requires broader approaches and partners to address social, economic, and environmental factors that influence health and health outcomes. The work of California SNAP-Ed is grounded in equity allowing SNAP eligible recipients the opportunity to attain the highest level of health possible. For example, CCC has successfully incorporated SNAP-Ed and its objectives of healthy eating and active living into other safety net programs such as housing, education, food assistance, senior services, and

immigration and refugee services. CCC has implemented impactful policies in conjunction with staff training to improve the nutritional value of foods and beverages distributed through food distribution centers, parish kitchens, youth programs, and shelters. Looking ahead, CCC will expand the reach of agency-wide policies through staff training and technical assistance to other agency departments including food, shelter and housing, supportive services, immigration and refugee services, senior services, youth programs, and mental health services. Staff will learn to identify and support opportunities for SNAP-Ed work among all low-income individuals that are touched by CCC services. Agency-wide policies will be applied to case-management services to help address health equity issues.

CDA emphasizes the importance of making informed food choices and living an active lifestyle to prevent, decrease or manage chronic health conditions among older adults. CDA will continue to work toward building partnerships with non-SNAP-Ed funded organizations to leverage funds and/or accomplish similar program goals and objectives to increase older adults' access to healthy food. For example, CDA looks to establish a partnership with the California Department of Food and Agriculture (CDFA) to identify ways to collaborate with the Senior Farmers' Market Nutrition Program (SFMNP). In addition, CDA provides leadership to the CA Healthier Living Coalition and will explore ways in which cross-promotion can occur for California SNAP-Ed programs and services.

UC CalFresh actively engages in community efforts that generate a sustainable healthy lifestyle through leveraging the assets of local programs such as 4-H and Master Gardeners. In FFY 2018, UC CalFresh will build upon previous youth engagement work to: increase youth-led opportunities that involve either healthy living direct education or PSE change, foster strategic partnerships with the potential to scale up youth engagement activities and highlight career pathways in health education.

Within CDPH, the Champion Alliance Program establishes community alliances with ethnically and geographically diverse organizations and partners who work with the SNAP-Ed target audience to recruit and engage "Champions for Change" and promote the primary goals of SNAP-Ed. Champions educate their communities about the importance of healthy eating and daily physical activity and share their own stories on making healthy changes for their families, worksites, children's schools, churches, neighborhood stores, parks, and other environments. Champion's primary duties include providing peer-to-peer nutrition education in English, Vietnamese, Cantonese, Hmong, and Spanish languages and provide an authentic voice for media campaign mediums.

In FFY 2018, CDPH will convene a Health Equity Summit for the purpose of developing recommendations for a written strategy to decrease nutrition and obesity health disparities in California. This Summit will obtain input from national, state, and local experts, public health practitioners, partners, and/or stakeholders to create recommendations to inform an approach to minimize nutrition and physical-activity related disparities in California. Furthermore, beginning in FFY 2018, CDPH will allocate a base-level funding model to local health departments participating in SNAP-Ed to ensure small and rural counties have the resources needed to fund at least one full-time staff member to administer local SNAP-Ed programming.

Training and Capacity Building

California SNAP-Ed provides statewide capacity building through training and support to local partners and clients to advance local and state health priorities. The multi-level activities approved within the SNAP-Ed State Plan are supported by a comprehensive and robust training plan. The development and implementation of a coordinated, needs assessment-driven training plan is an integral part of effective and efficient SNAP-Ed program delivery in California. Key advantages of coordinating trainings at the state-level include the ability to disseminate trainings widely, ensure consistency in messaging that meets collective programmatic and administrative needs of all SIAs and LIAs, and reinforce the importance of leveraging resources with internal and external stakeholders.

The California SNAP-Ed Training Plan includes a structured cycle to assess state and local training needs, design training curriculum(s), and deliver training topics to ensure both LIAs and SIAs are receiving the level and type of training support needed to successfully implement SNAP-Ed activities each year. To enhance the access of training opportunities, the California SNAP-Ed Training Plan utilizes blended training approaches that include skill-based training and train-the-trainer model, and offers trainings in various formats such as in-person, webinar, and online self-paced training as appropriate. Statewide trainings are accessible online to the implementing agencies, consisting of interactive, evidence-based trainings, and website resources. All trainings are promoted, and if applicable, archived on a master training website for continuing support and education.

The California SNAP-Ed Training Plan includes enhanced logistical support and event planning services for meetings and special events in each of California's seven service areas (SAs). This support allows LIAs to strategize, prioritize, and share best practices, resources, and tools with peers, partners, and stakeholders. In collaboration with SIA partners, additional projects are being launched to support customized training and technical assistance to foster and maintain local connections and develop regional learning communities to enhance networking and collaboration opportunities among common interests. These projects include: a SNAP-Ed Promising Practice Exchange, a Peer Exchange Program, and a Connectors Program.

Information and Communications

California's SNAP-Ed program is supported by materials that enhance SNAP-Ed interventions and provide educational messages that support PSE change interventions strategies and align with the latest Dietary Guidelines, physical activity recommendations, applicable research, and approved logos and funder statements. Materials are evaluated for appropriateness and adherence to the USDA SNAP-Ed Guidance, USDA-FNS SNAP-Ed Evaluation Framework, and print and graphics standards. To ensure additional state and local SNAP-Ed colleagues benefit from the work of California's SNAP-Ed program, educational materials are submitted and shared with the USDA-FNS National Agriculture Library and SNAP-Ed Connection platforms, including the SNAP-Ed Intervention Tool Kit. As appropriate, downloadable materials and resources are available in an effort to reduce printing and production costs.

Curriculum Fidelity

Quality education is an integral part of SNAP-Ed. To ensure positive outcomes, education-based interventions must be meaningful for the target audience (including being culturally and linguistically appropriate), behaviorally focused, updated with current scientific information and government recommendations, and personally engaging. Expanding on state-level efforts that began in FFY 2017, California SNAP-Ed will continue to design guidance, tools, and trainings that help LIAs deliver direct services to ensure education activities are relevant, appropriate, and engaging for the target audience. California's previous work in the topic engaged SIAs and LIAs, and consultation with additional State SNAP-Ed programs including, Arizona, Washington, Oregon, Colorado, Minnesota, and Texas.

Policy Inventory

Community change is a multi-level strategy approach effective in advancing the state-wide goals of California SNAP-Ed. Entering into FFY 2018, California SNAP-Ed will increase the capacity of communities to implement policy, systems, and environmental change by embarking on a policy inventory project led by CDPH. The project is designed to create a comprehensive collection of obesity prevention policies on a limited number of topics, identify and showcase strong policies to promote obesity prevention, and assist with developing and disseminating model obesity prevention policies in settings such as schools, retail, and health care.

Statewide SNAP-Ed Branding

Overseen by CDSS, California SNAP-Ed will develop a centralized and comprehensive statewide system of SNAP-Ed brands and messages. This strategic alignment of branding at both the state and local level will build SNAP-Ed brand equity and trust, while allowing messages to reinforce each other to deliver clear and actionable information to all person who are SNAP eligible. The brand and message system will help California build upon brand that has been develop to identify and fill gaps in program delivery and establish a scalable architecture that can evolve with nutrition assistance programs moving forward. Rescue, the Behavior Change agency, has been chosen as the branding agency to facilitate the development, test, and establish of a new brand framework to California's SNAP-Ed funded agencies and programs. This framework will clearly communicate SNAP-Ed benefits, and increase use of SNAP-Ed programs among eligible Californians. Rescue will also support a limited rollout with technical assistance and complete the development of stakeholder outreach materials. California SNAP-Ed branding will engage both local and state implementing agencies at multiple stages.

Media and Messaging

CDPH, through coordination with its fellow SIAs and oversight from CDSS, will oversee the development and implementation of a statewide media campaign, public relations, and social media efforts throughout 12 designated market areas. Campaign elements will provide cohesive messaging to approximately 85 percent of the SNAP-Ed audience focused on increasing fruit and vegetable consumption, water consumption, daily physical activity, and food security. The Champions for Change "Be Better" Campaign is multifaceted and includes television, radio, outdoor and digital advertising. Public relations technical assistance will be provided to SNAP-Ed funded programs and partners enhancing campaign messaging using

the Be Better Field Guide, social media channels and directing the audience to the campaigns' website, which provides tips, tools and information needed to make healthy changes.

Partnerships

California SNAP-Ed encourages and fosters partnerships among national, state, and local players in support of shared goals for efficiency and enhanced health outcomes. California SNAP-Ed maintains partnerships and generates new ones to expand participant reach, leverage resources, further PSE efforts and strengthen obesity prevention efforts.

EatFresh.org

EatFresh.org is a comprehensive nutrition education program that offers consumer-based SNAP-Ed resources, recipes, nutritional messages, local county resources and trainings on healthy eating behaviors, preparation of healthy meals, healthy shopping, and spending habits. California SNAP-Ed is continuing its support of EatFresh.org to increase the reach and effectiveness of the California SNAP-Ed program. This ongoing support will assist EatFresh.org in maintaining and updating their current resources and develop new innovative materials to provide to all SIAs, LIAs, County Welfare Departments, and the public.

Champion Provider Fellowship (CPF)

CPF harnesses the passion of health care providers to improve the health of their communities beyond the clinical setting. In partnership with the University of California, San Francisco (UCSF), CDPH launched the program in 2014 to empower, train, and support health care providers to use their expertise and respected voices to improve the health of communities through local PSE change. CPF provides training and education on a wide variety of subjects, such as health promotion, food insecurity, healthy retail, crafting compelling messages, working with the media and writing for change. Providers work with community change leaders, community-based organizations, schools, faith-based organizations and others to find local solutions to obesity and related chronic health conditions. Areas of success include the built environment, communicating with city councils, and addressing food insecurity.

Smarter Lunchroom Movement of California (SLM of CA)

SLM of CA is a seven-agency collaborative comprised of SNAP-Ed and non-SNAP-Ed funded agencies. Since its inception in 2013, the SLM of CA has successfully created greater awareness of SLM and a foundation for policy, systems, and environmental change approaches in schools throughout California. In FFY 2017, the SLM of CA provided training and technical assistance to LIAs, increasing the number of individuals trained to nearly 1,000 people and 317 school districts. There were 140 certified Technical Advising Professionals (TAPs) in California's communities have provided guidance and support to assess, introduce, and implement SLM strategies. During the 2016–2017 school year, TAPs completed over 230 SLM Scorecard Assessments. In FFY 2018–2019, the SLM of CA will work to sustain and expand the collaborative's efforts through joint training, resource development, technical assistance and evaluation.

California Local School Wellness Policy Collaborative (CA LSWP Collaborative)

In an effort to foster strong state and local-level partnerships to improve student wellness, and build broad support for local school wellness policy implementation, CDPH remains committed to the CA LSWP Collaborative through continued leadership, subject matter expertise, and support. This model of collaboration and coordination strengthens relationships and capacity among both state and local agencies, which increases opportunities for implementing agencies to contribute to success at all levels of the socio-ecological model. To date, the Involvement of California SNAP-Ed in the CA LSWP Collaborative has resulted in joint regional trainings and uniform messaging across key state agencies and partners regarding school wellness policies. This partnership highlights the key role SNAP-Ed can play in supporting additional USDA FNS-funded programs and initiatives.

Public Health Institute (PHI)

CDSS and PHI are collaborating on several new projects to expand the reach of the SNAP-Ed in California. These projects include: the Program Evaluation and Reporting System (PEARS), community-based organizations pilots to develop educational strategies to address food security, corporate retail and nutrition wellness partnerships, educational resources for decision-makers, an annual stakeholders' meeting and a California SNAP-Ed website to allow for streamlined communication between California's SIAs, LIAs, contractors, partners, and consumers.

Department of Health Care Services

The first three years of the Obesity Prevention Project led by the California Department of Health Care Services (DHCS), included formative research, program planning and development and have formed the foundation of Project Connect/the Obesity Prevention Renewal Project. During the next three years (FFY 2018 through FFY 2020), DHCS will complete program and evaluation development, implement interventions at the community level and determine the effectiveness of varied approaches in reducing BMI and sugar-sweetened beverage consumption, improving fruit and vegetable consumption and physical activity. This will help improve related psychosocial determinants and health outcomes, and achieve cost effectiveness. The study findings will then be used to inform SNAP-Ed, Medi-Cal, and other obesity-related policies and practices in the future.

Oral Health

The Chronic Disease Control Branch Oral Health Program (OHP) within CDPH is partnering with California SNAP-Ed to complete formative work establishing guidance for messaging, materials, and training needs with targeted members of the oral health community to modify and implement a Rethink Your Drink (RYD) campaign. In FFY 2018, OHP will draft an intervention and evaluation plan, modify/develop resources, test materials and resources with selected oral health community members, and conduct evaluation.

Partnership for a Healthier America (PHA) and Fruit and Vegetable (FNV) Campaign

To further PHA's mission of ending the childhood obesity crisis, the organization launched the FNV Initiative to encourage teens and families to eat more fruits and vegetables. FNV is harnessing the power of marketing to promote fruits and vegetables in the same way big brands market their products. CDPH is currently implementing the FNV campaign strategies

through media, as well as planning for use in the school and retail settings. The California SNAP-Ed partnership with PHA and the FNV campaign creates pathways to national partnerships and relationships to advance statewide SNAP-Ed goals.

Food Access Nutrition Education and Outreach (FANOut) Committee

FANOut is a platform for disseminating information, providing training and technical assistance, and facilitating action committees to a large and diverse partner audience throughout the State. Under the guidance of CDSS, PHI coordinates and hosts these meetings. Meetings held in FFY 2017 provided information about current innovative practices such as utilizing the Food Insecurity Nutrition Incentives grant to assist SNAP recipients to expand their purchasing power for healthy food and beverages and bring attention to new practices to address food insecurity among seniors. In FFY 2018, this platform will continue to provide information and technical assistance to its diverse audience.

State Nutrition Action Committee (SNAC)

CDSS leads the newly established committee of senior level partners from the USDA-FNS programs in California and statewide advocates who represent the needs of low-income families related to food security and increased access to healthy food and beverages. All California SNAP-Ed SIAs, Department of Education, Department of Food and Agriculture and WIC participate on this committee. These committee members represent the diverse programs in over 36,000 sites supporting the nutritional health of our state serving some of the most vulnerable populations. This committee, known as SNAC, will work together by identifying an initial focus for SNAC activities and priorities. Moving forward, SNAC will continue to act as a statewide leadership group to inform and guide California in achieving food security, nutrition, and physical activity goals.

Biennial Childhood Obesity Conference

CDPH collaborates with its longstanding partners, the California Endowment, Kaiser Permanente, Nutrition Policy Institute (NPI) and the California Department of Education to implement this highly visible, nationally recognized conference. CDPH's role includes serving on the executive committee, as well as convening the conference executive committee, which is responsible for implementing the conference. The conference is attended by California SNAP-Ed SIAs and LIAs. In preparation for the next conference, CDPH will provide subject matter expertise to support conference development, and provide staff support for the conference. Through the executive committee, the conference agenda and associated content is prioritized by evidence-based and evidence-informed resources and best practices that will enhance the capacity of attendees to advance PSE change for childhood obesity prevention. The conference includes USDA-FNS SNAP-Ed sessions every year.

Evaluation

California SNAP-Ed evaluation activities address state-level goals and objectives and satisfy the reporting requirements of USDA-FNS. In FFY 2018, California SNAP-Ed evaluation will be streamlined in order to provide meaningful and impactful data to inform and guide future decision-making and SNAP-Ed service delivery. State-level integration of evaluation planning and implementation ensures state and local evaluation activities are developed strategically and in conjunction with other program functions.

The California SNAP-Ed Evaluation Workgroup, comprised of the SIAs, DHCS, PHI and NPI, work collaboratively to develop statewide goals and objectives with relevant indicators, evaluation methods and instruments, and an integrated statewide data collection system. NPI, contracted through CDPH, currently provides the following services:

University of California, Nutrition Policy Institute (NPI)

NPI is contracted to conduct research and evaluation studies to assess the need for, scope of, and effects of SNAP-Ed services provided to eligible individuals and communities. Evaluation activities will address the state-level objectives. In FFY 2018, NPI will provide training and technical assistance to support both state and local implementing agencies that aligns with the SNAP-Ed Evaluation Framework. Further, NPI will provide updates on new developments from the research literature regarding evidence-based strategies found to impact target behaviors, and will develop reports, presentations, and/or publications to share findings about SNAP-Ed intervention needs, experiences, and effects. These deliverables will translate evaluation and literature review results in easy-to-use formats to inform local-level programming.

The tasks of the SIA Evaluation Workgroup are guided by the USDA SNAP-Ed Evaluation Framework and Interpretive Guide. Two new evaluation projects, the Program Evaluation and Reporting System and the California Health and Nutrition Goals Examination Survey, are described below.

Program Evaluation and Reporting System (PEARS)

Building on past pilot projects and activities in collaboration with the Kansas State University Office of Education Innovation and Evaluation (OEIE), the state Evaluation Workgroup will launch the coordinated statewide use of the Program Evaluation and Reporting System (PEARS). PEARS will serve as a tool to collect and report data in a standardized and centralized evaluation system used by all California SIAs and LIAs. LIAs will report their evidence-based SNAP-Ed programs and interventions in one system. Lastly, PEARS will streamline reporting and enable timely feedback to LIAs and serve as a single reporting system for California's SNAP-Ed program.

Summary

In summary, California SNAP-Ed is committed to improving health and nutrition by providing a combination of direct programming and local resource supports in the areas of evidence-based nutrition education and physical activity interventions to support obesity prevention, media and messaging, training and technical assistance, program and partnership development, and evaluation. Further progress requires the commitment and engagement of a broad set of state, local, and regional partnerships working collectively and leveraging resources to drive sustainable community change. Together, partnering organizations are better equipped to address issues around access to and consumption of affordable healthy food and beverages, access to safe places for physical activities, and strategies for reducing food insecurity. The investment of both state and local SNAP-Ed funding remains critical to health and well-being of California's communities, neighborhoods, families, and residents.

Needs Assessment Methodology and Findings

Needs Assessment Methodology

Concisely describe and justify your methodology for assessing the population health-related nutrition and physical activity needs of the State target audience. Sources of data may include obesity and poverty rates, racial/ethnic differences, tribal status, fruit and vegetable consumption, Behavioral Risk Factor Surveillance System data. Refer to Section 2 of this Guidance, Describing the Target Audience for other sources. Insure data is current, i.e., less than five years old.

A. Existing information (source, content, time frame):

Findings from surveys funded through CDPH were compared with those from the California Health Interview Survey (CHIS). The most recent CHIS data available are from the 2013-2014 survey. CHIS data from adult females are presented below as they represent the best comparison group for the SNAP mothers interviewed in the Champions for Healthy Change and Media Evaluation surveys. CHIS findings are presented for adult females, teenagers, and children overall, as well as those from households with income ≤ 185% of the Federal Poverty Level (FPL).

Data for older adults were compiled from the 2013 Behavioral Risk Factor Surveillance System (BRFSS), CHIS, California Department of Finance Demographic Research Unit, California Department of Aging (CDA), the State of Aging and Health in America, and America's Health Rankings Senior Report.

B. New information collection (source and content):

Estimates of nutrition behaviors and physical activities among the California SNAP population come from two CDPH population-based surveys: Champions for Healthy Change (a.k.a. Comprehensive Evaluation survey) and the Media Evaluation (formerly known as the Benchmark survey).

Participants of the 2015 Champions for Healthy Change survey were those first interviewed in 2013 as well as a new sample of mothers, teenagers, and children. Across the three years, interviews have been conducted with 20,927 persons from SNAP households. Within- and between-person changes over the three years were examined for levels of consumption of sugar-sweetened beverages (SSBs), physical activity, and some eating behaviors. In these analyses we controlled for race/ethnicity (Latino vs. non-Latino) and education (less than or equal to high school vs. greater than high school education). The Automated Self-Administered 24-Hour Dietary Recall (ASA24) was administer in 2014 only, and provides comprehensive information on the target population's food intake behaviors. Point prevalence estimates from the ASA24, and rates for BMI across the three age groups, are presented in Section 2.

The design for the 2014 and 2015 Media Evaluation surveys were initial (Wave I) and follow-up (Wave II) interviews with SNAP mothers. Section 2 includes the summary of responses for Wave I interviews only. Wave I interviews in 2015 were completed in March and therefore provide very recent estimates of SNAP participants' reported behaviors. Since the same questionnaire

was administered to over 1,000 mothers in both years, we present changes in important outcomes over the one-year period.

For both surveys, we examine how outcomes such as community and household access to healthy foods, fruit and vegetable consumption, levels of types of physical activities, and SSB intake differ across the three primary racial/ethnic groups: Whites, African Americans, and Latinos.

Needs Assessment Findings

1. **Demographic Characteristics of SNAP-Ed Target Audience.** *If information is available, discuss geographic location, race/ethnicity, tribal status, age, gender, family composition, education, and primary language. Reference the source(s) of any data described.*

Demographic Characteristics of SNAP-Ed Audiences in California. SNAP-Ed eligibility covers SNAP participants and low-income individuals eligible to receive SNAP benefits or other means-tested Federal assistance programs, representing approximately 12.6 million people in California who have a gross annual income below 185% of the FPL (Table 1)[1]. These individuals are diverse and, in many cases, transitional because families struggling out of poverty typically have fluctuating incomes that make them intermittent participants in CalFresh.

Table 1. Number of People and Percent of California Population by SNAP-Ed Eligibility Subgroups

	SNAP/CalFresh Participants[a]	Total Low-Income Individuals Eligible for Other Means-Tested Federal Assistance Programs (<185% FPL)[b]
Number	4,471,368	12,576,340
California Population[c]	11.9%	33.7%

[a] CalFresh participant data from California Department of Social Services, November, 2015[3]
[b] California SNAP-Ed Eligible (income <185%FPL) data from American Community Survey, 2014[1]
[c] California total population data from whom income data is known (37,323,127) from American Community Survey, 2014[1]

Certified-Eligible for CalFresh (CalFresh participants). In November 2015, the average monthly CalFresh participation (federal CalFresh and the state-funded California Food Assistance Program) was just over 4.4 million of California's total population (11.9%) for whom income data was known.[1] As with other parts of the country, California has seen a dramatic increase in CalFresh participation associated with the economic downturn and higher rates of unemployment. Although the rate of increase has slowed, from November 2014 to November 2015, the monthly average number of CalFresh recipients increased by 31,186 people or 0.7%.[2,3] Attachment 2 provides the CalFresh participation and one-year change in participation for all California counties. The five counties with the largest share of California's CalFresh

participants are: Los Angeles County (26.1%), San Bernardino (9.0%), Riverside (6.7%), San Diego (6.6%) and Orange (5.8%).

SNAP households in California tend to be even poorer than the national average, with only 10.6% having cash income above the poverty level compared to 16.4% nationally.[4] Individuals identified as the heads of SNAP household in California are more likely to be Hispanic and less likely African American or White compared to the national SNAP demographic profile.[4] California SNAP participants are much more likely (57.6%) to be children (under 18 years) and less likely (9.0%) to be elderly (60 years or older) compared to national figures (nationally, 43.6% and 19.0%, respectively).[4]

Table 2 displays the race/ethnicity and age by SNAP-Ed eligibility group compared to state and national population statistics. Attachment 1 provides the Hispanic/Non-Hispanic breakdown of SNAP households by California counties.

Table 2. Race/Ethnicity and Age by SNAP-Ed Eligibility Subgroups

	CalFresh[a,b,c,d]	**Low-Income Individuals Eligible for Other Means-Tested Federal Assistance Programs** (<185% FPL) [d,e,f]	**CA Total Population**[g]	**US Total Population**[g]
Race/Ethnicity				
Hispanic or Latino	48.6%	55.3%	38.2%	16.9%
White – Non-Hispanic	26.1%	25.0%	39.2%	62.8%
Black/ African American Alone (NH)	13.5%	7.2%	5.7%	12.2%
American Indian/Alaskan Native (NH)	0.7%	0.5%	0.4%	0.7%
Asian, [Hawaiian][h] or other Pacific Islanders (NH)	5.4%	10.0%	13.7%	5.1%

Some Other Races or Two or More Races (NH)	3.6%	2.0%	2.9%	2.3%

0-17 years	53.6%	31.3%	24.2%	23.5%
18-64 years	41.9%	58.6%	63.7%	62.8%
65+ years	4.5%	10.0%	12.1%	13.7%
Completed High School or Higher	62.9%	68.4%	85.1%	84.9%
Average Household Size	2.3	4.1	2.76	2.36

[a] Race/ethnicity data of CalFresh households from the California Department of Social Services, DFA 358F and DFA 358S July 2015[5, 6]
[b] Age of CalFresh participants data from Table B.14. of U.S. Department of Agriculture[4]
[c] Education and household size data from California Department of Social Services[7]
[d] Race/ethnicity data for <185% from US Census Bureau, American Community Survey, Table C17002, 2006-2010.[8]
[e] Age of <185% FPL from US Census Bureau, American Community Survey, 2014, 5-year estimate, Table B17024. Due to limitation of available age data, for individuals <185%FPL Adults refers to those 18-64 years and Seniors refers to those 65 years and older.[9]
[f] Completion of high school and estimated average household size from California Health Interview Survey (CHIS) 2014[10]
[g] Race/ethnicity and Age data for California and United States from American Community Survey, 2014 5-year estimates, Table DP05.[11]
[h] Hawaiian respondents were included in this grouping for CalFresh participants, CA Total Population, and US Total Population columns of data only.

The CDSS website shows key characteristics of CalFresh households in FFY 2012. The average child's age was 7.5 years, the average age of head of household was 37.8 years, and the average number of persons per household was 2.3. Almost 94% of the recipients were U.S. citizens. Recipient heads of households that were female was 69.2%, and 62.9% had completed at least 12 years of school. Less than a third (31.1%) of recipients also received CalWORKs cash assistance. Over a fifth (21.5%) of SNAP households had earned income and 7.6% had received CalFresh for five years or more.[7] Among SNAP recipients included in the 2009 California Health Interview Survey, 21.3% spoke Spanish at home, 34.3% spoke English and Spanish, 35.1% spoke English, 1.7% spoke Vietnamese, 0.6% spoke Chinese, 0.5% spoke English and Chinese, and 6.4% spoke another one or two other language(s) at home.[10]

Summary. California's SNAP population is primarily comprised of Hispanics (nearly half of SNAP population), Spanish or Spanish/English speakers (over half of SNAP population), female heads of household (over two-thirds of SNAP population), individuals in the workforce (nearly one-third receive CalWORKs), and children (over half of SNAP population). California's SNAP

population estimates for the elderly may inaccurately portray the actual need for nutrition assistance for this population. Low SNAP household participation rates by older individuals may be related to individuals who receive Supplemental Security Income (SSI) which includes a State Supplemental Payment. Individuals receiving SSI are ineligible to receive SNAP benefits as SSP includes a SNAP allotment. USDA, FNS identifies older adults as a vulnerable population in greater need.[4]

Implications. Nutrition education and obesity prevention efforts must be targeted to those geographic areas and populations that are at the highest risk including targeted interventions that prioritize reaching Hispanics, female heads of household, worksites, children, and older adults with materials and trainings provided in both English and Spanish.

2. State-Specific Diet-Related Health Statistics on Target Population: *Provide State-specific data on child and adult obesity and diet-related diseases such as Type 2 diabetes and hypertension, for target population if available.*

In this section we present current information on the prevalence of obesity and overweight among the target population. We then provide statistics related to each of the state objectives.

Overweight and Obesity Among Low-Income Californians

Obesity poses a major public health challenge as it contributes to some of the leading causes of preventable death and increases the risk of many health conditions, including coronary heart disease, stroke, high blood pressure, Type 2 diabetes, various cancers, high cholesterol and triglycerides, liver and gall bladder disease, sleep apnea, osteoarthritis, reproductive complications, and mental health conditions.[1] California has the highest obesity-related costs in the United States, estimated at $15.2 billion with 41.5% of these costs financed through

Medicare and Medi-Cal.[1] Obesity has also been linked with reduced worker productivity, chronic absence from work, and medical expenditures that total $73.1 billion per year for full time employees in the United States.[2]

Assessing height and weight through self-report to calculate BMI and rates for obesity are subject to limitations, but such methods provide the best data for assessing differences across types of populations and racial/ethnic groups.

Older adults are at increased risk of suffering from chronic disease and diabetes compared to other age cohorts. Approximately 80 percent of older adults suffer from one chronic disease and roughly 50 percent have two.[30] Over one-third (35.4%) of California's adults age 65 or older are overweight and 24.1% are obese, according to BRFSS data.[3] A recent report by the United Health Foundation (UHF) identified that black older Californians age 65 and older experience higher rates of obesity prevalence compared to other age and race cohorts.[4]

CHIS data for adult females from the non-SNAP population were compared with rates from SNAP mothers participating in our 2014 Champions for Healthy Change survey. Overall, 24.9% of California adult females are obese, and 31.0% of those from households at ≤ 185% FPL have a BMI ≥ 30. A much higher proportion (49.5%) of SNAP mothers is obese. Adult females from households ≤ 185% FPL and SNAP mothers exceed the Healthy People (HP) 2020 obesity target of 30.5%.[5] Teenagers from SNAP households are more likely to be obese (25.3%) than those from lower-income households (18.2%) and teenagers from across the State (14.5%). Similar to the adult population, both lower-income and SNAP teenagers exceed the HP 2020 obesity target of 16.1%.[5] Over three-fourths (79.1%) and 43.0% of SNAP mothers and teenagers are obese or overweight. Finally, 30.0% of SNAP children are obese, and 11.7% are overweight. The HP 2020 target for obesity among 6 to 11 year olds is 15.7%.[5]

Among adult females, African Americans are more likely to be obese, followed by Latinas, then whites (Figure 1). Among teenagers, Latino are more likely to be obese than whites (the proportions for African American are unstable and not included in Figure 2). Latino children are more likely to obese than African Americans and whites from SNAP households. Among the SNAP population, 58.4% of African American mothers, 32.5% of African American teenagers, and 28.2% of African American children are obese.

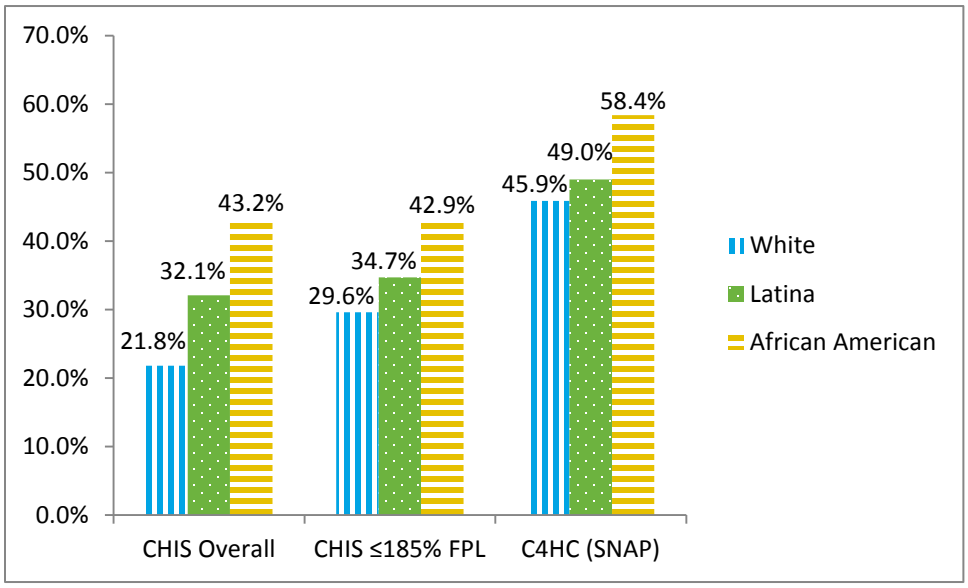

Figure 1: Obesity Rates Among Adult Females by Population and Race/Ethnicity

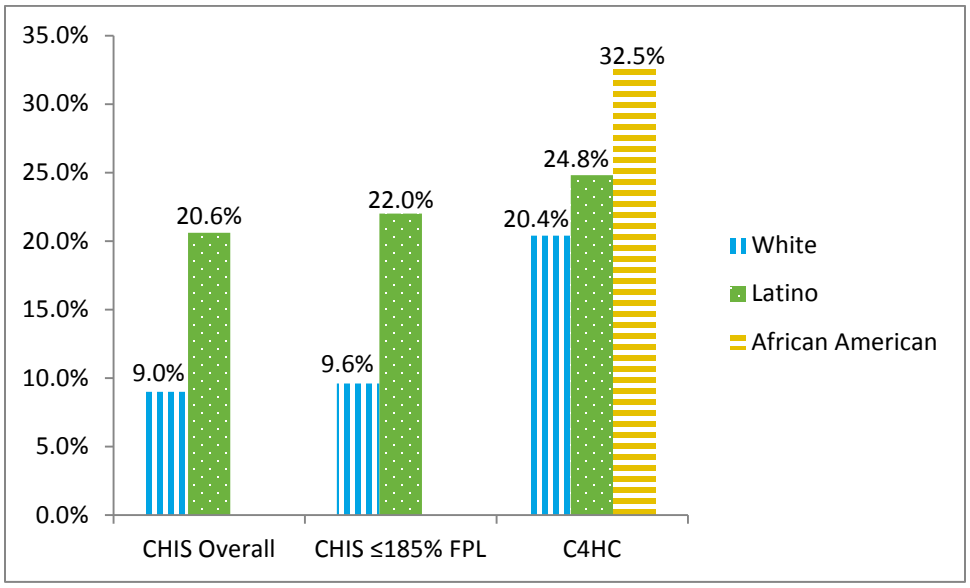

Figure 2: Obesity Rates Among Teenagers by Population and Race/Ethnicity

Summary. Adult females, teenagers, and children from California SNAP households continue to have higher rates for obesity than other populations, and continue to exceed the HP 2020 targets. Among adult females and teenagers, African Americans are more likely to be obese, followed by Latinos, then whites.

Obesity is a major contributor to multiple major chronic conditions specifically stroke, heart disease, cancer and arthritis. High rates of overweight and obesity in the older adult population have been linked to increasing rates of diabetes.

Consumption and Access to Healthy Foods

Availability of Healthy Foods in the Neighborhood and at Home. The CHIS and Champions for Healthy Change questionnaires both asked female respondents about their levels of agreement to a statement about the availability of fresh fruits and vegetables in their neighborhood. Overall, 75.9% of adult females in California, and 65.6% of those ≤ 185% FPL, were found to "strongly agree" with this statement. The proportion of SNAP mothers indicating that they "strongly agree" that in their neighborhood fresh fruits and vegetables are easy to buy is 27.4%. When examining changes from 2013 to 2015 among mothers participating in the Champions for Healthy Change survey, we found a significant decrease from 30.7% to 27.4% (Figure 3). Moreover, the proportion of SNAP mothers who "strongly agree" with the statement, "in my neighborhood, it is easy to buy healthy foods, such as low-fat milk and whole grain bread" decreased from 34.2% to 30.7%.

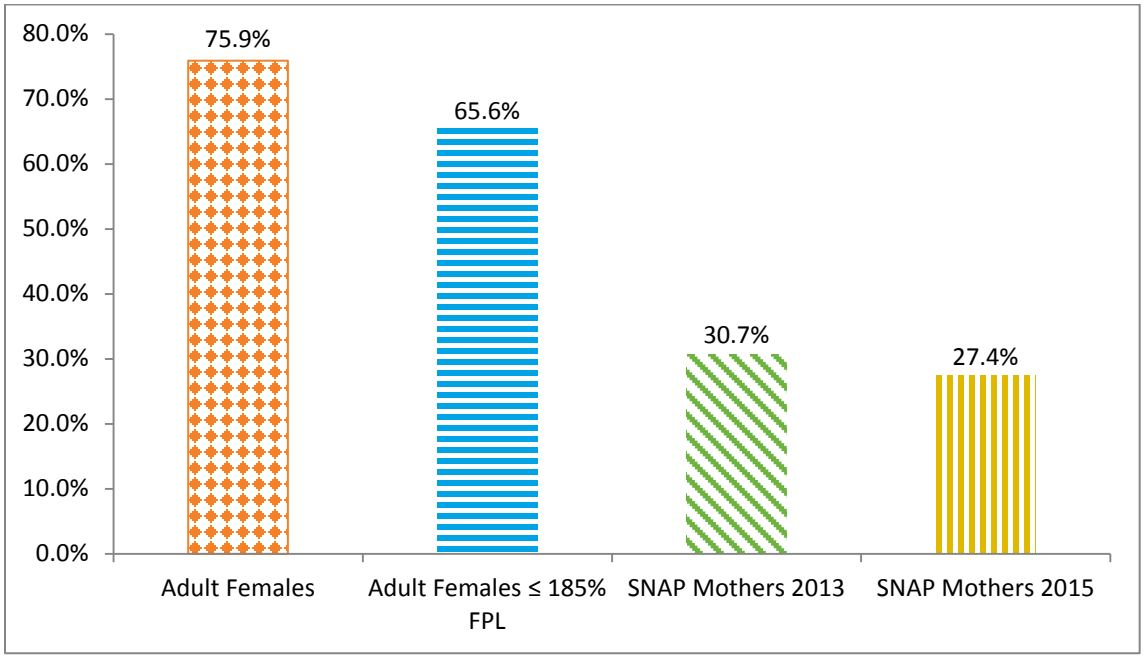

Figure 3: Access to Fruit and Vegetables in One's Neighborhood by Population and Year for SNAP Mothers

The proportion of SNAP mothers who stated that every day they have fresh fruit or vegetables "washed, cut-up, and ready-to-eat for your family in your home" was unchanged from 35.1% to 34.8% from 2013 to 2015; this finding was confirmed by teenagers from SNAP households who were asked a similar question. Moreover, no changes were found over the two years for the proportion of teenagers who stated that "usually there are fresh fruits or vegetables ready to eat, like a fresh fruit bowl on the counter or carrot or celery sticks cut-up in the refrigerator" or

who stated "yes" to the question, "in general, are fruits, vegetables, and 100% juices available to you whenever you are hungry?" Finally, mothers participating in the 2014 and 2015 Media Evaluation survey reported the same levels for limiting the amount of unhealthy foods available for children.

The CHIS surveyed low-income (200 percent FPL) older adults (age 60 and over) regarding food security and their ability to afford and access fruits and vegetables in their neighborhoods. Results of the survey identified nearly 31 percent (30.9%) of low-income older adults are not able to afford enough food and are food secure. Seventy-seven percent (77.3%) of low-income (incomes <185% FPL) older adults (age 60 and over) felt they were always able to find fresh fruits and vegetables in their neighborhood, 9.1% usually, 7.8% sometimes, and 3.4% never find fresh fruits and vegetables in their neighborhood. Only 2.4% of low-income older adults report they do not shop for fresh fruit and vegetables in their neighborhood. The CHIS surveyed low-income older adults age 60 and older. Nearly 42% of low-income older adults compared to 62.5% of all other older adult respondents, reported fresh fruits and vegetables are always affordable in their neighborhood.[29]

Availability of Healthy Food by Race/Ethnicity. Across the three racial/ethnic groups, white mothers were more likely to report access to healthy foods in their neighborhood, compared with African Americans and Latina mothers. This trend is found for all mothers across the State, as well as for those from SNAP households. White mothers from SNAP households were also more likely to have fruits and vegetables available for their family.

Fruit and Vegetable Consumption. In 2015, among the representative sample of mothers participating in our Media Evaluation survey, 26.8% correctly identified half a plate of fruit and vegetables as the national guidelines; however, 42.6% claimed to put this recommendation into practice.

ASA24 data show that for total cups of fruit and vegetables (including 100% fruit juice) per 1000 calories, SNAP mothers (1.9 cups) and teenagers (1.5 cups) consume below the recommended level of 2.5 cups. Mothers from SNAP households do meet the recommended cups for dark green vegetables, but SNAP teens do not (0.2 versus 0.1). The recommended number of cups of orange vegetables is 0.8, but SNAP mothers and teens reported less than 0.1 cups during the previous 24 hours.

The Media Evaluation survey assessed fruit and vegetable intake in terms of times per day. From 2014 to 2015, the number of times that SNAP mothers ate fruit remained at 1.6 a day. Vegetable consumption declined to the extent that the composite outcome variable for fruit and vegetable consumption decreased from 5.0 times in 2014 to 4.6 times per day in 2015. No difference was found on these outcomes across racial/ethnic groups.

Nutrition is an essential component to healthy and successful aging. Older adults are especially susceptible to hunger and malnutrition because of issues that relate specifically to age: decreased mobility, limited outside assistance, decreased taste acuity, and social isolation. The current DGAs suggest incorporating healthy eating patterns which include consuming fruits and vegetables have been associated with positive health outcome.[31] A 2011 study by Anderson, et al., reported older adults who consumed a diet consistent with the DGAs had more favorable levels of selected nutritional biomarkers and reported more years of healthy life.[32] The 2010 DGA's reported, eating 2½ cups of fruits and vegetables daily is linked to decreased risk of chronic disease, including heart attack and stroke. Key DGA recommendations encourage increasing vegetable and fruit intake including a variety of vegetables, especially dark-green, red and orange vegetables. BRFSS data indicate 23 percent of California's older adults age 65 and older consume fruit less than one time per day and 15 percent consume vegetables less than one time per day.[33]

Unhealthy Food Intake. Mothers and teenagers exceed the recommended maximum number of teaspoons of added sugars per day by 2.8 and 3.6 teaspoons, respectively. ASA24 data show that SNAP mothers had 6.7 teaspoons, SNAP teenagers consumed 7.5 teaspoons, and children ate 7.0 teaspoons of added sugar over a 24-hour period. Over a week's time, individuals from the SNAP population consume over 49 teaspoons of added sugar.

Almost one-fifth of mothers (17.8%) and teenagers (18.5%) from SNAP households eat at a fast food restaurant one or more times a day; 15.1% of children reported eating at a fast food restaurant. The ASA24 data allow for calculating more revealing information regarding unhealthy eating behaviors. Specifically, the frequency and caloric intake of eating high-fat, fast-food type foods, regardless of location, were examined. Overall, 19.4% of mothers eat high-fat foods at least once per day. However, over one-fourth (26.5%) of teenagers and nearly one-third (31.3%) of children consume high-fat food every day. Regardless of age group, a greater proportion of African Americans eats high-fat foods than whites or Latinos, and likewise consumes more calories from high-fat fast-foods.

Some good news is that we found a decrease for the proportion of teenagers who ate at a fast food restaurant every day. Measures of eating at a fast food restaurant did not change from 2013 to 2014 among mothers and children.

Summary. Access to healthier foods is much higher for adult females through California overall and for those ≤ 185% FPL than for SNAP mothers, but the availability of fruits and vegetables, low-fat milk, and whole grain breads appears to be increasing for the target population. The SNAP population eats fewer cups of fruit and vegetables, and more teaspoons of added sugar, than the Dietary Guidelines for Americans recommended levels. Over one-fourth of SNAP teenagers and nearly one-third of SNAP children eat high-fat, fast-food type foods daily. African Americans are more likely than whites or Latinos to eat high-fat foods.

Older adult's ability to access, purchase and consume nutrient dense foods, such as fruits, vegetables may be limited and contribute to intake of high-calorie foods with low nutritional value. Low-income older adults may have difficulty accessing nutrition assistance due to other factors not seen in other age cohorts. Age-related impairments may prevent them from accessing healthy foods.

Consumption and Access to Healthy Beverages and Reduce Consumption of Unhealthy Beverages

Unhealthy Beverage Consumption: SNAP Versus Other Populations. The most recent (2013-2014) CHIS provides statewide estimates for drinking SSBs, as reported by representative samples of adult females, teenagers, and children overall, older adults, and those from households with income ≤ 185% FPL. Comparable data are available from the 2015 Champions for Healthy Change survey. Older adults were not included in data from 2015 Champions for Healthy Change survey.

Among all California adult females, 31.7% drink one or more sodas with sugar per week. The percent of mothers from SNAP households who report one or more sugar sodas weekly is 46.9%, similar to the rate of 43.1% for adult females across the state with household income ≤ 185% FPL.

A much smaller proportion of teenagers from SNAP households drink SSBs than those from non-SNAP households. That is, 10.1% of SNAP teenagers drink two or more SSBs per day, compared with 12.4% of teens across California and 16.1% of teens in California within ≤ 185% FPL households.

CHIS provides statewide estimates among low-income older adults age 60 and older. Approximately 25.4% of older adult's drink one or more sodas per week.[29]

SNAP Population: Types and Levels of Unhealthy and Healthy Beverage Consumption. ASA24 data from the 2014 Champions for Healthy Change survey found that mothers drink 1.1 cups of SSBs per day, equating to 93.2 calories. Teenagers drink more sugar-sweetened beverages (1.3 cups) than mothers, while children drink fewer cups (0.7). Separate items on the Champions for Healthy Change questionnaire asked mothers about individual types of SSBs. Through these questions we determined that SNAP mothers are much more likely to drink coffee and tea drinks with sugar than sodas with sugar, diet sodas, sports drinks, energy drinks, or sweetened fruit drinks.

In terms of healthy beverages, mothers reported drinking 4.0 cups of non-caloric water over the previous 24 hours; teenagers reported 2.6 cups and children 2.0 cups. Consumption of no fat or low fat milk is limited; the average number of cups of healthy beverages (water, no fat milk, and low fat milk) was 4.1 cups for mothers, 2.8 cups for teenagers, and 2.2 cups for children.

Unhealthy and Healthy Beverage Consumption by Racial/Ethnic Groups. Across the three adult female populations (all adult females and those ≤ 185% FPL from CHIS; and SNAP mothers from the 2013 Champions for Healthy Change survey), a smaller proportion of whites compared with African Americans and Latinas consume sodas or other sugary drinks on a regular basis. However, whites reported drinking sweetened coffee or tea beverages more often than African Americans or Latinas. A greater proportion of African American teenager's drink SSBs than white or Latino teenagers regardless of poverty level and SNAP household participation.

Latina mothers consume more healthful beverages and fewer unhealthy beverages. Latinas drink 4.6 cups of healthy beverages per day, 0.5 cups more than African Americans and 0.8 cups more than whites. These same trends were found for teenagers and children. Moreover, African American and white mothers drank over a third-cup more of sugar-sweetened beverages per day than Latinas. Differences across the three major racial/ethnic groups did not differ by more than a third of a cup for teenagers and children.

Three-Year Change in SNAP Population: Types and Levels of Unhealthy Beverages. The series of BRFSS items included in the 2013, 2014, and 2015 Champions for Healthy Change survey allow for examining potential decreases across various types of SSBs. From 2013 to 2014, significant declines were seen among mothers for consumption of sodas with sugar, diet sodas, sports drinks, energy drinks, sweetened fruit drinks, and coffee and tea drinks with sugar (Figure 4). For the most part the 2014 levels of consumption remained through 2015. The exceptions are a slight increase in consumption of sodas with sugar, and a continued decrease in levels of consumption of sweetened fruit drinks.

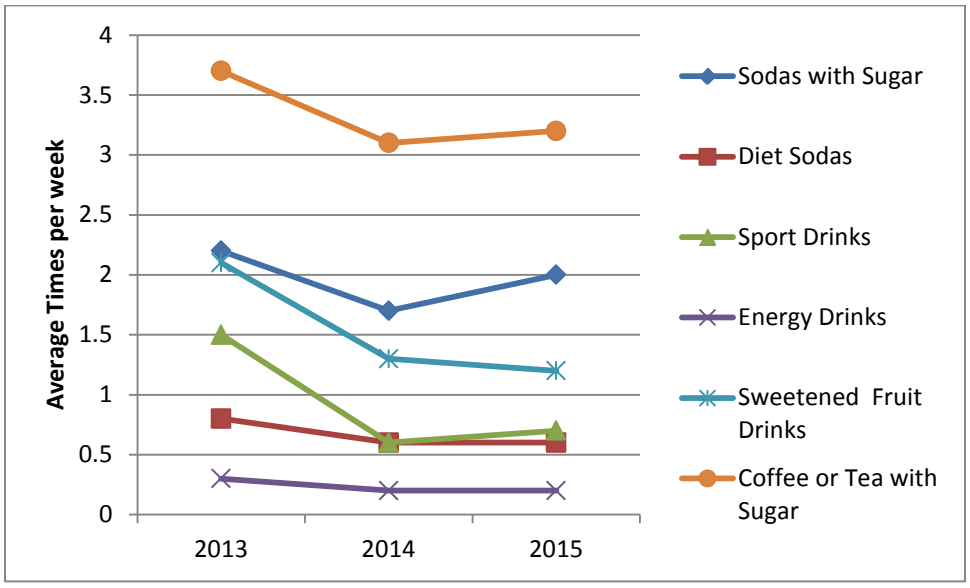

Figure 4: Changes in Beverage Consumption among Mother from SNAP Households, 2013 to 2015

Consumption of water also decreased over the three-year period, from a reported 31.8 times per week in 2013 to 29.8 times per week in 2015.

Decreased consumption of SSBs also occurred among teenagers, with the exception of number of cups of energy drinks which remained unchanged. Consumption of water did not change among teenagers between 2013 and 2015. Children were asked about the number of glasses of soda and other SSBs they drank yesterday. No difference was found for soda, but the average number of glasses of "sweetened drinks, such as fruit punch, fruit drinks with sugar, and sports drinks" declined from 2013 to 2014.

Limiting Access to Unhealthy Beverages in the Home. The 2014 and 2015 Media Evaluation surveys asked over 1,000 mothers from SNAP households about access to beverages in their family. In both years, over 91.1% of mothers indicated that they have set limits on the amount of sweetened beverages available for their children. There were also high proportions of mothers who said that they have replaced sugary drinks with water for the family at meals or snacks (87.5%; 88.0% in 2015).

Summary. A higher proportion of SNAP mothers than adult females across the state drink unhealthy beverages, but fewer SNAP teenagers drink unhealthy beverages than those from other populations. Levels of SSB consumption among SNAP mothers, teenagers, and children may be declining. Reduced SSB is not leading to increased water consumption, and may be due to individual choices (direct education) rather than mothers limiting the family's access to unhealthy beverages. African Americans were found to drink SSBs more frequently and in greater quantities (except for sweet coffee and tea drinks), and clearly represent the most important population to target unhealthy and healthy drinking educational messages and interventions.

Physical Activity and Sedentary Behavior

Both our Champions for Healthy Change and Media Evaluation surveys suggest that levels of physical activity may be decreasing among the California SNAP population.

Physical Activity Among Older Adults. BRFSS data show that 60.7% of California's adults age 65 years and older participate in 150 minutes or more of aerobic physical activity per week, 25.0% participate in muscle strengthening exercises more than twice per week, and 20.4% participate in enough aerobic and muscle strengthening exercises.[6] From 2011 to 2014, statewide rates of no leisure-time physical activity in older adults increased from 23.5% to 26.2%, respectively.[28] Racial and ethnic minorities generally engage in less physical activity. Adults age 65 years and older and with less than high school education face the greatest disparity in physical inactivity prevalence in California.[7]

Physical Activity Among Adult Females. In 2013 and again in 2015, SNAP mothers were asked, "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, Zumba, gardening or walking for exercise?" Affirmative responses to this question decreased from 97.3% to 72.8% over the three-year period. From

2014 to 2015, a significant decline was also observed for the proportion of mothers who met the 150 minutes per week recommended level of physical activity, 61.9% to 52.2%.

Physical Activity Among Teenagers and Children. Teenagers and children (or children's mothers for proxy interviews) were asked about physical activity going to and at school during the school year. The average number of days reported walking or riding a bike to school decreased for both teenagers and children from 2013 to 2014 (Figure 5), but increased from 2014 to 2015 for children. Number of days going to physical education classes also declined among teenagers, and increased slightly among children.

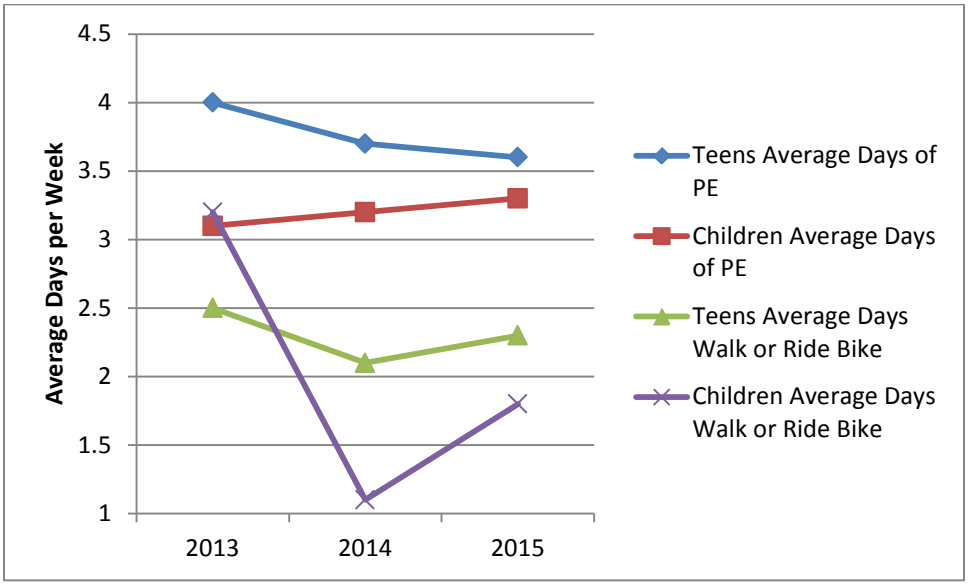

Figure 5: Changes in Physically Active Behaviors Among Teenagers and Children from SNAP Households, 2013 to 2015.

No change was found for the average number of days during the past week that teenagers reported physical activity for at least 60 minutes. Finally, the proportion of children who were physically active at play for one hour or more decreased, from 85.2% to 75.4% from 2013 to 2014.

Mothers' Physical Activity Support and Participation. Mothers' responses to two items on the Media Evaluation surveys related to support of and participation with their children's physical activity are in line with those findings presented above. That is, between 2014 and 2015 there was a reduction in the proportions for mothers who stated that every day they "make it easy for their children to be physically active" and "are physically active with their children."

Physical Activity Across Racial/Ethnic Groups. Fewer African American mothers reported physical activity during the previous month (79.5%) than whites (81.8%) or Latinas (82.6%). Fewer Latino teenagers and children participated in physical activity for at least one hour a day than white and African American teenagers and children.

Summary. Levels of physical activity appear to be declining among the California SNAP population. It is important to note that our analyses on physical activity survey responses (as well as SSBs in the previous section) examine potential changes only over a one-year time period. One-year changes certainly do not represent a trend. However, given that decreases are found on a number of different items, among the three age groups under study, across two surveys, there is convincing evidence that the SNAP population is becoming less physically active.

Environmental Supports for Nutrition Education and/or Physical Activity

Through partnerships, community engagement, and local needs assessments, LHDs prioritize need in their communities to inform policy, systems, and environment (PSE) change strategies. In FFY 2015, 58 LHDs reported activities in 16 policy, systems, and environmental (PSE) categories: early childcare, school wellness, healthy schools, Smarter Lunchrooms Movement, safe routes to school, farm-to-school, farm-to-fork, joint use agreements, water stations, healthy retail, restaurant and mobile vending, structured physical activity, community and school gardens, worksite wellness, farmers' markets, and healthy food and beverage standards. These PSE activities took place at 745 unique sites within various settings. The following table describes a) the number of unique SNAP-Ed eligible sites in which PSE change activities were conducted and b) the number of unique sites at which needs assessments were conducted in FFY 2015 in each of the domains defined in the USDA Western Region Evaluation Framework.

Domain	Setting	Number of unique sites with PSE activity in FFY15*	Number of sites at which assessments were conducted in FFY15
Eat	Restaurants, mobile vending	3	2
Live	Community organizations or sites, faith-based organizations, apartments, public housing	82	24
Learn	Early childcare, schools	407	175
Work	Worksites	87	53
Play	Parks, walking & biking paths	6	3
Shop	Retail sites, farmers' markets, food assistance sites	160	50

*Sites may have implemented more than one PSE strategy

Access, Quality, and Affordability of Fruits and Vegetables. The healthy food access literature indicates that accessing healthy food is a challenge for many families, particularly those living in

low-income neighborhoods, communities of color, and rural areas [8-12] and suggests that living closer to healthy food retail is associated with better eating habits and decreased risk for obesity and diet-related diseases. [13-16]

The SNAP-Ed funded Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX^3) projects conducted by 43 LHDs in FFY 2011-FFY 2014 assessed 1,388 food retail stores in 189 low-income California neighborhoods (defined as neighborhoods where ≥50% of households are at or below 185% FPL). These CX^3 Food Availability and Marketing Survey data suggest that convenient access to good quality and affordable fruits and vegetables is an issue for many low-income Californians. The majority of stores assessed (79%) in these low-income neighborhoods were small markets and convenience stores, while only 16% were supermarkets or large grocery stores. From the surveys, scores were calculated to represent the extent to which stores meet quality standards based on the type of store (WIC/SNAP/CalFresh vendor), and other factors, such as: fruit and vegetable prices, the availability and quality of fruits and vegetables, the availability of other healthy foods, the presence of nutrition information, exterior marketing conditions, interior marketing conditions, and walkability/safety. A larger percentage of supermarkets (68%) and large grocery stores (47%) met quality standards than did small markets (8%) or convenience stores (0.2%). Although a majority of small markets did sell produce, the percentage of stores that sold a wide range of good quality of fruit (33%) and vegetables (44%) is lower than supermarkets (94%, 95%) and large grocery stores (85%, 92%). Fresh fruits and vegetables are usually more expensive in these low-income stores, with only 19% of supermarkets, 23% of grocery stores, 5% of small markets, and no convenience stores having prices on par or below county averages. These data suggest opportunities to address the need for quality and variety of produce in small markets and convenience stores, which comprise the majority of stores being targeted by SNAP-Ed interventions.

In FFY 17, 17 LHDs will be using CX3 to assess their communities. This community food environment needs assessment tool is used by LHDs to inform their NEOP program as they begin implementation of their FY 17-19 work around PSE interventions related to local food environments.

Opportunities to Increase Physical Activity. Considering aspects of the community built environment, a significantly lower percentage of children and teens from the lowest income households in California reported visiting a park or other open space in the past month than those from the highest income households (78.8% versus 84.1%).[17]

As data from the Physical Activity and Sedentary Behavior section suggest, there is room for improvement in facilitating increased physical activity among California's children and teenagers. The CDC, the Institute of Medicine, the White House, and the Office of the Surgeon General recognize the pivotal role of schools and the community built environment in increasing physical activity levels. Recommended strategies include requiring and improving physical education during and after-school, increasing extracurricular physical activity, and

improving the availability, design, and safety of features such as outdoor recreational facilities and infrastructure supporting bicycling and walking. [18-21]

Food Resource Management and Food Security

Household food insecurity is linked to poorer nutritional, physical, and mental health among adults and children[22] and disproportionately impacts individuals belonging to racial/ethnic minorities.[23] CHIS reported 30.9% of older adults with incomes less than 200% FPG are not able to afford enough food or are food insecure.[29] Among older Californians, 16.3% face the threat of hunger or are marginally food insecure, 9.1% are food insecure, and nearly 4.0% have very low food security and experience hunger.[24] Older adults living at or below the FPL are at increased risk of food insecurity. Food insecure older adults have significantly lower food intakes resulting in poorer intake of the calories, vitamins and minerals (vitamins A, C, riboflavin, and magnesium) necessary to maintain optimal health.[24] Additionally, these food insecure older adults were more likely to report being in poor or fair health, socially isolated, hospitalized more often, and having significantly more activity of daily living impairments (bathing, dressing, eating, etc.).[24] SNAP-Ed programming in California addresses these disparities in food security through food resources management education, and educational opportunities at emergency food distribution sites, and informing participants of other nutrition and federal nutrition programs and resources within their communities.

Food Security. CDPH's Impact Outcome Evaluation project requires LHDs to conduct an outcome evaluation with youth or adults. Adult classes included content that addressed food resource management, such as eating healthy on a budget, planning healthy meals, and shopping on a budget. The adult interventions were typically evaluated with the Food Behavior Checklist (FBC) to assess the impact of their SNAP-Ed nutrition education efforts. The FBC asks the question, "Do you run out of food before the end of the month?" Adults (18+ years, n=1,486) who received at least five, thirty-minute nutrition education classes showed a 4.9% decrease in running out of food before the end of the month. A larger percent reported never running out of food before the end of the month at post-test (38.2%) than at pre-test (35.0%).

Food Resource Management. Food resource management (FRM) education is one of the most requested educational trainings that UC CalFresh offers eligible clients. The ability to successfully procure healthy foods throughout the month while reducing instances of food insecurity (running out of food by month's end) can be positively influenced by an individual's ability to assess nutritional values of available food resources, their ability to budget their limited food dollars and their ability to critically assess the impact of food marketing on their buying behaviors. UC CalFresh includes food resource management in Making Every Dollar Count and Plan, Shop, Save, Cook.

> ***Making Every Dollar Count (MEDC) Evaluation*:** Based on a retrospective survey of 605 MEDC participants in 7 counties, more than three-quarters of participants made improvements in knowledge and skills for all MEDC measures: knowing easy ways to

save money on food; knowing simple healthy meals to make; and understanding food ads. Results for MEDC exceeded all three SMART Objectives (>50%).

***Plan, Shop, Save, Cook (PSSC) Evaluation*:** The UC CalFresh signature adult curriculum PSSC consists of four lessons adapted from the eight lesson curriculum Eating Smart, Being Active (ESBA). Evaluation of PSSC uses a 7-item food behavior pre- and post-test. Sixteen counties collected surveys from a total of 1,678 participants who participated in PSSC. Participants making improvements in any of the food resource management behaviors ranged from over a third (38% improved in thinking about healthy choices) to nearly two-thirds (62% improved on using MyPlate) of participants. The number of participants who reported "Almost always" or "Most of the time" improved significantly ($p<.001$) for all behaviors:

- Up by 28 percentage points for using MyPlate
- Up by 22 percentage points for using nutrition facts label
- Up by 18 percentage points for planning meals
- Up by 17 percentage points for shopping with list
- Up by 14 percentage points for comparing unit prices
- Up by 13 percentage points for thinking about healthy food choices

A study of two years of PSSC evaluation data (FFY 2012 and FFY 2013) found that a greater use of resource management skills among PSSC participants was significantly related to a reduction in running out of food before the end of the month.[25] In addition, participants who received CalFresh benefits and made more improvements in resource management skills reported the greatest decrease in running out of food. The FFY 2015 PSSC evaluation results show that individuals who participated in the PSSC series reported being less likely to run out of food before the end of the month ('Never' or 'Seldom' up by 7 percentage points, $p<.001$), representing an increase in food security.

Finally, the University of California Cooperative Extension (UCCE) conducted six focus groups with UC CalFresh adult participants (n=54) and a one to six month follow-up with a subsample (n=22) of these participants in 2013 to examine the outcomes of the PSSC curriculum.[26] Many attitudinal and behavior changes reported by focus group participants were consistent with those measured using the existing pre/post evaluation tool, such as greater awareness of healthy food choices and reading the Nutrition Facts label. However, two areas were identified in the follow-up as sustained changes that are not currently captured by the pre/post tool: 1) changes in cooking practices and 2) the types of food purchased. Both of these areas may influence diet quality. To capture these changes, additional questions could be added to the PSSC evaluation tool to ask about use of healthier cooking methods (such as steaming or baking rather than frying) and purchase of healthier options (such as fish, poultry or beans rather than red meat).

Food Distribution. Catholic Charities is a state implementing agency whose agencies deliver SNAP-Ed services at emergency food distribution sites. "Food distribution environments have

the potential to…motivate behavior change through peer, staff, and nutritional educational materials and activities reinforcement of healthy messages."[27] This provides evidence for the appropriateness and effectiveness of direct education, indirect (one-time, brief exposure) nutrition education and obesity prevention efforts targeted toward low-income SNAP-ED eligible populations at emergency food distribution sites.

Summary: Food resource management education can improve diet quality, and the combination of resource management education and CalFresh benefits is associated with improved food security for CalFresh participants.

Implications: These findings suggest that resource management curricula are a vital component of nutrition education for participants with limited resources, and further provide justification for expanding SNAP-Ed efforts to improve food security through food resource management education.

3. Other Nutrition-Related Programs Serving Low-Income Persons: *Discuss the availability of other nutrition-related programs, services, and social marketing campaigns (i.e., EFNEP, Child Nutrition services, etc.).*

Attachment 5: Provides a brief summary of non-funded SNAP-Ed partners that California State Implementing Agencies (SIAs) work with on other nutrition-related programming to enhance the services provided to low-income persons in California.

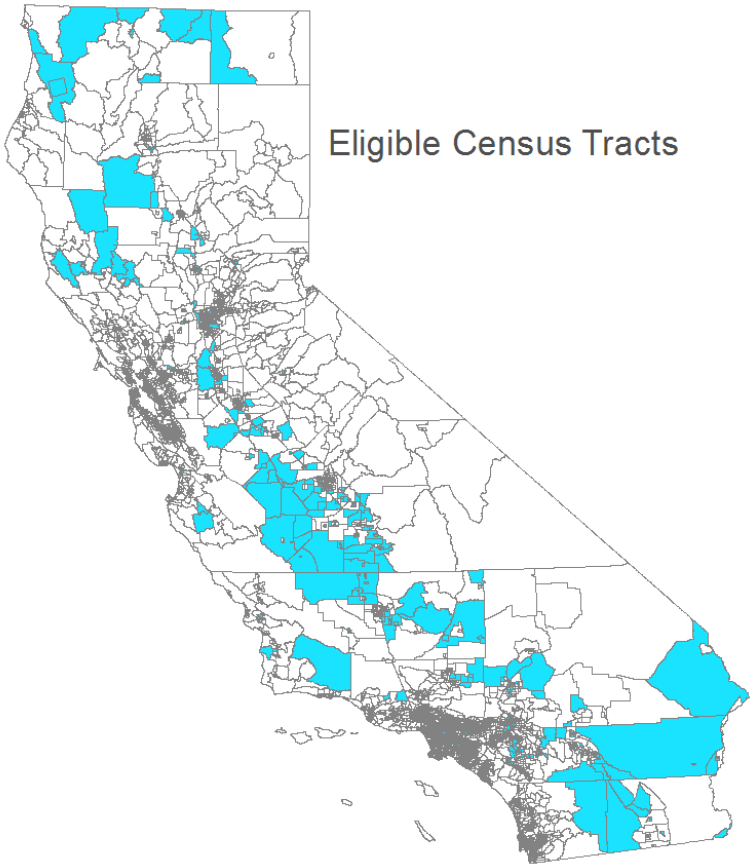
Additionally, low-income Californians have access to an assortment of food and nutrition programs sponsored by various entities. Federal food program participation in the state includes more than 4.3 million Californians participating in CalFresh (California's SNAP), 1.3 million WIC participants, 3.3 million children eating school lunch on an average day, and

515,000 Child and Adult Care Food Program participants. Nutrition education programming is provided by the Expanded Food and Nutrition Education Program in many California counties, and the Dairy Council provides nutrition education curricula for many schools. A number of non-funded partners provide resources for policy, systems, and environmental change interventions in various locations in the state, including The California Endowment, Kaiser Permanente, and the Centers for Disease Control and Prevention. Further, many California counties, cities, and towns have local coalition efforts comprised of both SNAP-Ed funded and non-funded partners focused on improving nutrition and physical activity and preventing obesity, and many also have local funders supporting these efforts.

4. Areas of the State Where SNAP Target Audience Is Underserved or Has Not Had Access to SNAP-Ed Previously

SNAP-Ed efforts are concentrated in locations demonstrating the most economic need using USDA specifications for the prevalence of SNAP participation/eligibility, low-income census tracts, means tested programs, qualifying congregate meal sites, or schools where the majority of students qualify for FRPM, as well as implementing nutrition and physical activity policies at organizations where SNAP eligible groups are predominantly located such as worksites of low-wage earners or eligible youth- and faith-based organizations.

The total SNAP-Ed eligible census tracts are shown below (see map) based on the criteria of 50% or more of the residents having income less than 185% FPL (American Community Survey 5-year data 2009-2013 and 2010-2014). Of these, California SNAP-Ed provides services in 56.8% of the eligible census tracts.



For specifics pertaining to local SNAP-Ed targeting efforts, please see Section B of each jurisdiction's integrated work plan.

The California map displayed below shows the county breakdown of the 13,090 unique SNAP-Ed sites providing direct services to eligible populations in 57 counties across the State. In addition, the SNAP-Ed sites in each county are also compiled for each of the SIAs in Attachment 6. For CDPH, 57 county and three city LHD projects plan to provide nutrition education at 10,471 sites in 57 counties. Four of the CDPH contracts cover multiple counties. These include Solano, which covers Napa; Plumas, which covers Lassen and Modoc; CSU Chico, which covers Colusa and Glenn; and Monterey, which covers San Benito. UC CalFresh provides statewide nutrition education through University of California County Extension offices at 1,684 total sites in 31 counties. In FFY 2017, CDSS will fund six Get Fresh county welfare offices. Catholic Charities to provide nutrition education and obesity prevention services at an array of community sites including shelters, food distribution centers, social service offices, and low-income housing developments with a total of 502 sites covering 26 counties across the State. CDA provides nutrition and physical activity education to older adults that attend 18 of the 33 local Area Agencies on Aging (AAA) through its 338 venues where seniors congregate reaching eligible seniors in 29 counties. Site eligibility was determined by employing the Network for a Healthy California Geographic Information System (GIS) and American Community Survey (ACS) 2010-2014 ACS Census Block Groups lists developed by CDPH. AAAs use means-tested sites

such as low-income housing facilities to qualify additional SNAP-Ed eligible sites. CDA developed, and USDA, FNS approved, two alternate survey methods to qualify congregate nutrition sites for SNAP-Ed using intake records and surveys to establish income eligibility. In FY 2016, AAAs identified 44 sites using these alternative methods to qualify eligible sites.

Overall, California SNAP-Ed provides direct services in 560 (57 county and three city) of the 61 health jurisdictions (58 county and 3 city). One county, Sierra, has no direct service SNAP-Ed project sites (Attachment 3). The SNAP/CalFresh participation for this counties represents a small fraction (<0.01%) of the total SNAP/CalFresh participation in the State. In addition, none of Sierra's census tracts qualify for direct SNAP-Ed services. Attachment 4 includes a list of the 6,900 California low-resource schools qualifying for SNAP-Ed (≥ 50% FRPM; CDE, 2015-16 FRPM data file). As for place-based reach, California SNAP-Ed provides services in 52.2% (2,149 of 4,119) of the eligible census tracts and 49.1% (3,336 of 6,791) of the low-resource schools in the State.

Summary. Sierra County, which represents a tiny fraction (<0.01%) of the SNAP/CalFresh participation in the State, has no direct service SNAP-Ed projects. In addition, California SNAP-Ed does not reach 47.8 % of the eligible census tracts or 3,455 eligible, low-resource schools.

Implications. Coordination between the five IAs in the state can promote a seamless delivery of California SNAP-Ed in each county to better serve the eligible populations. Two counties in the State remain without direct services based on the lack of qualifying census tracts to provide direct services.

5. Implications of Your Needs Assessment and How These Findings Were Applied to This Current Year's SNAP-Ed Plan

In FFY 2017, LHDs entered into new three-year grant agreements with CDPH. LHDs used CX3 needs assessment data or other evidence-based needs assessments to identify the best PSE strategies and interventions to implement in FFY 17-19. The LHDs utilized the "CDPH nutrition education and obesity prevention portfolios" to guide their development of interventions and activities they plan to implement as part of the FFY 17-19 integrated work plans (IWPs) with other local implementing agencies in their jurisdiction. IWPs reflect LHDs' coordinating multi-level intervention activities, media messages and materials, and evaluation activities that are more refined and focused obesity prevention efforts and support overall community health change goals.

As described in prior SNAP-Ed State Plans, LHDs continue to coordinate with local partners and involve multiple sectors to improve nutritional status and prevent obesity among California's low-income population. The funding that LHDs receive continues to be population-based to more effectively reach the SNAP-Ed eligible population across all small, medium, large, and extra-large counties; and reduce gaps in SNAP-Ed services across the State. LHDs will continue subcontracting and partnerships with community-based organizations to maintain the reach and strength of this noteworthy model and fill gaps for services note presently being served by

other implementing agencies. Coordination, collaboration, and joint activities amongst LHDs continue throughout FFY 17-19 with their respective local implementing agencies (LIAs). Collaboratives and/or CNAPs that include both FNS funded and non-FNS funded partners used needs assessment data to help identify and include county-level community change goals in FFY 17-19 IWPs.

Needs assessment data described in Section 2 support proposed FFY 17-19 activities and objectives in the local IWPs by helping LIAs identify and focus efforts in particular sites and policy, systems, and environmental strategies (PSE). With CDPH led workgroups, SIAs use the data to help guide the development of resources, trainings, and the LIA Forum sessions. Additionally, county specific profiles developed in advance of the FFY 17-19 IWP continue to serve as a valuable resource for LIAs to identify needs and gaps of their SNAP-Ed target populations.

Reflective of federal guidance based on the Healthy Hunger Free Kids Act of 2010, the integration of nutrition education into PSE related interventions and strategies will continue and be supported by the structure of the FFY 17-19 IWP proposals. There is support for continuing the focus on integration of nutrition education messages into PSE strategies. Nutrition education and obesity prevention efforts must be targeted to those geographic areas and to populations that are at highest risk. Interventions with a growing or established evidence-base to support change will be implemented throughout FFY 17-19. The updated USDA SNAP-Ed Strategies and Interventions: An Obesity Prevention Toolkit for States was and will continue to be promoted to LHDs/LIAs.

Needs assessment data showed that consumption of fruit and vegetable remain unchanged and there is some evidence for a decrease in vegetable intake. African Americans were also found to eat more unhealthy (fast) foods. With regards to the consumption of SSBs, teenagers from SNAP households consumed fewer SSBs than their counterparts throughout the State. SSB consumption among the SNAP participants is decreasing. However, disparities still exist with African Americans drinking more SSBs than whites or Latinos. SNAP-Ed efforts will also be aimed at replacing the consumption and access to high calorie, low nutrient beverages with water and low fat/skim milk support healthy choices among low-income Californians. This includes working to replace unhealthy beverages with healthy options and establishing healthy beverage access and promotions to support low-income communities in meeting the DGA through fast food outlets, at schools and worksites, and in the home.

Working at multiple levels of the socio-economic model to implement PSE strategies, as supported by the research literature, will continue. Needs assessment data show that SNAP mothers' access to healthier foods appears to be increasing, but levels are still far below general and low-income populations. African Americans and Latinos report lower access than whites. Although there was an increase in availability of healthier foods within the community, this has not led to increased access within the home. SNAP-Ed efforts through multiple SIAs and LIAs will be working collectively to enhance or establish healthy food access and promotions to

support low-income communities in meeting the DGA through retail, farmers' markets, gardens, and fast-food outlets; at schools and worksites; local congregate meal sites, and in the home.

As described previously, there was evidence of decreased physical activity among SNAP mothers, teenagers, and children, which may be due in part to declines in support for and participation in physical activities with their children. CDPH will focus on identifying opportunities to strengthen the physical activity into its statewide media campaign and messages; and support the integration of physical activity into nutrition education activities at the local level. Promising environmental supports to SNAP-Ed efforts include targeting low-wage worksites to promote worksite policies supporting a healthy lifestyle among low-income working Californians, enhancing or establishing healthy food access and promotions to support low-income communities, promoting active lifestyles by incorporating environmental supports to increase physical activity (e.g., participation in organized sports; exercising together as a family; expanding structured physical activity in preschools, schools and before/after school programs; incorporating hardscapes like playground stencils to support active play and daily PE at school for all children) and reducing screen time (e.g., removing TV from children's bedrooms and setting household limits on screen time).

CDA will continue providing SNAP-Ed services to California's older adult population through subvention grants with 16 participating AAAs. These agencies provide OAA services in 27 counties throughout California. AAAs provide SNAP-Ed services through Title IIIC congregate nutrition programs, senior/public housing, and other venues where eligible seniors congregate.

The statewide needs assessment demonstrated that CDA and the AAAs have access to both the intended low-income SNAP-Ed audience and the expertise to provide SNAP-Ed services to the target population. CDA's SNAP-Ed program will continue to promote behavior change to support healthy eating and physical activity using direct and indirect education, and policy, systems and environmental change approaches to address the needs of SNAP-Ed eligible older adults. This needs assessment continues to support specific evidence-based curricula that promotes behavior change and identified areas where environmental supports can be implemented to support low-income older adults to make healthier food choices within their limited budget and increase physical activity in their homes and community.

4. University of California

Agriculture and Natural Resources (ANR)—http://ucanr.org/

UC CalFresh works in partnership with the UC Division of Agriculture and Natural Resources (UC ANR). UC ANR, as part of their organizational structure, oversees the University of California's County Cooperative Extensions, 4H, Master Gardener Program and Master Food Preserver Program.

- UC County Cooperative Extension—As a land-grant institution, the mandate of Cooperative Extension is tied to the welfare, development, and protection of California agriculture, natural resources, and people. Cooperative Extension was established in 1914 as a partnership between the U.S. Department of Agriculture and land-grant institutions. Today University of California Cooperative Extension (UCCE) has farm, 4-H, and nutrition, family and consumer sciences advisors based in more than 50 county offices throughout California. UCCE serves as the local implementing agencies (LIAs) for the UC CalFresh Nutrition Education program.

- 4H—http://4h.ucanr.edu/—The University of California 4-H Youth Development Program provides a wide variety of enrichment activities with the ultimate goal of giving youth the skills they need to thrive and succeed throughout their lives. The focus of all 4-H programs is positive youth development through activities in science literacy, healthy living, and citizenship. UC CalFresh is partnering with the 4H program to work collectively on youth engagement and enrichment activities to move from serving youth to engaging youth in youth focused programs.

- Expanded Food and Nutrition Education Program (EFNEP)—http://efnep.ucdavis.edu/—the Expanded Food and Nutrition Education Program (EFNEP) is a federally-funded program USDA's NIFA. EFNEP is administered by the University of California Cooperative Extension in 24 of California's 58 counties. EFNEP assists limited-resource clients gain the knowledge, skills, attitudes, and changed behavior necessary to choose nutritionally sound diets and improve well-being. State level planning and coordination of program services takes place. EFNEP is invited to participate in local CNAP's and to be included as part of the planning of the county IWP's.

Center for Nutrition in Schools (CNS), UC Davis—http://cns.ucdavis.edu/

UC Davis established the Center for Nutrition in Schools (CNS) in response to the needs of teachers and administrators for nutrition education resources and professional development opportunities. The goal is to provide resources relevant to child nutrition programs, district wellness policies, community partnerships, student education, professional education, and parent education. UC CalFresh is working with CNS to train and orient communities to integrate the Shaping Healthy Choices Program (SHCP) in schools in the UC CalFresh County programs. SHCP is a multi-component, comprehensive school-based nutrition and obesity prevention

intervention.

5. **Catholic Charities of California, Inc. (CCC)**
   CalFresh Outreach program (contracted by CDSS, administered by CCC)
   CCC agencies receiving federal funds for both SNAP-Ed and CalFresh Outreach have established partnerships to cross-promote programs and support the increase in participation in SNAP of those eligible to receive benefits. Agencies cross train staff and formally coordinate promotional efforts and client participation in SNAP as well as SNAP-Ed.

Categorical Programs Operated by California State Government:

1. **California Department of Social Services**

USDA Farm to School Grants Program—This program provides grants to school districts, state and local agencies, tribal nations, agricultural producers, and non-profit organizations in their efforts to improve access to local foods in eligible schools. The grants can be used towards training, supporting operations, planning, purchasing of equipment, developing school gardens, developing partnerships, and implementing of the farm to school programs. In 2016, nearly $5 million total farm to school grants were awarded to 74 projects.

California Farm to School Network—This network takes on a leadership role in support of Farm to School efforts, sharing resources, and bringing farmers, schools, distributors, and practitioners together. Farm to School implementation includes the procurement of local foods; educating students on agriculture, food, health, or nutrition; and engaging students with hands-on gardening. The Office of Farm to Fork will be taking the leadership role of the future direction and ensuring that the proper technical assistance will be provided to local health departments, SIA, LIAs, and partners.

National Farm to School Network (NFSN)—NFSN provides vision, leadership, and support at the state, regional, and national levels to connect and expand Farm to

School efforts. Students and their families gain access to healthy foods and are empowered to make better food choices. NFSN was launched in 2007 by a collaboration of more than 30 organizations wanting to shape the Farm to School movement. The California Farm to School Network and Farm to Preschool play an active role with NFSN.

Food Insecurity Nutrition Incentive (FINI) Grants Program—This program supports projects to increase the purchase of fruits and vegetables among those receiving the Supplemental Nutrition Assistance Program (SNAP) benefits by providing incentives. There are three project categories which include: FINI Pilot Projects (max of $100,000 a year), Multi-Year, community-based FINI Projects (max $500,000 over no more than four years), and Multi-Year, large scale FINI Projects (min $500,000 over no more than four years). These projects provide an opportunity for stakeholders to come together for better understanding on how they might improve nutrition and health for SNAP recipients. The Office of Farm to Fork will be playing an active role in the implementation of the grant programs in California for both farmers' markets and the retail setting.

Commodity Supplemental Food Program (CSFP)—The Commodity Supplemental Food Program (CSFP) is a federally funded program that provides nutritious food supplements for eligible recipients. On February 7, 2014, President Obama signed the Farm Bill into law amending the CSFP eligibility requirements to a low income senior's only program. As a result, CDSS is working with CSFP agencies on phasing out the participation of women, infants, and children.

2. California Department of Aging

Senior Farmers' Market Nutrition Program—The Senior Farmers' Market Nutrition Program (SFMNP) is a 100 percent federally funded program which provides low-income seniors with check booklets that can be used to purchase fresh fruits, vegetables, cut herb and honey at Certified Farmers' Markets (CFM). CDFA partners with California's 32 Area Agencies on Aging (AAA) to distribute the SFMNP check booklets which include five checks redeemable for $4 each.

Older Americans Act Programs Nutrition Services Programs (Title IIIC):

Congregate Meals Program (Title IIIC1)—The Congregate Nutrition Program serves meals in a group (congregate) setting to individuals aged 60 or older. Sites also provide nutrition education, nutrition risk screening and nutrition counseling in some areas. The Program targets older individuals with the greatest economic or social need, with particular attention to low-income, minority older individuals, and older individuals living in rural areas. The Program encourages the use of volunteers and gives all participants the opportunity to contribute to the cost of the meal. Meals incorporate the Dietary Guidelines for Americans (DGA) and provide a minimum of one-third of the Dietary Reference Intakes (DRI).

Home-Delivered Nutrition Program (Title IIIC2)—The Home-Delivered Nutrition Program provides nutritious meals, nutrition education, and nutrition risk screening to individuals 60 years of age or older that are homebound due to illness or disability, or

are isolated. Program goals are to promote better health through nutrition, provide links to other supportive services and reduce social isolation through contact with the individuals who deliver the meals. Meals meet nutritional standards contained in the DGA and provide a minimum of one-third of the DRI. Programs provide nutrition education at least four times per year and nutrition counseling is available in some areas.

Disease Prevention and Health Promotion (Title IIID)—The Disease Prevention and Health Promotion Program provide evidence-based preventive health and health promotion services. Title IIID supports services that assist older adults in preventing illness and managing chronic conditions. Title IIID evidence-based health promotion programs help older adults learn techniques and strategies to delay and/or manage chronic health conditions and may include activities that improve nutrition, prevent falls, and promote physical fitness and emotional well-being.

3. California Departments of Public Health and of Health Care Services

California's Women, Infants and Children Nutrition Program (WIC) provides statewide services through 84 local agencies and serves 1.46 million mothers, infants and children each month, with 63 percent of all infants born in California enrolled in the program in 2010. Based on successful experience with the federally-funded Fit WIC! And Newborn Baby Behaviors projects, and a six-fold increase in breastfeeding peer counselor funds, California has taken significant steps to prevent childhood obesity using interventions in pregnancy and infancy. Research published in the Journal of Nutrition Education and Behavior (JNEB) in May 2010 demonstrated increased WIC family consumption of fruits and whole grains, and replacement of whole milk with lower-fat milk as a result of nutrition education alone. Another wave of this study was conducted in 2010 after the food package change and results indicated a further increase in whole grain consumption by 17.3% and decrease in whole milk consumption by 19.7%. These results demonstrate that nutrition education coupled with changes to the food package positively influenced consumption of healthier foods. WIC infuses approximately $90 Million in federal funds into the California retail food economy each month. The benefits of this economic boost extend beyond WIC families to the local economy. About 40 percent or 1,983 of the retail outlets authorized to accept WIC checks in California are single-store, single-owner small businesses that benefit substantially from this income.

WIC coordinates closely with CDPH's SNAP-Ed program and other partners to maximize the impact of the changes to WIC foods implemented in 2009 by marketing healthy food choices in health care, retail and child care settings, and to improve access to WIC foods in low income neighborhoods. WIC's Local Vendor Liaisons work directly with food retailers to ensure appropriate services to WIC families. The CDPH SNAP-Ed Retail Program and WIC will continue to collaborate closely to ensure coordinated assistance to eligible retailers. http://www.wicworks.ca.gov

Maternal, Child and Adolescent Health (MCAH) Division—MCAH funds nutrition, physical activity, and breastfeeding education, systems, environmental change, resources, policies, promotion of breastfeeding laws, interventions, and coordination.

Rev. 6/6/2017

Most MCAH resources are directed to low-income groups. A goal of the MCAH Division is that healthy eating and physical activity will be the easy and preferred lifestyle choice of all California women of reproductive age and children to the age of 21 years. Some activities include:

- Promoting healthy eating and physical activity through all Maternal, Child and Adolescent Health Division programs and initiatives at the state and local level.

- Promoting the development of healthcare practices, training and guidelines that support healthy eating and physical activity for all programs, health care providers, childcare centers, and employers.

- Using healthy eating and physical activity epidemiological information that is obtained from multiple sources to design, implement, and evaluate initiatives that are effective and reach individuals with the most need.

CDPH staff convene quarterly meetings of the California Early Care and Education partnership which includes active participation from MCAH.

Child Health and Disability Prevention (CHDP)—CHDP is a preventive program that delivers periodic health assessments and services to low income children and youth in California. CHDP provides care coordination to assist families with medical appointment scheduling, transportation, and access to diagnostic and treatment services. Health assessments are provided by enrolled private physicians, local health departments, community clinics, managed care plans, and some local school districts.

The Systems of Care Division, the state division that oversees the CHDP, is working to implement Section 2713 of the ACA which requires EPSDT well-child Health Assessment to be provided to beneficiaries less than 21 years of age on a periodicity schedule developed by the American Academy of Pediatrics called “Bright Futures” into all CHDP programs. Bright Futures promotes Healthy Weight, Healthy Nutrition, Physical Activity and Oral Health.

CHDP nutritionist and staff provide obesity related trainings, such as *Glucose and Cholesterol Screening for Pediatric Obesity, Body Mass Index Training, and Counseling the Overweight Child,* to health care providers throughout the state. Also, a number of County CHDP programs have developed and implemented The Active and Healthy Families (AHF) Childhood Obesity program in their counties. Active & Healthy Families (AHF) is a family-based medical group appointment program which teaches healthy eating and exercise habits to low-income families served by Federally Qualified Health Centers (FQHC). In the counties with an AHF program or similar program, CHDP trains the AHF’s team, which consists of a provider, a registered dietitian, and a promoter or community health worker, monitors the sessions, and evaluates the program. For one county, preliminary results showed a significant decrease in BMI and a trend toward lower triglyceride levels. Other counties are reporting a decrease in BMI in children enrolled.

Prevention First—CDPH received funding, beginning July 1, 2013, to implement a CDC-funded *Prevention First* collaborative grant for up to five years. Staff from the Coordinated Chronic Disease Branch, the Nutrition Education and Obesity Prevention Branch, and the California Department of Education, along with a host of community partners, works to initiate: 1) improved nutrition, physical activity, and increased physical activity opportunities in schools; 2) improved nutrition and increased physical activity options at early care and education sites, work sites, and at CDPH; 3) promotion of breastfeeding-friendly environments at work and community sites; 4) preparation of success stories for use in promoting the previous issues; and 5) development of new protocols and systems to manage and care for students with chronic conditions. The Prevention First Program has partnered with the California SNAP-Ed programs developing the playground stencil kits, based in counties for use with stencil based projects in schools and communities, and the development of two stencil project guides. They also developed an Early Care Education: Physical Activity and Nutrition Template. For more information, please visit http://www.cdph.ca.gov/programs/NEOPB/Pages/PrevFirstMainPage.aspx.

The Prevention First program has similar overall goals with SNAP-Ed but reaches a wider income audience and has emphasis in different program areas such as working intensively to improve food and beverage purchasing standards in institutions outside of low-come areas.

The Nutrition Policy Institute (NPI)—NPI is an institute within the University of California (UC), with the mission of improving nutrition and reducing obesity, hunger and chronic disease risk in children and their families in diverse settings. The institute and its director provide statewide nutrition policy leadership for research and education activities and works in synergy with research and outreach efforts being conducted in Davis and Berkeley campus departments and colleges and throughout the UC system. The Nutrition Policy Institute participates in the state's evaluation workgroup, develops evaluation measures, and conducts evaluation studies. Through this partnership, SNAP-Ed is able to draw on NPI's nationally recognized obesity prevention expertise.

California Department of Education, National School Lunch Program (NSLP)—NSLP is offered in public and private schools, serving an estimated 3.2 million lunches every day. In the 2014-school year California received federal funding of $1.4 billion. Over 82 percent of the lunches were free/reduced price. Nutrition education is encouraged but not required.

School Breakfast Program (SBP)—Federal funded program which assists schools and other agencies in providing nutritious breakfasts to children at a reasonable price. SBP benefits low-income children.

Child and Adult Care Food Program (CACFP)—This program provides federal funding for meals in child care and adult group settings. In 2015, California provided 211 million meals in all settings. CDPH staff engages with CACFP partners through participation in the Childcare Food Program Roundtable.

Rev. 6/6/2017

Summer Food Service Program (SFSP)—This program provides federal and state funding for meals to children, most from low-income families, when they are out of school for 15 or more consecutive days. In 2015 a total of 4,408 California sites served meals through this program.

Seamless Summer Feeding Option (SSFO)—This program provides federal and state funding for meals to children, most from low-income families, when they are out of school for 15 or more consecutive days.

After School Snack Program—As part of the NSLP and CACFP, Federal reimbursement is provided to organizations to provide nutritious snacks in structured after school settings to primarily children that qualify for free or reduced school breakfast and lunches.

School Breakfast and Summer Start-Up and Expansion Grants—This State-funded program seeks to improve academic performance and support good nutrition by assisting low-resource schools in offering school breakfasts. The California Legislature annually appropriates $1.017 million in the state budget for these grants. CDE awards competitive grants of up to $15,000 per site for nonrecurring expenses incurred when initiating or expanding an SBP or School Food Service Program.

The California School Garden Network (CSGN)—The network's mission is to create and sustain California school gardens to enhance academic achievement, a healthy lifestyle, environmental stewardship, and community and social development. The CSGN is a collaboration of members from state agencies, private companies, educational institutions, and non-profit organizations including the California Department of Food and Agriculture, CDPH, the California Department of Education, the California Foundation for Agriculture in the Classroom, and the California Integrated Waste Management Board. CSGN facilitates the connection between resource organizations and educators by combining efforts to strengthen contributions and avoid duplications. In addition to its statewide leadership, CSGN has a number of Regional Networks that serve as central hubs to distribute school garden resources, promote school gardens, and provide training, communications, and technical assistance in their local areas.

The CSGN first released *Gardens for Learning - Creating and Sustaining Your School Garden* in October 2006 as a guidebook targeted to educators to help them develop, maintain and provide instruction in school gardens. In Addition, the CSGN has developed a website as a collaborative effort to compile school garden resources, research, and contacts so they are available in one location. The *Network* provided partial funding for these resources and the website has been updated to reflect new resources and information. For more information, please visit http://www.csgn.org/networks/CA.

Rev. 6/6/2017

The California Children and Families Commission—In 1998 California voters passed Proposition 10, adding a 50-cent tax to each pack of cigarettes sold in California to create First 5 California, also known as the California Children and Families Commission. First 5 California is dedicated to improving the lives of California's young children and their families through a comprehensive system of education, health services, childcare, and other crucial programs. Based on county-specific birth rates, First 5 California distributes funds to local communities through the state's 58 counties, all of which have created their own local First 5 County Commissions to address community needs. Eighty percent of the annual Proposition 10 revenues are allocated to the 58 County Commissions, while the remaining 20 percent funds the state's overall guiding programs, mass media and public relations campaign, and administrative costs.

While all County Commissions implement some form of nutrition and physical activity efforts through existing programs and partnerships (e.g., School Readiness), many also report engaging in and/or investing in distinct nutrition and physical activity programs; and some County Commission efforts are implemented in collaboration with locally funded CDPH projects. CDPH previously partnered with First 5 through a Leadership Project with the First 5 Association of California. A key outcome of this project was the development of "Potter the Otter," early childhood healthy beverage education materials, including: Posters, Postcards, Tip Sheets, Stickers, Puppet Cut Outs, and Activity Sheets for use with eligible early care and education providers (preschool, child care, etc.), as well as dental, medical, and WIC offices as appropriate. CDPH staff attends quarterly commission meetings and regularly communicates with assigned First 5 staff. Additionally, assigned First 5 staff actively participates in planning the Childhood Obesity Conference.

CDE's Nutrition Education Resource Guide—The purpose of the *Nutrition Education Resource Guide* is to assist California schools, grades K-12, with implementing standards-based, effective nutrition education programs for their students. The Guide is primarily intended for use by curriculum directors and lead teachers, as well as nutrition education coordinators and specialists, who plan nutrition education in elementary, middle and high schools.

The Guide includes the 2010 Nutrition Competencies; nutrition education policy and standards; descriptions of selected nutrition education curricula and instructional materials; and useful ideas, guidelines and resources to help create an excellent nutrition education program. The nutrition education curricula and instructional materials featured in the Guide were reviewed for alignment with the California Health Education Content Standards and the 2010 Nutrition Competencies. These resources can be used to plan instructional strategies for a comprehensive nutrition education program. http://www.cde.ca.gov/ls/nu/he/nerg.asp

Rev. 6/6/2017

Fresh Fruit and Vegetable Program—The purpose of the federal Fresh Fruit and Vegetable Program (FFVP) is to provide an additional *fresh* fruit or vegetable snack to students during the school day as a supplement to (not part of) the school breakfast and lunch programs, and to teach students about good nutrition. The CDE administers the grant program in the state. Selected elementary schools with 50% or more eligible for free and reduced price meals receive a year-long grant (June−July) to implement the program. FFVP grant awardees list is posted on the CDE website. http://www.cde.ca.gov/ls/nu/sn/caffvp.asp

FFVP is consistent with and supports the Institutes of Medicine recommendations to support healthier snack choices in schools. This program serves as a strong support to SNAP-Ed by making fruit and vegetable snacks available to children in low-income schools.

4. University of California

USDA's Team Nutrition—Team Nutrition (TN) is an initiative of the United States Department of Agriculture, Food and Nutrition Service (USDA-FNS) to support Child Nutrition Programs through training and technical assistance for foodservice, nutrition education for children and their caregivers, and school and community support for healthy eating and physical activity.

In 2016, the California Department of Education Team Nutrition implemented its pilot program in 48 schools. The grant was implemented in partnership with the SLM of California Collaborative. SLM of CA Technical Advising Professionals (TAP) from UC CalFresh and the Dairy Council of California collaborated with all grantees to provide technical assistance, and ensure successful delivery of programming. Through this partnership, TAPs provided training and resources, and connected the cafeteria to the classroom through the delivery of nutrition education, in order to help schools effectively implement SLM techniques and increase student consumption of healthy foods. Utilizing a train-the-trainer model, the CDE provided in-depth SLM training to selected school nutrition professionals from 24 school districts, who then delivered training to local staff. Additional selected UC CalFresh school sites along with the TN schools conducted plate waste studies in FFY 2017.

Healthy Behaviors Initiative After School Learning Centers—The Healthy Behaviors Initiative (HBI) of the Center for Collaborative Solutions addresses the serious health problems facing students in low-income communities throughout California and most at risk of obesity. The HBI has created Healthy Behaviors Learning Centers at after school sites across California to help programs increase the healthy eating and physical activity of their students, staff, and families. The Centers—having successfully incorporated the Initiative's *Guide to Exemplary Practices in Nutrition, Physical Activity, and Food Security*—serves as models for hundreds of other afterschool programs on how to instill healthy habits in their students. They do this by hosting site visits and providing free coaching, resources, and tools that are practical, effective, and easy-to-integrate into programs. https://www.ccscenter.org/afterschool/documents/Californias%20Healthy%20Behaviors%20Initiative%20description%202-24-16.pdf

Rev. 6/6/2017

HealthierUS School Challenge—The HealthierUS School Challenge: Smarter Lunchrooms (HUSSC: SL) is a voluntary certification initiative recognizing those schools enrolled in **Team Nutrition** that have created healthier school environments through promotion of nutrition and physical activity. The HUSSC information and application is available on the TN HUSSC Web page at http://www.fns.usda.gov/hussc/healthierus-school-challenge-smarter-lunchrooms.

This certification encourages schools to make changes consistent with a healthier school environment and in that way contributes to SNAP-Ed efforts to improve the nutrition and physical activity environment in low-income schools. The SLM of California Collaborative promotes and encourages schools to submit for HUSSC awards.

California Department of Food and Agriculture (CDFA)—CDFA, through their Specialty Crop Block Grant (SCBG) program has funded a number of SNAP-Ed County programs to assist and augment community education programs. This includes development and distribution of CSA produce boxes, bonus value bucks, development of comprehensive community/school programs to promote the sales of local produce. The Dairy Council of California, a large California agriculture marketing order, has developed and sponsors proven, effective nutrition/physical activity curriculum and education materials for schools at four developmental levels: pre-K, grades 1-2, grades 3-5, grades 6-8, after school, K-6 and Health Professionals. For more information, please visit http://www.healthyeating.org/?Referer=dairycouncilofca. The Dairy Council is the co-lead with CDE for the California Local School Wellness Collaborative and the Smarter Lunchrooms Collaborative.

Intra- and Inter-Governmental Infrastructure to Coordinate Efforts among Programs:

1. **California Department of Social Services**

Food Access, Nutrition Education and Outreach Committee, FANOut—FANOut is hosted by the California Department of Social Services (CDSS) as quarterly webinars and an annual in-person convening in Sacramento. The purpose of FANOut is to link all USDA-FNS funded programs as well as interested state and local programs in California to identify strategies, share best and emerging practices, and provide technical assistance to statewide, regional, county and community based programs to address access to healthy foods, CalFresh Outreach, and food security. These goals are achieved through identifying and soliciting outside expertise, empowering internal partners through resource sharing, and enhancing the role that Federal Nutrition Programs play in low-resource communities, thus creating policy, systems, and environmental changes to reduce obesity and chronic disease rates.

2. **California Department of Aging**

Other nutrition-related programs that serve low-income older adults include:

- **Food banks** may provide a variety of services to older adults including nutrition education. In many parts of the state, food banks provide SNAP-Ed.

- **The Senior Farmers' Market Nutrition Program (SFMNP)** provides coupons to low-income older adults to purchase fresh locally grown fruits, vegetables, herbs and honey from local farmers' markets, roadside stands and community supported agriculture programs. This program occurs during the farmers' market season. Nutrition education is a component of the program, usually in the form of printed material.

- **The OAA Title IIIC Elderly Nutrition Program** requires that nutrition education be provided to program participants. California Code of Regulations, Title 22, requires that nutrition education be provided to participants a minimum of four times per year. Nutrition education activities are developed based on an annual nutrition education needs assessment conducted by the local nutrition services provider or AAA. Home-delivered meal program participants' may receive printed material as the sole nutrition education component, and congregate participants may receive printed material in conjunction with a nutrition education presentation.

  The OAA Title IIID Disease Prevention and Health Promotion Program provide funding for evidence-based health promotion programs through AAAs and their service providers. These activities may be conducted in conjunction with the Title IIIC Program and can include a variety of health promotion activities which may include nutrition education.

3. California Departments of Public Health and of Health Care Services

California Conference of Local Health Officers (CCLHO)—The mission of CCLHO, a statutorily-established advisory body to CDPH that convenes the 61 legally appointed physician Health Officers in California, is to prevent disease and improve the health of all California residents. The Conference provides a state/local forum for the discussion of significant health issues in order to develop recommendations for appropriate health policy and programs. One of CCLHO's priority areas is the promotion of healthful behavior, including healthy eating and physical activity, to prevent chronic diseases such as heart disease, cancer, and diabetes. The CCLHO Chronic Disease Committee brings together Health Officers and local health department staffs from a variety of programs to discuss chronic illness prevention, learn from State and other experts, and share best practices. Health officers are encouraged and participate in the CDPH SNAP-Ed Champion Provider Fellowship Project which is a partnership between the California Department of Public Health and the University of California, San Francisco Through this project, they lend their credibility to nutrition education and obesity prevention policy and environmental changes. Health officers provide a critical linkage to the health care sector that is vital to integrating larger policy and systems change work at the community level.

California Conference of Local Health Department Nutritionists (CCLHDN)—CCLHDN is an affiliate of CCLHO. The purpose of CCLHDN is to build leadership

capacity among local health department nutritionists to influence nutrition funding and programs at the local and state levels and serve in an advisory capacity to CCLHO. The core values that contribute to CDPH SNAP-Ed goals include: changing community norms toward optimal health, health and social equity, leadership development, evidence-based nutrition practices, collaboration and partnership, and sustainable food systems.

CCLHDN members lead local public health nutrition program planning and services. Duties typically include administering a variety of federal, state and locally-determined nutrition and physical activity promotion programs. CCLHDN advises CCLHO and CDPH on public health nutrition policies, programs, and issues. It works with CDPH's NEOPB on increasing nutritionists' technical capacity to build county-wide nutrition-related infrastructures, especially for services and environmental conditions that promote fruit and vegetable consumption, physical activity, food security, and obesity prevention among low-income groups and in geographical areas. Several counties are also implementing CNAPs, County Nutrition Action Plans, to promote consumption of fruits and vegetables through partnerships and collaborative interventions between the nutrition assistance programs and other related groups. The CNAPs are supported through SNAP and the annual CCLHDN conference. Along with convening SNAP-Ed and non-SNAP-Ed partners, CCLHDN operates as a mentor program to local public health nutritionists to develop higher level skills and coordination in doing policy and environmental change work**.**

Office of Farm to Fork—The California Office of Farm to Fork was initially an objective of the HiAP Task force's Farm to Fork Implementation Plan, endorsed by the Strategic Growth Council in January of 2012. With HiAP, CDE, CDFA, and CDPH's help, the office was established. The office is located within CDFA and is committed to helping all Californians access healthy and nutritious California-grown food. The office connects individual consumers, school districts and others directly with California's farmers and ranchers, and provides information and other resources.

Lifetime of Wellness—Lifetime of Wellness is a CDC funded project. Component One of the project includes environmental strategies to promote healthy behaviors and strategies to build support for healthy lifestyles particularly for those at high risk. In California, CDPH contracts with local health departments in Fresno, Tulare, Merced, Shasta, San Joaquin and Solano counties for Lifetime of Wellness services. This project complements SNAP-Ed in those counties because they are able to work more broadly in the types of activities they engage in and by reaching a wider income group.

4. University of California

Non-Funded National Partners—CalFresh made it a priority to strengthen partnerships and generate new ones to expand participant reach, leverage resources, further PSE efforts and strengthened the comprehensive programming provided in counties. Some key partnerships are described below.

- **CATCH Global Foundation (CGF)**—Work with the CGF has allowed for better coordination and understanding of trainings being offered in California. Staff from CGF contacts UC CalFresh to share trainings the CATCH team offers in California. This allows for the UC CalFresh team to explore opportunities for

reaching out to other SNAP Ed partners to coordinate efforts in qualifying schools. The coordination with the CGF has also facilitated their material and supply firm, FlagHouse, to integrate new items into their inventory to support the California's SNAP-Ed efforts. This has included the creation of a MyPlate parachute and MyPlate Stencil master for part of the CDPH's Prevention First Stencil project. Due to this strong partnership, UC CalFresh was one of three states to present on a National Webinar titled, "Using CATCH for Success in your SNAP-Ed Program." The UC CalFresh program director also serves on the CGF Board of Advisors.

- **Fuel Up to Play 60 (FUTP60)**—As a program that aims to help encourage today's youth to lead healthier lives in collaboration with USDA, FUTP60 partnership has strengthened and encouraged the nutrition and PA programming in SNAP Ed-qualifying schools. FUTP60 has provided UC CalFresh staff with resources to provide funding and items that reinforce school's district wellness goals. Informational presentations are provided to LIA's and school programs to familiarize staff on the program, disseminate information and increase the number of SNAP-Ed participating schools applying for FUTP60 grants. Interested schools were connected to the FUTP60 Manager who provided technical assistance in the application process. Schools have been awarded funds to support SNAP Ed programming, such as Farm to School, SLM, and PA efforts with students.

- **Alliance for a Healthier Generation**—UC CalFresh is working in partnership with the Alliance to explore conducting school assessments and advance the SNAP Ed work in schools. This includes examples such as:
    - Riverside County: "In Alvord Unified, the Alliance for a Healthier Generation (coordinator funded by a Kaiser Permanente grant) was successful at promoting the district wellness policies and working with school lead teachers to plan and implement nutrition and fitness activities. UCCE programs (both UC CalFresh and EFNEP) partnered with CDPH, Dairy Council and other local groups to provide direct and indirect education and PSE supports for all schools in Alvord. UC CalFresh used Dairy Council's Exercise Your Options curriculum with 6th graders and partnered with Dairy Council in SLM efforts in this school district."

- **Smarter Lunchrooms Movement of California Collaborative**—Through collaboration with multiple state-level agencies, including the Dairy Council of California, UC CalFresh, CDE, CDPH, California Food Policy Advocates and Kaiser Permanente, continued to expand the reach of SLM throughout the state of California. The SLM of CA Leadership Team developed and implements SLM trainings and webinars, creates resources for SLM implementation, and collects and evaluates pertinent data. The partnership worked collaboratively to provide technical assistance, training, and resources to food service staff implementing SLM in 35 counties.

- **California Local School Wellness Policy Collaborative (CA LSWP)**—The SNAP Ed SIA's worked as members of the CA LSWP. This group brings

together partners from a variety of state-level agencies to support local school wellness policy implementation. Through participation in the collaborative, SNAP Ed leadership assisted in the development of LSWP webinars, local trainings and materials for schools and LIA staff.

California Early Childhood Education Partnership—UC CalFresh participates as a member of this group which is a collaboration between state-level agencies dealing with early childhood education (ECE). The intension of this group to provide updates on ECE activities by agency and to assess ways in which we can collaborate ECE activities across the state. Examples of agencies participating in this group along with UC CalFresh include the WIC Supplemental Nutrition Program, CDPH, First 5 California and the California Department of Education.

1			Direct Charges for FEED Division Management	This item includes direct costs for CalFresh Management Operations Section, CalFresh Branch and Family Engagement and Empowerment Division (FEED) management of the CalFresh Nutrition education program. CDSS operates under a federally approved cost allocation plan that equitably allocates costs to benefiting programs. Under this plan, management and clerical support staff do not time study, their costs are allocated proportionally to the programs they support with the Nutrition Education share based on the time reports completed by SNAP-Ed Staff.	1	$122,032.00	1		$122,032	$65,111 to FFY 17 Carry-in
2			Department Overhead	The cost allocation plan also equitably allocates departmental support and overhead costs to benefiting programs. Allocated costs included department management, human resources, accounting, contracts, legal services, information technology support and other allowable costs.	1	$305,677.00	1		$305,677	$237,200 to FFY 17 Carry-in
3			Statewise Costs Allocation Plan	Statewide costs for services such as the State Legislature, State Controller's Office, State Treasurer's Office, Department of Finance and similar organization that provided centralized support to agencies and programs that are allocated through the federally approved Statewide Cost Allocation Plan.	1	$77,578.00	1		$77,578	$75,000 to FFY 17 Carry-in
								Total Equipment and Other Capital Expenditures:	**$127,976**	377,311
										Total $377,311+127,976=505,287

	Budget Adjustment: Add Delete Reduce Increase	Budget Adjustment: Last Amount Approved	Organization Name	Description of Service(s)	Total Grant	Budget Adjustment: Budget Justification
				Contracts/Sub-Grants/Agreements that are $25,000 or more		
A			Public Health Institute (PHI)	Funds projects including: State Nutrition Action Committee (SNAC) - SNAC will act as a leadership group representing all senior level partners from USDA Food and Nutrition programs in California and statewide advocates who represent the needs of low-income families related to food security and increased access to healthy food and beverages. SNAC will function as a statewide policy, systems and environmental change platform. 2: County Social Services SNAP-Ed Toolkit - The toolkit will include a variety of resources such as a low or no cost set of baseline services to a broad spectrum of resources for counties who wish to implement nutrition education programs. The Center will partner with multiple stakeholders, including the California Welfare Director's Association (CWDA), to solicit input and feedback of the components of the toolkit, and attend relevant meetings to develop, modify and update at least three online interactive training modules. 3: Food Access Nutrition Education and Outreach (FANOut) Committee - FANOut will act as a platform for disseminating information and providing training and technical assistance and facilitating action committees to a larger and more diverse partner audience throughout the state. Decisions, action items and opportunities for collaboration will be communicated from the SNAC Leadership group and disseminated to regional and county agencies and their local partners through webinars, resource sharing, and an annual in-person meeting. 4: Program Evaluation and Reporting System (PEARS) which will focus on streamlining data collection, evaluation and reporting of evidence-based SNAP Education (SNAP-Ed) programs and interventions providing LIAs a new tool to report data in one central system. Development and implementation of PEARS for California fulfills the USDAs evaluation requirements for analyzing SNAP-Ed outcomes as required in the SNAP-Ed Evaluation Framework. PHIs Center for Wellness and Nutrition (PHI CWN) will be responsible for providing CDSS with access to PEARS; evaluation context expertise for PEARS' statewide rollout, implementation and data collection for all SNAP-Ed local implementing agencies; and reports on program evaluation measures. 5: Statewide Branding is a project to be lead by CDSS that will enable all SIAs to use a commom descriptor (brand) when referring to SNAP-Ed. The goal is to develop a branding framework to unite all SNAP-Ed programs and brands in the state, which includes developing a formative research plan to reach the hardest to serve participants and ensuring that brands are audience-oriented. 6: CA SNAP-Ed Website will utilize the efforts of the Branding Project and incorporate the common brand into the website. Under the direction of the CDSS, CalFresh Branch, the website will allow for streamlined communication between SIAs, LIAs, contractors, partners and consumers in CA. The website will provide educational resources in varied formats that include curriculum that can be downloaded, printed and shared to various stakeholders. In addition, the website will have the ability to access and provide online training modules, view videos and links to outside training and educational resources.	$2,278,500	$545,537 FFY 2017 Carry-in
B			California State University, Sacramento	Continue to fund the projects started in FFY 16. 1: Strategic Planning and Conference Services-Strategic planning services help create and enact a long-term vision and plan for the SNAP-Ed program in California. The Strategic Plan Council, comprised of upper level management from each SIA, was created to provide additional oversight of the strategic initiatives and to ensure that implementation is done timely and effectively. 2: Evaluation Coordination-A statewide approach and methodology to SNAP-Ed program evaluation and reporting will ensure that SIAs and LIAs are consistently applying program evaluation tools and methodologies. The Evaluation Committee will assess the current state of program evaluation in SNAP-Ed, examine gaps, and develop a plan for providing more statewide oversight and coordination of the SNAP-Ed program evaluation to ensure that SNAP-Ed activities are leading towards desired outcomes. 3: Regional Training and Technical Assistance-Additional training and technical assistance resources will be provided to supplement the statewide training project led by CDPH. This will serve to strengthen existing collaboratives and networks as well as develop new partnerships as needed.	$100,000	$100,000 FFY 2017 Carry-in
C			Department of Health Care Services	This project will focus on using community-based interventions and evidenced-based programming to address and maximize the reach and potential impact of obesity prevention efforts among SNAP-Ed-eligible Medi-Cal members in community settings by leveraging the good work of SNAP-Ed implementing agencies, DHCS health care partners, and others to work to improve the diet, physical activity, and weight outcomes of low-income Californians. During FFY 2018, the following activities will be completed:Task 1: Complete pilot testing of program interventions and impact/process evaluation instruments with SNAP-Ed eligible Medi-Cal members. Analyze pilot test data, and make intervention and instrument adjustments, as needed; complete final phase of community engagement/organizing process in preparation for the intervention and evaluation components of Project Connect; secure final approval from the Institutional Review Board for the Protection of Human subjects; secure final contract approvals for the evaluation, social media/communication, and lifestyle management subcontractors, as needed.Task 2: Recruit, secure, and train all community-based research and intervention personnel; prepare/secure all program- and study-related materials; finalize messages, update local resources on the Welltopia website, and ensure social media/communication channels are ready for activation.Task 3: Finalize instruments, methods, and all evaluation logistics (process, exposure, outcome, and economic) in preparation for study recruitment and evaluation launch; begin recruiting evaluation study participants.	$1,150,000	$510,000 FFY 2017 Carry-in

SNAP-Ed FFY 2018 Budget

Organization Name: California Department of Social Services
County/Jurisidiction:

D			SharePoint	SharePoint - Phase II will enhance the SNAP-Ed SharePoint site by increasing automated business processes, documents and federal reporting requirements.CDSS will also include an enhancement to the exisiting email system in SharePoint to better communicate with state and local implementing agency users.A portion of the FFY 2018 funds will be applied towards the ongoing maintenance and operations needed to successfully support the SharePoint environment which requires the support of CDSS dedicated IT staff to ensure that the software and hardware necessary for SharePoint is functioning and available at all times. SharePoint will remain supportive to the existing use of the SNAP-Ed documents and processes, so they can be developed and updated using a collaborative process with all state and local implementing agencies. SharePoint will continue to allow our state and local implementing agencies to more effectively collaborate during the State Plan process and allow CDSS to have a central point of information for all SNAP-Ed related information and materials, including resources, approved sites, curriculum, etc.	$200,000	$350,000 FFY 2017 Carry-in
E			Leah's Pantry/ EatFresh.org	Leah's Pantry's EatFresh.org online nutrition education project will provide SNAP-Ed resources, recipes, nutrition messages, local county resources and training that will teach the CalFresh population 1: healthy eating behaviors 2: preparation of healthy meals and 3: healthy shopping and planning habits to spend more wisely. The project will support sustained, healthy behavior changes with innovative programs that address client barriers, build the capacity of partner organizations to integrate nutrition support and develop cutting edge tools that leverage technology and incorporate community perspective.	$300,000	$100,000 FFY 2017 Carry-in

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			General Expense	Total Operating Expenses are based on $29,841 State standard costs ("Medium Travel") annually per FTE; allocated among budget line-items 2, 4, 5 and 6 to align with average actual expenditures per FTE in 5 previous years. CDPH used the department's "Standard Costs" chart which includes various line items such as General Expense, General Expense-Office Automation, Printing, Communications, Travel, Training, Facilities Operations and Consolidated Data Center. Three different standard costs for Travel are listed on the chart based on "light", "medium" or "heavy" travel. CDPH used "Medium" travel for the Master IAA which, when added to the standard costs for other line items listed above, totaled $29,841 per FTE per year. 74.5 FTE X $29,841 = $2,223,183. We used our best judgment to allocate that total as best we could among categories 2, 4, 5 and 6 on the Budget Cover Sheet. Following is the detail: $ 40,231 General Expense $ 17,880 Printing $ 22,350 General Expense – Office Automation $ 144,704 In-State Travel and Training $ 982,753 Building/Space $ 1,015,265 Maintenance **$ 2,223,183 Total** These costs are cost-shared with other funding streams as appropriate.	74.5	$45.0011	12	$40,231	
2			Printing	See Justification for General Expense	74.5	$20.00	12	$17,880	
			Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)						
1			General Expense-Office Automation	See Justification for General Expense	74.5	$25.00	12	$22,350	
							Total Non-Capital Equipment/Supplies:	**$80,461**

California Department of Public Health

ADMINISTRATION DIVISION INFORMATION MEMORANDUM

NUMBER: CDPH 17-33-AI

DATE: July 12, 2017

TO: CDPH Section Chiefs & Above

FROM: Jaana Brown, Chief
Accounting Section
Financial Management Branch

SUBJECT: Approved Indirect Cost Rate Agreement - Fiscal Year (FY) 2017-18

The purpose of this Administration Division Information Memorandum is to provide California Department of Public Health (CDPH) staff with information regarding our approved Indirect Cost Rate Agreement for FY 2017-18.

Our Indirect Cost Rate Proposal for FY 2017-18 has been approved by the U.S. Department of Agriculture (USDA) and is effective from 07/01/2017 to 06/30/2018 for all public health programs and locations. The approved fixed rate of 21.8% consists of 13.7% Departmental Overhead (including 2.0% for a prior year roll forward) and 8.1% SWCAP (Statewide Cost Allocation Plan).

This Agreement reflects an understanding reached between CDPH and the USDA Food and Nutrition Service (FNS), Grants and Fiscal Policy Division, concerning the rate which may be used to support our claims for indirect costs on grants and contracts with the Federal Government.

If you have any questions or need assistance please contact Bo Chen, Accounting Section, via email at Bo.Chen@cdph.ca.gov or by phone at (916) 552-8505.

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries.

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Public Health
State-Level Project: California State Implementing Agency - Training

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
				Total Operating Expenses are based on $32,600 State standard costs ("Heavy Travel") annually per FTE; allocated among budget line-items 2, 4, 5 and 6 to align with average actual expenditures per FTE in 5 previous years. CDPH used the department's "Standard Costs" chart which includes various line items such as General Expense, General Expense-Office Automation, Printing, Communications, Travel, Training, Facilities Operations and Consolidated Data Center. Three different standard costs for Travel are listed on the chart based on "light", "medium" or "heavy" travel. CDPH used "Heavy" travel for the Training IAA which, when added to the standard costs for other line items listed above, totaled $32,600 per FTE per year. 15 FTE X $32,600 = $489,000. We used our best judgment to allocate that total as best we could among categories 2, 4, 5 and 6 on the Budget Cover Sheet. Following is the detail: $ 45,000 General Expense $ 45,000 Printing $ 26,952 General Expense – Office Automation $ 24,000 In-State Travel and Training $ 158,112 Building/Space $ 189,936 Maintenance $ 489,000 Total					
1			General Expense	These costs are cost-shared with other funding streams as appropriate.	15	$250.00	12	$45,000	
2			Printing	See justification for General Expense.	15	$250.00	12	$45,000	
				Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1			General Expense-Office Automation	See justification for General Expense.	15	$149.735	12	$26,952	
							Total Non-Capital Equipment/Supplies:	**$116,952**

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	This includes additional staff in the counties as well as staff approved for the UC CalFresh State Office in the FFY 2017 Plan from the carry in budget. Staff for FFY 2018 are also budgeted in carry in FFY2017 funds. 7.25 FTE of UC CalFresh State Office salaries moved to carry-in funds: $859,152 and Shaping Healthy Choices (SHCP) Salaries $337,335 and Center for Regional Change(CRC) $113,495
2	Non-Capital Equipment/Supplies	The UC CalFresh State Office portion of non-capital equipment/supplies was partial covered by FFY2016 carry in funds. Additional funds for the new additonal staffing. Shaping Healthly Choices (SHCP) $8,506 and Center for Regional Change (CRC) $1,500 carry in funds FFY2017
3	Materials	Funding shifts from materials to support staff and other program costs. Additional funds for the additonal staffing. A portion of the UC CalFressh State Office was covered by FFY2016 carry in funds, as well as materials for SHCP $32,135 and CRC $2,000
4	Travel	Additional staffing and expnasion of projects doing gardening education and PA. The SHCP travel has also been included in FFY 2017 carry-in funds: $45,421, SHCP and CRC $5,608
5	Building/Space	With the addition of new staff, additional space will be needed. Currently the offices occupied by UC CalFresh do not allow for additional expansion. As mentioned above, some of the proposed positions may be co-located with the UC ANR program and therefore in alternative offices. The space for the co-located positions will not be provided in-kind as is with the current UC CalFresh state offices. Funding is being requested to cover the additional space and for possible relocation of the UC CalFresh state office to a different location. The new space will occupy 16 career staff FTE plus student assistants.
6	Maintenance	With the relocation of the UC CalFresh State Office to a different location, funding is being requested to cover maintenance costs, including but not limited to, janitorial services, utilities and internet/off-campus network connection. Currently, maintenance of the offices occupied by UC CalFresh is provided in-kind.
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	*UCCE UC CalFresh County LIAs are funded through a multi-campus agreement (MCA) between UC Davis and UC Agriculture & Natural Resources (UC ANR) and are not considered formal contracts/sub-grants; UCCE LIAs will receive $3,837,100 of FFY 2017 carry-in funds and $9,340,888 of FFY 2018 funds. Please refer to each respective county/county cluster budget for additional details. ** Public Health Institute (PHI) is considered a contract/sub-grant under the UC CalFresh State Office FFY 2017 carry-in budget, PHI contract/sub-grant $359,954
9	Indirect Costs	Increase due to increas in expenses - Indirect Cost: 7/1/17-6/30/18 = 25%

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries. The projected FFY17/18 composite benefit rate is .5280. The average rate listed on the budget is for calculation purposes only

FFY 2018 SNAP-Ed Budget

Organization Name: UC CalFresh Nutrition Education Program
County/Jurisdiction: STATE OFFICE

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Standard Operating Supplies; pens, paper, binders	Essential office supplies required to support the UC CalFresh SNAP-Ed Program	16.91	$514.58	1	$8,702	
2			Reproductions	Copies and reproductions to support UC CalFresh SNAP-Ed Program	16.91	$771.87	1	$13,052	
3			US Mail Service and FedEx Mailings	UC campus mail service and FedEx for SNAP-Ed related mailings	16.91	$231.56	1	$3,916	
4			Cell Phone/Telecom for Director	Campus rates for cell phone and data service	1	$175.00	12	$2,100	
5			Teleconferences/Web Conferencing	ReadyTalk Web Conferencing service for meetings; monthly Town Hall meetings for all LIAs and partner agencies when appropriate; provide techical assistance to counties.	16.91	$617.50	1	$10,442	
6			Deans Office Computer Support Services	UC Campus IT Support for all Networked Computers in the office	16.91	$385.93	1	$6,526	
7			Temporary Office Staff/Statiscal Lab Services	Assist with data entry, ledger review and compliance reviews, short term projects. We are budgeting for 2.0 FTE's of Temporary Staff. These are varied based on need and workload. Temporary staff are budgeted in the Supply line as this is where they fall in our ledgers within the UC System; they are considered a service not staffing. This cannot be moved out of our supply line as this is where the charges are accrued in our expenses.	2	$8,240.00	6	$98,880	
8			**Shaping Healthy Choices Program**					$0	
9			Standard operating supplies: pens, paper, binders	Essential office supplies required to support the UC CalFresh SNAP-Ed Program (pens, paper, ink, folders, etc.)	4.8	$30.20		$0	carry in $1740
10			Reproduction	Toner, paper	4.8	$35.00	0	$0	carry in $2016
11								$0	Total SHC Supplies $3756
12			**Center for Regional Change**					$0

40			DIRECTOR-Ginsburg, David and 5 TBD	San Diego, CA	AOCS18 - Agents of Change Summit 2018 - San Diego, CA February 12-13, 2018- The 2018 Agents of Change Summit explores topics in behavior change including influence, networks, and the spread of information. Professionals in public health communication discuss how behavior change campaigns and information dissemination can be successful in an environment where media is splintered, content is curated and expertise comes from a range of new sources. Attendance will benefit SIA SNAP-Ed communication and branding efforts in California. California's SNAP-Ed SIA collaboration is entering a new stage of its development in branding and is in a politically sensitive environment nationally. At this time, strategic positioning of the program's vital benefits to SNAP eligible audiences is essential. This conference will assist in these ongoing efforts.	1	5	3	2	$74.00	$125.00	$250.00	30	$550.00	$175.00	$7,251	The entire UC CalFresh program is seeking approval to send ten (10) staff to the Agents of Change Summit 2018 in San Diego, CA. The proposed ten attendees is a combination of state- and county-level staff. The Agents of Change Summit provides a unique opportunity to explore the use of technology within our intervention approaches. When the plan was being developed information was just released on the Summit. SNAP-Ed funds are being requested to send two (2) UC CalFresh staff from Placer/Nevada and two (2) UC CalFresh staff from Yolo County to the Agents of Change Summit 2018. County-based staff will be able to bring back key messages to share with the remaining UC CalFresh staff, as well as identify opportunities to incorporate knowledge learned to both enhance and support expansion of the comprehensive program efforts in their counties. Six trips have been budgeted by the UC CalFresh State Office staff to attend the Agents of Change Summit 2018 in San Diego, CA. Two trips have been identified for: (1) David Ginsburg and (2) Andra Nicoli, both of whom have been participating and involved in the discussion regarding re-branding for SNAP-Ed in California. Andra Nicoli is also a member of the Agents of Change Summit Planning Committee and her registration costs will be waived. The remaining four trips will be for other UC CalFresh State Office or county-based staff. The remaining trips will be assigned at the discretion of the UC CalFresh State Office and with requests from the counties. This can include UC CalFresh State Office Program and/or Evaluation staff, as well as county-based Advisors, Program Managers, and/or Supervisors. These individuals will be expected to share the knowledge learned to enhance and support comprehensive program efforts as well as promote the re-branding efforts for SNAP-Ed in California. Collaboration and coordination efforts regarding SNAP-Ed staff attending this conference have been discussed briefly during a SNAP-Ed 2.0 meeting. Additional information and justification regarding this conference can also be found in the UC CalFresh-specific Travel document that was submitted as part of the FFY 2018 State Implementing Agency (SIA) documents.

County/Jurisdiction: STATE OFFICE

Out-of-State																		
1			DIRECTOR-Ginsburg, David and 1 TBD	November 4-8, 2017 Atlanta, GA	The American Public Health Association (APHA) is one of the premier meetings regarding health and nutrition developments nationally. UC CalFresh seeks to provide program participants leading information relevant to nutrition education and see national best practices as presented by alternate agencies/states. Attending APHA will allow participant to bring back information on leading-edge research, programs and policies to improve technical assistance to SNAP-Ed programs, build new partnerships and share with others providing SNAP-Ed services in California. It also provides UC CalFresh with new approaches required in the USDA SNAP-Ed Guidance. Allows the UC CalFresh Nutrition Education Program to obtain strategies and tools for public health related nutrition education, per USDA SNAP-Ed Guidance. We are also pending notification of a presentation on UC CalFresh NEP's Evidence based for SNAP-Ed	1	2	6	5	$74.00	$140.00	$550.00		$650.00	$175.00	$5,038	
2			DIRECTOR-Ginsburg, David	ARLINGTON,VA	Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies 2018 Conference-ASNNA-Arlington, VA February TBD 2018, Travel to this meeting allow for the UC CalFresh Nutrition Education Program to obtain information from USDA/FNS as well as other national leaders to advance practices in California. UC CalFresh has played a vital role in providing support and facilitation of sessions at this meeting that lead to the uptake of Healthy Foods per USDA (Dietary Guidelines)	1	1	5	4	$74.00	$182.00	$600.00		$500.00	$175.00	$2,373	
3			PROGRAM REPRESENTATIVE III-McMurdo, Tammy	Minneapolis, MN	Society for Nutrition Education and Behavior-SNEB-July 21-24,2018 Minneapolis, MN . UC CalFresh Nutrition Education Program to obtain strategies and tools for public health related to nutrition education. Often UC presents at this meeting. Attending SNEB allows the UC CalFresh Nutrition Education Program to obtain strategies and tools for public health strategies related to nutrition education now required in the USDA SNAP Ed Guidance. Attendance will also allow UC CalFresh to bring back information on leading-edge research, programs and policies to improve technical assistance to SNAP-Ed programs, build new partnerships and share with others providing SNAP-Ed services in California. Attending SNEB will also allow UC CalFresh to participate in the ASNNA meeting held during the conference.	1	1	5	4	$74.00	$188.00	$760.00		$505.00	$175.00	$2,562	
4			PROGRAM REPRESENTATIVE III-Mills, Mary Ann	Las Vegas, NV	School Nutrition Association Annual National Conference, Las Vegas, NV July 8-11, 2018, UC CalFresh Nutrition Education Program will obtain information related to school food service and the school lunchroom environment. Attending SNA ANC allows UC CalFresh Nutrition Education Program to develop strategies for increasing access to more healthful, regionally sourced, and sustainably produced food for our nation's school children. In addition, SNA ANC will give UC CalFresh Nutrition Education program the opportunity to provide a presentation on the Smarter Lunchrooms Movement of California, increasing the awareness of the SLM	1	1	5	4	$74.00	$102.00	$250.00		$535.00	$175.00	$1,738	

Organization Name: UC CalFresh Nutrition Education Program
County/Jurisdiction: STATE OFFICE

5			PROGRAM REPRESENTATIVE III-Byrnes, Michele	Nashville, TN	SHAPE America National Convention and Expo March 14-18, 2018, Nashville, TN, This conference provides opportunities for UC CalFresh staff to collaborate with and learn from potential partners who are advancing physical activity policies and programs at the local, state and national level. SHAPE America is working directly with Let's Move! and Let's Move! Active Schools initiatives which are priorities for SNAP-Ed. Topics include advocacy for physical activity and school health policies, family and community engagement, assessment and evaluation of physical activity programs, and technology in health promotion. These topics will assist with further integration of physical activity into the UC CalFresh programming.	1	1	6	5	$74.00	$161.00	$600.00		$500.00	$175.00	$2,524	
6			ANALYST V-MkNelly, Barbara and Keihner, Angie	Washington DC	American Evaluation Association - Annual conference AEA-November 6-11, 2017 - Washington DC , The American Evaluation Association (AEA) annual conference and professional development workshops brings together professional evaluators from around the country and the world. The 2017 theme "From Learning to Action" will explore 4 ways of learning from evaluation to create better practices and outcomes: 1) share evaluation practices, methods, ethnics and lessons, 2) share evidence of what works and why in public policies, programs and projects, 3) share innovations that can be incorporated into evaluation practice and 4) share insight on evaluation users to increase evaluation utilization. The dozens of skills and practice oriented sessions have direct applicability to SNAP-Ed evaluation and will enable staff to obtain up-to-date information to assess the strengths and weaknesses of the SNAP-Ed program and further advance SNAP-Ed evaluation practices. It also promotes and develops skills in evaluation practice. Evaluation professionals have an opportunity to learn and share their best work in evaluation theory and practice. Attending the Annual Conference of the American Evaluation Association will enable the UC CalFresh Nutrition Education Program to obtain leading edge evaluation strategies, lessons and tools for application to the design and implementation of SNAP-Ed evaluation and the technical assistance provided to SNAP-Ed projects. Two staff will attend to ensure coverage of the wide array of evaluation topics presented. Attendance will allow program staff to learn and share about evaluation theory, practices and innovations that can be applied to SNAP-Ed programming	1	2	6	5	$74.00	$182.00	$600.00		$600.00	$175.00	$5,458	
			DIRECTOR-Ginsburg, David or delegate	Washington DC	Travel Purpose and/or Name of Conference: Food Research Action Center (FRAC) National Anti-Hunger Policy Conference - This conference address many of the objectives of the California State SNAP Ed plan. The conference focuses on anti-hunger and anti-poverty and provides strategies and ideas to address and reduce hunger. It brings together advocates; officials; anti-obesity groups; and representatives of community and non-profit organizations. The three-day conferences allows for SNAP Ed programs and staff to have networking opportunities, training, and learn from sessions that support the programs and approaches employed in California. The conference also allows participants share information and learn how to strengthen the quality and reach of federal nutrition programs, learn best outreach and program practices from other states and localities, fill in the gaps in food service for millions of low-income children, and identify creative ideas for new and innovative approaches to ending hunger. This meeting allows participants to hear the latest information on anti-hunger programs and community approaches and opportunities to meet with members of congress, hill staff, and administration officials who attend the conference as they provide updates during conference sessions	1	1	4	3	$74.00	$182.00	$800.00		$450.00	$175.00	$2,267

			DIRECTOR-Ginsburg, David or delegate	Montpelier, VT or Stowe, Vermont	Global Learning Partners' Foundations of Dialogue Education Workshop - TBD spring 2018 - The Global Learning Partners' Foundations of Dialogue Education Workshop is an intensive training of trainers wishing to apply the Dialogue Education™ (DE) adult learning techniques in their work. Learner-centered Dialogue Education is a core concept used in adult education curricula used by the UC CalFresh program. Dialogue Education focuses on how adults learn best: by becoming active participants in their own learning experience. DE is highly collaborative, and recognizes the rich resource of knowledge each adult learner brings in to the session so that this becomes part of the fabric of learning. This interactive hands-on training is not provided elsewhere. The registration fee includes all workshop materials and supplies, a substantial workbook, and two teaching tools and resources. The registration fee ($1,865) includes all workshop materials and supplies, a substantial workbook, and two teaching tools and resources. Attending the Global Learning Partners' Foundations of Dialogue Education Workshop will enable the UC CalFresh Nutrition Education Program to enhance training efforts for program staff in two major ways. One is to incorporate DE training methods to increase effectiveness of program staff trainings in all areas. The second is to teach DE skills that staff can use in their direct education with adult audiences. With Dialogue Education, the learning atmosphere is safe and respectful, a place where people are both challenged and supported to maximize learning. The outcome is higher, more organic retention of skills and knowledge for the long-term.	1	1	5	4	$74.00	$149.00	$750.00	43	$1,865.00	$200.00	$3,804	
7			Academic Coordinator, Brock, Lyn and Program Rep III McMurdo or delegate	McCormick Place West, Chicago IL	Academy of Nutrition and Dietetics Food and Nutrition Conference and Expo. Conference dates: October 21-24, 2017, The Academy of Nutrition and Dietetics sponsors the world's largest meeting of food and nutrition experts — more than 10,000 registered dietitians, nutrition science researchers, policy makers, health-care providers and industry leaders attend the annual meeting — and address key issues affecting the health of all Americans. The Academy's annual meeting features more than 130 research and educational presentations, lectures, panel discussions and culinary demonstrations. Attending the Academy of Nutrition and Dietetics Food and Nutrition Conference will enable the UC CalFresh program to provide the most current information to our staff on nutrition and obesity prevention as well as nutrition education tools and strategies presented at the conference.	1	2	4	3	$74.00	$269.00	$884.00		$485.00	$175.00	$5,294

A			Brown Miller Communications (BMC)	(refer to details below)		
B			BMC Salaries and Benefits	Technical Assistance hours at $175.00/Hour x 32 hours = $5600.00 include benefits		PHI - sub Brown Miller $5600
C			BMC Meetings and Trainings	Brown Miller will collaborate with PHI on to offer a Media & Storytelling Training focus on how to use media and messaging to advance PSE approaches to promote program successes, as well as facilitate a statewide Partnership meeting. $6,700.00 A breakdown of the cost for the Training and Meeting Facilitation line item for the BMC agreement is $6,700. This includes media and storytelling training and meeting facilitation (meetings with UC CalFresh, local county advisors/program leads and 4H partners). The intent of the meetings is to maximize youth services to low resource youth across these programs. In the summer of 2018, a larger meeting with other youth serving organizations may occur. Using BMC's hourly billing rate $6,700/175=38.29 hours. This is considered a reasonable allocation for their support of up to three activities supporting the overall youth engagement efforts.		PHI - sub Brown Miller $6700
D			BMC Technical Assistance and Support Materials	Brown Miller will also assist in providing TA support in communications/media to UC CalFresh staff to strengthen the understanding of moving from an individual behavior change message to a more PSE change focus and and createing accomplishment briefs highlighting pilot sites and state level successes. $5700		PHI - sub Brown Miller $5700

8	Contracts/Sub-Grants/ Agreements**	$346,227	$2,088,608	$2,224,021	6.48%
	Total Direct Costs:	**$581,011**	**$2,484,192**	**$2,527,175**	1.73%
9	Indirect Costs*** Indirect Cost Rate= 24.94%	$72,508	$128,308	$85,325	-33.50%
	Total Federal Funds	**$653,519**	**$2,612,500**	**$2,612,500**	0.00%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	decrease due to FY17 budget including an additional hire that was not made and is not budgeted in FY18 as current staff absorb tasks
2	Non-Capital Equipment/Supplies	FY17 budgeted amount was reduced due to $2,300 of FY16 carry in dollars; few FY17 carry in dollars estimated so FY18 budget must reflect more of the anticipated need
3	Materials	
4	Travel	FY17 carry in dollars are anticipated which enable FY18 budgeted dollars to be reduced; combined they meet the estimated need
5	Building/Space	FY17 budgeted amount was reduced due to $8,100 of FY16 carry in dollars; fewer FY17 carry in dollars estimated so FY18 budget must reflect more of the anticipated need
6	Maintenance	FY17 budgeted amount was reduced due to $7,800 of FY16 carry in dollars; fewer FY17 carry in dollars estimated so FY18 budget must reflect more of the anticipated need
7	Equipment and Other Capital Expenditures	

FFY 2018 SNAP-Ed Budget

8	Contracts/Sub-Grants/ Agreements**	Please note that the estimated FY17 carry takes into consideration additional funding to LIAs fro CDSS of $144,000 and a shift of $82,000 of CCC funds to LIAs. This continues the effort made by CCC to shift more and more of total awarded funds to the LIAs.
9	Indirect Costs	indirect cost rate is not applied to direct service subrecipient costs and a greater percentage of total funds are allocated in FY18 to these direct service subrecipients; so the rate between the two years has not changed but the dollars to which the rate is applied has been reduced as more dollars in FY18 allocated to direct service subrecipients

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

A. Travel Purpose: Association of SNAP Nutrition Networks and Other Implementing Agencies (ASNNA)

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

Attendance for the Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies (ASNNA) is an essential meeting that was created to bring SNAP-Ed states to work together to discuss and influence policy making among administrators who work together to promote communication between federal and state agencies, promote social marketing within nutrition education, serve as a nation-wide resource for nutrition education, networking expertise, and partnership development within SNAP-Ed, and advance successful practices that lead to the incorporation of the Dietary Guidelines for Americans, specifically among SNAP-Ed eligible individuals and communities.

As the California SNAP-Ed oversight agency, it is imperative for CDSS to attend this conference that focuses on policy direction of state programs, federal guidance and regulations, funding and performance levels, funding reallocations among other states and reporting. CDSS' attendance at this conference has been requested by FNS.

2. Travel destination (city and state)

The out-of-state travel cost for FFY 2018 is $2,133.

CDSS Out-of-State Travel

B. Travel Purpose: 2018 Partnership for a Healthier America (PHA) Summit

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

Attendance for the Partnership for a Healthier America (PHA) Summit is an essential meeting that allows the opportunity for those in the private sector to meet with their nonprofit, academic and government counterparts to ensure every child grows up at a healthy weight by addressing issues critical to the country's health and well-being. Attending the PHA Summit will allow participants to bring back information regarding programs, policies and policy directions. It also provides CDSS opportunities to create new partnerships and further establish the role of California SNAP-Ed.

As the California SNAP-Ed oversight agency, it is imperative for CDSS to attend this conference that focuses on policy direction and federal guidance and regulations. This opportunity will allow CDSS to obtain strategies and tools to improve California SNAP-Ed in regards to its youth.

C. Travel Purpose: 2018 Food and Nutrition Service (FNS) Leadership Summit

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

CDSS' attendance at the FNS Leadership Summit would strengthen and position California's role in SNAP-Ed and increase opportunities for California to develop new partnerships. This summit also allows the opportunity to learn more about USDA SNAP-Ed priorities and about other state SNAP-Ed programs.

CDSS has been invited to attend the FNS Leadership Summit in Oregon on city and dates to be determined in FFY 18. As the California SNAP-Ed oversight agency, it is imperative for CDSS to attend this conference.

2. Travel destination (city and state)

City TBD, Oregon

The out-of-state travel cost for FFY 2018 is $1,286.

CDSS Out-of-State Travel

D. Travel Purpose: 2018 University of South Florida (USF) Social Marketing Conference and Training Academy

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

   The USF Social Marketing Conference focuses on a variety of topics related to the practice, application and dissemination of social marketing and collaboratories. Attending the USF Social Marketing Conference will allow participants to bring back information regarding the best approaches on ways to apply social marketing education, training and practices. It also provides CDSS opportunities to create new partnerships and further establish the role of California SNAP-Ed.

   As the California SNAP-Ed oversight agency, it is imperative for CDSS to attend this conference that focuses on social marketing and its implementation. This opportunity will allow CDSS to obtain strategies and tools to expand the reach of California SNAP-Ed to improve the livelihood of SNAP eligible individuals and populations.

A. Travel Purpose: Association of SNAP Nutrition Networks and Other Implementing Agencies (ASNNA)

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

The Association of SNAP Nutrition Education Administrators takes place February 5-8. The four-day winter conference offers a blend of plenary presentations by FNS and SNAP-Ed administrators, supplemented by panel presentations, offering best practices and lessons learned from SNAP-Ed interventions in a variety of settings, and new developments in the field. Additionally, there will be a research and evaluation panel presentation and opportunities for discussion with experts in the SNAP-Ed evaluation field. Attendance at the ASNNA Winter Conference will facilitate conversation between the PHI Research Scientist (Celeste Doerr) and Kansas State University on implementation and usage of the PEARs system.

Conference agenda not yet available.

4. Cost of travel for this purpose

Estimated total cost of $1,398 per person includes: roundtrip airfare costs of $300; lodging for 3 nights at $130/night; $450 registration fee; per diem for breakfast/lunch/dinner and incidental at $46/day and $120 for other costs (including local transportation/car rental at $50, car rental gas at $30, and transportation to and from airport at $40).

CDSS/PHI Out-of-State Travel

C. Travel Purpose: 2018 Partnership for a Healthier American (PHA) Summit:

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

The Building a Healthier Future Summit is a must-attend event for all corporations, nonprofits and others focused on creating solutions to ensure every child grows up at a healthy weight.

The Summit provides a unique opportunity for those in the private sector to sit with their nonprofit, academic and government counterparts to address an issue critical to the future of this country's health and well-being. Attendees walk away with tangible, actionable solutions that will indeed help us to make the healthy choice the easy choice for all Americans, regardless of where they live, work or play. The goals of the summit align nicely with SNAP-Ed state goals and objectives and emphasize PSE strategies and partnerships that could be beneficial to advancing these goals.

Conference agenda not yet available.

CDSS/PHI Out-of-State Travel

D. Travel Purpose: 2018 University of South Florida (USF) Social Marketing Conference and Training Academy

1. Justification of need for travel, including how attendance will benefit SNAP-Ed

The Social Marketing Training Academy takes place June 27-28. The two-day academy teaches attendees how to apply the core elements of a successful social marketing initiative, select the behavior which will have the greatest impact on their issue, select and prioritize the target audience, understand the importance of formative research, analyze data and develop a marketing mix based on insights. The Main Conference offers a blend of plenary presentations by internationally recognized social marketing experts, supplemented with case studies of social marketing applications in a variety of settings and new developments in the field. Attendance at the Training Academy and Main Conference will bring cutting edge social marketing techniques to SNAP-Ed approaches in California.

Conference agenda not yet available.

CDPH Out-of-State Travel

A. Travel Purpose: American Public Health Association (APHA) Annual Meeting and Expo

1. How attendance will benefit SNAP-Ed program goals and objectives

This conference is of extreme importance to the Chief of the Chronic Disease and Injury Control Division, as well as key staff in the California Department of Public Health (CDPH). In CDPH, Health Program Manager III staff is tasked with primary obesity prevention tasks and roles. The conference content provided will enhance the skills of the HPM III in their efforts to meet the goals of the CDPH award requirements that will benefit low income Californians. These goals include maintaining a level of expertise and capacity in obesity prevention practice and science that will help prevent the state from losing future funding which will pose a negative impact on California. The four-day conference is ideal for staff (HPM III) serving as practitioners who are involved or interested in community-based initiatives to prevent obesity. Staff attending will maximize participation in both general sessions and in small group sessions to discuss obesity prevention topics with different experts. Attending APHA will allow CDPH staff to utilize information on leading-edge research, programs and policies to improve technical assistance to SNAP-Ed programs, establish new partnerships and collaborate with other programs providing SNAP-Ed services throughout California. Attending this conference ensures that CDPH will complete Scope of Work (SOW) activities and maximize the usage of funding allotted from USDA. The APHA Annual Conference is the oldest and largest gathering of public health professionals in the world, attracting more than 13,000 national and international physicians, administrators, nurses, educators, researchers, epidemiologists and related health specialists. APHA's meeting program addresses current and emerging health science, policy, and practice issues in an effort to prevent disease and promote heath. This venue allows CDPH to showcase data from California state-wide surveys and other innovative projects and to obtain strategies and tools for public health related to nutrition education and to bring back information on leading edge research, programs and policies to improve technical assistance to SNAP-Ed programs, build new partnerships and share with others providing SNAP-Ed services in California. Costs associated with this trip will be reimbursed by California Department of Social

Services through an interagency agreement with CDPH. (This was approved in the FFY 2016-17 OST.)

2. Justification of need for travel

   This meets one of the goals of the CDPH Strategic Map which is to increase quality and years of healthy life, reduce disparities, and promote health equity. It also meets the mission critical criteria set forth in Executive Order B-06-11 as being required per statute, contract or executive order. Video or teleconferencing and/or online web-based training is not available.

3. Travel destination (city and state)

   Atlanta, GA

4. Number of staff traveling

5. Cost of travel for this purpose

   Air Fare $500; Per Diem $46 x 5 days = $230; Lodging $150 x 4 nights = $600; Transportation $100; Registration $630

   Total Cost: $2,060.00

CDPH Out-of-State Travel

B. Travel Purpose: Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies (ASNNA)

1. How attendance will benefit SNAP-Ed program goals and objectives

Attendance at this conference is mandatory to meet the mission critical function required by the contract between CDPH and United States Department of Agriculture (USDA). This conference is the only venue available for CDPH to directly influence USDA policy and administration in the formative/conceptual phases. Association of Supplemental Nutrition Assistance Program for Education Nutrition is the only organization recognized by the USDA as representing the collective view and positions of states that operate nutrition education/obesity prevention campaigns for low-income audiences with funding through SNAP. The conference focuses on policy direction of state programs, federal guidance and regulations, funding and performance levels, funding reallocations among states, and reporting. This small meeting of about 100 attendees brings together representatives from the Senate and House Agriculture Committees which oversee SNAP; other hunger, nutrition and public health advocates; federal government leaders from USDA and the Centers for Disease Control and Prevention that fund state nutrition programs; and state implementing agencies, e.g., universities, health departments, non-profits, and social service departments. These stakeholders raise, discuss and try to resolve emerging, complex and contentious issues, including establishing joint projects and work groups. The Health Program Manager III (HPM III) is the Branch Chief of the CDPH SNAP-Ed program and, as such, carries overall authority for the success of the program. The HPM III is an active leader in ASNNA and participates as a speaker, moderator and leadership team member for new, stronger directions in SNAP. Their presence is essential for face-to-face conversations with USDA officials on SNAP-Ed funding and policy issues. This trip was submitted for and approved in the FFY 2017 USDA Plan. Costs associated with this trip will be reimbursed by California Department of Social Services through an interagency agreement with CDPH. (This was approved in the FFY 2016-17 OST.)

2. Justification of need for travel

   This meets one of the goals of the CDPH Strategic Map which is to increase quality and years of healthy life, reduce disparities, and promote health equity. It also meets the mission critical criteria set forth in Executive Order B-06-11 as being required per statute, contract or executive order. Video or teleconferencing and/or online web-based training is not available.

   Air Fare $500; Per Diem $46 x 4 days = $184; Lodging $150 x 3 nights = $450; Transportation $100

   Total Cost: $1,234.00

CDPH Out-of-State Travel

C. Travel Purpose: 2018 Partnership for a Healthier America (PHA) Summit

1. How attendance will benefit SNAP-Ed program goals and objectives

The Branch Chief, Caroline Kurtz, PhD, of the Nutrition Education and Obesity Prevention Branch (CDPH) has been invited to attend the Partnership For A Healthier America's (PHA) annual summit in Washington DC on May 2-4, 2018, where she will represent the California. Attendees are comprised of private sector, academic, and government counterparts convened to identify strategies to reduce obesity in children. PHA is a national non-profit organization committed to ending the childhood obesity crisis within a generation by working with the private sector to make the healthy choice the easy choice for busy parents and families. PHA has partnered with over 200 organizations, including the USDA and state administered SNAP-Ed programs, to reach families where they live, work, learn and/or play. Over 18 months ago, PHA independently launched the FNV campaign (pilots campaigns were in Fresno, CA and Hampton Roads, Virginia), which encourages teenagers and families to purchase and eat more fruits and vegetables. The campaign is comprised of celebrity endorsements designed to make fruits and vegetables hip and relevant.

2. Justification of need for travel

Dr. Kurtz provides programmatic leadership to CDPH's SNAP-Ed and CDC funded programs on nutrition education and obesity prevention and represents CDPH amongst both state and national organizations working on obesity prevention strategies and messages. For the past 2 years, Dr. Kurtz has worked to negotiate a partnership with PHA to incorporate creative materials from the FNV campaign with the state's obesity prevention campaign.

Dr. Kurtz' attendance would continue to strengthen and position California in a leadership role in obesity prevention at this national summit, increase opportunities for CDPH to develop new partnerships, as well increase the visibility of the nationally attended Biennial Childhood Obesity Conference in FFY 2019, which CDPH is one of five sponsors, to a wider audience. A link to the PHA summit, agenda, and last year's attendee list can be found be here: https://www.ahealthieramerica.org/pha-summit-8.

3. **Travel destination (city and state)**

   Washington DC

   Lodging $150/2 nights x2= $600; Transportation $100x2 = $200;
   Registration $700x2 =$1400

   Total Cost: $3,476.00

CDPH Out-of-State Travel

D. Travel Purpose: 2018 Food and Nutrition Service (FNS) Leadership Summit

1. How attendance will benefit SNAP-Ed program goals and objectives

   The Branch Chief, Caroline Kurtz, PhD, and Lauren Whetstone, Chief of Research and Evaluation of the Nutrition Education and Obesity Prevention Branch (CDPH) have been invited to attend the FNS Leadership Summit in Portland OR on dates to be determined in FFY 18.

2. Justification of need for travel

   Dr. Kurtz provides programmatic leadership to CDPH's SNAP-Ed programs on nutrition education and obesity prevention and represents CDPH amongst both state and national organizations working on obesity prevention strategies and messages. Ms. Whetstone provides leadership to CDPH's SNAP-Ed evaluation on obesity prevention outcomes.

   Dr. Kurtz' and Ms. Whetstone's attendance would strengthen and position California in a leadership role in obesity prevention at this summit, increase opportunities for CDPH to develop new partnerships.

3. Travel destination (city and state)

   Portland, OR

4. Number of staff traveling

   Two Staff

   Total Cost: $3,084.00

CDPH Out-of-State Travel

E. Travel Purpose: U.S. Soccer Foundation: National Training

1. How attendance will benefit SNAP-Ed program goals and objectives

   This event brings together strong leaders from across the country to become Soccer for Success Coach-Mentor trainers in their communities. The National Training introduces new and seasoned coach-mentors to the *Soccer for Success* program curriculum for the upcoming program year. Sessions and workshops at the event focus on nutrition education, physical activity, social-emotional learning, and child safety. In addition, coach-mentors to participate in demonstrations of the curriculum in a live, on-the-field environment. Following the training, these coach-mentors become certified trainers and are equipped to lead adults in local *Soccer for Success* trainings across the country. Using this model, the U.S. Foundation can ensure that every coach-mentor is able to deliver high-quality programming and is positively impacting the lives of youth in underserved communities across the country. This meets SNAP-Ed goals to support evidence-based nutrition education and obesity prevention interventions and projects for persons eligible for the Supplemental Nutrition Assistance Program (SNAP). Through the training, program operators will have the capacity to train adults in their community on how to implement this evidence based intervention.

2. Justification of need for travel

   The National Training builds the capacity of the *Soccer for Success* program operator by training an adult to be a certified *Soccer for Success* Trainer. If the program expands during the year, they will be able to train the newly recruited adults that will serve as coach-mentors. If they do not have a certified *Soccer for Success* trainer on Staff, the U.S. Soccer Foundation will need to send a certified *Soccer for Success* trainer to their city to train the adults.

3. Travel destination (city and state)

   Washington, DC

   One Staff

5. Cost of travel for this purpose

Total Cost: $2500

CDPH Out-of-State Travel

F. Travel Purpose: U.S. Soccer Foundation: Urban Soccer Symposium

1. How attendance will benefit SNAP-Ed program goals and objectives

   The Urban Soccer Symposium hosts community leaders and speakers from across the nation who are dedicated to improving the field of sports-based youth development. The Symposium features three days of interactive workshops focused on sharing best practices and maximizing organizations' impact in the community. Workshops cover health & wellness topics, as well as topics related to mentorship and improving the built environment of low-income communities. The Symposium includes a track for program operators implementing the Soccer for Success curriculum. The track includes workshops that provide administrative training for the attendees. Topics include data collection, curriculum overview, site visits etc. This training helps meets SNAP-Ed's goals and objectives because it provides each program operator with the training to effectively oversee the implementation of this evidence-based program.

2. Justification of need for travel

   The Urban Soccer Symposium is a required training for all Program Administrators of the Soccer for Success program.

3. Travel destination (city and state)

   Washington, DC

4. Number of staff traveling

   One Staff

5. Cost of travel for this purpose

   Total Cost: $2500

CDPH/Los Angeles County Out-of-State Travel

A. Travel Purpose: Safe Routes to School (SRTS) National Conference.

1. How attendance will benefit SNAP-Ed program goals and objectives

   Travel will enable LACDPH to learn about current Safe Routes to School (SRTS) programs in the country so can similar programs encouraging safer routes and bike-friendly places be implemented in local communities.

2. Justification of need for travel

   Participation in this conference will give LACDPH staff an opportunity to share and discuss ideas, resources, projects, and best practices to help improve the health, safety, and environment of children.

3. Travel destination (city and state)

   Location has not been determined yet

4. Number of staff traveling
   2 staff.

5. Cost of travel for this purpose
   $3,260 total for 2 staff.

CDPH/NPI Out-of-State Travel

A. Travel Purpose: Food and Nutrition Conference and Expo (FNCE)

1. How attendance will benefit SNAP-Ed program goals and objectives

   The Food and Nutrition Conference and Expo (FNCE) of the Academy of Nutrition and Dietetics the world's largest meeting of food and nutrition experts — more than 10,000 registered dietitian nutritionists, nutrition science researchers, policy makers, health-care providers and industry leaders attend the annual meeting — and address key issues affecting the health of all Americans. Attending the FCNE will allow NPI staff to share SNAP-Ed's program findings and inform NPI's evaluation methods.

2. Justification of need for travel

   This meets one of the goals of the CDPH Strategic Map which is to increase quality and years of healthy life, reduce disparities, and promote health equity. It also meets the mission critical criteria set forth in Executive Order B-06-11 as being required per statute, contract or executive order. Video or teleconferencing and/or online web-based training is not available.

G. Travel Purpose: American Evaluation Association (AEA) Summer Institute

1. How attendance will benefit SNAP-Ed program goals and objectives

   The American Evaluation Association Summer Institute is a special training-focused meeting conducted by a collaboration between the Evaluation Institute and the American Evaluation Association that is more technical and data systems focused than the general American Evaluation Association Fall meeting. Examples of relevant sessions from 2017 include sessions on data quality control and analysis of non-parametric statistics, a workshop on focus groups that staff used to enhance the HOTM focus group research, and a workshop on evaluability assessment that is helpful for our work on state developed projects. These applied workshops enhance practical skills and provide reference materials for use afterward.

2. Justification of need for travel

   This meets one of the goals of the CDPH Strategic Map which is to increase quality and years of healthy life, reduce disparities, and promote health equity. It also meets the mission critical criteria set forth in Executive Order B-06-11 as being required per statute, contract or executive order. Video or teleconferencing and/or online web-based training is not available.

3. Travel destination (city and state)

   Washington, DC

4. Number of staff traveling

   2.

5. Cost of travel for this purpose

   $4,320

CDPH/CDFA Out-of-State Travel

A. Travel Purpose: Farm to School National Forum

1. **How attendance will benefit SNAP-Ed program goals and objectives**

   This is the annual conference for Farm to School practitioners throughout the country and covers many SNAP-Ed goals. As the leader for the California Farm to School Network (CFSN), it is essential that the Office of Farm to Fork (Office) attend. The Office will be able to share its work with the CFSN and learn from other leaders in different states. Attending this conference aligns with the Office's SNAP-Ed program goals and objectives and help the Office better lead the CFSN and ensure that we provide best practices and resources for schools, LHDs, farmers, and other California stakeholders to support farm to school programs and the availability of healthy food for students receiving school meals.

2. **Justification of need for travel**

   This conference is necessary as part of the Office's role leading the California Farm to School Network. The Conference is held annually in different states and is the only way for the Office to meet with and learn from other national leaders and bring back relevant practices and information to California.

3. **Travel destination (city and state)**

   Washington, DC

4. **Number of staff traveling**

   1.

5. **Cost of travel for this purpose**

Total UCCE Out-of-State Travel:	$34,842.00

UCCE Out-of-State Travel

A. Travel Purpose: American Public Health Association (APHA) Annual Meeting and Expo

1. How attendance will benefit SNAP-Ed program goals and objectives

   The American Public Health Association (APHA) is one of the premier meetings regarding health and nutrition developments nationally. UC CalFresh seeks to provide program participants leading information relevant to nutrition education and see national best practices as presented by alternate agencies/states. Attending APHA will allow participant to bring back information on leading-edge research, programs and policies to improve technical assistance to SNAP-Ed programs, build new partnerships and share with others providing SNAP-Ed services in California. It also provides UC CalFresh with new approaches required in the USDA SNAP-Ed Guidance

2. Justification of need for travel

   Allows the UC CalFresh Nutrition Education Program to obtain strategies and tools for public health related nutrition education, per USDA SNAP-Ed Guidance. We are also pending notification of a presentation on UC CalFresh NEP's Evidence based for SNAP-Ed

3. Travel destination (city and state)

   Atlanta, GA

4. Number of staff traveling

   2

5. Cost of travel for this purpose

   $5,038.00

UCCE Out-of-State Travel

B. Travel Purpose: Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies (ASNNA)

1. How attendance will benefit SNAP-Ed program goals and objectives

   Attendance for the Association of SNAP-Ed Nutrition Networks and Other Implementing Agencies (ASNNA) meeting is essential as this meeting was created to provide a means for SNAP-Ed states to work together and meet with USDA on program and administrative issues of SNAP-Ed. The meeting consists of training, workgroups and sharing of resources from other states. Staff participate with other attendees on developing, implementing and evaluating best practices, new information from USDA, and any changes that may occur in the USDA SNAP-Ed Guidance.

2. Justification of need for travel

   Travel to this meeting allow the UC CalFresh Nutrition Education Program to obtain information from USDA/FNS as well as other national leaders to advance practices in California. UC CalFresh has played a vital role in providing support and facilitation of sessions at this meeting that lead to the uptake of Healthy Foods per USDA (Dietary Guidelines

3. Travel destination (city and state)

   Arlington, Virginia

4. Number of staff traveling

   1

5. Cost of travel for this purpose

   $2,373.00

UCCE Out-of-State Travel

C. Travel Purpose: Society for Nutrition Education and Behavior (SNEB)

1. How attendance will benefit SNAP-Ed program goals and objectives

   Society for Nutrition Education and Behavior (SNEB) is an international community of professionals actively involved in nutrition education and health promotion. Their work takes place in colleges and universities, government agencies, cooperative extension, communications and public relations firms, the food industry, voluntary and service organizations and with other reliable places of nutrition and health education information.

   The Smarter Lunchrooms Movement of California (SLM of CA) Collaborative will also submit a program proposal to present on the Team Nutrition Smarter Lunchrooms Movement Grant in California. If the proposal is accepted, the SLM Program Lead will attend the SNEB conference.

2. Justification of need for travel

   UC CalFresh Nutrition Education Program to obtain strategies and tools for public health related to nutrition education. Often UC presents at this meeting. Attending SNEB allows the UC CalFresh Nutrition Education Program to obtain strategies and tools for public health strategies related to nutrition education now required in the USDA SNAP Ed Guidance. Attendance will also allow UC CalFresh to bring back information on leading-edge research, programs and policies to improve technical assistance to SNAP-Ed programs, build new partnerships and share with others providing SNAP-Ed services in California. Attending SNEB will also allow UC CalFresh to participate in the ASNNA meeting held during the conference.

3. Travel destination (city and state)

5. Cost of travel for this purpose

   $2,562.00

UCCE Out-of-State Travel

D. Travel Purpose: SHAPE America National Convention and Expo

1. How attendance will benefit SNAP-Ed program goals and objectives

   The SHAPE America National Convention and Expo provides an opportunity for health professionals to learn about local, state and national strategies to combat obesity in the United States. SNAP-Ed continues to develop multi-level interventions and community and public health approaches that focus not only on healthy eating habits, but also, physically active lifestyles for SNAP-Ed target audience. This conference will help the UC CalFresh state office staff develop new innovative obesity prevention strategies that are evidence-based and nationally recognized and supported.

2. Justification of need for travel

   This conference provides opportunities for UC CalFresh staff to collaborate with and learn from potential partners who are advancing physical activity policies and programs at the local, state and national level. SHAPE America is working directly with Let's Move! and Let's Move! Active Schools initiatives, which are priorities for SNAP-Ed. Topics, include advocacy for physical activity and school health policies, family and community engagement, assessment and evaluation of physical activity programs, and technology in health promotion. These topics will assist with further integration of physical activity into the UC CalFresh programming.

3. Travel destination (city and state)

   Nashville, TN

4. Number of staff traveling

   1

5. Cost of travel for this purpose

   $2,524.00 * *Substitution may take place depending on UC travel policy*

UCCE Out-of-State Travel

E. Travel Purpose: American Evaluation Association (AEA) Annual Conference

1. How attendance will benefit SNAP-Ed program goals and objectives

   The American Evaluation Association (AEA) annual conference and professional development workshops brings together professional evaluators from around the country and the world. The 2017 theme "From Learning to Action" will explore 4 ways of learning from evaluation to create better practices and outcomes: 1) share evaluation practices, methods, ethnics and lessons, 2) share evidence of what works and why in public policies, programs and projects, 3) share innovations that can be incorporated into evaluation practice and 4) share insight on evaluation users to increase evaluation utilization. The dozens of skills and practice oriented sessions have direct applicability to SNAP-Ed evaluation and will enable staff to obtain up-to-date information to assess the strengths and weaknesses of the SNAP-Ed program and further advance SNAP-Ed evaluation practices. It also promotes and develops skills in evaluation practice. Evaluation professionals have an opportunity to learn and share their best work in evaluation theory and practice.

2. Justification of need for travel

   Attending the Annual Conference of the American Evaluation Association will enable the UC CalFresh Nutrition Education Program to obtain leading edge evaluation strategies, lessons and tools for application to the design and implementation of SNAP-Ed evaluation and the technical assistance provided to SNAP-Ed projects. Two staff will attend to ensure coverage of the wide array of evaluation topics presented. Attendance will allow program staff to learn and share about evaluation theory, practices and innovations that can be applied to SNAP-Ed programming and shared with others who is providing SNAP-Ed services in California.

3. Travel destination (city and state)

   Washington DC

4. Number of staff traveling

5. Cost of travel for this purpose

   $5,458.00

UCCE Out-of-State Travel

F. Travel Purpose: Global Learning Partners' Foundations of Dialogue Education Workshop

1. How attendance will benefit SNAP-Ed program goals and objectives

   The Global Learning Partners' Foundations of Dialogue Education Workshop is an intensive training of trainers wishing to apply the Dialogue Education™ (DE) adult learning techniques in their work. Learner-centered Dialogue Education is a core concept used in adult education curricula used by the UC CalFresh program. Dialogue Education focuses on how adults learn best: by becoming active participants in their own learning experience. DE is highly collaborative, and recognizes the rich resource of knowledge each adult learner brings in to the session so that this becomes part of the fabric of learning. This interactive hands-on training is not provided elsewhere. The registration fee includes all workshop materials and supplies, a substantial workbook, and two teaching tools and resources.

   The registration fee ($1,865) includes all workshop materials and supplies, a substantial workbook, and two teaching tools and resources.

2. Justification of need for travel

   Attending the Global Learning Partners' Foundations of Dialogue Education Workshop will enable the UC CalFresh Nutrition Education Program to enhance training efforts for program staff in two major ways. One is to incorporate DE training methods to increase effectiveness of program staff trainings in all areas. The second is to teach DE skills that staff can use in their direct education with adult audiences. With Dialogue Education, the learning atmosphere is safe and respectful, a place where people are both challenged and supported to maximize learning. The outcome is higher, more organic retention of skills and knowledge for the long-term.

3. Travel destination (city and state)

   Montpelier, VT or Stowe, Vermont

4. Number of staff traveling

   1

5. Cost of travel for this purpose

   $3,804.00

UCCE Out-of-State Travel

G. Travel Purpose: Food and Nutrition Conference and Expo.

1. How attendance will benefit SNAP-Ed program goals and objectives

   The Academy of Nutrition and Dietetics sponsors the world's largest meeting of food and nutrition experts — more than 10,000 registered dietitians, nutrition science researchers, policy makers, health-care providers and industry leaders attend the annual meeting — and address key issues affecting the health of all Americans. The Academy's annual meeting features more than 130 research and educational presentations, lectures, panel discussions and culinary demonstrations.

2. Justification of need for travel

   Attending the Academy of Nutrition and Dietetics Food and Nutrition Conference will enable the UC CalFresh program to provide the most current information to our staff on nutrition and obesity prevention as well as nutrition education tools and strategies presented at the conference.

3. Travel destination (city and state)

   McCormick Place West, Chicago, Illinois

4. Number of staff traveling

   2

5. Cost of travel for this purpose

   $5,294.00

UCCE Out-of-State Travel

H. Travel Purpose: School Nutrition Association Annual National Conference (SNA ANC)

1. How attendance will benefit SNAP-Ed program goals and objectives

   The School Nutrition Association (SNA) is a national community of professionals actively involved in providing meals to students throughout the country. Their work focuses on delivering quality, nutritious meals in schools, decreasing food waste and increasing consumption of healthy foods.

2. Justification of need for travel

   UC CalFresh Nutrition Education Program will obtain information related to school food service and the school lunchroom environment. Attending SNA ANC allows UC CalFresh Nutrition Education Program to develop strategies for increasing access to more healthful, regionally sourced, and sustainably produced food for our nation's school children. In addition, SNA ANC will give UC CalFresh Nutrition Education program the opportunity to provide a presentation on the Smarter Lunchrooms Movement of California, increasing the awareness of the SLM.

3. Travel destination (city and state)

   Las Vegas, NV

4. Number of staff traveling

   1

5. Cost of travel for this purpose

   $1,738.00

UCCE Out-of-State Travel

I. Travel Purpose: National Anti-Hunger Policy Conference

1. How attendance will benefit SNAP-Ed program goals and objectives

This conference addresses many of the objectives of the California State SNAP Ed plan. The conference focuses on anti-hunger and anti-poverty and provides strategies and ideas to address and reduce hunger. It brings together advocates; officials; anti-obesity groups; and representatives of community and non-profit organizations.

The three-day conferences allows for SNAP Ed programs and staff to have networking opportunities, training, and learn from sessions that support the programs and approaches employed in California. The conference also allows participants share information and learn how to strengthen the quality and reach of federal nutrition programs, learn best outreach and program practices from other states and localities, fill in the gaps in food service for millions of low-income children, and identify creative ideas for new and innovative approaches to ending hunger.

2. Justification of need for travel

This meeting allows participants to hear the latest information on anti-hunger programs and community approaches and opportunities to meet with members of congress, hill staff, and administration officials who attend the conference as they provide updates during conference sessions.

3. Travel destination (city and state)

Washington DC

4. Number of staff traveling

1

5. Cost of travel for this purpose

$2,267.00* *Amount may change slightly due to meeting location once determined*

UCCE Out-of-State Travel

J. Travel Purpose: Food and Nutrition Service (FNS) Leadership Summit FFY 2018

1. How attendance will benefit SNAP-Ed program goals and objectives

   Staff attendance will allow for learning USDA SNAP-Ed priorities and provide learning opportunities from other state SNAP-Ed programs.

2. Justification of need for travel

   This trip is at the request of USDA and CDSS. Travel was recommended for 4 persons to attend the USDA FNS WRO SNAP-Ed Regional Meeting in Portland, Oregon. As one of the State Implementing Agencies, this meeting is required as part of the funding requirements.

3. Travel destination (city and state)

   Portland, Oregon or TBD

4. Number of staff traveling

   4

5. Cost of travel for this purpose

   $3,784.00* *Amount may change slightly due to meeting location once determined*

CDSS In-State Travel

Travel Purpose: CDSS In-State

1. Justification of need for travel, including how attendance will benefit SNAP-Ed
   Attendance and participation in these local program reviews are critical to help maintain the SNAP-Ed program integrity in the State of California. CDSS is following FNS' recommendations to take a more active role in program oversight and promote communication and collaboration of SNAP-Ed services.

   As the state's oversight agency, CDSS has the responsibility to conduct periodic program reviews to ensure the integrity of the program. These reviews will help identify areas of improvement and improve overall program performance.

2. Travel destination (city, town or county or indicate local travel)
   There are a total of 12 trips listed. Please refer to the CDSS budget justification for more information. There will be various destinations throughout California.

UCCE In-State Travel

A. Travel Purpose: California Conference of Local Health Department Nutritionists (CCLHDN)

1. How attendance will benefit SNAP-Ed program goals and objectives

   The purpose of CCLHDN is to build leadership capacity among local health department nutritionists to influence nutrition funding and programs at the local and state levels.

2. Justification of need for travel

   This conference provides opportunities for UC CalFresh Advisors and staff to meet with the nutrition education directors at the various local health departments. It also allows discussion and planning on topics including collaboration, peer exchange programs, CNAP support, evaluation, and strategies for reaching priority populations. This information is useful in developing a strategic plan that will address the current and future nutrition education needs for our target population.

3. Travel destination (city, town or county or indicate local travel)

   TBD

4. Number of staff traveling

   5 **Attendance may be modified depending on county need and staffing*

5. Cost of travel for this purpose

   $6,740.00**

   ** **Amount may change slightly due to meeting location once determined*

UCCE In-State Travel

B. Travel Purpose: California Agriculture in the Classroom Conference

1. How attendance will benefit SNAP-Ed program goals and objectives

   Agriculture education has been practicing Common Core concepts since before Common Core was cool. Incorporating agriculture into the classroom provides students with connections to the real world, helping them develop critical thinking and problem solving skills.

2. Justification of need for travel

   Workshop presenters will provide resources and guidance to help meet Common Core Standards while engaging your students through agricultural themed lessons. Network with fellow educators and agriculture industry experts; attend farm tours, presentations, workshops, and exhibits, to explore how agriculture and Common Core go hand-in-hand.

3. Travel destination (city, town or county or indicate local travel)

   TBD – information not yet available

4. Number of staff traveling

   10 **Attendance may be modified depending on county need and staffing.*

5. Cost of travel for this purpose

   $7,384.00 *

   ** *Amount may change slightly due to meeting location once determined*

UCCE In-State Travel

C. Travel Purpose: Farm to School Conference

1. How attendance will benefit SNAP-Ed program goals and objectives

   Understanding Farm-to-school, Farm-to-Community principals helps to understand ways to integrate new approaches into the UC CalFresh nutrition education programs. Farm to school programs help to enhance the Smarter Lunchrooms and Shaping Healthy Choices Program priorities and allow for greater adoption of policy, systems and environmental approaches for the SNAP-Ed programs.

2. Justification of need for travel

   The majority of UC CalFresh counties are implementing at least some aspect of Farm to School and Garden programming. Attending the conference will enable UC CalFresh state office staff to obtain actionable information and best practices for further improving UC CalFresh's Farm to School and Garden programming and partnerships.

3. Travel destination (city, town or county or indicate local travel)

   Modesto, California

4. Number of staff traveling

   4 **Attendance may be modified depending on county need and staffing*

5. Cost of travel for this purpose

   $4,021.00

UCCE In-State Travel

D. Travel Purpose: Annual SNAP-Ed LIA Forum

1. How attendance will benefit SNAP-Ed program goals and objectives

   This forum is the beginning point of collaboration for our Local partners to begin discussing plans and changes to their local SNAP-Ed Work Plans for the upcoming fiscal year. The Forum runs over two days and is held in Sacramento. Attendees will hear essential information for developing and revising their Work Plan and receive training and technical assistance from state agency staff.

2. Justification of need for travel

   Staff will require SNAP-Ed funds for mileage, lodging and other allowable travel meals and incidentals.

3. Travel destination (city, town or county or indicate local travel)

   Sacramento, California

4. Number of staff traveling

   80

5. Cost of travel for this purpose

   $26,000.00

UCCE In-State Travel

E. Travel Purpose: UC CalFresh Regional Trainings

1. How attendance will benefit SNAP-Ed program goals and objectives

   Given the large state of California that is served by UC CalFresh and the diverse counties, UC CalFresh provides several regional trainings (North, Central and South) for all staff funded by UC CalFresh. These regional trainings focus more on UC CalFresh curriculum, specific skills and knowledge required to deliver the curriculum and maintain the integrity of the goals and objectives of the approved curriculum. These trainings include but are not limited to Program Supervisor Training, the Science of Nutrition, Servsafe Training, Smarter Lunchrooms Regional Trainings, Shaping Healthy Choices, Youth Empowerment Trainings and physical activity trainings such as CATCH.

   Additionally, UC CalFresh staff will participate in SIA/LIA trainings that are coordinated and offered to all SIA/LIAs.

2. Justification of need for travel

   New curriculum and guidance necessitates the State Office to continually provide training and technical assistance to our county programs. By bringing UC CalFresh staff together, we can provide a consistent message and training techniques for all of our staff as well as best practices used.

3. Travel destination (city, town or county or indicate local travel)

   Northern and Southern California locations will be utilized

4. Number of staff traveling

   130

5. Cost of travel for this purpose

   $77,688.00.

UCCE In-State Travel

F. Travel Purpose: California School Nutrition Association Conference (CSNA)

1. How attendance will benefit SNAP-Ed program goals and objectives

   The California School Nutrition Association Conference (CSNA) brings together school nutritionists and food service staff who focus on the school meal programs to explore ways to foster an environment where children achieve overall wellness and lifelong success.

2. Justification of need for travel

   UC CalFresh continues to work with schools and has increased our coordination with school cafeterias and food service directors as part of our Smarter Lunchrooms Movement of California efforts and Shaping Healthy Choices framework. Attending this meeting will allow for UC CalFresh staff to learn ways to foster strategic partnerships in our joint efforts to change the school environment.

3. Travel destination (city, town or county or indicate local travel)

   Sacramento, California

4. Number of staff traveling

   5 **Attendance may be modified depending on county need and staffing*

5. Cost of travel for this purpose

   $4,760.00

UCCE In-State Travel

G. Travel Purpose: Healthy Living Ambassador (HLA) Training

1. How attendance will benefit SNAP-Ed program goals and objectives

   The San Mateo County UC CalFresh program hosts the Healthy Living Ambassador (HLA) Program as part of their UC CalFresh youth engagement and gardening efforts. Staff from other counties will visit Elkus Ranch, the location of the San Mateo County UCCE to participate in trainings on the HLA program.

2. Justification of need for travel

   To attend the overnight Healthy Living Ambassador (HLA) Training in Half Moon Bay, California. This will allow for other UC CalFresh youth engagement and garden-based education programs to receive training on the youth engagement approaches used. This will help expand and enhance the UC CalFresh gardening and youth engagement programs.

3. Travel destination (city, town or county or indicate local travel)

   Half Moon Bay, California

4. Number of staff traveling

   6

5. Cost of travel for this purpose

   $4,944.00

UCCE In-State Travel

H. Travel Purpose: Life Lab - Learning Lab - Garden Based learning

1. How attendance will benefit SNAP-Ed program goals and objectives

   Conference will help educator's better deliver garden education in schools. There is mounting evidence that school gardening, especially when combined with nutrition education encourages students to make more healthful food choices.

2. Justification of need for travel

   Learn to use a garden to breathe life into standards-based lessons, promote ecological literacy, encourage healthy eating, and support students' social development. Participants will learn tried-and-true garden-based lessons linked to Common Core Language Arts, Math, and Next Generation Science Standards; practice basic gardening techniques; and develop management strategies for a school garden program.

3. Travel destination (city, town or county or indicate local travel)

   Santa Cruz, California

4. Number of staff traveling

   10 **Attendance may be modified depending on county need and staffing*

5. Cost of travel for this purpose

   $10,335.00

UCCE In-State Travel

I. Travel Purpose: - Agents of Change Summit 2018- (AOCS18)

1. How attendance will benefit SNAP-Ed program goals and objectives

   The 2018 Agents of Change Summit explores topics in behavior change including influence, networks, and the spread of information. Professionals in public health communication discuss how behavior change campaigns and information dissemination can be successful in an environment where media is splintered, content is curated and expertise comes from a range of new sources. Attendance will benefit SIA SNAP-Ed communication and branding efforts in California.

2. Justification of need for travel

   California's SNAP-Ed SIA collaboration is entering a new stage of its development in branding and is in a politically sensitive environment nationally. At this time, strategic positioning of the program's vital benefits to SNAP eligible audiences is essential. This conference will assist in these ongoing efforts.

3. Travel destination (city, town or county or indicate local travel)

   San Diego, California

4. Number of staff traveling

   10 **Attendance may be modified depending on county need and staffing*

5. Cost of travel for this purpose

   $14,470.00

FFY 2018 In-State Travel

California Department of Aging

A. CDA In-State Travel

- Attendance: 5

Total for All In-State Travel Costs for CDA State Staff:	$10,188.00

CDA In-State Travel

Travel Purpose

1. How attendance will benefit SNAP-Ed program goals and objectives

   The purpose of this travel is to monitor and evaluate SNAP-Ed participating Area Agencies on Aging (AAA) for fidelity to SNAP-Ed program standards and provide technical assistance to help AAAs meet local county Integrated Work Plan and California SNAP-Ed program goals and objectives.

2. Justification of need for travel

   As a State Implementing Agency (SIA), CDA is responsible for ensuring that participating AAAs implement the SNAP-Ed program consistent with grant requirements and identify areas where additional program technical assistance and training are needed.

3. Travel destination (city, town or county or indicate local travel)

   CDA has eight (8) evaluation visits scheduled for FFY 2018. Scheduled SNAP-Ed evaluation visits are to agencies providing SNAP-Ed activities. A SNAP-Ed Program Specialist(AGPA), and/or , SNAP-Ed Fiscal Analyst (AGPA) will conduct AAA technical assistance/evaluation visits. When necessary, the CDA Policy Manager will participate in the on-site evaluation visit. SNAP-Ed staff's salary (see CDA budget), travel and per diem costs (see below) will be paid through the SNAP-Ed grant. Salary, travel and per diem costs for other CDA staff will be paid in-kind. These costs are reflected under #5 below.

   Other CDA staff may participate in SNAP-Ed sponsored training in Sacramento, CA.

4. Number of staff traveling

   CDA's in-state travel estimates include the following staffs:

   <u>SNAP-Ed Staff</u>
   2 AGPA's
   2 Policy Manager

   <u>In-kind Staff</u>
   1 SSM1 local assistance coordinator

5. Cost of travel for this purpose

   CDA's FFY 2018 In-State Travel includes budgeted travel expenditures of $10,188.00

FFY 2018 In-State Travel

Catholic Charities of California, Inc.

A. CCC Administrative Site Visits
- Attendance: 1

B. LIA Forum Participation
- Attendance: 12

Total for All In-State Travel Costs for CCC (County-Level & State Office):	$ 5,226.00

CCC In-State Travel

Travel Purpose

1. How attendance will benefit SNAP-Ed program goals and objectives
   a) CCC ADMINISTRATIVE SITE VISITS: CCC-LIA site visits will provide oversight and ensure fidelity to program requirements and standards. State Level SNAP-Ed staff will observe the delivery of SNAP-Ed services and provide administrative feedback and technical assistance to each CCC-LIA to improve SNAP-Ed programming and administration at the local level.

   b) LIA FORUM PARTICIPATION: CCC requires, and FNS-USDA and CDSS strongly encourage, participation by at least one SNAP-Ed staff member per CCC-LIA at the State-wide SNAP-Ed Forum. At this event, LIA staff receive training, acquire valuable knowledge, and collaborate with other LIAs to initiate the collective development of County Integrated Work Plans.

2. Justification of need for travel
   a) CCC ADMINISTRATIVE SITE VISITS: CCC has budgeted for one site visit per CCC-LIA to provide necessary program oversight, technical assistance, and administrative support to CCC-LIAs.

   b) LIA FORUM PARTICIPATION: CCC requires at least one staff member from each CCC-LIA to participate in the State-wide SNAP-Ed Forum. LIA participation in this annual event is also strongly encouraged by FNS-USDA and CDSS, to ensure collaborative development of Integrated County Work Plans and to provide CCC-LIA staff with an opportunity to receive training and acquire valuable knowledge.

3. Travel destination (city, town or county or indicate local travel)
   a) CCC ADMINISTRATIVE SITE VISITS: Site visit travel will include one trip to each of the 12 main offices and may include travel to select program delivery locations in counties where CCC-LIAs deliver SNAP-Ed services including: Solano, San Bernardino, Riverside, San Joaquin, Stanislaus, Orange, San Francisco, Marin, San Mateo, Monterey, Santa Cruz, Santa Clara, Los Angeles, Napa, Sonoma, Lake, San Diego, Imperial, Butte, Glenn, Tehama, Shasta, Siskiyou, Fresno and Trinity counties.

b) LIA FORUM PARTICIPATION: CCC-LIA staff will travel from their respective locations (in Vallejo, San Bernardino, Stockton, Santa Ana, San Francisco, Monterey, San Diego, Santa Clara, Los Angeles, Santa Rosa, Fresno and Redding) to the SNAP-Ed Forum location in Sacramento, CA.

4. Number of staff traveling
   a) (1) One CCC State Level SNAP-Ed staff member.

   b) (12) Twelve CCC-LIA SNAP-Ed staff members.

5. Cost of travel for this purpose
   a) $359.00 (FFY 2017 Carry-In will cover any remaining costs)

   b) $4,867.00

1. State Agency Goals and Objectives

   a. State Level Goals

   See State Level Goals.

   b. State Level Objectives

   See State Level Objectives.

2. Description of projects/interventions. The following information should be provided:

Project Title	FFY 2018 California Department of Health Care Services (DHCS) Project Connect/Obesity Prevention Renewal Project

   a. Related State Objectives

   Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

   The purpose of this project is to develop and test an obesity prevention project, called Project Connect, to reduce the risk and prevalence of obesity and projected health care costs among low-income Californians. Project Connect consists of three phases: (1) formative research; (2) program development and pilot testing; and (3) impact evaluation and translation of results.

   b. Audience

   Participants: Low-income overweight or obese mothers (BMI≥25), aged 20-45 years, with at least one child, aged 3-17 years, in the household at study entry, living in mostly urban communities.

   Exclusion: Pregnancy; breastfeeding; within 2 years postpartum; life-threatening illness; institutionalization; moderate to severe mental illness; substance use disorders; receiving nutrition therapy; those who have had or are considering bariatric surgery; medically diagnosed eating disorder; taking medication that affects weight; thyroid disease; patients with Type 1 or Type 2 diabetes without medical clearance from the participant's physician; plans to move away from the community in the next 18 months.

   c. Food and Activity Environments

   Epidemiologic trends related to obesity are disturbing. Two recent papers indicated that obesity prevalence rates among adult females and adolescent males and females continue to rise.[1-2]

[1] Ogden, C.L., Carroll, M.D., Lawman, H.G., Fryar, C.D., Kruszon-Moran, D., Kit, B.K., & Flegal, K.M. (2016). Trends in obesity prevalence among children and adolescents in the United States, 1988-1994 through 2013-2014. Journal of the American Medical Association, 315(21), 2292-2299.

SNAP-Ed-eligible Medi-Cal members are active, meaningful participants in our formative research. They are informing the development of our intervention and study design.

d. Project Description for Educational Strategies

The first three years of the obesity prevention project, including formative research and program planning and development, have formed the foundation of Project Connect. During the next three years (FFY 2018 through FFY 2020), we will complete program and evaluation development, implement our interventions at the community level, and determine the effectiveness of our varied approaches in reducing BMI and sugar-sweetened beverage consumption, improving fruit and vegetable consumption and physical activity, improving related psychosocial determinants and health outcomes, and achieving cost effectiveness. The study findings will then be used to inform SNAP-Ed, Medi-Cal, and other obesity-related policies and practices in the future.

e. Project Description for Marketing Strategies

During **FFY 2018 (10/01/2017–09/30/2018)**, the following activities will be completed:

Task 1:

1. Complete pilot testing of program interventions and impact/process evaluation instruments with SNAP-Ed eligible Medi-Cal members. Analyze pilot test data, and make intervention and instrument adjustments, as needed.
2. Complete final phase of community engagement/organizing process in preparation for the intervention and evaluation components of Project Connect.
3. Secure final approval from the Institutional Review Board for the Protection of Human Subjects.
4. Secure final contract approvals for the evaluation, social media/communication, and lifestyle management subcontractors, as needed.

Task 2:

1. Recruit, secure, and train all community-based research and intervention personnel.
2. Prepare/secure all program- and study-related materials.
3. Finalize messages, update local resources on the Welltopia website, and ensure social media/communication channels are ready for activation.

Task 3:

1. Finalize instruments, methods, and all evaluation logistics (process, exposure, outcome, and economic) in preparation for study recruitment and evaluation launch.
2. Begin recruiting evaluation study participants.

---

[2] Flegal, K.M., Kruszon-Moran, D., Carroll, M.D., Fryar, C.D., & Ogden, C.L. (2016). Trends in obesity among adults in the United States, 2005 to 2014. Journal of the American Medical Association, 315(21), 2284-2291.

During **FFY 2019 (10/01/2018–09/30/2019)**, the following activities will be completed:

Task 1:

1. Complete recruitment of evaluation study participants in intervention and control groups.

Task 2:

1. Collect baseline data.

Task 3:

1. Commence an evaluation study with intervention and control groups.
2. Implement interventions, including a whole-person lifestyle program, social media/communication campaign, and environmental approaches. Environmental approaches will be dependent on the availability of non-SNAP-Ed funding.
3. Collect 3- and 6-month follow-up data.
4. Collect monthly data to gauge intervention exposure.
5. Collect process evaluation data.
6. Collect data for economic analysis.

During **FFY 2020 (10/01/2019–09/30/2020)**, the following activities will be completed:

Task 1:

1. Complete intervention activities.
2. Collect 9- and 12-month follow-up data.
3. Collect monthly data collection to gauge intervention exposure.
4. Complete process data collection.
5. Complete data collection for economic analysis.
6. Develop a data dissemination plan.

Task 2:

1. Begin analyzing baseline, 3-month, 6-month, 9-month, and 12-month outcome, exposure, process, and economic data.
2. Begin identifying promising practices to implement in the control community following study completion.

f. Evidence Base

N/A

g. Policy, Systems, and Environmental Changes

Please refer to the Project Connect Impact Evaluation Prospectus in Appendix A for a list of potential PSE approaches. The approaches will be finalized once the intervention communities and their PSE needs have been identified.

h. Use of Existing Educational Materials

Based upon the formative research results and a systematic review of relevant literature and materials, the Centers for Disease Control and Prevention's PT2 program will be adapted for the whole-person lifestyle component of the intervention.

i. Development of New Educational Materials

Based upon the formative research results and a systematic review of relevant literature and materials, the Centers for Disease Control and Prevention's PT2 program will be adapted for the whole-person lifestyle component of the intervention.

4. Coordination Efforts

This project will focus on using community-based interventions and evidenced-based programming to address and maximize the reach and potential impact of obesity prevention efforts among SNAP-Ed-eligible Medi-Cal members in community settings. We plan to leverage the good work of SNAP-Ed implementing agencies, our health care partners, and others working to improve the diet, physical activity, and weight outcomes of low-income Californians.

Project Connect: Building Collective Impact to Reduce the Risk and Prevalence of Obesity among Low-income Mothers in California

Background

Epidemiologic trends related to obesity are disturbing. Two recent papers indicated that obesity prevalence rates among adult females and adolescent males and females continue to rise.[1-2] In other population subgroups, obesity prevalence remains at an all-time high, and obesity-related mortality rates may be increasing in the United States.[3] Furthermore, there are state and national reports indicating the prevalence of pre-diabetes and diabetes, combined, is 50 percent or greater in the general population.[4-5]

The California Department of Health Care Services and University of California, Davis Institute for Population Health Improvement are collaborating to develop and test an obesity prevention demonstration project, called Project Connect, to reduce the risk and prevalence of obesity and associated health care costs among low-income, SNAP-Ed eligible mothers in California. This project is funded by the United States Department of Agriculture Supplemental Nutrition Assistance Program—Education, in partnership with the California Department of Social Services.

Project Connect consists of three phases: (1) formative research; (2) program development; and (3) evaluation and translation of results. This prospectus describes the evaluation component of the project.

Evaluation Aims, Primary Outcomes, and Research Questions

Specific Aims:

1. To determine the relative impact of a small group, whole-person lifestyle program (WPLP) and a community-level environmental and communication (CEC) intervention on reducing overweight/obesity among low-income overweight or obese mothers in mostly urban, California communities.
2. To examine the impact of WPLP and CEC on improving related behavioral and health indicators.

Primary Outcomes:

1. Reduction in Body Mass Index (BMI);
2. Increase in Physical Activity (PA);
3. Increase in Fruit and Vegetable (FV) consumption;
4. Decrease in Sugar Sweetened Beverage (SSB) consumption; and
5. Cost-effectiveness.

Research Questions:

1. Among low-income overweight or obese mothers living in mostly urban communities, what are the effects of a WPLP and CEC intervention on reducing overweight/obesity and improving related behavioral and health indicators?
2. Among low-income overweight or obese mothers living in mostly urban communities, is there a dose-response effect of the WPLP and CEC intervention? For example, are better outcomes associated with better attendance at WPLP sessions? Or, does greater exposure to health-enhancing social media and community activities correlate with better outcomes?
3. What is the cost effectiveness for the WPLP and CEC intervention at achieving health outcome goals?

Study Design

Participants: Low-income, SNAP-Ed eligible overweight or obese mothers (BMI≥25), aged 20-45 years, with at least one child, aged 3-17 years, in the household at study entry, living in mostly urban communities.

Exclusion: Pregnancy; breastfeeding; within 2 years postpartum; life-threatening illness; institutionalization; moderate to severe mental illness; substance use disorders; receiving nutrition therapy; those who have had or are considering bariatric surgery; medically diagnosed eating disorder; taking medication that affects weight; thyroid disease; patients with Type 1 or Type 2 diabetes without medical clearance from the participant's physician; plans to move away from the community in the next 12 months.

Design: The study will employ a prospective, controlled design. One hundred and sixty women in selected neighborhoods in Sacramento County will be assigned to either an intervention (n=80) or control (n=80) group.

Intervention Group: The intervention group will be exposed to a 6-month, integrated, community-based approach consisting of the following:

1. WPLP is a small-group program incorporating elements of Family Hui and the Centers for Disease Control and Prevention's PT2 program.[6-7] Family Hui is a peer-led program designed to build empowerment, positive parenting skills, coping and stress management, social support, and connection to help families thrive. PT2 is the latest version of the National Diabetes Prevention Program.

2. CEC has two parts: (a) creating an environment conducive to healthful weight, which may include planting trees to increase physical activity, increase social cohesion, and catalyze other community improvements; and (b) establishing stronger communications and community connections through a coordinated social media campaign.

Control Group: The control group participants will be enrolled for study measurements only and will be placed on a waitlist to receive effective interventions upon study completion.

Refer to Figure 1 for the study design diagram and Figure 2 for the conceptual framework.

Measures: Valid and reliable measures will be used in this study, and questionnaires will be pilot tested to ensure the length and content is appropriate for study participants. Measures will include BMI, PA, FV consumption, SSB consumption, among others. Data will be collected at baseline, 3 months, 6 months, 9 months, and 12 months. Assessments of exposure to the intervention will be collected monthly.

Figure 1: Study Design Diagram

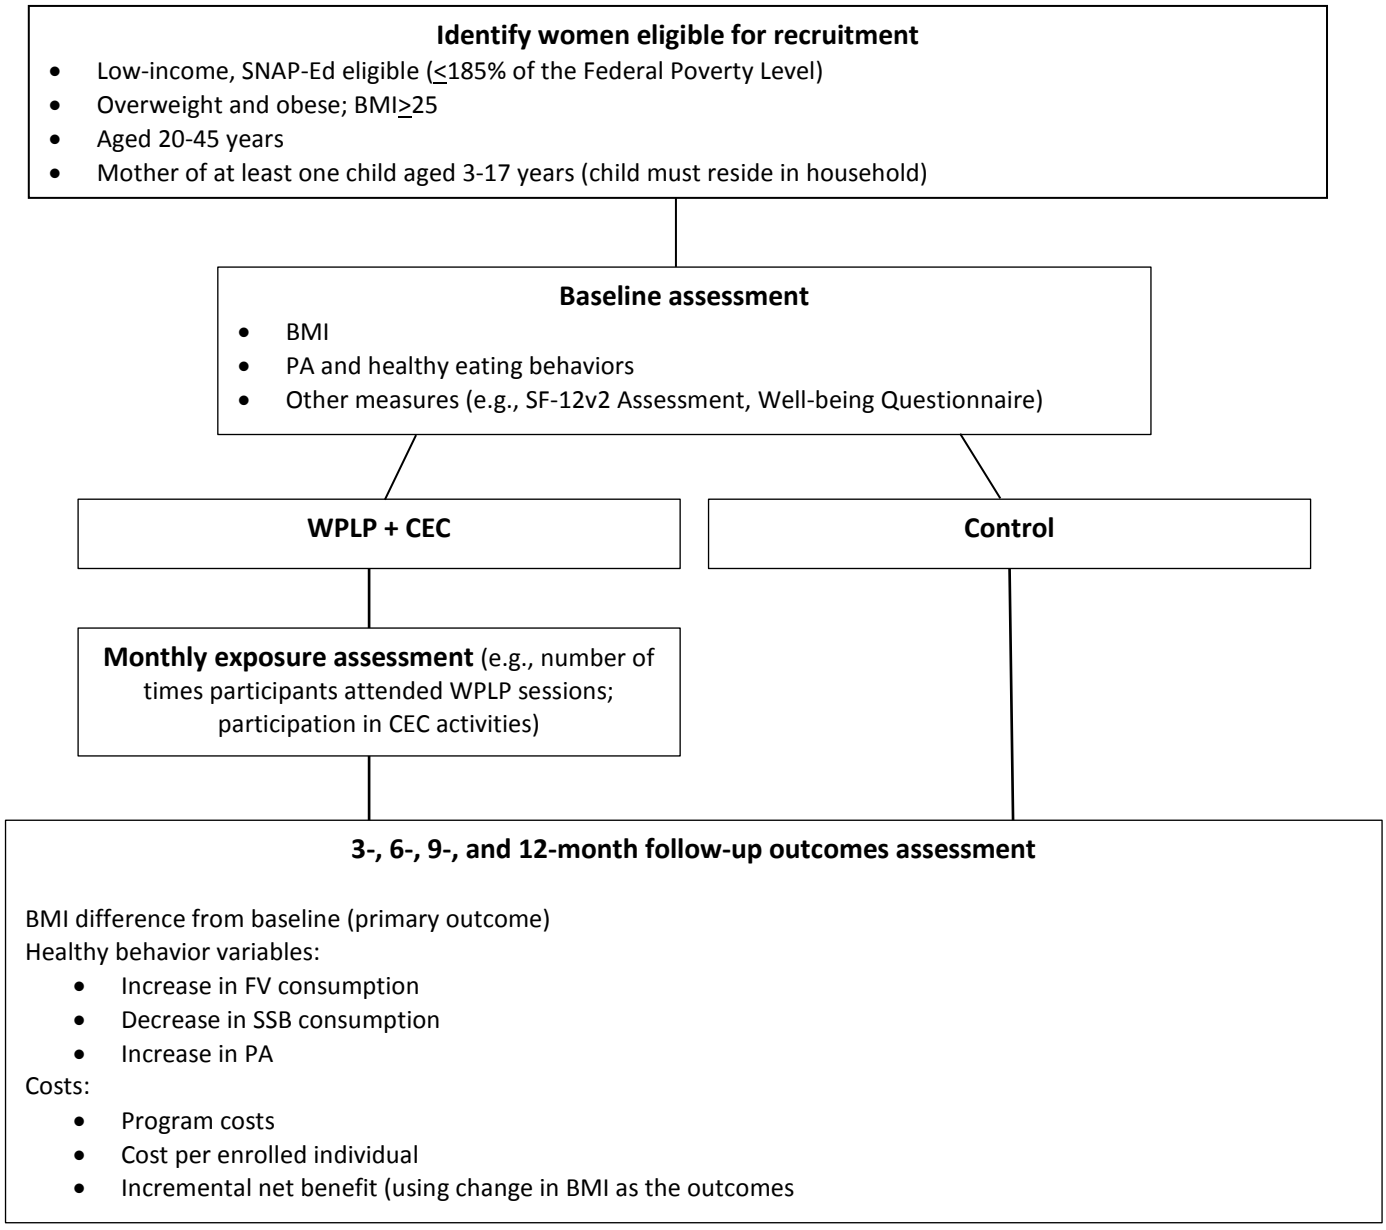

Figure 2: Conceptual Framework

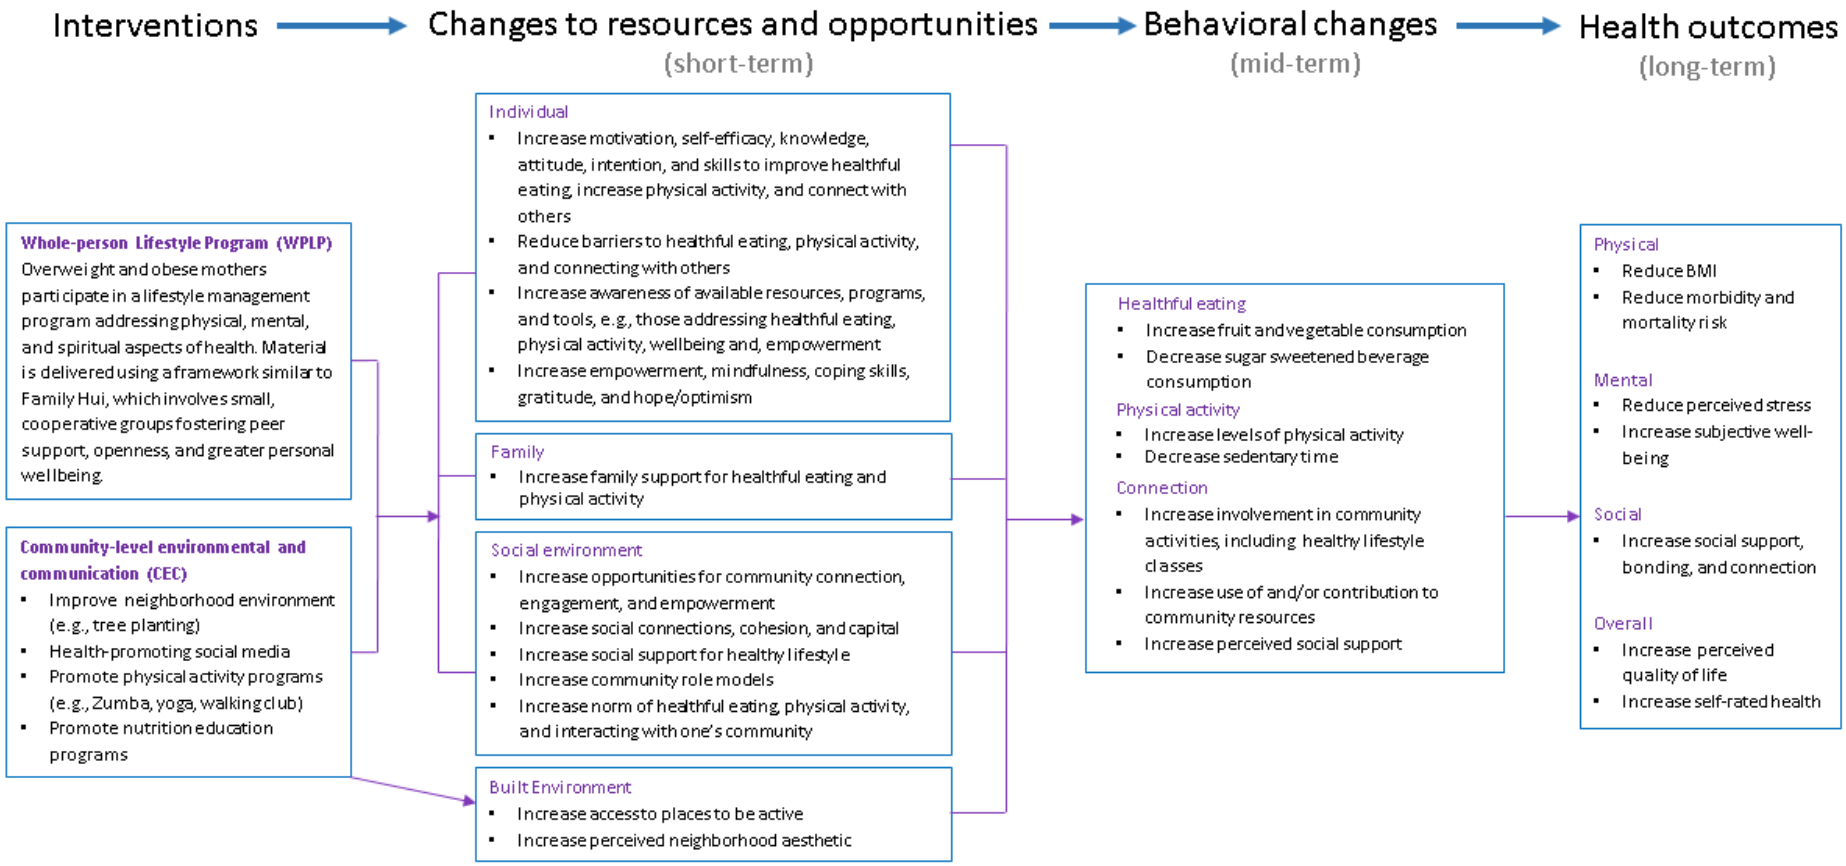

Economic Evaluation

Cost-effectiveness analysis (CEA) will use BMI as its primary unit of "effect." The other key outcomes will be considered in a cost-consequence analysis (CCA). The primary CEA will be trial-based, analyzing the cost and outcome data collected for the study using a study time horizon. If the main outcome is not statistically significant, we will create CEA estimates using net benefit regression methods, in addition to the CCA results. The CEA results will consist of two outcomes, BMI and quality adjusted life years (QALYs). If the main outcome is statistically significant, we will supplement the results from net benefit regression with model-based CEA estimates that will project the short run results into the long term. These results will consider outcomes such as life years and QALYs.

2			iPads	Purchase 4 iPads for use by Co-Investigator, Project Evaluator, Intervention Epidemiologist, and Social Media Specialist during data collection and data entry from program participants. Data collection will be done to provide baseline, 3-, 6-, 9-, and 12-month data from participants via a survey tool, as well as a separate, monthly exposure data collection. The initial questionnaire will be completed by all 160 participants and is estimated to take 30-45 minutes per participant. This data has to be collected in person in a concentrated manner so as not to confound the study. With that in mind, we will be deploying 4 iPads, one to each researcher to ensure that the data collection is completed in a timely manner. This is the minimum equipment requirement to collect high-quality data as required by the prospectus and the scope of work in order to not jeopardize the quality of the study while also respecting the time needed from the participants and the labor of our researchers given the existing budget constraints.	1	$1,000.00	4		$4,000	
								Total Equipment and Other Capital Expenditures:		**$4,000**	

8. Contracts/Sub-Grants/Agreements:

	Budget Adjustment: Delete Reduce Increase	Budget Adjustment: Last Amount Approved	Organization Name	Description of Service(s)	Total Grant	Budget Adjustment: Budget Justification
B			TBN	Evaluation Subcontractor:The subcontractor will be responsible for recruiting and following up with study participants and providing consultation on the collection of outcome, exposure, process, and economic data. This will include the finalization of all evaluation instruments, methods and logistics; the recruitment of participants for the study including random assignment into intervention and control groups; consultation on the collection of baseline and follow-up data (3-, 6-, 9- and 12-months) for each participant based on their group, process data, and economic data, as needed; and consultation on data entry, as needed. The subcontractor will also provide consultation on data analysis for outcome, exposure, and process data, as well as perform, interpret, and report on the economic data analysis.	$171,300	
C			TBN	Data Entry and Database Subcontractor: The subcontractor will be responsible for creating an electronic data entry and database platform to aid in the efficient, accurate, and secure collection and management of baseline and follow-up outcome, exposure, process, and economic data for the study. This will include creating a platform for all study instruments; a secure, electronic data entry platform; a database system where data are organized and warehoused; and a data dictionary for all study variables.	$85,000	
D			TBN	Pilot Test for Program Interventions and Impact/Process Evaluation Instruments: The subcontractor will be responsible for assisting with the whole-person lifestyle program pilot test. This will include the identification, recruitment, training, and oversight of potential facilitators for the pilot test; the recruitment of participants into the pilot test; determining and finalizing logistics for pilot test meetings; and monitoring and reviewing progress of the pilots.	$50,000	
E			TBN	Whole-Person Lifestyle Program Subcontractor: The subcontractor will be responsible for providing technical review (including recommendations) of a whole-person lifestyle program created by Project Connect staff. The program will be based on the Centers for Disease Control and Prevention's PT2 program and Family Hui, a family empowerment program. Prior to the launch of the evaluation, the subcontractor will identify, recruit, and train program facilitators and group leaders for the program; arrange logistics for the program intervention meetings; conduct the program intervention meetings; and ensure program facilitators and group leaders are implementing the program in accordance with the study protocol and professionalism standards.	$135,000	
F			TBN	Strategic Communications Subcontractor: The subcontractor will be responsible for assisting with the development and implementation of a coordinated social media campaign in support of the planned interventions. They will be tasked with establishing stronger communications and community connections. This could include electronic messages, Welltopia website and social media updates, applications, and promotion of intervention activities and community improvement projects.	$80,000	
G			TBN	Materials Design and Publishing Contractor: The subcontractor will be responsible for the creation, design, and publishing of materials and collateral for the program, including training materials, intervention and evaluation materials, and print and digital projects.	$215,000	
				Total Contracts/Sub-Grants/Agreements:	**$736,300**

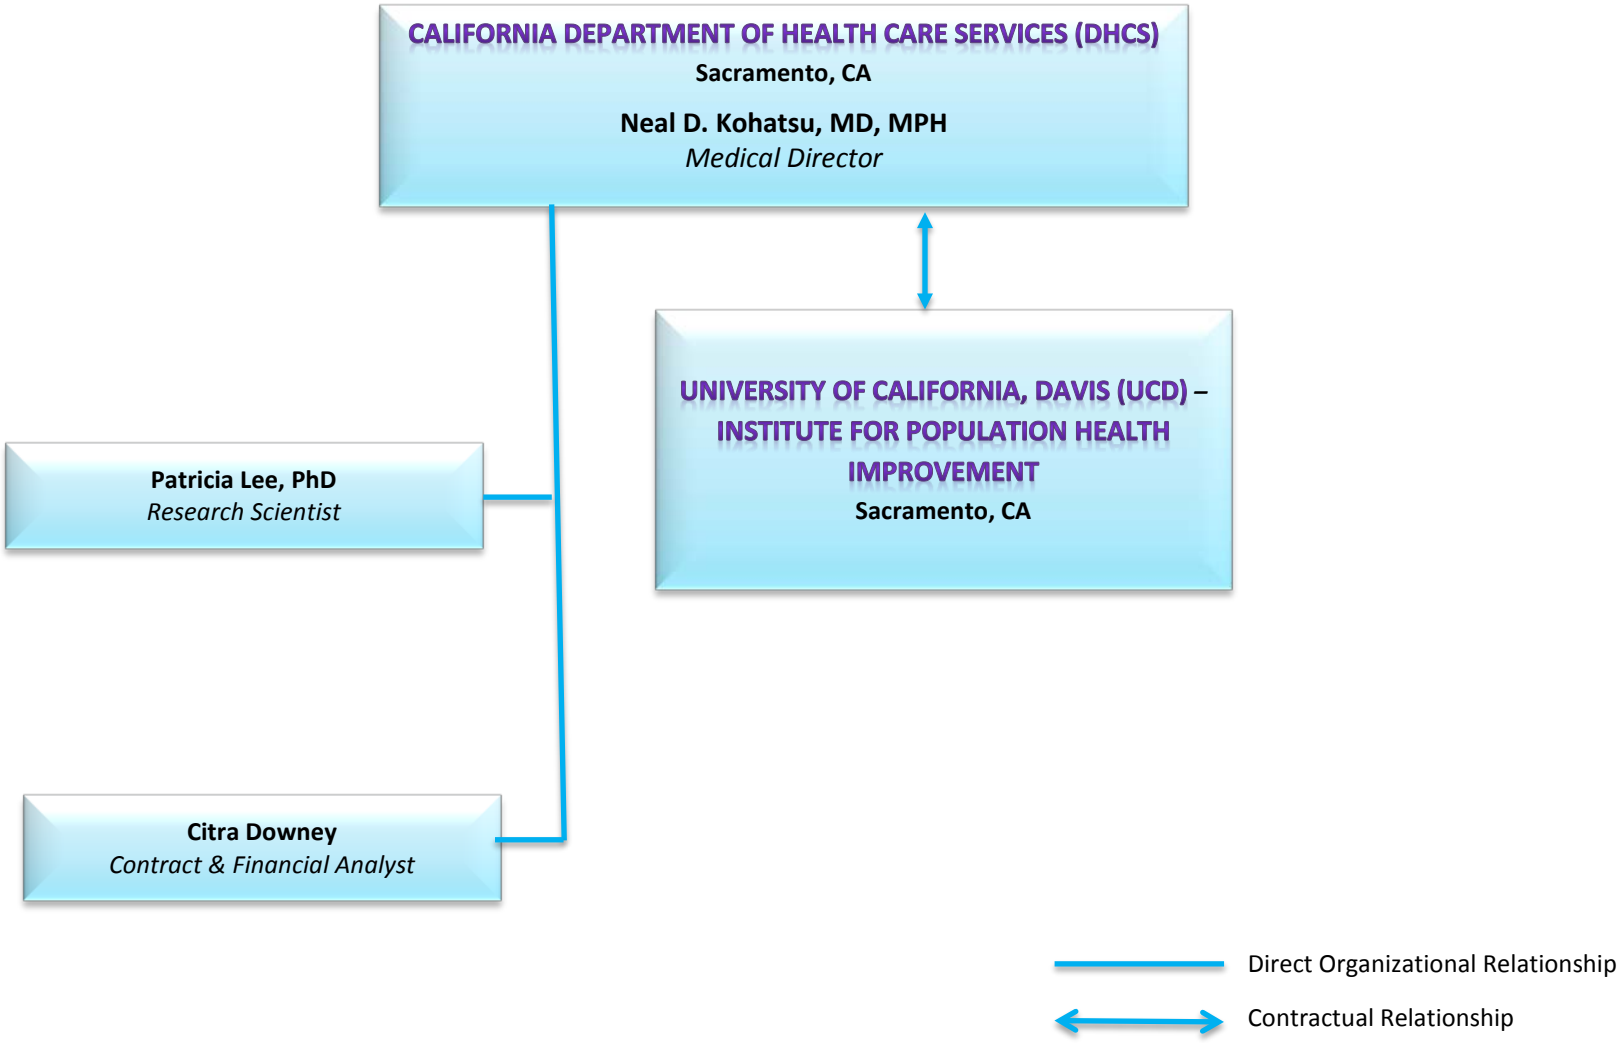
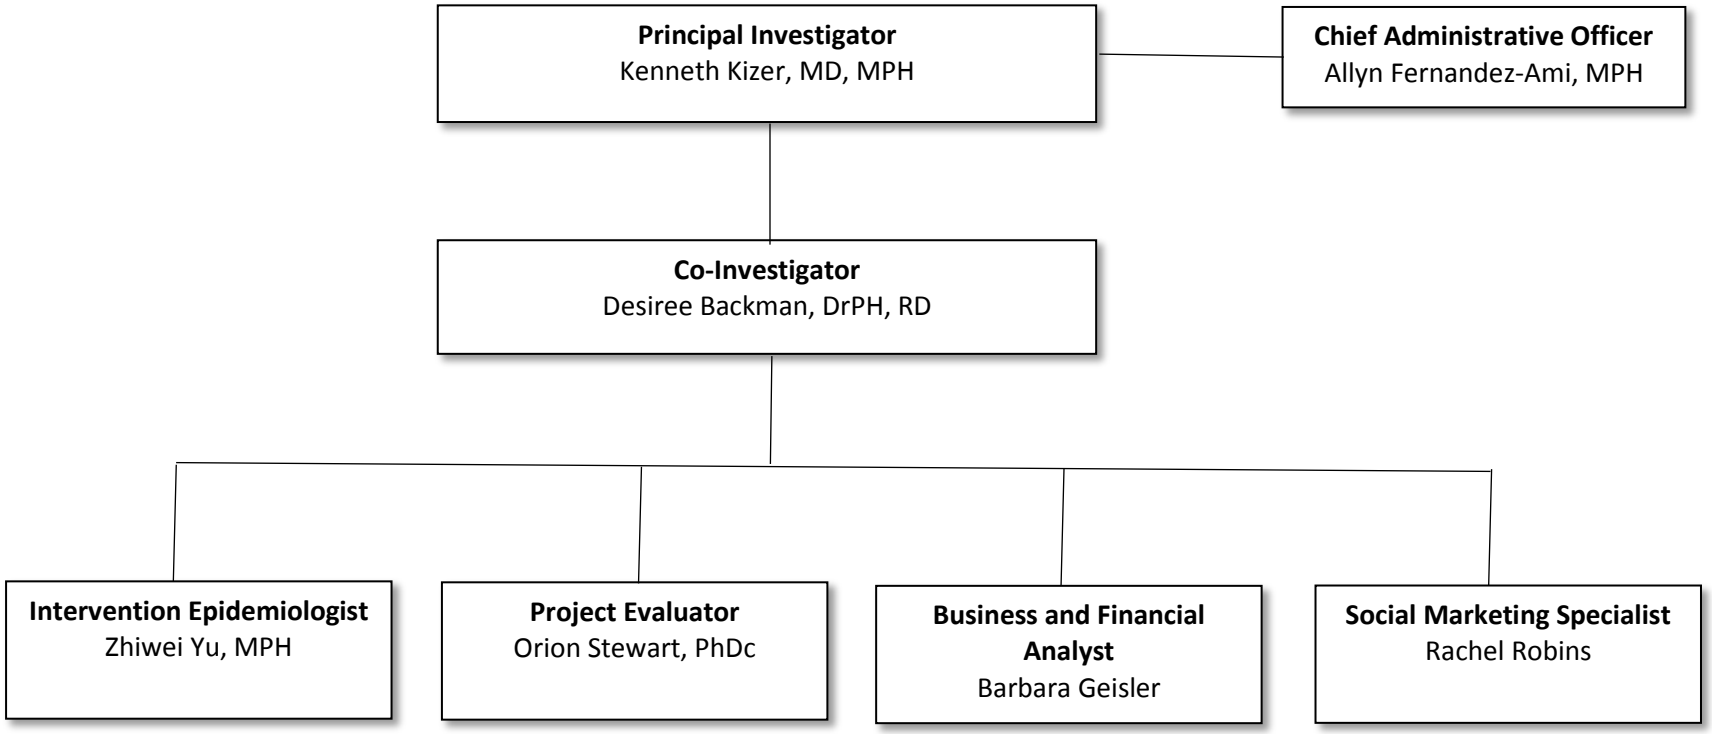
OBESITY PREVENTION PROJECT – ORGANIZATION CHART



Rev. 8/2/2017

Obesity Prevention Project – Organization Chart

UC Davis, Institute for Population Health Improvement



Rev. 8/2/2017

FFY 2018 Public Health Institute State Level Projects

Name of projects:

Project One Title (PHI 1)	Public Health Institute Center for Wellness and Nutrition (PHI CWN) Statewide Collaboration and Training for Social Services Agencies (SNAC and FANOut)
Project Two Title (PHI 2)	FFY 2018 SNAP-Ed Program Evaluation and Reporting System (PEARS)
Project Three Title (PHI 3)	FFY 2018 Food Security: Community Based Organizations (CBO) Pilot Projects
Project Four Title (PHI 4)	FFY 2018 Corporate Retail Nutrition and Wellness Partnerships
Project Five Title (PHI 5)	FFY 2018 SNAP-Ed Statewide Branding
Project Six Title (PHI 6)	FFY 2018 California SNAP-Ed Website
Project Seven Title (PHI 7)	FFY 2018 SNAP-Ed Educational Resources for Decision Makers
Project Eight Title (PHI 8)	FFY 2018 Stakeholder's Meeting

PHI 1

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title	Public Health Institute Center for Wellness and Nutrition (PHI CWN) Statewide Collaboration and Training for Social Services Agencies (SNAC and FANOut)

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

This proposal includes three strategies for the following areas in which PHI CWN can meet the needs of the California Department of Social Services (CDSS), Welfare to Work Division, CalFresh Branch to create common goals messaging, Policy, System, and Environmental (PSE) strategies identified across Food and Nutrition Service (FNS) programs, and provide training and technical assistance to United States Department of Agriculture (USDA) FNS programs and their key strategic partners in California.

1. Implement, Facilitate, and Evaluate the State Nutrition Action Committee (SNAC)

2. Implement, Facilitate, and Evaluate the Food Access Nutrition Education and Outreach Committee (FANOut)

3. Develop a comprehensive toolkit that will include a menu of resources with a baseline set of services, which would be at no or low-cost to implement, to a broad spectrum of resources for social service agencies that wish to implement larger nutrition education and food security programs.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The primary target audiences for this project are intermediaries including state and local leaders implementing SNAP-Ed or other USDA FNS programs in California. PHI CWN will conduct formative research and then implement three strategies to strengthen SNAP-Ed activities through comprehensive statewide collaborative efforts utilizing leaders implementing USDA nutrition programs through SNAC and FANOut, leading to the development of a toolkit focused on providing training and guidance to social service agencies in California.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

PHI CWN will identify and compile a listing of statewide stakeholders to implement SNAC and FANOut. Stakeholders will consist of FNS funded programs and other priority groups such as Indian tribal organizations, CDC-funded projects and food security and advocacy organizations, In addition, PHI CWN will partner with multiple stakeholders, including the California Welfare Director's Association (CWDA), to conduct key informant interviews, agency surveys, and attend relevant meetings to compile a listing of toolkit needs from targeted counties. PHI CWN will work with intermediaries to provide training, technical assistance, identify partnership opportunities and develop resources that support an increase access to healthy foods and beverages and safe places to be active across the state.

d. Project Description for Educational Strategies

Note how you will implement the project: how and where it will be delivered, its duration, the projected number of participants, the frequency of contacts (number of classes, mailings, billboards, etc.), and key educational messages.

State Nutrition Action Committee (SNAC)

SNAC will act as a leadership group representing all senior level partners from USDA Food and Nutrition programs in California and statewide advocates who represent the needs of low-income families related to food security and increased access to healthy food and beverages. SNAC will function as a statewide policy, systems and environmental change platform.

Food Access Nutrition Education and Outreach (FANOut) Committee

FANOut will act as a platform for disseminating information and providing training and technical assistance and facilitating action committees to a larger and more diverse partner audience throughout the state. Decisions, action items and opportunities for collaboration will be communicated from the SNAC Leadership group and disseminated to regional and county agencies and their local partners through webinars, resource sharing, and an annual in-person meeting.

Year 1: Host 4--6 SNAC in-person meetings and 3--5 FANOut meetings both virtual and in-person and develop a toolkit with 3--6 modules for social service agencies to

be more active in promoting healthy food and beverages to their clients and in their offices.

- After conducting 8–10 Key Informant Interviews (KII's) from state-level food and nutrition leaders in the previous year, PHI CWN will facilitate 4--6 SNAC meetings based on the findings of the KII's to develop common goals, messaging and PSE strategies that improve access to healthy foods and beverages and FNS program benefits.
- FANOut will act as a platform for sharing among state and local partners and the provision of technical assistance to implement shared messaging and goals for the purpose of improve coordination, cooperation, partnerships, and communication among the State agencies, FNS Nutrition Assistance Programs, public health agencies, and other partners.
- Host quarterly webinars for FANOut members and their partners to share information and messaging developed in SNAC.

Components of the toolkit would include the following:

- Selecting and implementing evidence-based nutrition programs for your county;
- Developing partnerships, (i.e., utilizing Food Policy Councils), CNAPs, etc.;
- Conducting community needs assessments and strategic plans;
- Implementing social media into your nutrition education and outreach programs;
- Understanding and implementing policy, system, and environmental change strategies;
- Best practice sharing among county social services agencies using social media practices; (i.e., Facebook, blogs, Twitter and LinkedIn);
- Selection of evaluation tools relevant to nutrition education and food security programs;
- Funding resources to start and expand their programs.

Year 2:

- PHI Center will develop up to three training webinars and/or in-person trainings on how to utilize the toolkit as well as review each of the tools contained in the toolkit.
- PHI Center will develop and launch up to 3--5 interactive training modules that can be utilized by county social services agencies and their partners as professional development and continuing education for staff working in nutrition education and food security programs.
- PHI CWN will continue to facilitate quarterly SNAC meetings to set statewide

vision Maximize USDA resources, develop common messaging, identify technical assistance needs, and set policy agendas.

- PHI CWN will continue to provide quarterly webinars to the FANOut members and their partners to share information and messaging developed in SNAC.
- A final findings and recommendation report will be developed in Year 2 to identify accomplishments and recommended next steps for these two groups.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

The toolkit strategies will be based on evidence and practice based strategies that support behavior change of the target audience.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

SNAC may select PSE priorities for the state level partners and this project will support the dissemination and training of these strategies to state and local partners.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

PHI CWN will review and select strategies from the current list of evidence-based materials and tools, including My Plate, California Department of Public Health's SNAP-Ed materials and tools and other SNAP-Ed tools, materials, and community-based intervention approaches that could apply to social services agencies and the people they serve. Materials will be selected in primary English and/or Spanish as well as other common languages in California such as Chinese and Vietnamese when available. We do not anticipate a cost for these existing materials.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

Development of a toolkit utilizing materials listed in #2G that would be specific to

social services agencies.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Indicators that will be used include the type and number of participants in SNAC and FANOut and their reach within California. The common goals identified by SNAC will be used to identify the number of agencies that uptake these strategies and document partnership successes. **The number of attendees at toolkit forums and webinars and the number of agencies that report using the SNAP-Ed Toolkit and implementing new strategies will be tracked.**

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** *the name(s) of each project(s) that will be a part of this evaluation;*

SNAP-Ed Social Services Toolkit, SNAC

b. **Type:** *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

We will utilize formative research to develop and expand strategies for SNAC. We will also collect process measures during the course of the project including number of trainings, webinars, participants etc.

c. **Questions:** *the questions(s) that will be addressed and;*

- *the approach to conducting the evaluation, including scope, design, measures and data collection;*
- *plans for using the results*

We will use key informant interviews and online surveys to measure the satisfaction and effectiveness of SNAC amongst state level partners. We will gather a broad set of input from across the states regarding the toolkit modules content, use training evaluations to gather feedback on trainings and technical assistance provided and engage a user group to test the functionality of the online modules.

d. **Evaluation:** *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

This is a new project and has not been evaluated previously.

e. **Use of SNAP-Ed Evaluation Framework:** *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

ST8: Multi-Sector Partnerships and Planning

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

This project will maintain and develop relationships with all USDA FNS programs in California and continue to look at ways to partner with non-profit and private industry partners to have the greatest impact on vulnerable populations in California to increase food security and access to healthy foods and beverages and safe places to play. FANOut will continue to engage with state, local and non-profit partners and will identify new partners throughout the year. SNAC is a new state level decision-making group that will utilize stakeholders currently providing USDA nutrition education programs and services to develop common messaging at the state level and transfer these priorities to the local level through FANOut and toolkit training. The toolkit will work with current successful Get Fresh projects to identify the most feasible ways social service agencies can implement strategies that carry the nutrition and PA messages to their clients for no or low cost. To assist with development and facilitation of implementation of SNAC, PHI CWN has contracted with Brown Miller Communications (BMC). BMC will work with PHI CWN and CDSS to develop agendas and outcomes for each meeting, as well as make recommendations as needed.

PHI 2

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title	FFY 2018 Program Evaluation And Reporting System (PEARS)

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

PEARS was developed by Kansas State University Office of Educational Innovation and Evaluation (KSU OEIE) to greatly streamline data collection, evaluation and reporting of evidence-based SNAP Education (SNAP-Ed) programs and interventions. Development and implementation of PEARS for California fulfills the United States Department of Agriculture's (USDA) evaluation requirements for analyzing SNAP-Ed outcomes as required in the SNAP-Ed Evaluation Framework. The Public Health Institute Center for Wellness and Nutrition (PHI CWN) will be responsible for providing CDSS with access to PEARS; evaluation context expertise for PEARS' statewide rollout, implementation and data collection for all SNAP-Ed local implementing agencies; and reports on program evaluation measures. Development of PEARS has already begun, starting FFY16 with an official launch date in FFY18. Current progress shows implementation in FFY18 is on schedule withstanding any major issues.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The target audience is SNAP-Ed State Implementing Agencies (SIAs) and their Local Implementing Agencies (LIAs). SIAs include the California Department of Social Services (CDSS), California Department of Public Health (CDPH), California Department of Aging (CDA), UC CalFresh, and Catholic Charities of California (CCC).

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

Data gathered from PEARS will be used to evaluate State Level Goals and Objectives and meet the reporting needs of the Education and Administrative Reporting System (EARS) from the USDA. This data can be used to gauge the SNAP population's awareness and access to healthy foods and beverages and places to be physically active.

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages; how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages.

This is an internal project that will focus on providing LIAs a new tool to report data in one central system. The project will not impact behavioral, policy, systems, or environmental changes, but data will be collected on program activities, PSE changes, and social marketing, which will enable California to evaluate those changes. SIAs will coordinate together on the best approach on how to pilot, rollout, implement, and streamline PEARS to report on California's SNAP-Ed. Two pilots for PEARS were launched in FFY16 and FFY17. The data gathered from the pilots are being evaluated to ensure they meet the needs of California and requests for customizations to PEARS will be made as needed. Implementation of PEARS statewide will begin in FFY18. PHI CWN will be providing ongoing oversight and support to ensure successful launch, implementation, and maintenance of PEARS.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

This is not-applicable to this project. However, PHI CWN will be coordinating with all SIAs and KSU OEIE to ensure PEARS is suitable for California's SNAP-Ed needs. PEARS is currently being used in 11 states with California potentially making it 12 states.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

This project will not target PSE changes. However, PEARS will evaluate PSE changes and data gathered may be used to support PSE interventions.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

Current educational materials to be used for the rollout and implementation of PEARS will be provided by KSU OEIE. These English language online educational materials will already be provided with PEARS as resources as part of the overall cost of the system. The educational materials will be used to teach and instruct users in how to use PEARS.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

This project will produce training materials as needed to assist in bridging the learning curve for new PEARS users. If training materials already exists to teach regarding a specific topic, they will be used first. Development of new training materials will be reviewed on a case-by-case basis.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Since this is an internal project, it does not have KPIs for the target audience. Instead, this project will focus on collecting and evaluating the data from SNAP-Ed programs and interventions. Once evaluated, this data can be used to track how consistent and accurate current KPIs in place are.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: *the name(s) of each project(s) that will be a part of this evaluation;*

N/A.

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

N/A

c. Questions: *the questions(s) that will be addressed and;*

- the approach to conducting the evaluation, including scope, design, measures and data collection;
- plans for using the results

N/A

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. Use of SNAP-Ed Evaluation Framework: *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

N/A

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

Coordination is at the center of this project as PEARS will be a widespread joint effort between all SIAs and LIAs. Coordination between SIAs is to ensure the best practices are followed in the development and implementation of PEARS. LIAs will be provided with a standardized mechanism to provide crucial feedback to help refine PEARS for California's use and identify training needs. By having participation at both the State and Local level, it will help reduce confusion and increase the efficacy of this project.

The existence of this project will be used to track data with key partners to ensure that no other group engages in duplicative services.

PHI 3

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title	FFY 2018 Food Security: Community Based Organizations (CBO) Pilot Projects

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

The project is part of the overall strategy to address food security within the California SNAP-Ed Program as part of the United States Department of Agriculture, Food and Nutrition Service (USDA-FNS) guidance.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

An ITB (Intent to Bid) will be released to small community based and tribal organizations that focus on food security initiatives that target the following priority populations will be released throughout California targeting organizations that work with FNS priority populations for FFY 2018 such as Older Adults, Foster Youth, Native Americans, and Early Childcare Education (ECE) caregiver and providers. Organizations selected will be required to coordinate with their Local Implementing Agencies (LIAs) in their jurisdiction.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

The Pilot Projects will be required within their scope-of-work to develop activities within the framework of access to healthy foods for their specific focus area.

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages; how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages

The Pilot Project grantees will develop educational strategies based on their focus area.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

Strategies will be based on the existing evidence informed approaches adapted to meet the needs of the target populations.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

Pilot Projects will be asked to include PSE strategies within their scope-of-work.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

N/A

h. Development of New Educational Materials

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

N/A

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: *the name(s) of each project(s) that will be a part of this evaluation;*

Each project will utilize the SNAP-Ed Evaluation Framework to develop an evaluation plan that best meets the needs and outcomes of their individual projects.

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment*

N/A

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. Use of SNAP-Ed Evaluation Framework: *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

To be determined by individual project.

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

Awarded programs will be required to join their Local County Nutrition Action Plan (CNAP) group in their jurisdiction to coordinate efforts with SNAP-Ed LIAs.

PHI 4

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

b. State Level Objectives

Objective 1a: By September 30, 2019, improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population (consistent with the current *Dietary Guidelines for Americans)* by 3%.

Objective 1b: By September 30, 2019, increase consumption of fruits and vegetables among the SNAP-Ed eligible population by 3%.

Objective 4b: By September 30, 2019, at least 75% of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved food environments.

2. Description of projects/interventions. The following information should be provided:

Project Title	FFY 2018 Corporate Retail Nutrition and Wellness Partnerships

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

Objectives 1a, 1b, 4b

Public Health Institute Center for Wellness and Nutrition (PHI CWN) will support and develop statewide partnerships to improve relations with corporate retailers, fruit and vegetable distributors and other industry partners to increase corporate adoption of fruit- and vegetable-focused in-store promotions such as promotion of the new California SNAP-Ed brand. The goal of this project is to improve access to affordable fruits and vegetables statewide for CalFresh participants and SNAP-Ed eligible individuals. PHI CWN will coordinate these efforts with other state implementing agencies working towards similar goals.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

Gender: Female and Male

Ethnicity: All Ethnic Groups

Languages: English and Spanish

Ages: Adults 18+, primarily women with children ages 3 – 17 years of age

Partnerships with corporate retailers in qualifying retail sites, fruit and vegetable distributors and other industry partners will increase promotion of the new SNAP-Ed brand and access to affordable fruits and vegetables statewide. Through these partnerships, local implementing agencies will have the opportunity to engage with local stores to implement the Retail Program reaching CalFresh participants and SNAP-Ed eligible individuals.

Qualifying retail sites are identified using the data sources described below:

Income Targeting Data Sources:

Site verification of 50 percent or greater SNAP-Ed-eligible persons participating in program activities will be based on the following data sources:

California Department of Public Health's (CDPH) GIS Census Tract Data and retail sites on the USDA-approved list of stores redeeming at least $50,000 in EBT sales monthly.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

Most SNAP dollars are spent in large format grocery stores. Interventions will be implemented in stores where most food dollars are spent and a large variety of healthy foods are available. Shoppers will be exposed to healthy nutrition messages as well as the new SNAP-Ed brand. When promotion, marketing, and placement strategies are implemented in retail sites, the stores' produce sales, customer shopping behaviors and purchases of fruits and vegetables are likely to improve.

d. Project Description for Educational Strategies

Note how you will implement the project: how and where it will be delivered, its duration, the projected number of participants, the frequency of contacts (number of classes, mailings, billboards, etc.), and key educational messages.

Innovative behavioral economics strategies to increase low-income shoppers' purchases of healthy foods will be researched through a literature review. From this

lit review, a menu of retail intervention options will be developed from which retailers can choose, based on their needs and interest. Intervention strategies include:

- Promotion and marketing strategies
- Prominent placement strategies for healthy foods
- Pricing strategies and promotions
- Procurement strategies
- Donations
- Staff training and development
- Advise on WIC and SNAP authorization
- Explore technology/loyalty programs to provide customized promotion and marketing to low income consumers

By March 30, 2018, we will meet with 5 corporate retail partners to propose partnership options, promote the new SNAP-Ed CalFresh brand, and assess interest in intervention strategies. A mechanism will be developed for stores to access and display materials promoting the new SNAP-Ed CalFresh brand, either directly or through LIAs. Procedures and protocols for LIAs to engage with local stores will be explored. Retail partnerships will be built throughout the contract year with 3-5 corporate retail partnerships established by September 30, 2018.

Key strategies include outreach and engagement of retailers, needs assessment, retail promotions, community events, nutrition education, one-on-one technical assistance, and training. Key educational messages include consumption and access of fruits and vegetables; chronic disease and obesity prevention; healthier eating, in general; food safety; and CalFresh promotion.

Projected Number of Participants: Based on CDPH's standard two-week foot traffic estimates (26,500 for a supermarket chain and 6,500 for a large grocery store), this project has the potential to reach approximately 35 million duplicated shoppers with indirect education and/or PSE changes.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

Corporate Retail Partnerships will improve the reach of the Retail Program, which is based on research-based strategies.

SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States: https://snapedtoolkit.org/

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

The following list of healthy retail strategies will be used to effect PSE changes in the retail setting:

- Promotion and marketing strategies
- Prominent placement strategies for healthy foods
- Pricing strategies and promotions
- Procurement strategies
- Donations
- Staff training and development
- Advise on WIC and SNAP authorization
- Explore technology/loyalty programs to provide customized promotion and marketing to low income consumers

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

Existing materials available in English and Spanish includes:

- Retail Fruit and Vegetable Marketing Guide
- Harvest of the Month
- Point of Sale Merchandising Materials
- Cornell Food and Brand Lab “Healthier By Design” Grocery Store/Retailer Self-Assessment Scorecard

No new materials will be purchased.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

A mechanism for stores to obtain and display materials promoting the new SNAP-Ed brand will be needed. A toolkit on how to access and effectively display new SNAP-Ed branded materials will be developed for retailers.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

The following new measures/indicators will be captured:

- Summary of corporate retail meetings, on-going communication and follow-up with retailers about intervention strategies, procedures and protocols for LIAs to engage with local stores will be tracked.
- The number of written partnership agreements.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: the *name(s) of each project(s) that will be a part of this evaluation;*

Corporate Retail Nutrition and Wellness Partnerships

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

We will collect process measures including meeting summaries, communication logs, summary outcomes and number of written retail partnership agreements.

c. Questions: *the questions(s) that will be addressed and;*

- *the approach to conducting the evaluation, including scope, design, measures and data collection;*
- *plans for using the results*

To increase promotion of the new SNAP-Ed brand and access to affordable fruits and vegetables statewide, relations with corporate retailers, fruit and vegetable distributors and other industry partners will be improved. Meetings with 5 corporate retail partners will be held to propose partnership options and assess interest in healthy retail intervention strategies. Relationship building and engagement of retailers will occur over the course of the project period. Communication logs, meeting summaries and outcomes will inform a final report summarizing partnerships and next steps.

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. **Use of SNAP-Ed Evaluation Framework:** *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

ST8: Multi-Sector Partnerships and Planning

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

PHI CWN will coordinate with other state implementing agencies and local implementing agencies that deliver nutrition education services in retail sites and maintain communication with partners that serve CalFresh audiences. PHI CWN will engage retailers in discussion around procedures and protocol for LIAs to engage with local stores, streamlining and avoiding duplication of services. We will promote nutrition assistance programs such as CalFresh and WIC to help families extend their food dollars and obtain foods to maintain their health.

PHI 5

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title FFY 2018 SNAP-Ed Statewide Branding

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

This proposal includes a strategy requested by the United States Department of Agriculture, Food and Nutrition Service (USDA-FNS), that all State Implementing Agencies (SIAs) use a common descriptor (brand) when referring to SNAP-Ed. As the oversight agency, CDSS is responsible to lead this complex effort to create a common brand campaign for the California SNAP-Ed program. Preliminary work is underway for the statewide rebranding of California's SNAP-Ed program. The goal is to develop a branding framework to unite all SNAP-Ed programs and brands in the state, which includes developing a formative research plan to reach the hardest to serve participants and ensuring that brands are audience-oriented.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

This project will develop an overarching brand framework and strategy to ensure that CDSS, through its funded programs and partners, can effectively reach all SNAP-Ed eligible and likely eligible adults across California.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

This project is focused specifically on the development of the brand framework and communications strategy. It does not include implementation. Implementation of the brand will be completed by CDSS-funded programs, through which the new branding will be spread across food and activity environments.

d. Project Description for Educational Strategies

This is an internal project that will focus on engaging State Implementing Agencies and Local Implementing Agencies in the development of a statewide branding framework. Once completed, funded agencies will use the branding strategy within their projects and educational strategies.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E

This is not-applicable to this project. However, the contractor will use the latest science and evidence in effective branding strategies to develop the branding framework.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

This project will not target PSE changes.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

This project will not use existing educational materials.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.
This project will not create new educational materials. However, this project will develop guides and trainings to help funded programs incorporate the new branding into their own educational materials.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Since this is an internal project, it does not have KPIs for the target audience. Instead, this project will focus on engaging SIA's and LIA's in the process of developing a new brand framework. Once developed, the contractor will train funded programs on using the branding. In future years, KPIs could be developed to track how consistently and accurately funded programs are using the new branding framework.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: *the name(s) of each project(s) that will be a part of this evaluation;*

N/A.

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

N/A.

c. Questions: *the questions(s) that will be addressed and;*

the approach to conducting the evaluation, including scope, design, measures and data collection;
plans for using the results

N/A.

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A.

e. Use of SNAP-Ed Evaluation Framework: i*dentify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

N/A.

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreement.

Coordination is at the center of this project. To develop the new branding framework and any new or modified brands, the contractor will coordinate directly with SIA's and LIA's that will be expected to use the new branding. Their experiences and feedback will be used to create a collaborative branding strategy. Then, the new branding will be used to reduce duplication and confusion by bringing programs under a single branding strategy. By reducing confusion, programs will be more impactful and funds will be used more efficiently.

The existence and purpose of this project will be shared with key partners to ensure that no other group engages in duplicative branding efforts.

PHI 6

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title FFY 2018 California SNAP-Ed Website

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

The project is part of the overall strategy requested by the United States Department of Agriculture, Food and Nutrition Service (USDA-FNS), that all State Implementing Agencies (SIAs) and Local Implementing Agencies (LIAs) use a common brand. The website will utilize the efforts of the Branding Project and incorporate the common brand into a website.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The California SNAP-Ed Website project will be developed in tandem with the SNAP-Ed Statewide Branding Project and will incorporate the common brand theme for the California SNAP-Ed Program. Under the direction of the California Department of Social Services, CalFresh Branch, the website will allow for streamlined communication between SIAs, LIAs, contractors, partners and consumers in California.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

This project is focused on being a portal for resources for accessing healthy food and activities models that can be used by SIA's, contractors, partners, and consumers in California.

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages; how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages.

This project will be able to provide educational resources in varied formats. These would include curriculum that can be downloaded, printed and shared to various stakeholders. In addition, the website will have the ability to access and provide online training modules, view videos and links to outside training and educational resources.

e. Evidence Base

Note how you will implement the program: how and where it will be delivered, its duration, the projected number of participants, and the frequency of messages, etc.

N/A

f. Policy, Systems, and Environmental Changes

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

This project will act as a portal for resources, of which many policy, system and environmental change strategies can be shared and utilized by the SNAP-Ed stakeholders.

g. Use of Existing Educational Materials

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

For this project, existing educational materials will be researched and compiled to be utilized as resources within the website.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

N/A

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: *the name(s) of each project(s) that will be a part of this evaluation;*

The website project will include collecting, measuring, and analyzing web data for purposes of understanding and optimizing web usage.

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

N/A

c. Questions: *the questions(s) that will be addressed and;*

- *the approach to conducting the evaluation, including scope, design, measures and data collection;*
- *plans for using the results*

N/A

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. Use of SNAP-Ed Evaluation Framework: *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

N/A

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

The website project will coordinate with the CDSS Branding Project that will be concurrently conducted in order to unify message delivery and branding for the SNAP-Ed program.

PHI 7

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title	FFY 2018 SNAP-Ed Educational Resources for Decision Makers

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

The project is part of the California Department of Social Services, CalFresh Branch's, overall strategy to expand the brand image, as well as share key information on the SNAP-Ed program with local, county, and statewide decision makers.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The SNAP-Ed Educational Resources for Decision Makers will be used for stakeholders to share the story and success of the SNAP-Ed program in order to increase it visibility and image throughout multiple sectors in California.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

The SNAP-Ed Educational Resources for Decision Makers will incorporate resources that include information across multiple food and activity environments.

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages;

how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages

As part of the deliverables, a set of tools, infographics, templates, and talking points that can be used for statewide, regional, and local distribution to educate decision makers on the benefits and successes of the SNAP-Ed Program.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

N/A

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

The SNAP-Ed Educational Resources for Decision Makers may include PSE strategies to address statewide activities and reach for the SNAP-Ed program.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

N/A

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

N/A

i. Key Performance Measures/Indicators

An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who

report hearing the message.

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** *the name(s) of each project(s) that will be a part of this evaluation;*

N/A

b. **Type:** *the type of evaluation as primarily a formative, process, outcome or impact assessment:*

N/A

c. **Questions:** *the questions(s) that will be addressed and;*

- *the approach to conducting the evaluation, including scope, design, measures and data collection;*
- *plans for using the results*

N/A

d. **Evaluation:** *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. **Use of SNAP-Ed Evaluation Framework:** *identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

N/A

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

The SNAP-Ed Educational Resources for Decision Makers will coordinate with both the Branding Project and Website project to ensure that a common brand will be utilized across all domains in which the SNAP-Ed program will be highlighted to decision makers throughout California. Brown Miller Communications (BMC), contracted through the PHI Center for Wellness and Nutrition (PHI CWN), will work with CDSS and PHI CWN staff to develop tools that can be used to educate decision makers at the county, regional, and state levels on SNAP-Ed. These tools would include infographics, best practices sharing, storytelling, and graphic templates that can be used by stakeholders to disseminate local and statewide information and related to SNAP-Ed benefits and successes.

PHI 8

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project Title FFY 2018 Stakeholder's Meeting

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

The project is part of the California Department of Social Services, CalFresh Branch's, overall strategy to meet and convene stakeholders throughout California to gain feedback and strengthen partnerships to increase the access of healthy food and increase physical activity for eligible and potentially eligible CalFresh consumers.

This would be a larger group comprised of members of the State Nutrition Action Committee (SNAC), which is mandated by the United States Department of Agriculture, Food and Nutrition Service (USDA-FNS) and other stakeholders who are invested in nutrition, food access or other nutrition-related projects in California.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The Annual Stakeholder's meeting will be comprised of statewide partners of the SNAP-Ed program, which would include education entities, food banks, homeless program, foster youth programs, Native American programs, social services, public health, adult services, and other identified participants by SNAC. Funded and non-funded SNAP-Ed agencies will be invited to attend.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

The Stakeholder's Meeting will review and incorporate strategies to address healthy food access and food security in California.

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages; how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages

The Stakeholder's Meeting will review educational strategies to expand the reach and partnership opportunities across the spectrum of funded and non-funded SNAP-Ed programs.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

N/A

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

The Stakeholder's Meeting may include PSE strategies to address statewide activities and reach for the SNAP-Ed program.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

For this project, existing educational materials will be used.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

N/A

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. One associated performance indicator might be the percent of people in a media market who report hearing the message.

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. Name: *the name(s) of each project(s) that will be a part of this evaluation;*

The Stakeholder's Meeting will include meeting evaluations with recommended follow-up activities that will be outlined in an evaluation report.

b. Type: *the type of evaluation as primarily a formative, process, outcome or impact assessment;*

Outcome Evaluation

c. Questions: *the questions(s) that will be addressed and;*

- *the approach to conducting the evaluation, including scope, design, measures and data collection;*
- *plans for using the results*

N/A

d. Evaluation: *if the project has been evaluated previously, note the most recent year in which the evaluation was done.*

N/A

e. Use of SNAP-Ed Evaluation Framework: *Identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.*

N/A

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

The meeting outcomes and objectives will be guided by SNAC to increase the reach of the SNAP-Ed program in California. Assisting in this meeting will be Brown Miller Communications (BMC). BMC will assist in the development of agendas, identifying potential stakeholders, facilitating the meeting, and evaluating the feedback from the meeting to make recommendations regarding SNAP-Ed goals and priorities.

FFY 2018 SNAP-Ed Budget

Organization Name:	California Department of Social Services
County/Jurisdiction:	Public Health Institute (PHI)
FFY 2018 Total Budget:	**$2,278,500.00**
Budget Adjustment Request #:	

	Expenses*	FFY 2017 Carry-In Budget****	FFY 2017 Budget	FFY 2018 Budget	% Difference
1	Salaries/Benefits		$237,620	$817,303	243.95%
2	Non-Capital Equipment/Supplies		$4,000	$14,980	274.50%
3	Materials		$3,100	$7,788	151.23%
4	Travel		$8,604	$34,859	305.15%

	Total Federal Funds	**$0**	**$545,537**	**$2,278,500**	317.66%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	The scope of work was significantly increased from FY17 to FY18 and the salaries/benefits reflect staffing required to successfully complete grant deliverables.
2	Non-Capital Equipment/Supplies	The scope of work was significantly increased from FY17 to FY18 and the non-capital equipment/supplies expenses reflect requirements for successfully completing grant deliverables.
3	Materials	The scope of work was significantly increased from FY17 to FY18 and materials expenses reflect requirements for successfully completing grant deliverables.
4	Travel	The scope of work was significantly increased from FY17 to FY18 and travel expenses reflect requirements for successfully completing grant deliverables.
5	Building/Space	The scope of work was significantly increased from FY17 to FY18 and building/space expenses reflect requirements needed to successfully complete grant deliverables.
6	Maintenance	The scope of work was significantly increased from FY17 to FY18 and maintenance costs reflect requirements for successfully completing grant deliverables.
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	The scope of work was significantly increased from FY17 to FY18 and subagreement expenses reflect requirements for successfully completing grant deliverables.
9	Indirect Costs	The scope of work was significantly increased from FY 17 to FY18 and the indirect rate went up in proportion to the increase in direct costs for FY 18.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries.

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Social Services
County/Jurisdiction: Public Health Institute (PHI)

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Office Supplies	General and specific office supplies: consists of, but is not limited to, routine consumables such as printing and other paper products, printer ink/toner, writing instruments, filing supplies; can include the cost of necessary software/updates to implement the SOW, including but not limited to, evaluation, Microsoft Office, and anti-virus.	7.85	$15.00	12	$1,413	
2			Hardware	Cubicles and Desk setup: 3 cubicle stations with ergonomic desks (walls $800, storage cabinet $400, drawers $300), with a variation of desk with ergonmic table-top support ($500), depending on market availability, for use by the new/TBD staff upon hire for the Program Associate I and Research Scientist II (Celeste Doerr) and Program Administrator II (Susan Vitulli) positions.	3	$2,000.00	1	$6,000	
				Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1			Hardware	Desktop Computer: 1 desktop computer and monitor each for the new/TBD staff upon hire for the Research Scientist II (Celeste Doerr) and Program Associate I and Program Administrator II (Susan Vitulli) positions.	3	$1,000.00	1	$3,000	
2			Hardware	Laser Printer: 1 laser printer to be shared with staff	1	$750.00	1	$750	
3			Hardware	Smart T.V./LCD Display, mount and delivery: 1 Smart TV/LCD for presentations and trainings, including mounting hardware and delivery; Justification: the Smart TV/LCD is not transportable and would be used for conducting online trainings and webinars on-site. This item differs in purpose from the LCD Projector, which is easily transportable and can be taken to meetings and conferences for presentations and trainings with partners in the field.	1	$2,167.00	1	$2,167	
4			Hardware	Chairs, ergonomic: Seating for new/TBD staff upon hire for the Research Scientist II (Celeste Doerr) and Program Associate I and Program Administrator II (Susan Vitulli) positions	3	$250.00	1	$750	
5			Hardware	LCD Projector: 1 LCD for trainings and presentations in the field; Justification: the LCD projector is easily transportable and can be taken to meetings and conferences for presentations and trainings with partners in the field. The cost of renting an LCD projector at one of these events is prohibitive and can run $400 - $500 per rental, whereas purchasing the item and using it multiple times, it will pay for itself after less than two uses. This item differs in purpose from the Smart TV/LCD, which is not transportable and would be used for conducting online trainings and webinars on-site.	1	$900.00	1	$900	
							Total Non-Capital Equipment/Supplies:	**$14,980**	

3. Materials:

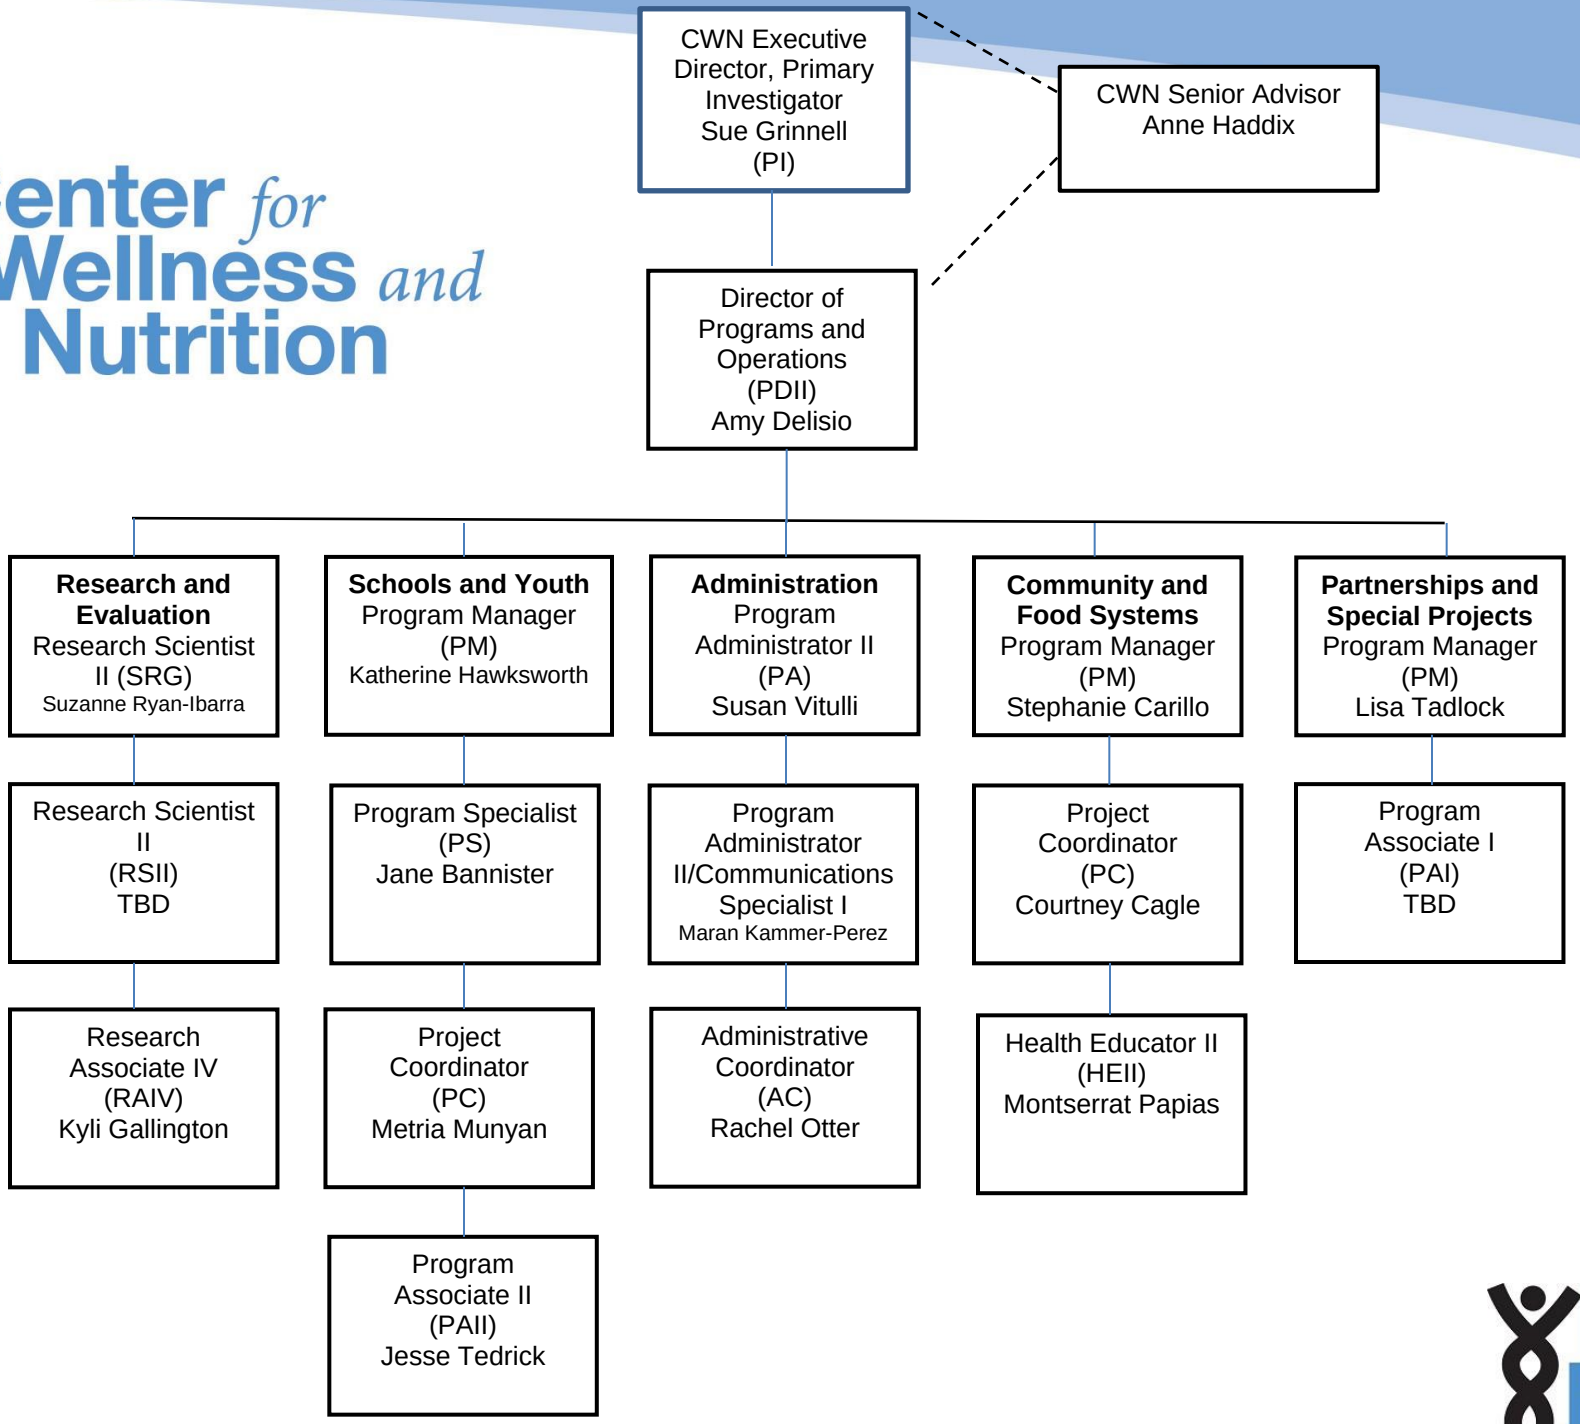
Center for Wellness and Nutrition



June 26, 2017

PUBLIC HEALTH INSTITUTE®
CENTER FOR WELLNESS AND NUTRITION

1. State Agency Goals and Objectives

Identify your State's 3--5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level Goals

b. State Level Objectives

See State Level Objectives

2. Description of projects/interventions. The following information should be provided:

Project One Title	**FFY 2018 California State University Sacramento (CSUS): Strategic Planning and Conference Services**
Project Two Title	**FFY 2018 California State University Sacramento (CSUS):California SNAP-Ed Program Evaluation Coordination**
Project Three Title	**FFY 2018 California State University Sacramento (CSUS): California SNAP-Ed Regional Training and Technical Assistance**

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

Strategic Planning and Conference Services

The purpose of this project is to provide strategic planning services and counsel that will help create and enact a long-term vision and plan for the SNAP-Ed program in California. In 2017, the Strategic Council developed 3 main objectives: 1) Branding; 2) Evaluation; and 3) Training. California plans on moving forward with the Strategic Plan in FFY 2018 by continuing to collaborate with our SIA partners, focusing on developing implementation plans, setting quarterly goals and establishing metrics to measure progress made. CSUS will continue to facilitate meetings and provide administrative support on a regular basis.

Evaluation Coordination

The purpose of this project is to develop a statewide approach and methodology to SNAP-Ed program evaluation and reporting. Currently there are multiple program evaluation activities and reporting tools existing within California and not all SIAs and LIAs are consistently applying program evaluation tools and methodologies. This project would assess the current state of program evaluation in SNAP-Ed, examine gaps and develop a roadmap and plan for providing more statewide oversight and

coordination of the SNAP-Ed program evaluation to ensure that SNAP-Ed activities are leading towards desired outcomes. The WRO SNAP-Ed Evaluation Framework will be used as a guide to determine how to align evaluation activities and processes in California. CSUS' role is to facilitate and guide the statewide program evaluation planning. The Evaluation Workgroup meets on a regular basis and is part of the SNAP-Ed strategic planning process. The Evaluation Workgroup will help with the implementation of the Statewide Strategic Plan and will also be working on a plan to develop a coordinated and integrated data repository. In FFY 17, the Evaluation Workgroup determined what measurement methods to use to evaluate each Statewide Objective. This has culminated into the piloting of the Program Evaluation And Reporting System (PEARS) developed by the Kansas State University Office of Educational Innovation and Evaluation and the beginning stages of developing a new statewide survey, California Health and Nutrition Goals Examination Survey (CHANGES). In FFY18, the Evaluation Workgroup will being rolling out PEARS statewide and continue with the development of CHANGES for a potential release in FFY19.

Regional Training and Technical Assistance

The purpose of this project is to supplement the statewide training project with additional resources to provide training and technical assistance to support regional activities and collaboratives. This project will serve to strengthen existing collaboratives and networks as well as develop new partnerships as needed. CDSS will be working with CDPH to review the results of the Text Reading and Comprehension (TRC) needs assessment to determine where the needs are. CDSS will work with CDPH to review all surveys that have been completed regarding training. CDSS will also work with SIAs and LIAs to determine what regional training needs exist. In addition, CDSS will conduct periodic surveys to ensure that partners have an ongoing opportunity to provide input on training needs. CSUS, with their subject matter expertise, will conduct an independent review and provide recommendations in order to maximize resources and fill gaps where needed in the statewide training.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

Strategic Planning and Conference Services

The target audience is SNAP-Ed state implementing agencies which includes representatives from the following agencies: California Department of Social Services (CDSS), California Department of Public Health (CDPH), California Department of Aging (CDA), UC CalFresh, and Catholic Charities of California. The Strategic Plan Council, comprised of upper level management from each SIA, was created to provide

additional oversight of the strategic initiatives and to ensure that implementation is done timely and effectively.

The target audience for the conference aspect of this project is all SNAP-Ed partners which include local, state and CDSS staff.

Evaluation Coordination

The target audience is all SNAP-Ed SIAs and LIAs. Through collaboration of SIAs, the project will determine what program evaluation activities and measures exist within each SIA and LIA and how to develop a statewide approach and methodology for program evaluation.

Regional Training and Technical Assistance

The target audience is all SNAP-Ed SIAs and LIAs. Through collaboration of SIAs, the project will determine what regional activities exist and how best to strengthen and support regional training on the SIA and LIA level.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

Strategic Planning and Conference Services

The audience will collaborate in planning nutrition and physical activities that deliver consistent messages in the community and result in behavior changes. SIAs will be aware of the best practices and will leverage resources that will improve communities lacking access to healthy food and physical activity.

Evaluation Coordination

N/A

Regional Training and Technical Assistance

d. Project Description for Educational Strategies

Note how you will implement the program. Include information describing: Behavioral, policy, systems, or environmental changes; key educational messages; how and where services will be delivered, partner organization roles and contributions, duration of project; projected total number of individuals, sites, or systems participating or reached; and for strategies that include social marketing, include the frequency of messages
Strategic Planning and Conference Services

Strategic Council sessions will be primarily delivered at CDSS headquarters in Sacramento and will be facilitated by CSUS. The average number of participants will be ten and meetings are held on a monthly basis. One focus in FFY 2018 is to develop a unified branding framework to unite all California SNAP-Ed programs and brands.

The conference services aspect of this project will primarily be conducted in Sacramento with an audience ranging from 30-200 people for state-level trainings and regional meetings. The key education messages at these meetings will be around the themes of collaboration and collective impact. The total duration of this contract is one year.

Evaluation Coordination

This project will be primarily delivered at CDSS headquarters in Sacramento and will be facilitated by CSUS. The average number of participants will be 14 and meetings are held on a monthly basis. The focus in FFY 2018 will be for the Evaluation Workgroup to work with all the SIAs to further develop California's evaluation plan and determine how the Program Evaluation and Reporting System (PEARS) will be incorporated further. Along with this, The Evaluation Workgroup will focus on new strategies on developing a new statewide survey.

Regional Training and Technical Assistance

This project will be delivered at various state agency sites and/or at CSUS headquarters in Sacramento. The average number of participants will be ten. The focus in FFY 2017 and continuing forward as needed will be for CSUS, as an independent contractor, to conduct SIA interviews to assess California's training needs and any additional training gaps that may need to be filled.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Strategic Planning and Conference Services

Some key measures that will be used include attendance records, meeting minutes, meeting notes, pre-meeting surveys, post meeting surveys, quarterly progress reports and the creation of a strategic plan document for California.

Evaluation Coordination

A program evaluation assessment and environmental scan will be conducted at the beginning of the project to determine existing evaluation activities and tools, any gaps and opportunities for improvement. The project will also integrate program evaluation activities and tools, and measures will be established to determine how these evaluation activities and tools will impact California's SNAP-Ed outcomes.

Regional Training and Technical Assistance

A training needs assessment and environmental scan will be conducted at the beginning of the project to determine existing activities, any gaps and opportunities for improvement. The project will also develop a plan for measuring the success of the training and technical assistance provided to regional networks and collaboratives. The assessment for training and evaluation needs will incorporate the results from the TRC assessments and other survey mechanisms previously conducted by CDPH.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** *the name(s) of each project(s) that will be a part of this evaluation;*

TBD

Regional Training and Technical Assistance

TBD

4. **Coordination Efforts**

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education

and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

Strategic Planning and Conference Services

CDSS will coordinate and guide the collaboration of SNAP-Ed funded partners including CDPH, CDA, CCC and UC CalFresh to develop consistent nutrition education messaging and evidence based programs. Coordination of SNAP-Ed partners is key to effectively utilize reducing SNAP-Ed funds to deliver effective services.

Evaluation Coordination

CDSS will coordinate with all implementing agencies to develop a statewide program evaluation methodology and tool. Both as part of the strategic planning process and our ongoing SIA-LIA communication, we will be working with SIAs and LIAs to train them on evaluation strategies and work with them to assist in their evaluation needs and efforts.

Regional Training and Technical Assistance

CDSS will coordinate with all implementing agencies to determine training needs and how best to deliver the training and technical assistance on a regional level. CDSS typically engages with LIAs through their SIA representative, and this will continue. The annual SNAP-Ed Forum will also be used to receive information from the LIAs, both about their training and evaluation needs.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level goals.

b. State Level Objectives

See State Level objectives.

2. Description of projects/interventions. The following information should be provided:

Project Title: California SNAP-Ed SharePoint Maintenance and Enhancements

a. Related State Objectives

The purpose of this project is twofold: to provide ongoing maintenance and operations to support the SNAP-Ed SharePoint environment, and to develop capabilities into SharePoint that automates a variety of essential processes and procedures required by the SNAP-Ed program. This project allows state and local implementing agencies to effectively collaborate during the State Plan process. It also allows CDSS to have a central point of information for all SNAP-Ed related information and materials, including resources, approved sites, curriculum, etc.

SharePoint Automation: $200,000 from FFY 2018 SNAP-Ed Allocation

CDSS has successfully completed Phase I of the California SNAP-Ed SharePoint project. In the first phase, state and local implementing agencies successfully collaborated to complete the county work plans and budgets. Due to the success of Phase I, CDSS has created a scope of work and submitted a Request for Bid (RFB) to enhance the existing SharePoint environment. In Phase II, CDSS will continue to utilize SharePoint's functionality to streamline the State Plan process with state and local implementing agencies. Phase II will also enhance the SNAP-Ed SharePoint site by increasing automated business processes, documents and federal reporting requirements. For example, the Integrated Work Plan and Site List will be made into forms. By turning these documents into forms, it will allow for real-time co-authoring, better reporting and improved efficiency. Additionally, CDSS will also include an enhancement to the exisiting email system in SharePoint to better communicate with state and local implementing agency users.

A portion of the FFY 2018 funds will be applied towards the ongoing maintenance and operations needed to successfully support the SharePoint environment which requires the support of CDSS dedicated IT staff to ensure that the software and hardware necessary for SharePoint is functioning and available at all times. SharePoint will remain supportive to the existing use of the SNAP-Ed documents and

processes, so they can be developed and updated using a collaborative process with all state and local implementing agencies.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The audience for the SNAP-Ed SharePoint is the state and local implementing agencies throughout California. SharePoint allows SNAP-Ed implementing agencies to collaborate on developing and maintaining the State Plan, as well as other documents such as the annual report. The SNAP-Ed SharePoint site is password-protected and only available to permitted SNAP-Ed state and local implementing agencies and the United States Department of Agriculture, Western Regional Office users.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

N/A

d. Project Description for Educational Strategies

N/A

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

N/A

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

N/A

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

N/A

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

N/A

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

With on-going maintenance and operations, we will be able to measure the activity of the SNAP-Ed SharePoint site. CDSS solicited feedback from local and state implementing agencies for future improvements of the SNAP-Ed SharePoint site and received input on how SharePoint could better fit their needs. CDSS will also survey our implementing agency partners to inform CDSS on how these tools are improving program effectiveness and communication.

A portion of the FFY 2018 along with the FFY 2017 carry-in funds will be used to contract with a software vendor for a second phase of enhancements and new automation of the SNAP-Ed tools within the SharePoint environment. CDSS will also fund a staff person to work with the software vendor to aid in the programming of these enhancements to the SharePoint environment. CDSS is working with our internal IT services division to determine the best ways to monitor SharePoint.

3. Evaluation Plans

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation:

N/A

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

N/A

c. **Questions:** the questions(s) that will be addressed and;

- the approach to conducting the evaluation, including scope, design, measures and data collection;
- plans for using the results

N/A

d. **Evaluation:** if the project has been evaluated previously, note the most recent year in which the evaluation was done.

N/A

e. **Use of SNAP-Ed Evaluation Framework:** identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

N/A

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

CDSS coordinates with all state and local implementing agencies to develop areas of improvement of change for the SharePoint activities. Coordination of SNAP-Ed partners is key to creating the most effective set of tools for the California SNAP-Ed program. All of the information on the SNAP-Ed SharePoint site is available to currently funded partner agencies.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

State Level Goals

See State Level Goals.

a. State Level Objectives

See State Level Objectives.

2. Description of projects/interventions. The following information should be provided:

Project Title Leah's Pantry–EatFresh.org

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

Leah's Pantry created EatFresh.org, an online nutrition education project that provides SNAP-Ed resources, recipes, nutrition messages, local county resources and training that will teach the CalFresh population (1) healthy eating behaviors (2) preparation of healthy meals and (3) healthy shopping and planning habits to spend more wisely. The project will support sustained, healthy behavior changes with innovative programs that address client barriers, build the capacity of partner organizations to integrate nutrition support and develop cutting edge tools that leverage technology and incorporate community perspective.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

The EatFresh.org program provides online and in-person, direct and indirect nutrition education classes to the SNAP-Ed population, and training and technical assistance to state and local implementing agencies, their subcontractors, eligible funded partners and county welfare departments (CWDs). The program provides services to

male and female individuals 18 years of age and older, families and communities at or below 185% Federal Poverty Level (FPL) throughout California, including all races and ethnicities with specific targets for English, Spanish and Chinese language groups.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

The online environment is an increasingly critical setting for communicating nutrition messages. EatFresh.org provides both core online interventions as well as components that integrate into interventions throughout the socio-ecological model.

The online environment is a distinct setting that requires the creation of digital resources, and it is also heavily integrated into other SNAP-Ed settings such as retail, education and community settings. As such, a well-designed intervention both impacts users specifically seeking online interventions as well as influences behaviors in the physical environment with regards to purchasing, preparing and consuming healthier foods.

Online nutrition education is also well-suited for environments not traditionally reached by SNAP-Ed such as CWDs or CalFresh Outreach programs. Clients of these programs are seeking nutrition assistance, but the programs are designed to focus very specifically on benefits eligibility and onboarding. Staff does not have the time or the training to include specific nutrition messaging alongside eligibility and enrollment work. For this reason, referring online nutrition education resources shows strong potential as a bridge between SNAP and SNAP-Ed, providing greater depth to CWDs and CalFresh Outreach programs and prioritizing client health and wellness through the use of different intervention strategies in one location.

d. Project Description for Educational Strategies

Through careful collaboration and coordination with State Implementing Agencies (SIAs), SNAP-Ed funded local implementing agencies (LIAs), non-federal partners and CWDs, Leah's Pantry will increase the reach and effectiveness of the California SNAP-Ed program by leveraging EatFresh.org.

Since 2013, EatFresh.org has engaged SNAP-Ed eligible users by providing approved recipes, nutrition messages, county resources and other information via partnerships with a variety of SNAP-Ed agencies and their associated interventions. Currently, EatFresh.org has 249 partners spread across 49 counties. Leah's Pantry has witnessed exponential growth in the adoption of online nutrition education interventions in California since the launch of EatFresh.org. As of November 2016, they are reaching over 14,000 non-bounce users per month in California. About 70% of their monthly user base now comes from online advertisements via the Google AdWords for nonprofits grants. Most of the remaining users (23%) enter EatFresh.org directly into the browser search bar or search engine, indicating they are already familiar with the EatFresh.org brand as a resource for recipes and nutrition

information. Much of this traffic is a result of outreach to SNAP-Ed eligible populations who learn about the website via partner agencies, recipe cards and posters in the community.

The EatFresh.org Mini Course, a direct education intervention which was pilot-tested in FFY16, consists of 15 topics covering healthy eating and food resource management skills. The narrative instructional strategy employed by the Mini Course involves a rotating cast of characters representing the SNAP-Ed population who model common problems and practical solutions throughout the course. Interactive features keep users engaged and topics are limited to 5–10 minutes. The initial outcome evaluation demonstrated success in a variety of knowledge indicators. During FFY17, the Mini Course evaluation was updated to align with the most recent United States Department of Agriculture (USDA) Evaluation Guidance and now includes indicators on confidence and intent to change. A finalized reporting plan coordinated with CDSS has been created to ensure that all eligible users of the Mini Course are entered into direct education reporting systems.

Leah's Pantry engagement strategies for the EatFresh.org project in FFY18–19 include:

- Supporting the inclusion of EatFresh.org tools in county Integrated Work Plans (IWPs).
- Continuing improvement of EatFresh.org for the user.
- Supporting EatFresh.org partners to maximize the reach and effectiveness of the SNAP-Ed program.
- Integrating EatFresh.org into CWDs and CalFresh Outreach programs.
- Supporting SNAP-Ed activities that engage youth with the Eatfresh.org program.
- Integrating Eatfresh.org across SNAP-Ed strategies and settings.
- Reporting and completing evaluations to measure reach and impact of EatFresh.org.

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

EatFresh.org is currently an emerging intervention program. An impact evaluation will be conducted to demonstrate the effectiveness of program outcomes. EatFresh.org will collaborate with partner agencies to undergo additional research and evaluation to measure the full impact of CA SNAP-Ed online education.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

N/A

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

The project will use the following existing educational materials: EatFresh.org, EatFresh.org Mini Course, EatFresh.org Text Message Nutrition Education, Class EatFresh.org and Implementation Toolkit Materials. Currently, written materials are provided in English and Spanish, while audio/verbal trainings are provided in English, Spanish and Chinese.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

To continue to increase the reach and effectiveness of the CA SNAP-Ed program, Leah's Pantry will need to consistently update their implementation toolkit materials, resources and website. Continued updates, along with the creation and reproduction of materials and resources are essential to the effectiveness of EatFresh.org. The cost will be comparable and fair as outlined in the SNAP-Ed guidance.

i. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Leah's Pantry will use several indicators to measure success in achieving their goals:

- Demonstrate increased traffic and peer-to-peer sharing on EatFresh.org and the EatFresh.org Mini-Course. By September 30, 2019, EatFresh.org will engage 30,000 users/month and the EatFresh.org Mini Course will engage 1,000 users/month.

- 10% of users will share a recipe or nutrition messaging page with a peer using tools on the site.
- Demonstrate increased collaboration and coordination with other initiatives and programs through our Partner Registration Survey and specific examples of integration with other programs and SIAs.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation:

EatFresh.org Mini-Course

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

Impact

c. **Questions:** the questions(s) that will be addressed and;

- the approach to conducting the evaluation, including scope, design, measures and data collection;
- plans for using the results

RQ1: Does exposure to the EatFresh.org Mini Course result in changes in **confidence** to purchase, prepare, and consume healthy food?

RQ2: Does exposure to the EatFresh.org Mini Course result in changes in **intention** to purchase, prepare, and consume healthy food?

RQ3: Does exposure to the EatFresh.org Mini Course result in changes in **behavior** in purchasing, preparing, and consuming healthy food?

Scope: Please refer to 2d, 2j.

Design: Quasi-experimental nonequivalent groups.

Measures: FNS indicators: ST1, ST2, ST3, MT1, MT2, MT3, MT4.

Data Collection: Using online and in-person questionnaires.

Plans for Using Results: Sharing with CA SNAP-Ed program; Submission to national conferences such as APHA, SNEB and Childhood Obesity Conference.

d. **Evaluation:** if the project has been evaluated previously, note the most recent year in which the evaluation was done.

Outcome evaluation (January 2016).

e. **Use of SNAP-Ed Evaluation Framework:** identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

ST1, ST2, ST3, MT1, MT2, MT3, MT4.

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

This project will create and maintain collaborative partnerships with state and local implementing agencies, their subcontractors, eligible funded partners and CWDs to provide SNAP-Ed interventions that will maximize the reach and impact of the SNAP-Ed program. Eatfresh.org will continue to develop and build partnerships throughout CA to integrate online nutrition education interventions in an effort to increase and sustain healthy eating and behavior changes amongst the SNAP-Ed eligible population.

Rev. 8/15/2017

Template 2 SNAP-Ed State Goals, Objectives, Projects, Campaigns, Evaluation and Collaboration

7 CFR 272.2 (d)(2)(i) OMB No. 0584-0083

1. State Agency Goals and Objectives

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions. The following information should be provided:

Project Title	The Champions for Change Social Marketing Campaign Budget: FFY 2017 $13,180,000 FFY 2018 $12,341,534 + $543,188 Market Segmentation Study and Focus Groups FFY 2019 $8,130,000 + $120,000 Focus Groups

a. Related State Objectives

By September 30, 2017-2019, conduct annual comprehensive social marketing, media and public relations campaign in 12 designated media market areas from April through September using approved Champions for Change messages in the following advertising mediums: television, radio, outdoor and digital; resulting in 1.1 billion total indirect impressions each year to the California SNAP-Ed audience.

By September 30, 2017-2019 conduct annually five webinars providing technical assistance to SNAP-Ed funded partners on community change events.

Each year by September 30, 2017-2019 recruit, train and educate 25 new Champions to provide authentic voice for media campaign (appear in television, radio, outdoor and digital executions). Champions will participate in workgroups on the following topics: conducting taste testing, champions for change message points, how to use social media for peer to peer engagement, develop testimonial videos, develop "how to do it tips" and share opportunities to work on the state-level campaign and with partners on community change events.

Annually, conduct two (northern and southern CA.) Champions for Change workshops (training and sharing forum for Champions) for up to 160 participants. The Participant survey will indicate 90% satisfaction in attaining learning objectives.

b. Audience

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for Caucasian, Latino, African American, and Asian communities.

Ages: Adults 18 - 54, primarily women with children, and children ages 5 – 17 years with concentrated efforts aimed at young adolescent's ages 9 - 11 years.

SNAP-Ed Target: Use Nielsen and Scarborough data sets to ensure TV and radio placements target individuals and families at or below 185% FPL. Use American

Communities Survey to ensure outdoor and events are targeted to allowable census tracts.

c. Food and Activity Environments

Champions for Change media and public relations activities will increase the SNAP-Ed audiences' awareness of healthy foods and beverages and places to be physically active from community events, TV, radio, outdoor and digital advertisements. These advertisements are in support of localized interventions that improve access through a variety of policies, systems and environmental change strategies.

d. Project Description for Educational Strategies

Implement a mass advertising campaign April through September 2017 - 2019 using existing English and Spanish television, radio, outdoor and digital advertising that effectively reaches SNAP-Ed eligible population, and that will achieve U.S. Department of Agriculture's (USDA) requirement to deliver over 50 percent of purchased media impressions to individuals living in <185% FPL households delivering 3.4 billion total indirect impressions.

1. See Media Flow Chart with designated media markets and projected impressions for the media buy.

   The statewide Annual Media Tracking Survey conducted via phone interviews monitor consumer aided and unaided recall of advertising as well as tracks beliefs, attitudes, self-efficacy, and family behavior related to nutrition and physical activity among eligible and SNAP-Ed recipients. (See Research Evaluation Section)

2. The multicultural campaign features ads in English and Spanish, targeting low-income African American, Asian, Caucasian, and Latina families. All advertising materials will include the USDA SNAP-Ed acknowledgements. A total of 26 weeks of TV and other mediums will be "flighted" in order to extend advertising over a six-month period – April through September. All California media markets will receive advertising, representing coverage of around 80 percent of California's SNAP-Ed eligible population. 2018 approval requested for $8,208,127 for 26 weeks April through September.

3. Utilize public relations activities to promote Champions for Change messaging and integrate the new Champion advertising campaign with LHDs community events. This will include but not limited to supporting community events around the following: Champion advertising campaign launch events in April, Fruit and Veggie Fests in May, African American-targeted events in February and June, Power-Up Your Summer! activities in June through August, Latino Health Awareness Month events in September, and Safe Routes to School events in October. Additional state supported community event promotional guide will align with the Champions for Change program objectives of increasing fruit and vegetable consumption, increasing water consumption, increasing daily physical activity and food security. Events and website will be designed to engage low-

income Californians to advocate for healthier communities and will be held in qualifying low-income census tracts.

Community events are chosen to support interventions targeting retail settings, children, various ethnic groups and also existing California community events like Food Day and Safe Routes for schools. CDPH provided public relations packets with webinars for the 4-6 major events that are done at the local level. These usually are Fruit and Veggie Fest, Juneteenth, Power Up Your Summer, Latino Health Awareness Month, Safe Routes to School, and Food Day. Public Relations technical assistance support is provided all year long. The media campaign runs from April - October which aligns with growing and harvest times and is all the budget will allow. We will be providing a public relations Field Guide, which will be updated annually that will highlight primary message on eating healthy, physical activity and healthy beverages and provides a menu of activities for local agencies to try. We promote Summer Meals by sending the USDA promotional materials out to all SIAs thru our e-newsletter and encourage them to work with Summer Meals sites in their jurisdiction. This works nicely with Power-up your Summer events and is one of the suggestions for local agencies to consider. Most of our local Agencies are aware of Farm to School Month and National School Lunch Week. Harvest of the Month celebrates farm to school throughout the school year.

4. Provide public relations and media relations technical assistance to CDPH-funded programs and partners in support of community events held by LHD's and/or partners throughout the state by hosting up to five webinars annually to review approved template public relations materials including press releases, fact sheets, message points and listing of best practices event ideas and themes for local implementation.

5. Build on the Champions for Change Program by identifying and instructing Champion for Change spokespeople and providing ongoing message point and media instruction assistance to LHD's. Media instruction by CDPH staff will be conducted to train both English and Spanish-language spokespeople.

6. Take advantage of Social Media opportunities on Twitter, Facebook, Pinterest, Instagram and CrowdChat including providing approved Champions for Change, MyPlate SNAP-Ed tips to LHDs, State Agencies including CDPH's consumer site. Partner with CrowdChat to create a Champion profile to allow cross platform engagement of all social media (Twitter, Facebook) and capture engagement data to inform program with a dashboard to monitor and measure your social media programs effectively.

7. CDPH will not use FFY 2018 funds to support media placement of the Partnership for a Healthy America's (PHA) FNV campaign. CDPH will place some FNV retail materials to support funded partners' healthy retail interventions allowing for evaluation. Enhance, support and compliment the Be Better messaging on the benefits of fruit and vegetable consumption with the goal of

increase sales of fruits and vegetables in targeted retail establishments in qualifying stores. Work with LHDs and partners to enhance local retail and school-based efforts with FNV campaign materials.

e. Project Description for Marketing Strategies

The Champions for Change Be Better campaign uses real-life Champions for Change identified through Champion Alliance partnership to deliver campaign messages. In place of professional actors, the campaign will feature low-income mothers, fathers, community workers sharing their own stories of how they have made healthy changes for their families, worksites, children's schools, churches, neighborhood stores, parks, and other environments. This gives the campaign an authentic voice motivating our audience to adopt key behaviors and create self-efficacy.

CDPH subcontracts with Rescue Agnecy Public Benefit, LLC for services described in the Project Summary for the amount of $12,341,534 for FFY 2018.

f. Evidence Base

The Annual Media Tracking Survey will be a mechanism for evaluating association between levels of exposure to California SNAP-Ed Champion for Change Media, Advertising and Public Relations Campaign messages and self-reported behavioral outcomes. The current questionnaire will be revised to include unaided and aided recall questions related to television, radio, and billboard exposure specific to the images and messages of the current social marketing campaign.

g. Policy, Systems, and Environmental Changes

The social marketing advertisements developed provide media support to funded partners/ LHD interventions and provide a direct education message and in many cases indirectly promote a policy, systems and/or environmental change message through photographs and videos. Videos include Champions providing testimonials on how they made changes in their families' health, to their child's school environment through PTAs or Wellness Councils, in their worksites and churches to improve access to healthier foods and physical activity opportunities.

h. Use of Existing Educational Materials

The current social marketing campaign is designed to message on physical activity (PA) recommendations (2.5 hours a week for adults and 60 minutes of active play a day for youth), the concept that physical activity does not have to be expensive, e.g. gym membership and free resources are available, Champions for Change (intergenerational) and active communities; bicycling, safe routes, safe parks, walking clubs, etc.. and being active every day can help people live longer, healthier lives.

The current social marketing campaign is designed to reach low-income families in California. The ads show Moms, Dads and Kids of many different cultures and

generations who are making healthy changes in their lives, in their family's lives, and in their communities. The ads features real people, not actors (and several Champion Moms!).

Untilize creative concepts from the FNV campaign by PHA to target youth and their parents in support of local retail efforts by LHDs and partners.

i. Development of New Educational Materials

In FFY 2018 and 2019, complete production of social marketing campaign promoting physical activity, nutrition education and water consumption as the primary messages. The campaign will deliver four TV commercial executions, radio commercials, out of home executions, and digital executions of the same creative theme.

A promotional guide will integrate the social marketing campaign messages into the LHD's community-based events. The promotional guide will provide information, templates, infographics, videos, posters, and tip sheets while allowing for local customization by LHDs to ensure relevancy to their communities.

j. Key Performance Measures/Indicators (kpi)

MT6: Marketing/Messaging: Conduct a telephone survey to measure recall and changes in knowledgeand behaviors among participants who were potentially exposed to our campaign. Track the family change behaviors C4C message on including: Setting limits on unhealthy food in the home, setting limits on sugar sweetend beverages consumed in the home, setting limits on screen time for family, making fruits and vegetables available for healthy snacks, making opportunities for family centered physical activity and making fruits and vegetables accessible. The Champions for Change campaign post buy will deliver over 3.4 billion indirect impressions, reaching 80% of SNAP-Ed audience.

ST5: 75 Local Champions willing to work with community leaders and non profit agencies to improve access in low-income neighborhoods to healthier foods and physical activity opportunities in 20 of 58 counties at community events or where nutrition education is provided.

8. Evaluation Plans

a. Name:

Champions for Change Annual Media Tracking Survey; Market Segmentation Study (FFY 2018); Formative Messaging; and Media Post Buy Analysis

b. Type:

Formative - annual Media Tracking survey (Please see RES State Project Summary for details.)

c. Questions:

Moderators Guide developed by current media vendor, RES and SMPRS staff.

d. Evaluation:

The Media Tracking Survey is conducted annually to assess campaign awareness, knowledge levels, family change behaviors, physical activity behaviors, dietary behaviors, and behavioral intentions, and other important measures. The results from the Media Survey (pre and post Waves) allows us to track five family change behaviors, allows us to gauge the target audience's knowledge of key USDA behavioral messages for nutrition education and physical activity, and provides us with assurance that the creative concept messages are being recalled by our target audience. We would make creative adjustments and media medium adjustments based on results if recall did not meet expectations.

Family change behaviors include: 1) Setting limits on unhealthy food in the home; 2) setting limits on sugar sweetend beverages consumed in the home; 3) setting limits on screen time for family; 4) making fruits and vegetables available for healthy snacks; 5) making opportunities for family centered physical activity and making fruits and vegetables accessible.

Post Buy Analysis contains the details of the media buy and impressions for each medium.

Market Segmentation Study to report on subgroup clusters within the primary target audience will take place Q 1 and 2 of FFY 2018 under separate evaluation contract #17-10003. The results of the market segmentation study will inform creative development and production in 2018 as well as media placement to ensure correct mediums are used for targeting subgroups in FFY 2019.

Formative Messaging Analysis to report on the impact of consumer messages. (Please see details in RES Project Summary)

e. Use of SNAP-Ed Evaluation Framework:

Identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

MT7 – 5% Increase in favorable mentions of SNAP-Ed activities in local news or online

MT6 – 5% increase in aided and unaided recall of the ads and ad messages.

9. Coordination Efforts

All materials produced for use in FFY 2017-2019 will be shared and made available to all LHDs, contractors, State Implementing Agencies, partners and all SNAP-Ed programs in California and other states. CDPH will continue to coordinate with USDA on the promotion of new and updated materials including MyPlate icon,

www.ChooseMyPlate.gov website and supporting materials and resources.

CDPH will continue efforts to partner with SIAs on California SNAP-Ed brand and once developed, incorporate the brand into all CDPH materials produced at the state and local levels. Coordination will accelerate brand equity and saliency of messaging.

CDPH will provide DVD of media spots and testimonials on a loop for the County Welfare Offices to play in their waiting rooms. We can provide materials from the Champions for Change program including promotional materials like posters, flyers and cook booklets. CDPH will explore how we might create collaboration opportunities with CDE and LHDs with their Summer Meals Program.

CDPH will coordinate with EatFresh.org on promotions and sharing resources. This could include the development and testing of new materials for SIAs. Examples of new materials for FFY 2018 includes ethnic recipes for recipe cards, social media promotions and assets like #MadebyChampions, digital advertisements in English, Spanish, Vietnamese, Cantonese and Hmong, posters tied to the new media campaign, text messages from the mobile campaign and posters promoting texting campaign that ties with the media campaign.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions. The following information should be provided:

Project Title	State-level Evaluation of Local Health Department-Driven SNAP-Ed Projects
	Dun & Bradstreet $118,549
	Nutrition Policy Institute (NPI)

a. Related State Objectives

The State-level Evaluation of Local Health Department-Driven SNAP-Ed Projects captures information about SNAP-Ed efforts at the local health department level, including the intervention activities conducted, reach of the interventions, and outcomes and impacts related to the interventions. The evaluation, which captures data from all local health departments receiving SNAP-Ed funds, is divided into three parts: (1) process evaluation, which tracks the items required by EARS; (2) behavioral outcome and impact evaluation, which assesses the behavioral outcomes pre/post from individuals participating in SNAP-Ed interventions; and (3) process and outcome evaluation of policy, systems, and environmental change interventions. This work is supported by contracts with NPI and Dun & Bradstreet.

In FFY 2017–FFY 2019, efforts will continue to better integrate all of the local health department evaluation activities, in order to be able to tell a more comprehensive story about SNAP-Ed interventions and to better support local health departments in using evaluation findings to improve programs. To further the integration efforts and to highlight SNAP-Ed success stories, in addition to the 3-part evaluation, case studies of 5–6 local health department programs will be conducted in FFY 2017, a review of the evidence to inform comprehensive, multilevel, multi-sectoral interventions will continue, a formative evaluation of SNAP-Ed eligible persons' perspectives about promising SNAP-Ed approaches will be completed, and efforts will be made to better understand promising intervention practices in the retail and other settings. Further, a system will be developed to understand Local Health Departments' plans and to evaluate their progress in achieving those plans, in order to inform both the health departments themselves, as well as to provide insight into the effectiveness of the planning process and to measure the degree to which LHDs are able to predict what interventions they will be able to complete successfully over a 3-year period.

Beginning in FFY18, support of local health department evaluation will increase. Local interventions that are priority for evaluation will be identified and standardized methods for these local level evaluations will be developed including a standard set of evaluation strategies, instruments, and protocols. These standardized methods will complement data derived from the Program Evaluation and Reporting System (PEARS). Training, materials, and ongoing technical assistance will be provided to LHDs to assist in selecting and implementing the recommended evaluation strategies. Development and implementation of standardized methods will yield local evaluation results that can be summarized across sites and inform local and state efforts.

Additionally beginning in FFY18, specific high-dose local interventions with high likelihood of impacting institutional and/or individual level outcomes of interest or that are widely implemented across LHDs will be evaluated. Intervention projects that are implemented in multiple counties will be prioritized.The Nutrition Policy Institute in collaboration with CDPH, local health departments and contractors, will design the evaluation approach, select/develop instruments and protocols, and supervise data collection, analysis and summaries of results. Results will be disseminated to internal and external stakeholders, with a special focus on translating results for use by LHDs.

b. Audience

Gender: Males and Females
Ethnicity: White, African American, Latino/Hispanic populations, and all other racial/ethnic groups
Languages: English and Spanish

i. Key Performance Measures/Indicators (kpi)

Part 1: *Process Evaluation Reporting System for California SNAP-Ed State Implementing Agencies (SIAs)*

NPI maintains the Activity Tracking Form (ATF), used to collect data required for the USDA Education and Administrative Reporting System (EARS). The ATF system was developed by the California Department of Public Health and was used by 4 of the 5 SNAP-Ed State

Implementing Agencies in California until FFY 2018. Local Implementing Agencies tracked educational and social marketing activities with the ATF, to capture data related to the partners LIAs have engaged in their SNAP-Ed work, and to count or estimate the reach of interventions. The system was updated to reflect changes to EARS that were anticipated in FFY 2017. It was determined that an alternative system was needed and NPI participated in the piloting of the Program Evaluation And Reporting System (PEARS) program activity module in CA in FFY 2017 and assisted with the revisions of that module and full scale implemention starting in FFY 2018. NPI will a) provide technical assistance to CDPH users, b) manage CDPH users, and c) manage and maintain the site list.

Part 2: *Behavioral Outcome and Impact Evaluation of CDPH-Funded Interventions*

In FFY 2017, LHDs receiving over $350,000 (n=24) will measure pre- and post-intervention changes in participants' fruit and vegetable consumption, sugar-sweetened beverage consumption, physical activity, and factors that influence these behaviors. Each LHD that participates will collect data from 100 or more matched pairs of respondents who participate in that health department's most robust interventions, expected to produce a behavioral impact. Revisions to this method of capturing pre/post behavioral change data will be considered during the FFY 2017–2019 period, to ensure that behavioral outcome data are able to capture changes from the most robust, comprehensive SNAP-Ed interventions being conducted. NPI gathers Impact Outcome Evaluation data and leads the effort to revise data capture methods.

Part 3: *Evaluation of Policy, Systems, and Environmental Changes*

Efforts will continue to integrate policy, systems, and environmental change process and outcome data with the other local health department evaluation data. The PEARS system for PSE data collection and reporting will be utilized. The policy, systems, and environmental change evaluation assesses LIAs' and LHDs' efforts to make changes in policies, systems, and environments to facilitate healthy eating and physical activity and promote food security among SNAP-Ed eligible Californians. Many of these efforts occur in school, early childhood care and education, and food retail settings, but may occur in a variety of other community-based settings as well. Evaluations will track activities implemented by Local Health Departments in all SNAP-Ed settings, and the possibility of expanding the PSE evaluation to include pre/post comprehensive PSE assessments in settings where policy, systems, and environmental change interventions are under development in will begin implementation in FFY 2018.

For example, in the food retail environment, a long-used tool associated with the CX3 project provides detailed information about the food retail environment, in order to inform intervention planning as well as to evaluate the changes made as a result of the interventions conducted. The master database of California businesses provided by Dun & Bradstreet supports this effort. Similar environmental assessment tools will be standardized for school and early childhood environments, so that all LHDs working to change these

environments will be using the same tools to measure change, and the CX3 data collection tool will be reviewed for its effectiveness and modified, as needed.

3. Evaluation Plans

a. Name: State-level Evaluation of Local Health Department-Driven SNAP-Ed Projects

b. Type:

Part 1: Process

Part 2: Outcome and Impact

Part 3: Formative, process, and outcome

c. Questions:

Part 1*: Process Evaluation Reporting System for California SNAP-Ed State Implementing Agencies (SIAs)*

Q1: What are the frequency and duration of direct education SNAP-Ed activities?
Q2: How many unduplicated people received SNAP-Ed direct education services?
Q3: What are the socio-demographic characteristics of recipients of SNAP-Ed direct education services?
Q4: How many duplicated direct education contacts were made?
Q5: In what sites were those services received?
Q6: How many indirect education contacts were made?
Q7: How many staff trainings were provided and how many staff participated?
Q8: How many activities included partners and what were their roles?

In FFY 2014, CDPH Research and Evaluation Section (RES) and the State of California Information Technology Services Division (ITSD) staff successfully developed and implemented the online Activity Tracking Form (ATF) capable of collecting all data required for the USDA Education and Administrative Reporting System (EARS). In FFY 2017, NPI staff will continue to provide technical assistance to the SIAs and their contractors regarding creating new user accounts for the ATF, developing and conducting trainings, providing technical assistance, running system reports and queries for each SIA and helping them produce their EARS report. NPI staff will continue to provide this support as long as the ATF is used, and will support the development and/or implementation of any alternate system utilized.

The results of data collected from the ATF or alternate system will be compiled and sent to the CDSS for entry into FPRS for the California EARS report. In addition, reports will be generated at the State, SIA, LHD, and other sub-levels, and used to provide recommendations for and potentially improving the effectiveness of future interventions, other SIA programs, and coordinated California SNAP-Ed efforts. These data are vital to our estimates of levels of exposure to SNAP-Ed interventions at the census tract level for the comprehensive evaluation of SNAP-Ed in California.

Use of PEARS for EARS-related data collection was piloted in FFY 2017 and will be

implemented full scale in FFY 2018. NPI will continue to provide technical assistance, analysis, interpretation and dissemination of findings to LHDs and other stakeholders.

Part 2: *Behavioral Outcome and Impact Evaluation of CDPH-Funded Interventions*

Do SNAP-Ed interventions lead to changes in participants' food and activity behaviors, including:

Q 1: Fruit and vegetable consumption?
Q 2: Consumption of other healthy foods?
Q 3: Consumption of foods and beverages with added sugars?
Q 4: Levels of physical activity?

LHDs will measure behavior changes for direct education classes alone or in conjunction with policy, systems, and environmental change approaches. Standardized instruments are used for the outcome and impact evaluation and vary based on the target age group. LHDs working with children in grades 3 through 8 use a questionnaire based on the Baylor University School Physical Activity and Nutrition Project instrument. A similar instrument but more age-appropriate is used for high school students. Interventions with adults use the Food Behavior Checklist (FBC) or Fruit and Vegetable Checklist (a subset of the FBC).
The evaluation team will conduct one-on-one and group trainings (in-person, by webinars or teleconferences) and technical assistance to assist LHDs in planning which interventions to evaluate, administering the survey instruments in the least biased manner, as well as adhering to other standardized practices.

LHD staff will continue to enter questionnaire responses into data entry templates that are programmed to automatically analyze the data and flag post scores that significantly differ from pre scores. These findings are submitted to the evaluation team which works with LHDs to interpret the findings and discuss program improvement, and analyzes data and produces statewide reports. Efforts to capture behavioral outcome and impact data using electronic data collection methods, such as tablets or cell phones, will be explored.

Part 3*: Evaluation of Policy, Systems, and Environmental (PSE) Changes*

Q1. What behavior change outcomes are the focus of policy, systems, and environmental change efforts? Are multiple PSEs and direct education reaching the same people with the same behavior change goals?
Q2. In how many SNAP-Ed eligible settings were multi-component PSE interventions implemented? How robust are the combinations of these efforts in the various settings?
Q3. How many sites conducted assessments and/or participated in recognition programs? What types of assessment did they use and which recognition programs did they participate in?

Q 4. How many SNAP-Ed eligible sites (by setting type) were engaged in, adopted, improved or maintained PSE interventions?
Q 5. What types of policy, systems, and environmental changes occurred in SNAP-Ed settings?
Q 6. What are the barriers and facilitators to implementation of PSEs?
Q 7. How many SNAP-Ed eligible people were reached by PSE changes? How many people in the total population were reached?
Q 8. What is the public health impact of multi-component PSE change efforts?
Q 9. In how many SNAP-Ed eligible settings were PSE changes maintained; how long are they maintained and by what means?
Q10. What is the role of SNAP-Ed funded people and resources in PSEs that involve partnerships?
Q11 What proportion of funds are spent on PSEs, direct education and social marketing?
Q12. What types of evaluation are being conducted at the local level and what are the major findings?

This part of the evaluation of Local Health Department efforts assesses LHDs' progress in planning, implementing, and maintaining PSE changes that support food security, healthy eating and active living among the SNAP-Ed eligible population. The evaluation team will provide technical assistance to LHDs in the following areas:

- Assisting with planning and evaluation activities to ensure LHDs' PSE strategies reach the priority population, are adopted by settings with identified needs, and are implemented within a multi-component initiative in a manner that will be effective in achieving the intended outcomes and can be maintained over time
- Assisting local projects to determine how best to collect the information that will help them to understand whether their interventions are being implemented and having the desired effect
- Identifying and promoting reliable and consistent assessment tools that have been used for measuring PSE change and strengthening program delivery
- Identifying and reporting indicators for PSE changes that correspond with the USDA SNAP-Ed Evaluation Framework

This part of the evaluation also focuses on further refining the evaluation system for data collection, analysis, and summary by:

- Assessing the effectiveness of the data entry and analysis system, ensuring it is user-friendly and providing the information most necessary to inform program planners and various stakeholders about the accomplishments of the SNAP-Ed program and ways the efforts can be improved. The data collection will be conducted using a PSE reporting module developed in the PEARS system in FFY 2016.

Case studies

Q1. What do successful SNAP-Ed programs look like? How can they inform future SNAP-Ed efforts and the broader SNAP-Ed community?
Q2. What are the process and outcome strategies employed by a variety of successful interventions?
Q3. What are the personal, interpersonal, geographic, economic, sociocultural, and other factors that contribute to high levels of success in local SNAP-Ed programs?

Potentially, successful interventions will be identified based on results from monitoring and evaluation data and recommendations from local and state level SNAP-Ed staff and other key informants. Site visits will be conducted to make a final determination regarding the level of success and provide documentation regarding successful practices. Site visits will include structured and unstructured observations, photo-documentation, interviews, and possibly focus groups with stakeholder groups such as students, teachers, etc. Site visit and evaluation data will be combined to fully capture the interventions being conducted and the effects they have had on SNAP-Ed eligible people in the area. These case studies will synthesize all of the evaluation data available from local health department programs.
In FFY17, case studies were completed in Los Angeles, Marin, Nevada, and Plumas counties. A final report will be completed in FFY18.

Formative Evaluation with SNAP-Ed eligible adults (Participant Voices)

At the California SNAP-Ed Forum in January 2016, Local Health Departments were asked what evaluation questions they would like to see the SNAP-Ed evaluation answer. Many Forum participants indicated interest in questions related to participant perceptions. Thus, an evaluation will be conducted with eligible participants to address those questions, such as:

Q1. What food and activity-related issues most resonate with SNAP-Ed eligible people? What health problems are they and their families experiencing? Do they perceive obesity and chronic diseases, like diabetes, to be a problem affecting them and the community?

Q2. What opportunities do eligible adults see for SNAP-Ed to improve diet, activity, and food security among people eligible for SNAP-Ed in their community? What programs and services would they use the resources to support and why?

Q3. What are the perceived barriers and challenges for participants in making and sustaining recommended behavior changes over time? How do they make food and activity-related decisions for themselves and their families?

Q4. What SNAP-Ed activities, messages, resources, delivery methods have they found useful and effective, and what has not been useful?

Q5. What challenges are facing their particular communities? Are SNAP-Ed programs addressing these, or are there other challenges that are higher priorities?

Q6. Are particular groups in the community more "ready" for various kinds of SNAP-Ed interventions?

d. Evaluation:

Each of these parts of the evaluation is ongoing, with various timelines for tracking and reporting.

e. Use of SNAP-Ed Evaluation Framework:

Part 1: *Process Evaluation Reporting System for California SNAP-Ed State Implementing Agencies (SIAs)*

Indicator	Description
ST7*	Partnerships

Part 2: *Behavioral Outcome and Impact Evaluation of NEOPB-Funded Interventions*

The behavioral outcome and impact evaluations measure a number of SNAP-Ed Evaluation Framework indicators. Below we have listed which indicators are measured by all or some of the projects, and which are optional, so may not be measured at all. Priority indicators are noted with an asterisk*. While LHDs are encouraged to collect longer-term follow-up data from individuals participating in evaluations of behavioral outcomes and impacts, these additional data collection periods are not required; thus, we have not included individual-level long-term indicators here.

Adult behavioral outcome and impact evaluation: Individual Level Indicators

Indicator	Description	Projects
ST1	Healthy Eating Goals and Intentions	Optional
MT1*	Healthy Eating Behavior Change	All
MT2*	Food Resource Management Behavior Change	Some
MT3*	Physical Activity and Reduced Sedentary Behavior Change	Optional

Youth/Teen behavioral outcome and impact evaluation: Individual Level Indicators

Indicator	Description	Projects
ST1	Healthy Eating Goals and Intentions	Optional
MT1*	Healthy Eating Behavior Change	All
MT3*	Physical Activity and Reduced Sedentary Behavior Change	All

Part 3: *Evaluation of Policy, Systems, and Environmental Changes*

Indicator	Description
ST5	Need and Readiness
MT5*	Nutrition Supports Adopted and Reach
MT6	Physical Activity Supports Adopted and Reach
LT5	Implementation and Effectiveness
LT6	Implementation and Effectiveness
LT7	Program Recognition
LT10	Planned Sustainability

4. Coordination Efforts

A good deal of coordination of these evaluation activities is occurring at a variety of levels, including the coordination with CDSS' evaluation teamThe California SNAP-Ed Implementing Agencies are working together to better coordinate a statewide evaluation, with the goal of ultimately combining efforts and having a single statewide data entry and analysis system. The evaluators from the various SIAs will continue to meet regularly, to coordinate goals and objectives, and to determine the most effective and efficient ways to coordinate data collection efforts statewide.

CDPH will continue to lead the tracking of EARS data using the ATF up to FFY 2017.

FFY 2018 SNAP-Ed Budget

Organization Name:	California Department of Public Health
State-Level Project:	Dun and Bradstreet
FFY 2018 Total Budget:	**$124,580.00**
Budget Adjustment Request #:	

	Expenses*	FFY 2017 Carry-In Budget****	FFY 2017 Budget	FFY 2018 Budget	% Difference

1			Proprietary Data Collection	Dun & Bradstreet (D&B) will continue to provide CDPH with master databases of business in California that includes D&B DUNS number linkage that is unique and proprietary to D&B. D&B will continue to provide NEOPB access to approximately 141,000 businesses in California including a financial stress prescreen indicator that identifies whether business are experiencing economic hardship. This information will be utilized for the maintenance of several data layers within the Chronic Disease and Injury Control (CDIC) Division, Nutrition Education and Obesity Prevention Branch (NEOPB), Geographic Information System (GIS). The service provided by D&B will assist in achieving NEOPB's mission to educate and service the community. The nutritional and other health-related information from D&B's vast database will help to enhance the CNN GIS which, in turn, provides this information to local health departments and various local contractors providing nutritional services throughout the state of California.	$124,580.00	1	$124,580	Note: 100% of this line-item is FFY 17 carry-in

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions. The following information should be provided:

Project Title	*Inter-Agency Agreement with Nutrition Policy Institute Agriculture and Natural Resources (UC ANR), University of California, $3,236,529.66 for FFY17; $3,325,686 for FFY18*

The Nutrition Education and Obesity Prevention Unit of the University of California's Nutrition Policy Institute (NPI) contract will conduct research and evaluation studies to assess the needs for, scope of, and effects of SNAP-Ed services provided to eligible individuals and communities. NPI is currently in the process of renewing the contract beyond the 2017 Federal Fiscal Year (FFY) for another 3-year cycle.

Evaluation activities will address the State Level Objectives and will satisfy the CDPH reporting requirements to CDSS. Additionally, NPI will provide training and technical assistance to support LHDs to develop evaluation plans, implement evaluation activities, and report evaluation findings. Assistance to LHDs includes the application of evaluation guidance newly available within the *SNAP-Ed Evaluation Framework Interpretive Guide.* FFY18 will feature increased evaluation at the local-level including outcome evaluation of interventions with potentially high impact. In FFY 17, training and technical assistance for evaluation was made available to other State Implementing Agencies and their contractors.

In FFY18, NPI will provide technical assistance and help ensure adequate evaluation of CDPH state-level projects, such as: Partnership Plan implementation, Office of Farm to Fork, Early Care and Education, Potter the Otter, CNIP, Rethink Your Drink Oral Health, CA Fit Business Kit, and Afterschool Interventions. Further, NPI will update the CDPH and Local Health Department partners about new developments from the research literature regarding evidence-based strategies found to impact target behaviors, and will develop reports/briefs/presentations/publications to share findings about SNAP-Ed intervention needs, experiences, and effects.

Because NPI's activities under the Inter-Agency Agreement consist of research and evaluation activities, the project descriptions, including locations, project descriptions, implementation plans, and projected numbers of participants are described below in the "Evaluation Plans" portion of this form.

a. Related State Objectives

This project supports State Level Objectives 1a, 1b, 1c, 2, and 3b.

b. Audience

Gender: Males and Females
Ethnicity: White, African American, Latino/Hispanic populations, and all other racial/ethnic groups
Languages: English and Spanish
Ages: Adults, Teenagers, and Children

c. Food and Activity Environments

N/A

d. Project Description for Educational Strategies

N/A

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

N/A

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

N/A.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

N/A

h. Development of New Educational Materials

N/A

i. Key Performance Measures/Indicators (kpi)

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation;

Specifically, NPI will:
1. Assist the LHDs and their subcontractors as they develop and implement plans to assess the reach and effects of SNAP-Ed interventions. This will include providing training and technical assistance as LHDs and subcontractors: track intervention activities conducted and the number of people reached (ATF/EARS); evaluate direct education services provided (IOE); and assess the need for and conduct policy, systems, and environmental change interventions (using CX3 and other PSE evaluation materials guided by the SNAP-Ed Evaluation Framework and the state goals, objectives, and Theory of Change Model). Support to LHDs will include technical assistance in understanding and applying the *SNAP-Ed Evaluation Framework Interpretive Guide.*

Beginning in FFY18 support of local health department evaluation will increase. Local interventions that are priority for evaluation will be identified and standardized methods for these local level evaluations will be developed including a standard set of evaluation strategies, instruments, and protocols. These standardized methods will complement data derived from the Program Evaluation and Reporting System (PEARS). Training, materials, and ongoing technical assistance will be provided to LHDs to assist in selecting and implementing the recommended evaluation strategies. Development and implementation of standardized methods will yield local evaluation results that can be summarized across sites and inform local and state efforts.

Additionally beginning in FFY18, specific high-dose local interventions with high likelihood of impacting institutional and/or individual level outcomes of interest or that are widely implemented across LHDs will be evaluated. Intervention projects that are implemented in multiple counties will be prioritized.The Nutrition Policy Institute in collaboration with CDPH, local health departments, and contractors, will design the evaluation approach, select/develop instruments and protocols, and supervise data collection, analysis and summaries of results. Results will be disseminated to internal and external stakeholders, with a special focus on translating results for use by LHDs.

2. Collaborate with the CDPH Research and Evaluation Section on the planning, implementation and reporting of Statewide evaluation activities, the Qualitative Study of the CDPH funding model structure change, and other assessment and surveillance of SNAP-Ed populations.

3. Advise the CDPH program implementation team on the evidence base for intervention approaches and partner to support the evaluation of select intervention projects. In all advisement, consider linkage of projects' evaluations with the *SNAP-Ed Evaluation Framework Interpretive Guide.*

4. Assess the need for and provide evaluation training and technical assistance across all SIAs and their respective LIAs, as needed. Additionally, NPI will participate in the Statewide Evaluation Workgroup, which requires a contribution to identifying Statewide Goals and Objectives for evaluation and to the development of associated evaluation questions, bearing in mind priorities expressed within the *SNAP-Ed Evaluation Framework Interpretive Guide*. In FFY17, NPI supported the SIAs use of the ATF for EARS and the transition to the Program Evaluation and Reporting System (PEARS). Additional assistance will be provided as needed to support CDSS and the SIAs to evaluate direct education (IOE) and policy, systems, and environmental changes (PSE).NPI will continue to provide support to the LHDs in the transiton to PEARS and their on-going use of PEARs for data collection.

5. NPI will develop and complete the relevant reporting requirements to CDSS (EARS and Annual Reports).

6. Assess the effectiveness of data collection tools used for administrative auditing (ATF), direct education (IOE), and PSE and improve tools and methods as needed in order to minimize the data collection burden on LHDs and subcontractors and to maximize the effectiveness and utility of the data collected. NPI will develop institutional self- assessment tools to more adequately assess environments that are the focus of SNAP-Ed interventions. These tools will be used to assess change over time in institutional level policies, practices and environments.

In FFY18, NPI will increase its support for evaluation of state-developed projects in close coordination with CDPH. NPI will collaborate with CDPH to develop, pilot, and implement coordinated and efficient evaluation of state-developed projects funded through CDPH. NPI will identify common methods, create logic models, identify common measures for intervention methods, and other ways to standardize evaluation as much as possible to allow for aggregation of data and findings.

NPI will develop a system for determining evaluability of state-level projects to help plan for evaluation, which will include ensuring a focus on CDPH priorities for FY2020-2022. For select potentially high-impact state-developed projects, CDPH and NPI will use the evaluability assessment of state-level projects to determine which projects will be evaluated using a rigorous outcome evaluation methodology, and NPI will work with contractors and others to implement outcome evaluation for these projects.

7. Track developments in the research literature and share relevant study findings with CDPH staff and LHDs.

8. Use internal and external research and evaluation findings to educate and inform SNAP-Ed, SIAs, CDPH staff, lay and professional audiences; develop and distribute professional abstracts, manuscripts, briefs, reports, and other materials.

9. Conduct formative evaluation to obtain SNAP-Ed pariticipant perspectives and use this information to improve SNAP-Ed programming.

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

NPI's work includes formative, process, and outcome evaluation.

c. **Questions:**

d. **Evaluation:** N/A

e. **Use of SNAP-Ed Evaluation Framework:**

ST3, MT1, MT3, LT2 though LT8.

4. **Coordination Efforts**

N/A

1	Salaries/Benefits	$2,000,000	$1,959,112	$302,363	-84.57%
2	Non-Capital Equipment/Supplies		$7,307	$5,693	-22.09%
3	Materials		$44,650	$46,100	3.25%
4	Travel		$58,481	$67,003	14.57%
5	Building/Space		$75,971	$109,968	44.75%
6	Maintenance		$4,171	$0	-100.00%
7	Equipment and Other Capital Expenditures		$0	$0	
8	Contracts/Sub-Grants/ Agreements**		$494,500	$131,000	-73.51%
	Total Direct Costs:	**$2,000,000**	**$2,644,192**	**$662,127**	-74.96%
9	Indirect Costs*** Indirect Cost Rate= 26%		$592,337	$663,561	12.02%
	Total Federal Funds	**$2,000,000**	**$3,236,529**	**$1,325,688**	-59.04%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	The increase in salaries is to accommodate an increase in workload and personnel as well as to accommodate an increase in UC salary and benefit rates. The NPI team will deliver additional evaluation activities, including evaluation of special projects and a focus on better understanding the LHD interventions and related outcomes, as well as feeding information back to LHDs and other LIAs to improve programs. The NPI team is providing leadership to the CA statewide evaluation workgroup and will continue to work closely with all SIAs and LIAs to continuously improve SNAP-Ed evaluation in California.
2	Non-Capital Equipment/Supplies	The decrease in supplies from FFY 17 to FFY 18 is due to the removal of computers, and the addition of office supplies for studies.
3	Materials	N/A, roughly equivalent
4	Travel	An increase in in-state local travel to include travel to county health departments
5	Building/Space	Rent costs have been recalculated per a UC-approved project space rate.
6	Maintenance	Phone charges have been removed from this category. They are included in our project space rate udner Building/Space..
7	Equipment and Other Capital Expenditures	N/A
8	Contracts/Sub-Grants/ Agreements**	Removing consulting and adding LHD evaluation support.
9	Indirect Costs	Overall budget is higher than last year.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

As of July 25, 2017
NPI FFY 2018 Budget Justification

Personnel

Patricia Crawford. Principal Investigator. Effort: 25%. As Principal Investigator, responsible for overall scientific rigor of all activities and management of the program.

Kenneth Hecht. Director. Effort: 75%. **Updated justification for Director**
Reporting to the Principal Investigator, the Program Director is responsible for planning and implementation of NPI's NEOP scope of work. Ensures close coordination with CDPH goals and objectives by maintaining regular contact with CDPH leadership. Represents NPI in communications and joint undertakings with USDA, CDSS, and the State Implementing Agencies. In collaboration with CDPH NEOPB RES Chief and NPI Principal Investigator, plans and sets scientific direction, IRB protocols, data systems, analysis, reports and overall coordination. Oversees and responsible for recruitment, selection, supervision, and evaluation of NEOP personnel. Oversees and responsible for budgeting, expenditures, fiscal integrity, and quarterly and annual reporting. Oversees and responsible for completion of Annual Plan and Final Report to USDA. Develops funding proposals as needed.

Gail Woodward-Lopez. Associate Director. Effort: 100%. Directs the CHANGES surveillance and program evaluation study, supervises staff and coordinating all aspects of evaluation work, represents NPI on the Evaluation Working Group and ensures findings are shared regularly with stakeholders.

Karen Webb. Technical Knowledge Expert. Effort: 60%. Advisor on study design, research methods & tools, and systems for population surveillance and evaluation of outcomes re nutrition physical activity and obesity.

TBD. Population Surveillance Specialist. Effort: 100%. Manages all aspects of population surveillance, including system design, research methods and protocols for nutrition, physical activity and obesity related outcomes; managing subcontracts and QA/QC for data collection and analysis, and regular reporting of population prevalence and trends in outcomes of interest.

TBD. Epidemiologist. Effort: 100%. Develops and conducts complex population based sampling and perform appropriate statistical analyses for cross sectional and longitudinal research and evaluation studies for NEOP.

Alexis Narodovich. Specialist EARS. Effort: 20%. Co-manages the Activity Tracking Form (ATF), including tracking process evaluation, assisting with user accounts, passwords, and technical assistance. Additional duties include updating the ATF instructions and supporting documents, webinar-based training, creating customized Unduplicated Count Forms for each contractor, and working in conjunction with CDPH IT to update the ATF in accordance with USDA reporting requirements.

Evan Talmage. Associate Specialist EARS. Effort: 100%. Administers Activity Tracking Form data collection and produces USDA EARS report. Gives technical assistance across a broad range of products to internal and external staff.

Amanda Linares. Behavioral Specialist. Effort: 60%. Provides evaluation direction and support to local health departments (LHDs) evaluating nutrition education interventions. Uses the impact/outcome data provided by LHDs to report to our funder and disseminate findings.

Carolyn Rider. Behavioral Specialist. Effort: 100%. Provides evaluation direction and support to local health departments (LHDs) evaluating nutrition education interventions. Disseminates research findings and contribute evaluation expertise to internal and external committees and working groups.

Jaime Adler. LHD Evaluator. Effort: 100%. Works with LHDs on process evaluation, qualitative studies and case studies; helps with community variable analysis and data collection for CHANGES.

Elizabeth Egelski. Specialist LHD Evaluator. Effort: 100%. LHD Liaison and study logistics for NEOP evaluation studies and population surveillance.

Betty Sun. Specialist LHD Evaluator. Effort: 100%. Provides evaluation direction, training and support to local health departments (LHDs); analyzed LHD data and develops materials and methods for feeding back information to LHDs and assists with reporting requirements.

Heena Shah. Qualitative Specialist. Effort: 60%. Heena will continue to lead design and implementation of qualitative methods for the NEOP unit. She will direct the Participant Voices project, producing a manuscript sharing focus group findings and conducting data collection capturing SNAP-Ed participants' intervention priorities using an adapted NIH tool.

Sara Brizendine. Contracts and Grants Analyst. Effort: 50%. Processes Budget Adjustment Requests and other rebudget requirements. Reviews expenditures for project to remain in compliance with sponsor and UC policies, and to remain within the budget line items. This position is partially supported by the UC facilities and administrative costs.

Anna Martin. Operations Director. Effort: 80%. Works with the PI, Director, Associate Director and Contracts and Grants Analyst to oversee management of resources, ensure all reporting requirements are met, manages LHD evaluation work and staff, and contributes to evaluation activities.

Phoebe Harpainter. Evaluator. Effort: 50%. Contributes to evaluation activities, literature reviews and data collection.

Janice Kao. PSE Researcher. Effort: 70%. Leads PSE efforts, designs data collection methods and oversees all aspects of collecting, analyzing and using PSE data for reporting, program improvement, sampling methods for CHANGES and sharing results with relevant stakeholders.

Ron Strochlic. Special Projects Evaluator. Effort: 50%. Manages state wide project evaluations, including ensuring IRB applications are prepared, data collectors are trained and scheduled, data are collected and analyzed and reported. Also assists with special projects to contribute to CHANGES.

Wendi Gosliner. Specialist. Effort: 50%. Wendi will provide scientific direction and oversight to select projects, including Participant Voices and analysis of CX3 data. Additionally, Wendi will provide guidance on the overall scientific design and integrity of NPI's SNAP-Ed evaluation activities, including the CHANGES system. Wendi will draft manuscripts and support other efforts to communicate unit findings.

Suzanne Rauzon. Specialist. Effort: 20%. Contributes to CHANGES logistics, creation of systems and program management.

Hallie Randel-Schreiber. Assistant Specialist. Effort: 20%. Assists with research, literature reviews and data collection.

Mark Hudes. Program Analyst. Effort: 40%. Designs sampling frame, analysis plans, power analyses and advises on other statistical design issues, and runs statistical analyses to support program evaluation and CHANGES.

Dan Brown. Statistician. Effort: 50%. Provides statistical technical assistance to all aspects of NEOP evaluation, analyzes data, checks results and provides data tables and summaries.

Sri Hewawitharana. Data Manager. Effort: 100%. Oversees the data management of NEOP studies and surveys and conducts data analyses, prepares reports and publications summarizing and interpreting results. Assists Epidemiologist with study design, data collection tools, and sampling for studies and surveys. Maintains data bases for selected studies and surveys.

Temika Green. Human Resources Specialist. Effort: 40%. Provides support in recruiting and hiring project personnel, and assists with payroll, and other personnel requests. This position is not supported by the UC facilities and administrative costs.

Meirong Liao. Budget/Payroll. Effort: 40%. Provides purchasing and travel support to the project personnel. This position is not supported by the UC facilities and administrative costs.

Heather Kawakami. Business Manager. Effort: 50%. Oversees the administrative staff in HR, Contracts and Grants, travel, and purchasing. Provides backup to all administrative staff, and fills in when project personnel require assistance. This position is partially supported by the UC facilities and administrative costs.

Claudia Olague. Administrative Assistant. Effort: 50%. Provides travel and other administrative support to the project personnel. This position is not supported by the UC facilities and administrative costs.

Shelly Mandel. Program Analyst. Effort: 40%. Advises NEOPB researchers on design/layout of surveys and other data collection tools for efficient data entry/analyses. Oversees data entry, maintains data bases, conducts QA/QC checks and preliminary descriptive analyses on selected studies.

Fringe Benefits.
Benefits cover medical, dental, and vision coverage, social security, OSDI/Medicare, worker's compensation, unemployment insurance, retirement benefits, and vacation accrual. Benefit rates are set by the University of California, and are available at http://ucanr.edu/sites/anrstaff/files/210269.xlsx.

Benefits are calculated at 42.6% for academic personnel, 54.9% for staff personnel, and 64.4% for program personnel.

1. State Agency Goals and Objectives

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. **Description of projects/interventions. The following information should be provided:**

Project Title	**Information and Communications -** Warehouse, Web-based Ordering, Fulfillment, Graphic Design, Translation, Video, Photography, Print and Production Services, Curricula List **Budget:** **FFY 2017 $2,079,000**; **FFY 2018 $1,500,000** (FFY 2018 Allocation: $1,455,300 and FFY 2017 Carry-In: $44,700); **FFY 2019 $1,500,000**

a. Related State Objectives

Through September 30, 2019, provide comprehensive warehouse, fulfillment and web-based online ordering services for the California Department of Public Health (CDPH) materials and resources for up to 150 local agencies conducting Supplemental Nutrition Assistance Program-Education (SNAP-Ed) funded interventions.

Through September 30, 2019, update the content of up to 30 materials to reflect the latest Americans with Disabilities Act (ADA) compliance for electronic files, Dietary Guidelines, physical activity recommendations, policy, systems and environmental (PSE) change strategies, applicable research, and approved logos and funder statements.

CDPH resources will continue to be available through the Web StoreFront and Public Web StoreFront while ADA remediation is underway. CDPH is planning a phased-in approach to transforming all of its publications into ADA-compliant resources. CDPH is realistic in knowing that creating ADA compliant publications takes time and funding. CDPH plans to make all new documents ADA compliant during the development phase. In addition, CDPH plans to remediate 1/3 of its existing resources every federal fiscal year over the next three years so that by the end of FFY 2020, all existing resources are ADA compliant.

By September 30, 2019, reprint and/or produce a minimum of five materials/resources that either replenish CDPH's inventory of materials for state implementing agencies (SIAs) and local implementing agencies (LIAs) and/or represent newly approved materials that fill a gap in CDPH and the United States Department of Agriculture's (USDA) approved resources for SNAP-Ed eligible consumers and/or intermediaries.

b. Audience

Audiences are described as the following:

SNAP-Ed eligible at or below 185% Federal Poverty Level throughout California

- **Gender:** Female and Male
- **Ethnicity:** All races and ethnicities with specific targeting for African American, Latino and Asian communities.
- **Ages:** Adults 18+, primarily women with children, and children ages 5–17 years old.

An additional target audience includes intermediaries, including SNAP-Ed funded SIAs and LIAs that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in CalFresh and/or are CalFresh eligible.

c. Food and Activity Environments

Resources and materials that are printed, produced and disseminated by CDPH are developed either for SNAP-Ed eligible consumers or intermediaries targeting the SNAP-Ed audience in the following settings: Local Health Departments (LHDs), Offices of Education, Preschools, Schools, Afterschool Programs, Retail, Farmers' Markets, Parks, Community-based Organizations, Faith-based Organizations, Food Banks, Area Agencies on Aging, Health Clinics, Worksites, Media Outlets and other applicable sites. The materials enhance SIA and LIA interventions and provide educational messages that can support PSE change interventions.

d. Project Description for Educational Strategies

Management of CDPH materials is provided by program and administrative staff that support the process of development, translation, testing, production, warehousing, and fulfillment of the resources. The materials are disseminated to up to 150 SIA-funded agencies through a web-based online ordering system. Materials are also disseminated to non-CDPH- or non-LIA/SIA-funded agencies that work with the SNAP-Ed eligible consumer.

CDPH aims to increase the reach, frequency and use of appropriate materials during FFY 2017–2019. The CDPH's educational messages are built around MyPlate and objectives of CDPH and California SNAP-Ed, which are in support of the USDA-approved messages.

During FFY 2017–2019, the CDPH will work with the Office of State Publishing (OSP) to provide the following services:

- **Warehouse and Fulfillment Services**
  The OSP will provide comprehensive warehouse, fulfillment and web-based online ordering services for materials and resources for up to 150 SIAs and LIAs conducting SNAP-Ed interventions and partners working with the SNAP-Ed eligible target audience. Over the course of this three-year work plan, the CDPH will work to minimize storage costs by phasing out outdated materials and making more available online via PDF for download.

- **Online Ordering System and Access to Materials**
  The OSP will maintain the customized Web StoreFront, which features over 106 different materials and resources for use with the SNAP-Ed eligible population. The Web StoreFront allows SIA and LIA users to order materials ranging from cookbooks to toolkits and brochures. These resources are shipped to the appropriate agency per the users' requests.

  The CDPH will refine another online ordering system that allows partners that open an account with OSP to purchase materials at cost since the CDPH Web StoreFront is accessible only to SIAs and LIAs and not available to other partners working with the SNAP-Ed eligible population.

  In FFY 2017, CDPH will post one third of its most used materials on the CDPH website for free download by key intermediaries such as community groups and clinics that do not have access to the online ordering systems. By FFY 2018, the next third most popular materials will be posted on the CDPH website and by FFY 2019, all of CDPH's Top 100 materials will be posted on the CDPH website.

- **Printing/Production**

  During FFY 2017–2019, the OSP will reprint/produce a minimum of five materials to support the SNAP-Ed funded interventions of up to 150 SIAs and LIAs. To the extent possible, CDPH will offer more downloadable materials/resources in an effort to reduce printing/production costs.

- **Translation Services**

  The OSP provides certified translators that are recognized and approved by any Superior Court in the State of California and U.S. District Court and/or are certified by the American Translators Association. This service allows CDPH to tap into OSP's Spanish-language translators to review CDPH translations conducted in-house, thus providing a second review of translated materials. Conversely, CDPH has the option to ask OSP's translation subcontractor to conduct the initial translation of a material into Spanish and then CDPH in-house staff will review and provide feedback on OSP's translation.

  The OSP can also support the translation of materials into the following languages: Arabic, Armenian, Cambodian, Chinese, Farsi, French, German, Hebrew, Hindi, Hmong, Italian, Japanese, Khmer, Korean, Lao, Portuguese, Punjabi, Romanian, Russian, Samoan, Spanish, Tagalog, Thai, and Vietnamese. When CDPH does not have the in-house staff to either review or develop materials in languages other than Spanish, then it refers translation projects to the OSP and makes arrangements for a review of that translation with culturally- and linguistically-competent LHD staff and/or partners/subcontractors who speak and write in that language. Conversely, sometimes a LHD will develop a material in a language that fills a gap that neither the CDPH, USDA nor others have met. In that case, CDPH utilizes the services of OSP to review the translation.

- **California SNAP-Ed Integrated Curricula List**

  The CDPH has taken on the responsibility of collecting updates from SIAs on the integrated curricula list, making the edits to the list and sending it out to all SIAs for review and feedback before it is posted online.

e. Project Description for Marketing Strategies

The Information and Communications Section markets the CDPH resources to SIAs, LIAs and SNAP-Ed eligible consumers in a number of different ways, including through:

- Email blasts to all SIA and LIA Web StoreFront users on new materials, tips on ordering materials, and offers of technical support.
- Trainings and technical assistance on resources and the CDPH Web StoreFront for all SIA and LIAs.
- Project Officers, who help LHD staff identify which resources may support their interventions.
- A LHD e-newsletter disseminated twice a month that features updates on resources while also alerting local agency staff of other key information. This newsletter is also shared with SIA leadership so they can in turn, share that out with their LIAs as applicable.
- The media that SNAP-Ed eligible consumers utilize (e.g., Facebook, radio).
- Special events targeting SNAP-Ed eligible consumers.

f. Evidence Base

All of the curricula included on the California SNAP-Ed Integrated Curricula List are either research-tested, practice-tested, or emerging. Please see the list posted at http://www.cdph.ca.gov/programs/NEOPB/Pages/ApprovedSNAP-EdMaterials.aspx for the evidence-based designation.

g. Policy, Systems, and Environmental Changes

The CDPH has directed its SNAP-Ed funded LHDs to utilize direct and/or indirect education as a support for moving PSE change objectives forward. The CDPH materials and resources were developed to support interventions conducted at the local level. The CDPH will select and/or develop materials and resources based on whether they support appropriate PSE change efforts.

h. Use of Existing Educational Materials

In FFY 2016, CDPH eliminated annual allocations of materials for SIAs and LIAs. This new process allows SIAs and LIAs to order materials to meet their intervention needs. CDPH will continue to monitor the usage data from the OSP warehouse and fulfillment centers to make adjustments as necessary to printing and inventory.

i. Development of New Educational Materials

During FFY 2017–2019, CDPH will reprint existing resources to replenish its inventory and/or develop new resources as needed to support the integrated work plans of LIAs. Such materials may include the following:

- Low literacy healthy eating curricula
- Physical Activity (PA) resources
- Retail materials
- Harvest of the Month updated curricula
- Be Better Posters
- Faith-based Resources

j. Key Performance Measures/Indicators

Key performance measures will include improvements in knowledge and self-efficacy and increases in the key SNAP-Ed recommended behavioral outcomes per CDPH's State level goals and objectives: increase in consumption of and access to healthy foods and beverages, increase in PA rates, decrease in sedentary behaviors, increase in environmental supports for nutrition education and/or PA, and increase in food resource management skills.

3. Evaluation Plans

CDPH's Information and Communications Section staff reviews and oversees the materials that are developed to support SNAP-Ed interventions and partners who work with the SNAP-Ed eligible population. CDPH will evaluate the appropriateness of all materials and ensure adherence to the most current USDA SNAP-Ed Guidance, *USDA-FNS SNAP-Ed Evaluation Framework*, the CDPH program priorities, and print and graphics standards.

Distribution and quantities of materials ordered by all SIAs and LIAs will be tracked through the online ordering system. Monthly usage data from the online ordering system will be reviewed and used to determine future material needs. Additionally, assessments of the LIA integrated work plans will inform future material needs.

4. Coordination Efforts

a. Work with all California SNAP-Ed SIAs and LIAs to offer, store, and distribute materials produced by CDPH and/or non-funded programs including USDA and other appropriate entities to reduce duplication and redundancy in materials development.
b. Coordinate efforts for use and sharing of educational materials between all SIAs and LIAs.
c. Submit materials to the USDA National Agriculture Library and SNAP-Ed Connection.
d. Update and maintain CDPH Communication Resources Library and Photo Libraries.

.

FFY 2018 SNAP-Ed Budget

Organization Name:	California Department of Public Health

Rev. 10/9/2017

Template 2 SNAP-Ed State Goals, Objectives, Projects, Campaigns, Evaluation and Collaboration

7 CFR 272.2 (d)(2)(i) OMB No. 0584-0083

1. State Agency Goals and Objectives

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions:

Project Title SNAP-Ed Service Model

a. Related State Objectives

The purpose of the project is to provide technical assistance, training and oversight to the local health departments for the implementation of SNAP-Ed and to work toward accomplishment of State goals 1,2,4,5.

Annually by September 30 of each year (FFY 17-19), California Department of Public Health will fund and provide technical assistance to 60 local health departments to provide SNAP-Ed as described in the integrated work plans. Technical Assistance will align with and mirror the IWP's which show progression each year.

Annually by September 30 of each year (FFY 17-19), California Department of Public Health will conduct a review of civil rights training certificates for 100% of the health departments delivering SNAP-Ed.

Annually by September 30 of each year (FFY 17-19), California Department of Public Health will conduct program orientation to all new local health department SNAP-Ed project directors within the first 6 months of assuming their position.

Bi-annually by May 1 for mid-year and November 1 for end of year reports in each Federal Fiscal Year 17-19, Project Officers will review 100% of the Local Health Department progress reports to include mid- year reports and end of year reports. All progress reports will list the methods used by local health departments to promote their SNAP-Ed activities to SNAP eligibles.

By September 30, 2017 the desk manual will be updated. By September 30, 2018 the Program Guidance will be updated and by September 30, 2019 the Desk Manual and Program Guidance will be reviewed to ensure they still meet the needs of the users and revised accordingly and to meet any changes in SNAP-Ed Guidance.

By September 30, 2019, Project Officers will participate on a minimum of one cross section or one cross branch work group for improved technical assistance and training to the local SNAP-Ed agencies.

Annually by September 30 of each year (FFY 17-19), Project Officers will conduct a minimum of one site visit to Local Health Departments with funding levels at or below one million dollars and two site visits to Local Health Departments funded above one million dollars based on the FFY 2018 funding levels. The site visit reports will include verification of quality of direct education (curriculum fidelity) and other interventions observed during the site visit, progress of integrated work plan activities, and verification that interventions observed are in compliance with SNAP-Ed Guidance.

Annually by September 30 of each year (FFY 17-19), Project Officers will verify that all Local Health Departments working in the area of breastfeeding promotion using SNAP-Ed funding have a memorandum of understanding or letter of agreement with their local WIC program(s) on file.

b. Audience

Social marketing, nutrition education (indirect and direct) and physical activity promotions conducted are for the benefit of individuals, families, and communities at or below 185% FPL. Training and technical assistance services and support for LHD grantees and their subcontractors will improve effectiveness of interventions reaching this population and these communities. Audiences are described as the following:

SNAP-Ed eligible at or below 185% FPL throughout California

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Latino and Asian communities.

Ages: Adults 18+, primarily women with children, and children ages 3- 17 years with concentrated efforts aimed at young adolescents ages 9- 11 years.

Local Health Department Grantees and their subcontractors provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in CalFresh and CalFresh eligible at 185% or below of the FPL.

c. Food and Activity Environments

Local Health Department (LHD) support activities will increase the capacity to provide services to the SNAP-Ed audiences at the community level and through evidenced based strategies and interventions. SNAP-Ed services will be provided in an integrated fashion and in a manner to integrate multiple complimentary approaches and when applicable, with other local SNAP-Ed implementing agencies. When applicable, consultation and coordination will occur with other food and nutrition service agencies such as WIC or school food service to avoid duplication and to coordinate messages. SNAP-Ed services will align with the Dietary Guidelines for Americans.

d. Project Description for Educational Strategies

This project describes CDPH's efforts to support SNAP-Ed services at the local level through a local health department model. This project summary also describes the efforts of the Local Agency Support staff in providing the first line of contact for the local health departments. The Local Agency Support Section is composed of Project Officers who have direct LHD assignments and provide day to day technical assistance, support and training for the local health departments over the three years. The Project Officers coordinate and collaborate with other sections in CDPH to communicate, consult, and foster linkages for support and training. Local Agency Support activities are geared to meet the needs of the LHD to execute SNAP-Ed according to USDA Guidance and within their approved three year integrated work plan (IWP). The budget for the Local Agency Support staff and related travel is included in the CDPH personnel and travel budget. The Local Health Departments are allowed to award subcontracts to non-profit, education, and/or governmental agencies, through a competitive process when they identify the need for their agency

in order to complete their approved SNAP-Ed work. State-level supports include: 1) policy and partnership development; 2) evaluation; 3) media and materials; and 4) technical assistance and training. For local level efforts, CDPH ensures urban and rural State reach, with an emphasis on population-based, public health approaches that advance program priorities and strategies. CDPH is committed to using a two-pronged approach for reaching the target population: 1) strengthening the local public health department infrastructure by using a population-based approach for awarding funds; and 2) awarding contracts to non-profit, education, and/or governmental agencies, through a competitive process. While local-level efforts are emphasized, CDPH supports regional infrastructure activities, in the following areas: 1) coordinating regional media efforts; 2) disseminating promising practices; 3) tackling regional issues (e.g., food systems, transportation); and 4) facilitating regional collaboratives/trainings. The Local Agency Support Section and Training Development and Support Section provide leadership, training, and technical assistance to California's local health departments, partners, and contractors with a focus on building community capacity to implement programs, policies, and environmental support that reinforce healthy eating and physical activity, including allowable activities with SNAP-Ed funds. Staff within these sections are responsible for reviewing and approving work plans and budgets; and for providing leadership and coordination efforts for statewide meetings, and forums. The activities of both sections are integrated with other programs and projects within CDPH.
Local Health Departments will continue to promote the Dietary Guidelines for Americans. They will implement interventions in targeted settings to foster a "dose" effect as outlined in the Portfolio Guidance and reflected throughout the three year integrated work plans developed in partnership and coordination with other local implementing agencies located in their health jurisdiction. The projected number of participants reached as well as key educational messages are designated on each county's three year integrated work plan.

e. Evidence Base

All materials used will be evidence-based and tested with the target audience.

f. Policy, Systems, and Environmental Changes

Policy, Partnership and Program Development Section, in addition to Local Agency Support Section and Training Development and Support Section provides leadership, training, technical assistance in areas of nutrition education, curriculum, community engagement, and policy, systems, and environmental supports. Section staff facilitate relationships with public and private partnerships, stakeholders, and advisory bodies, and convene statewide meetings. Specific strategies conducted by local health departments are shown in each county three year integrated work plan. The SNAP-Ed Strategies & Interventions: An Obesity Prevention Toolkit for States, January 2016 Update is used as the reference. A Portfolio document is used as a guide for writing the three year integrated work plan and it includes policy, systems and environmental change strategies. Local health departments also maintain County Nutrition Action Plans and/or coalitions/partnerships for the purpose of addressing community issues that impact the SNAP population and to build synergy when implementing interventions.

g. Use of Existing Educational Materials

See individual county integrated work plans for the list of educational materials used at the local level. In addition, current materials used to educate local health department staff include a civil rights training module, program and fiscal orientation/training and a variety of trainings offered through CDPH that are described in the Training and Technical Assistance Project Summary.

h. Development of New Educational Materials

During the first year, Local Agency Support Section will review and assess the manuals and tools used for local support and update and expand the current support materials over three years. Manuals and tools include the Desk Manual, Program Guidance Manual, site visit report forms, progress report forms. Local Agency Support Section will also contribute articles to a monthly newsletter to communicate to the local health departments over the three years.

i. Key Performance Measures/Indicators (kpi)

See Project Summary for State Level Evaluation Health Department Driven SNAP-Ed Projects (Evaluation). Key performance measures will include improvements in knowledge and self-efficacy and increases in the key SNAP-Ed recommended behavioral outcomes per CDPH's State level goals and objectives: increase in consumption of and access to healthy foods and beverages, increase in physical activity rates, decrease in sedentary behaviors, increase in environmental supports for nutrition education and/or physical activity, and increase in food resource management skills. In addition, annually by September 30 of each year (FFY 17-19), CDPH will fund and provide technical assistance to 60 local health departments to provide SNAP-Ed as described in the integrated work plans. Annually by September 30 of each year (FFY 17-19), CDPH will conduct a review of civil rights training certificates for 100% of the health departments delivering SNAP-Ed. Annually by September 30 of each year (FFY 17-19), CDPH will conduct program orientation to all new local health department SNAP-Ed project directors within the first 6 months of assuming their position. Bi-annually in each Federal Fiscal Year 17-19, Project Officers will review 100% of the Local Health Department progress reports to include mid- year reports and end of year reports. All progress reports will list the methods used by local health departments to promote their SNAP-Ed activities to SNAP eligibles. By September 30, 2019, Project Officers will update/revise the Desk Manual and Program Guidance Manual. By September 30, 2019, Project Officers will participate on a minimum of one cross sectional or one cross branch work group for improved technical assistance and training to the local SNAP-Ed agencies. Annually by September 30 of each year (FFY 17-19), Project Officers will conduct a minimum of one site visit to Local Health Departments with funding levels at or below one million dollars and two site visits to Local Health Departments funded above one million dollars based on the FFY 2018 funding levels. The site visit reports will include verification of quality of direct education (curriculum fidelity) and other interventions observed during the site visit, progress of integrated work plan activities, and verification that interventions observed are in compliance with SNAP-Ed Guidance. Annually by September 30 of each year (FFY 17-19), Project Officers will verify that all Local Health Departments working in the area of breastfeeding promotion using SNAP-Ed funding have a memorandum of understanding or letter of

agreement with their local WIC program(s) on file. These are a mixture of continuing and new performance measures.

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation;

See individual county three year integrated work plans for the list of evaluations which are supported by the State through technical assistance. Local agency support efforts will be evaluated through customer service surveys, site visits, phone and e-mail contact during each year.

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

The types of evaluations conducted are Process Evaluation using the Activity Tracking Form to enter the USDA Education and Administrative Reporting System information (EARS). CX3 will be conducted as a program planning framework. Impact Outcome Evaluation (IOE) for LHD's with a base funding of $350,000 or greater. RE-AIM for assessing progress toward implementing PSEs that support nutrition education and social marketing/promotion efforts. CDPH conducts research and evaluation studies at both the state-level and local-level to support the Socio-Ecological Model referenced in the *USDA Western Region's SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes*. CDPH staff provides training and technical assistance to local implementing agencies to support evaluation efforts. Training opportunities from CDPH on evaluation methodologies are made available to all local implementing agencies, specifically pertaining to policy, systems, and environmental change, and the "RE-AIM" framework (Reach, Effectiveness, Adoption, Implementation, and Maintenance).Short, intermediate, and long-term outcomes are identified for nutrition education and obesity prevention work in California throughCDPH. Project officers will evaluate the local health department's capacity through site visits, frequent phone contact and e-mail contact. In addition, they review the project director's ability to write an effective integrated work plan and execute their work plans within the USDA SNAP-Ed Guidance and to assess the need for training and technical assistance. The Project Officers also assess the LHD's capacity for evaluation during technical assistance calls specifically for evaluation in conjunction with the CDPH research and evaluation unit.

c. **Questions:**

See the **State Level Evaluation Health Department Driven SNAP-Ed Projects (Evaluation)** for details.

d. **Evaluation:** if the project has been evaluated previously, note the most recent year in which the evaluation was done.

Evaluation is conducted each year with 2016 as the most recent.

e. **Use of SNAP-Ed Evaluation Framework:** identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

See State Level Evaluation Health Department Driven SNAP-Ed Projects (Evaluation)

for the Evaluation Framework indicators.

4. Coordination Efforts

Extensive coordination and collaboration for CDPH training and technical assistance occurs internally and externally of the CDPH State level organization. State leadership among the State SNAP-Ed funded agencies will continue to meet at California Department of Social Services at 2.0 meetings on a regular basis over the three year period to discuss issues, coordinate and collaborate to maximize resources and prevent duplication. Local Agency Support will continue to use the three-year integrated work plan and site lists to insure LHDs and other local implementing agencies are not providing direct education at the same site and that additional interventions at each site complement and enhance other interventions. Information provided by LHDs helps inform training and technical assistance. Monthly conference calls will be conducted over the three year period for local health departments to keep updated to current issues, trainings, and to solicit feedback on operational issues. Partnership meetings will be conducted over the three year period to coordinate and improve the delivery of SNAP-Ed and increase obesity prevention efforts. When applicable written MOU's and/or Letters of Agreement will be obtained.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management.

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions. The following information should be provided:

Project Title State-Level Projects

a. Related State Objectives 1, 2, 4 & 5

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

CDPH will continue activities that: develop, pilot, and/or expand promising practices for new avenues and/or messages for nutrition education; create and sustain partnerships to leverage and extend SNAP-Ed resources and message reach; develop policy, systems and environmental change tools and/or resources; support development of trainings, and provide technical assistance to local health departments (LHDs) and partners implementing SNAP-Ed programs where appropriate.

By September 30, 2019 plan, pilot and evaluate 3-5 new obesity prevention interventions or modify existing approaches for an expanded target audience.

By September 30, 2019 provide technical assistance and support for up to 40 local CNAP coordinators to facilitate and solidify county-level obesity prevention partnerships.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

- Social marketing, policy, systems and environmental change efforts, nutrition education (indirect and direct) and physical activity promotions conducted through SNAP funding are for the benefit of individuals, families, and communities at or below 185% FPL. Training and technical assistance services and support for LHD grantees, state-level partners, and their respective subcontractors will improve effectiveness of interventions reaching this population and these communities. Audiences are described as the following:

- SNAP-Ed eligible at or below 185% FPL throughout California
    - Gender: Female and Male
    - Ethnicity: All races and ethnicities with specific targeting for African American, Latino, Native American, and Asian communities.
    - Ages: Adults 18+, primarily women with children, and children ages 3-17 years.

- Local Health Department Grantees, state-level partners and their respective subcontractors that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in CalFresh and CalFresh eligible at 185% or below of the FPL.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

Interventions will occur in SNAP-Ed qualifying census tracts, census blocks and/or other qualifying locations such as schools/preschools/afterschool, institutions of faith, retail outlets, worksites, emergency food outlets, community and/or school-based health clinics, community-based organizations, and other qualifying sites as funding becomes available. Interventions are built around direct education and in most cases contain programmatic elements across the Social Ecological Model.

d. Project Description for Educational Strategies

Note how you will implement the project: how and where it will be delivered, its duration, the projected number of participants, the frequency of contacts (number of classes, mailings, billboards, etc.), and key educational messages.

<u>Partnership Plan Implementation (FY 17-19)</u>
Objective 1: Partnership Plan: By June 21, 2017, provide strategic counsel and technical assistance to 2-3 CDPH partnership lead staff, up to 10 Local Health Departments (LHDs), and up to 10 relevant partners to support the implementation of a statewide, strategic Partnership Plan.

Objective 2: County-level Partnerships: By June 21, 2017, provide strategic counsel, technical assistance, and 2-4 trainings to up to 15 county-level partnership groups (including county nutrition action plan (CNAP) groups) statewide.

Objective 3: Multi-County Partnerships: By June 21, 2017, provide strategic counsel, technical assistance, and 1-2 trainings to support LHDs and relevant partners engaging in 1-2 multi-county coalition/collaborative policy, systems, and environmental (PSE) change efforts to benefit SNAP-Ed eligible residents.

Objective 4: Public Hospital and Public Health Care System Connection: By September 30, 2019, provide facilitation, technical assistance, and training to CDPH staff, LHDs, public hospitals, and relevant partners to support the CDPH and DHCS partnership.

Greater integration of public health and primary care delivery is a logical and strategic approach to increasing the reach and impact of nutrition education outreach with target populations. While both entities work toward health, integration of efforts is not the norm. However, new funding mechanisms, including the Medi-Cal 2020 Waiver (PRIME), are opening doors for greater public health and primary care integration. To achieve this, however, introductions, trust, and opportunities need to be presented to both public hospitals and county health departments.

This will require research, facilitated meetings and technical support. It will be essential that professionals with experience working with both public health and primary care provide professional support in partnership development, collaboration and communications to facilitate these potential burgeoning partnerships and ensure the successful launch of the CDPH Partnership Plan.

This project will build on activities initiated late in FFY 15 via a June amendment, continuing to provide partnership-focused training and technical assistance to health care partners, CNAPs, multi-county collaboratives, and other CDPH partners to help advance their respective SNAP-Ed PSE efforts and to strengthen the foundation of their partnerships. In partnership, CDPH, key public hospitals and local health department contractors will facilitate integration and ensure the successful delivery of nutrition education to community members. Because public hospitals and CDPH share the same SNAP-Ed eligible audience, this is an ideal system change that would allow public hospitals to address their prevention goals, while furthering CDPH's information and education efforts. County CNAP priorities and membership will inform, guide, and support State level partnership efforts; these state-level partnerships, in turn, will leverage resources for implementing activities in support of the CDPH strategic plan by cultivating short-term and mid-range partnership projects that support obesity prevention and leverage the collective efforts of organizations. Activities will be provided in an ongoing basis through in-person regional trainings, complemented with telephone/online technical assistance and training opportunities. Services are available to all SNAP-Ed funded local health departments and county CNAP leaders. Key messages include partnership building, strategic planning for PSE approaches to SNAP-Ed work, and collaborative building and maintenance. (See Brown Miller Communications for FFY 17 and TBD Partnership Plan Budget for FFY 2018 & 19.)

<u>Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)</u>

Objective 1: By May 31, 2017, develop three Potter the Otter lessons for preschool-aged children: Healthy Beverages, Healthy Eating, and Physical Activity; accompanied by a teaching guide discussing how to implement the lessons, as well as ECE PSE supports to help reinforce and extend the impact of the lessons. Develop activity sheets/coloring sheets to extend messages from the Picnic Day and Market books.

Objective 2: By May 31, 2018, instruct 5-7 ECE teachers and their students using the new Potter the Otter materials in a pilot; document results; and revise materials based on evaluations and data results.

Building on the statewide recognition of Potter the Otter books for California preschoolers, CDPH will contract with the Alameda County Office of Education (ACOE) to develop an accompanying education support materials: three lessons for preschool-aged children: Healthy Beverages, Healthy Eating, and Physical Activity; a teaching guide; and an early care and education (ECE) policy, systems, and environmental (PSE) change support suggestions to help reinforce and extend the impact of the lessons. Additional materials may include activity sheets to extend and

reinforce messages from the Potter the Otter books and lessons. The materials will be Common Core-based. ACOE will pilot test use of lessons, activity sheets, and Potter Books as a unit in the ECE environment of 5-7 classrooms. (See Alameda County Office of Education Budget.)

Early Care and Education: PSE Primer: (FY 18)

Objective 1: By September 30, 2018, research and develop a comprehensive document describing programs and policies that comprise and/or influence California's early care and education (ECE) environments (family day care homes, child care centers, preschools, Head Start, etc.) with a focus on nutrition and physical activity and key opportunities for relevant policy, systems, and environmental change activities.

This primer will serve as a collection of programs and policies that comprise and/or influence California's early care and education (ECE) environments (family day care homes, child care centers, preschools, Head Start, etc.) with a focus on nutrition and physical activity. The primer will present the ECE landscape and identify key opportunities for PSE work. Key topics include, but are not limited to: State and county-level snap-shots of California's children (standard of living, ECE participation, obesity/overweight, food security, CalFresh participation, etc.); Understanding the ECE Environment; Achieving Healthy ECE Environments through policy, systems and environmental (PSE) change, Government's role in ECE environments (Federal, State, and Local); Key Issues, and Key Players. The primer will be accompanied by a webinar discussing its key elements and applicability to PSE efforts. This primer will support Local Health Departments as they work with ECE providers to advance sustainable supports for healthy eating and active play. The completed primer will be available online on the CDPH website, shared with partners through list-serves, and promoted on partnership with CDPH's CDC funded Prevention First State-level ECE working group. (See CDPH Staffing Budget and UC San Francisco ECE Primer budget).

Office of Farm to Fork: (FY 17-19)

Objective 1: By September 30, 2018, engage stakeholders and complete the transition the California Farm to School Network (CAF2SN) to CDFA leadership.

Objective 2: Create a transition plan for the CAF2SN by September 2017.

Objective 3: By September 30, 2019 convene routine meetings with stakeholders, update and maintain the CAF2SN website, and share information on farm to school programs, school gardens, and nutrition education in schools.

Objective 4: By September 30, 2018 conduct key informant interviews with targeted partners to identify opportunities and barriers to increase access to and distribution of fresh fruits and vegetables by California Food Banks and their customers (year 1);

document, release, distribute and train on recommendations and best practices (year 2).

Objective 5: By September 30, 2019 annually conduct 1-2 trainings for, and participate in 1-2 meetings and/or conferences that reach local health departments and community partners to showcase promising practices that promote increased food access through improved sourcing and/or distribution systems, food policy councils, as well as partnership with food banks. Provide associated technical assistance.

Objective 6: By September 30, 2018 continue to grow and expand the technical assistance to up to 10 local health departments on issues relating to farm to fork, food access, and food policy councils, as well as information regarding grants available through USDA to support farmer's markets and healthy corner stores.

Objective 7: By September 30, 2019 expand the marketing and awareness of the online farmer marketplace specific to agencies and organizations within and/or serving SNAP-qualifying locations and audiences by providing at least one presentation and/or training for the online marketplace per year.

Objective 8: By September 30, 2019 foster partnerships and coordination of activities between SNAP-Ed nutrition education and social marketing efforts with four FINI grant partners at Certified Farmers' Markets throughout California.

This project will be implemented by the California Department of Food and Agriculture (CDFA) to strengthen connections between emergency food outlets and local growers in order to promote increased access to healthy foods in underserved California communities, with particular emphasis on procurement, to increase education, access and consumption of fruits and vegetables through Farmers' Markets (CNIP/Market Match), and to increase farm to school programs and nutrition education in schools (the California Farm to School Network). Services will be delivered through a combination of training and technical assistance including: state-level presentations and trainings occurring during SNAP-Ed meetings such as the LIA Forum, the CDPH Project Directors meetings, regional meetings, webinars, and/or the all-LHD calls.

Year 1 will focus on conducting key informant interviews with targeted partners to identify opportunities to facilitate improvements in food systems resulting in increased access to healthy foods.

Year 2 of this grant will focus on broad distribution and training on best practices identified in year 1, as well as the transition of the California Farm to School Network and the development of the California Nutrition Incentive Program.

Year 3 activities will focus on sharing resources and coordinating activities through the California Farm to School Network and promoting access to fresh fruits and vegetables through the California Nutrition Incentive Program.

Throughout each of the three years, training opportunities will be seized as available. Additionally, CDFA will share and showcase previous work-products funded through USDA SNAP-Ed inclusive of the Farmer Market Database.

Harvest of the Month: (FY 17 & FY 18)

Objective 1: By September 30, 2017 finalize pilot test of the Harvest of the Month 4th-6th grade lessons, teacher guide, and student workbooks.

Objective 2: By September 30, 2018 draft, develop, design and pilot a core set of student-focused HOTM lessons (minimum 3) and workbooks (1) for the early childhood education audience.

Building on work begun in FY 16, the Alameda County Office of Education (ACOE) will continue with activities to ensure that Harvest of the Month (HOTM) interventions meet the most current USDA SNAP-Ed direct nutrition education guidelines. ACOE will draft, develop, design, and pilot a core set of student-focused HOTM lesson plans and workbooks for the Early Childhood audience. Materials will be consistent with materials for 4th-6th grades completed during FY 16. The project will also re-test those 4-6th grade materials in 3-5 classrooms to test revisions made following results from the initial pilot that occurred in FY 16. Combined, these activities will build out the HOTM intervention into a more standardized and structured approach for improved fidelity and replicability. Key messages include fruit and vegetable promotion and farm to school. (See Alameda County Office of Education Budget.)

Champion Provider Fellowship: (FY 17-19)

By September 30, 2017 assess current Provider program, plan and implement pilot project expansion, and host one Champion Provider recruitment event.

By September 30, 2019, annually provide facilitation, technical assistance, and 2-4 trainings to CDPH staff, up to 8 LHDs, and/or relevant partners to support the Champion Providers Project.

By September 30, 2019 create linkages between LHD SNAP-Ed staff, local CNAPs, Local Health Officers and Champion Providers by hosting 3-4 convening's annually.

This project, through partnership with the University of California, San Francisco, will create linkages between LHD SNAP-Ed staff, local CNAPs, Local Health Officers and health care and dental providers. By hosting regional workshops, UCSF will bring together local health department SNAP-Ed contractors and with passionate healthcare providers to implement partnership activities across all levels of the social ecological model. As a result of past focus groups, we know that the SNAP-Ed populations identifies strongly with physicians as trusted sources of nutrition education, Additionally, by expanding this project to encompass oral health care professionals, the messages of a healthy diet, and, in particular, healthy beverages can be amplified. The oral health community is a strong proponent of water in place

of sugary drinks, and their support can extend the CDPH Rethink Your Drink Campaign message. This program will build the provider knowledge-base of SNAP-Ed priorities and opportunities, and create a cadre of trained volunteer local healthcare professionals to serve as spokespersons and partners to support SNAP-Ed PSE community change efforts. Champion Providers will be engaged to provide nutrition education and community empowerment messages in support of LIA work plans, CNAP nutrition education initiatives, and/or other community change health initiatives. This project will focus on supporting media and public relations efforts of the counties with volunteer Champion Providers; specific locations and frequency will be determined by local health departments. However, this project will continue to support organized quarterly communication and training opportunities for Champion Providers, LHDs, and CNAPs. The project will reach staff SNAP-Ed staff at each of the Local Health Departments and 40 Champion Providers. (See University of San Francisco Budget.)

Year 1 activities will focus on revising program materials based on feedback from the current cohort of Champion Providers, and, prior to year-end, the project will release recruitment for a second cohort; the program will also work to build connectivity with SIAs, Health Officers, and CNAPs – an effort begun in FFY 16.

Year 2 will focus on on-boarding, training and engaging the new recruits, as well as building relationships between the new recruits and SIA partners, CNAPs, and local health officers; and for those previously engaged strengthening relationships with local health officers, SIA and CNAPs and providing information and education to engage in community PSE work.

Year 3 will continue to provide trainings, technical assistance, and resources, and will focus on showcasing best practices and sharing successes at meetings, trainings and conferences as well as exploring a second provider recruitment event.

Afterschool Interventions: (FY 17-19)

Objective 1: By September 30, 2019, develop, implement, and support the adoption of nutrition and physical activity quality standards in up to 20 after school programs in San Joaquin and Stanislaus County.

Objective 2: By September 30, 2019, engage youth from up to 10 afterschool programs to work to improve the nutrition and physical activity environment in their afterschool programs through piloting the CX3 afterschool tool.

Objective 3: By September 30, 2019 develop 6 best practices training videos for the after-school community to use with program administrators and school leaders in promoting PSE healthy change in the afterschool environment.

Objective 4: By September 30, 2019, provide training and technical assistance to up to 10 qualifying afterschool programs in Sacramento County, with the goal of developing afterschool site mentorship/leadership programs that focuses on

developing youth skills to provide nutrition education and physical activity in afterschool sites.

This project, through a partnership with the Center for Collaborative Solutions (CCS), will increase connectivity between local health departments and the afterschool community to achieve increased access to healthy foods, healthy beverages and physical activity, and to establish the policies and practices that support them. CCS will facilitate regional meetings between after-school organizations and LHDs. These meetings will help facilitate connectivity and engagement of SNAP-Ed resources in the afterschool environment. CCS will provide technical assistance and training to both after-school leaders and local health department SNAP-Ed staff to conduct afterschool site assessment and to achieve the locally-selected PSE strategy. CCS will focus LHD-directed efforts on resources, and promising practices and strategies that enhance nutrition and physical activity PSE supports in after-school programs. CCS will provide training and technical assistance to showcase to LHD partners how the California Department of Education's Distinguished Afterschool Health Recognition Program and Quality Program Improvement Plans can be used to establish local partnerships and be an impetus for change. Senate Bill 949 established the DASH Program to recognize those after school programs in the before, after, or summer school provider community who are meeting exemplary health education, nutrition, and activity standards.

Finally, this project will pilot the Communities of Excellence in Nutrition, Physical Activity and Food Security (CX^3) Afterschool tool in 10 schools that cover a combination of elementary schools and middle schools, with youth as primary surveyors. This project will partner with local health departments, 32 Afterschool Learning Centers, and 10 select after-school programs in SNAP-Ed qualifying schools. (See Center for Collaborative Solutions Budget.) This tool can be used by youth to assess their afterschool nutrition and physical activity environment.

Year 1: The project will focus on recruiting afterschool partners, providing training, and education on creating environments that support healthy changes and behaviors, and setting the groundwork to advance the PSE objective of quality standards adoption.

Year 2: The project will continue trainings and technical assistance for recruited partners and will begin development of three best practice videos for the afterschool community, videos will focus on leading afterschool centers through the process for offering successful nutrition education and physical activity promotion, and in developing student capacity to direct and implement sustainable approaches to improved access to physical activity and healthy foods and beverages. Year 2 will also focus on an expansion of the number of sites participating in the project and begin recruiting for participation in the CX3 pilot afterschool expansion.

Year 3: The training videos will be finalized, the CX3 pilot program results will be compiled and the afterschool tool will be modified according to the results. The mentorship/leadership program foundations will be formalized. The project will

continue to build the ability of new sites to develop a sustainable program with increased access to fruits and vegetables and physical activity in afterschool.

California Fit Business Kit: (FY 18 & 19)

Objective 1: By September 30, 2018, the California Fit Business Kit (CFBK) and the Take Action website will undergo a comprehensive content review and recommendations for content revisions will be drafted.

Objective 2: By September 30, 2019, the California Fit Business Kit (CFBK) will be updated and recommendations regarding the Take Action website will be implemented; revisions will be reviewed by partner agencies and local health departments.

Objective 3: By September 30, 2019, develop at least one webinar training to introduce and promote revised material.

The California Fit Business Kit (CFBK) will undergo review to ensure: culturally appropriate content and imagery, inclusivity of recommendations and strategies for employees of a variety of activity levels and physical abilities, and/or content related to requirements from state and federal legislation are current. A review of the Take Action website will be conducted, and include key informant interviews with qualifying worksites to address items such as interest in using the site, usability, preferred content and/or alternate presentations of the material. (See CDPH Staffing Budget; In-House Activity).

Rethink Your Drink Oral Health Project: (FY 17-19)

Objective 1: By September 30, 2017, identify 8-12 targeted members of the oral health community with which to collaborate for formative work to develop and guide this project; review existing research and resources on relevant topics; identify gaps, opportunities, and promising practices; create a fact sheet; draft survey instrument and conduct Key Informant Interviews, and propose target audience and intervention plan to modify and implement a Rethink Your Drink oral health campaign.

Objective 2: By September 30, 2018, identify core targeted behavior change goals; develop campaign logic model; modify/develop resources; gather feedback from oral health community on materials and resources; and finalize materials.

Objective 3: By September 30, 2019, develop and conduct training for 8-12 organizations, pilot materials and trainings for the Rethink Your Drink Oral Health intervention, and document results and draft recommendations for improvements.

In partnership with the CDPH Oral Health Program, CDPH will embark on a three-year project to engage the oral health community in promoting healthy beverages to low-income community members. FY 17 activities will be dedicated to formative work with oral health professionals, dentists and/or hygienists, in a variety of settings – federally qualified health centers, school-based clinics, and public health to identify

primary dietary factors affecting patient oral health, preferred messages related to healthy beverages, material and resource preferences and/or training needs. Next, and in partnership with CDPH, the project will conduct a review of current healthy beverages resources and materials within the context of formative findings. In FY 18 the project will modify existing resources and/or develop educational resources as needed to bring the Rethink Your Drink program to Oral Health programs serving low-resource communities. Finally, in FY 19 materials, resources and trainings will be piloted, and revised according to results. Minimum reach anticipated is 100 Oral Health professionals at a minimum of 10 locations. As interest allows, CDPH and the Oral Health Program will, in partnership with local providers, seek to advance office-based policies that require patient education on healthy beverage choices in pilot locations. Planning will be instituted for campaign expansion in future years. (See Office of Oral Health Budget.)

Health Ministry Guide: (FY 18 & 19)

Objective 1: By September 30, 2018, the Health Ministry Guide will undergo a content review by 2-3 members of alternate faiths to identify opportunities for content revisions for additional faith applications.

Objective 2: By September 30, 2019, the Health Ministry Guide will be revised for use with one new faith and/or ethnicity application.

This project will build on past efforts that have resulted in the development of a Body and Soul Companion piece titled the *Health Ministry Guide.* This project will explore the application of the approach with additional ethnic communities and/or faiths. CDPH will partner with local organizations to review, provide recommendations and/or pilot a revised guide with new target audiences. Additionally, the review would engage partners to address recommendations for supplemental content such as strength training, bicycling, group classes, youth linkages and adult programs. Formative activities may include focus group testing, key informant interviews, and/or local pilot intervention in 2-3 locations. Key messages of the Health Ministry Guide include: healthy food and beverages, food security, physical activity promotion, PSE approaches to an improved organizational environment, and peer supports. (See TBD Health Ministry Guide Budget)

Narrative Request: Year 1 will focus on the review of the materials by members of additional faiths and/or languages and/or ethnicities to identify opportunities to apply this tool for use in other faith institutions. Year 2 will focus on the redesign of the materials for a priority population based on the broadest applicability to SNAP-Ed eligible population.

Native American Pilot: (FY 17-19)

Objective 1: By September 30, 2017, complete formative work with select members of the Native American Community and/or health professionals serving them, to identify potentially successful components of a culturally-competent health and/or

physical activity promotion campaign targeting Native American community members.

Objective 2: By September 30, 2018, draft intervention, modify 1-3 existing resources and/or develop educational resources targeting up to 200 members of the Native American community as per formative findings, and develop evaluation plan.

Objective 3: By September 30, 2019, revise the intervention based on previous lessons learned in FY 18, and re-release the program within the Native American community as per formative findings, provide 1-2 trainings and/or webinars on the intervention.

This three-year project was drafted in response to USDA interest in increased SNAP-Ed services to Native American Communities and will build on formative work completed in previous years. Previously, and in partnership with the Public Health Institute, a literature review of health education materials and subsequent report of opportunities was completed and two Native American recipe cards were developed. FY 17 activities will be dedicated to selecting a specific Native American community partner, formative work with members of a selected Native American community and/or health professionals serving them. Formative activities, for the selected Native American Community will include: data collection on health indicators of Native Americans, identification of priority communities, a review of any new nutrition education and physical activity resources with identification of gaps, review of promising health education practices within this community, and/or key informant interviews. Next, and in partnership with CDPH, the project will conduct a review of current healthy food and beverages resources and materials within the context of formative findings. In FY 18 the project will modify existing resources and/or develop educational resources as per formative findings. Finally, in FY 19 materials, resources and trainings will be piloted, and revised according to results. (See TBD Native American Pilot)

Policy Inventory: (FFY 17-19)

Objective 1: By September 30, 2017, post and recruit positions related to Policy Inventory.

Objective 2: By September 30, 2017, research and purchase software and equipment to develop framework and structure of the Policy Inventory.

Objective 3: By September 30, 2018, select 1-2 priority policy topics.

Objective 4: By September 30, 2018, develop scoring rubric for 1-2 policy topics.

Objective 5: By September 30, 2019, document and rate 1-2 healthy food and physical activity policies in environments where low-income individuals live.

Objective 6: By September 30, 2019: complete scoring of policies in remaining priority topic areas.

Objective 7: By September 30, 2019: host educational events to inform stakeholders about the Policy Inventory.

This project was submitted in a MYA and recently approved (May 2017). This two year project will accelerate policy, systems, and environmental change among communities served by SNAP-Ed funded agencies by 1) creating a comprehensive collection of obesity prevention policies on a limited number of topics; 2) identifying and showcasing strong policies to promote obesity prevention; and 3) developing and disseminating model obesity prevention policies.

CDPH's Policy, Systems, and Environmental Change Resource Guide: Strategies for Increased Access to Healthy Foods, Beverages & Physical Activity includes dozens of examples of policies to advance SNAP-Ed goals. The Policy Inventory will focus on a subset of these policies, such as school wellness, retail, or physical activity.

In addition, the project staff will host one webinar per FFY. Also project staff will develop one short paper per FFY that are 1-2 page briefs on trends and key findings from the Policy Inventory. These briefs will be shared to CDPH staff/SIAs/LIAs that can be used for messaging, communication pieces, and assist with work plans.

The Policy Inventory is led by experts in public health and law, also with experience in nutrition education and PSE approaches. Professors of law and public health at UC Davis will co-lead the project with assistance and guidance from ChangeLab Solutions, which is a nationally recognized legal research and advocacy center. (See UC Davis Policy Inventory Budget.)

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

Objective 1: By September 30, 2018, CDPH will work in collaboration with a local implementing agency, the US Soccer Foundation, and partners to identify updates to the current *Soccer for Success Afterschool Program* curriculum that can help to promote alignment with SNAP-Ed guidance.

Objective 2: By September 30, 2019, CDPH will work in collaboration with a local implementing agency, the US Soccer Foundation, and partners to pilot the *Soccer for Success Afterschool Program* in at least 1 qualifying location.

Objective 3: By September 30, 2019, CDPH will document pilot findings that discuss the feasibility of implementing the *Soccer for Success Afterschool Program* for the SNAP-Ed target audience with SNAP-Ed resources.

This pilot project will work toward increasing the connectivity between local implementing agencies and the afterschool community to achieve increased access to physical activity and nutrition education. The US Soccer Foundation – *Soccer for Success* is an afterschool curriculum for youth ages 6-14 and is divided into three grade levels: K-2, 3-5, and 6-8. The curriculum provides tools for children and youth to engage in fun soccer-based activities for two 12-week seasons per year. The curriculum is taught by trained coach-mentors and provides online and mobile features to assist coach's plan sessions. The program model focuses on the following five components:

- **Physical Activity** – provides structured curriculum lessons which include 60 minutes of moderate to vigorous physical activity (in alignment with 2008 Physical Activity Guidelines for children);
- **Nutrition –** delivers nutrition education lessons that are integrated to the program during open circle, soccer activities, and closing circle;
- **Mentorship** – focuses on the importance of coach/mentors as positive role models participating children;
- **School, Community and Family Engagement** – encourages coach/mentors to engage family members to support healthy communities and lifestyle behaviors; and
- **Safe Places to Play** – strives to develop and refurbish creative areas of play to enhance access to physical activity programming.

Reference Website: https://ussoccerfoundation.org/programs/soccer-for-success

(See TBD US Soccer Budget)

e. Project Description for Marketing Strategies

Note how you will implement the program: how and where it will be delivered, its duration, the projected number of participants, and the frequency of messages, etc.

Partnership Plan Implementation (FY 17-19)

In FFY 2017, this project involves assisting CNAPs, multi-county collaboratives, and other CDPH partners as they advance their respective SNAP-Ed PSE efforts by providing training, technical assistance and supporting resources. Activities will be delivered in each of the seven CDPH service areas, as well as via webinar and conference call. Services will be provided at minimum on a quarterly basis. Project number of unduplicated participants: 55. After FFY 17, CNAP support activities will be guided and coordinated by CDPH staff in partnership with the CSUS training agreement. In FFY 2018-19, contracted activities for this project will focus on the health care sector to provide facilitation, technical assistance, and training to CDPH staff, LHDs, public hospitals, and relevant partners to support the CDPH and DHCS partnership.

(See Brown Miller Communications for FFY 17 and TBD Partnership Plan Budget for FFY 2018 & 19.)

Potter the Otter Nutrition Education and Physical Activity Promotion Lessons and Activities (FY 17 & 18)

This is a two-year project scheduled for completion in FY 18. Once complete, lessons will be delivered in low-income early care and education (ECE) settings served by local health departments and other local implementing agencies (LIAs). The projected number of participants and frequency of messages will be described in the applicable integrated work plans.

Early Care and Education Landscape/Policy, Systems and Environmental Change Primer and Webinar (FY 18)

This is a one-year project, scheduled to take place in FY 18. Once complete, the primer and accompanying webinar will be available to all LIAs and relevant partners.

Office of Farm to Fork (FY 17-19)

This three-year project will be delivered through a combination of training and technical assistance including: state-level presentations and trainings occurring during SNAP-Ed meetings such as the LIA Forum, the CDPH Project Directors meetings, regional meetings, webinars, and/or the all-LHD calls.

Harvest of the Month (FY 17 & 18)

ACOE will pilot the pre-K, K and revised 4-6th grade lessons in SNAP-Ed qualifying classrooms. Each series contains three lessons and will be tested in a minimum of three classes per grade level. Once complete, lessons will be delivered in low-income early care and education (ECE) and elementary school settings served by local health departments and other local implementing agencies (LIAs). The projected number of participants and frequency of messages will be described in the applicable integrated work plans.

Champion Provider Fellowship (FY 17-19)

This three-year project will be delivered through a combination of training and technical assistance including: state-level presentations and/or trainings occurring during SNAP-Ed meetings such as the LIA Forum, the CDPH Project Directors meetings, regional meetings, webinars and/or the all-LHD calls. Champion Providers will receive training addressing media skills, SNAP-Ed basics, and targeted nutrition and physical activity topics per needs assessment results. Champion Providers will also receive technical assistance to enhance understanding of community change efforts and PSE work and how they can engage and support these efforts. Provider-focused trainings will occur in-person, electronically via email and listservs, and via webinar as well, creating at minimum quarterly contacts with Champion Providers. In this manner the project will reach all LHD SNAP-Ed projects and a minimum of 40 Champion Partners.

Afterschool Interventions (FY 17-19)

The three-year project will be delivered through a combination of training and technical assistance including: state-level presentations and/or trainings occurring during SNAP-Ed meetings such as the LIA Forum, the CDPH Project Directors meetings, regional meetings, webinars and/or the all-LHD calls. Trainings will occur in-person and via webinar; resources will be shared electronically via email and listservs, and via webinar as well, creating at minimum quarterly contacts with LHD and targeted after-school partners. In

this manner the project will reach all LHD SNAP-Ed projects, 32 Afterschool Learning Centers, and 10 select after-school programs in SNAP-Ed qualifying schools.

California Fit Business Kit (FY 18 & 19)

This is a two-year project, scheduled to take place in FY 18 and FY 19. Once complete, the updated resource and accompanying website will be available to all LIAs and relevant partners. Trainings will be provided on resources once completed, which may be in the years following this three-year plan cycle.

RYD Oral Health Project (FY 17-19)

This three-year project will be delivered in partnership with Oral Health professionals in their place of work, which may include federally qualified health centers, school-based clinics, and/or public health settings. Minimum reach anticipated is 100 Oral Health professionals at a minimum of 10 locations. Frequency of messages will be determined through recommendations obtained during key informant interviews; delivery may include office education materials such as displays, brochures, pamphlets, loop video and/or slide presentation, and/or chair-side guide.

Health Ministry Guide (FY 18 & 19)

This is a two-year project, scheduled to take place in FY 18 and 19. Once complete, the revised Health Ministry Guide will be field tested in 2-3 pilot locations.

Native American Pilot (FY 17-19)

This three-year project will be delivered in partnership with Native American Communities and health professionals that serve them. The project will be driven by formative work occurring in FY 17 based on the needs and interests of the community as well as the gaps in existing resources. Frequency of messages and reach will be driven by intervention sites and available resources, the identification of which will be a primary goal of activities in FY 17.

Policy Inventory: (FFY 17-19)

This project was recently approved (May 2017) in the MYA. We anticipate initial startup in late summer that include recruit and hire staff positions associated with this project. Also research and purchase software and equipment to support the project. This project will build upon each of the previous years' accomplishments. During FFY 18, UCD staff will work with CDPH staff to narrow 1-2 topic areas to focus on. Also a scoring rubric will be developed for the selected 1-2 topic areas. A website will be available for CDPH/SIAs/LIAs in FFY 19.

FFY 18 and 19, key timeline and deliverables include: complete scoring of 1-2 policies based on the recommendation and guidance of Advisory Committee, CDPH and UCD

staff; if time allows, update the Policy Inventory based on the policy topics collected in FFY 18; coordinate educational events to inform stakeholders about the capability and usage of the Policy Inventory (e.g. webinars, conference presentations, trainings);meet 1-2 times with the Advisory Committee for project advice and guidance; And develop 1 manuscript or conference abstract on the project.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

This two-year project will be delivered in collaboration with CDPH, a local implementing agency, or subcontractor, and the US Soccer Foundation. The project will be implemented in at least 1 afterschool program site in a qualifying census tract to students (age 6-14) within the following three grade levels: K-2, 3-5, and 6-8.

To ensure an informative pilot, partnering local implementing agency or subcontractor will be selected based on the following elements:

- The community's need and community change goals;
- The alignment with local identified SNAP-Ed IWP goals, objectives, and PSE strategies; and
- The availability of local resources and interest
    - Staffing; and
    - School and afterschool partnerships.

f. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

Partnership Plan Implementation (FY 17-19)

SNAP-Ed Evaluation Framework ST7: Partnerships; LT9: Leveraged Resources; ST8 Multi-Sector Partnerships and Planning.

This project implements the nutrition strategy as recommended on pg 36 of the SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States Communities-"provide education and collaborate with key community outlets and stakeholders."

https://snaped.fns.usda.gov/sites/default/files/uploads/SNAP-EdToolkit2016UpdateFeb2.pdf

Novello AC, Degraw D, and Kleinman DV. *Healthy children ready to learn: an essential collaboration between health and education.* Public Health Rep. 1992. Jan-Feb; 107(1):3-15.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

This activity addresses multiple recommended strategies for child care settings as listed in the SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States: https://snaped.fns.usda.gov/sites/default/files/uploads/SNAP-EdToolkit2016UpdateFeb2.pdf pg. 20:

- Improve capacity of child care providers and food service staff in nutrition education and healthy meal planning and food preparation.
- Improve capacity of child care providers to provide children with opportunities for physical activity throughout the day, including outside play when possible.
- Promote access to drinking water.
- Provide parent education through the child care setting.

Additionally, these activities were included per USDA recommendation to develop and support interventions that increase purchases and use of foods from local farms.

The lessons and activities will be practice-based following the completion of pilot testing activities in ECE settings.

The 2010 Surgeon General's Vision for a Healthy and Fit Nation identifies child care settings as a priority setting for Obesity Prevention (https://www.ncbi.nlm.nih.gov/books/NBK44660/pdf/Bookshelf_NBK44660.pdf)

Children who have obesity are more likely to become adults with obesity. Gordon-Larsen P, The NS, Adair LS. Longitudinal trends in obesity in the United States from adolescence to the third decade of life. Obesity. 2010;18(9):1801—804

If children have obesity, their obesity and disease risk factors in adulthood are likely to be more severe. Bass R, Eneli I. Severe childhood obesity: an under-recognized and growing health problem. Postgrad Med J. 2015;91(1081):639-45. doi: 10.1136/postgradmedj-2014-133033

Eating behaviors are believed to develop through social learning during childhood (Birch & Fisher, 1998; Birch, Savage, & Ventura, 2007), with the presence of dining companions, such as parents, peers and siblings influencing the development of food preferences and eating behaviors (Birch & Fisher,1998; Birch et al., 2007; Sharps et al., 2015).

Eating behaviors developed during childhood also track into adolescence and adulthood (Kelder, Perry, Klepp, & Lytle, 1994; Singer, Moore, Garrahie, & Ellison, 1995)

Lawatsch, D. E. (1990). A comparison of two teaching strategies on nutrition knowledge, attitudes and food behavior of preschool children. Journal of Nutrition Education, 22, 117e123.

Early Childhood Obesity Prevention Policies Goals, Recommendations, and Potential Actions Institute of Medicine: http://www.nationalacademies.org/hmd/~/media/Files/Report%20Files/2011/Early-Childhood-Obesity-Prevention-Policies/Young%20Child%20Obesity%202011%20Recommendations.pdf

- Recommendation 3-4: Health and education professionals providing guidance to parents of young children and those working with young children should be trained in ways to increase children's physical activity and decrease their sedentary behavior, and in how to counsel parents about their children's physical activity.
- Recommendation 4-6: Health and education professionals providing guidance to parents of young children and those working with young children should be trained and educated and have the right tools to increase children's healthy eating and counsel parents about their children's diet.
- Goal 5: Use social marketing to provide consistent information and strategies for the prevention of childhood obesity in infancy and early childhood.

Early Care and Education: PSE Primer: (FY 18)

This is a one-year project, scheduled to take place in FY 2018. The result will be a resource document and accompanying training to build capacity for SIAs to create supportive nutrition and physical activity environments in schools, inclusive of a multitude of PSE approaches as captured in Table 1 Targeted Behaviors and Obesity Prevention and Control Strategies from CDC's National Center for Chronic Disease Prevention and Health Promotion and further discussed in the recommended strategies for child-care and school settings "Implement early care and education standards for physical activity" as noted in the SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States: https://snaped.fns.usda.gov/sites/default/files/uploads/SNAP-EdToolkit2016UpdateFeb2.pdf

Summary of Benefits of Farm to School http://www.farmtoschool.org/resources-main/the-benefits-of-farmto-school.

Benefits to students documented include:

- Improvement in early childhood and K-12 eating behaviors, including choosing healthier options in the cafeteria, consuming more fruits and vegetables through farm to school meals and at home (+0.99 to +1.3 servings/day); consuming less unhealthy foods and sodas; reducing screen time; and increasing physical activity;
- Increase in knowledge and awareness about gardening, agriculture, healthy eating, local foods and seasonality (in early childhood and K-12 settings);
- Demonstrated willingness to try new foods and healthier options (in early childhood and K-12 settings);
- Enhanced overall academic achievement in K-12 settings; provides children with an understanding of agriculture and the environment; and improvement in life skills, self-esteem, social skills and behavior. Other benefits are documented for school food service, teachers, parents, farmers, and community/local economy.
- Additionally, according to a 2013 report, low-income Californian adults who reported regular access to quality, affordable fruits and vegetables in their neighborhood (Always/Often/Sometimes) reported higher intake of fruits and vegetables than those with limited access (Seldom/ Never) (2.6 cups versus 2.1 cups, respectively; p=.05):

<u>Harvest of the Month: (FY 17 & 18)</u>

SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States
<u>https://snapedtoolkit.org/app/uploads/harvest-of-the-month-hotm.pdf</u>

- Several formative, process, and impact evaluations have been conducted to evaluate HOTM as a social marketing intervention.
- In 2005 and 2006, a process evaluation was conducted to assess the reach, doses delivered, and fidelity of the standardized HOTM intervention. The results indicated a 13% increase in fruit and vegetable consumption and increases in psychosocial factors, including fruit and vegetable knowledge, preferences, and

familiarity were reported by students exposed to interventions that emphasized HOTM.

- In 2009, Field Research completed a comprehensive review of the secondary data related to HOTM to better understand how it is being implemented and what users consider to be HOTM's strengths and weaknesses. Findings suggested that effective ways to strengthen HOTM include using HOTM in conjunction with school gardens, expanding HOTM as a farm-to-school program, incorporating the monthly produce on school salad bars, and developing more intensive food service and parent programs.
- In 2009 and 2010, 44 local projects conducted evaluations of HOTM. A total of 1,474 children participated in HOTM and its evaluation; an additional 544 participated in a control group that received no HOTM intervention. Significant increases ($p<.001$) were found for the number of fruits, vegetables, and total fruits and vegetable reported as consumed. The control group showed no significant increases in consumption. Results also indicated that nutrition education proved most effective when delivered intensively (i.e., 4-6 HOTM activities), showing significant improvements in fruit and vegetable consumption alone, separately, and as a combined measure ($p<.001$).

See also early care and child care references previously described under Potter the Otter.

It is our hope that the lessons and activities will be practice-based following the completion of pilot testing activities

Champion Provider Fellowship: (FY 17-19)

SNAP-Ed Evaluation Framework ST6 Champions; ST7: Partnerships; LT9: Leveraged Resources; ST8 Multi-Sector Partnerships and Planning

This project implements the nutrition strategy as recommended on pg 36 of the SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States Communities-"provide education and collaborate with key community outlets and stakeholders."

https://snaped.fns.usda.gov/sites/default/files/uploads/SNAP-EdToolkit2016UpdateFeb2.pdf

This activity is one component of the broader Champions for Change social marketing initiative.

Afterschool Interventions: (FY 17-19)

Practice-Tested

From the SNAP-Ed Toolkit: Healthy Behaviors Initiative (HBI): In 2010, a summary report used the SEM to report results in 3 locations: Inner City Los Angeles (LA) (A World Fit for Kids!), Club Y.E.S in the rural Central Valley, the YMCA of Silicon Valley in Metropolitan San Jose. As subsequent report, Combatting the Childhood Obesity Epidemic, reported on HBI initiatives conducted by Mt.Diablo Cares in the San Francisco Bay Area and Fitness 4 Life on the Central Coast. A World Fit For Kids! in inner city LA conducted a more rigorous study (Dec 2013) which reported the following: a substantial decline in soft drink consumption, 90% reporting increased daily PA, a 50% increase in children passing the state-mandated Fitnessgram test, a near-tripling of children with adequate abdominal strength, half the children lowering their BMI, and overweight children losing an average of 5 pounds.

Unpublished Program Evaluation: To measure the impact on student behavior, student surveys were conducted at five Learning Center sites (Stanislaus, Stockton, Modesto, Sylvan, and Tracy) twice in the school year, pre-surveys in October 2015 and post-surveys in May 2016. Students were asked about behavior on the preceding school day. The survey results reflect the paired responses of about 365 students. Findings include:

- Learning centers achieved significant health-related policy and operational improvements.
- Students were drinking more water at school and were asking for water during meals at school and home. T
- Student consumption of three or more sodas per day decreased, they also showed a decrease in consumption of three or more other sugary beverages (punch, and sport and fruit-flavored drinks).
- An increase in the number of students eating no french fries or chips and a decrease in the number of students who ate three or more servings of french fries or chips.
- Decrease in consumption of sweets (sweet rolls, doughnuts, cookies, brownies, pies, cake), and a decrease in the number of students who ate three or more servings of sweets.
- There was an increase in the number of students eating no fast food and a decrease in the number of students who ate three or more servings of fast foods.
- Students increased fruit consumption.

From the SNAP-Ed Toolkit CX^3: Highlights of evaluation results from CX3 implementation include the following:

- Following CX3 assessment, 11 small grocery stores were recruited into the Nutrition Education and Obesity Prevention Branch Retail Program; two stores increased their CX3 store survey scores from underachieving to greater than 75 “quality store” goal (FY12-FY13 Orange County).

- The need for an Arcata community garden was identified at a CX3 community forum in the spring of 2011. The Open Door Community Health Clinic revived the fallow garden with funding they received from a grant (FY11 – Humboldt County).
- A project engaged food outlets (convenience stores, small markets and grocery stores) to sell a variety of good quality healthy food, including fruits and vegetables; market and promote healthy food options; participate in food assistance programs, and help create a safe and inviting environment around their stores (FY09 - Sonoma County).

SNAP-Ed Evaluation Framework ST7: Partnerships; LT9: Leveraged Resources; ST8 Multi-Sector Partnerships and Planning

This project implements the nutrition strategy as recommended on pg. 36 of the SNAP-Ed Strategies and Interventions Obesity Prevention Toolkit for States Communities- "provide education and collaborate with key community outlets and stakeholders." The goal of this project is to extend partnerships to build upon the broad SNAP-Ed community-based Rethink Your Drink campaigns, and to enhance message and education supports in oral health clinics by oral health providers.

In 2013, 50 local projects working with adults and youth measured beverage consumption, with the following results:

- 3 percent decrease in soda consumption by youth;
- 4 percent decrease in fruit drink, sports drink, and punch (not soda) consumption by teens;
- 6 percent decrease in SSB consumption by adults

Policy Inventory (FFY 18-19)

The SNAP-Ed Policy Inventory uses policy surveillance to provide relevant, timely information to decision makers to help them implement successful and effective obesity prevention policies. Both research and practice supply evidence of the effectiveness of policy surveillance, which is the "ongoing, systematic collection, analysis, interpretation and dissemination of information about a given body of public health law and policy."[1] It involves scoring features of the policy likely to improve public health, which is a more nuanced evaluation than simply noting whether a policy exists or not.[2] Endorsed by the Institute of Medicine [3], the CDC developed a policy surveillance project to track statewide laws that affect the health of populations. Evaluations of nutrition education and school-based obesity prevention policies have shown that stronger policies are related to better health outcomes. [4-8] However, this research has been conducted at the statewide level. The SNAP-Ed Policy Inventory will address local and institutional policies (e.g., school districts, employers) and will be tailored to policy change areas that are a priority to the SNAP-Ed program.

g. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

Partnership Plan Implementation (FY 17-19)

- PSE Approaches: Develop a systems change in public hospitals to increase referrals to LHDs as a resource to provide general nutrition education to community members of the hospitals.
- Strategies:
    - Develop and enhance partnership between the LHD and public hospitals.
    - Link community members associated with the hospital to resources available via SNAP-Ed general nutrition education events.

Provide training and/or technical assistance to public hospitals and LHDs to increase awareness of SNAP-Ed general nutrition education and obesity prevention programs.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

- PSE Approaches:
    - Increase availability of healthy food retail, including farmer's markets.
- Strategies:
    - Increase use of farmer's market with SNAP and WIC access at key community outlets.
    - Collaborate with key community outlets and stakeholders.
    - Improve capacity of early care and education (ECE) providers in nutrition education and physical activity promotion.

Early Care and Education: PSE Primer: (FY 18 & 19)

- PSE Approaches:
    - Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health; and increased access to physical activity.

- Strategies:
    - Establish strong child care wellness educational programs and policies consistent with Let's Move Child Care.
    - Improve capacity of child care providers to provide children with opportunities for physical activity throughout the day, including outside play when possible.

Office of Farm to Fork: (FY 17-19)

- PSE Approaches:
    - Increase purchases and use of foods from local farms
- Strategies:
    - Link farms to institutions through certified farmers' markets, farm stands or farm-to-where-you-are initiatives.
    - Engage local businesses, government, civic organizations, community groups, and citizens in farm to fork expansion.

Harvest of the Month: (FY 17 & 18)

- PSE Approaches:
    - Increase purchase and use of foods from local farms
- Strategies:
    - Provide training or technical assistance to health or community professionals on obesity prevention through increased access to locally grown fresh fruits and vegetables.
    - Promote intersections between garden and classroom curriculum.

Champion Provider Fellowship: (FY 17-19)

- PSE Approaches:
    - Increase the capacity of providers to inform and educate their community about policies, systems, and environmental change strategies to support obesity prevention.
- Strategies:
    - Provide training or technical assistance to health or community professionals on obesity prevention
    - Use community or place-based messaging to promote access and appeal
    - for healthy foods, beverages, and/or physical activity

Afterschool Interventions: (FY 17-19)

- PSE Approaches:
    - Adopt and enforce standards for food, beverages and physical activity in the out of school environment.

- Strategies:
    - Provide training or technical assistance to health or community professionals on obesity prevention through increased access to locally grown fresh fruits and vegetables.

California Fit Business Kit: (FY 18 & 19)

- PSE Approaches:
    - Increase access to healthy foods, beverages and physical activity through adoption and enforcement of worksite policies.
- Strategies:
    - Promote increased access to healthy foods and beverages and physical activity.
    - Provide education and collaborate with key community outlets and stakeholders.
    - Promote increased access to healthy beverages; Encourage access to drinking water.

Rethink Your Drink Oral Health Project: (FY 17-19)

- PSE Approaches
    - Implement clinic and office policies that promote healthy beverage education by oral health professionals during patient care.
- Strategies:
    - Provide training or technical assistance to health or community professionals on healthy beverage promotion.

Health Ministry Guide: (FY 18 & 19)

- PSE Approaches:
    - Adopt and implement organizational policies that result in increased access to healthy foods, beverages and physical activity.
- Strategies:
    - Provide training or technical assistance to health or community professionals on obesity prevention through increased access to locally grown fresh fruits and vegetables.
    - Develop nutrition standards at faith-based sites
    - Develop wellness policies in schools, after-school, or child care settings sites that support children and family nutrition and health.

Native American Pilot: (FY 17-19)

- PSE Approaches:
    - Increase access to healthy foods, beverages and physical activity through culturally appropriate communications to Native Americans.

- Strategies
    - Provide training or technical assistance to health or community professionals on obesity prevention through increased access to healthy beverages.
    - Use community or place-based messaging to promote access and appeal for healthy foods, beverages, and/or physical activity.
    - Provide education and collaborate with key community outlets and stakeholders.

Policy Inventory (FFY 18-19)

- PSE approaches:
    - Develop policies for settings that support family nutrition and health.
    - Develop nutrition standards for use at selected sites.
    - Improve quality of food available in the environment in settings where low-income families live and work.
    - Promote access/appeal and policy changes to support physical activity and exercise.
- Strategies:
    - Use education to accelerate policy adoption and best policy practices among local health departments and other key decision makers.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

- PSE Approaches:
    - Structured physical activity in the afterschool environment.
    - Shared use/space to enhance physical activity behaviors of youth.

- Strategies:
    - Engaging afterschool program/staff and community champions/members to serve as coaches/mentors to promote healthy lifestyle behaviors to support obesity prevention.
    - Delivering nutrition education to youth (that aligns with the 2015 *Dietary Guidelines for Americans).*
    - Providing opportunities for 60 minutes' moderate to vigorous physical activity (that aligns with the *2008 Physical Activity Guidelines for Americans*).

h. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

Educational materials used will draw from the Nutrition Education Obesity Prevention Branch SNAP-Ed approved materials listing. Languages will include English, Spanish,

Chinese, Vietnamese, and Hmong. Activities will also enhance existing resources with new components, culturally appropriate imaging, and/or nutrition education messages.

Partnership Plan Implementation (FY 17-19)

Current materials and resources will support activities of the partnership plan that can include Rethink Your Drink and Harvest of the Month. Materials will not be purchased.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

Lessons developed will build upon previous SNAP-Ed materials entitled "It's Picnic Day Potter" which were developed in partnership with First 5 Santa Clara. Materials are multilingual English, Spanish; materials will not be purchased.

Office of Farm to Fork: (FY 17-19)

Activities will build upon materials developed in previous years by the Office of Farm to Fork. Materials are available in English only and will not require purchase.

Farm to School Food Safety Guidelines (English) downloadable from http://cafarmtofork.com/ftfpublications.htm

Agriculture and Culinary Arts Career Technical Education Best Practices (English) downloadable from http://cafarmtofork.com/ftfpublications.htm

California Schools and Universities: Procurement of Locally Grown Produce (English) downloadable from http://cafarmtofork.com/ftfpublications.htm

California Farm to School in Action: School Profiles (English) downloadable from http://cafarmtofork.com/FTSResources.htm

Harvest of the Month: (FY 17 & 18)

Activities build upon existing Harvest of the Month resources developed by CDPH (www.harvestofthemonth.com) inclusive of student workbooks and educator newsletters. FY 17 materials will be available in English only until finalized, at which time CDPH will begin the translation process. Materials will not be purchased.

Afterschool Interventions: (FY 17-19)

Activities will build upon existing materials: the Afterschool Guide, CX^3 Afterschool Tool, Healthy Behaviors Initiative Resources (www.ccscenter.org/HBI) Materials will not be purchased.

California Fit Business Kit: (FY 18 & 19)

Activities will build upon existing materials. The California Fit Business Kit is located on the CDPH website https://www.cdph.ca.gov/programs/NEOPB/Pages/WorksiteProgram.aspx and was last updated on /2/08. Update may require purchase of stock photography in limited amounts.

Rethink Your Drink Oral Health Project: (FY 17-19)

Activities will build upon existing Rethink Your Drink materials located on the CDPH website: https://www.cdph.ca.gov/programs/NEOPB/Pages/RethinkYourDrink.aspx

Materials will not be purchased. Updates/Adaptations may require purchase of stock photography in limited amounts.

Health Ministry Guide: (FY 18 & 19)

Activities will build upon existing Health Ministry Guide. Materials will not be purchased. Updates/Adaptations may require purchase of stock photography in limited amounts.

Rethink Your Drink Native American Pilot: (FY 17-19)

Activities will build upon existing nutrition education, physical activity promotion and/or Rethink Your Drink materials located on the CDPH website: https://www.cdph.ca.gov/programs/NEOPB

Materials will not be purchased. Updates/Adaptations may require purchase of stock photography in limited amounts.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

Soccer for Success program materials developed by the US Soccer Foundation will be used and, as needed, modified/customized to implement the pilot program.

i. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

Partnership Plan Implementation (FY 17-19)

This project will build upon existing partnership resources. Materials may be modified or adapted to fit the needs of the project. Development of resources and materials may occur as a result from the interview results.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

Alameda County Office of Education (ACOE) will develop lessons and activities to build upon existing, and SNAP-Ed approved Potter the Otter books, rounding out a more comprehensive nutrition education intervention that goes beyond the storybook to include teacher guidance and more in-depth learning opportunities and home-connections for preschool-aged children and their parents. The lessons will capitalize on the popularity of Potter the Otter and encourage greater depth of education. CDPH is leveraging First 5 partner resources including layout and design as a part of this project.

Early Care and Education: PSE Primer: (FY 18 & 19)

A contractor to be identified by CDPH will develop a comprehensive resource that presents California's early care and education landscape and identify key opportunities for PSE work. This resource will bridge the cultural gap between LHDs and ECEs by greatly increasing the understanding and ability of local health departments and other local implementing agencies to affect healthy change in ECE environments. Similar resources are currently not available and/or not specifically targeted to encourage LHD/ECE partnerships.

Harvest of the Month: (FY 17 & 18)

This project will capitalize on the popularity of the Harvest of the Month intervention, which is currently the most frequently implemented CDPH program. As a result of this project, lesson plans and accompanying student materials for grades pre-K, K, and 4-6th will be developed to assist with standardizing HOTM interventions by establishing a core nutrition education component that meets the USDA SNAP-Ed requirements.

Afterschool Interventions: (FY 17-19)

As a result of this project, the Center for Collaborative Solutions will develop low-cost single page materials (2-3) that will help acclimate local health departments to the after-school culture, organizational infrastructure, and/or relevant policy and programmatic connectivity opportunities between SNAP-Ed and after-school.

Rethink Your Drink Oral Health Project: (FY 17-19)

This project will build upon the broad selection of existing Rethink Your Drink resources. Materials may be modified and/or adapted to meet needs of Oral Health professionals based on new-setting requirements. Development of materials will be guided by the results of formative efforts occurring in FY 17 and may include office education materials such as displays, brochures, pamphlets, loop video and/or slide presentation, and/or chair-side guide.

Native American Pilot: (FY 17-19)

This project will build upon the broad selection of existing CDPH nutrition education, healthy beverage and physical activity resources. Development of materials will be guided by the results of formative efforts occurring in FY 17 and gap analysis results. New materials may include may include items such as: displays, posters, pamphlets, web/mobile content, radio messages if reservation radio resources are available, posters, and/or social media content.

Policy Inventory (FFY 18-19)

Low-cost educational strategies to educate local health departments and CNAP members about best practices in SNAP-Ed policy change include hosting webinars, presenting at CDPH-sponsored conferences and meetings. Also distribute short written summaries of results from the Policy Inventory. The primary source of information will be from the website.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

New educational materials will not be developed for this pilot program. The goal of the project is to adapt existing materials to comply with USDA SNAP-Ed Guidance.

j. Key Performance Measures/Indicators (kpi)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Partnership Plan Implementation (FY 17-19)

Potential process measures that will demonstrate success of the Partnership Plan will be the planning, recruiting and facilitation of workgroup meetings (# of meetings and attendees). Key Informant Interviews with hospital staff, LHD staff, and CDPH staff will occur to collect information and learn about specific needs of public hospitals that align with areas of expertise from the LHD. There will also be documentation of ongoing trainings and technical assistance that will be updated on a monthly basis.

Process Measures: Number of participants to whom training and/or technical assistance has been provided. Number of Key Informant Interviews conducted. Number of public hospitals and LHDs involved in the project. Number of related partners associated with connecting community from public hospitals to their LHD.

Outcome Measures: A long-term outcome of the project will be the sustainability and strength of partnerships between public hospitals and local-health departments. In collaboration with NPI, CDPH will select and administer a validated collaborative assessment tool, such as the Wilder Collaborative Factors Inventory, to gauge member satisfaction, member engagement, and readiness to adopt and implement a PSE

initiative. Eventually, these connections will establish a large systems change of decreasing hospital visits that occurred from chronic conditions such as obesity and diabetes. The evaluation of this state-project aligns with the indicators ST8 Multi-Sector Partnerships and Planning and MT11 Health Care Clinical-Community Linkages of the USDA Evaluation Framework.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

Completed lessons, activities, and teacher support content.
Process Measures: Number of sites recruited to pilot test; number of teachers and students engaged in pilot test; pilot test feedback.
Outcome Measures: TBD based on lesson objectives developed in FY 17. We anticipate that pilot measures will assess things such as: 1) the intent of teachers to implement the lessons at least once annually 2) teacher satisfaction with the curriculum 3) teacher confidence in effectively delivering the content 4) teacher perceptions of student interest and engagement 5) change in teacher perception of their role in supporting healthy eating and physical activity 6) student satisfaction with the lessons and 7) student change in knowledge, motivation and/or intention to make behavior changes in the areas of fruit and vegetable consumption, water consumption, and physical activity following participation in the lessons. Future studies will address behavioral outcomes once the lessons are updated to reflect pilot test results and are considered final and ready for evaluation of impact on student behavior.

Early Care and Education: PSE Primer: (FY 18 & 19)

Completed primer and webinar training.
Process Measures: Number of webinar participants and number of downloads (as available). Once the resource has been completed, LIA comments will be gathered to address the clarity and usefulness of the resource in guiding and supporting LIAs to establish partnerships with ECE organizations and successfully executing PSE change to improve access to fruits, vegetables, healthy beverages, and/or physical activity. PSEs in ECE sites will be monitored and tracked over time using the new PEARS system.

Office of Farm to Fork: (FY 17-19)

Process Measures: Number of trainings, technical assistance, and/or resources provided to LHDs in support of farm to fork expansion activities

Process Measures:

Farm to School Measures: may include, but not be limited to: Number of schools, districts and/or students participating, number of schools planning to participate, number of dollars invested in local food, number of school gardens, and/or PSE Changes/Activities (e.g. Smarter Lunchrooms, food coaches, etc.) as captured in PEARS.

CA Farm to School Network: measures include number of attendees at Farm to School Network meetings, number of subscribers to the newsletter, number of participants in events (e.g. regional lead meetings and the F2S Conference).

CA Nutrition Incentive Program: CDFA is working with NPI, using non-SNAP-Ed funds, to conduct an independent evaluation of the entire program, including outcomes for consumers (consumption, household food security, awareness of local foods) and growers (sales, farm operations). That evaluation and results will be shared with CDPH/USDA when completed. CDFA is also collecting data on incentive and SNAP usage including: number of SNAP transactions (by quarter), value of SNAP transactions (by quarter), value of incentives distributed (by quarter per outlet, by month per implementing contractor).

Harvest of the Month: (FY 17 & 18)

Process Measures: Complete the development of lessons and student workbooks

Number of sites recruited to pilot test; number of teachers and students engaged in pilot test; pilot test feedback

Outcome Measures:
HOTM 4th-6th Grade Workbooks: The pilot measures will include: 1) teacher satisfaction with the curriculum 2) teacher confidence in effectively delivering the content 3) student satisfaction with the curriculum and 4) change in produce, 5) change in preferences fruit and vegetable consumption, and physical activity, 6) impact of home connections on parent purchasing behavior for fruits and vegetables.

ECE HOTM Lessons: Similar to the Potter the Otter ECE lessons, with the HOTM ECE lessons, we anticipate that pilot measures will assess things such as: 1) the intent of teachers to implement the lessons at least once annually 2) teacher satisfaction with the curriculum 3) teacher confidence in effectively delivering the content 4) teacher perceptions of student interest and engagement 5) change in teacher perception of their role in supporting healthy eating 6) student satisfaction with the lessons and 7) student change in knowledge, motivation and/or intention to make behavior changes in the areas of fruit and vegetable consumption. In future years, lessons will become the direct education component of a more fully-developed ECE intervention with activities across the social-ecological model. Future studies will address behavioral outcomes as a part of a comprehensive intervention. Impact on student behavior will be assessed once the lessons are updated to reflect pilot test results and are considered final.

Champion Provider Fellowship: (FY 17-19)

Process Measures: Number of LHDs, Health Officers, Providers and Partners participating in meetings, trainings and technical assistance

Process Measures: Number of community based nutrition education and obesity prevention related interventions that engaged a Champion Provider Fellow.

Outcome Measure: Confidence of the Champion Provider Fellow to engage diverse communities in evidence-based PSE interventions.

Outcome Measure: Knowledge of the Champion Provider Fellow of evidence-based nutrition education and obesity prevention interventions.

Afterschool Interventions: (FY 17-19)

Healthy Behaviors Initiative

Process Measures: Number of trainings, technical assistance and/or resources provided to LHDs and after-school programs, number of participants in trainings and presentations,

Outcome Measures: Student confidence in effectively delivering nutrition education and physical activity in afterschool sites, number of new policy, systems, and/or environmental supports, including quality standards, for nutrition and physical activity in targeted after-school organizations.

Communities of Excellence in Nutrition, Physical Activity and Food Security (CX^3) Afterschool Tool:

Process Measures: Completed afterschool assessment tool

Outcome Measures: Student satisfaction with the assessment tool, student confidence in ability to administer the tool, adult leader confidence in ability to guide and support the process of tool implementation.

California Fit Business Kit: (FY 18 & 19)

Process Measures: Completed and updated California Fit Business Kit and supportive resources, number of trainings, number of training participants

Outcome measures are dependent upon the identification of new content which will occur during FFY 18. This section will be updated as a part of the FFY 2019 Plan proposal.

Rethink Your Drink Oral Health Project: (FY 17-19)

Process Measures: Number of trainings, technical assistance and/or resources developed; Number of Key Informant Interviews; Number of participants for trainings/webinars; Number of participating Dental Provider Organizations and dental hygienist organizations identified; Potential number of patients receiving Rethink Your Drink education during the pilot phase.

We anticipate that pilot measures will assess things such as: 1) Oral Health professionals' satisfaction with the materials 2) intent of professionals to discuss reduction in SSB consumption with patients 3) confidence in effectively delivering the content.

Health Ministry Guide: (FY 18 & 19)

Completed and updated Health Ministry Guide and supportive resources.

Process Measures: Number of sites and/or individuals receiving intervention during the pilot phase; red-flag testing of materials.

The pilot process will measure the faith professionals' perception of the usefulness of the existing materials, importance of culturally and/or faith-specificity in Health Ministry materials, it will gauge their confidence in adapting materials, and identify recommendations for content changes. It will also measure their confidence in their ability to start a Healthy Ministry.

Rethink Your Drink Native American Pilot: (FY 17-19)

Process Measures: Number of Key Informant Interviews; number of resources developed; potential number of individuals receiving education during the pilot phase; red-flag testing of materials.

Outcome measures will be identified using a pre-/post survey approach. Content of the survey is dependent on further development of the intervention, which will occur during FFY 18. As the program content solidifies, this portion of the plan will be updated for the FFY 19 proposal. Activities developed will be in line with the State-level goals and will likely address fruit and vegetable consumption, physical activity and/or sugary drink consumption.

Policy Inventory (FFY 18-19)

Process Measures: Number of users who log onto the Policy Inventory website in FFY 18-19; number of attendees that participate in conferences, trainings in FFY 18-19; proportion of local health departments reporting awareness of and use of the Policy Inventory in FFY 19.
Once the resource has been completed, LIA comments will be gathered to address the clarity and usefulness of the resource in guiding and supporting LIAs to successfully execute a variety of PSEs to improve access to fruits, vegetables, healthy beverages, and/or physical activity. PSEs will be monitored and tracked over time using the new PEARS system.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

Process Measures: Number of youth participating in the *Soccer for Success* program; (includes participant retention); number of coaches/mentors trained; number of completed key informant interviews with those involved in the pilot project, such as, afterschool staff, school administrators, and parents of participants.

SNAP-Ed Feasibility and Formative Measures, such as:

- Acceptability by participants and those who implement.
    - To what extent is the program judged as suitable, satisfying, or attractive to program deliverers? To program recipients, school, and parents?
- Demand – document the use of the program (added value of the program to the community; what gaps does the program fill to California SNAP-Ed?)

- To what extent is the program likely to be used (i.e., how much demand is likely to exist in SNAP-Ed communities)?

- Implementation/Practicality – was it delivered as planned; can this be replicated?
  - To what extent can the program be successfully delivered to intended participants?
  - To what extent can the program be carried out with intended participants using existing means, resources, and circumstances?
  - To what extent is the training and technical assistance infrastructure appropriate to deliver the program?
- Adaptation – describe how the program was adapted for SNAP-Ed.
- Integration/Expansion – assess the level of change needed to integrate this new program.
  - To what extent can the program be integrated within SNAP-Ed?
  - To what extent can a previously tested program be expanded to provide a new program or service to SNAP-Ed?

3. Evaluation Plan* *See note below following 3e.*

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation;

See above entries for Key Performance measures.

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

Click here to enter type.

c. **Questions:** the questions(s) that will be addressed and;
   - the approach to conducting the evaluation, including scope, design, measures and data collection;
   - plans for using the results

Click here to enter questions.

d. **Evaluation:** if the project has been evaluated previously, note the most recent year in which the evaluation was done.

e. **Use of SNAP-Ed Evaluation Framework:** identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

**Because of the multiple projects contained in this summary, each of the above elements has been addressed on a project-by-project basis. State-level projects are evaluated as independent pilot projects, and, as they are included in local efforts, become incorporated in the overall statewide evaluation completed by CDPH*

Name: **Partnership Plan Implementation (FY 17-19)**

Type: Primarily Process Evaluation

Questions: How many public hospitals and public health care systems, CNAPS, multi-county collaboratives, and state-level partners were trained and how many received additional technical assistance? Did the training and technical assistance provided help support the CNAPs and multi-county collaboratives? How many external partners participate in CNAPs and multi-county collaboratives and does this change over time?

Measures will be collected using training sign-in sheets, or web participation reports, training evaluations, technical assistance logs, and by a review of the collaborative membership rosters. Results will be used to inform future trainings and technical assistance packages to support CNAPs multi-county collaboratives

Evaluation: Training needs are assessed on an annual basis. Training evaluations are completed routinely.

Additionally, CDPH will collaborate with NPI to implement a collaborative evaluation, as previously discussed in section 2j above.

SNAP-Ed Framework Linkages: ST8 evaluating multi-sector partnerships.

Name: **Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)**

Type: Primarily Formative Evaluation

Questions: How many lessons and activity sheets were completed? How well did the materials prepare the teachers for instruction? How well were the messages and materials received by the students? How many sites were recruited to pilot test? How many teachers and students were engaged in the pilot test?

Measures will be collected using teacher/instructor surveys online and key informant interviews with select participants. As organization policy allows, staff may attempt to observe lessons in progress. Results will be used to inform materials revision.

SNAP-Ed Framework Linkages: ST1f. Find your healthy eating style and maintain it for a lifetime. (messaging), ST1g. Make half your plate fruits and vegetables—vary your

veggies. (messaging), ST1l. Drink water instead of sugary beverages. ST5b. Number of sites or organizations with an identified need for improving access or creating appeal for nutrition and physical activity supports.
Evaluation: *FFY 2008 (non-SNAP partners completed the evaluation)*

Name: **Office of Farm to Fork: (FY 17-19)**

Type: Primarily Process Evaluation

Questions: How many stakeholders participated in the Farm to School Network Transition meetings? What directions and priorities did they identify for the network moving forward? Results will be used in setting the transition plan and Network strategy under CDFA's leadership.

Measures will be collected with the use of sign-in sheets at meetings, and the final deliverable of the best practice documentation.

SNAP-Ed Framework Linkages: ST8 evaluating multi-sector partnerships, MT5a. Number and proportion of sites or organizations that make at least one change in writing or practice to expand access or improve appeal for healthy eating LT8b.

Websites Percentage and reach of partner websites that feature positive content about SNAP-Ed marketing, media advocacy, and PSE projects.

Name: **Harvest of the Month: (FY 17 & 18)**

Type: Process, Formative and Impact/Outcome Evaluation

Questions: How many lessons and workbooks were completed? How well did the materials prepare the teachers for instruction? How well were the messages and materials received by the students? How many sites were recruited to pilot test? How many teachers and students were engaged in the pilot test? Did fruit and vegetable knowledge, attitudes, beliefs, preferences and/or consumption behavior change as a result of these lessons?

Measures will be collected using teacher/instructor surveys online and key informant interviews with select participants. Student workbooks will be collected and reviewed. Pre and post tests will be administered in sites as district policies allow. Results will be used to inform final materials development.

Evaluation: Formative work was done in FY 2009; FY 2016 workbooks and lessons were drafted and evaluated. FY 17 proposal will allow for the re-testing of the revised materials, with goal to finalize.

SNAP-Ed Framework Linkages: Intention or goal setting related to eating from the five food groups throughout the day: ST1a. Fruit ST1b. Vegetables, ST2b. Read nutrition facts label or nutrition ingredients lists.

Name: **Champion Provider Fellowship: (FY 17-19)**

Type: Primarily Process Measures

Questions: How many LHDs, Health Officers, Providers and Partners participated in meetings, trainings and technical assistance? How many interventions engaged a Champion Provider?

Measures will be collected using technical assistance logs, training sign-in sheets, and activity tracking forms. Results will be used to inform future efforts and resources to support Champion Providers.

Evaluation: These process measures were also documented in FY 16.

SNAP-Ed Framework Linkages:

- ST6a. Champions: The number of champions that specifically advanced SNAP-Ed activities and mission, by domain and setting type, and their role;
- ST6b. Sites: The number and percent of SNAP-Ed qualified organizations or sites that benefited from the activities of champions, by domain and setting type; and
- ST6c. Accomplishments: Written, audio, or visual descriptions of the activities and accomplishments of the champions, by domain and setting type.

Name: **Afterschool Interventions: (FY 17-19)**

Type: Primarily Process Measures

Questions: How many afterschool professionals participated in trainings and/or technical assistance? How many policy, systems and environmental changes were implemented in afterschool sites? How well did the CX^3 Afterschool Tool materials prepare afterschool professionals to implement an afterschool assessment? As applicable, how easy did the students feel that tool was to use?

Measures will be collected using technical assistance logs, training sign-in sheets and/or web attendance reporting. Afterschool organizations will report on any PSE changes to the Center for Collaborative Solutions project lead. CX^3 Afterschool Tool feedback will be collected using a mixture of online surveys, key informant interviews and/or observation. Feedback will be used to refine the intervention and tool.

Evaluation: Formative review was initiated in FY 14 for the CX^3 Afterschool Tool and the tool was refined based on the feedback.

SNAP-Ed Framework Linkages: ST3e. Recess, lunchtime, classroom, before- and afterschool physical activities (school activities—non-PE), ST5b. Number of sites or organizations with an identified need for improving access or creating appeal for nutrition and physical activity supports, MT5a. Number and proportion of sites or organizations that make at least one change in writing or practice to expand access or improve appeal for healthy eating, MT6a. Number and proportion of sites or

organizations that make at least one change in writing or practice to expand access or improve appeal for physical activity or reduced sedentary behavior.

Name: California Fit Business Kit: (FY 18 & 19)

Type: Primarily Formative Measures

Questions: Is there any new content, tools, resources and/or materials that could be used to expand content of the current California Fit Business Kit? How user-friendly is the new content and/or resources?

Measures will be collected from subject-matter expert reviewers and CDPH Worksite Program partners. Feedback will be used to refine the toolkit.

Evaluation: The CA Fit Business Kit is currently listed in the SNAP-Ed Strategies and Interventions Toolkit as emerging.

SNAP-Ed Framework Linkages: Intention or goal setting related to eating from the five food groups throughout the day: ST1a. Fruit, ST1b. Vegetables, ST3f. Walking steps during period assessed (e.g., increasing daily goal by ≥2,000 steps), ST3i. Sitting on weekdays while at work, at home, while doing course work, and during leisure time, ST5b. Number of sites or organizations with an identified need for improving access or creating appeal for nutrition and physical activity supports, MT5a. Number and proportion of sites or organizations that make at least one change in writing or practice to expand access or improve appeal for healthy eating, MT6a. Number and proportion of sites or organizations that make at least one change in writing or practice to expand access or improve appeal for physical activity or reduced sedentary behavior.

Name: Rethink Your Drink Oral Health Project: (FY 17-19)

Type: Primarily Formative and Process Measures
Questions: Are there examples of any successful healthy beverage interventions conducted in an oral health office environment? What are the critical elements contributing to the success? How many oral health professionals have participated in the trainings and technical assistance opportunities? How are the proposed nutrition education activities and/or materials received by oral health professionals and/or their low-income clients? How many patients receiving Rethink Your Drink education during the pilot phase?

Measures will be collected using literature reviews and contacts with subject matter experts in both healthy beverage and oral health fields. Information will be used to further refine nutrition education approaches in oral health environments.

SNAP-Ed Framework Linkages: ST1l. Drink water instead of sugary beverages. (messaging), ST5b. Number of sites or organizations with an identified need for improving access or creating appeal for nutrition and physical activity supports,

MT5a. Number and proportion of sites or organizations that make at least one change in writing or practice to expand access or improve appeal for healthy eating.

Name: Health Ministry Guide: (FY 18 & 19)

Type: Primarily Formative

Questions: How are the Health Ministry Guide resources received by faith leaders? Does the Guide adequately equip the leaders to implement a faith-based nutrition and physical activity intervention? How does content differ for different faiths and/or ethnicities and languages?

Formative data will be collected through a combination of key informant interviews and/or online surveys. Feedback collected will be used to inform the adaptation of materials for additional cultures.

Evaluation: En Cuerpo y Alma was evaluated in FFY 14. That intervention has content similar, though not exact, to the Health Ministry Guide.

Name: Native American Pilot: (FY 17-19)

Type: Primarily Formative and Process

Questions: Are there examples of any successful healthy beverage interventions conducted with the specific selected Native American Community? What are the critical elements contributing to the success? How are the proposed nutrition education activities and/or materials received by the Native American community? How many individuals received education during the pilot phase?

Measures will be collected via online search for resources and key informant interviews with subject matter experts and/or community. As project develops may also consider pre- post-tests.

SNAP-Ed Framework Linkages: Intention or goal setting related to eating from the five food groups throughout the day: ST1a. Fruit, ST1b. Vegetables, ST1l. Drink water instead of sugary beverages. (messaging), ST3a. Physical activity and leisure sport (general physical activity or leisure sport)

Name: Policy Inventory (FFY 18-19)

Type: Process and formative measures

Questions: What approach is being conducted for the evaluation, including the scope, design, measures and data collection? What are the plans for using the results?

Measures will be collected through stakeholder input and feedback as well as completed policy scoring tools and web analytics.

This is a new project. MT7 Government Policies.

Name: US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

Type: Process and formative measures

Questions: How many sites were recruited to pilot test the intervention? How well did the SNAP-Ed adaptations fit within the existing program structure? How well did the materials and training prepare the mentors for instruction?

Measures will be collected through a combination of gathering stakeholder feedback, and/or surveys. Feedback collected will be used to inform the adaptation and feasibility of implementing the program with SNAP-Ed funding.

This is a new pilot project that aligns with the following SNAP-*Ed Framework* indicators: ST3 Physical Activity and Reduced Sedentary Behavior; ST5 Need and Readiness; ST7 Organizational Partnerships; MT6 Physical Activity and Reduced Sedentary Behavior Supports; and LT6 Physical Activity Supports Implementation.

4. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction. Retain written agreements.

Partnership Plan Implementation (FY 17-19)

CDPH, along with public hospitals and public health care systems, LHDs, CNAPs, multi-county collaboratives, and other CDPH partners, will share and promote local best practices and efforts to advance the implementation of lasting PSE changes low-income communities statewide.

Early Care and Education: Potter the Otter Lessons: (FY 17 & 18)

CDPH, Alameda County Office of Education, and selected low-income early care and education (ECE) sites will partner to test the intervention in year two of the project (FY 2018). Colleagues with the California Department of Education (CDE) will be consulted on the project as well to ensure consistency with the intent and content of the Desired Results Developmental Profile (DRDP) and the Preschool Learning Foundations. First 5 Santa Clara will continue to be a partner in Potter-related materials development and will provide design and layout support.

Early Care and Education: PSE Primer: (FY 18 & 19)

A variety of ECE related partners will be consulted in the development of this project, including but not limited to: CDE, the Child Care Food Program Roundtable, First 5 California, California Child Care Resource and Referral Network, and the Women, Infants, and Children and Maternal and Child Health Programs, to ensure accurate representations of key aspects of California's ECE landscape and opportunities to advance policy, systems and environmental change.

Office of Farm to Fork: (FY 17-19)

The Office of Farm to Fork will continue to expand Farm to Fork activities in collaboration with key opinion leaders from the agricultural field, education field, Office of Planning and Research, Health in All Policies, California Department of Education, California Department of Social Services, UC CalFresh, Food Banks and Food Policy Councils.

Harvest of the Month: (FY 17 & 18)

Colleagues with the California Department of Education (CDE) will be consulted on the project to ensure consistency with the intent and content of the Desired Results Developmental Profile (DRDP) and the Preschool Learning Foundations and California Core Content Standards.

Champion Provider Fellowship: (FY 17-19)

Champion Provider activities will coordinate with Local Health Officers, LHD and CNAP efforts to maximize reach and collaboration opportunities to engage the support of providers for PSE work of the local health departments and CNAPs.

Afterschool Interventions: (FY 17-19)

Partnerships include targeted schools and school districts, Boys & Girls clubs, California Afterschool Network, California After School Resource Center.

California Fit Business Kit: (FY 18 & 19)

Qualifying worksites and professionals participating in key informant interviews and review of updated tools.

Rethink Your Drink Oral Health Project: (FY 17-19)

CA Oral Health Program/Unit and the CDPH Maternal Child Adolescent Health (MCAH) Oral Health Program as primary partners, with additional consult from CA Dental Association, California Society for Pediatric Dentistry, Center for Oral Health, Denti-

Cal, school-based health centers, FQHCs, mobile dental van providers, First 5 Association/First 5 CA oral health efforts and/or WIC.

This project will also explore linkages with Champion Provider project to enhance oral health professional participation.

Health Ministry Guide: (FY 18 & 19)

Collaborate with African American and faith based communities in order to receive feedback and guidance on the redesign of this material. Consider cultural adaptation for Latino audience, Chinese or Vietnamese audience or faith adaptation as per formative recommendations.

Native American Pilot: (FY 17-19)

Potential partners may include, but are not limited to: Native American Health Centers, Indian Health Services, Tribal Organizations, food distribution sites, California Rural Indian Health Board, and/or select local health departments and local implementing agencies.

Policy Inventory (FFY 18-19)

A similar project has been developed and implemented in the California Tobacco Control Program, a sister program in CDPH; they will provide support and technical assistance in the approach and development for this project. CDPH will work with the UCD team and selected external partners to assist with developing the scoring rubric, - these partners will vary based on the policy themes and may include, but not be limited to ChangeLab Solutions, American Cancer Society, Latino Coalition for a Healthy California, California Alliance of School-Based Health Centers, and Children Now. Additional partners will also be recruited to assist with coordinated efforts in publicizing the project, messaging and communicating short summaries, and trainings.

US Soccer Foundation Pilot: Afterschool (FY 18 & 19)

As physical activity is a strong interest of UC CalFresh, and the other state implementing agencies (SIAs), this project will provide routine updates on progress, as well as recruit SIA assistance in reviewing materials and making recommendations for adaptations. The assigned CDPH staff members will provide project oversight and guidance to both the identified local implementing agency and subcontractor and the US Soccer Foundation and work with the Research and Evaluation section of CDPH to ensure this pilot project is implemented as intended and will yield meaningful information to aid in future decision-making processes for California's SNAP-Ed program.

FFY 2018 SNAP-Ed Budget

Organization Name:	California Department of Public Health
State-Level Project:	California Department of Food and Agriculture
FFY 2018 Total Budget:	**$447,592.00**

1			ZSFG/1001 Potrero Ave, San Francisco CA	Data Network Charge3. Data Network Recharge: The University's Enterprise Network Services (ENS), also known as data network service recharge or data network recharge, provides funding for critical equipment in support of UCSF's electronic information flow. Per agreement signed January 24, 2008 with The Department of Health & Human Services (DHHS), Division of Cost Allocation, (cognizant agency to the University), the University does not disclose ENS costs as F&A pool costs and can charge for ENS costs as direct costs. The data network recharge is based on the current rate per FTE, consistent with the current billing rates for the data network recharge.	1.79042	$43.98	12	$945

2			ZSFG/1001 Potrero Ave, San Francisco CA	CCDSS-2. Computing and Communication Device Support Services (CCDSS): On July 1, 2013 the University initiated direct charging for CCDSS has an integral component of its Enterprise Network Services (ENS) to provide support to campus voice and data technology functions. CCDSS includes software installation/updates, internet security, hardware setup/configuration, and centrally managed patching, storage and backup. Direct charging of these support services in conjunction with the Data Network Recharge are covered under Part 3.2.0 – Service Centers, Communication Services, of the University's Cost Accounting Standards Board Disclosure Statement (CASB Form DS-2) ensuring that there is no duplicate reimbursement from Federal and non-Federal sponsors. The CCDSS charge is based on the current rate per FTE, consistent with the current billing rates for CCDSS. Recharge rates are computed in accordance with the requirements of 2 CFR Part 200 and will be reviewed and adjusted annually.	1.79042	$56.08	12	$1,205	
3			ZSFG/1001 Potrero Ave, San Francisco CA	GAEl Insurance-1. General Automobile and Employee Liability: GAEL is business travel accident insurance that covers a wide variety of accidents and is provided to all University employees traveling on official University business. The GAEL insurance assessment is calculated by applying the current GAEL rate x $100 of salaries budgeted. Current rates: 7/1/16 - 6/30/17: 93 cents 7/1/17 - 6/30/18: $1.01	1.79042	$78.75	12	$1,692

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

Fringe benefits are calculated based on salary band and job title code. Rates are reviewed and adjusted on July 1st of each year. Rates include OASDI, Medicare, Workers Compensation, Medical/Dental/Life Insurance, Unemployment Insurance, Disability Insurance, Employee Support Services, Benefit Administration, Other Post-employment Benefits, and Retirement.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

See State Level goals.

b. State Level Objectives

See State Level objectives.

2. Description of projects/interventions. The following information should be provided:

Project Title

California SNAP-Ed Statewide Training & Capacity Building Support for State Implementing Agencies (SIAs), their respective Local Implementing Agencies (LIAs), and Local Health Departments (LHDs)

a. Related State Objectives

Specify the objectives that the project/intervention will accomplish. Use the SMART format. Clearly state the purpose of the project.

By September 30, 2019, at least 75% of Local Health Departments (LHDs) and SIAs will report an increase in knowledge and/or skills pertaining to the training and at least 85% will be satisfied or very satisfied with training resources and logistical support for conferences, meetings, and events.

b. Audience

Specify the audience category as explained in Section A: Identifying and Understanding the Target Audience and other relevant characteristics of the proposed audience (e.g., age, gender, etc.). Describe how the project will focus education on the SNAP target audience.

Social marketing, nutrition education (indirect and direct) and physical activity promotions conducted are for the benefit of individuals, families, and communities at or below 185% FPL. Training and technical assistance services and support for Local Implementing Agency (LIA) grantees and their subcontractors will improve effectiveness of interventions reaching this population and these communities. Audiences are described as the following:

SNAP-Ed eligible at or below 185% FPL throughout California

Gender: Female and Male

Ethnicity: All races and ethnicities with specific targeting for African American, Latino and Asian communities.

Ages: Adults 18+, primarily women with children, and children ages 3- 17 years with concentrated efforts aimed at young adolescents ages 9- 11 years.

Local Health Department Grantees and their subcontractors that provide nutrition education and obesity prevention services to all ages and ethnicities of Californians participating in CalFresh and CalFresh eligible at 185% or below of the FPL.

c. Food and Activity Environments

Describe how the project will reflect audience's awareness and access to healthy foods and beverages, and places to be physically active.

Support activities for Local Implementing Agencies (LIAs) and Local Health Departments (LHDs) will increase their capacity to provide direct services to the SNAP-Ed audiences at the community level. Direct services will be provided in an integrated fashion and offered to other local SNAP-Ed implementing agencies.

State level training and technical assistance for SNAP-Ed intermediaries facilitates the extension of direct nutrition education and physical activity promotion throughout comprehensive, multi-level interventions aimed at influencing environments and systems that promote norms that support healthy food choices and physical activity.

d. Project Description for Educational Strategies

Note how you will implement the project: how and where it will be delivered, its duration, the projected number of participants, the frequency of contacts (number of classes, mailings, billboards, etc.), and key educational messages.

I. Provide Statewide Training Services:

California Department of Public Health (CDPH) provides statewide training services to Local Implementing Agencies (LIAs) on behalf of the California Department of Social Services (CDSS) and in collaboration with State Implementing Agencies (SIAs). The development and implementation of *Training Plan* is viewed as an integral part of the multi-year SNAP-Ed planning effort; and, therefore, requires collective input from internal and external partners and stakeholders.

Key advantages of coordinating trainings at the State level include the ability to disseminate trainings widely, ensure consistency in messaging that meets collective programmatic and administrative needs of all SIAs, and reinforce the importance of leveraging resources with internal and external stakeholders.

A. Needs Assessment

The following FFY 2016 needs assessments process will be used to inform the Training Plan for FFY 2017-2019.

1. On April 1, 2016, CDPH successfully conducted the first *California SNAP-Ed Training and TA Needs Assessment Survey* to assess LIA needs for FFY 2017. Cumulative SIA summary and agency-specific summary reports were shared and discussed with SIAs.
2. FFY 2017 – FFY 2019 Integrated Work Plan (IWP) data is reviewed to assess LIA projected plans. Preliminary IWP data helps gauge LIA planning efforts and this information supplements the results of the *Survey*.
3. Recognizing that LIA feedback is only a part of a comprehensive needs assessment process, CDPH plans to interview each SIA to assess their agency-specific needs and projections for the next three years. We will also use this time to review and discuss their LIA Survey summary report and preliminary IWP data to ensure trainings offered are in alignment with each SIA's overall needs. After the rounds of individual SIA listening sessions are completed, the Statewide Training Manager Lead will convene a Statewide Training Planning Meeting with all SIA managers and their designated leads to finalize the *Training Schedule* for each fiscal year.

4. This cyclical process will repeat each FFY to align training needs and capacity building support for the new FFY.

B. Planning Process

The planning process for statewide training and capacity building support for SIAs and LIAs incorporates various methods to actively engage internal and external stakeholders, and invites SIA collaboration and participation where possible. (Refer to II.B for more information on active support and communication with SIAs/LIAs.)

1. Activity 1: Annual Training Cycle

The development of most new trainings take place during the first half of the FFY year and the second half is reserved primarily for designing new trainings for the following FFY. Existing trainings continue to be offered throughout the year and in various formats.

Description of Major Activities

a. **Activity 1.a:** Conduct an annual LIA training needs assessment (1st quarter),

b. **Activity 1.b:** Analyze results and compile a report for SIA-level planning meetings (2nd quarter),

c. **Activity 1.c.:** Finalize plans for inclusion in the State Project Summary submission (3rd quarter), and

d. **Activity 1.d:** Implement the following year's Training Schedule beginning October 1 of the following FFY.

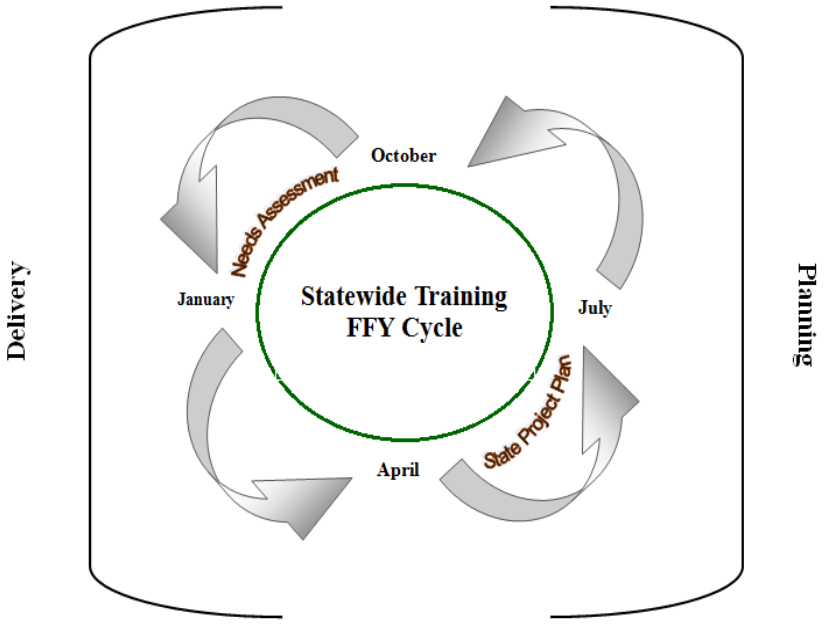

Illustration of the Statewide Training Cycle

2. Activity 2: Development and implementation of a *Training Schedule*

The cyclical process of defining the annual *Training Schedule* repeats each FFY and initially includes new projections for planning purposes

- Develop projections for FFY 2018 and FFY 2019 trainings for finalization by June 2017and June 2018, respectively
- Current training projections include continued capacity building support and SIA coordinated (TA) such as:

Partnering and Planning for Community Change	Inspiring Change with Communication	Evaluating Efficacy
▪ Identifying community health needs and priorities; ▪ Recruiting and retaining diverse partners ▪ PSE strategies to advance health equity; ▪ Orientation to SNAP-Ed and SNAP-Ed Guidance; ▪ Maximizing the impact of your IWP	▪ Learner centered teaching methods; ▪ Using stories to communicate your message and inspire action; ▪ Skills for facilitating dialogue, consensus and participation; ▪ LCE implementation of topic specific curricula and programs; ▪ Speaking to the media – tips and practice for communicating your message	▪ Fidelity guidelines for modifying curricula; ▪ Steps for implementing interventions across the SEM; ▪ Program evaluation to assess impact and improve outcomes; ▪ Reporting procedures for PSE evaluation

3. Activity 3: Training Implementation Tool

The *Training Implementation* tool is used to develop LIA trainings, and is particularly relevant for trainings that support evidence-based interventions. The tool serves several purposes:

a. As a *codifying tool*, it categorizes trainings on the training webpage and the CDPH Training and Events Calendar by settings and intervention categories.
b. As a *verification tool*, it ensures that learning objectives and interactive activities engage learners in a meaningful and relevant way by addressing the audience's SIA target populations and target behaviors, and Integrated Work Plans (IWPs).
c. As a *brand-building tool*, it helps develop consistent and targeted State-level messaging about the overall direction of SNAP-Ed in California.

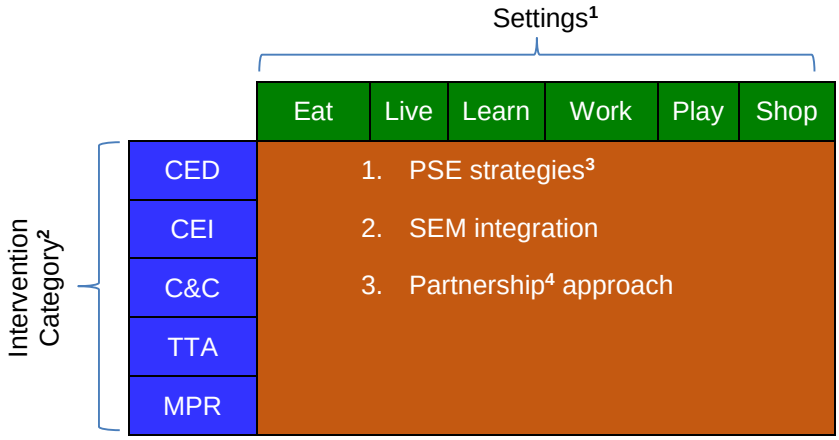

Illustration of the Training Development Tool

1 = trainers are to identify LIA trainees and their respective target populations (age groups) in order to address target behaviors;
2 = trainers to recognize role of IWP in the implementation of interventions;
3 = trainers are to reinforce delivery of evidence-based intervention as designed to ensure program fidelity; and
4 = trainers are to promote leveraging resources, including non-SNAP-Ed partners

Intervention Categories Legend: CED = Community/Nutrition Education Direct; CEI = Community/Nutrition Education Indirect; C&C = Coordination and Collaboration; TTA = Training and Technical Assistance; MPR = Media, Social Media, Public Relations and Messaging

C. Training Plan

CDPH plans to support State Implementing Agencies (SIAs) in their implementation of a variety of SNAP-Ed approaches within the framework of the Social Ecological Model by providing a statewide trainings accessible to local implementing agencies (LIAs) and consisting of interactive, evidence-based trainings and website resources. In addition to providing foundational trainings offered in FFY 2016, CDPH plans to provide a number of high-in-demand training topics to support LIAs training and technical assistance (TA) needs and SIA priorities in the next three years. The plan utilizes blended training approaches that include skill-based training and train-the-trainer model and offers trainings and TA in various formats such as in-person, webinar, and online self-paced training as appropriate. (See *Matrix of Trainings, Technical Assistance, & Meetings* summary)

1. Activity 1: Evidence–Based Interventions Training

Provide four to six (4 – 6) each per FFY of regional, in-person and webinar train-the-trainer and/or skill-based trainings on evidence-based interventions such as the CDPH developed Retail Program, Rethink Your Drink (RYD), Fit Business Kit, Youth Participatory Action (YPAR), Children's' Power Play Initiative, and the Healthy Eating and Active Toolkit for Community Educator.

Key Educational Messages: The primary message used to ground and connect the work of SNAP-Ed intermediaries is consistent with SNAP-Ed goal to improve "the likelihood that persons eligible for SNAP will make healthy food choices within a limited budget and choose physically active lifestyles consistent with the current 2015-2020 Dietary Guidelines for Americans." (*FFY 2017 SNAP-Ed Guidance*, page 11)

Secondary messages focus on using the Social Ecological Model (SEM) to plan and provide SNAP-Ed nutrition education and obesity prevention services designed to: 1) achieve positive changes in knowledge, goals, intentions and skills at the individual level; 2) expand to add organizational, policy, marketing or community engagement changes at the environmental level and 3) successfully engage multiple agencies (that receive FNS funding) to achieve complementary change at the community level.

All interactive trainings will increase knowledge and skills and prepare participants to implement and train others to conduct evidence based interventions tailored to address specific cultural audiences. All training materials will be posted on the web for SIA/LIA access and use.

Activity 1 Table: Train-the-Trainer Trainings to Support Evidence-Based Interventions

Modality	Training Duration	Projected Number of Participants/Training	Frequency of Trainings per FFY
In-person, regional	2 – 4 hrs	25 – 50*	4 – 6
Webinar	1 – 2 hrs	25 – 250*	4 – 6
Web-based training materials	n/a	Varies	As needed

*Participation limit can be increased as needed. Numbers listed above represent the ideal.

2. Activity 2: Collaborative Dialogue Training

Provide four to six (4 – 6) each per FFY of regional, in-person and webinar train-the-trainer and/or skill-based trainings on collaborative dialogue approach, aimed to improve communication and enhance efficacy of specific evidence based strategies and interventions. These trainings would focus on multiple levels of intervention, including direct education, organizational/institutional processes, and community partnerships within the context of SNAP-Ed.

Key Educational Messages: The primary message is *How to maintain fidelity to specific evidence based interventions while making the learning engaging and interactive.* Interventions may include *My Plate for My Family Community Toolkit, Eat Healthy, Be Active Community Workshop* and *Toolkit for Community Educators.* Secondary messages focus on enhancing the success of events as varied as one-on-one education, classes, trainings, and meetings by ensuring mutual respect, engagement, relevance, and safety of all participants. Other trainings would focus on strengthening engagement skills and confidence of staff at LHDs or SIAs responsible for developing or leading training sessions planning and facilitating meetings, and developing and conducting assessments.

Activity 2 Table: SNAP-Ed Collaborative Dialogue Trainings

Modality	Training Duration	Projected Number of Participants/Training	Frequency of Trainings per FFY
In-person, regional	2 – 4 hrs	25 – 50*	4 – 6
Webinar	1 – 2 hrs	25 – 250*	4 – 6
Web-based training materials	n/a	Varies	As needed

*Participation limit can be increased as needed. Numbers listed above represent the ideal.

3. Activity 3: Community Engagement and Partnership Building Training

Provide four to six (4 – 6) each per FFY of regional, in-person and webinar train-the-trainer and/or skill-based trainings and support for stakeholder and community engagement. Activities include support of LIA/LHD development and implementation of single and multi-county action plans for extending partnerships in their respective communities/regions; support for facilitating collaborative relationships among FNS organizations including but not limited to SNAP-Ed LIAs; support LIAs/LHDs with the coordination of logistics and promotion of coalition meetings and teleconferences; support for the provision of training to orient new members and the implementation of strategies to retain and recognize seasoned members.

Key Educational Messages: The FNS mission statement of working "with partners to provide food and nutrition education to people in need in a way that inspires public confidence" (*2017 SNAP-Ed Guidance,* p. 11) is the primary message used to ground and connect the work of SNAP-Ed intermediaries. Secondary messages focus on message framing, strategies for effective stakeholder and community engagement, action planning, consensus building, group facilitation, conflict resolution, and active listening.

Activity 3 Table: SNAP-Ed Community Engagement and Partnership Building Trainings & Support

Modality	Training Duration	Projected Number of Participants/Training	Frequency of Trainings per FFY
In-person, regional	2 – 4 hrs	25 – 50*	4 – 6
Webinar	1 – 2 hrs	25 – 250*	4 – 6
Web-based training materials	n/a	Varies	As needed

*Participation limit can be increased as needed. Numbers listed above represent the ideal.

CDPH will continue to provide LIAs/LHDs with training, and technical assistance on strategies and interventions; partnership development and logistical support for single and multi-county collaboratives; and media/public relations outreach and coordination. CDPH will expand the existing California State University Sacramento (CSUS) Conference Planning Services contract to provide logistical support at the regional level to facilitate active and accessible engagement in coalitions and collaboratives pursuing SNAP-Ed objectives. The support services may include acquisition of meeting locations, and, if needed, meeting facilitation; engagement of subject matter experts and coordination of SNAP-Ed promising practices exchanges as well. (See *III. Overall Coordination of Services for SIA Support* section for additional information).

4. Activity 4: SNAP-Ed Orientation Training

Provide four to six (4 – 6) each per FFY of regional, in-person and webinar train-the-trainer and/or skill-based trainings targeted to LIAs on California SNAP-Ed orientation training addressing program guidance and priorities as well as orientation on relevant administrative and fiscal guidelines and practices. These foundational training sessions will set the stage to accommodate long-range plans to integrate processes at the state level.

Key Educational Messages: The FNS mission statement, of "working *with partners to provide food and nutrition education to people in need in a way that inspires public confidence*" is the primary message used to ground and connect the work of SNAP-Ed intermediaries (*FFY 2017 SNAP-Ed Guidance*, page 11). Secondary messages focus on coordinating comprehensive SNAP-Ed services using the Social Ecological Model (SEM) to provide nutrition education and obesity prevention services through a combined and coordinated effort of direct education, multi-level interventions and community-wide public health approaches.

Activity 4 Table: SNAP-Ed Program & Administrative Trainings

Modality	Training Duration	Projected Number of Participants/Training	Frequency of Trainings per FFY
In-person, regional	2 – 4 hrs.	25 – 50*	4 – 6
Webinar	1 – 2 hrs.	25 – 250*	4 – 6
Web-based training materials	n/a	Varies	As needed

*Participation limit can be increased as needed. Numbers listed above represent the ideal.

5. Activity 5: SNAP-Ed Program Evaluation

In collaboration with staff from the Nutrition Policy Institute, provide four to six (4 – 6) each per FFY of regional, in-person and webinar train-the-trainer and/or skill-based trainings and support to evaluate SNAP-Ed interventions. Activities include support for implementing: Activity Tracking Form (ATF) reporting procedures to capture process evaluation data; Impact Outcome Evaluation (IOE) procedures to measure multi-session nutrition education interventions; the RE-AIM (Reach, Effectiveness, Adoption, Implementation and Maintenance) planning and evaluation framework to assess progress toward implementing PSEs; and, the SNAP-Ed Evaluation Framework to inform future planning and evaluation efforts.

Activity 5 Table: SNAP-Ed Program Evaluation

Modality	Training Duration	Projected Number of Participants/Training	Frequency of Trainings per FFY
In-person, regional	2 – 4 hrs	25 – 50*	4 – 6
Webinar	1 – 2 hrs	25 – 250*	4 – 6
Web-based training materials	n/a	Varies	As needed

*Participation limit can be increased as needed. Numbers listed above represent the ideal.

II. Active Communication and Support:

Organizational changes for SNAP-Ed Implementing Agencies and their intermediaries at state and local levels heightens the need for timely, clear and consistent communication at all levels. CDPH has a dual programmatic role in providing services to its LHDs, and to LIAs on behalf of CDSS and in collaboration with SIAs. CDPH will continue provide training and technical assistance to Local Health Departments as outlined in the CDPH Training Transition Plan. Throughout the three-year cycle (FFY 2017 – 2019), CDPH will continue to strengthen communication through site visits, teleconferences, online workspaces, electronic communication and multi-level internal and external collaboratives, as follows.

A. Local Health Departments (LHDs)

1. **Activity 1: Technical Assistance** – The first line for maintaining open communication with CDPH SNAP-Ed grantees is through ongoing technical assistance with dedicated Project Officers (POs) and Contract Managers (CMs). In FFY 2017 – 2019, the PO and CM teams will continue to facilitate consistent communication and shared understanding of programmatic and fiscal considerations among CDPH staff. POs and CMs meet bi-monthly to ensure consistent TA and information dissemination to local agencies. Training Development and Support (TDAS) Section Training Consultants and other subject matter experts from across the branch also provide additional technical assistance as appropriate.
2. **Activity2: SNAP-Ed 2.0 Workgroup** – CDPH participates in bi-monthly SNAP-Ed 2.0 meetings and facilitate coordination and collaboration in order to support LHDs in their implementation of the county integrated work plans.
3. **Activity 3: SNAP-Ed Program Advisory (SPA) Team** – LHD SNAP-Ed program liaisons that represent LHDs within the seven service areas meet monthly on a phone call to communicate and provide feedback on issues, concerns, and programmatic and administrative decisions that impact LHDs.
4. **Activity 4: CDPH LHD Training Support Team** – Cross sectional CDPH staff subject matter and instructional design experts collaborate to review, revise, design, deliver and evaluate SNAP-Ed training interventions for LHDs and LHD subcontractors. Feedback from external stakeholders helps inform the process and products.
5. **Activity 5: CDPH LHD Collaborative Site** – CDPH will develop a SharePoint Collaborative Site as a means to store, organize, and share information with LHDs. In addition to being a platform for enhancing technical assistance provided to LHDs, the site will be used to encourage networking and collaboration among LHDs, and allow them to upload requested documents.

B. SIAs/LIAs

The planning process of statewide training and capacity building support for SIAs and LIAs incorporates various methods to solicit internal and external stakeholder feedback, and invite SIA collaboration and participation where possible. The communication channels consist of vertical and horizontal pathways.

1. Activity 1: Engaging Internal Stakeholders (SIAs)

CDPH has instituted a series of leadership and staff level meetings to facilitate cross-SIA collaboration and coordination effort to inform long-range and short-range planning for statewide trainings and local LIA/LHD support.

Training Program Design

- **Activity 1.a:** SNAP 2.0 Meetings: The Training Manager utilizes this forum for providing statewide training and LIA support updates, engaging in high-level discussions and/or requesting final decision on action items
- **Activity 1.b:** The Statewide Training Planning Meetings (STPM) are working meetings that bring together SIA-level managers and their designated leads. Held at least once each quarter, the purpose of these meetings is to address SIA-level planning needs and recommend relevant trainings that align and support their multi-year planning efforts. These meetings serve to drive overall direction and provide general guidance to the Statewide Training Manager who facilitates the STCMs.
- **Activity 1.c:** The Statewide Training Coordination Meetings (STCM) are working meetings that bring together CTLs and SIA SMRs to develop a coordinated framework for developing high-need training that supports the multi-year planning process. For FFY 2017, the focus will be on creating comprehensive training programs on Physical Activity (PA) Integration and school-based interventions. STCM meetings serve to provide defined guidance to CTLs and SIA SMRs based on feedback from SIA managers at the Statewide Training Planning Meetings.

  1.c.1 Activity 1: LIA Training Programs on School-Based Interventions and PA Integration

  Many of the trainings offered to LIAs in FFY 2016 originated from programmatic themes or training topics offered in the past. For FFY 2017, plans are in motion to develop comprehensive evidence-based training programs beginning with school-based interventions and PA integration. Components of the training programs will be specifically developed for two main audiences: the LIA administrator and the LIA implementer. This work will influence the layout of the training webpage for each topic and, in its final form, will become the template webpage layout for all LIA trainings in FFY 2017 - 2019. This activity is a result of a series of Statewide Training Coordination Meetings (STCMs) that concluded on April 11, 2016. (See II. Active Communication and Support for more information on STCMs).

  1.c.2 Activity 2: Statewide Regional Support Services – (See *III. Overall Coordination of Services for SIA Support. C. Activities 1, 2, and 5* for details)

  a. SNAP-Ed Promising Exchange Practices (PPE)

  b. SNAP-Ed Peer Exchange Program (PEP)

  c. SNAP-Ed Partnership-Building Support (PBS)

1.c.3 Activity 3: SIA TA Planning and Coordination (See *III. Overall Coordination of Services for SIA Support. C. Activity 1, 2, and 5* for details)

The original impetus for having this workgroup was to provide SIA staff the opportunity to observe other SIA TA site visits to appreciate the various dimensions through which SNAP-Ed work is conducted in California. The need has since broadened to define an SIA coordinated approach to TA. In the interest of building capacity and sustaining training efforts, this group will be responsible for proposing a conceptual framework of a coordinated TA process for California SNAP-Ed.

- **Activity 1.d:** CDPH Training Workgroups. The structure of the CDPH training workgroups consists of cross-branch representatives to maximize coordination and integration of activities with internal and external stakeholders where appropriate. SIA managers designate SIA subject matter representatives (SMRs) to participate in the development and/or delivery of statewide trainings scheduled for year. The level of SMR contribution in the development and/or delivery of statewide trainings is highly dependent on SIA interest and/or capacity to participate. At a minimum, CDPH Training Leads (CTLs) extend the opportunity for SMR involvement by regularly communicating with them and soliciting their feedback throughout the development process. Additionally, CTLs are responsible for connecting with external stakeholder groups to facilitate collaboration and minimize duplication of resources. See Activity II.C. for additional information.

Training Program Features & Products

- **Activity 1.e:** Annual SNAP-Ed LIA Training and Technical Needs Assessment Survey: CDPH Research and Evaluation Section will continue to support the Training Development and Support Section in the development of a robust statewide training and technical assistance needs assessment tool to inform program planning. Prior to releasing the survey, the Training Manager will continue to solicit SIA feedback on draft versions of the survey to ensure their needs are represented.
- **Activity 1.f.:** SNAP-Ed Training Website: CDPH main page has been recently redesigned to accommodate end-user need for easy to access information. The training webpage will continue to be updated with easy to access information about national, state, local and regional SNAP-Ed resources including CDPH state and regional training events and archived training webinars. CDPH will continue to promote and set-up training registrations of trainings offered by other SIAs, such as Smarter *Lunch Room* training *and The Science of Nutrition: Nutrition Research Updates* from UC CalFresh. The CDPH training site will be used as a centralized location for all SNAP-Ed related trainings and resources until CDSS's website is ready for rollout.
- **Activity 1.g:** CDPH SNAP-Ed Programmatic Library: A component of the redesigned CDPH Training/TA website is a comprehensive, subject-based library of SNAP-Ed admin, program and training resources including links to SNAP-Ed Connection and other relevant external training & program resources.
- **Activity 1.h.:** SNAP-Ed Civil Rights Training: An updated iteration of the mandatory annual USDA SNAP-Ed Civil Rights Training will continue to be accessible from the CDPH website for use by all SNAP-ED Implementing Agency Staff.

- **Activity 1.i:** E-Learning Modules: Self-guided e-learning modules and YouTube Training Videos will be developed for statewide trainings, where appropriate. Short clips video trainings (5-10 minutes) will be used to address visual demonstration of fiscal documents, contracts, use of GIS tools, and other such tasks. The longer training videos (30-60 minutes) will be used to address core public health and SNAP-Ed capacities such as introducing interventions and programs, demonstrating training delivery methods, and providing a review of public health fundamentals in an engaging format.
- **Activity 1.j:** Place-Based Training on using and training others on evidence-based and research-tested training opportunities such as Coordinated Approach to Child Health (CATCH) and SPARK Physical Activity Institutes will be provided in accessible geographic regions to LIAs/LHDs.

2. **Activity 2: Engaging our primary customers (LIAs)**

   a. **Activity 2a: Statewide SNAP-Ed Training Flyers** promoting scheduled SNAP-Ed trainings are e-mailed to all LIA/LHD staff every month. To promote SIA partnership and communication, SIA Training Leads are solicited to contribute calendar entries and review the flyer for accuracy and completeness prior to distribution.

   b. **Single and Multi-County Coalitions**

      i. Community Nutrition Action Partnerships (CNAPs) - All LIAs/LHDs are encouraged to participate in county level CNAPs. Theme focused meetings are directed at planning, working, sharing and partnership development.

      ii. Multi-County Coalitions (MCCs) – Quarterly SNAP-Ed multi-county collaborative meetings are convened in seven geographic regions of the state to bring LIA/LHD partners together for SNAP-Ed updates, training and relationship building. Logistical coordination and programmatic support is offered to MCCs. Technical assistance is also made available at the county level.

   c. **California SNAP-Ed Connection** – This is an online community collaboration site that will be comprised of topic or region specific subsites. (Refer to III.C.4 for additional information.)

C. Engaging External Stakeholders

In order to incorporate input from non-SNAP-Ed funded entities to specifically inform statewide training, the Training Development and Support Section (TDAS) has joined staff from Policy, Partnerships and Program Development (PPPD) Section in attending meetings with non-SNAP-Ed partners. Training staff also participate in CNAP meetings along with their PPPDS colleagues. The CDPH *Partnership Implementation Plan* details a mechanism for coordinating and identifying needs and many of the activities open up communication channels between the State and attendees. Building upon FFY 2016 work, the following TDAS activities will take place in FFY 2017 - 2019:

1. Activity 1: Smarter Lunchroom Movement (SLM) Collaborative

CDPH PPPD section has played a long-standing supportive role in the SLM Collaborative. In December 2015 the SLM Collaborative expressed a renewed interest in revisiting CDPH's role in the collaborative given the recent launch of SNAP-Ed LIA trainings. The Training Manager joined the SLM Leadership Team in January 2016 to participate in the SLM strategic planning efforts and support the development of train-the-trainer model for the SLM trainings in the future. CDPH plans to work with the SLM Collaborative to formalize plans through a written agreement in preparation for FFY 2017. Several CTLs have taken the SLM training series in 2016 and are positioned to contribute to the development and implementation the train-the-trainer training. In the meantime, the following activities will continue:

Activity 1.a: Promote SLM 101 (SLM Orientation), and 201 Technical Advising Professional (TAP) trainings on the monthly e-flyer to LIAs and on the CDPH Training and Events Calendar

Activity 1.b: Set-up training registrations.

Activity 1.c: Issue training certifications and post-training evaluation surveys if needed.

Activity 1.d: Continued participation of the CDPH Training Manager in the SLM Leadership Team meetings and lead training subcommittee activities.

2. Activity 2: California Local School Wellness Training Collaborative (CA-LWSTC)

In collaboration with CDPH PPPD section, CTL on School Wellness training arranged for a meeting in April 2016 with key members of the California Local School Wellness Policy Collaborative to discuss trainings offered statewide. The group decided to form a subgroup (CA-LWSTC) to share and coordinate training plans, promotion of trainings and resources, and ensure consistency of messaging statewide. The efforts of this subgroup will help inform SNAP-Ed LIA trainings on school related interventions.

3. Activity 3: Health in All Policies

The California Health in All Policies (HiAP) Task Force is working on developing an Action Plan. It is in the process of gathering input from its external stakeholders including key CDPH staff to help inform the development of their draft document. CTLs on PA Integration, School Wellness, and School & Community Gardens trainings will work with CDPH key staff to ensure key messaging and resource sharing opportunities on greening and parks are included in the updated versions of the trainings.

4. Activity 4: CDPH/California Department of Education (CDE) Check-in Meetings

In collaboration with CDPH PPPD section, the Training Manager has been included as a standing member of the quarterly CDE check-in meetings. Throughout the three-year cycle (FFY 2017 – 2019), to ensure key staff from both departments are informed on high-level activities and maintain this connection for potential collaborative work where appropriate.

III. Overall Coordination of Services for SIA Support:

A. Activity 1: Coordination of SNAP-Ed Meetings and Conferences

CDPH provides program management, oversight and content expertise for each scheduled events in partnership with California State University, Sacramento (CSUS) Conference Planning Services (logistical and event planning services). CDPH will expand the existing master contract to extend logistical support for multi-county coalitions and collaboratives. Services include assistance acquiring meeting locations, and, if needed, meeting facilitation and note taking. This service can used to support the logistical coordination of SNAP-Ed promising exchanges as well.

CDPH will continue to provide SNAP-Ed funded organizations and partners opportunities to increase their skills, knowledge and expertise around a wide-range of SNAP-Ed programmatic and administrative topic areas through meetings, forums and conferences. CDPH will also continue to provide training and technical assistance to Local Health Departments as outlined in the *CDPH Training Transition Plan* and the *Partnership Implementation Plan*.

Meetings and conferences planned for FFY 2017 - 2019 include:

1st Quarter	2nd Quarter
• LHD Project Directors Meeting – each year • Champion Provider Summit (2017) • Six (6) SNAP-Ed Regional, In-Person Trainings (LHD/LIA) – each year • Six (6) SNAP-Ed Webinar Trainings (LHD/LIA) – each year	• SNAP Ed State and Local Implementing Agency Forum – each year • Health Equity Summit (2018) • Six (6) SNAP-Ed Regional, In-Person Trainings (LHD/LIA) – each year • Six (6) SNAP-Ed Webinar Trainings (LHD/LIA) – each year
3rd Quarter	**4th Quarter**
• Three (3) Champion Summits: Champions for Change (Adults) – each year • Six (6) Regional, In-Person SNAP-Ed Trainings (LHD/LIA) – each year • Six (6) SNAP-Ed Webinar Trainings (LHD/LIA) – each year	• Childhood Obesity Conference (2017 and 2019) • Two (2) Messaging Training – each year • Six (6) Regional, In-Person SNAP-Ed Trainings (LHD/LIA) – each year • Six (6) SNAP-Ed Webinar Trainings (LHD/LIA) – each year

(See *Matrix of Trainings, Technical Assistance & Meetings* summary)

B. State-level Program Events/Projects

1. Local Implementing Agency Forum

The SNAP-Ed Local Implementing Agency Forum (LIAF) provides training and technical assistance opportunities for all California funded LIAs and their invited subcontractors to share their experiences and advance their programming to benefit the health of low-income Californians. The 2-day meeting is planned collaboratively by all State Implementing Agencies, and delivers content relevant to all SNAP-Ed implementers. Content includes administrative updates/trainings, program training, capacity building and best practices from the field. The annual LIAF will include administrative-focused pre-forum webinars, and the in-person meeting will include opportunities for capacity building, networking, and hands-on workshops.

2. Project Directors Meeting

The Project Directors Meeting (PDM) and SNAP-Ed State and Local Implementing Agency Forum were introduced in FFY 2014 as support for Local Health Department, subcontractor staff, and the staff of local implementing agencies when new SNAP-Ed funding model was put into place. This event is held once each FFY year during the first quarter.

3. CCLHO/CHEAC Chronic Disease Prevention Leadership Project (CDPLP)

The CDPLP is directed by a Leadership Team of senior local health department (LHD) leaders from over 24 different counties and has a long track record of building LHD capacity for PSE strategies. Over the next three years, CDPLP will: 1) increase the capacity for LHDs to carryout PSE strategies and enhance cross-sectorial collaboration, 2) foster collaboration with new internal and external partners, and 3) connecting and increasing awareness of LHD leadership (including Health Officers), with CDPH's Champion Provider Program.

4. Childhood Obesity Conference

The biennial Childhood Obesity Conference has been providing attendees the latest research and evidence-based practices and programs since 2001 and will continue supporting SNAP-Ed funded grantees across the state again in 2017. CDPH and its partners (Nutrition Policy Institute, Kaiser, The California Endowment, California State University, Sacramento, and the California Department of Education) have been integrally involved in the planning of the conference as well as presenting on the work of SNAP-Ed funded projects in order to accelerate progress in the field of childhood obesity prevention. The conference planning cycle for this conference is a two-year period. In FFY 2017 and FFY 2019 respectively, CDPH will work with its partners to coordinate the planning of the 9th and 10th Biennial Childhood Obesity Conference using state staff expertise.

5. Health Equity Summit (FFY 18)

CDPH will hold a Health Equity Summit in FFY 2018 for the purpose of developing recommendations for a written strategy to decrease nutrition and obesity health disparities in California. This invitation-only health equity summit would obtain input from national, state, and local experts, public health practitioners, partners, and/or stakeholders to create recommendations to inform an approach to minimize nutrition and physical-activity related disparities in California. Recommendations would describe population-specific outcome measures and identify a strategic direction to achieve health-related equity. The Summit is anticipated to occur on a single business day for up to 50 partner attendees.

Coordination and collaboration will take place with the CDPH Office of Health Equity, Health in All Policies Program, California Tobacco Control and/or other state and local programs that have a history and/or interest in health equity issues as applied to nutrition and physical activity.

Recommendations for strategy will be summarized and information used as a resource for revising state-level project activities, as needed, to further support health equity measures, guide the overall multi-year planning effort, and inform California SNAP-Ed strategic direction.

Because this is a specialized area of expertise, CDPH will release a targeted solicitation to recruit subject matter experts. (See Budget: Health Equity TBD)

C. Regional Events/Projects

CDPH will continue provide training and technical assistance to Local Health Departments as outlined in the *CDPH Training Transition Plan* and the *Partnership Implementation Plan*. Through the CSUS Conference Planning Services, CDPH plans to provide enhanced logistical support and event planning services for meetings and special events in each of the seven regions or service areas (SAs) in California. The Training Development and Support (TDAS) Section has staff assigned to each of the seven SAs who will work in coordination with staff from across the branch, and in collaboration with SIAs as relevant, to support CDPH sponsored events and projects and extend participation to SIAs as follows:

1. **Activity 1:** Partnership Implementation Plan - Projects and activities outlined in the *Partnership Implementation Plan* will be supported through training, technical assistance, and capacity building opportunities including state-assisted sharing of best practices, resources and tools. These include 1) facilitating statewide partnership building opportunities, 2) LHD partnership capacity building opportunities, inclusive of topic/subject-specific roundtable events 3) regional partnership engagement and support, 4) support in-person partnership trainings and web-based trainings related to statewide partnership planning.
2. **Activity 2:** Community Nutrition Action Partnerships (CNAP) - CNAP training, technical assistance and capacity building opportunities, including but not limited to: 1) county-level partnership building events and activities including strategic planning, community engagement, and collaborative building and maintenance workshops for CNAP coordinators and/or members, 2) in-person communication workshops with select CNAP and/or multi-county coalitions and collaboratives, and 3) CDPH staff will also provide State representation and content expertise at selected county-level and multi-county partnership group (e.g., CNAP groups, multi-county coalitions, and collaboratives) meetings and special events.
3. **Activity 3:** Retail Training - This project will continue and increase our capacity to conduct PSE work in healthy retail interventions. The project will assist in program planning to further development the healthy retail interventions available to SNAP-Ed local implementers. Initial formative research will help the program identify and better understand best practices in the national retail landscape as it pertains to health (across the spectrum of all potential PSE efforts within retail interventions). Trainings will be conducted to develop new interventions that will serve the SNAP-Ed population in efforts to purchase healthy food at SNAP retailers. Examples include, but are not limited to, expanding retail interventions to support the new proposed rules to increase depth of stocking requirements for SNAP authorization. New interventions will focus on assisting retailers to increase their variety of staple food items to continuously remain authorized for SNAP and continue serving the low-income population.

4. **Activity 4:** Champion Provider Fellowship - In-person events that bring together LHDs, and CNAP representatives together with Champion Provider Fellows for program planning and engagement opportunities.

5. **Activity 5:** Local LIA/LHD Training and TA - Customized training and TA opportunities to foster and maintain local connections and develop learning communities regionally. In collaboration with SIA partners and CDPH expertise from across the branch and upon launching the projects, TDAS plans to:

    b. **Activity 5.a.:** Assist in the coordination of at least one SNAP-Ed Promising Practice Exchange in each service area each FFY

    Training and TA provided will address region specific need as identified in the SNAP-Ed Integrated Work Plans (IWP) and LIA Training and Technical Assistance Needs Assessment Survey.

    c. **Activity 5.b.:** Develop and implement a statewide SNAP-Ed Peer Exchange Program

    The purpose of the program is to enhance the capacity of LIAs to implement SNAP-Ed in California. Modeled after the California Conference of Local Health Department Nutritionists (CCLHDN) Peer Exchange Program, the program would offer one-to-one mentee and mentor visits and/or a peer-to-peer roundtable exchanges. Additionally, SIAs are in favor of creating an online collaboration site for California SNAP-Ed Connectors.

    Activity 5.b.i.: The California SNAP-Ed Connectors is a subset program of the Peer-to-Peer Mentor Program. This program offers networking and collaboration opportunities for SIAs and LIAs who share common interests. A collaboration site will be used as the platform for exchanging information, share ideas, goals and strategies. The program includes the recruitment of an LIA Connector per topic or region who will be responsible for periodically monitoring discussions and facilitating group discussions. The invite to apply for this voluntary role would be released to LIAs as well as the Mentor distribution list. Facilitated by the Training Manager, SIAs SMRs will help recruit Connectors based on certifications/degrees held, number of years and/or experience, and overall commitment to facilitate group discussions, convene meetings at least twice per year, and promote regional meetings.

e. Project Description for Marketing Strategies

Note how you will implement the program: how and where it will be delivered, its duration, the projected number of participants, and the frequency of messages, etc.

Trainings are advertised on the Training and Events Calendar three (3) months in advance. Post-training recordings and materials are accessible to all SIAs and LIAs on the FFY 2016 and FFY 2017 Training Archive webpages. Statewide SNAP-Ed Training Flyers promoting scheduled SNAP-Ed trainings are e-mailed to all LIA/LHD staff every month and posted online.

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

Statewide trainings on interventions related to nutrition and physical activity education include learning objectives, case studies, and best practices on PSE strategies.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

The Training Development and Support Section references the SIA integrated curricula list to cite training resources to trainees.

h. Development of New Educational Materials

Identify any new materials that you plan to produce or purchase and justify the need and cost.

N/A

i. Key Performance Measures/Indicators (KPI)

List the key measures/indicators of implementation or performance that you will capture or collect. Identify if these are new measures/indicators not collected in the past. An example of an implementation measure is the number of PSAs delivered in each media market during the intervention. One associated performance indicator might be the percent of people in a media market who report hearing the message.

Satisfaction, learning, application and process evaluation measures will be integrated into LIA SNAP-Ed Program trainings, technical assistance, and meetings for LHDs/LIAs. Satisfaction evaluation measures will be useful in 1) identifying trends, 2) isolating problems in program design and 3) making improvements in program delivery. Learning evaluation measures help identify: 1) knowledge, skills and behaviors to build upon or reinforce core competencies, and 2) adapt learning experiences to align with major change initiatives in California SNAP-Ed. Application evaluation measures will be useful in: 1) helping attendees think about how they will use what they learned when they return to work and 2) identify intent to transfer what is learned to the job setting. Process measures will be used to document the resources, activities, meetings, trainings presentations conducted and coordinated through CDPH. Specific metrics will be collected as follows:

I. SIA Statewide Trainings

Quantitative and qualitative data will be collected on all trainings for intermediaries. Information collected includes process measures including number of trainings provided, number of attendees, organizational affiliation of attendees, and training evaluation feedback that contain satisfaction and learning data. The five main training categories are:

A. **Activity 1:** Trainings that support evidence-based interventions

B. **Activity 2:** Trainings on collaborative dialogue

C. **Activity 3:** Trainings community engagement and partnership building

D. **Activity 4:** Trainings on orientation to SNAP-Ed program & administration

E. **Activity 5:** Trainings on SNAP-Ed program evaluation

II. Active Communication and Support

Quantitative and qualitative process measures related to meeting outcomes are applied to the majority of activities outlined in *II. Active Communication and Support section* improving customer communication. These are expressed in the number of meetings, feedback provided/received, solutions reached, and action items identified and documented. Meeting outcomes include revisions to existing processes and procedures or the creation of new ones.

III. Overall Coordination of Services for SIA Support

Quantitative and qualitative data will be collected on all SNAP-Ed events and conferences. Data collected include number of attendees, organizational affiliation of attendees, training/meeting evaluation feedback, and media coverage (if event is publicized).

2. Evaluation Plans

The Training Development and Support Section will compile an annual year-end report on training services offered to SIAs and LIAs utilizing the data sets and evaluation measures stated in this section. Relevant resources that will be used to compile the report include:

Statewide Trainings

1. Training registration data
2. Pre-training self-assessment data
3. Post-training evaluation data

Conferences and Events

4. Conference and event evaluation data and reports

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation;

N/A

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

N/A

c. **Questions:** the questions(s) that will be addressed and;

- the approach to conducting the evaluation, including scope, design, measures and data collection;
- plans for using the results

N/A

d. **Evaluation:** if the project has been evaluated previously, note the most recent year in which the evaluation was done.

N/A

e. **Use of SNAP-Ed Evaluation Framework:** identify Evaluation Framework indicators that are used to help FNS track the use of these indicators.

SNAP-Ed Evaluation Framework – ST7: Partnerships; LT 9: Leveraged Resources; and ST 8: Multi-Sector Partnerships and Planning

3. Coordination Efforts

Describe efforts to coordinate, complement, and collaborate with other programs in order to deliver consistent behavior-focused nutrition and/or physical activity messages, comprehensive multi-level interventions, and community-based and public health approaches and to maximize the reach and potential impact of Federal nutrition education and nutrition assistance programs. State the purpose of the coordination and SNAP-Ed's role. Describe how efforts avoid duplication of services, especially when two IAs are working in the same venue or jurisdiction.

Coordination efforts are covered extensively in sections I, II, and III of part d. Project Description for Education (Training) Strategies.

1. State Agency Goals and Objectives

Identify your State's 3-5 population health goals and related objectives based on the needs assessment and current availability of other services. Use the SMART format.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. **Description of projects/interventions. The following information should be provided:**

Project Title State-Level Behavioral Surveillance

The State-level Evaluation is comprised of four research, evaluation, and data collection projects. One evaluation project will directly assess effectiveness of the CDPH SNAP-Ed annual media campaign and one surveillance project will be used to compute current estimates of prevalence in California's SNAP-Ed population while also yielding data useful for evaluation. Two additional projects, a pilot study and the Behavioral Risk Factor Surveillance System (BRFSS) question purchase, will support development of future research and programmatic activities.

Because the State-level Evaluation consists of research and evaluation activities, the project descriptions, including locations, project descriptions, implementation plans, and projected numbers of participants are described below in the "Evaluation Plans" portion of this form.

a. **Related State Objectives**

This project supports State Level Objectives 1a, 1b, 1c, 2, and 3b.

b. **Audience**

Gender: Males and Females
Ethnicity: White, African American, Latino/Hispanic populations, and all other racial/ethnic groups
Languages: English and Spanish
Ages: Adults, Teenagers, and Children

c. **Food and Activity Environments**

N/A

d. **Project Description for Educational Strategies**

N/A

e. Evidence Base

Provide the name of each project, identify the evidence level, either research- or practice-based, and cite the supporting references. (Refer to the Checklist for Evidence-Based Approaches in Appendix E.

N/A

f. Policy, Systems, and Environmental Changes

Provide a list of the specific strategies you will use to effect PSE changes for interventions where nutrition and physical activity education is provided. Environmental supports may include changes in organizational practices or a policy or systems change.

N/A.

g. Use of Existing Educational Materials

Give the title, author, and description of existing educational materials that will be used in the delivery of the project/intervention. Specify the language(s) in which the materials will be used including English. Indicate whether the materials will be purchased and justify the need and cost.

N/A

h. Development of New Educational Materials

N/A

i. Key Performance Measures/Indicators (kpi)

N/A

3. Evaluation Plans

Describe any evaluation planned. For each evaluation, please indicate:

a. **Name:** the name(s) of each project(s) that will be a part of this evaluation;

Project 1: *Benchmark Survey*

Project 2: *Comprehensive Evaluation of SNAP-Ed and Behavioral Surveillance of SNAP Populations*

Project 3: *CHANGES Pilot Study*

Project 4: *BRFSS Question Purchase*

b. **Type:** the type of evaluation as primarily a formative, process, outcome or impact assessment;

Project 1: Outcome evaluation

Project 2: Outcome evaluation
Project 3: Formative pilot study for outcome assessment
Project 4: Formative research

c. Questions:

Project 1: Benchmark Survey

The Benchmark Survey examines health-related behaviors of low-income California mothers who are White, African American, or Hispanic. This survey will be the mechanism for evaluating associations between levels of exposure to California SNAP-Ed Champions for Change Media, Advertising and Public Relations Campaign messages and self-reported behavioral outcomes.

CDPH Research and Evaluation section (RES) staff will revise the questionnaire on an annual basis to include unaided recall questions related to television, radio, and billboard exposure specific to the images and messages of the 2017, 2018, and 2019 Campaigns. Each survey instrument will also be revised to assess applicable outcomes from the Western Region SNAP-Ed Nutrition, Physical Activity, and Obesity Prevention Outcomes Evaluation Framework document. The survey instruments will include self-reported measures of fruit and vegetable consumption, physical activity and sedentary behavior, and knowledge of the My Plate guideline.

CDPH staff will identify SNAP households with adult mothers or caregivers and conduct a statewide random sample stratified by race/ethnicity. The sample will be drawn from the Medi-Cal Eligibility Data System (MEDS) database, provided by the Department of Health Care Services under the DHCS SNAP Data Interagency Agreement.

The time frames for data collection are the months of April and July 2017, 2018, and 2019. A survey vendor (Public Health Survey Research Program, California State University, and Sacramento) will administer the survey instrument by telephone to roughly 400 White, 400 African American, and 400 Latino/Hispanic women each year.

Three months after the initiation of the Campaigns, these mothers will be re- contacted and asked to participate in a follow-up interview. Open-ended unaided recall responses will be coded into levels of possible exposure by at least two RES staff. Analyses will be conducted to verify acceptable levels of reliability. Revisions to the coding instructions and procedures will be performed if necessary. Levels of ad exposure will be examined in relationship to within-person changes in outcomes.

The results of the Benchmark Survey will be communicated in an annual report and used to provide recommendations for and potentially improve the effectiveness of future campaigns.

RQ1: What is the proportion of SNAP women who recall Campaign television, radio, or billboard ad?

RQ2: What is the relationship between ad exposure and recall of and adherence

to My Plate guidelines; overall increases in fruit and vegetable consumption and levels of physical activities; and decreases in sedentary behaviors?

RQ3: Are there differences in recall rates and associations between exposure and outcomes across Whites, African Americans, and Latinos/Hispanics?

Project 2: *Comprehensive Evaluation of SNAP-Ed and Behavioral Surveillance of SNAP Populations*

Important changes to the comprehensive survey (i.e., Champions for Healthy Change) were implemented in 2016 and will continue in 2017, 2018, and 2019. Most notably, the sampling frame has been expanded from 17 to 30 local health jurisdictions, and efforts continue to include direct education data from other SIAs in the calculations of SNAP-Ed intervention reach at the census-tract level. The sample for Project 2 is drawn from the MEDS database under the DHCS SNAP Data Interagency Agreement.

The Comprehensive Evaluation will continue to examine the health-related behaviors of low-income California mothers, children, and teens. The core component of the survey instrument is the Automated Self-administered 24-hour Recall (ASA24). A supplemental questionnaire developed by RES staff will be used again to assess levels of physical activity, consumption of sugar-sweetened beverages, access to healthier foods, and height and weight. The survey will be administered via telephone interview, in English and Spanish, by the Public Health Survey Research Group at California State University, Sacramento. Data collection is scheduled for January through September 2 of each year. Overall, telephone interviews will be completed with 13,250 adults, teenagers, and children.

We will employ the current recruitment strategies for the surveys. The recruitment methods will consist of (1) a letter of reintroduction to the survey mailed to sampled households; (2) telephone contact with adults to confirm eligibility, willingness to participate, and current mailing address; and (3) mailing of a survey packet with a tape measure along with instructions for measuring the respondents' height, food demonstration booklet and measuring cups and spoons as required for administration of the ASA24. Moreover, attempts will be made to locate adults with letters of reintroduction returned as non-deliverable through use of reverse directories and/or public or commercial tracing services.

Our analytic plan includes calculating level of SNAP-Ed intervention reach at the census-tract level. This file will be merged with the survey data with mother, teen, and children responses linked to the SNAP-Ed reach data by census tracts. The primary analyses will examine levels of SNAP-Ed intervention reach in relation to self-reported dietary and physical activity measures, addressing the question of how the extent or concentration of SNAP-Ed interventions in a geographic area relates to levels of self-reported physical activity and dietary behaviors.

Changes to the Comprehensive Survey beyond FFY 2017 are currently under consideration. Feedback on the 2017 State Plan indicated a need for CDPH to

reestablish three historic surveys: the California Dietary Practices Survey of Adults (CDPS), the California Teen Eating, Exercise, and Nutrition Survey (CalTEENS); and the California Children's Healthy Eating and Exercise Practices Survey of 9- to 11-year-old children (CalCHEEPS). However, due to practical constraints, the three surveys cannot be reestablished precisely as they were in past years. Extensive subsequent conversations within the Statewide Implementing Agency (SIA) Evaluation Workgroup indicated that the SIAs' priority was to develop a program of surveillance that will: 1) provide population estimates, 2) represent the populations served by all SIAs, and 3) *ideally*, be comparable to previous years. To this end, CDPH SNAP-Ed developed a prospectus for *2018 Behavioral Surveillance of SNAP Populations* to meet SIAs' goals, and with Evaluation Workgroup input, determined to proceed with this effort in 2018.

The 2018 Behavioral Surveillance of SNAP Populations will use an adaptation of the *Comprehensive Evaluation of SNAP and Behavioral Surveillance of SNAP Populations* survey. The survey consists of two interviews, an exhaustive 24-hour dietary recall interview (the ASA24) and a Supplemental Interview containing questions about dietary intake, physical activity, household behaviors, and respondent demographic characteristics. For 2018 we propose to use the ASA24 and adapt the Supplemental Interview Survey Instrument to reflect the SIAs' current information needs. A task group composed of SIA Evaluation Workgroup members was formed to compose the new Supplemental Interview Survey Instrument.

Sampling for *2018 Behavioral Surveillance of SNAP Populations* differs from sampling the *Comprehensive Evaluation.* First, men will be included in the sample. Second, the sample will no longer be limited to 30 counties. Third, the sample size will be reduced from 13,250 to 9,250. At the request of CDPH SNAP-Ed, the Nutrition Policy Institute (NPI) completed a new sample size calculation and determined this size to be sufficient for behavioral surveillance, for the examination of multi-year trends, and for statistical comparisons (i.e., hypothesis testing) between the 2018 data and *Comprehensive Evaluation* data from 2013 – 2017, where appropriate. This project, to the extent possible, makes assiduous use of existing and already-contracted resources and will rely on the MEDS database for sampling.

Recruitment strategies will be the same as those used for the *Comprehensive Evaluation.* The recruitment methods will consist of (1) a letter of introduction to the survey mailed to sampled households; (2) telephone contact with adults to confirm eligibility, willingness to participate, and current mailing address; and (3) mailing of a survey packet with a tape measure along with instructions for measuring the respondents' height, food demonstration booklet and measuring cups and spoons as required for administration of the ASA24.

The primary purpose of collecting data in 2018 will be to describe characteristics and behaviors of California SNAP parents, teens, and children. Consequently, the primary analyses will be descriptive. However, the design of the study will permit CDPH SNAP-Ed to use a portion of the data in a replication and extension of previous years' *Comprehensive Evaluation* analyses, which compared population-level outcomes in California to levels of SNAP-Ed intervention reach.

Project 3: *California Health and Nutrition Goals Examination Study (CHANGES) Pilot Study*
In FFY18 CDPH will collaborate with the Nutrition Policy Institute to conduct a pilot of a methodology to collect surveillance of SNAP-Ed eligible populations and more efficient approaches for integrating data collection methods to demonstrate accomplishments and impacts of SNAP-Ed interventions in California.

Project 4: *BRFSS Question Purchase*
The Centers for Disease Control (CDC) use the BRFSS to annually collect data on health behaviors in all 50 states. The BRFSS survey instrument for each state consists of a core set of survey items that are sponsored by the CDC and optional modules of questions that are available for states to add to each year's survey. In 2018 CDPH SNAP-Ed plans to fund the Sugar-Sweetened Beverage module of interview questions.

Findings will be used to inform and guide the development of Healthy Beverage Education, especially the CDPH SNAP-Ed Rethink Your Drink Campaign. Data from the BRFSS Sugar-Sweetened Beverage module will be used to inform the direction of Rethink Your Drink messaging and strategy, such as potentially targeting disparities in sugar-sweetened beverage intake.

The specific question associated with this project is: In 2018, what proportion of low-income California adults consumes sugar-sweetened beverages a) on a daily basis? b) on a weekly basis?

d. Evaluation:

N/A

e. Use of SNAP-Ed Evaluation Framework:

ST3, MT1, MT3, LT2 though LT8, R5.

4. Coordination Efforts

Extensive collaboration was used in developing this project. In addition to the integral role of the SIA Evaluation Workgroup, CDPH SNAP-Ed has sought feedback and coordinated this effort with NPI as they prepare for the CHANGES behavioral surveillance effort, which they anticipate will begin data collection in 2019. In FFY18, CDPH will execute and manage a contract for data collection for the CHANGES pilot described in the project summary for NPI. For the BRFSS Question Purchase, CDPH SNAP-Ed will use non-SNAP-Ed resources to fund the proportionate cost of interviewing non-SNAP-Ed-qualifying Californians.

1	Decrease	$110,600.00	Public Health Survey Research Program California State University, Sacramento 6000 J Street Folsom Hall 2048 Sacramento, CA 95819-6128	Telephone - local and long distance charges Allocated at $76,108 per year to conduct the telephone interviews, and support the 1-800 phone for particpant call in. As the research project requires several points of attempted and actual contact with over 100,000 potential participants via phone these phone charges are realistic. The majority of these hundreds of thousands of calls are long distance and a charge is incurred even when no one answers the call. Further, for those who do participate (estimated at 12,000 participants) the interviewing process takes approximately 45 minutes, which incur significant long distance charges. In addition to the call charges there are monthly charges for the phones themselves (~48 stations), and the help desk 1-800 number and the voicemail system.	22.72718	$279.063	12	$76,108	Reduction in FTE
2	Delete	$2,400.00	Cell Phone Service and LTE services	LTE service for 12 laptops and phone service for 12 cell phones for two months of project.	0	$0.00	0	$0	CHANGES Pilot removed.

1			BRFSS Module Prorated Purchase	The Public Health Survey Research Program (PHSRP) of the Chronic Disease Surveillance and Research Branch (CDSRB) conducts the Behavioral Risk Factor Survey (BRFS) of over 3,000 California residents yearly on selected health topics. There are several aspects of the survey, including development of the survey tool, cognitively testing new questions, testing the programming, instrument translation, year-long data collection, frequency analysis of survey data, and assisting with the publication and editing of written reports of the survey findings. NEOPB is one of the collaborating programs that make up the BRFS Work Group. Aside from the shared "core" questions which address demographics and general health, BRFS Work Group members can purchase additional questions or CDC optional modules specific to their topic of concern. NEOPB will purchase a module comprised of two questions. Total cost is $30,000 but request to cover only $10k through SNAP-Ed and the remaing $20k through other funding sources.	$10,000.00	1	$10,000

2018 Executive Summary

In 2017, SNAP-Ed of California launched a three-year integrated work plan. This was the culmination of two years of collaboration between State Implementing Agencies - California Department of Social Services (CDSS), California Department of Public Health (CDPH), UC CalFresh, California Department of Aging (CDA), and Catholic Charities (CCC) - and their local county affiliates. Previously the state implementing agencies (SIAs) had forged the development and implementation of an annual integrated work plan and provided trainings and opportunities for local implementing agencies (LIAs) to build upon each other's organizational assets and resources to deliver efficient, quality programs. In 2018, California's SNAP-Ed SIAs are embarking on the second year of their three-year plan.

The California SNAP-Ed mission, developed in 2016, is to "*inspire and empower underserved Californians by promoting awareness, education and community change through diverse partnerships to result in healthy eating and active living*". The UC CalFresh Nutrition Education Program has adopted a Collective Impact framework towards building partnerships as identified in the SNAP-Ed Guidance. UC CalFresh has aligned with our state level partners to identify goals and annual objectives that progressively work toward key behavioral, physical and social environment outcomes. These outcomes reflect an effort to improve dietary quality, increase physical activity and food resource management skills, and, through multi sector engagement, increase the appeal and access to physical and social environments that support healthy choices in places people *eat, live, learn, work, play or shop*.

2018 Program Delivery

Over the next two years, the UC CalFresh program will continue to engage with low resource communities in 31 counties through the University of California Cooperative Extension county offices. SNAP-Ed eligible Californian's are primarily served through school base programs – where the school serves as the hub of "community" activity - but also extends to adult and senior populations. In this effort, UC CalFresh offers evidence-based curricula and programming that has the capacity to be comprehensive in scope. In coordination with school and community leadership, UC CalFresh site assessments identify opportunities to move programs from *individual/group education and intervention strategies* to *comprehensive interventions* and, finally, *multi-sectoral community and public health engagement*, as cited in the SNAP-Ed Guidance. The UC CalFresh model employs policy, systems and environmental (PSE) supports designed to encourage and sustain healthy choices through garden activities, the Smarter Lunchrooms Movement (SLM), and physical activity integration. A vision of comprehensive nutrition and physical activity integration is fully articulated through the Shaping Healthy Choices framework, which has been piloted in several counties and is in the SNAP-Ed Integrated Curriculum List.

The Youth Engagement Pilot Project, initiated in 2016, has continued to make significant progress in expanding opportunities to shift the paradigm from serving youth to engaging youth – a critical component to strengthening SNAP-Ed community engagement efforts. UC CalFresh leads the integrated work of teams from the UC Davis Center for Regional Change (CRC), the Public Health Institute (PHI) Center for Wellness and Nutrition (CWN) and 4-H as they build the momentum from the original six pilot sites with 5th to 12th graders to four new counties in FFY 2017. The regional trainings, individualized coaching, and documentation work from FFY 2017 laid the groundwork for FFY 2018. CWN and CRC will provide counties with an opportunity to learn from this year's efforts, plan their youth engagement and PSE efforts for the coming school year, and engage in a cohort support model. In addition, CRC and CWN will continue to collaborate to bring comprehensive and coordinated training opportunities to UC CalFresh staff and other SNAP-Ed local implementing agencies.

2018 Estimated Reach

The estimated total participant reach for Nutrition Education are 695,296; 119,317 for direct education (104,828 Youth and 14,489 Adult) and 575,979 for indirect education.

The focus is on comprehensive programming through community and individual engagement for PSE approaches.

2018 Financial Highlights

- The base budget will remain the same for FFY 2018 at $11M.
- Carry-in funds will be used to support the current programmatic efforts for UC CalFresh with the carry-in augmentation allowing for staff expansion to support local unmet needs, support of PSE approaches and coordination efforts.

1. State Agency Goals & Objectives for California

California's five SNAP-Ed State Implementing Agencies share the following goals and objectives.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- Objective 1a: By September 30, 2019, improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population (consistent with the current *Dietary Guidelines for Americans)* by 3%.

- Objective 1b: By September 30, 2019, increase consumption of fruits and vegetables among the SNAP-Ed eligible population by 3%.
- Objective 1c: By September 30, 2019, decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population by 3%.

Goal 2: Increase Physical Activity

- Objective 2: By September 30, 2019, increase time spent in physical activity among the SNAP-Ed eligible population by 3% (consistent with the current *Physical Activity Guidelines for Americans)*.

Goal 3: Improve Food Resource Management

- Objective 3a: Annually at least 80% of surveyed SNAP-Ed adult participants report improving at least one resource management behavior[1].
- Objective 3b: Annually at least 30% of surveyed SNAP-Ed adult resource management participants report increased food security[2].

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal[3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- Objective 4a: Annually improve[4] food environments in at least 500 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).
- Objective 4b**:** By September 30, 2019, at least 75% of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved food environments.

Goal 5: Increase access to and/or appeal[3] of physical activity opportunities for SNAP-Ed eligible populations.

- Objective 5a: Annually improve[4] environments and opportunities for physical activity in at least 200 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).

  Objective 5b: By September 30, 2019, at least 75% of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved environments and opportunities for physical activity.

2. Description of Projects/Interventions

Project Title: University of California, CalFresh Nutrition Education Program

a. Related State Objectives

The purpose of the University of California CalFresh Nutrition Education Program (UC CalFresh) is to empower low-income communities to combat hunger and prevent obesity by implementing evidence-based strategies that promote healthier, more active lifestyles consistent with the Dietary Guidelines for Americans of 2015. University of California, Davis is one of five state implementing

[1] *Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.*
[2] *Defined as not running out of food at the end of the month.*
[3] *Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion*.
[4] *Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.*

agencies and administers the SNAP-ED program through University of California Cooperative Extension offices (UCCE) operating in 31 counties.

For over 20 years, UCCE has delivered SNAP-Ed through programs characterized by the SNAP-Ed Plan Guidance as Approach 1 "individual or group-based direct nutrition education, health promotion, and intervention strategies". With the passage of the Healthy Hunger Free Kids Act of 2010, UC CalFresh and UCCE have increased attention to implementing more comprehensive programming with educational strategies accompanied by policy, system and environmental supports as described in the SNAP-Ed Guidance as Approach 2. Through collaborative partnerships, some UCCE programs are also participating in Approach 3 "community and public health approaches". The table below aligns California's State Level Goals and Objectives with the three SNAP-Ed Approaches and the specific UC CalFresh areas of program focus over the FFY 2017-2019 period.

CA State Level Objectives	SNAP-Ed Approaches	UC CalFresh Program Focus Over 3-years – FFY 2017-2019
#1, #2, #3 (Individual behaviors)	Approach 1: Individual/group education & intervention strategies	• Continued implementation of nutrition, physical activity and resource management direct and indirect education to adults, youth and families. • Increased attention to curricula fidelity • Greater integration of physical activity education • More intentional youth engagement strategies across the age continuum
#4-#5 (environment outcomes) **#1, #2, #3 (individual behaviors)**	Approach 2: Comprehensive, multi-level interventions	• Further define and assess comprehensiveness of UCCE county programs • Expand nutrition and physical activity policy, environment and systems supports especially in schools – Shaping Healthy Choices framework including: ○ evidence-based education ○ school food/Smarter Lunchrooms Movement ○ edible gardens ○ school wellness policy implementation ○ youth-led community action research projects (YPAR) on community or environmental changes ○ access to structured physical activity ○ murals and stencils
Potentially #1-#5	Approach 3: Community and public health approaches	• Increase participation in community/county multi-sector collaboratives • Strategic partnership with other state or non-SNAP-Ed UCCE programs • Possibly, closer linkage to media/social marketing campaigns

UC CalFresh's Specific, Measurable, Achievable, Realistic and Time-related (SMART) objectives are organized below by SNAP-Ed Approach. This three-year plan allows UC CalFresh to develop multi-year objectives that reflect a progression of program improvement and comprehensiveness for SNAP-Ed activities in each Approach area. **The objectives reflect program areas that will be undertaken to improve the quality, sustainability, effectiveness and reach of UC CalFresh's SNAP-Ed programming**.

Approach 1: Individual or group-based direct nutrition education, health promotion, and intervention strategies

All UCCE county/cluster programs will continue to provide **evidence-based Youth, Adult and/or Family-Centered Nutrition, Physical Activity and Resource Management Education.** Improving education quality and effectiveness will be achieved through greater attention to curricula fidelity and expansion of physical activity education through training and additional supports for UC CalFresh community educators and extenders. More intentional youth engagement strategies will

also improve the quality and sustainability of both UC CalFresh Approach 1 and Approach 2 efforts. Finally, education reach to greater numbers of SNAP-Ed eligible persons will be expanded through partnership-related objectives.

i. Curricula Fidelity and Competency Training to Improve Program Quality and Effectiveness

A. **By September 2017,** working with University of California Agriculture and Natural Resources (UC ANR) Nutrition Advisors and members of the Curriculum Committee define the fidelity guidelines for the most widely used UC ANR curricula based on the evidence and curricula author's input and determine best strategies for supporting curricula fidelity both for UC CalFresh community educators and "extenders" (classroom teachers, afterschool staff and others) who are trained to deliver UC CalFresh direct education.

B. **By September of each year (2018 and 2019),** work with the 17 UCCE county/cluster programs to assess current program delivery practices relative to the California SNAP-Ed fidelity guidelines and guidelines for specific UC ANR curricula.

C. **By September 2018**, incorporate fidelity guidelines into trainings for UCCE community educators and state-office site visits to county programs.

D. **By September 2019**, incorporate fidelity guidelines into trainings and resource kits provided to nutrition and physical activity education program "extenders".

E. **Annually, from October 2016 – September 2019**, provide or coordinate with other SIAs to provide at least two in-person and/or two web-based trainings each year for UCCE community educators on various youth, adult, and/or family-centered nutrition, physical activity or resource management curriculum.

F. **Annually, from October 2016 – September 2019**, provide at least two additional web-based trainings **each year** for UCCE community educators on core educator competencies such as basic nutrition, classroom management, conducting recipe demonstrations and other related topics.

ii. Physical Activity Education for Program Quality and Effectiveness

A. **From October 2016-September 2019,** in partnership with other SIAs, annually identify and train LIAs and extenders on at least one additional evidence-based physical activity curricula and/or approach as appropriate to address gaps for different age groups or settings.

B. **From October 2016-September 2019,** in addition to nutrition education and physical activity energizers, UC CalFresh programs will implement physical activity curricula, such as Coordinated Approach to Child Health (CATCH), Sports, Play & Active Recreation for Kids (SPARK), or Healthy Choices in Motion, in:

- at least 10% of their SNAP-Ed youth sites – Year 1 (by Sept 2017)
- at least 20% of their SNAP-Ed youth sites – Year 2 (by Sept 2018)
- at least 30% of their SNAP-Ed youth sites – Year 3 (by Sept 2019)

iii. Youth Engagement for Program Effectiveness and Sustainability

A. **By September 2017**, age appropriate youth engagement strategies and partnerships pertaining to direct education such as peer-to-peer education are documented in at least 4 pilot sites.

B. **From October 2017 through September 2019,** assuming pilot site success and continued funding, each year at least one additional UCCE county/cluster programs adopt at least one of the education-related youth engagement strategies.

iv. Partnerships for Greater Education Program Reach

A. **By September 2018,** partner with Leah's Pantry to pilot with at least two UCCE county/cluster programs referral and tracking procedures so that adult participants of UC CalFresh education have access to the eatfresh.org web-based mini-course. UC CalFresh has had very preliminary discussion with Adrienne Markworth about the programs and materials of Leah's Pantry/ eatfresh.org. A few of the UC CalFresh counties have referral codes established and there have been a few discussions with each of the counties on tracking. The current efforts have been very localized. With the changes in reporting requirements of EARS and conversion from the UC CalFresh Reporting Tools Workbook and the other LIA's work with the ATF to the PEARS online system, discussions on tracking and coordination have not taken place. With the new year and Leah's Pantry agreement with CDSS, we are planning to work in coordination with CDSS to have discussions soon on ways to better coordinate, track and promote eatfresh.org with our partners.

B. **From October 2017 through September 2019,** assuming procedures are successfully worked out, each year an additional 7-8 UCCE county/cluster programs adopt the piloted approach for eatfresh.org referral and tracking.

C. **By September 2018,** partner with Calaveras County to pilot a newly refined model for extending usage of UC developed evidence-based curricula to other SNAP-Ed implementers and community partners.

D. **From October 2017 through September 2019,** assuming the acceptability of the Calaveras County partnership, each year assist at least 2 other SNAP-Ed/community providers to adopt UC developed evidence-based curricula using this extender model.

Approach 2: Comprehensive, multi-level interventions at multiple complementary organizational and institutional levels

The project objectives in this area pertain to increasing the comprehensiveness of UC CalFresh programming to reach SNAP-Ed participants at multiple levels of the Social Ecological Model (SEM) with reinforcing strategies while still delivering high quality direct education to relatively large numbers of settings. More intentional youth, parent and stakeholder engagement is also a focus for Approach 2. Per the SNAP-Ed Guidance, "multi-level interventions generally are thought of as having three or more levels of influence" and the SEM levels include the individual, interpersonal (family, friends), organizational, community, and public policy or societal.

UCCE county programs have used the opportunity of the 3-year plan to strategize how more comprehensive multi-level programming could be implemented at a larger number of SNAP-Ed sites.

The most common policies, systems and environmental (PSE) changes adopted to enhance and link to direct education include:

- Smarter Lunchrooms Movement strategies in cafeterias and school meals
- Establishment or maintenance of edible gardens
- Increased access to structured physical activity programs
- School Wellness Policy implementation
- Environmental changes such as stencils promoting movement and murals promoting healthy behaviors
- Youth-led community assessment and change efforts through YPAR
- Promotion of Safe Routes to Schools

In addition, the Shaping Healthy Choices Program (SHCP) pilot implemented in 6 UCCE county/cluster programs is a multi-component approach that brings many of these supports

together with extensive inquiry-based nutrition and physical activity education and activities. In addition to direct education, the SHCP framework addresses school policies, environment, food service and youth and family engagement through specific components pertaining to:

- School Wellness Policy
- Creation and use of gardens
- Development and coordination with youth councils
- Foods available and marketed on campus
- Engagement of families, community partners, and also parent and teacher groups
- Supporting local and regional agriculture and food literacy
- Integration of Physical Activity (PA) (starting in FFY 2017)

v. Comprehensive, Multi-level Programming

A. **By September 2017,** using Shaping Healthy Choices as a model framework, further define with specific examples from UCCE county/cluster programs what constitutes a comprehensive, multi-level intervention reaching participants with reinforcing strategies at three or more levels of the SEM and the feasibility of SHCP expansion (scalability) over time. [Note: For school sites, comprehensiveness will also pertain to the number of grade-levels and total teachers participating in the program as extenders and as per the Guidance's description of Approach 2 *interpersonal* is one of the levels of the SEM. This will also include the collective impact of multiple LIAs collaborating at a site to achieve a comprehensive, multi-level intervention.]

B. **By September 2017 and reviewed each year through September 2019**, work with UCCE county/cluster programs to set annual targets for the percentage of their SNAP-Ed sites that will meet the definition of comprehensiveness and multi-level interventions.

C. **From October 2017 through September 2019,** at least 80% of UCCE county/cluster programs meet their targets each year for the percentage of sites receiving comprehensive, multi-level SNAP-Ed programming.

Annually, from October 2016 – September 2019, UCCE staff from each county program/cluster participate in at least two in-person and two web-based trainings addressing the policy, system and environment changes they are working to achieve in sites through interventions including but not limited to:

- Smarter Lunchrooms Movement
- Edible gardens
- School Wellness Policy
- Shaping Healthy Choices Program
- Increasing Access to Structured Physical Activity Programs
- Safe Routes to Schools
- School produce stands

vi. Youth Engagement for Program Effectiveness and Sustainability

A. **By September 2017**, age appropriate youth engagement strategies and partnerships pertaining to policy, systems and environmental change such as with Smarter Lunchrooms and Youth Participatory Action Research (YPAR) are documented in at least four pilot sites.

B. **From October 2017 through September 2018,** assuming pilot site success and continued funding, each year an additional UCCE county/cluster programs implement at least one of the PSE related youth engagement strategies.

Approach 3: Community and public health approaches to improve nutrition and obesity prevention

SNAP-Ed Approach 3 pertains to efforts that affect a large segment of the population, rather than targeting the individual or a small group. UC CalFresh three-year objectives for this Approach area primarily pertain to strategic partnerships for broader reach, participation in multi-sector collaboratives and potentially closer linkage between UCCE interventions and SNAP-Ed media/social marketing campaigns.

vii. Maintenance and Expansion of the Smarter Lunchrooms Movement of California (SLM of CA) Partnerships

A. **By September 2019,** continue to participate and organize expand monthly SLM of CA leadership meetings that contribute to the coordinated and strategic work of the partnership.

B. **By September 2019,** provide state-level support and leadership to the California Department of Education, and provide local training and technical assistance to nine SNAP-Ed eligible schools in the implementation of the Team Nutrition Smarter Lunchrooms Movement of California Grant.

C. **By September 2019,** continue to expand the Smarter Lunchrooms Movement of CA by developing and implementing a coordinated state-wide Technical Advising Professional (TAP) training and toolkit for Dairy Council of California, UC CalFresh, and other LIA staff, reaching a minimum of 150 people.

D. **By September 2019,** collaborate with the Cornell Center for Behavioral Economics in Child Nutrition Programs (BEN) Center to develop an introductory training that will be implemented by UC CalFresh, CDE, CDPH and the Dairy Council at least three times per year to food service staff, local implementing agencies, and other interested persons at sites throughout California.

viii. 2 UCCE County Programs' Strategic Partnership

A. **By September 2019,** further the strategic partnership with the UCCE 4-H program established through the Youth Engagement Initiative by sustaining the pilot programs and the Youth Development Advisory Committee and by expanding collaborative projects in at least 1 UCCE county/cluster each year.

B. **By December 2017,** determine the number of partnerships reported by UCCE county/cluster programs for the new section of the USDA Education and Administrative Reporting System (EARS) form

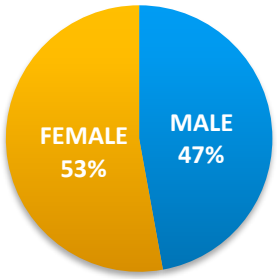
C. **From December 2017 through September 2019,** annually maintain existing partnerships and increase by at least 10% UCCE county/cluster programs' partnerships.

D. **If coordinated with CDPH and CDSS branding efforts, by September 2019,** at least 75% of UCCE county/cluster programs participate in the Champions for Change, or newly defined, social marketing campaign by implementing at least one of the following: 1) incorporating the Champions for Change messages into UCCE social marketing platforms, 2) participating in community "launch" events or 3) incorporating Champions for Change or redefined messages, and if available promotional materials, into classes and community events.

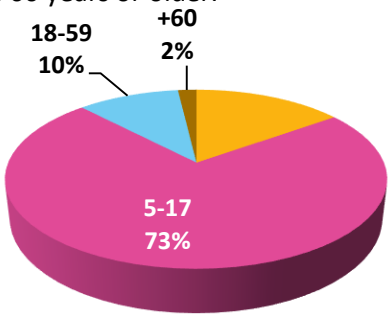
b. Target Audience

UC CalFresh nutrition combined with physical activity education and obesity prevention interventions are designed for SNAP-Ed eligible persons living in households having income at or below 185% of the Federal Poverty Level in the 31 UCCE participating counties. Based on FFY 2016 participant data, the audience can be characterized as the following:

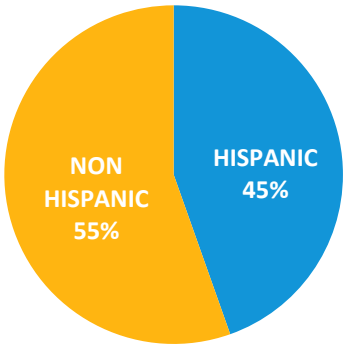
Sex: Female and Male



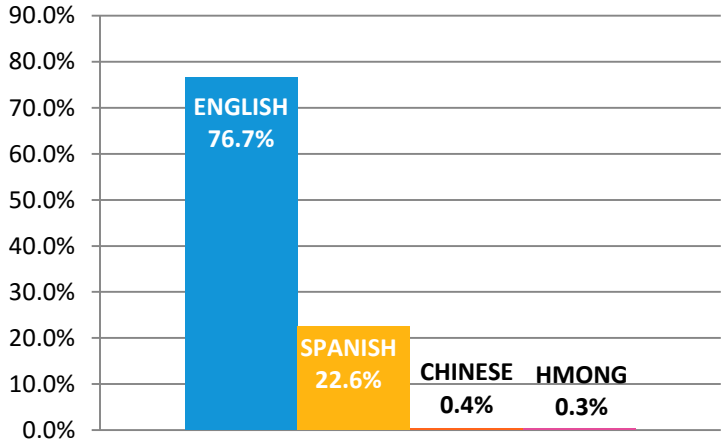
Age: The majority, approximately 73%, of UC CalFresh participants, are school-aged children or youth between (5-17 years). An additional 15% are preschoolers (<5 years of age) with another 12% adults of whom 2% are seniors 60 years or older.



Race and Ethnicity: Based on FFY 2016 EARS data, 45% of UC CalFresh participants are Hispanic or Latino and 55% report as non-Hispanic/Latino.



Languages: Based on FFY 2016 program data, UC CalFresh programs are delivered in four different languages the majority being English.



Rev: 05/22/17

c. Food and Activity Environments

UC CalFresh Nutrition Education Programs occupy domains in *learn* (which includes both direct and indirect education)*, live, work, eat* and *play*, as cited in the SNAP-Ed Guidance, the SNAP-Ed Evaluation Framework and the California SNAP-Ed Theory of Change.

In FFY 2017-2019, the UC CalFresh State Office will work with each county to assist in guiding and supporting the growth of comprehensive program delivery at school and community sites as defined by county integrated work plans, state and local level objectives and program activities. In order to facilitate program sustainability in the communities we serve, sites will be assessed for their readiness to engage community members and partners at more intensified levels (Approaches 2 & 3).

The majority of UC CalFresh programming is delivered in the *learn* setting. All UCCE county/cluster programs will continue to provide evidence-based adult, family-centered, and youth nutrition, physical activity and resource management education adding, as appropriate, activities to address the outer spheres of the SEM. Each of the evidence-based curricula delivered by UC CalFresh educators aims to increase participants' awareness, motivation, and positive behavior changes related to healthy eating and physical activity from preschoolers to seniors. UC CalFresh curricula are measured by SMART objectives and evaluation tools (see Sections j. Performance Measures and 3. Evaluation Plans).

For adults, resource management education responds to SNAP-Ed participants' limited economic access by focusing on strategies for planning, shopping and preparing healthy foods on a restricted budget. This curricula is offered at a number of settings including *learn* (school), *work* (job training and TANF), *live* (public housing, shelters, places of worship, residential treatment center), *shop* (food banks and pantries, farmers markets) and *play (*YMCA, community centers*)*. Linking gardens, produce stands, and electronic learning with Leah's Pantry/eatfresh.org will augment comprehensive strategies and support lesson messaging.

It is recommended that UC CalFresh county programs apply the Shaping Healthy Choices Program framework as an example on how to phase in a more comprehensive integrated approach (Approach 2). Embedded within this framework is the strategy of utilizing schools as a "hub" for greater community and youth engagement. As a site moves from applying direct or indirect education alone (Approach 1) to advance a comprehensive approach, increased environmental outcomes occur through activities such as the SLM (*eat*), edible gardens (*live, learn*), school wellness implementation (*learn*), access to structured physical activity (*learn & play*), and environmental and systems supports through mural and stencil work (*learn, play and live)*. Trained SLM and PA Leads in each UC CalFresh county office facilitate the growth of lunchroom alterations by working with district food service and school sites, as well as administering structured physical activity programs with curricula such as CATCH. Additional focus will be placed on integrating youth leadership and involvement in county programs to support ongoing youth education leading to career pathway opportunities. Increased interaction with youth councils and engagement of families, parent and teacher groups, as well as motivated seniors, leads to greater community ownership and, therefore, sustainability. This culminates in community and health approaches (Approach 3) being applied that reflect intensified community and county multi-sector collaboration and strategic partnerships with other state or non-SNAP-Ed UCCE programs, such as Master Gardeners and 4-H.

For greater detail on the application of UC CalFresh policy, systems and environmental initiatives please see section g, Policy, Systems and Environmental Changes.

d. Project Description for Educational Strategies

Overview of UC CalFresh Nutrition Education Program

The UC CalFresh NEP's educational strategies focus on providing quality evidence-based nutrition, physical activity and food resource management education (direct and indirect) for qualifying adults, youth and families. Tools and trainings are provided to community nutrition educators and volunteer extenders to achieve this goal.

During FFY 2017-2019, the UC CalFresh NEP will continue these educational strategies while working toward a comprehensive program model in qualifying sites including schools, afterschool programs and community settings. Nutrition and physical activity educational strategies will be supported by PSE efforts such as SLM activities and environmental changes which are described in section g.

UC CalFresh Nutrition Educators and trained extenders will continue to use evidence-based curricula from the *California SNAP-Ed Integrated Curriculum List* along with UC CalFresh approved materials to provide direct and indirect education to program participants. Audience-appropriate learning experiences will be provided through series based and individual lessons, demonstrations and other educational activities on topics such as healthy food choices, food purchasing and preparation, food resource management, food safety and physical activity. The program will continue to provide education to adults, families and youth in a manner that is culturally and language appropriate for the participants. Increased emphasis will be placed on curriculum fidelity and quality educational delivery, integrating physical activity into programming, expanding youth engagement strategies and increasing education program reach through strategic partnerships.

UC CalFresh NEP's educational strategies focus on behavioral outcomes that align with the USDA Dietary Guidelines and the SNAP-Ed Evaluation Framework. These key behavioral outcomes include:

- Buy, prepare, and consume half of your plate with fruits and vegetables, at least half your grains whole grains, and switch to fat-free or low-fat milk products;
- Increase physical activity and reduce time spent in sedentary behaviors as part of a healthy lifestyle;
- Maintain appropriate calorie balance during each stage of life—childhood, adolescence, adulthood, pregnancy and breastfeeding, and older age; and
- Utilize nutrition and budgeting tools for healthy family meals and snacks while controlling food costs.

PROJECT IMPLEMENTATION

The UC CalFresh Nutrition Education Program's educational strategies are provided to participants through three project areas which include adult, family-centered and youth programming. A description of the target areas, the educational delivery method used and types of locations in which education is provided are described below.

Adult Programming

UC CalFresh NEP offers a range of series-based classes and workshops for CalFresh qualifying adults through a variety of methods and locations. These methods and locations include:

Methods	Locations
▪ Nutrition Education Classes administered in Agencies, UCCE offices or schools ○ Mini-Workshops (1-2 hours each) ○ Series-Based Classes ▪ Community Gardens ▪ Targeted Social Media ▪ Newsletters ▪ Parent/Child Dual Instruction ▪ Online/ Self-Study Courses	▪ Targeted social media ▪ Education and training programs ▪ Nutrition Education at Farmers' Markets ▪ Community Events ▪ Community Housing Projects ▪ Community Gardens ▪ CalFresh Offices ▪ Parent Meetings at Schools ▪ Learn-At-Home/Home Study

Rev: 05/22/17

UC CalFresh NEP adult education will continue to provide food resource management education, since the most often requested classes offered through the adult program are *Plan, Shop, Save and Cook* and *Making Every Dollar Count.* These curricula enhance participants' knowledge and self-sufficiency by integrating nutrition education with food budgeting, meal planning, shopping, food label reading, cooking and food safety.

Physical activity education for adults is currently an underserved need. With this in mind, UC CalFresh will collaborate with other State level implementing agencies (SIAs), beginning with the California Department of Aging, to identify additional evidence-based physical activity curricula for inclusion in California's integrated curricula list to address the gap for adult (18-64 years) and older adult (65+ years) age groups.

Family-Centered Programming

UC CalFresh NEP offers a range of series-based classes and workshops for CalFresh qualifying families through a variety of methods and locations. These methods and locations include:

Methods	Locations
▪ Nutrition Education Classes Administered in Agencies, UCCE Offices or Schools ○ Mini-Workshops (1-2 hours each) ○ Series-Based Classes ▪ Targeted Social Media ▪ Newsletters ▪ Parent/Child Dual Instruction ▪ Online/Self-Study Courses	▪ Targeted Social Media ▪ Community Centers ▪ Nutrition Education at Farmers' Markets ▪ Community Events ▪ Community Housing Projects ▪ CalFresh Offices ▪ Parent Meetings at Schools & Childcare Sites ▪ Learn-At-Home/Home Study

In an effort to include parents in the learning process, UC CalFresh incorporates family-centered nutrition education for the parents of children already receiving UC CalFresh nutrition education within eligible schools and agencies serving children, youth and families. In past years, UC CalFresh NEP has been successful in increasing parent recognition of healthy food choices through dual (parent/child) taste testing and adult nutrition education interventions at locations such as school sites and family-based agencies.

In FFY 2017-2019, UC CalFresh NEP will continue implementing family-centered UC-developed curriculum including *Healthy, Happy Families, Healthalicious* and *Eat & Play Together!* through county-based programs. The *Healthy, Happy Families* curriculum addresses the parent-child feeding relationship and gives parents the tools needed to develop a healthy feeding relationship with their child early in life. This parenting/feeding aspect is a key component to establishing healthy eating habits for obesity prevention and is supported by research on child-feeding practices.

Youth Programming

UC CalFresh NEP offers extensive youth education programs delivered using a variety of methods and in various locations. These methods and locations include:

Methods	Locations
▪ Nutrition Education Classes by Program Educators or Trained Extenders ○ Mini-Workshops ○ Series-Based Classes ▪ School Gardens ▪ Targeted Social Media ▪ School Newsletters ▪ Online/Self-Study Courses	▪ Schools, Preschools and Childcare Sites ▪ After School and Summer Programs ▪ Nutrition Education at Farmers Markets ▪ School and Community Events ▪ Community Centers Serving Youth ▪ School and Community Gardens ▪ Parent Meetings at Schools ▪ Targeted Social Media

The goal of UC CalFresh youth education is to offer nutrition education and physical activity programs in organizations and schools serving SNAP-Ed qualifying students in an effort to

improve the health and eating habits of children and youth. UC CalFresh NEP offers a wide variety of curricula and lesson materials for preschool and kindergarten through grade 12. Curricula for grades K to 12 support California Education and Common Core State Standards. This linkage meets the dual need of direct nutrition and physical activity education while indirectly supporting state and federal educational standards.

Curriculum training and educational materials are provided to community youth organizations and after school programs where the lessons serve as core material for activities. Nutrition educators train teachers (called extenders) who deliver the programs. Youth nutrition educators offer technical assistance, nutrition education supplies and materials, USDA approved curricula, and taste testing of healthy foods to teachers and extenders in eligible school, afterschool and community programs.

With the USDA's inclusion of physical activity promotion into the SNAP-Ed Guidance, UC CalFresh designated 1.0 FTE in FFY 2015 to the integration of physical activity into UC CalFresh programming. Within the UC CalFresh funded community educators, Physical Activity (PA) Leads in each county have been identified and trained as CATCH youth curriculum trainers. In addition to other education responsibilities, the PA Leads will build capacity and the sustainability of physical activity integration into youth programming by training extenders and new staff on CATCH. PA Leads will help to improve communication between counties and the State Office regarding the vision and progression of physical activity integration. UC CalFresh will continue to identify opportunities for greater inclusion of physical activity into youth programming by collaborating with other SIAs and non-SNAP-Ed funded partners, while participating in state and national committees to keep abreast of new physical education and physical activity research, policy, and programming opportunities.

In FFY 2017-2019, a stronger emphasis is being placed on program delivery on the outer spheres of the SEM with a focus on schools. We are moving beyond direct delivery with individuals and working within schools and communities to reach the outer spheres including food service coordination with SLM, informing school wellness policies, engaging parents through newsletters, recipes, adult workshops, food tastings and other activities such as farmers' markets and school gardens. For the schools, a more comprehensive approach to nutrition and physical activity education and obesity prevention will occur with the focus on quality and comprehensive delivery, not solely the quantity of those who can be served with nutrition education programs. An example of our movement toward more comprehensive approaches is described in our ongoing implementation of the *Shaping Healthy Choices Program* (SHCP), described below.

The SHCP will serve as the framework for a comprehensive school-based approach in UCCE programs to promote high quality nutrition and physical activity education support by positive changes to the school policies, systems, and environment. The four components of this framework include nutrition education and promotion, family and community partnerships, foods available on the school campus, and wellness policies. The comprehensive approach used with SHCP will be discussed in more detail in sections f and g.

Our direct education reach numbers will generally not reflect increases as in previous years given that integrating PSE strategies at multiple levels of the SEM requires more time and effort devoted to SNAP-Ed allowable activities including but not limited to: coordination/collaboration with school food service for SLM, participation in school wellness policy or parent groups, establishing and/or reinvigorating school gardens and building partnerships and opportunities for community events such as walk-to-school day, school farmers' markets or "Farm Day" field trip events.

Training Activities to Support Educational Strategies

The educational strategies described in the previous sections will be supported by staff training provided in various formats. The overall goals of staff training are to improve quality and fidelity of program delivery. Training will be coordinated with other SIAs for program areas in which SIAs have common training goals and needs. UC CalFresh will also continue to provide staff training for subjects unique to its program priorities.

UC CalFresh, along with UC ANR's Expanded Food and Nutrition Education Program (EFNEP) program, plans to develop training manuals for nutrition education curricula developed by UCCE Specialists (faculty) and Nutrition Family Consumer Science (NFCS) Advisors. For each curriculum a core group of NFCS Advisors and UCCE Nutrition Program Supervisors will be trained to become "master trainers" for that curriculum. This train-the-trainer model will promote more efficient and effective staff training on nutrition education curricula in alignment with program goals to improve curriculum fidelity and quality of curriculum delivery. As greater coordination occurs with SIAs, LIAs and others state programs, curriculum training will be suggested as part of a user agreement for non-UCCE agencies that request access to use UCCE-developed curricula.

While in-person trainings will continue to be offered, UC CalFresh plans to incorporate additional training methods to support both new and continuing staff development for UCCE nutrition educators. Self-paced, web-based trainings will be offered for educator competencies such as basic nutrition, extender recruitment and training, conducting food demonstrations and other core competency areas. Where possible, existing online training resources will be used, such as those offered by other Extension agencies. Web-based resources may be developed in partnership with other SIAs or partners such as the EFNEP program, and some may be developed by UC CalFresh independently.

UC CalFresh will continue to focus on the delivery of series-based nutrition education using the core curriculum offered by the UCCE county programs while adding PSE strategies at multiple levels of the SEM to provide a more comprehensive approach. In general, UC CalFresh's focus will be to expand services within the existing programmatic sites to be more comprehensive and have greater participation from extenders at each of the sites rather than to expand into new community-based venues.

Finally, UC CalFresh will continue to coordinate and plan training with the CDPH's training team to foster greater coordination and joint program planning with the LIA's.

Youth Engagement Initiative

The UC Davis Center for Regional Change (CRC), the Public Health Institute (PHI) Center for Wellness and Nutrition (CWN) and 4-H, in partnership with UC CalFresh have continued making significant progress in expanding the Youth Engagement Pilot Project, initiated in 2016. The goals of the projects are to: 1) increase leadership and involvement of youth across UC CalFresh programs by supporting authentic youth engagement opportunities that involve either direct education or PSE change, 2) foster strategic partnerships with the potential for broad and large scale implementation of current youth engagement work and 3) connect UC CalFresh's existing infrastructure towards an education to career pathways approach.

Building on the momentum of the six pilot sites with 5th to 12th graders, the project expanded to four new counties in FFY 2017, providing customized support and technical assistant to new and continuing sites via monthly check in calls, site visits/support meetings, tailored site specific trainings, and the newly established bimonthly statewide youth engagement learning community conference calls. CRC and CWN have collaborated to bring comprehensive and coordinated training opportunities to UC CalFresh staff and other SNAP-Ed local implementing agencies. This includes a UC CalFresh Town Hall webinar, the UC CalFresh Pre-session at the SNAP-Ed LIA Forum, and four upcoming in-person regional trainings open to all implementing

agencies coordinated in collaboration with the CDPH SNAP-Ed training unit. The regional trainings, individualized coaching, and documentation work from FFY 2017 set a foundation for FFY 2018.

PHI CWN and CRC plan to continue all current year services in 2018 as well as expand older youth engagement projects, specifically Youth Participatory Action Research Projects (YPAR), offer a statewide youth forum targeted to young people, and support strategically coordinated training opportunities that maximize the expertise of SNAP-Ed SIAs and 4-H with CWN and CRC while strengthening partnerships and leveraging other funds when possible to maximize impact.

Planned Delivery Sites by Domain and Site Setting

EAT

- Senior Centers
- Emergency Food Assistance Sites
- USDA Summer Meals Sites

LEARN

- Before and After-school sites
- Early childhood Site settings
- Extension Offices
- Libraries
- Public Schools K-12
- Family Resource Centers
- WIC Programs

PLAY

- Recreation and Community Centers

SHOP

- Farmers Markets
- Food Stores

LIVE

- Residential Treatment Centers
- Faith Based Centers/Places of Worship
- Individual Homes-Public Housing
- Emergency Shelters
- Healthcare Clinics and Hospitals

WORK

- Adult Education and Job Training Sites
- SNAP Offices

Estimated Reach – FFY 2016 – 2019

PARTICIPANTS	2016	2017	2018	2019
Total Youth	103,595	103,288	103,441	103,365
Total Adult	12,911	14,526	13,718	14,122
Total Direct Education	**116,505**	**117,814**	**117,160**	**117,487**
Indirect Education	644,754	605,795	**625,274**	615,535
Total Reach	**761,259**	**723,609**	**742,434**	**733,021**

** FFY 2017, 18 and 19 projections are based on FFY 2016 participation numbers and the median % change in participants from fiscal year to fiscal year*

Frequency of Participant Contacts

Based on the estimated reach forecasted out using FFY 2016 Education and Administrative Reporting System (EARS) numbers, the estimated number of times youth are reached with a Direct Education Intervention is approximately 7.3 times in one fiscal year and 2.5 for adults. A breakdown of the number of sessions delivered by single verses series based education is below; youth are

included in the 5-9 series sessions and 10+ sessions. For FFY 2017 contacts will no longer be collected as a component of the EARS reporting and therefore no projections will be made.

Direct Education Programming Format

SESSIONS	2016	2017	2018	2019
Single Session	9,069	9,171	9,120	9,145
Series – 2-4 Sessions	9,182	9,285	9,234	9,259
Series – 5-9 Sessions	80,539	81,444	80,991	81,217
Series – 10 or more Sessions	29,195	29,523	29,359	29,441
Total Sessions	**127,985**	**129,423**	**128,704**	**129,063**

Projections based on reach estimates.

e. Project Description for Marketing Strategies

UC CalFresh and our SIA partners, in an effort to develop a SNAP-Ed brand, will align our efforts in communication more deliberately with communication strategy and processes that signify a more unified approach. In this effort, UC CalFresh will work more closely in coordinating with CDPH media campaigns (Be Better and FNV) to disseminate information, messaging, and social media support that enhance participant engagement. UC CalFresh programs will continue working with SIA partners to coordinate media and public relations opportunities. UC CalFresh county-based programs that are working with social media follow the SNAP-Ed communication guidelines which are available on the UC CalFresh website. These guidelines are articulated through the UC Office of the President and are subject to university policies, codes, and terms. In addition, UC CalFresh is developing closer alignments with UC ANR communication services and media, given that UC ANR county and state websites are under revision, and working to further our collective efforts in strategic communication for conferences and materials promotion.

f. Evidence Base

Theoretical Models Supporting UC CalFresh NEP Approach

UC CalFresh NEP continues to use learner-centered curricula consistent with the *Dietary Guidelines for Americans* to reach adult audiences. UC CalFresh NEP draws upon a number of learning theories and models which engage the participant actively in the process of learning.

The SEM and behavioral science theories and models (for example, Social Learning Theory and Stages of Change Model) aid in UC CalFresh NEP's well-designed nutrition program facilitating individuals better understanding of their nutritional/physical activity needs so they can take appropriate actions to maximize health. In both the adult and youth programs, many of the curricula focus on learner-centered education along with the new format of experiential learning which some of the new youth curricula is based upon. The underlying theme is that successful health promotion efforts rely on multi-dimensional interventions with diverse audiences.

- *Learner-Centered Education* is primarily focused on the learner. The educator's role is principally one of facilitator. The result is a high level of interactivity, which builds self-esteem while engaging the audience in performing new skills and to practice problem solving techniques. Due to its focus, learner-centered education is sensitive to context, lending itself to diverse audiences including various ages, races, cultures and ethnicities.
- *Experiential Learning Theory* addresses the importance of problem solving and learning from experience.

- *Adult Learning Theory* research indicates that adults need to be actively involved in the learning process, connecting learning to knowledge/experiences. Therefore, lessons must be relevant, practical and goal-oriented.
- *Social Learning Theory* emphasizes observing and modeling behavior therefore discussion and practicing skills are included in lessons.
- Moving from the individual learning experience to sectors of influence, the *Social-Ecological Model* assesses all levels of social influence that can be addressed to support nutrition, physical activity and obesity prevention.
- *Inquiry Based Learning* is a process where participants formulate questions, investigate and discover answers, build new understandings and share their learning with others.

All of these learning models emphasize active involvement in the learning process to create knowledge and behavior change. These models are effectively combined in the UC CalFresh NEP curricula and approach. Opportunities to practice new, relevant life skills are built into lessons, giving learners greater confidence of their competency in applying skills, creating higher levels of recall in participants, and therefore, making them more likely to use the skills in daily life.

For each of the California SNAP-Ed approved curricula used by UC CalFresh, the appropriate evidence-based tier (emerging, practice-tested or research-tested) from the SNAP-Ed Guidance has been indicated on the *California SNAP-Ed Integrated Curricula List*.

EVIDENCE-BASED APPROACHES

Shaping Healthy Choices Program (SHCP)

The SHCP is a research-tested intervention listed in the *SNAP-Ed Strategies and Interventions: An Obesity Prevention Toolkit* (p.34) for use in school based settings. The SHCP uses the curriculum, *Discovering Healthy Choices*, which is an inquiry-based adaptation to the curriculum, *Nutrition to Grow On*, a National Cancer Institute research-tested intervention program. Further, there have been additional evaluations conducted on SHCP either published or in-press in peer-reviewed journals showing significant positive impacts relative to a control group.

Smarter Lunchrooms Movement (SLM)

As referenced in USDA's FFY 2016 SNAP-Ed Guidance, and the *SNAP-Ed Strategies and Interventions: An Obesity Prevention Toolkit* (p.33) the SLM uses research-tested principles that lead children to make healthy food choices. The specific SLM strategies embody principles of behavioral economics and choice architecture. A number of published peer-reviewed journal articles are available on the Cornell University BEN Center website evaluating the various SLM strategies such as suggestive naming and sequencing of items on a cafeteria line (http://smarterlunchrooms.org/). A description of UC CalFresh SLM implementation is provided in *Section g. Policy, Systems, and Environmental Changes*.

Youth Engagement Project

The Youth Engagement Project will utilize as one of its approaches Youth-led Participatory Action Research (YPAR). YPAR is a USDA SNAP-Ed approved practice-tested, evidence-informed program for training youth and adults to develop youth-led processes and partnerships to promote PSE changes in health and nutrition conditions for the SNAP-Ed youth population. The target is middle and high school age youth. The goal is to engage, empower and activate youth to increase fruit and vegetable consumption and physical activity among low-income youth in California. See *SNAP-Ed Strategies & Interventions: An Obesity Prevention Toolkit for States*, (p. 38).

Physical Activity

With growing evidence and awareness of the importance of physical activity on healthy weight management and obesity prevention, USDA SNAP-Ed Guidance now includes physical activity integration as an important component to obesity prevention in the low-income population. UC CalFresh has identified CATCH as the primary research-tested curriculum focused on physical activity to be adapted into our youth programming. Staff training in the CATCH curriculum will continue to be provided to all three youth county programs and county PA Leads will help build capacity by training extenders where appropriate. In addition, a physical activity evidence-based curriculum for adults (18+) will be identified and adopted into UC CalFresh adult programming to meet the needs and requests from UC CalFresh SNAP-Ed participants. UC CalFresh is in the initial stages of identifying evidence-based curriculum for adult (18+) SNAP-Ed participants. We are continuing to use the evidence-based adult curriculum titled *Eating Smart Being Active* that was revised in 2017 to include additional physical activity components in each of the nine lessons. Technical assistance is being provided to all 31 counties via webinars and in-person trainings regarding these updates. In addition, we use *Eat Smart, Live Strong Nutrition Education for Older Adults* and *Eat Healthy Be Active Community Workshops* that contain physical activity components. To help identify other curricula, we are collaborating with SNAP-Ed state level partners, other SNAP-Ed state agencies and non-SNAP-Ed programs to identify if any physical activity curricula have been developed and implemented with SNAP-Ed adult participants. So far, limited curricula have been identified. Our next steps will include further outreach to nationally recognized experts in physical activity and health (i.e. the Physical Activity Guidelines Advisory Committee). As curricula are identified, they will be reviewed by the joint EFNEP/UC CalFresh curriculum committee and then added to the California SNAP-Ed Integrated Curricula List as appropriate. Further information on the integration of physical activity is described in *Section g. Physical Activity Programs and Environmental Changes.*

Garden-Based Approaches

Research has demonstrated that individuals who garden consume more vegetables than non-gardeners. Gardening can save households food dollars and increase access to healthy produce that may otherwise be unavailable. Therefore, experiential learning through a garden-based approach will continue to be promoted throughout the state with further opportunities for expansion in UC CalFresh. Coupled with garden-based curricula such as *Discovering Healthy Choices* (research-tested), *Eating Healthy from Farm to Fork* (practice-tested), *Teens With Inter-Generational Support (TWIGs)* (practice-tested), Learn! Grow! Eat! Go! (practice-tested), and *Nutrition to Grow On* (practice-tested), UCCE extension offices are uniquely positioned to promote garden-based nutrition education in edible gardens through their horticulturists and Master Gardeners.

g. Policy, Systems, and Environmental Changes

UCCE programs are increasingly working toward comprehensive SNAP-Ed programming by adding PSE change supports to sites where they are already offering direct education. Multiple UC CalFresh counties are engaged in PSE-related work in the *LEARN* setting of the SNAP-Ed Evaluation Framework at schools or in afterschool settings. The principle PSE strategies pertain to SLM, School Wellness policies, physical activity programs and environmental changes such as aspects of Safe Routes to School, playground stencils and murals, school gardens and other aspects of Farm to School initiatives. While there is overlap and intersection between these school environment change efforts, the common feature is that they reinforce the direct evidence-based education provided and implemented by UCCE nutrition educators and trained teacher “extenders” at low-resource SNAP-Ed eligible school sites.

In addition to the *LEARN* setting, we will continue to expand our PSE strategies into the *LIVE and PLAY* settings as we facilitate active transportation *(LIVE)* and guide policy to offer structured physical activity programs to low-income families and older adults *(LIVE/PLAY)*. Described below is a summary listing of the Policy, Systems and Environment (PSE) strategies the UC CalFresh program will be focusing on both at the state and county levels.

Shaping Healthy Choices Program (SHCP)

In collaboration with the UC Davis Center for Nutrition in Schools (CNS), the Shaping Healthy Choices pilot, which begun in three counties in FFY 2015 (Butte, Placer and San Luis Obispo) and five counties in FFY 2016 (Butte, Placer, San Luis Obispo, San Joaquin, El Dorado, and Calaveras), will continue and be expanded into at least another two counties in FFY 2017 and further expansion to more counties in FFY 2018 and 2019. The SHCP pilot was undertaken by UC CalFresh to better address the need for a multi-level comprehensive delivery evidence-based nutrition and health program. The goal of SHCP is to improve students' dietary intake and physical activity behaviors to prevent childhood obesity while at the same time link the program to other sectors of the school and environment.

The cornerstone of SHCP is the integration and coordination of four comprehensive evidence-based components with the intention of establishing healthy dietary and physical activity patterns. The four components are:

- Nutrition education and physical activity promotion
- Family and community partnerships
- Foods available on the school campus through promotion of regional agriculture
- School wellness committees

The direct education within the Shaping Healthy Choices Program is provided through the use of the *Discovering Healthy Choices* and *Cooking Up Healthy Choices* curricula. *Discovering Healthy Choices* is an inquiry-based version of *Nutrition to Grow On* which supports the new Common Core Standards for 4th-6th grade. *Discovering Healthy Choices* allows youth to "learn by doing" and strengthens critical thinking skills. The direct education will also include *Healthy Choices in Motion*, a physical activity curriculum that has been developed for the SHCP to encourage physical activity through experiential learning approaches in which youth explore the recommendations and benefits of physical activity. CNS will begin rolling out the Healthy Choices in Motion (HCIM) curriculum in July 2017 with UCCE counties that are currently implementing or planning to implement the Shaping Healthy Choices Program. CNS will coordinate with UC CalFresh to develop online training modules to assist with the training delivery of the HCIM curriculum. CNS will also collaborate with UC CalFresh to schedule regional in-person trainings for the HCIM curriculum.

The State Office will work with the UC Davis Center for Nutrition in Schools (CNS) to support and deliver advisor/program staff training using the lesson study model. This model will create county or regional based leadership teams with UCCE Nutrition, Family and Consumer Science advisors, county educators and other SNAP-Ed programs who are working in schools. The lesson study model will allow the teams to formulate goals, improve specific lessons, and establish relationships with school districts, nutrition services, wellness committees, and key community stakeholders. The leadership teams will support the program implementation at the SNAP-Ed eligible schools.

Training will include several workshops led by UC CalFresh State Office staff, CNS and leadership teams. As the program has successfully shown results with respect to improvements in nutrition knowledge and vegetable preferences, evaluation efforts moving forward led by CNS and outside funding will focus on markers of academic success including improvements in

standardized test scores, attendance, and National School Lunch Program participation. The collection of these markers will be led by researchers, program evaluators, and program assistants. Further, fidelity to program and curriculum implementation will be evaluated in each county to ensure efficacious program delivery. CNS will also work with UC CalFresh counties implementing the SHCP to develop an extender model training for the SHCP to train teachers on the direct delivery of SHCP curricula.

Shaping Healthy Choices aims to address long-term strategies for expanding comprehensive nutrition education and obesity prevention interventions. UC CalFresh intends to involve its current partnerships with the UC Cooperative Extension programs, the California Department of Education and other SNAP-Ed implementing agencies in California. SHCP will strengthen the ongoing partnerships between Nutrition, 4-H, Agriculture, and Master Gardeners within UCCE while at the same time building our partnership with the California Department of Education.

Specific Aims: The SHCP will be implemented in 7-10 county programs in approximately 15 schools. The SHCP pilot evaluation begun in FFY 2015 in the original 4 school sites will be continued and expanded to the new sites in FFY 2017-2019. During the FFY 2017-2019 period, UC CalFresh team in collaboration with the CNS team will work with mentor counties (those who have been implementing the SHCP since FFY 15) to develop an extender model to further the SHCP reach.

Smarter Lunchrooms Movement (SLM)

The UC CalFresh State Office will continue to provide leadership for the Smarter Lunchrooms Movement of California (SLM of CA), a seven agency collaborative. Since its inception in 2013, the SLM of CA has successfully created greater awareness of SLM and a foundation for policy, systems, and environmental change approaches in schools served by UC CalFresh and both SNAP-Ed and non-funded partners. This includes coordinating, communicating, program development, training, and technical assistance with the SLM partners, SIAs and USDA's Western Region Office. The SLM of CA utilizes a three-pronged approach aimed at increasing the implementation of SLM Strategies. This approach includes the following:

- **Training:** The SLM of CA provides introductory and expert-level workshops for LIA's, those working with schools and school food service staff, and community stakeholders to encourage and support SLM implementation.
- **Technical Assistance:** Certified Technical Advising Professionals (TAPs) are local community stakeholders including UC CalFresh staff who have been trained to provide guidance and support to food service staff implementing SLM at the local level.
- **Promotion:** SLM of CA continuously promotes SLM through media and publications to increase awareness and develop a community of practice among key stakeholders.

During 2017, UC CalFresh conducted three TAPs trainings, reaching approximately 35 UC CalFresh staff. Through SLM of CA training and technical assistance efforts, 145 schools were reached. A total of 1,000 people and 317 school districts have received training from the SLM of CA over the last three years. Over 70 UC staff have been trained as Technical Advising Professionals and over 90 percent of UCCE county programs specified in their FFY 2017-2019 county integrated work plan the intention to implement SLM at schools where they are already providing evidence-based nutrition and physical activity education. UCCE program supervisors and nutrition educators will work with food service staff and school administrators to self-assess their cafeterias and identify SLM strategies to implement.

In FFY 2017-2019, UC CalFresh will work to sustain and expand the SLM of CA Collaborative efforts and will focus on the following:

- Develop and sustain SLM implementation within SNAP-Ed eligible schools in California (non-eligible schools are served by partners in the SLM of CA Collaborative).
- Oversee the statewide coordination of UC CalFresh staff administering SLM activities while providing training, leadership, and resources to ensure ongoing quality and sustainability within the program.
- Provide training to school food service directors and staff on SLM principles, spreading awareness of the movement and building partnerships with UC CalFresh staff.
- Collaborate with new and existing partners to develop a three-year strategic plan for the Smarter Lunchrooms Movement of California to ensure sustainability and increased reach of programming through FFY 2017-FFY 2019.
- Develop a train-the-trainer model to expand the number of certified TAPs in UC CalFresh County Programs and support the rapid growth of SLM.
- Develop, design and disseminate a TAPs toolkit to provide resources for providing appropriate support and guidance to School Food Service and ensure consistency in the delivery of SLM technical advising.
- Continue to strengthen partnerships with the BEN Center and establish new partnerships with other states to share best practices and resources on the Smarter Lunchrooms Movement
- Collaborate with UC CalFresh Staff to determine the feasibility of implementing SLM in new settings including Early Child Care and Congregate Meal Sites.

The SLM of CA is a strong partnership rooted in Collective Impact. A description of this partnership will be described in Section 4- Coordination Efforts.

Youth Engagement Initiative

The PHI CWN, CRC, and 4-H will offer some of the following PSE strategies to support the UC CalFresh youth engagement efforts:

- Engage youth by expanding beyond current programming to explore PSE related curriculum and activities (particularly for middle school to high school) such as YPAR and Photo-voice to create an education to engagement to career pathways model;
- Review site/organizational policies and offer suggestions for alignment with current healthy food and beverage policies in schools and afterschool programs if not already aligned (i.e. nutrition guidelines for fundraisers/events, implementing walking clubs, etc.);
- Seek site involvement in local school wellness policy implementation (i.e. County Nutrition Action Plan) and ensure that youth engagement efforts or strategies are being properly addressed and sustained;
- Continue to support Smarter Lunchrooms Movement work with youth leading PSE related projects within the cafeteria (if possible);
- Potentially engage youth in research or mapping projects to address their access (or lack thereof) to healthy foods in their communities through farmer's markets, community gardens and/or grocery or corner stores;
- Explore opportunities for PA environmental change such as stenciling, playground and park beautification projects to increase PA amongst youth and communities;

- Encourage alignment with traditional and nontraditional partners to explore having youth more involved in supporting local policy change efforts related to nutrition and physical activity in their community.

Physical Activity Programs and Environmental Changes

As explained in *Section B Project Description for Educational Strategies*, UC CalFresh will continue to implement physical activity curricula and activities into the LEARN settings mainly focused on CATCH or Healthy Choices in Motion curricula. Evidence-based physical activity curricula will also be identified to fill current age-specific gaps in the California's integrated curricula list. In order to increase the comprehensiveness of UC CalFresh physical activity programming we will continue to enhance educational strategies by integrating policies, systems, and environmental approaches that address constraining environmental and/or social factors for the SNAP-Ed eligible populations.

In FFY 2015, UC CalFresh began to concentrate efforts on the integration of physical activity into existing programming by administering a physical activity needs assessment to county programs. This helped to focus on youth programming, skills training and technical support. In order to create an improved channel of communication between counties and the State Office, Physical Activity (PA) Leads were identified in every county or county cluster making up the PA Leadership Committee. This committee currently meets bi-monthly to share physical activity resources and best practices, collaborate on how to overcome both urban and rural challenges to physical activity, provide direct communication channel for county and state level staff and help build capacity within communities.

In order to meet the need for physical activity skills training for youth programming, the State Office identified the CATCH program as the training model, which met UC CalFresh sustainable training goals. Over 120 staff members have been trained in the basic introductory training and over 30 staff trained as CATCH trainers in order to expand the evidence-based curriculum into qualified youth sites using our extender model. This has allowed the county programs to provide training to teachers and as teachers are trained, they are adopting the curriculum into their weekly agenda, increasing access to physical activity and providing opportunity for a system-wide change over time. Youth engagement projects are also incorporating youth led CATCH activities to their peers during recess and after school settings.

As programs continue to support and strengthen the youth physical activity programming, UC CalFresh will begin to expand physical activity programming into the adult programs. We are collaborating with state level partners to identify appropriate curricula, resources and PSE strategies for adult SNAP-Ed participants. We will also work with non-SNAP-Ed partners such as CATCH Global Foundation to adapt intergenerational programs that engage adult role models to inspire youth to adopt healthy eating and physical activity habits for a lifetime.

UC CalFresh counties will continue to work with state and national partners, including Fuel Up to Play 60, CATCH Global Foundation, and the Alliance for a Healthier Generation to strengthen our capacity to increase opportunity for physical activity in the *LEARN* and *PLAY* setting. Counties will be encouraged to partner with Safe Routes to School who provides technical assistance and support for infrastructure changes needed to create a safer commute and promoting active transportation to and from school.

Playground stencils, shown to provide opportunities to increase children's levels of physical activity during outside play, encourage development of fundamental motor skills, and compliment academic learning concepts through movement, are being implemented throughout UC CalFresh counties. CDPH Prevention First grant provided funding for the initial set of playground stencil kits and the how-to-guide available to all SNAP-Ed LIAs. UC CalFresh State Office has since created a playground stencil/mural project request form and procedure to

ensure a level of comprehensive programming within the playground stencil projects that includes nutrition education and academic learning concepts. We also provided each county stencil coordinator team (in partnership with CDPH with a MyPlate four-square stencil and fruit and vegetable stencils in order to support USDA nutrition messages being taught in the classroom. We will continue to support county playground stencil/mural projects and offer technical assistance in collaboration with CDPH content experts.

Painted murals that promote healthy messaging related to nutrition education and physical activity is another PSE strategy that UC CalFresh will continue to support at schools and community settings. Mural projects will engage youth and community members in the design and painting process to exhibit a wide range of ideas that depict the health and well-being of their community. The integration of educational components are also encouraged in areas such as gardening, native food, healthy lifestyle choices, natural resources, and geographical landmarks.

School Gardens and Farm to School

Many UCCE county programs implement garden-based learning as an educational strategy incorporated into the evidence-based curricula they are using for a portion of their SNAP-Ed programming. The gardens have taken several forms, from traditional raised beds, to smaller wheelbarrow or container planters. UC CalFresh programs are establishing and reinvigorating gardens that have fallen into disrepair in a variety of SNAP-Ed school, preschool and afterschool settings. The focus is to coordinate the nutrition education efforts with the environmental supports a garden based nutrition education and tasting program can provide.

h. Use of Existing Educational Materials

During FFY 2016, the UC CalFresh State Office co-chaired a State Level Implementing Agency workgroup charged with combining and maintaining a comprehensive list of curricula for use by all SNAP-Ed funded Local Implementing Agencies in California. This list is currently used by UC CalFresh counties when providing direct education to CalFresh eligibles and participants. This combined list was used for FFY 2017-2019 planning.

The UC CalFresh nutrition education program is utilizing support materials from its own approved educational materials list and will do so until a statewide integrated materials list has been developed. The UC CalFresh State Office will also continue to support all 31 UCCE programs by coordinating annual statewide orders of UC CalFresh approved curriculum, lesson materials and resources, and nutrition education reinforcement items.

i. Development of New Education Materials

No new education materials are planned for development in FFY 2018. We will continue to provide curricula and support materials to the UCCE county programs. As UC Specialists, faculty and researchers develop new curricula or learning materials, they will be reviewed by the curricula committee to determine the appropriateness for use by UC CalFresh and then added to the California SNAP-Ed Integrated Curricula List.

j. Key Performance Measures/Indicators

This section highlights all key performance measures and indicators used in FFY 2018. This includes both state-level indicators and county-specific key performance measures.

Process Measures

Counties are responsible for having systems in place that capture detailed programmatic data:

- SNAP-Ed Education and Administration Reporting System (EARS) required data including targeting information (sites, client categories, site types, etc.);
- programmatic information (participants, contacts, demographics, key methods, key messages and curricula, etc.); and
- fiscal information (salary and benefits, equipment/supplies, travel, etc.).

All county programs enter this data into a detailed Excel-based programmatic workbook in FFY 2017 and into the Kansas State University's (KSU) Program Evaluation and Reporting System (PEARS) beginning in FFY 2018 on an ongoing basis. This reporting assists the State Office in providing feedback regarding progress of individual county-set goals. The reporting collects information about reach and type of programming that takes place as well as documentation of fiscal and programmatic compliance.

Specific examples of the process performance measures include:

- number of direct education participants by age, gender and race/ethnicity,
- specific evidence-based curricula being delivered and the number of sessions,
- number of UCCE educators delivering youth, adult and family-centered education,
- for youth-oriented education, number of "extenders" (classroom teachers or First Five staff) delivering UC CalFresh education,
- estimated participants reached through interventions using a variety of types of SNAP-Ed activities including direct education (DE), policy systems and environmental (PSE) change, social marketing (SM), and indirect intervention channels,
- number and type of Policy, Systems and Environmental Changes adopted at sites,
- number and type of non-funded partners, the type of assistance provided/received, and the intervention type with partners involvement (DE, SM, and/or PSE),
- number of State Office trainings to build capacity among UCCE county staff,
- number of State Office working groups to build collaboration, support integrated programming, and evaluate collective impacts, and
- number of publications and conference presentations showcasing UC CalFresh NEP findings and successes.

Additional performance measures are assessed through formal site visits that follow. Management Evaluation (ME) protocols established by USDA and UC CalFresh. The formal site visits utilize a program review tool, a lesson observation tool, and a fiscal review tool and assess performance including but not limited to:

- the quality of nutrition and physical activity lesson delivery,
- the completeness and accuracy of financial documentation,
- Civil Rights and Equal Employment Opportunity Commission Compliance, and
- other aspects of program implementation, collaboration and communication.

Since the current EARS form expired 8/31/2016, UC CalFresh anticipated some revisions were made to the EARS system for FFY 2017. Once the new EARS form became available, UC CalFresh

made revisions to the RTW and worked with the UCCE county programs to collect any additional required EARS data. The intention is to transition program activity process evaluation to the PEARS system in FFY 2018.

In addition, during FFY 2017-2019, the UC CalFresh State Office will be working with the county programs to strengthen process monitoring in two areas: 1) program fidelity, and 2) comprehensive programming. As described in Section 2 Description of Project, during FFY 2017-2019 UC CalFresh will be working with county programs to assess and enhance program fidelity as well as set realistic county targets for comprehensive programming at SNAP-Ed sites that will be used to support county programs in expanding their comprehensive programming.

Outcome Measures

The UC CalFresh State Office Evaluation Team will provide statewide evaluation outcomes for the adult, family-centered, and youth curricula delivered by UC CalFresh county programs. There are a number of UC CalFresh core curricula available which cover topics including food resource management, nutrition, meal planning, cooking, tasting experiences, garden-enhanced learning, and physical activity (See UCCE curriculum in the CA SNAP-Ed Integrated Curricula List: https://archive.cdph.ca.gov/programs/NEOPB/Pages/ApprovedSNAP-EdMaterials.aspx).

Individual level outcomes will be collected using a core set of adult and youth evaluation tools (See table below: UC CalFresh Most Frequently Used Evaluation Tools). These tools capture self-reported and/or observed outcomes related to food/beverage consumption and food resource management including knowledge, attitudes, and behaviors.

The UC CalFresh NEP Evaluation Taskforce developed standardized statewide SMART Objectives to assess the outcomes of the core curricula delivered by UC CalFresh county programs (http://www.uccalfresh.com/evaluation/evaluation). The SMART Objectives list each of the UC CalFresh core curricula, identifies the most appropriate evaluation tool(s) depending on the nutrition education delivery method for each curriculum, and provides specific SMART Objectives for each evaluation tool that can be aggregated and analyzed at the county and state levels.

Outcome measures are analyzed in two ways:

- The percent of participants demonstrating improvement compared to the target SMART objectives established for the specific curricula, and
- For pre/post surveys, whether the difference represents a statistically significant improvement.

For FFY 2018 and 2019, UC CalFresh plans to collect and report individual-level outcome data for the following individual-level indicators included in the SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes:

- ST1: Healthy Eating Motivators
- ST2: Food Resource Management Motivators
- ST3: Physical Activity and Reduced Sedentary Behavior
- MT1: Healthy Eating Behavior Change
- MT2: Food Resource Management Behavior Change
- MT3: Physical Activity and Reduced Sedentary Behavior Change

A newer area of focus is measuring the outcomes of PSE changes applying the RE-AIM (Reach, Effectiveness, Adoption, Implementation and Maintenance) evaluation framework. In collaboration with California's other SNAP-Ed State Implementing Agencies (SIAs), the UC CalFresh State Office evaluation team will continue to explore and identify the best ways to

gather key short, medium, and long term indicators (PSE outcomes) in the environmental settings and sectors of influence from the SNAP-Ed Evaluation Framework with a specific emphasis placed on those related to SLM, garden-enhanced learning, CATCH, and comprehensive programming in schools. At the environmental settings level, the SNAP-Ed Evaluation Framework indicators that will be assessed by implementing the PEARS PSE module include the following:

- ST5: Readiness and Needs
- ST7: Partnerships
- MT5: Nutrition Supports Organizational Adoption and Promotion
- MT6: Physical Activity Supports Organizational Adoption and Promotion
- LT5: Nutrition Supports Implementation and Effectiveness
- LT6: Physical Activity Supports Implementation and Effectiveness
- LT7: Program Recognition
- LT8: Media Coverage
- LT10: Planned Sustainability

At the Sectors of Influence level, given UC CalFresh's emphasis on SNAP-Ed delivery at schools one SNAP-Ed Evaluation Framework indicator will be assessed:

- LT15: Educational Attainment

These outcomes are summarized in detail below (See Section 2.e. Use of SNAP-Ed Evaluation Framework).

4. Evaluation Plans

a. Name of Project: UC CalFresh Nutrition Education Program

b. Type: Below is a summary of each evaluation effort, which includes a brief description of the project and evaluation process.

Process Evaluation: Transitioning from Reporting Tools Workbook (RTW) to PEARS

County-level process evaluation measures will record participation levels in all activities delivered required for EARS reporting. These data are collected through use of sign-in sheets for adult nutrition education classes, and for youth, monthly tracking materials distributed to teachers to indicate number of students reached, schools signed up, and lessons delivered. Previously, this information was entered into the excel Reporting Tools Workbook on a quarterly basis.

As mentioned above, UC CalFresh anticipated an updated EARS form would be released for use in FFY 2017. Together with the other California SIAs, UC CalFresh piloted the Program Evaluation and Reporting System (PEARS) developed by Kansas University for SNAP-Ed's Mountain Plains Region in FFY 2016 and FFY 2017. For FFY 2018, the intention is to fully transition from the UC CalFresh RTW to PEARS for the collection and summary of the required EARS information. It will be a tremendous systems improvement to utilize an online system like PEARS that can capture all of California' process data for SNAP-Ed education and policy, systems and environment change activities as well as serve as a central location for evaluation surveys and assessment tools. However, it is anticipated that UC CalFresh county programs will require considerable training and technical assistance in FFY 2018 to make this transition successful.

Process Evaluation: Site Visits

In order to ensure program and fiscal fidelity and integrity, the UC CalFresh State Office is required to provide Fiscal and Programmatic oversight for at least one third of all programs funded by SNAP-Ed under the UC CalFresh grant. Currently, UC CalFresh has 17 programs in 31 counties (there are several programs with 3-5 counties clustered under one program). In FFY 2018, the UC CalFresh State Office plans to complete four formal site visits (Program and Fiscal (onsite or desk audit)) and two informal visits (Program and/or Lesson review only).

Formal site visits follow Management Evaluation protocols established by USDA and UC CalFresh. This includes, but is not limited to, a review of the program and lesson(s) accompanied by a fiscal review. The State Office reviews at least one youth and one adult/family centered lesson delivered by UC CalFresh staff or an extender, as scheduling allows. Review tools have been developed by UC CalFresh with inclusion of USDA Management Evaluation (ME) requirements and include a program review tool, a lesson observation tool and a fiscal review tool. The fiscal review incorporates a review of all federal expenditures including staffing, data collection including EARS, local support and monthly reviews of ledgers to track spending, as well as a complete review of equipment and other non-capital equipment maintained by the program. Updates to the program and fiscal tools are currently underway to incorporate PSE implementation and recent fiscal data requirements.

Formative Evaluation

Two types of formative evaluation will be undertaken in FFY 2017 and continued into FFY 2018-2019: 1) ongoing evaluation tool refinement and testing; and 2) assessment of annual evaluation results for relatively new UC CalFresh approved curricula in an effort to move them from emerging to practice-tested.

First, to better capture program outcomes in specific areas, additional formative evaluation will be done to revise and test several new or revised evaluation tools.

- Teachers' classroom policies and practices: The Teacher Observation Tool (TOT) has been used for several years to capture teacher's observations about changes seen in their students' and

their own health-oriented behaviors. Revised questions will be pilot tested with teachers across a range of grade levels. The new questions focus on classroom practices that the teacher can adopt to reinforce the nutrition education being offered in the classroom; for example, healthy food and beverage policies for classroom celebrations, teacher modeling healthy eating, not withholding recess as a discipline strategy. These practices were drawn from the School Health Index, the Alliance for a Healthier Generation's Healthy School Program and other reliable school assessment tools.

- Preschoolers' taste testing: Another area for new evaluation tool development is the preschool setting. For school-aged children, UC CalFresh programs use a reliable taste testing evaluation tool. However, a more appropriate evaluation tool is needed for the preschool setting. Again, pilot testing will be carried out in a variety of settings. In addition, new and/or supplemental tools for evaluating nutrition education among preschool children will be explored.
- Garden-based learning: Several of the UC CalFresh approved curricula – Discovering Healthy Choices, Eating Healthy from Farm to Fork, Nutrition to Grow On – incorporate experiential garden-based learning. With increased attention to this approach, there is a desire for a more tailored evaluation tool to capture the outcomes at various grade levels.
- Address language barriers: Several counties have requested the translation of evaluation tools (FBC and PSSC) into languages other than English and Spanish. These include Chinese, Vietnamese, Hmong, and Korean. The next steps include determining the feasibility of translating current evaluation tools and/or collaborating with other nutrition professionals to access similar evaluation tools that have already been translated into the desired languages. For languages rarely used, explore alternative approaches, such as through utilizing success story forms to capture outcomes among these SNAP-Ed participants.
- CATCH, Stencils, Murals, School Wellness Policy, and Comprehensive Programming: As UC CalFresh programs continue to expand their efforts to incorporate PSE changes as part of a more comprehensive public health approach, additional efforts are needed to develop, pilot test, and refine evaluation tools to capture PSE changes in the areas of unstructured PA programs, such as CATCH; school environment beautification projects including playground stencils and murals; school wellness policy; and an assessment of comprehensive programming in schools measuring quality nutrition education and comprehensive public health approaches.

A second area of formative research pertains to UC CalFresh approved curricula categorized as *emerging* as defined by the Checklist for Evidence-Based Approaches. UC CalFresh State Office staff will assess the annual evaluation results as well as other existing evaluation data to determine whether the curricula meet the practice evidence-based tier. If there are any cases where the evaluation data are not sufficient to make a determination, UC CalFresh will develop a plan to partner with curriculum authors and UCCE county programs to collect the necessary evaluation information to make a determination on the appropriate evidence-based categorization.

Outcome Evaluation: Statewide Outcome Evaluation of Direct Education and PSE Changes

The UC CalFresh NEP Evaluation Taskforce developed SMART Objectives to provide feedback on program outcomes related to the SNAP-Ed target audience and the educators/teachers ("extenders") implementing the nutrition education program. UC CalFresh will continue to focus nutrition education activities on individual level outcomes captured through a core set of adult and youth evaluation tools (See table below: UC CalFresh Most Frequently Used Evaluation Tools). The UC CalFresh State Office Evaluation Team will provide UC CalFresh county programs with county level summaries of the SMART Objectives for any of the evaluation tools administered by the county, as well as aggregate and report the statewide evaluation results in the USDA annual report. Using this feedback loop, the UC CalFresh NEP is able to continually improve program delivery for the SNAP-Ed eligible populations served. With input from the UC CalFresh Evaluation Taskforce, the

State Office Evaluation Team will be considering possible changes to the evaluation approach particularly related to sampling.

PSE outcomes will also be collected in the environmental settings from the SNAP-Ed Evaluation Framework with the implementation of the PEARS PSE module beginning in FFY 2017. The focus will be on tracking the progress made implementing the three most widely adopted PSE strategies (SLM, edible gardens, and CATCH) across UCCE programs. These outcomes are summarized in detail below (See Section 2.e. Use of SNAP-Ed Evaluation Framework). UC CalFresh is also planning to work with county programs to apply the Alliance for a Healthier Generation's Healthy School Program Assessment, which includes a subset of the items included in the School Health Index.

UC CalFresh will also be exploring with CDPH the possibility of utilizing participating schools' FITNESSGram data as a means for assessing impact on health-related outcomes.

Outcome Evaluation: Smarter Lunchrooms Movement (SLM) Evaluation

In addition to regular PSE reporting of SLM activities by their respective UCCE programs, a more extensive evaluation will be continued in a few selected school sites. The outcome evaluation questions will address the effect of SLM strategies on the following:

- Cafeteria sales, meal participation and possibly plate waste
- Students' attitudes and satisfaction
- Food-service staff and school administrators' attitudes and satisfaction.

The SLM expanded evaluation activities will also systematically examine two additional process oriented questions in these same or additional sites. The process-oriented questions will address strategies that have the greatest demonstrated success for:

- Linking the classroom or garden-based nutrition education to SLM changes being made in the cafeteria
- Involving students in SLM changes

These questions will be addressed through a variety of data sources including cafeteria sales and participation records as well as interviews with students, teachers, food service staff, school administrators and parents. The plate waste component of the evaluation will utilize photos and scales for assessment. Temporary staff and university students will assist with the evaluation data collection. The UC Davis Institutional Review Board (IRB) will review the continuation of the SLM expanded evaluation protocol originally approved in FFY 2017. The plate waste study data analysis will be completed in quarter 1 of FFY 2018. Preliminary results will be shared first with partners at the three school sites for their review and comment. Results from the study will be available at the latest by quarter 2 of FFY 2018. Depending on the findings, UC CalFresh evaluation staff may pursue publishing the plate waste results.

Process and Outcome Evaluation: Youth Engagement Initiative

Both process and outcome evaluation will be conducted of the Youth Engagement Initiative. Process evaluation will be used to document the technical assistance and training provided as well as the youth engagement activities, achievements and challenges in the pilot sites. Selected pilot sites will implement evaluation tools to assess outcomes pertaining to youth development, nutrition and physical activity behaviors or environmental assessments depending on the pilot focus. For example, pilot sites focused on peer education strategies will assess changes in the youth educators' skills, confidence and behaviors; while pilot sites more focused on PSE changes will additionally utilize environment assessment tools such as the SLM Scorecard or community mapping). Several of the pilot sites represent an integration of SNAP-Ed and 4-H programming so that a specific task is to implement evaluation activities that meet the needs of both funding sources without over

burdening program implementers and participants. An additional evaluation related deliverable for the Youth Engagement Initiative is Accomplishment Briefs that will highlight the strategies, achievements and evaluation results from the various pilot sites.

Outcome Evaluation – Shaping Healthy Choices Program

As described in Section d. Previous Evaluation below, the Center for Nutrition in Schools (CNS) has been evaluating SHCP's impact on students' knowledge, consumption and anthropometry in pilot sites for the last two school years. In FFY 2017 and FFY 2018, CNS will expand its focus to evaluate possible SHCP impacts on other school-level outcomes such as student attendance, test scores and school meal participation. CNS was not able to measure change. The dietary intake data was collected using food frequency questionnaires (FFQ) during the 2015-2016 implementation year. The return response rate for these questionnaires was very low, likely due to respondent burden. This led to concerns regarding self-selection bias and the validity of this data in reflecting changes in fruit and vegetable consumption. Due to concerns about a biased sample and considering cost-effectiveness, this was eliminated as a measure in subsequent outcome evaluation years. An option would be to conduct Automated Self-Administered 24-Hour (ASA 24) Dietary Assessment on a subset of participants; however, this method also has high participant burden. Currently, the most valid, least invasive, and objective measure of fruit and vegetable intake is through measurement of carotenoids in the skin, which provides an estimate of approximately one month of consumption of foods high in carotenoids. Carotenoids are found almost exclusively in fruits and vegetables. This can be tracked to evaluate changes in fruit and vegetable consumption over time. While skin carotenoids cannot be directly translated to cups of fruits and vegetables consumed per day, this can provide a medium-term measure of healthy eating with regard to individual level increases in fruit and vegetable consumption overall as indicated in the evaluation framework. The device, called a Veggie Meter, used to measure skin carotenoids costs approximately $15,000. The Center for Nutrition in Schools and Nutrition Department are currently writing grants to fund the purchase of one of these devices. There is a possibility that the Center for Nutrition in Schools may be able to obtain a short-term loan of a Veggie Meter. CNS will also explore additional opportunities for gathering self-reported fruit and vegetable intake and possibly other medium term behaviors with the UC CalFresh State Office.

c. Questions

This section summarizes the evaluation questions, approaches, and plans for use that guide UC CalFresh's various evaluation efforts.

Historically, evaluating participant outcomes has been the focus of UC CalFresh's evaluation efforts. UC CalFresh has sought to answer the question similar to the one addressed by the SNAP-Ed Evaluation Framework at the individual level: *To what extent does SNAP-Ed programming improve participants' dietary and physical activity behaviors?* At the individual level, a variety of evaluation tools are available to our county programs, but efforts have been made to streamline evaluation tool usage. The State Office aggregates data for the most frequently used evaluation tools for all county programs that submit data and provides statewide summaries. The table below describes the most frequently used adult and youth individual level evaluation tools, the administration methods, the factors measured, and examples for how the results can be used. After completing data collection, counties entered their data into the online data entry portals on the UC CalFresh website in FFY 2017. In FFY 2018, data entry efforts will be transitioning from the UC CalFresh website to PEARS. Each UC CalFresh curriculum is assigned evaluation tools and SMART Objectives. The evaluation results assess whether the SMART objectives are achieved and help identify areas for improvement or where greater emphasis is needed. The statewide evaluation results will also be used to report against the appropriate individual level indicators included in the SNAP-Ed Evaluation Framework (See Section 2.e. Use of SNAP-Ed Evaluation Framework).

UC CalFresh Individual Level Evaluation Tools

Evaluation Tool	How Is It Used?	What Does it Measure?	Ideas for How UCCE County Programs Can Use the Evaluation Results
Adult Evaluation Tools			
INTENT TO CHANGE (ITC)	Administered following one-time workshop or single nutrition education session.	Current dietary behaviors or shopping practices, and readiness to change the behaviors; 15 topics include: breakfast, fast foods, food groups, food labels, fried foods, portions, grains, fruits, vegetables, lower-fat milk, sweet beverages, unit prices, use a list, plan meals, physical activity.	Program supervisors can look at the current dietary practices of the targeted population(s) and identify the education topics most needed.
ADULT TASTE TESTING TOOL (ATTT)	Administered by educator following a single taste test with adults.	Previous exposure to healthy foods and willingness to either try again or ask for in the future.	Educators determine if the foods tasted by adult introduced them to new foods (not tasted before) or if alternative items should be selected. Also, feedback about the acceptability of specific recipes or foods tried.
FOOD BEHAVIOR CHECKLIST (FBC) – VE Visually Enhanced	Pre/post survey administered before a nutrition education intervention series (delivered over at least a one-month period) begins and following the last session.	Food and beverage behavior change, nutrition label use, and food security.	County advisors showcase increases in healthy eating among adults that support a reduction in health disparities with county public health department; partner to see if other county data sources show similar gains; collaborate to target populations with the largest disparities.
MAKING EVERY DOLLAR COUNT (MEDC)	Retrospective survey administered following the nutrition education series collecting knowledge before the program as well as knowledge/behavior after participating in the program.	Adult knowledge and changes in food resource management behaviors (coupons, save money, identify community resources, made food last, etc.).	Educators share how adults who completed the class learned to stretch their dollars further and how much money they reported saving to help recruit new participants.
PLAN, SHOP, $AVE, COOK (PSSC)	Pre/post survey administered before a nutrition education series (delivered over at least a one-month period) at the beginning and following the last session.	Behavior changes related to resource management and changes in food security.	County advisors can write up their PSSC outcome results in *UC Delivers* to capture the county's successes in changing food resource management and show how it related to improvements in food security among low-income adults.
SUCCESS STORY FORMS	Given to adults who complete a curriculum.	Captures qualitative feedback in participants' own words (unique personal narrative).	Program supervisors can include quotes in program reports and program materials demonstrating the variety of positive changes the program is having which may be very specific and not measured through the surveys.
Youth Evaluation Tools			
TEACHER OBSERVATION TOOL (TOT)	Administered at the end of a nutrition education series and reflecting back over the school year.	Teacher's perceptions of behavior change in students and themselves.	County teams could use results to identify teachers for recognition as a role model for health and wellness, feature their successes in the school newsletter, and submit the success story to the school board.
TEACHER TASTING TOOL (TTT)	Administered by teacher or educator following a single taste test with youth.	Students' previous exposure to various foods and willingness to either try again or ask for these foods in the future.	Educators coordinate with food service staff to select items to taste in the classroom –either ones that students don't seem to be taking or new planned items. Educators work with students to display their results as a poster in the school cafeteria.
Youth Engagement Evaluation Tools **Teen Teacher Survey (TTS)** **Youth Healthy Living Survey (YHLS)** **Youth Participatory Action Research Youth Surveys (YPAR)**	Administered to young people participating in youth engagement activities. The appropriate survey depends on the age-group and program activities. For example, the TTS survey is for programs with teens trained to deliver education activities, the YHLS is for elementary age youth engagement efforts and the YPAR survey is designed for youth-led action research projects.	The surveys measure student opinions about the program's health and engagement-related outcomes as well as self-reported behaviors and skills.	County teams can use the student survey results to identify progress toward program outcomes as well as inform areas for further improvement. The YPAR project assessment also provides feedback on program implementation in terms of students' opinion of how well the project fulfilled its youth leadership and engagement principles and strategies.

UC CalFresh is devoting additional attention to the SNAP-Ed Evaluation Framework question at the environmental level: *To what extent does SNAP-Ed programming create and sustain access and appeal for improved dietary and physical activity choices in the settings where people eat, learn, live, play, shop, and work?* The most widely adopted tool across UC CalFresh county programs is the Smarter Lunchrooms Self-Assessment Score Card. The Score Card is used to evaluate which evidence-based strategies promoted by SLM is visible in the cafeteria. For FFY 2018, UC CalFresh will be working with the SLM of California collaborative partners to introduce and train SLM Technical Assistance Providers (TAPs) to implement the updated and streamlined version of the SLM scorecard recently introduced by the Cornell University. A web portal has been established for UCCE staff and other SLM partners to enter their pre and post-assessment results. Beginning in FFY 2017, the PEARS PSE module will be used to collect the SNAP-Ed Evaluation Framework indicators at the environmental setting level. County programs implementing SHCP will work with school wellness teams/committees to conduct pre/post assessments using the Shaping Healthy Choices School Health Checklist (SHC^2) to examine the degree to which they deliver comprehensive school programming in five key areas: nutrition and physical activity education and promotion, family and community partnerships, foods available on campus, supporting regional agriculture and school wellness policy. These findings will help inform school wellness planning and capturing changes in comprehensive school programming over time. In addition, assessment tools are currently being pilot tested to capture adoption and delivery of structured physical activity using CATCH, as well as completing playground stencils. As counties continue to expand their PSE support efforts, tools will be developed, refined, and adapted to capture PSE changes achieved by UCCE county programs.

In 2018, UC CalFresh will investigate additional opportunities for integrating PSE changes through School Wellness Policy implementation. In addition, opportunities for applying school wide assessments of comprehensive programming as well as additional environmental assessment tools in settings such as preschools and afterschool programs will continue to be identified where UC CalFresh county programs are already providing evidence-based education and physical activity promotion. In 2018, UC CalFresh State Office Evaluation Team will continue to collaborate with CDSS and the other SIAs to create a shared vision and action plan for an integrated CA SNAP-Ed evaluation reporting system, including feasibility assessments and adoption of reporting systems already developed, such as PEARS.

d. Previous Evaluations

UC CalFresh Statewide Evaluation

Beginning in FFY 2012, UC CalFresh introduced SMART Objectives for all core curricula to assist counties in their ongoing evaluation of educational delivery. Evaluation tools and SMART objectives have been reassessed and updated as necessary each year. Statewide and county evaluation results for the individual level SMART Objectives are analyzed and reported to county programs and USDA annually with the most recent results from FFY 2015. At the environmental level, beginning in FFY 2015, UC CalFresh reported evaluation results using the RE-AIM evaluation framework and SNAP-Ed Evaluation Framework indicators for reporting SLM and garden-based learning activities. Summaries of the Smarter Lunchrooms Self-Assessment Score Cards were produced for each participating school, examining the UC CalFresh schools only, and aggregated across all CA SLM partner schools. A subset of schools conducted two environmental assessments using the Score Card allowing for analysis of the lunchroom changes observed from the first to the second Score Card. A statewide summary of UC CalFresh's garden-enhanced learning in school and community gardens was also completed by county programs. UC CalFresh captured and reported the evaluation outcomes from the Smarter Lunchrooms Self-Assessment Score Cards and edible gardens to USDA in the FFY 2016 annual report using the SNAP-Ed Evaluation Framework reporting template. A plate waste evaluation was also undertaken in FFY 2017 to examine the impacts of SLM intervention efforts among three schools that had received Team Nutrition funding from CDE as well as UC CalFresh nutrition education. Follow-up data collection is currently underway. UC CalFresh developed several

evaluation tools to help capture the integration of physical activity into SNAP-Ed, including the playground stencil assessment, the CATCH Lesson Observation, and the Active Schools Assessment. The State Office continues to work with county programs to pilot test and refine the tools.

Comprehensive Programming

In FFY 2015, UC CalFresh conducted a review of all the assessment tools identified for the "learn" setting in the Western Region's Indicator Definitions and Data Sources Priority Indicators for FFY 2016 and specifically for Indicator ST4 Identification of Opportunities. The Alliance for a Healthier Generation's Healthy Schools Assessment was pilot tested in two schools in Fresno County and was found to perform well both for engaging school staff and capturing environmental and school practice changes that had occurred in recent years. In addition, the SHCP pilot sites were introduced to the CNS's comprehensive school programming assessment tool – Shaping Healthy Choices Evaluation Checklist (SHC^2) which was adapted from the Schools and Community Actions for Nutrition (SCAN) Survey. With the expansion of comprehensive programming particularly in the school setting, the UC CalFresh State Office evaluation team aims to identify and/or adapt an existing tool to capture the quality nutrition education and comprehensive public health approaches delivered by UC CalFresh county programs. In FFY 2016, several UC CalFresh programs pilot tested the PEARS PSE reporting module. These counties and State Office evaluation team staff provided feedback based on the pilot. In FFY 2017, the PEARS PSE module will be expanded to all UC CalFresh county programs.

Shaping Healthy Choices Program (SHCP) Outcome and Impact Evaluation

SHCP was piloted for efficacy by UC CalFresh during the 2014-2015 academic year in four schools in Butte, Placer, and Santa Barbara Counties. Program evaluations included student outcomes and classroom observations. Student outcomes included nutrition knowledge; vegetable identification; anthropometrics (height and weight); and reported fruit and vegetable intake. County teams reported how the program was implemented in each school. Classroom observations were conducted by county Advisors and Supervisors. Classroom observations were used to calculate fidelity to the curriculum (i.e., the extent to which nutrition educators completed all procedures). Feedback from county teams of feasibility of implementation was collected at the Focused Feedback Forum in June 2015. A paired-samples t-test was conducted to compare student outcomes before and after program implementation.

Combined results from all counties for the fidelity to the SHCP curriculum (i.e., the extent to which nutrition educators completed all procedures) was 85.5%±18.27 fidelity. The analysis of nutrition knowledge when combining students in all counties demonstrated a significant improvement from pre-implementation (20.7 ±4.2) to post-implementation (22.6 ±4.2). For the ability to identify vegetables, when combining scores for students across counties, there was a significant improvement between pre-implementation (4.9 ±1.6) and post-implementation (6.5 ±1.9; p=0.001). No significant changes in Body Mass Index percentile were observed over the ~4 month's implementation period. Based on the results from the Focused Feedback Forum, it is feasible for county teams to implement all components of the SHCP, including direct nutrition education, environmental improvements in the school lunchroom and instructional gardens, while engaging multiple stakeholders within the school community to sustain the positive changes.

In late FFY 2016, the CNS is initiating an impact evaluation of the SHCP Healthy Choices in Motion (HCIM) using non-SNAP-Ed grant funding to assess the effectiveness of the newly developed PA curriculum on students PA behaviors, self-efficacy and knowledge. A study to assess the efficacy of the PA curriculum used the following groups: 1) comparison, 2) SHCP only, 3) SHCP with HCIM, and 4) SHCP with HCIM implemented with Mymos (technology enhanced PA devices). The HCIM impact evaluation findings will be available in late FFY 2017. The impact evaluation HCIM will be included in the FFY 2017 final report.

Youth Engagement Initiative – Formative Evaluation

In FFY 2016, formative evaluation was conducted with UCCE UC CalFresh and 4-H programs across the state to identify promising youth development and engagement strategies already underway and to identify opportunities for strengthening and piloting additional youth development strategies.

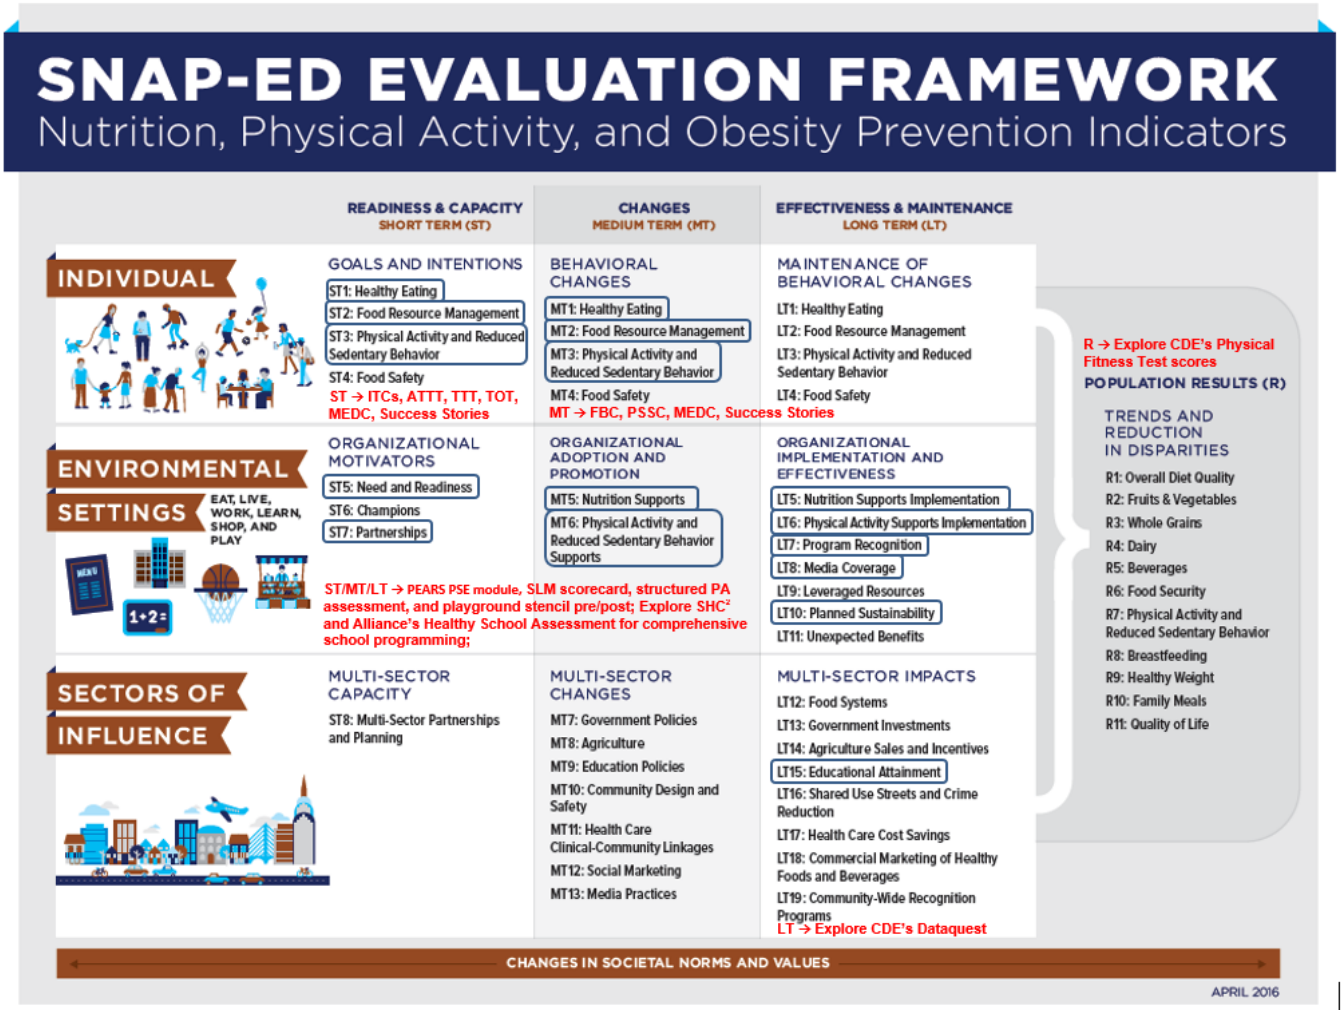
In November 2015, the Center conducted a statewide survey to gather data related to UC CalFresh current youth projects and to assess the current level of existing youth partnerships including those with 4-H clubs. There were 15 unique respondents representing different UC CalFresh counties/county clusters from across the state. Forty percent of respondents indicated that they had at least some training or experience with youth led projects, but the survey did not assess respondent's skill level or comfort in leading these types of projects. Half of respondents said that they currently partner with 4-H on nutrition education/health projects. The survey also highlighted areas where more youth strategies could be incorporated such as in SLM activities and PSE implementation. The survey identified sites working with older youth in middle and high school, which has helped to target new pilot sites for FFY 2017.

Following the statewide survey results, key informant interviews were conducted with UC CalFresh and 4-H stakeholders from across the state to get a better understanding of youth engagement practices, capture successful practices and look for opportunities for collaboration across the UC CalFresh and 4-H programs. Six advisors were interviewed related to UC CalFresh Youth work, five of which oversaw both UC CalFresh and 4-H in their county/county cluster. One advisor that was interviewed only oversaw UC CalFresh and one advisor was brand new to her current position. Two of the UC CalFresh interviews included the UC CalFresh program supervisor. The Center also interviewed three 4-H advisors, two of which included their program supervisors, from counties that have both a UC CalFresh and 4-H program and that are participating in the 4-H Diversity Pilot project targeting Latinos.

Based on the formative evaluation findings and the expansion of advisors statewide that oversee both 4-H and UC CalFresh, the Center will explore opportunities to expand the partnership between UC CalFresh and 4-H in a meaningful way. UC CalFresh brings expertise in evidence-based nutrition education curriculum and strategies, strong local partnerships with schools and youth serving organizations, and experience working with diverse youth from low resource school districts. 4-H has a long history of helping youth "learn by doing" and is known for its positive youth development programs, but is also looking to expand its appeal to more diverse audiences. Through this pilot project, (both at the state level and locally), the Center will look at ways to build upon both program's strengths to collectively support and impact youth in a positive and impactful way through collaborations with local 4-H Health Clubs, Youth Participatory Research (YPAR) Projects and Healthy Living Ambassador programs. In addition, locally both UC CalFresh and 4-H staff see an advantage of working across programs and the mutually beneficial partnerships that would result by combining each program's expertise. UC CalFresh coordinated with 4-H State Office staff to identify common individual-level evaluation tools. Other UCCE programs that should continue to be engaged are the Master Gardeners and food preservation programs as they can both be beneficial to county/county clusters that have large school or community garden projects.

e. Use of SNAP-Ed Evaluation Framework

Building on FFY 2016 and FFY 2017, UC CalFresh will collect, analyze, and report on several SNAP-Ed Evaluation Framework indicators. UC CalFresh's curriculum-specific SMART objectives and evaluation tools gather participant information for tracking achievement of the individual level indicators specified for Healthy Eating (ST1/MT1), Food Resource Management (ST2/MT2) and Physical Activity (ST3/MT3). The table below displays the evaluation tools used to capture data for the short, medium, and long term indicators outlined in the SNAP-Ed Evaluation Framework. The UC CalFresh State Office analysis approach will document the percentage of participants showing improvements between pre- and post- measures, and provide the statistical significance of these differences.



In addition, as greater emphasis is placed on the promotion and adoption of structured physical activity through CATCH in UC CalFresh county programs, as well as completing playground stencils and murals, evaluation tools and SMART objectives will be developed to focus on indicators in the environmental settings where students eat, learn, and play through organizational motivators (ST5/ST7), Physical Activity and Reduced Sedentary Supports (MT6), Activity Supports Implementation (LT6), Program Recognition (LT7), Media Coverage (LT8), and Planned Sustainability (LT10). Similarly, UC CalFresh programs implementing SLM and garden-enhanced learning will report readiness (ST5), partnerships (ST7), nutrition supports/implementation (MT5/LT5), and Planned Sustainability (LT10).

With the expansion of comprehensive programming particularly in the school setting among UCCE counties incorporating SLM, garden-enhanced learning, and CATCH, the UC CalFresh State Office evaluation team aims to identify and/or adapt an existing tool such as the Shaping Healthy Choices

Evaluation Checklist (SCH^2) or the Alliance for a Healthier Generation's Healthy Schools Program Assessment to capture new and expanded comprehensive public health approaches in the environmental settings. As we continue to advance our PSE reporting other Sectors of Influence indictors that might also be appropriate to track in collaboration with the other SNAP-Ed SIAs include ST8 Multi-Sector Partnerships and Planning. In addition, we will be exploring the use of existing school data sources available through the California Department of Education (CDE) to capture Educational Attainment (LT15) and Population Results ® for physical fitness and healthy weight among students participating in SNAP-Ed.

UC CalFresh will investigate additional opportunities for identifying needs, establishing partnerships, and making nutrition and physical activity policy and practice changes in preschool and afterschool settings and on a school wide or school district basis through School Wellness Policy monitoring and implementation. Over the next three years, the UC CalFresh State Office Evaluation Team will continue to coordinate closely with the other SNAP-Ed SIAs in California to create a shared vision and action plan for developing an integrated evaluation reporting systems to capture the SNAP-Ed Evaluation Framework indicators, by implementing PEARS.

4. Coordination Efforts

a. General Coordination

This is the fourth year of implementing integrated work plans with SIA partners statewide and the second year of a Three-Year integrated work plan. With CDSS's leadership, UC CalFresh continues to partner with the other state level implementing agencies (SIAs). Monthly, CDSS hosts SNAP-Ed 2.0 meetings for CDSS, CDPH, UC CalFresh, CDA and Catholic Charities of California (CCC) and 1:1 meetings between CDSS and each SIA to discuss general program operations and updates. Coordination efforts at the state level will focus on continuing to enhance a collaborative framework amongst state level agencies/organizations. Strategic planning took place to develop a vision, mission, common goals and state level objectives. Greater coordination with training has begun to take place with joint needs assessment and planning for common training needs. The evaluation workgroup has created statewide SNAP-Ed program objectives, the California SNAP-Ed Theory of Change Model and has begun piloting PEARS for common data reporting. With CDSS leadership, California SNAP-Ed has a number of ambitious partnership related goals for FFY 2017-2019:

- Improve the integrated work plan template and process for submission and review by SIAs.
- Refine the sharing of the targeting site that allows for real-time updates of sites and delineation of SNAP-Ed partner(s) presence.
- Develop a state level strategic plan that clearly defines strategic planning goals for each SIA and identifies common training program needs for all LIAs (such as program evaluation with a focus on PSE and alignment of WRO SNAP-Ed Evaluation Framework).
- Develop a plan for rebranding and coordinating social media campaigns and consistent messaging to staff, community partners, media, community leaders, and eligible parents and families, as per USDA's annual Guidance.
- Plan for sharing site and reach data for use in CDPH/NPI's comprehensive multi-year evaluation being implemented in selected counties.
- Planning for coordinated training and technical assistance for program areas in which SIAs have common training goals and needs.

b. Statewide Evaluation Coordination

UC CalFresh will continue to work with the other SIAs on coordinating evaluation efforts to address the shared statewide three-year objectives. As part of California SNAP-Ed Strategic Planning Process, the SIA Evaluation Working Group established objectives to develop a common evaluation plan with

recommended methods and indicators and a common system or portal for collecting and organizing evaluation related information and instruments. Ideally, California's approach will also allow for reporting against the multiple levels of the SNAP-Ed Evaluation Framework – individual, environmental setting, sectors of influence. The SIA partners are also aware that the USDA's EARS was updated for FFY 2017, so we are working on consistent definitions and approaches for new and revised elements and working with KSU to incorporate these into PEARS.

A high priority for UC CalFresh collaboration is to work with CDSS and the other SIAs as well as CDPH's NEOPB evaluation contractor, the University of California Agriculture and Natural Resources' Nutrition Policy Institute (NPI) to either identify or develop a common SNAP-Ed reporting and evaluation system that can capture the combined efforts of all SIAs as well as provide information for continuous program improvement. The SIA Evaluation Working Group which includes representation of each SIA has spent considerable time on the piloting of the PEARS PSE module in FFY 2016 and the PEARS direct and indirect education modules in FFY 2017. The PEARS system offers excellent potential as a single online system that can collect direct education, policy, systems and environment information, and participant level outcome information, as well as generate EARS form summaries.

c. University Coordination

UC CalFresh will also continue collaborating with UC faculty and extension researchers to pilot-test promising strategies, to publish program evaluation results in university publications and peer-reviewed journals, participate in Communities of Practice to build capacity and keep abreast of the current science related to nutrition and physical activity education and food security, and attend meetings and conferences where program effectiveness and evaluation results are presented.

UC CalFresh will continue to collaborate with the Center for Nutrition in Schools (CNS), experts in the areas of student, parent and professional education, district wellness policy, child nutrition programs, and community partnerships. The CNS provides free webinars and resources to support high quality and evidence-based nutrition programming in these areas, shares expertise on the latest science and best practices, informs strategic planning, and continues to be a close collaborator on the development, testing, and training for SHCP, as previously discussed.

Given the work surrounding Farm-to-Fork in California, the UC CalFresh State Office will look for ways to collaborate with the UC Sustainable Agriculture Research & Education Program (SAREP). UC CalFresh evaluation staff currently collaborates with SAREP research staff on an evaluation of a county-wide Garden Enhanced Nutrition Education (GENE) program in Calaveras County involving multiple SNAP-Ed LIAs as well as non-SNAP-Ed funding. With the focus on gardens, and the number of gardens that were re-established, working with Master Gardeners to identify strategies, resources and training for garden sustainability will occur. Previous coordination with SAREP provided an opportunity to learn how action at the state and local level can promote healthier schools and communities and how policy and partnerships can help expand the impacts farm-to-school actions have and ways to identify and overcome challenges.

The Center for Regional Change (CRC) produces research on regional change including civic engagement, economic development, environmental justice, regional equity and youth health and well-being. UC CalFresh will continue to work with CRC to help specific communities' conduct asset mapping and understand steps they can take to address community well-being in SNAP-Ed eligible communities

d. State Nutrition Action Committee (SNAC) Coordination

SNAC will act as a leadership group representing all senior level partners from USDA food and nutrition programs throughout California and include statewide advocates who represent the needs of low-income families to have access to healthy food and beverages. SNAC will function as a statewide policy making platform for implementing, providing outreach, and determining evaluation

needs based on the needs of the USDA. UC CalFresh will participate as appropriate with the planning and implementation of California's SNAC. **Leah's Pantry: EatFresh.org Coordination**

In FFY 2017 and FFY 2018, UC CalFresh will explore how to best incorporate and promote EatFresh.org web resources into UCCE programs. For example, promotion of the EatFresh.org website offers UC CalFresh participants access to a great variety of approved healthy recipes and additional resources such as CalFresh and WIC application information. UC CalFresh is also interested to explore how the brief mini-course online sessions and the healthy tip emails or text messages can be used to supplement UCCE direct adult education series. We are also interested to work with Leah's Pantry to test tracking and evaluation strategies that identify online session users and message recipients as UC CalFresh participants.

e. Physical Activity Integration Coordination

UC CalFresh will continue to work with other SNAP-Ed state implementing agencies and national partners, including but not limited to Fuel Up to Play 60, CATCH Global Foundation, and the Alliance for a Healthier Generation to strengthen our capacity to expand physical activity in the LEARN and PLAY settings. We will also participate in state and national committees to keep abreast of new physical education and physical activity research, policy, and programming opportunities. Further information on the integration of physical activity is described in *Section f. Physical Activity Programs and Environmental Changes*

f. SLM of CA Coordination

UC CalFresh will continue to coordinate and collaborate with the SLM of CA, a seven-agency collaborative, to increase awareness, implementation, and sustainability of the Smarter Lunchrooms Movement throughout California. SLM of CA leverages the resources and expertise of highly committed multi-sector partners to maximize the reach and impact of SLM. SLM of CA is made up of two components, the SLM of CA Partners and the SLM of CA Leadership Team.

The SLM of CA Partners includes California Food Policy Advocates, Kaiser's Thrive, California Department of Public Health, and the Cornell BEN Center. The SLM of CA Partners contribute significantly to increasing the reach of the SLM of CA. Partners fund out of state travel and meals at trainings, provide staffing support at trainings, develop outreach tools and promote workshops.

The SLM of CA Leadership Team is comprised of UC CalFresh, Dairy Council of California, CDPH, and California Department of Education. The Leadership Team will continue to work under the Collective Impact Model to implement a strategic plan to reach schools throughout California. The vision of the SLM of CA is that "every school lunchroom in California will utilize SLM strategies to increase students' selection and consumption of healthy foods". To accomplish this, the Leadership Team will continue to collaborate to provide resources, training, technical assistance, and shared evaluation to Technical Advising Professionals (TAPs) and school food service staff to enhance the school lunchroom environment utilizing SLM strategies.

In FFY 2017 and 2018, in part with external funding, UC CalFresh will continue to support the California Department of Education Team Nutrition Grant. The grant was awarded to 25 school districts to implement SLM strategies at two school sites per district throughout the state of California during the 2017-2018 school year. Grantees will also link nutrition education being implemented in the classroom to SLM strategies implemented in the cafeteria. UC CalFresh will provide state-level support to the California Department of Education by participating in monthly meetings and attending Team Nutrition workshops. In addition, UC CalFresh Technical Advising Professionals will provide local support to nine schools in their implementation of SLM strategies and direct nutrition education.

g. Coordination with SNAP-Ed Programs in other states and US Territories

UC CalFresh will continue to work with SNAP-Ed programs in other states and US territories that are using UCCE developed curriculum. Over the past three years, UC CalFresh provided training and technical assistance on the UCCE developed curriculum, *Plan, Shop, Save and Cook* to SNAP-Ed programs in Guam, Washington State and Oregon State Extension. UC CalFresh is developing a process for training of staff in other states and eventually within other California SNAP-Ed programs on UCCE developed curriculum. This training process will help to maintain curriculum fidelity. UC CalFresh is also developing an ordering and distribution process for use with other SNAP-Ed programs to obtain UCCE developed curricula and educational materials.

In addition, UC CalFresh will continue to share evaluation tools, methods, and analysis approaches with state university extensions, universities, and non-profits from other states working to assess the impact of SNAP-Ed.

California Department of Aging (CDA) administers SNAP-Ed activities through 16 of our Area Agencies on Aging (AAA). In 2017, the work done by the CDA Local Implementing Agencies (LIAs) has focused on improving fruit and vegetable consumption and increased physical activity through direct education, in-direct education and PSE supports. Many of the LIAs have engaged in a broad set of partnerships including local community-based organizations, county and city governmental agencies and health care organizations in support of developing a community-based system of care that supports the well-being and independence of older Californians.

CDA has participated in the evaluation workgroup which is tasked with improving, streamlining and ensuring continuity of evaluation data continued to work towards building partnerships with non-SNAP-Ed funded organizations to leverage funds and/or work toward accomplishing similar program goals and objectives to increase older adults' access to healthy food.

In conjunction with the LIAs, CDA has made progress toward increasing consumption of healthy food and beverages and decreasing the consumption of unhealthy foods and beverages, as well as, increasing access to and/or appeal of healthy dietary choices. Currently, 10 of the 16 LIAs delivered nutrition education curriculum designed to improve fruit and vegetable consumption among 60-74 year old participants. Participants that completed the series and the pre and post-tests and/or Rapid Assessment of Physical Activity suggest that SNAP-Ed participants improved their daily consumption of healthy foods as described in the Dietary Guidelines for Americans 2015. Results of the RAPA analysis indicated that 11 percent of participants increased their physical activity.

The focus for FY 2018 is to determine the appropriate level of funding to ensure program stabilization and to evaluate the potential to expand SNAP-Ed to additional LIAs in our network of AAAs. At the local level, AAAs will continue to participate and develop collaborations and partnerships with local health departments, community-based organizations, county and city governmental agencies and health care organizations that expand the reach of SNAP-Ed services that support county-wide PSE strategies. At the state level, CDA will continue to partner with other SIAs including CDPH-NEOPB who provide the AAAs and CDA with training support related to nutrition education, statewide media campaigns, and program and partnership development. Additionally, CDA will continue to partner with SIAs in developing statewide initiatives (e.g., SNAP-Ed branding and evaluation framework) that support the purpose and focus of improving the health and well-being of older Californians.

1. CDA State Agency Goals and Objectives

Overall State Level Goal and Focus

The California Supplemental Nutrition Assistance Program-Education (SNAP-Ed) goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans (DGA) and Physical Activity Guidelines for Americans (PAGA)*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

<u>Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages</u>

- Objective 1a: By September 30, 2019, improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population (consistent with the current Dietary Guidelines for Americans) by 3 percent.
- Objective 1b: By September 30, 2019, increase consumption of fruits and vegetables among the SNAP-Ed eligible population by 3 percent.
- Objective 1c: By September 30, 2019, decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population by 3 percent.

<u>Goal 2: Increase Physical Activity</u>

- Objective 2: By September 30, 2019, increase time spent in physical activity among the SNAP-Ed eligible population by 3 percent (consistent with the current *Physical Activity Guidelines for Americans*).

<u>Goal 3: Improve Food Resource Management</u>

- Objective 3a: Annually at least 80 percent of surveyed SNAP-Ed adult participants report improving at least one resource management behavior[1].
- Objective 3b: Annually at least 30 percent of surveyed SNAP-Ed adult resource management participants report increased food security[2].

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal[3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- Objective 4a: Annually improve[4] food environments in at least 500 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).
- Objective 4b: By September 30, 2019, at least 75 percent of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved food environments.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- Objective 5a: Annually improve[4] environments and opportunities for physical activity in at least 200 new and continuing SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations).
- Objective 5b: By September 30, 2019, at least 75 percent of SNAP-Ed jurisdictions (counties/cities) will increase the number of SNAP-Ed eligible sites or organizations (includes multiple sites/physical locations) with improved environments and opportunities for physical activity.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

2. Description of projects/interventions. The following information should be provided:

Project Title: California Department of Aging (CDA)

a. Related State Objectives:

Objective 1: By September 2019, increase the consumption of fruits and vegetables among older adults participating in the CDA SNAP-Ed grant by 3 percent as measured by the Fruit and Vegetable Checklist or the Food Behavior Checklist. (State Level Objective 1b)

- By September 30, 2017, increase the consumption of fruits and vegetables among older adults participating in the CDA SNAP-Ed grant by 1 percent as measured by the Fruit and Vegetable Checklist or the Food Behavior Checklist.
- By September 30, 2018, increase the consumption of fruits and vegetables among older adults participating in the CDA SNAP-Ed grant by 1 percent as measured by the Fruit and Vegetable Checklist or the Food Behavior Checklist.

- By September 30, 2019, increase the consumption of fruits and vegetables among older adults participating in the CDA SNAP-Ed grant by 1 percent as measured by the Fruit and Vegetable Checklist or the Food Behavior Checklist.

Objective 2: By September 2019, increase physical activity among older adults participating in the CDA SNAP-Ed grant by 3 percent as measured by the Rapid Assessment of Physical Activity. (State Level Objective 2)

- By September 30, 2017, increase physical activity among older adults participating in the CDA SNAP-Ed grant by 1 percent.
- By September 30, 2018, increase physical activity among older adults participating in the CDA SNAP-Ed grant by 1 percent.
- By September 30, 2019, increase physical activity among older adults participating in the CDA SNAP-Ed grant by 1 percent.

Objective 3: By September 2019, develop and participate in at least three statewide trainings consistent with the SNAP-Ed statewide training plan in collaboration with other State Implementing Agencies (SIA). (State Level Objective 1b, 2, 4, and 5)

Objective 4: By September 2019, all participating AAAs will improve one food environment and/or opportunity for physical activity within each Planning and Service Area (PSA) at participating SNAP-Ed eligible sites or other venues where older adults eat, live, learn, work, play and shop. (State Level Objective 4 and 5)

- By September 2017, improve food environments and/or opportunities for physical activity at ten (10) participating SNAP-Ed eligible sites or other venues where older adults eat, live, learn, work, play and shop.
- By September 2018, improve food environments and/or opportunities for physical activity at twelve (12) participating SNAP-Ed eligible sites or other venues where older adults eat, live, learn, work, play and shop.
- By September 2019, improve food environments and/or opportunities for physical activity at sixteen (16) participating SNAP-Ed eligible sites or other venues where older adults eat, live, learn, work, play and shop.

Objective 5: By September 2018, CDA will begin the process of conducting a gap analysis to ensure efficient utilization of SNAP-Ed funding and also to determine the appropriate baseline level of funding required by a LIA to fully operate the program. Currently, the average funding per LIA is $30,000 per year which is insufficient to fully operate the program. Determining the appropriate level of baseline funding will allow CDA to request the necessary amount of funding to stabilize the current LIA programs and to expand SNAP-Ed to additional LIAs in our network of 33 AAAs. The SNAP-Ed program will have a greater impact by expanding the footprint within our 33 AAAs rather than concentrating services within a select number of AAAs.

The gap analysis will be conducted by utilizing information gathered from the following sources:

- Results from multiple surveys of the SIAs (surveys include quarterly program review and a SurveyMonkey regarding program and funding needs)
- Fiscal evaluation of expenditures
- Data analysis, to include cost of services per participant
- Evaluation of curriculum to determine which programs are best suited to the needs of the elderly population served

Completion of the gap analysis will be by the end of the next fiscal year, September 30, 2018.

- By Spring 2018, CDA will complete an assessment of LIA staffing levels to determine adequate staffing level to meet SNAP Ed performance expectations.
- Objective 6: By September 30, 2019, CDA will develop one new partnership to identify new opportunities for coordination and collaboration with non-SNAP-Ed funded partners to improve food security among California's SNAP-eligible older adults.

    - By July 2017, CDA will explore collaboration with the California Department of Education, Nutrition Services Division, Summer Meal Program. The possible collaboration may involve an intergenerational approach for improving food security among California's youth and SNAP eligible older adults.
    - By September 30, 2017, CDA will seek a partnership with the Office of Farm to Fork and California Healthier Living Coalition to identify and implement strategies to improve food security among California's SNAP-eligible older adults.
    - By September 30, 2018, CDA and the non-SNAP-Ed funded agency will develop an implementation plan to improve food security among California's SNAP-eligible older adults.
    - By September 30, 2019, CDA and the non-SNAP-Ed funded agency will implement the plan to improve food security among California's SNAP-eligible older adults.

b. Audience:

The information provided below is from the California Aging Reporting System (CARS), a database used to track information pertaining to the participants in the Older Americans Act (OAA), Title IIIC Congregate Nutrition Program in California. (Source: State of California, Department of Aging, Long-Term Care and Aging Services Division, Program Narratives, Sacramento, California, March 2016).

Age:

- 60 and older 100 percent

Gender:

- Male 38 percent
- Female 62 percent

Race:

- White 40 percent
- Asian 19 percent
- Black/African American 7 percent
- American Indian or Alaska Native 1 percent
- Native Hawaiian or Other Pacific Islander 1 percent
- Other Race 6 percent
- Multiple Race 1 percent

Ethnicity:

- Hispanic 25 percent

Income:

- ≤100 percent Federal Poverty Level 41 percent

Rural:

- 12 percent

CDA's SNAP-Ed evidence-based nutrition education and obesity prevention activities will target: low-income individuals who are at or below 185 percent of the Federal Poverty Level (FPL), age 60 or older, current SNAP-Ed participants, or are eligible to receive CalFresh benefits, and who participate in interventions provided at eligible OAA Title IIIC Congregate Nutrition Program sites or other approved venues.

CDA's allocation methodology distributes SNAP-Ed funds using the California Aging Population Demographic Projections Report which provides older adult population data by county and Planning and Service Area (PSA). Each participating PSA receives a base allocation of $20,000. The remaining funding is distributed based on the number of Medi-Cal eligible individuals in the PSA, a count of the unduplicated OAA nutrition program participants, and a factor for geographic isolation (based on the geographic distribution of older

individuals in the State) to develop an equitable method of distributing funds to the Area Agencies on Aging (AAA). The Medi-Cal eligible factor provides an estimate of the number of low-income individuals in the PSA and aligns to SNAP-Ed's primary target population. The unduplicated OAA nutrition program client count provides information on the total client reach of the service provider. The geographic isolation factor is included to provide sufficient funding to deliver services in rural locations.

CDA will administer SNAP-Ed activities through AAAs at eligible Title IIIC Congregate Nutrition sites and other venues such as low-income senior housing sites, farmers' markets, community centers, Title IIIC home-delivered meal participants' homes and other places where SNAP-Ed eligible older adults congregate. Eligible sites must meet one of the following US Department of Agriculture, Food and Nutrition Service (USDA, FNS) approved SNAP-Ed site eligibility methodologies:

- Methodology 1. Income Targeting Data - The congregate site's address is within an eligible low-income census tract. (Greater than 50 percent of residents have incomes below 185 percent of the FPL. For more information on census tract data refer to the SNAP-Ed Site Eligibility Instructions at http://www.aging.ca.gov/Programs/SNAP-Ed/.

- Methodology 2. Means-Tested Setting - The setting is qualified based on the population it serves and not its physical location (e.g., public housing, Commodity Food Distribution sites, etc.). For more information on means-tested settings refer to the SNAP-Ed Targeting Summary Sheet. For more information on means-tested settings, refer to Methodology 1 in the USDA/WRO Targeting Methodologies Summary Document.

- Methodology 3. Intake Records - Fifty percent of congregate site participants have incomes below 100 percent of the FPL, as determined by income levels from the Title IIIC intake forms available on the CDA Title III Intake Forms Guide.

- Methodology 4. Survey - Fifty percent of congregate site participants must have incomes below 185 percent of the FPL. Participant income is determined by individual participant queries conducted at the congregate meal site. (Queries may be completed on the day of highest attendance.)

c. Food and Activity Environments:

AAAs and their providers incorporate PSE change strategies which support goals and objectives identified within each county's integrated work plan (IWP). As SNAP-Ed funding levels continue to decrease, PSE interventions are incorporated to develop and support greater reach within areas where SNAP-Ed eligible participants reside. CDA-approved evidence-based direct and/or indirect nutrition education interventions are incorporated to support local

PSE strategies. AAAs are encouraged to implement environmental strategies that are consistent with the current DGA and the PAGA. These strategies aim to support an increased consumption of fruits and vegetables; increased intake of whole grain foods and lean proteins; decreased intake of sodium, sugar and saturated fat; and increased or improved environments for physical activity at or around SNAP-Ed sites where the eligible population congregates.

An example of a food and activity environment at a CDA SNAP-Ed site might include Harvest of the Month (HOTM) nutrition education interventions. As a result of the direct or indirect education, the congregate nutrition site incorporates featured seasonal fruits and vegetables at least twice per month into its Title IIIC Nutrition Program menus. The incorporation of HOTM fruits and vegetables introduces new foods to participants and encourages seniors to visit local farmers' markets. In addition, HOTM has been useful for the coordinated and distribution of the Senior Farmers' Market Nutrition Program (SFMNP) coupons.

Other food and activity environment examples include implementing the Eat Smart, Live Strong Program. As a result of participating in the Program, participants encourage their peers to participate in upcoming Eat Smart, Live Strong classes. Some SNAP-Ed sites have witnessed program participants starting walking groups, collaborating with nutrition site staff to work toward changing and/or adopting policies to decrease use of sodium or increase use of fresh fruits and vegetables in Title IIIC Nutrition Program menus. The Eat Smart, Live Strong Program has also been effective in supporting food and activity environments through gardening projects at low-income housing facilities. These gardening projects help improve low-income older adults' access to fresh fruits and vegetables, provide additional outlets for residents to participate in physical activity, support food security, empower residents, and encourage socialization among residents.

d. Project Description for Educational Strategies

CDA administers the OAA Title IIIC Nutrition Program through its statewide network of 33 AAAs and their service providers. This program helps older adults remain independent in their communities by providing nutritious meals. OAA services target older individuals who are in greatest economic or social need, and give particular attention to low-income, minority older individuals, and older individuals living in rural areas. The Program's purpose is to improve participants' dietary intakes and decrease their risk for chronic disease by providing meals that meet the current DGA. The DGA align with SNAP-Ed intervention strategies and are consistent with the USDA's expectation that states coordinate their activities with local nutrition education and health program initiatives, like the OAA Nutrition and Disease Prevention and Health Promotion Programs. These activities should support, but not supplant, existing programs. Additionally, SNAP-Ed requires evidence-based programming; this is consistent with the Administration for Community Living's emphasis on states providing programs that meet this standard.

During FFY 2017 and 2018, 16 AAAs will provide direct and indirect nutrition education and obesity prevention activities based on USDA, FNS-approved evidence-based nutrition education and obesity prevention programs. These interventions are designed to encourage low-income older adult participants to make healthier food choices within their limited budgets and increase physical activity in settings where older adults eat, live, play and shop. In addition, programs will incorporate county-wide PSE strategies.

Specific key messaging consistent with the current DGA include:

- Focus on making healthy food and beverage choices from all five food groups including fruits, vegetables, grains, protein foods, and dairy to get the nutrients you need;
- Eat the right amount of calories for you based on your age, sex, height, weight, and physical activity level;
- Building a healthier eating style can help you avoid overweight and obesity and reduce your risk of diseases such as heart disease, diabetes, and cancer.

During FFYs 2017 through 2019, CDA estimates SNAP-Ed activities will reach the following number of low-income older adults:

	Direct Education	Indirect Education	PSE
	Number of Unduplicated Participants	Number of Target Population Reached	Number of persons reached
FFY 2017	2,808	85,080	108,382
FFY 2018	2,542	77,032	117,754
FFY 2019	2,542	77,032	127,567

CDA implemented SNAP-Ed services starting in FFY 2014, when 20 AAAs agreed to participate in SNAP-Ed services. Over the next few years, funding reductions combined with the administrative burden of providing SNAP-Ed services led some AAAs to withdraw from the program. CDA plans to conduct a gap analysis to determine minimum funding levels to support administration and program activities for SNAP-Ed services among older adults throughout California.

e. Project Description for Marketing Strategies

CDA does not receive SNAP-Ed funding for marketing strategies. The California Department of Public Health (CDPH) is responsible for developing, implementing, and evaluating California's SNAP-Ed marketing strategies.

f. Evidence Base

The "California SNAP-Ed Integrated Curricula List" includes a tabbed section which identifies CDA's approved evidence-based curriculum that is appropriate for the older adult population. However, some materials' appearance, method of presentation, and/or content may need to be modified to better meet the needs of older adults.

An example of modifications to the appearance of materials could include using a larger font, serif typefaces, dark type against a light background, and more white space on printed materials. An example of modification to the method of presentation could include dividing long presentations into shorter sub-components, repeating salient points, and using auditory and visual aids. CDA does not edit and/or modify any SNAP-Ed materials used. Edits and/or modifications to these materials would be made at the local level. It is CDA's expectation that programs provide the materials for the oversight agency to review. To date no AAA has made modifications to materials.

The older adult physical activity curricula listed in the "California SNAP-Ed Integrated Curricula List" are appropriate to the needs and limitations of this population. Curricula often include instructions on how programs can be adapted for older adults with physical limitations (e.g., seated or standing exercises can be employed as necessary) to ensure program fidelity.

The "California SNAP-Ed Integrated Curricula List" provides a list of USDA, FNS-approved curricula. USDA, FNS identified three categories of evidence for strategies and interventions along a continuum: research-tested (RT), practice-tested (PT), and emerging (EM). These categories vary according to scientific rigor, evaluation outcomes, research translation, and degree of innovation. Each category along the continuum is vital for expanding and building the knowledge base on effective practices. As a result, AAA SNAP-Ed agencies must implement evidence-based programming which meets one of the following three criteria: RT, PT, or EM. Movement along the continuum requires programs be fully implemented and evaluated. This evidence-based programs list provides the following program information: source and description of the curriculum, required evaluation tools by SIA, available languages, the category of evidence-based approach and includes main topics of the curriculum (e.g., physical activity or MyPlate).

g. Policy, Systems, and Environmental Changes

CDA SNAP-Ed funded programs have focused on implementing environmental strategies that support increased consumption of fruits and vegetables; increased intake of whole grain foods; and lean proteins; decreased intake of sodium, sugar and saturated fat; and increased or improved environments for physical activity at or around SNAP-Ed sites where the eligible population congregate. AAAs determine PSE strategies based on the needs of the low-income target populations as well as local community change goals which are clearly defined in the local county IWP. These strategies support the

evidence-based nutrition education and physical activity interventions provided at eligible sites and support county-wide goals and objectives as identified in each county's IWP.

Examples of environmental strategies programs include:

- Implementation, in writing or in practice, of new meal preparation standards. These standards will include any of the following when planning and preparing meals: the increased use of fruits and vegetables; the increased use of 100 percent whole grain products; increased use of lean proteins; and decreased the levels of sodium, sugar, or saturated fat.

- Adoption, in writing or in practice, or at least one change to improve the older adults' access to, or willingness to engage in, healthy eating at Title IIIC Congregate Nutrition Sites.

- Adoption, in writing or in practice, of at least one change to improve the older adults' access to, or willingness to engage in, increased physical activity.

Once these PSE strategies are established, CDA provides technical assistance during site visits and ongoing communications via email and/or telephone conferencing. CDA offers networking opportunities during the SNAP-Ed Forum as well as opportunities to share local interventions during CDA SNAP-Ed program update teleconferences and webinars.

Many agencies use local support from other county Local Implementing Agencies. Often PSE strategies are countywide such as the Harvest of the Month or Rethink Your Drink.

CDA will use the national FNS SNAP-Ed Evaluation Framework (Framework), formerly the Western Regional Office Framework, to monitor progress, effectiveness and sustainability of program interventions, and environmental change strategies. CDA will use the Framework, specifically MT5 Nutrition Supports Adopted and MT6 Physical Activity and Reduced Sedentary Behavior, to help evaluate and support environmental changes. In addition, PSE strategies implemented by AAAs align with CDA objectives and support statewide PSE objectives.

h. Use of Existing Educational Materials

See the "California SNAP-Ed Integrated Curricula List" for a complete list of CDA's existing educational materials. This list includes information regarding the curriculum title, author, curriculum description and available languages (e.g., English or Spanish).

i. Development of New Educational Materials

CDA does not plan to purchase new materials. AAAs may purchase program education materials or other items to support or provide evidence-based nutrition education or physical activity curricula.

j. Key Performance Measures/Indicators (kpi)

USDA, FNS-approved evaluation tools will include, as appropriate, measures of positive behavior change as a result of the intervention. Data gathered from participating AAAs will provide data for measuring behavior change as follows:

- Increased level of physical activity.
- Increased intake of fruits and vegetables.

3. Evaluation Plans

a. Name:

CDA administers SNAP-Ed grant activities through participating AAAs and their service providers. SNAP-Ed contracts require each participating agency to conduct an evaluation appropriate for the SNAP-Ed intervention being offered. Each agency will choose a SNAP-Ed program based on the needs of its community as previously noted (2.f. Evidence Base).

CDA requires any SNAP-Ed entity providing series-based direct education with an allocation greater than $35,000 annually, to administer the following evaluation tools to 25 percent of SNAP-Ed participants:

- Rapid Assessment of Physical Activity (RAPA)
- Fruit and Vegetable Checklist (FVC)
- Food Behavior Checklist (FBC)

CDA will conduct a qualitative survey/analysis of all SNAP-Ed funded programs to evaluate the implemented environmental support strategy and its impact.

b. Type:

CDA will annually monitor program evaluations and assess for effectiveness. AAAs must include a behavioral change evaluative process for all SNAP-Ed direct education interventions.

- Outcome Evaluation:
    - Direct Education: Programs with an annual allocation less than $35,000 will conduct pre- and post-tests, in a minimum of 25 percent of series-based classes, to evaluate if the SNAP-Ed interventions resulted in the intended behavior change.
    - Environmental Strategy: CDA will conduct a qualitative survey to evaluate what changed as a result of the environmental strategy and/or participant feedback and gather data based on the Framework indicators indicated below under 3.c..
- Process Evaluation:
    - Programs will collect the required Education and Administrative Reporting System (EARS) data to document SNAP-Ed activities and sites the number of older adult participants reached, and their demographic characteristics.

c. Questions:

CDA requires any CDA-funded SNAP-Ed entity providing series-based direct education activities that is receiving greater than $35,000 annually to administer validated surveys in a pre- and post-test format at the beginning and end of 25 percent of series-based interventions. The older adults participating in SNAP-Ed direct education must complete the FBC or the abbreviated FVC and the RAPA, depending on the specific USDA, FNS-approved curriculum.

AAAs collect SNAP-Ed participant pre- and post-test survey data. The data is analyzed using a t-test via Excel. AAAs provide a comprehensive description of evaluation outcomes within their annual report.

The qualitative survey will evaluate the amount of change that resulted from the implemented environmental strategy and the older adult participants' responses. The survey will seek to identify what changed as a result of implementing the strategy.

CDA will use the Framework, and/or the Reach Effectiveness Adoption Implementation Maintenance (RE-AIM) Framework to monitor the progress, effectiveness and sustainability of program interventions and environmental change strategies.

The FFY 2017 SNAP-Ed Plan Guidance published the revised Framework and identified seven priority outcome indicators: Medium-Term (MT) Outcomes MT1, MT2, MT3, MT4, and MT5; Short-Term (ST) Outcomes ST7 and ST8; and R2. These indicators will provide information to evaluate the individual and environmental levels of the Social Ecological Model (SEM). CDA identified the following priority indicators which align with questions in the CDA SNAP-Ed evaluation tools: FBC, FVC, and the RAPA.

- At the individual level, questions evaluate to what extent the SNAP-Ed programming improves participants' diets, levels of physical activity, and health.
    - AAAs will evaluate the following Outcomes:
        - Healthy Eating Behaviors (MT1)
        - Physical Activity and Reduced Sedentary Behaviors (MT3)
- At the environmental level, questions evaluate to what extent SNAP-Ed programming facilitates access to healthy food environments and areas that promote physical activity and creates appeal for improved dietary and physical activity choices in the settings where nutrition education is provided.
    - AAAs will evaluate the following outcomes:
        - Partnerships (ST7)
        - Nutrition Supports Adopted in Environmental Settings (MT5)
        - Physical Activity and Reduced Sedentary Behavior Supports Adopted (MT6)

Data and evaluation results will be compiled and included in the statewide annual report. CDA will compile and share evaluation results with all CDA SNAP-Ed funded programs. CDA will use its findings to support and/or expand future environmental strategies.

d. Evaluation

During FFY 2015, process and outcome evaluations were conducted by participating AAAs and included in the FFY 2015 Annual Report and EARS.

e. Use of SNAP-Ed Evaluation Framework:

MT1, MT3, MT5, MT6, ST7 (as noted in 3.c. above).

4. Coordination Efforts

SNAP-Ed Funded Partners:

SIAs continue coordination efforts to ensure California SNAP-Ed programs are consistent, integrated and uphold the highest level of evidence-based and quality standards. In an effort to do so, SNAP-Ed SIA representatives from CDA, the California Department of Public Health (CDPH), UC CalFresh, the California Department of Social Services (CDSS) and Catholic Charities of California (CCC) work collaboratively to develop the following:

- Statewide Guidance for Curriculum Fidelity: This guidance will assist Local Implementing Agencies (LIA) to identify how and when to make curriculum modification while maintaining program fidelity. The guidance will be available for use starting in FFY 2017.

- Statewide Evaluation System: SIAs work collaboratively through the SNAP-Ed evaluation workgroup. The evaluation workgroup is tasked with identifying and recommending a common set of evaluation tools and approaches for working toward common statewide data systems.

Non-SNAP-Ed Funded Partners:

CDA continues to work toward building partnerships with other non-funded SNAP-Ed Partners. CDA plans to continue to develop its partnership with the California Department of Food and Agriculture to identify ways the SFMNP can collaborate with CDA's SNAP-Ed Program. CDA will work to establish relationships with SFMNP staff, Office of Farm to Fork, and California healthier living coalition to identify opportunities to work together to increase access to fruits, vegetables and farmers' markets.

CDA would also like to establish partnerships with the Commodity Supplemental Food Program (CSFP) and the US Department of Housing and Urban Development (HUD). These relationships could help to identify additional opportunities to increase food security for California's low-income older adults through CSFP and establish fruit and vegetable gardens at low-income public housing.

Catholic Charities SNAP-Ed Program Summary

CCC delivers SNAP-Ed evidence-based direct education, indirect education, and PSE support in 25 counties through 12 LCCOs. LCCOs deliver SNAP-Ed services at over 440 sites, including LCCO offices, churches, schools, emergency food distribution centers, public housing, farmers markets, and more. CCC SNAP-Ed services effectively reach sensitive and underserved populations who typically experience the greatest health disparities. CCC and LCCOs will continue to deliver impactful SNAP-Ed direct education, indirect education, and PSE support services to children, adults, and older adults. These services will continue to be culturally and linguistically appropriate, compassionate, and participant-centered. As professional social service agencies, LCCOs will continue to integrate SNAP-Ed programming with an array of related social services (including but not limited to case management and CalFresh enrollment assistance) to foster long-term positive behavior change and healthy functioning for all SNAP-Ed participants. LCCOs have successfully incorporated SNAP-Ed and its objectives of healthy eating and active living into other safety net programs such as housing, education, food assistance, senior services, immigration and refugee services, and other supports. From year one to year two, activities will support a positive progression in number of services delivered, number of sites with full PSE implementation, as well as expansion of agency- and diocese-wide policy work. Staff with partnering programs will be trained and will learn to identify and support opportunities for SNAP-Ed work among low-income individuals that are touched by LCCO services. Agency-wide policies will be applied to case-management services to help address health equity issues. Helping clients to develop healthy eating and active living behaviors will be a key component in assisting clients to achieve self-sufficiency and improved quality of life.

1. CCC State Agency Goals and Objectives

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current Dietary Guidelines for Americans and Physical Activity Guidelines for Americans.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and

- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, learn, live, play, shop, and work.

a. State Level Goals

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages.

Goal 2: Increase Physical Activity

Goal 3: Improve Food Resource Management

Goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations.

b. State Level Objectives

Objective 1a: Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current Dietary Guidelines for Americans.

Objective 1b: Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

Objective 1c: Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Objective 2: Annually increase physical activity among the SNAP-Ed eligible population consistent with the current Physical Activity Guidelines for Americans.

Objective 3a: Annually improve resource management behaviors among the SNAP-Ed eligible population.

Objective 3b: Annually increase food security among the SNAP-Ed eligible population.

Objective 4a: Annually improve food environments at SNAP-Ed eligible sites.

Objective 4b: Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Objective 5a: Annually improve environments and opportunities for physical activity at SNAP-Ed eligible sites.

Objective 5b: Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

2. Description of projects/interventions

Project Title: CATHOLIC CHARITIES OF CALIFORNIA, INC.

a. Related State Objectives

Catholic Charities of California, Inc. will work to achieve the following objectives, in support of the SNAP-Ed State Level objectives:

1. To provide nutrition and physical activity education grounded in the Dietary Guidelines for Americans and Physical Activity Guidelines for Americans. *(State Level Objectives 1, 2, 3)*

    - CCC will maintain monthly progress reports to track the work of CCC-LIAs to reach SNAP-Ed eligible participants with evidence-based Direct Education (DE) and Indirect Education (IE). CCC-LIAs will reach at least 8,500 DE participants and 32,000 IE participants by September 2017, increasing participation by 15% in FFY18, and by 5% in FFY19, reaching an overall total of at least 28,500 SNAP-Ed eligible participants with evidence-based Direct Education and 107,000 SNAP-Ed eligible participants with Indirect Nutrition Education by September, 2019. (The increase in this objective is due to the addition of a new agency, CC Diocese of Fresno, and the expansion of CCC SNAP-Ed services in Fresno County).

    - By September 2017, at least 60%, by September 2018, at least 80%, and by September 2019, 100% of CCC-LIAs will integrate physical activity into existing nutrition education programs and/or connect SNAP-Ed participants with physical activity opportunities, and provide consistent messaging and resources on the importance of being physically active.
    - By September 2019, CCC will collaborate with partner State Implementing Agencies to develop and provide at least two nutrition education training opportunities annually for CCC-LIAs to continuously improve upon the delivery of nutrition education and physical activity promotion.

2. To increase food security and provide education on food resource management. *(State Level Objective 3)*

    - By September 2017, at least 60%, by September 2018, at least 80%, and by September 2019, 100% of CCC-LIAs receiving federal funds for both SNAP-Ed and CalFresh Outreach will cross-promote programs and support the increase in participation in SNAP of those eligible to receive benefits.

- By September 2017, at least 60%, by September 2018, at least 80%, and by September 2019, 100% of CCC-LIAs that deliver food assistance and food distribution programs will integrate SNAP-Ed education and/or policy, systems and/or environmental supports that encourage healthy food and beverage consumption and food resource management.

3. To integrate nutrition and physical activity supports where people eat, live, learn, work, play, or shop
   (State Level Objectives 4, 5)

   - By September 2017, CC-LIAs will identify at least 50 policy, systems and/or environmental strategies to increase access to and/or the appeal of healthy dietary choices and physical activity in the communities they serve. By September 2018, CC-LIAs will have adopted at least 80% of said PSEs and have implemented/support at least 25% of said PSEs, and by September 2019, CC-LIAs will have implemented/support at least 75% of said PSEs.

   - By September 2017, at least 60%, by September 2018, at least 80%, and by September 2019, 100% CCC-LIAs with emergency food distribution sites will have policies in place to improve the nutritional value of the foods and beverages that are distributed to SNAP-Ed eligible populations.

4. To provide administrative support and management to CCC Local Implementing Agencies and to coordinate at the State Level to enhance the impact SNAP-Ed in California.
   (State Level Objectives 1-5)

   - By September 2019, CCC will conduct at least three site visits or reviews with each participating agency, and hold monthly conference calls with CCC-LIAs to provide technical assistance and guidance on programmatic improvement.

   - By September 2019, CCC will attend and participate in all key state level meetings and workgroups with other California Implementing Agencies and stakeholders to coordinate and increase the impact of SNAP-Ed for California's eligible population.

b. Audience

AGE:

CCC delivers SNAP-Ed services to adults 18 years and older, primarily women, children ages 3-17 years, as well as older adults 60+.

GENDER:

CCC delivers SNAP-Ed services to both males and females.

ETHNICITY:

CCC delivers SNAP-Ed services to all races and ethnicities with specific focus on Latino, African-American, and Asian communities.

LANGUAGE:

CCC delivers SNAP-Ed services in primarily English and Spanish as well as a small percentage of programming in Vietnamese, Tagalog, Korean, and Mandarin, among others.

SNAP-ED TARGET POPULATION:

Interventions target individuals and families at or below 185% of the Federal Poverty Level at sites within low-income census tracts, schools where at least 50% of students receive Free or Reduced Price Meals, and/or means-tested low income program sites that offer a high likelihood of reaching individuals with incomes qualifying them for SNAP-Ed services.

c. Food and Activity Environments

Current research recognizes that "individual behavior change can only occur in a supportive environment with accessible and affordable healthy food choices and opportunities for regular physical activity." [1] These environments include physical environments (neighborhood/ community food access, food retail, schools, child care centers, workplaces, homes) and the macro environment (food message environment). Food access includes increasing the exposure

[1] *Obesity A Reference Handbook, 2nd Edition* by Judith S. Stern and Alexandra Kazaks. Cited in Food and Physical Activity Environments, a presentation by the USDA Dietary Guidelines Advisory Committee, January 2014. Retrieved from: http://health.gov/dietaryguidelines/2015-binder/meeting2/docs/workgrouppresentations/sc4_dgac_mtg_2_-_sc_presentation_2-27-14.pdf

of the SNAP-Ed target population to quality, affordable foods, and in settings that sell these foods.[2]

Catholic Charities Local Implementing Agencies (CCC-LIAs) deliver SNAP-Ed programming at various community sites and schools, including many where the agencies deliver related social services and programs including CalFresh Outreach, Emergency Food Assistance, Healthcare Access Programs, Temporary and Public Housing and Shelter, Senior Services, Employment Services, Education Programs and other anti-poverty initiatives.

CCC-LIAs implement environmental strategies that are supportive of positive behavior changes within environments designed to strengthen access to and/or the appeal of healthy foods/beverages and physical activity. CCC-LIAs utilize positive nutrition messaging, make drinking water readily available to participants and staff, operate gardening initiatives, and continually develop opportunities and spaces for physical activity at CCC-LIA service sites and in the community. Physical activity opportunities include Zumba, walking groups, karate instruction, as well as partnerships with Physical Education and after school programs for school age youth. Additionally, SNAP-Ed services in settings where food is distributed (pantries, shelters, retail locations, senior housing) increase the exposure of SNAP-Ed participants to healthy, affordable foods with activities such as store tours, cooking classes/demonstrations, and healthy food and beverage taste testing.

CCC-LIAs also improve access to and appeal of healthier dietary choices for low-income populations through SNAP-Ed services and strategies at emergency food distribution sites, food pantries, parishes, shelters, and other service sites. These services and strategies include food procurement policies, healthy food and beverage standards, reinforcing messages, and other environmental policies and practices. These strategies complement CCC-LIAs' evidence-based nutrition education and physical activity interventions as well as the goals and objectives identified in each county's Integrated Work Plan.

d. Project Description for Educational Strategies

Catholic Charities of California (CCC) will provide Supplemental Nutrition Assistance Program Education (SNAP-Ed) services to improve nutrition and address the serious problem of obesity and its effects among low-income Californians. In FFY 2017-19, CCC and 12 CCC-LIAs will provide evidence-based SNAP-Ed interventions to some of California's poorest residents across 25 counties: Solano, San Bernardino, Riverside, San Diego, Imperial, San Joaquin, Stanislaus, San Francisco, Marin, San Mateo, Santa Cruz, Monterey, Orange, Santa Clara, Los Angeles, Napa, Lake, Sonoma, Fresno, Butte, Shasta, Siskiyou, Glenn, Tehama and Trinity.

[2] *Food and Physical Activity Environments* A presentation by the USDA Dietary Guidelines Advisory Committee, January 2014. Retrieved from: http://health.gov/dietaryguidelines/2015-binder/meeting2/docs/workgrouppresentations/sc4_dgac_mtg_2_-_sc_presentation_2-27-14.pdf

Over the three-year period, interventions will reach at least 135,500 unduplicated participants. Of these, an estimated 28,500 will receive Direct Education interventions and 107,000 will receive Indirect Education interventions. Key messages will align with State and CCC SNAP-Ed Objectives and the Dietary Guidelines for Americans.

In FFY 2017-19, CCC and CCC-LIAs will support the work of CDSS and other State Implementing Agencies (SIA) to consolidate and streamline SNAP-Ed planning and implementation, so that all LIAs within each county provide coordinated services to SNAP-Ed eligible families, and program participants derive the maximum impact from SNAP-Ed funded efforts.

Below is an overview of each CCC-LIA's SNAP-Ed programming.

Catholic Charities of Los Angeles (CCLA):

CCLA will deliver SNAP-Ed services in Los Angeles County, integrating SNAP-Ed with existing services at community centers, especially emergency food distribution sites, CalFresh application assistance sites, and parishes. CCLA will implement brief Indirect Education interventions, as well as series-based Direct Education nutrition classes in English and Spanish using the Food Smarts, Fresh from the Garden, and Eat Healthy - Be Active curricula. Interventions will cover nutrition topics as well as physical activity promotion, targeting primarily Latino women and families. Key messaging will focus on increasing consumption of fruits and vegetables, promoting healthy beverage choices, limiting foods high in sugar and sodium, and choosing whole foods high in fiber. Also covered are topics of food resource management and chronic disease prevention. Recipes and samples of healthy foods that include food distributed by CCLA's food pantries will be provided to participants to reinforce SNAP-Ed activities and encourage participants to prepare healthier meals. Active lifestyles will be promoted by including information and examples of simple exercises as part of nutrition education classes. Staff will collaborate with local churches and community organizations to promote nutrition and fitness education and SNAP-Ed related activities throughout the community. Strategies to improve the food environment in these communities include various policies at food pantries and parishes, farm-to-fork local procurement initiatives, and ready access to drinking water. Additionally, CCLA has established and promotes various opportunities for physical activity including walking groups, Zumba, yoga, and martial arts. These PSE strategies will continue to progress from identification of opportunity, adoption and implementation over the course of the multi-year plan.

Catholic Charities of Solano County (CCSO):

CCSO will deliver SNAP-Ed services in Solano County. The agency will conduct brief Indirect Education interventions as well as single session and series-based Direct Education classes utilizing evidence-based Food Smarts and Eat Healthy - Be Active curricula. These interventions will cover a variety of nutrition topics as well as physical activity promotion, and will take place at the agency's social services office, local food pantries, public housing

locations, and schools targeting eligible Latino, Caucasian, Asian and African-American participants. SNAP-Ed interventions will be integrated into other assistance programs and services, such as food, rental, family, immigration, and other low-income assistance programs provided by the CCSO agency. Interventions are designed to increase consumption of healthy foods and healthy beverages, promote physical activity, as well as educate on food resource management to increase food security. CCSO also plans to implement policies and healthy food and beverage standards to increase the nutritional value of products available through their community food pantries, events, and food distribution initiatives. Additionally, they plan to foster partnerships with local gardeners and farmers to secure locally procured fruits and vegetables for these sites and occasions. Message reinforcement will be implemented with use of EatFresh.org at both SNAP-Ed and CalFresh Outreach program sites and events. Additional opportunities for PSE strategies may be identified over the multi-year period that CCSO will work to adopt and implement in collaboration with county partners.

Catholic Charities of San Bernardino and Riverside Counties (CCSB/RIV):

CCSB/RIV will deliver SNAP-Ed services in San Bernardino and Riverside Counties, integrating brief Indirect Education nutrition activities and one-hour Direct Education interventions in English and Spanish into existing programs for low-income populations, with a focus on Latino families. CCSB/RIV utilizes evidence-based curriculum to promote increased consumption of fruits and vegetables, reduced consumption of sugar-sweetened beverages, increased water consumption, increased physical activity, chronic disease prevention, and food resource management. Approved curricula include: Eat Healthy, Be Active Community Workshops, Eat Well – Move more – Feel Great, and Healthy Eating Made Easier. CCSB/RIV makes water readily available to all staff and clients in each local office in combination with SNAP-Ed messaging on healthy drink choices. This CCC-LIA also maintains a vibrant community garden for individuals and families to engage in the cultivation, harvest, and consumption of healthy vegetables and plans to establish more gardening sites and activities over the three year period. At organization-wide events, staff members are challenged to provide healthy food options and include physical activity components throughout the day. Posters about MyPlate greet clients in each office location, and SNAP-Ed staff members refer all interested clients to Family & Community Services staff who are trained to provide CalFresh application assistance. The CCSB/RIV food pantry has adopted a written policy to improve the health and quality of the foods being distributed. The agency plans to continue improving and expanding their implementation of purchased and donated food policy to ensure healthy foods are distributed to emergency food recipients. Additionally, CCSB/RIV has established and promoted various physical activity opportunities in the multiple communities they serve such as walking groups, Zumba, and other volunteer led classes.

CCSB/RIV has been successful in expanding services to immigrant populations through its Refugee and Immigration Services program. Immigrant populations are particularly vulnerable to poor nutrition and food insecurity and often have difficulty accessing and navigating resources available to them due to language and cultural barriers. CCSB/RIV also plans to continue to

expand services to individuals and families living in isolated and remote desert areas—namely the high and low desert areas of San Bernardino and Riverside Counties.

Catholic Charities Diocese of San Diego (CCDSD):

CCDSD will deliver SNAP-Ed services in San Diego and Imperial Counties. The agency will implement Indirect Education interventions as well as conduct Direct Education interventions through one-on-one single exposure education sessions and series-based interventions at underserved sites including homeless shelters, emergency food distribution sites, low-income senior housing facilities, refugee service centers, and other community sites serving primarily homeless, senior, and food insecure populations. Curricula include Eat Smart - Live Strong for Older Adults, Cooking Matters, Food Smarts, Eat Healthy – Be Active, and ReThink Your Drink.

CCDSD's SNAP-Ed program is designed to bring nutritional awareness to participants by creating a dialogue about their current eating habits and steps they can take toward healthier living. One-on-one encounters and group exposures focus on healthy eating and give practical examples of how to incorporate better eating habits into clients' daily lives. One-on-one encounters allow individuals to talk about their specific habits and ways to improve in the areas where they struggle. Group exposures are beneficial as different participants bring diverse experiences, ideas, and "lessons learned" to the conversation. CCDSD's program integrates physical activity into group exposures. Examples include but are not limited to low impact stretched for seniors, mini Zumba lessons, yoga instruction, and Instant Recess activities.

Repetition of messaging helps participants retain the knowledge they have gained and CCDSD works to avoid overloading the participants with information by focusing messages on a handful of key points so that they can set realistic and measureable goals. CCDSD's program includes bringing healthy donated food items to SNAP-Ed presentations so that participants not only learn about healthy eating, but are then able to access the food that was recommended in the presentation. This sensory reinforcement is important to long-term behavioral change.

CCDSD also plans to implement gardening and farm-to-fork local procurement initiatives to continue to increase access to healthy choices for their communities. Healthy food and beverage standards will be put in place at emergency food distribution centers, shelters, and other sites where food is prepared or served. Additionally, wellness policies that promote healthy choices and physical activity will be implemented at senior housing sites. Lastly, the agency will work with local county and city partners to address barriers and implement strategies to promote active transport in their communities. These PSE strategies will continue to progress from identification of opportunity to adoption and implementation over the course of the multi-year plan.

Catholic Charities of Santa Clara County (CCSC):

CCSC will deliver SNAP-Ed services in Santa Clara County. Indirect Education interventions include the distribution of evidence-based materials as well as brief 10- to 15-minute presentations about nutrition and/or physical activity topics. CCSC will also implement series-based Direct Education classes at schools and after school programs as well as at the local Community Center using Food Smarts, PowerPlay, and Serving Up MyPlate curricula. CCSC's SNAP-Ed program will work with existing clients through the agency's Children, Youth, and Family Development Division, which serves over 3,000 clients daily. SNAP-Ed services will add a valuable wellness component to services received by families as they work toward self-sufficiency. SNAP-Ed services will promote and sustain healthy eating and exercise habits. Long-term interaction with the community will provide an opportunity for staff to reinforce what the participants have learned. In addition, CCSC will be involved in community gardening and active transport initiatives. The agency also plans to implement a train-the-trainer program with key community members to broaden their reach and the impact of SNAP-Ed program efforts. Healthy food and beverage standards for other agency programs and school wellness policies will be implemented at their school and community sites. CCSC also plans to establish physical activity opportunities and promote community participation in Zumba classes and other volunteer led instruction. All messaging will be reinforced with use of EatFresh.org. These as well as other opportunities for PSE strategies may be identified and adopted over the multi-year period that CCSC will work to implement in collaboration with county partners.

Catholic Charities of Santa Rosa (CCSR):

CCSR will deliver SNAP-Ed services in Napa, Sonoma, and Lake Counties, offering brief Indirect Education interventions and single session and series-based Direct Education interventions using Food Smarts, Eat Smart – Live Strong, Nutrition 5 Series, and Cooking Matters at the Store curricula. Services will primarily target low-income White and Latino participants. CCSR will integrate SNAP-Ed activities into all program areas which include emergency food distribution, community resource advising, life skills education, emergency shelter and housing programs, senior services, and immigration services. For example, in CCSR's residential shelter life skills programs, CCSR will incorporate nutrition education modules which tie in with existing course concepts related to shopping on a budget and developing healthy coping mechanisms. CCSR will also continue to build upon its established Health Ministry to identify opportunities, develop, and implement healthy policies in their agency and community. Additionally, the agency plans to implement healthy food and beverage standards at parishes, food pantries and shelters, procure local produce through farm-to-fork initiatives to supply their food distribution programs, and establish a large community garden accessible to SNAP-Ed participants near their large social service center. These PSE strategies, as well as others that may be identified over the three year period, will continue to progress from adoption to implementation over the course of the multi-year plan.

Catholic Charities Diocese of Stockton (CCDST):

CCDST will deliver SNAP-Ed services in San Joaquin and Stanislaus Counties as part of its Nutrition Assistance Services, which include a food pantry and CalFresh Outreach and application assistance. SNAP-Ed programming in these counties will primarily serve low-income Latino, Caucasian and African-American women and families. CCDST will implement Indirect Education interventions at major health and education fairs, churches, food distribution sites, schools, parks and community event sites. The agency will also implement series-based Direct Education focusing on healthy nutrition, healthy beverages, and physical activity using the following curricula: Eat Healthy – Be Active, Champions for Change Toolkit for Community Educators, Food Smarts, with a focus on Cooking Matters. This builds on previous series and provides nutrition education plus hands-on cooking experience. Previous participants are encouraged to assist with recruitment and demonstrations. This peer-to-peer activity helps to ensure long-term changes after SNAP Ed services.

CCDST SNAP-Ed staff members work closely with the agency's Health Access program, other local food banks, and churches to reach people in areas with high negative health indicators. This holistic approach recognizes the need for nutrition education as one part of a comprehensive campaign to promote long-term positive changes in behavior related to nutrition and exercise. Over the multi-year period, CCDST will progress on other community based approaches including local gardening initiatives and partnerships to promote active transport. CCDST also plans to implement healthy food and beverage standards at local food banks/pantries as well as parish and community events. The agency will also coordinate community volunteers to establish regular physical activity opportunities for community members, including Zumba instruction, walking activities, and other physical activity classes/events. Additional opportunities for PSE strategies may be identified over the multi-year period that CCDST will work to adopt and implement in collaboration with county partners.

Catholic Charities of San Francisco, Marin, and San Mateo (CCSF):

CCSF will deliver SNAP-Ed services in San Francisco, Marin, and San Mateo Counties. CCSF's SNAP-Ed program brings nutrition education and physical activity opportunities to low-income students of parochial schools. Direct Education interventions using the Cooking Matters, Food Smarts, and Learn – Grow – Eat & Grow curricula, are delivered to students through classes focused on physical activity, healthy eating and food preparation and reinforced with take-home Indirect Education materials on nutrition topics, recipes, shopping behaviors and physical activity to encourage healthy lifestyle choices to be communicated from children to parents for positive behavior change among families. Through hands-on cooking and tasting experiences, students learn healthier eating habits and acquire practical skills to sustain lasting behavior change. CCSF's chef teaches the reasoning behind the healthy ingredients she uses. The chef distributes recipes and encourages students to cook with their families. CCSF's PE instructors create an environment to encourage students to enjoy physical activity regardless of athletic ability. Combining positive physical activity experiences with cooking lessons teaches students the importance of making healthy choices. Additionally, CCSF will work on community

gardening initiatives and school wellness policies. Support for policy implementation will occur within schools as well as for after school and summer programs to increase the nutritional value of snacks and beverages provided to children. CCSF also actively partners with safe routes to schools initiatives as well as infrastructure to connect kids to schools and afterschool programs that offer nutrition education and physical activity opportunities. Messages will be reinforced with children as well as with parents at home through promotion of EatFresh.org. These PSE strategies will progressively be adopted and implemented throughout the multi-year period with additional community strategies supported among county partners.

Catholic Charities of Orange County (CCOC):

CCOC will deliver SNAP-Ed services in Orange County through brief Indirect Education Nutrition interventions as well as one-on-one and group Direct Education sessions, using the Healthy Eating Made Easier, Eat Well – Move More – Feel Great, Food Smarts, and Eat Right When Money's Tight curricula, in English and Spanish, targeting primarily Latino participants. CCOC's SNAP-Ed sites are frequented by numerous participants. The methods are culturally sensitive and linguistically appropriate to increase knowledge and skills pertaining to healthy changes. Lessons focus on encouraging consumption of healthy foods, particularly fruits and vegetables, increasing consumption of water and decreasing consumption of sugar-sweetened beverages, increased food resource management, as well as promoting physical activity. Some Direct Education lessons occur in coordination and collaboration with CCOC's CalFresh Outreach and Application Assistance program, ensuring that all clients signing up to receive CalFresh benefits also receive nutrition education on healthy dietary choices, physical activity, and food resource management. Greater PSE reach is planned through training initiatives at local parishes and the development of nutrition education ministries that will implement food and beverage standards to improve the nutritional value of the foods and beverages offered at their locations. Support for policy implementation will continue to improve the quality of purchased and donated foods that enter local food pantries. CCOC also plans to partner with volunteers and other local groups to establish physical activity classes and groups available to low-income communities. Messages will be reinforced through a Google Voice project, piloted in FY17, and by use of EatFresh.org and promotion of their mini-courses. These PSE strategies, as well as others that may be identified over the three year period, will continue to progress from adoption to implementation over the course of the multi-year plan.

Catholic Charities Diocese of Monterey (CCDOM):

CCDOM will deliver SNAP-Ed services in Monterey and Santa Cruz Counties, targeting their programming to Latino women, youth, and families. This agency implements series-based Direct Education interventions at schools for youth and parents utilizing evidence-based curricula including Food Smarts, Cooking Matters, ReThink your Drink, and Building a Healthy Me. Direct Education at schools, after school programs, parishes and Catholic Charities offices also include physical activity workshops and Zumba lessons. These interventions are reinforced with Indirect Education interventions at schools, parishes and other low-income community settings.

CCDOM's SNAP-Ed program is a family strengthening Nutrition Education Program designed to raise awareness about the principle of *choosing* a healthy lifestyle. Workshops have been carefully designed to combine culturally-appropriate and interactive nutrition lessons with reinforcing physical activities. During these lessons, both adults and children learn about new recipes including healthier and affordable versions of traditional Mexican/Central American dishes. Furthermore, during store tours, adults practice skills learned throughout lessons, such as label reading, and learning how to stretch their budgets while making healthy choices. Adults also practice using CalFresh benefits at the store. During CCDOM's Zumba demonstrations, both children and parents spend family time together learning fun physical activities. Additionally, CCDOM plans to implement community gardening initiatives and healthy food and beverages standards at community sites and parishes to increase access to healthier foods for community members. CCDOM is also actively involved in the Pajaro Valley School District Healthy Start Collaborative to develop and implement school wellness policies through the district. Information about CCDOM's SNAP-Ed program as well as additional messaging can be found through agency wide online resources and social media outlets such as Facebook, as well as with the use of EatFresh.org. Additional opportunities for PSE strategies may be identified over the multi-year period that CCDOM will work to adopt and implement in collaboration with county partners.

Catholic Charities Diocese of Fresno (CCDOF)

CCDOF will deliver SNAP-Ed services in Fresno County primarily through their main office location that currently provides community empowerment programs, emergency food distribution, payee services, senior companion programming, and free courses through the CCDOF career and education center. CCDOF serves over 50,000 families, and 130,000 clients annually, and distributes over 2 million pounds of food. The agency serves primarily Caucasion and Latino adults, older adults, and families. SNAP-Ed Direct and Indirect education activities will be delivered using Food Smarts, Eat Smart – Live Strong, Healthy Eating + Active Living, Eat Well – Move More- Feel Great, and Nutrition 5 Series curricula in Spanish and English. These activities will support policy, systems, and environmental strategies that will include purchased and donated food policy at CCDOF's large on-site pantry, a free community market to increase access of fresh fruits and vegetables to low-income community members, increased access to physical activity opportunities, as well as parish wellness policies. SNAP-Ed services will be coordinated and integrated into existing programs to support clients eat healthy and be active while working toward self-sufficiency.

Northern Valley Catholic Social Service (NVCSS):

NVCSS will deliver SNAP-Ed services in Butte, Glenn, Tehama, Shasta, Siskiyou and Tehama Counties. NVCSS will implement Indirect and Direct Education using the Food Smarts, Cooking Matters, Healthy Eating + Active Living, Eat Well – Move More – Feel Great, Champions for Change Toolbox for Community Educators, ReThink your Drink, and Eat Smart – Live Strong curricula in six rural Northern California counties serving low-income rural Caucasian and Latino populations. Services will include presentations, material distribution, classes, tabling at

fairs and events, and hosting SNAP-Ed events. Intervention topics will include practical skills such as grocery shopping, food safety, meal planning, and opportunities to increase physical activity. NVCSS staff members strive to build lasting relationships with clients to support them toward positive lifestyle changes with the goal of self-sufficiency. These ongoing relationships will foster lasting behavior change.

SNAP-Ed programming in these counties will be focused on comprehensive, multi-level approaches targeting low-income families in the area. Nutrition education workshops will be reinforced with community physical activity resources and tools, such as the SuperTracker program and social media outlets to encourage goal setting and commitment to well-being among low-income populations. Educational activities will also address food access, food budget constraints, and food preparation. Environmental supports will include increased access to physical activity opportunities and safe routes for active transport, as well as through volunteer led Zumba instruction and walking groups. NVCSS will collaborate with local partners to support wellness policies and healthy food and beverage standards, as well as to establish farm-to-fork initiatives for healthier local procurement practices and gardening projects to increase healthy food access for community members throughout the counties and at SNAP-Ed eligible sites. To increase reach, NVCSS plans to implement train-the-trainer initiatives with key community members at parishes and other community sites to provide education and to educate on the importance of improving the nutritional value of foods and beverages offered throughout the community. PSE approaches as well as social media efforts will be made individually and in collaboration with other county LIAs to extend reach and impact. NVCSS has developed an interactive online map identifying all healthy food outlets, emergency food distribution sites, SNAP-Ed service sites and activities, and other related health centers. It has become a recognized tool which has been shared among county partners as well as other LIAs during the FFY16 SNAP-Ed LIA Forum and other venues. This map as well as other PSE strategies will continue to be expanded and improved in collaboration with county partners.

e. Project Description for Marketing Strategies

Where appropriate, CCC-LIAs will assess and develop websites and popular social media channels for reaching potential nutrition education participants and to engage existing nutrition education participants in additional learning activities. Some CCC-LIAs will implement social marketing programs focused on consumer education (e.g. Cooking Matters at the Store) and/or wide-reaching message reinforcement (e.g. EatFresh.org). When possible, CCC-LIAs will work individually and in collaboration with other county partners to implement healthy marketing techniques, such as product placement, in SNAP-Ed service sites including food pantries and corner stores.

f. Evidence Base

For Direct Education Nutrition Education classes and Indirect Education events, CCC-LIAs use evidence-based curricula and approved supplemental materials respectively. All evidence-based curricula used by CCC-LIAs have been selected from the SNAP-Ed Integrated Curricula List as the most appropriate for their target audience and in alignment with program objectives.

g. Policy, Systems, and Environmental Changes

CCC-LIAs will implement environmental supports in the communities they serve, both individually and in collaboration with other LIAs. CCC and CCC-LIAs embrace the potential of environmental supports to broaden and enhance the impact of SNAP-Ed. According to the USDA[3], "[environmental and policy] strategies will have a much broader population impact, be less costly, more sustainable, and less prone to stigmatize obese individuals than programs focused on individual behavior change."

All CCC-LIAs will be actively involved in the implementation of policy, systems and/or environmental supports to increase consumption of healthy foods and beverages, decrease consumption of unhealthy foods and beverages, improve environments and appeal for physical activity, and to increase food security. These strategies, in conjunction with nutrition education interventions, have a greater impact than education alone. Every CCC-LIA will participate in collaboration for larger community change in their counties as part of a broader PSE approach as outlined in each county's Integrated Work Plan. CCC assists local agencies in identifying and reviewing PSE strategies, provides technical assistance for steps toward adoption and implementation, and provides a framework for tracking short term, medium term, and long term objectives through established scopes of work. CCC also provides assistance in evaluating PSE strategies using the RE-AIM framework. CCC-LIAs realize and embrace the unique opportunity to be the voice of nutritionally-vulnerable populations of communities in which they work. These underserved communities are those for which larger systemic, political and environmental change will be most impactful.

Examples of additional PSE strategies that CCC-LIAs plan to implement, in conjunction with other LIAs, in FFY 2017-19 are outlined below.

- Systems Approach:

All CCC-LIAs will practice a systems approach to connect a larger proportion of the SNAP-Ed eligible population to SNAP-Ed services. Clients who come to CCC-LIAs seeking assistance to meet a variety of needs (food, clothing, housing assistance, etc.) will be connected to SNAP-Ed programming. CCC-LIAs utilize a comprehensive care approach to provide low-income

[3] *SNAP-Ed Strategies and Interventions: An Obesity Prevention Toolkit for States*. As referenced here on May 16, 2016*:* *https://snaped.fns.usda.gov/sites/default/files/uploads/SNAP-EdToolkit2016UpdateFeb2.pdf*

individuals with the best opportunities for long-term self-sufficiency and active engagement in their health, well-being, and quality of life.

- Environmental Supports:

CCC-LIAs will work to adopt environmental strategies to strengthen access and/or appeal for healthy eating and/or physical activity.

**Note: Some examples of environmental strategies listed below have future potential for translation into systemic change and/or written policy over the multi-year period.*

- Examples of environmental supports include:

  - Community gardens;
  - Identification and dissemination of information about safe routes for active transport;
  - Space, opportunity, and/or instruction for physical activity (e.g. Zumba classes);
  - Product placement in food pantries using the Feeding America Client Choice model;
  - Encouragement of healthier food procurement at parishes, local events, etc.
  - Partnerships with physical activity programs for youth, as well as Parks and Recreation organizations to connect youth with opportunities for physical activity;
  - Ready availability of drinking water with message reinforcement encouraging healthy drink choices (e.g., agency offices and client resource centers).

- Policy:

CCC-LIAs will continue to support policy implementation at local food pantries and food distribution sites to improve access to healthy food for those in need of emergency food assistance, as well as with other community sites and programs where CCC-LIAs are active in providing SNAP-Ed services.

- Examples of policy at food emergency food distribution sites include:

  - Donated food policies limiting the acceptance of products that do not meet outlined nutrition standards (e.g. foods/beverages high in sugar, sodium, saturated fat);
  - Purchased food policies limiting the purchase of products for distribution at emergency food distribution sites that do not meet outlined nutrition standards (e.g. foods/beverages high in sugar, sodium, saturated fat);
  - Training for food pantry staff and volunteers around food safety and storage, nutrition labels, sodium, sugar, fats, and other knowledge and skill building topics to improve staff capacity to select and distribute healthier options.

- Examples of policy at faith-based and community sites include:

- Wellness policies and healthy food and beverages standards at parishes, in conjunction with training and technical assistance provided to kitchen ministry, staff, and volunteers responsible for distribution of foods and/or beverages during events, festivals, feasts, vending opportunities, etc.;
- Healthy food and beverage standards for youth, after-school, and summer programs to increase nutritional value of snacks and meals served to children;
- Agency-wide interdepartmental health and wellness policies, and food and beverages standards, including assessment of agency food procurement systems, to increase the nutritional value of foods and beverages that affect a variety of programs including senior centers and respite programs, shelters and transitional housing, immigrant nd refugee services, youth and family programs, charitibale distribution events (eg. during holidays), etc.

h. Use of Existing Educational Materials

See SNAP-Ed Integrated Curricula List.

i. Development of New Educational Materials

Catholic Charities will not develop any new Educational Materials with SNAP-Ed funds.

j. Key Performance Measures/Indicators

Catholic Charities of California aligns its evaluation and performance indicators with the 2016 SNAP-Ed Evaluation Framework Interpretive Guide[4]. All 12 CCC-LIAs will conduct activities with a primary focus on the individual level (MT1, MT2, and MT3) of the seven priority indicators outlined by the Food and Nutrition Service (FNS) of the USDA. The six priority indicators that CCC-LIAs will address are listed below.

Individual Level:

MT1: *Healthy Eating*: Measuring improvements in dietary behaviors such as eating protein foods without saturated fats, drinking fewer sugar-sweetened beverages, and eating more fruits and vegetables.

MT2: *Food Resource Management*: Pre- and post-test changes in individual and family behaviors that reflect smarter shopping and food resource management strategies including reading nutrition facts, buying foods with lower added solid fats (saturated and/or trans), sugar, and salt, and stretching food dollars by comparing prices before buying foods, shopping with a list, and batch cooking.

[4] The Supplemental Nutrition Assistance Program Education (SNAP-Ed) Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Indicators - Interpretive Guide to the SNAP-Ed Evaluation Framework

MT3: *Physical Activity and Reduced Sedentary Behavior Change*: Measuring increases in duration, intensity, and frequency of physical activity behaviors and/or reductions in time spent in sedentary behaviors including increasing leisure sports and walking activities, and decreasing time spent watching television and playing video games.

MT4: *Food Safety*: Measure changes in participants who increased one or more of the targeted food safety outcome behaviors such as washing hands and surfaces often, cooking to proper temperatures, and refrigerating promptly.

Environmental Level:

Across all 12 CCC-LIAs, three of the four priority environmental level indicators are being addressed by at least one agency. CCC-LIAs address these indicators either through their individual agency or through collaboration and partnership activities. These include the identification of opportunities for improving access and/or appeal for healthy nutrition and physical activity as well as the development and adoption of strategies to improve healthy nutrition and physical activity practices and standards.

ST5: *Need and Readiness*: The number and percentage of sites with an identified need for improving access or creating appeal for nutrition and physical activity supports, and the number of organizations or sites that have documented readiness for changes in policy, systems, or environments.

ST6: *Champions*: The number, proportion, or percent of SNAP-Ed sites that have benefited from the activities of one or more champions and a description of those activities and accomplishments.

ST7: *Partnerships*: The number of organizational partnerships, councils, or collaboratives in qualified SNAP-Ed settings that organize themselves around a common agenda, mission, or strategic plan to adopt nutrition or physical activity practices, supports and/or standards and a description of those activities and accomplishments.

MT5: *Adoption of Nutrition Supports*: The number of organizational sites or systems where at least one change is made in policy or practice to expand access or improve appeal for healthy food and beverages.

Reach: The number of SNAP-Ed eligibles who encounter the improved environment on a regular basis and are assumed to be influenced by it.

MT6: *Adoption of Physical Activity and Reduced Sedentary Behavior Supports*: The number of organizational sites or systems where at least one change is made in policy or practice to expand access or improve appeal for physical activity.

Reach: The number of SNAP-Ed eligibles who encounter the improved environment on a regular basis and are assumed to be influenced by it.

3. Evaluation Plans

a. Name/Overview

Catholic Charities of California will implement an evaluation plan aligned with the *2016 SNAP-Ed Evaluation Framework Interpretive Guide*, and designed according to: 1) the *Framework's* Socio-Ecological Model (individual, environmental, sectors of influence population results, and social/cultural norms and values); 2) the *Framework's* evaluation logic models (short, medium, long-term, and population results outcomes); and, 3) the RE-AIM indicators (reach, effectiveness, adoption, implementation, and maintenance).

All CCC-LIAs will participate in process evaluation, collecting data on event tracking and participant demographics per their Scope of Work activities and for the required Education and Administrative Reporting System (EARS) data for submission to FNS-USDA. In addition, most CCC-LIAs will participate in an Outcome Evaluation, per USDA guidelines, to evaluate individual and environmental level change results of direct education and PSE strategies. Of those, some will participate in Impact Evaluation, with comparison groups, which will determine the extent to which CCC-LIA SNAP-Ed services influence participant behavior changes.

b. Type

Process Evaluation:

CCC-LIAs will document direct, indirect, and PSE activities through use of the PEARS system to collect required EARS data for submission to the Food and Nutrition Service of the USDA (FNS-USDA). Additional evaluation by CCC's contract evaluators will include: key informant interviews with collaborative partners and key policy decision makers; review of relevant data; research on related policy-adoption best practices; and to further record and monitor environmental change and policy adoption activities.

CCC will continue to generate monthly progress reports for all CCC-LIAs, keeping them apprised of their progress toward meeting contract targets for Indirect and Direct Education Activities.

Outcome Evaluation:

In FFY 2017-19, CCC-LIAs will participate in an Outcome Evaluation, per USDA guidelines. The evaluation will use both quasi-experimental and non-experimental mixed-methods evaluation designs to measure individual and environmental level change. Matched pre- and post-tests will be gathered from program participants throughout the year using validated instruments derived from the most recent version of the *Compendium of Surveys for Nutrition Education and Obesity Prevention* compiled by the California Department of Public Health's Nutrition Education and Obesity Prevention (NEOP) Research and Evaluation Section[5], as well as curriculum-specific evaluation tools, and other appropriate tools for measurement as established by state level implementing agencies. Qualitative data will be collected at the individual and environmental levels through key informant interviews and focus groups with selected participants.

Impact Evaluation:

In FFY 2017-19, some CCC-LIAs will participate in an Impact Evaluation. CCC's contract evaluator will assist projects with designing impact evaluations, with an appropriate comparison group, to measure the extent to which CCC-LIA SNAP-Ed services have influenced the nutrition and physical activity behavior changes of participants.

c. Questions

Outcome and Impact evaluations will use both quasi-experimental and non-experimental mixed-methods evaluation designs to measure individual and environmental level change. Matched pre- and post-tests will be gathered from program participants throughout the year using validated instruments derived from the most recent version of the *Compendium of Surveys for Nutrition Education and Obesity Prevention* compiled by the California Department of Public Health's NEOP Research and Evaluation Section[6] including the Rapid Assessment of Physical Activity (RAPA), the International Physical Activity Questionnaire (IPAQ), the Food Behavior Checklist (FBC) and the Fruit and Vegetable Checklist (FVC), as well as curriculum-specific evaluation tools (e.g. Cooking Matters), and other appropriate tools for measurement as established by state level implementing agencies (e.g. UC CalFresh Intent to Change Survey). Qualitative data will be collected at the Individual and Environmental Levels through key informant interviews and focus groups with selected participants. Results from these evaluations will be used to inform the Annual Report on SNAP-Ed programming implemented through CCC, as well as be shared among CCC-LIAs with recommendation for future improvements to programming.

[5] *2015 Compendium of Surveys for Nutrition Education and Obesity Prevention* available at: http://www.cdph.ca.gov/programs/cpns/Pages/ImpactEvaluation.aspx
[6] *2015 Compendium of Surveys for Nutrition Education and Obesity Prevention* available at: http://www.cdph.ca.gov/programs/cpns/Pages/ImpactEvaluation.aspx

The primary evaluation questions will be grounded in measuring six of the seven priority indicators outlined by the SNAP-Ed Evaluation Framework Interpretive Guide (*See Section 2J: Key Performance Measures/Indicators*). The evaluators will utilize SNAP-Ed approved evaluation instruments, such as the Food Behavior Checklist, in addition to qualitative surveys, to answer the following evaluation questions:

MT1: **Healthy Eating**

During main meals:

- Did participants eat protein foods prepared without solid fats (e.g., saturated and/or trans fats)?
- Did participants eat a serving size of protein less than the palm of a hand or a deck of cards?

Throughout the day:

- Did participants eat more than one kind of fruit?
- Did participants eat more than one kind of vegetable?
- Did participants increase consumption of plain water?
- Did participants reduce consumption of sugar-sweetened beverages (e.g., regular soda or sports drinks)?
- Did participants increase consumption low-fat or fat-free milk (including with cereal), milk products (e.g., yogurt or cheese), or fortified soymilk?
- Did participants increase consumption of nuts or nut butters?
- Did participants reduce consumption of refined grains (e.g., spaghetti, white rice)?
- Did participants reduce consumption of desserts or sweets (e.g., cookies or cake)?

MT2: Food Resource Management

- Did participants choose healthy foods for their family?
- Did participants read nutrition facts or nutrition ingredients lists?
- Did participants buy 100% whole grain products?
- Did participants buy low-fat dairy products?
- Did participants buy foods with lower added:

    - Solid fats (saturated and/or trans)?
    - Sugar?
    - Salt?

- Did participants not run out of food before month's end?
- Did participants compare prices before buying foods?
- Did participants identify foods on sale or use coupons?
- Did participants shop with a list?
- Did participants batch cook (cook once; eat many times)?

MT3: Physical Activity and Reduced Sedentary Behavior Change

Increased Physical Activity, Fitness, and Leisure Sport:

- Did participants increase physical activity and leisure sport?
- Did participants increase physical activity that made them breathe harder than normal?
- Did participants increase physical activity to make their muscles stronger (muscular strength)?
- Did participants increase physical education or gym class activities (school PE)?
- Did participants increase recess, lunchtime, classroom, before/after school physical activities (school activities—non-PE)?
- Did participants increase walking steps during period assessed (e.g., increasing daily goal by ≥ 2,000 steps)?

Reduced Sedentary Behavior:

- Did participants reduce television viewing?
- Did participants reduce playing computer and video games?
- Did participants reduce sitting on weekdays while at work, at home, while doing course work, and during leisure time?

Increased Physical Fitness:

- Did participants increase aerobic or cardio fitness, muscular strength, muscular endurance, and/or flexibility?

The evaluation questions for the following three environmental level indicators are not designed to be answered across all Evaluation Framework domains/brackets. The 11 CCC-LIAs will vary in the types and number of indicators they will address as an individual agency and with their respective partners.

MT4 Food Safety

- Did participants clean: wash hands and surfaces often?
- Did participants separate: did not cross-contaminate?
- Did participants cook food to proper temperatures?
- Did participants refrigerate food promptly?

ST5: Need and Readiness

- How many or what percentage of settings, served by CCC-LIAs, with an identified need for improving access or creating appeal for nutrition and physical activity supports, exist within the following categories of venues?
- How many or what percentage of organizations or sites have documented readiness for changes in policy, systems, or environments the following categories of venues?

    - restaurants, mobile vending/food trucks, congregate meal sites ("eat");
    - public housing, shelters, places of worship, community organizations, residential treatment centers, adult or senior services ("live");
    - child care, head start, early care and education, adult education, schools, after-schools, Cooperative Extension offices ("learn");
    - worksites with low-wage workers, job training programs, TANF worksites ("work");
    - parks and recreation, YMCA, county fairs, Boys and Girls clubs, bicycling and walking paths ("play");
    - farmers markets, grocery stores, food retailers, food pantries ("shop")

ST6: Champions

- How many champions were identified?
- How many SNAP-Ed sites have benefited from the activities of champions?
- What is the proportion or percent of SNAP-Ed sites that have benefited from the activities of one or more champions?
- What were the activities and accomplishments of the champions?

ST7: Partnerships:

- How many organizational partnerships, councils, or collaboratives exist in qualified SNAP-Ed settings that have organized themselves around a common agenda, mission, or strategic plan to adopt nutrition or physical activity practices, supports and/or standards?
- At what stage of development are the partnerships (formation stage, building stage, maintenance stage)?
- What did the partnerships accomplishments and what lessons were learned?

MT5: Nutrition Supports

<u>Adoption:</u>

- How many and what proportion of organizational sites or systems adopted at least one change in writing or practice to expand access or improve appeal for healthy eating?
- What was the total number of policy, systems, and environmental changes made?

Reach:

- How many and what proportion of the SNAP-Ed–eligible population who encountered the improved environment on a regular (typical) basis and are assumed to have been influenced by it?
- What was the total audience number of individuals who encountered the improved environment or were affected by the policy change on a regular (typical) basis and are assumed to have been influenced by it?

MT6: Physical Activity and Reduced Sedentary Behavior Supports.

Adoption:

- How many and what proportion of organizational sites or systems adopted at least one change in policy or practice to expand access or improve appeal for physical activity?
- What was the total number of policy, systems, and environmental changes made?

Reach:

- How many and what proportion of the SNAP-Ed–eligible population who encountered the improved physical activity environment on a regular (typical) basis and are assumed to have been influenced by it?
- What was the total audience number of individuals who encountered the improved physical activity environment or were affected by the policy change on a regular (typical) basis and are assumed to have been influenced by it?

d. Prior Evaluation

All CCC-LIAs participated in Process Evaluation in the prior fiscal year and will continue to do so in FFY 2017-19. The agencies that participated in Outcome Evaluations in the prior fiscal year will continue to do so for some or all of the 3-year period with the addition of some CCC-LIAs who have since adopted larger scale Direct Education interventions or PSE approaches that would benefit from increased evaluation efforts. CCC recognizes the importance of evaluation to improve the implementation and increase the impact of SNAP-Ed programming delivered by CCC-LIAs into the future.

4. Coordination Efforts

At the state level, CCC has working relationships with the California Department of Social Services (CDSS), California Department of Public Health (CDPH), California Department of Aging (CDA) and UC CalFresh. As a State Implementing Agency (SIA), CCC collaborates with these organizations through regular state level meetings, trainings, conferences and workgroups to ensure the success of statewide SNAP-Ed services. CCC provides representation at state level collaborative meetings where SIAs work on mutual goals and objectives that have been

identified through Strategic Planning for the improvement of SNAP-Ed across California. Objectives include increasing program reach, establishing a statewide training plan, increasing partnerships and collaboration, streamlining processes and leveraging resources, and establishing an integrated SNAP-Ed program evaluation plan to collect common data and communicate the impact of the program throughout the state.

CCC will collaborate with CDSS, CDPH, CDA and UC CalFresh, as well as with FNS-USDA, to provide technical assistance, training and support for LIAs to implement the integrated county level multi-year SNAP-Ed Work Plans. This collaboration will further collective impact through common local community change goals and objectives as well as comprehensive community approaches that incorporate larger policy, systems and environmental strategies into services throughout the State.

At the local level, all 12 CCC-LIAs will collaborate with each other to share best practices and lessons learned. In addition, each will participate in county level collaboration with other SNAP-Ed LIAs in the region to avoid duplication of services and to advance community change goals as outlined by the Integrated County Work Plans. CCC SNAP-Ed youth programming is delivered at Catholic Parochial schools and through Catholic Charities-administered after school programs. Duplication of services is avoided through collaboration among LIAs at the local level in identifying appropriate sites and populations based on established site lists and needs assessments.

In FFY 2017-19, CCC and all CCC-LIAs will support the work of CDSS and other SIAs to consolidate and streamline SNAP-Ed planning and implementation so that program participants derive the maximum impact from SNAP-Ed funded efforts.

FFY 2018 SNAP-Ed Funding by County and Agency

	County	Total	CDSS	CDPH	UC CalFresh	CDA	CCC
1	Alameda	$1,920,656	N/A	$1,489,161	$389,760	$41,735	$0
2	Alpine	$0	N/A	See Mono	$0	$0	$0
3	Amador	$922,561	N/A	$150,000	$772,561	$0	$0

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

Alameda County:

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	**University of California: UC CalFresh UCCE: Alameda County UC Cooperative Extension**
X	**California Department of Public Health: CDPH: Alameda County Public Health Department**
X	**California Department of Aging: CDA: (Alameda County Area Agency on Aging: AAA)**
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. **Jurisdiction Description**

GEOGRAPHIC LOCATION

Alameda County is in the heart of the San Francisco Bay Area. It is located on the East side of San Francisco Bay and extends from Berkeley and Albany in the North to Fremont in the South. Most of the county's population is concentrated in the narrow area between the East Bay Hills and the Bay. East of the East Bay Hills is the greater Livermore Amador Valley area, which is largely residential and suburban in character, but is rapidly urbanizing.

The county has a varied geography, with wooded hills, vineyards, streams, and lakes. Elevations in Alameda County range from sea level to 3,817 ft. at Rose Peak in the southern part of the County.

SERVICE AREAS

Alameda County comprises 14 incorporated cities (Alameda, Albany, Berkeley, Dublin, Emeryville, Fremont, Hayward, Livermore, Newark, Oakland, Piedmont, Pleasanton, San Leandro, and Union City) and six unincorporated census designated areas as defined by the Census Bureau (Ashland, Castro Valley, Cherryland, Fairview, San Lorenzo, and Sunol).

Alameda County is a large county, encompassing a land area of 747 square miles, including 434 unincorporated square miles. There are 360 census tracts in the county, 45 qualify for SNAP-Ed services based on the most recent "all races" American Community Survey (ACS) data. The county has 18 school districts with 394 schools, 206 (52%) of which are eligible for SNAP-Ed services.

The County is divided into four statistical planning units or service areas.

The ***North County*** planning area is between the San Francisco Bay and the Contra Costa border and is urban in character, and consists of the cities of Alameda, Albany, Berkeley, Oakland, Emeryville and Piedmont.

The ***Central County*** area is more suburban in character and is located between the East Bay hills and the San Francisco Bay, and includes the cities of San Leandro and Hayward, and the unincorporated communities, including Castro Valley, San Lorenzo, Fairview, Ashland and Cherryland.

The ***South County*** area encompasses the area between the San Francisco Bay and the East Bay hills, and consists of the cities of Fremont, Newark and Union City.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

The ***East County*** includes the cities of Dublin, Livermore, Pleasanton and adjacent unincorporated areas, including the community of Sunol. The East County area encompasses the entire area east of the East Bay hills bounded by Contra Costa, San Joaquin, Santa Clara, and Stanislaus Counties. East County is the largest part of the County in terms of land area, and while growing in population.

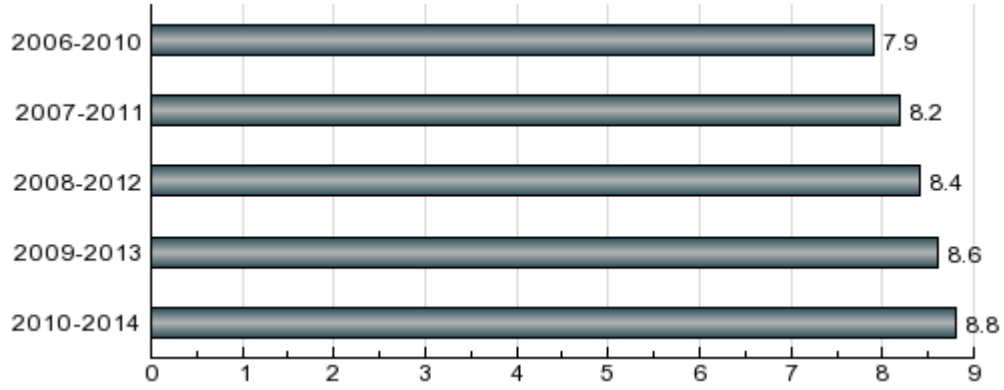
DEMOGRAPHICS

Population size:

Alameda County is the fastest growing county in California, adding over 100,000 people since 2010, a 6.7% increase over 2015 data.[1] This is partly due to the Bay Area residents migrating from priced out neighboring counties. Oakland reached a milestone in the past year, surpassing 400,000 residents for the first time in its 162-year history.

According to U.S. Census estimates, 13% of Alameda County residents continue to live below the Federal Poverty Level (FPL), representing about 209,000 residents countywide. But this only begins to tell the story of poverty in the county. The cost of living is very high in Alameda County and studies show that a family of three would need about $60,000 for minimal housing, child care, food, transportation and health care.[2] The Federal Poverty Line for a family of three is just over $20,000.[3] That tells us that *many more than 209,000 Alameda County residents live in poverty*. In the county, one in five (20.7%) children lives in poverty, according to the California Poverty Measure, one of the best measures of poverty we have at the county level and 9.7% of those living in poverty are seniors. [4] Figure 1 shows a time series of the percentage of families living below the poverty level in Alameda County since 2006.

Figure 1: Families Living Below Poverty Level: Time Series



The North County area is the most populous planning unit in the county, consisting of approximately 41% of the county population with 616,402 persons in 2010. The Central and South County areas make up approximately 46% of the county population with 365,568 and 326,178 people, respectively. In 2010, the East County area had 202,123 persons, or 13% of the county population.

UNDERSERVED AREAS

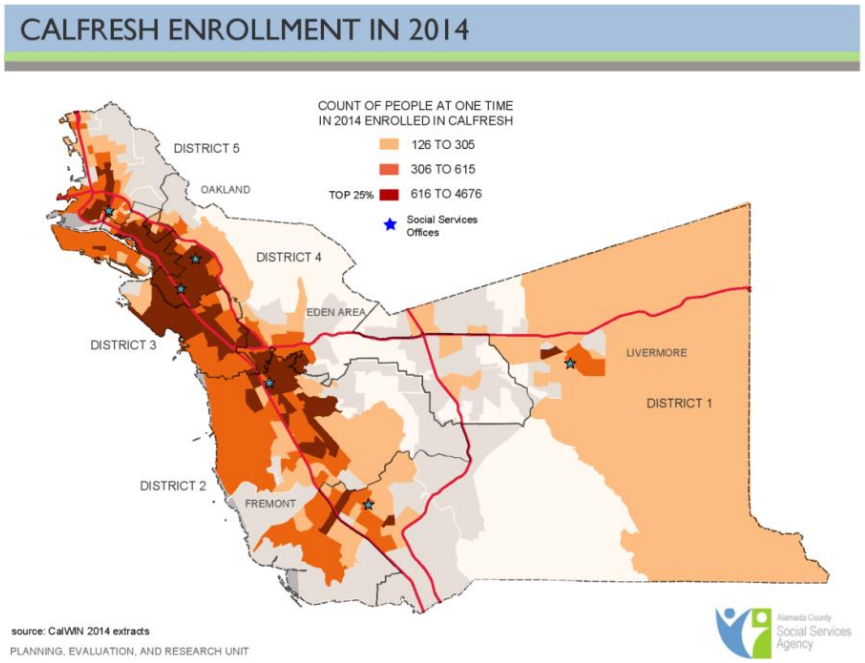
Although the economy has experienced an improvement since 2009, many Californians are still experiencing food insecurity, as defined by USDA as limited or uncertain availability of nutritionally adequate foods or uncertain ability to acquire these foods in socially acceptable ways. The University of California, Los Angeles California Health Interview Survey (CHIS) shows that statewide, over 4.1 million California adults – particularly those in households with children as well as low-income Latinos – experienced food insecurity.[5] In 2009, about one in six low-income Californians had "very low food security" which describes multiple instances in which people had to cut their food intake and experience hunger, doubled from 2001.

There are 385,851(26%) SNAP-Ed eligible residents in Alameda County.[6] Twenty-eight percent (28%) of these are children, 61% are adults, and 11% are seniors 65 years and older. Between January 2008 and January 2015, the number of individuals on CalFresh increased by 66%. In the same time period, CalFresh cases that are not on any other welfare caseload have increased by 130%. Forty-two percent (42.8%) students are eligible for the Free Lunch Program, a significantly large increase over the previous year (34.9%).[7]

As of January 2016, Alameda County had 122,034 individuals enrolled in CalFresh, with 54,713 non-assistance cases. CalFresh recipients were split roughly between adults and children. At 26% of the county population, Oakland has the highest rate of CalFresh participation of any city or place in Alameda County. SNAP participants are concentrated in Oakland especially along the I-880 corridor (Elmhurst, Central East Oakland, Fruitvale, San Antonio, downtown and West Oakland) as well as pockets of San Leandro, Hayward, and the unincorporated areas of Ashland and Cherryland. The cities of Oakland, Hayward and San Leandro account for 72% of Alameda County SNAP participants.[8] As the largest city in the County and one with continuing high unemployment and poverty rates, Oakland – specifically the neighborhoods of concentrated poverty in East Oakland and West Oakland – continues as a focus.

Below is a map (Figure 2) depicting CalFresh enrollment across the county for 2014.

Figure 2: This map shows the number of CalFresh individuals enrolled in 2014 by census tract.



Race/ethnic composition:

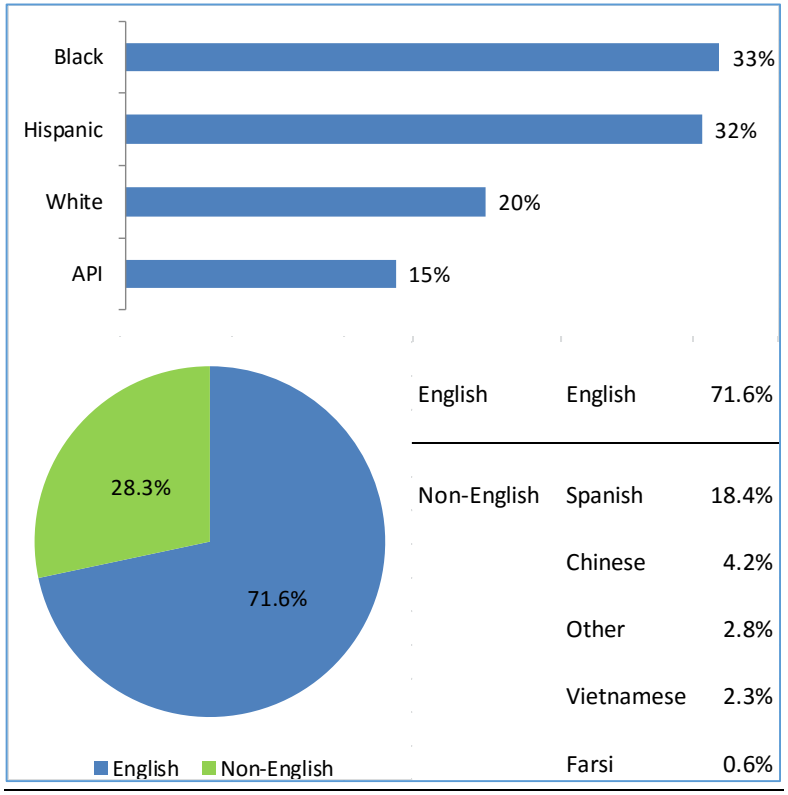
According to SNAP-Ed County Profiles Supplemental Table, SNAP-Ed eligible participants are 34% Hispanic, 21% Asian, 21% White, 20% African American and 3.5% other races/ethnicities. In Alameda County, about 1 in 3 African Americans, 1 in 4 Hispanics, and 1 in 7 Asians – compared to 1 in 10 Whites – live in high-poverty neighborhoods. The concentration of people of color in high-poverty neighborhoods that have fewer resources and opportunities for good health is a major driver of disparate health outcomes by race.[9] The gap in life expectancy between African Americans and Whites in Alameda County has been widening. In 2009, African Americans lived (on average) almost 7 years less than Whites. The geographic concentrations of race,

poverty, and poor health reflect a legacy of racial discrimination and segregation as well as present-day policies and practices that perpetuate unjust and unequal patterns.

Primary language:

Alameda County is a linguistically diverse community, where more than two of every five (43%) residents speak a language other than English at home, and nearly one in six (16%) has limited English proficiency. Among CalFresh participants 28% are non-English speaking (see figure 3, "Alameda County CalFresh Recipient Demographics), with the predominant language spoke being Spanish (18%), followed by Chinese and Vietnamese (4% and 2% respectively). In our K-12 schools, more than 53 languages are spoken by students.

Figure 3: Alameda County CalFresh Recipient Demographics



English	English	71.6%
Non-English	Spanish	18.4%
	Chinese	4.2%
	Other	2.8%
	Vietnamese	2.3%
	Farsi	0.6%

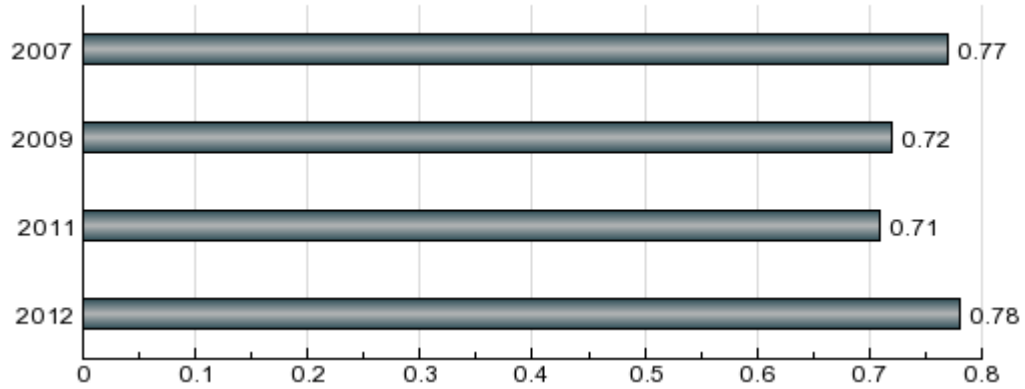
Three-Year
Integrated Work Plan
FFY 2017–2019

SUMMARY OF FOOD AND ACTIVITY ENVIRONMENTS (i.e. access)

Statewide, a study by California Center for Public Health Advocacy found 14,823 fast-food restaurants and 6,659 convenience stores. That compared with 3,853 supermarkets and 1,292 produce stands, including farmers markets. Alameda County has a relatively better food and physical activity environment compared to other counties in the state. A large number of chain and independent food markets contribute to the NEOPB data that show only 2% of the low income population has limited access to healthy food compared to the State average at 3%.[6] While availability of fresh food widely varies, access to healthy food is limited, especially to low income residents which underscores the need for greater efforts.

Alameda County did fare worse than the statewide average when it comes to proportion of unhealthy food options. In Alameda County, there are 4.61 times as many fast-food restaurants and convenience stores as supermarkets and produce vendors.[10] This ratio of retail food outlets is indicative that there is little availability of fruits, vegetables, and other healthy foods. Additionally, there are portions of West and East Oakland where residents can travel for miles without finding a grocery store. Figure 4 shows a time series of the density of fast food restaurants in Alameda County since 2007.

Figure 4: Fast Food Restaurant Density: Time Series



Alameda County is fortunate to have support from city and county leaders in working to improve the environments in which residents live. In January 2015, on the 50th Anniversary of President Johnson's War on Poverty, Alameda County Supervisor Wilma Chan launched a New War on Poverty. A multi-year initiative, ALL IN - ALAMEDA COUNTY currently focuses on Food Security, Economic Empowerment and Early Childhood Education. Now one year later ALL IN – ALAMEDA COUNTY is launching a campaign titled "ALL IN TO END HUNGER" to eliminate food insecurity in Alameda County by 2020. ALL IN TO END HUNGER 2020 represents a diverse group of organizations and individuals working in pursuit of a hunger-free Alameda County. The long-term

goal for ALL IN is to ensure that all residents have the power and means to access the food and economic resources they need to be financially self-sufficient. CNAP plans to counsel with the advisory group to develop a project within its plan of action.

This campaign is focusing on people, practices, and policy. It seeks to engage community members, develop collective power, improve food distribution and retail environments, food production, reduce food waste, maximize CalFresh, school meals, and WIC, and impact city, county, state and federal legislation. Several SNAP-Ed funded partners are participating in the "All In" initiative.

In terms of physical activity, a majority of residents are in close proximity to exercise opportunities, such as parks and recreation facilities (99.7% of Alameda County residents live close to a park or recreation facility). When considering personal safety, low income residents living in high crime areas do not feel safe to go outside for activity. In this case, though there are physical activity opportunities, they do not feel it safe to visit these facilities. Through CX3 assessments and community meetings, residents in SNAP-Ed eligible areas have expressed concerns with safety, walkability, and overall access to parks, stores, and schools. Issues of walkability and access are also important for older adults to encourage healthy aging. CX3 data has been used to focus community concerns in bringing about changes, such as park clean ups, opening a produce market, and crosswalk repaint. Additionally, Alameda County is ranked in the bottom quartile for violent crime, which impacts significantly on participation in physical activity.[11]

4. **Community Assessment**

As part of the community assessment process conducted for the development of this three year integrated work plan, the partners reviewed multiple needs assessments, and analyzed data on current SNAP-Ed participation, food environment index, obesity prevalence data (by age, race/ethnicity, poverty level and geographic distribution), and chronic disease rates (by race/ethnicity, poverty level and geographic distributions). The sources of data reviewed included the California Health Interview Survey, California Department of Education Physical Fitness Testing Data for grades 5, 7, and 9 combined, California Pediatric Nutrition Surveillance System, Alameda County Health Department's "The Health of Alameda County Cities and Places", Alameda County Health Data Profile 2014, Alameda County Social Services Agency (SSA) administrative dataset, Alameda County Plan for Older Adults for FFY 2016-2017, and SNAP-Ed County Profile for Alameda County 2015.

According to the recently released annual county health outcomes rankings, compiled by the Robert Wood Johnson Foundation and the University of South Carolina Population Health Institutes, Alameda County ranks 19th among California's 57 counties, the worst among counties within the San Francisco Bay Area.12 Rankings for neighboring counties include: San Joaquin—41st, Contra Costa–18th, San Francisco–10th , Santa Clara–3rd, San Mateo–2nd, and Marin—1st. More detail of the health and behaviors of county residents will be described in the following paragraphs.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

HEALTH

According to the 2010 Alameda County Public Health Department (ACPHD) comprehensive report titled, "The Health of Alameda County Cities and Places"[13], communities of color and low-income communities continue to fare poorest on most key health indicators tracked over time (i.e., obesity, diabetes). African Americans are more likely to report fair/poor health status compared to Whites. Low-income adults are over four times as likely to have fair/poor self-rated health as those from high-income households.

Obesity prevalence:

According to the 2014 ChangeLab Solutions report *The Health and Economic Impacts of Obesity in Alameda County* more than half (55%) of adults and 61% of SNAP-Ed adults are overweight or obese.[14] Heart disease and diabetes, diseases commonly contributed to by obesity status, were among the 10 leading causes of death in Alameda County in 2010.

Prevalence of overweight increased with income, and the reverse pattern was observed for obesity. Those between 100 and 199% of the federal poverty level (FPL) are significantly more obese than those in the income group at 300% or above FPL. Nearly 70% of adults are overweight or obese in the 100 to 199% FPL group.

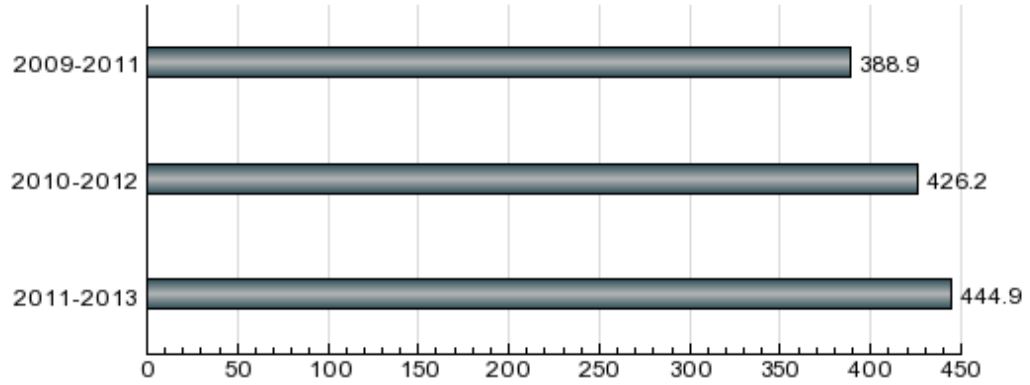
African Americans had the highest prevalence of obesity (42.4%)—over five times the rate among Asian/Pacific Islanders (API) and 2.4 times the rate among Whites. Fair/poor self-rated health is three times as common among adults 65 years or older than young adults.

Whites and Latinos were most likely to be overweight of all racial/ethnic groups. African Americans had the highest prevalence of obesity (42.4%)—over five times the rate among Asian/Pacific Islanders and 2.4 times the rate among Whites.

Alameda County infants and children are not immune to the growing national epidemic of childhood obesity. Approximately 9.7% of the 20,000 babies born in Alameda County each year will be identified as obese in their first year of life. Approaching the second year of life, that rate increases to 14.1% and by three to five years of age the rate rises still to 15.8%.[15] By middle school age, an average of 34% of Alameda County youth is projected to be overweight or obese, with rates even higher (42%) in the cities of Oakland, Hayward and San Leandro.[16] Among children, Pacific Islanders have the greatest overweight proportion (43.4%) and Asians the lowest (18.8%). One-third of male children (33.2%) and one-quarter of female children (25.2%) are overweight. The Sunol school district has the lowest percentage overweight (5.2%) and Emeryville the highest (50.3%).[14]

Obesity contributes to illnesses which often require hospitalization. Hospitalizations due to obesity-related ailments has been increasing over time (figure 4). Three times as many women are hospitalized than men. The rate of African Americans (880 per 100,000) hospitalized is twice that of American Indian/Alaskan Native (411 per 100,000) and Latino (405 per 100,000), and 3 ½ time more than Whites (248 per 100,000).

Figure 5: Obesity-Related Hospitalizations: Time Series 2015[17]



BEHAVIORS

Nutrition behaviors:

Research indicates an association between the intake of vegetables and fruit and the risk of several chronic diseases shows that a high daily intake of these foods promotes health.[18] The promotion of vegetable and fruit consumption by nutrition and health policies is a preferable strategy to decrease the burden of several chronic diseases in Western societies. According to the ACPHD's *Health of Alameda County Cities and Places* report, in the county, half of adults (50.2%) consume five servings of fruits and vegetables a day. Only one in five (20.2%) adolescents and two in five children aged 2-11 has the recommended daily servings of fruits and vegetables.[19] Low-income adults are much less likely to consume fruits and vegetables than high-income adults. For children the picture is bleaker -- 72% of children (ages 2 – 11) consume 2 or more servings per day; 63% children, including teens (ages 2 – 17) consume 2 or more servings per day.

In 2013 56% of adults consumed fast food (considered an unhealthy diet) at least one time in the last week, ranging from 47% of Whites to 68% of Latinos.[20] And worse, 67% SNAP-Ed adults consume fast food each week. Consumption of fast food is 2.5 times more common among African Americans than Whites. By far, at 71%, young adults, aged 18-24, consumed the most fast food, which is often high in fat, and consumption is associated with increased caloric intake. Dietary intake of fatty foods and/or decreased consumption of fruits and vegetables have been shown by studies to increase the risk of overweight/obesity.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

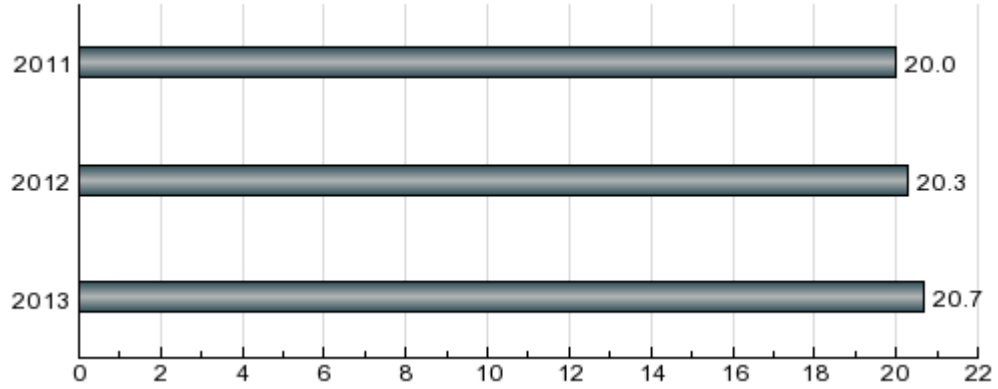
In Alameda County, 32% of adults are estimated to consume one or more sugar-sweetened beverages each week.

Food Insecurity Rates:

Food insecurity in Alameda County continues to worsen. The most vulnerable populations include children, seniors and immigrants.

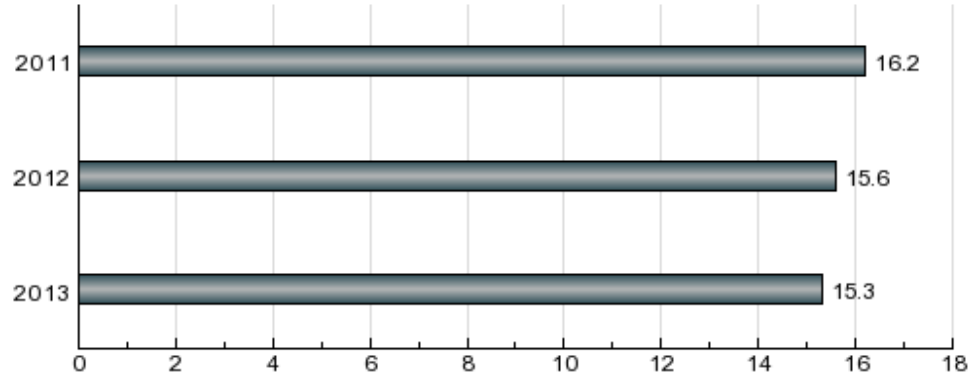
One in six (15.3%) Alameda County residents missed at least one meal this past week, and one in five seeks services at Alameda County Community Food Bank (Figure 6).[21] [22] While this number has decreased since 2011, it is most likely due to the improving economic state. The cost of living in the Bay Area remains high, and impacts the ability of families to purchase food. And an estimated 63% of these are likely income eligible for federal nutrition assistance programs (SNAP/CalFresh, WIC, free school meals, CSFP, TEFAP), as they fall within 200% poverty level.

Figure 6: Food Insecurity Rate: Time Series



For children food insecurity is a much bleaker picture (Figure 7). In Alameda County 20.7% of children are food insecure (Figure 6).[23] Children exposed to food insecurity are of particular concern given the implications scarce food resources pose to a child's health and development. Children who are food insecure are more likely to be hospitalized and may be at higher risk for developing obesity. Children who experience food insecurity may also be at higher risk for behavioral and social issues including fighting, hyperactivity, anxiety, and bullying.

Figure 7: Child Food Insecurity Rate: Time Series



Physical activity behaviors:

Adults and children alike are not reaching the recommended physical activity for health. Only four out of ten adults reported being physically active regularly. [24] Whites, reportedly, were much more likely to be physically active than African Americans (44.9% versus 29.0%); Latinos and Asian/Pacific Islanders had higher rates of physical activity than African Americans (38.2% and 33.8% respectively versus 29.0%). Only 58% of children are in a Healthy Fitness Zone based on Body Composition.[25]

Among SNAP-Ed participants, 15% of adults aged 20 and over reported "no leisure-time" physical activity; 12% of children and teens (ages 2 – 17) are physically active at least one hour everyday; 39% of children (ages 2 -- 11) are physically active at least one hour every day.[14]

HOW DATA HAS DRIVEN FFY 2017–2019 IWP

Alameda County has a long history of implementing SNAP-Ed programs as well as many foundation and privately funded community-based interventions focused on food systems, urban gardening, youth development, and other related obesity prevention efforts. Two years ago the partners conducted an asset mapping activity of all SNAP-Ed and Non-SNAP-Ed healthy eating and active living efforts. These assets were organized by intervention type to align the IOM Ecological Framework for Obesity Prevention. These interventions were further catalogued by the target audience and regions of greatest need in the county, using Alameda County SSA and Alameda County Community Food Bank (ACCFB) information. This helped us identify service area gaps, leverage points, and where SNAP-Ed services were a priority. This year we built on those efforts by updating our asset map of all SNAP-Ed healthy eating and active living efforts, and will use this, along with data noted in the Jurisdiction Section, to identify two target areas to provide an intentional, multi-

level place-based intervention that will a) reach the same audience in multiple settings (retail, faith site, early childhood sites, schools, parks, etc.) and b) target the same behavioral outcome(s).

Partners have developed a comprehensive plan that reaches all of Alameda County's diverse population and across the age spectrum, by carrying out interventions from early child care sites to senior sites. Because more than a quarter of children (28%) are SNAP-Ed eligible in the county, the partners decided to continue with interventions that are provided in early childhood, elementary, middle, and high schools. And, given that seniors struggle to make ends meet in the Bay Area (11% are SNAP-Ed eligible) AAA and UCCE will continue to work on interventions addressing the needs of seniors. Additional services are targeted to adults, who comprise the remaining SNAP-Ed eligible population (61% of adults have incomes under 185% of poverty), according the SNAP-Ed Alameda County 2015 Profile.

Geographically, the partners recognize a need to reach the full diversity of the county, as SNAP participants live and work in all areas of the county. As the largest city in the county and one with continuing high unemployment and poverty rates, Oakland—especially the neighborhoods of concentrated poverty in East Oakland--continues as a focus.

Alameda County Public Health Department has been a leader in recognizing and documenting health disparities and the social determinants of health. In the report *Life and Death from Unnatural Causes: Health and Social Inequity in Alameda County,* published in 2008, inequities in key economic, social, physical, and service environments were identified that contribute to health inequities. A chapter dedicated to food access and liquor stores concluded that in order to plan appropriate strategies, food access must be looked at in relation to a broader set of factors, including: viable transportation options and distance; affordability of food choices; proximity to unhealthful food sources; neighborhood safety; consumer preferences (such as store appearance, food selection, and availability of ethnic-specific foods); store hours of operation; and cultural and language competence of store owners and workers. This is in alignment with our past Communities of Excellence (CX3) assessments and community forums and our county results from the CDPH Healthy Retail Campaign survey data.

We plan to utilize these assessments and leverage the retail work being carried out by the county Public Health Department's Community Health Services Division, which includes county Tobacco Control, Alcohol and Other Drugs, and Nutrition Services, as well as contracted community-based organizations. Efforts will continue to focus on creating healthier retail environments and point of service education to increase client demand.

Since many of the county partners have been implementing SNAP-Ed programs for over 10 years, we have had the opportunity to conduct both process and impact evaluations with recipients of program services and have incorporated this feedback into the program design. ACPHD staff compared results of impact evaluations from multiple strategies, and found that participants of peer education interventions gained nutrition knowledge and reported positive behavior change outcomes. Peer education also has proven to be a very effective model in youth development programs as documented by impact evaluations conducted by ACOE and we plan to continue these interventions again this year.

Given the continued funding allocation reduction, our local SNAP Ed partners are determined to focus on long term outcomes of policy, systems and environmental change, and local goals and objectives were written with this long term objective and sustainability in mind. To do this we will focus nutrition education and obesity prevention activities to create change at the community level. We will use the Nutrition Education and Obesity Prevention Portfolios as outlined in the USDA WRO's SNAP-Ed Evaluation Framework: places where people live, learn, shop, work, play & eat. This format will be used to help clarify how Alameda County's FFY17-19 Work Plan encompasses the work of sub-grant contracts, deliverables, Work Plan objectives, as well as the 5 State objectives. Our partners have selected Live, Learn-A, Learn-B, and Shop portfolios to focus our efforts, and are defined below.

LIVE: Community Gardens, Healthy Food and Beverage Standards; Faith, Healthy Food Distribution at Emergency Food Sites

LEARN: Early Childhood and School Wellness Policies

SHOP: Healthy Corner Stores

5. **Community Change Goals**

The Alameda County Nutrition Action Partnership (CNAP) which includes all three Local Implementing Agencies (LIA) developed the following overarching goal for our collective work to reduce the prevalence of obesity and the onset of related chronic diseases:

Support environments that promote optimal health for all SNAP-Ed eligible Alameda County residents, where local nutritious food and physical activity opportunities are readily available and easy to access.

The first step in reaching this goal is to identify the opportunities and organizations that are in the ready state to make internal operational changes or policies that promote healthy eating and active living. The policy, system, and environmental (PSE) change efforts identified in our plan focus on multiple strategies that touch all levels of the age continuum, starting with early childhood agencies (nutrition and physical activity policy development and implementation), and advancing through school-aged children, adults, to senior housing sites (building gardens in low income senior housing complexes).

The Community Change Goal is in alignment with other county collaborative efforts such as the Alameda County Obesity Prevention Partnership (ACOPP) and the Interagency Children's Policy Council, which have both identified obesity prevention as a critical priority.

The Alameda County Interagency Children's Policy Council (ICPC) serves as a catalyst for working together across County systems to improve outcomes related to the health, safety and success of our children. ICPC is composed of County agency and department directors, Board of Supervisor members and other County representatives. By using elements of Collective Impact and Results Based Accountability, ICPC holds itself accountable for improving

indicators that measure how well our children are doing. ICPC staff convened a diverse group of county agencies, community based organizations and funders to develop and prioritize the following strategies to reduce childhood obesity:

1) Coordination – Combining the efforts of multiple county collaborations (CNAP, ACOPP, and ICPC) into a partnership which would be the backbone organization to further developing strategies that address childhood obesity.

2) Public Awareness Campaign – To provide the facts about issues related to obesity to specific target populations in a new and more effective delivery channel.

3) Model Programs – supporting current programs that show promising potential, but lack the resources to scale. The types of programs being explored include, School Health Center Models, Training of Child Care Providers, and Family Oriented Prevention and Interventions.

4) Initiating and Advocating for Policies Effecting Childhood Obesity Rates – on the local, state, and federal levels.

While formal goals have yet to be identified, these long term strategies coordinate well with the objectives of this integrated SNAP-Ed plan.

The LIAs in Alameda County are committed to addressing the following local objectives for FFY 2017-2019 to contribute to the larger community change goals:

1. Partnerships: By September 30, 2019, expand and diversify its CNAP collaboration to include a minimum of ten (10) new, non-SNAP-Ed-funded/non-traditional partners to achieve local goals aligned with selected statewide goals.

2. Policy, Systems, and Environmental Change: By September 30, 2019, at least 50 SNAP-Ed eligible sites will make at least one policy, system, or environmental (PSE) change that will improve and/or increase access to and/or support for healthy food and/or safe environments to increase physical activity.

We will focus on the following PSE strategies:

- **Community/School Gardens**
- **Early Childhood Education Settings**
- **Healthy Food and Beverage Standards**
- **Healthy Retail Environment**
- **Healthy School Settings**
- **School Wellness**

The PSE strategies are detailed within each three-year objective, and speak to the connection to our community change goals.

3. Direct/Indirect Education: By September 30, 2019, align county partners around a specific place-based nutrition and/or physical activity campaign, implementing up to 20 multi-level, intervention strategies in two targeted neighborhoods.

4. Targeted Community Intervention: By September 30, 2019, Alameda County will reach 11,000 SNAP-Ed eligible residents through evidence based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

The three LIAs in Alameda County will work together on the four local objectives listed above – each working within its population reach and area of expertise. The Alameda County LIAs will conduct allowable activities to support the larger community change goals to reach the SNAP-Ed eligible populations. All LIAs will provide nutrition and physical activity education, as well as pursue complementary efforts to support policy, systems, and environmental changes. Information on how each local objective relates to the state objectives is below. Detail on activities in each objective are in Section A9: Intervention and Evaluation Plan Narrative Summary and Section C: Intervention Plan.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The Alameda County Nutrition Action Partnership (CNAP), established in 2006, is the key collaborative that oversees Alameda County's integrated programmatic plan designed to achieve SNAP-Ed goals and objectives. Alameda CNAP meets monthly with a formal agenda; minutes of discussions, results, and actions are recorded. Funded SNAP-Ed partners and unfunded member organizations work together to coordinate and cross-promote direct and indirect nutrition education and obesity prevention interventions throughout the county, and share policy, system, and environmental change strategies and changes, serving low income populations. The strength of these long-term strong partnerships allows CNAP to leverage non-SNAP-Ed resources to help expand program reach. CNAP reviews community assessments, analyzes data, and establishes priorities to guide our collaborative projects, and identifies which partner is best poised to lead and implement specific interventions so as to reduce competition and duplication of efforts. CNAP members agreed to promote clear and consistent messages to SNAP-Ed eligible populations in Alameda County. As a group CNAP members are able to achieve broader, more successful, and more sustainable community impact that's rooted in multi-level public health and evidence-based approaches.

In addition to CNAP there are other collaborative efforts in Alameda County that include both funded and non-funded SNAP-Ed partners. The Alameda County Obesity Prevention Partnership (ACOPP) grew out of a previous Healthy Eating Active Communities (HEAC) partnership and includes members from the health sector (Kaiser Permanente, La Clinica, Alameda Health System -- Highland Hospital, Oakland Children's Hospital, Alameda Alliance for Health), academia (UC Berkeley), YMCA, and County departments (WIC, Nutrition Services, Child Health and Disability Prevention). ACOPP's work to date has focused on networking and information sharing, as well as supporting consistent messaging.

Another collaborative effort is the obesity workgroup of the Interagency Children's Policy Council (ICPC). ICPC is composed of county agency and department directors, Board of Supervisor members and other county representatives charged with serving as a catalyst for working together across county systems to improve outcomes related to the health, safety and success of children. ICPC staff convened a diverse group of county agencies, community based organizations and funders to develop and prioritize strategies related to obesity prevention. CNAP partners were actively involved in this workgroup and will coordinate with future ICPC convenings to ensure they build upon and further SNAP-Ed goals and objectives. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as county welfare departments.

LIA and Partners' SNAP-Ed and Obesity Prevention Activities

*(Agencies in **BOLD** are LIAs and/or subcontractors for LHD for FFY2017-2019)*

Alameda County Community Food Bank (ACCFB) Every month, 116,000 unduplicated clients rely on the Food Bank -- two thirds are children and seniors. In 2014, 1 in 5 residents of Alameda County was relying on Food Bank assistance to feed themselves and their families. The nutrition education program provides nutrition education, materials, and trainings to low-income community members and/or providers of services to this population. Since 2001, the Food Bank has strategically tackled the problem of food insecurity and chronic disease prevention through an active nutrition education program. This has been done via the delivery of nutrition education workshops, food demonstrations, and educational materials. In 2014, Food Bank nutrition education staff conducted a total of 160 nutrition education activities reaching 6,222 Food Bank clients with incomes at or below 185% of the Federal Poverty Level (FPL). Through nutrition education and cooking skills training, the Food Bank ensures that healthy food items will be best utilized by low-income community members and will support their well-being and long-term health. Furthermore, the nutrition program maintains ACCFB's nutrition policy which ensures that food distributed by the food bank is as healthy as possible. The nutrition program also encourages food bank member agencies to adopt similar guidelines.

Alameda County Area Agency on Aging (ACAAA) provides several non-SNAP Ed nutrition services. Approximately 270,000 congregate and 575,000 home delivered meals are prepared annually throughout Alameda County, funded primarily with AAA Older Americans Act (OAA) Title IIIC funds and service delivery from local non-profit agencies. All meals meet 1/3 of the US Dietary Reference Intakes for older adults (60 years and older) and comply with the current Dietary Guidelines for Americans. Services target low income and minority clients. Alameda County also has a strong brown bag grocery program, managed by Mercy Retirement and Care. Over 4,500 low income seniors annually receive a twice-monthly bag of groceries, including fresh fruits and vegetables.

In addition OAA Title III D funds support health services and disease prevention, which include nutrition education from local service providers. Alameda County Measure A funds support fall prevention for older adults, which includes various evidenced-based programs that promote the role of nutrition in falls prevention. ACAAA also receives SNAP Senior Farmers Market vouchers annually. Vouchers are distributed to local senior service providers, who distribute the vouchers to their low income clients.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

Alameda County Nutrition Services (ACNS) provides nutrition and physical activity intervention programs from multiple non SNAP-Ed sources of funding including local Measure A tax funds and County General funds. Safe Routes to School – a Cal Trans funded program -- supports the development and ongoing operation of School Safety Patrols and other walk/bike education campaigns, as well as school walkability assessments and the facilitation of school community to implement necessary changes to improve school safety.

ACNS is also responsible for the convening of multiple professional collaboratives related to nutrition and food access including the County Nutrition Action Partners (CNAP) and Alameda County Obesity Prevention Partnership (ACOPP). In addition ACNS staff plays leadership roles in community collaboratives addressing food access and nutrition issues such as the Healthy Oakland People and Environment (HOPE) Collaborative, the Oakland Food Policy Council, The Oakland Unified School District Nutrition Advisory Council, and Bay Area Nutrition and Physical Activity Collaborative (BANPAC).

City Slicker Farmers organizes low-income communities to achieve equal access to fresh, healthy, organic food through Community Market Farms, Backyard Garden, and Urban Farming Education Programs.

Project EAT (Educate, Act, Thrive), Alameda County Office of Education (ACOE) implements a variety of youth focused nutrition and physical activity interventions in Central and East Alameda County from a variety of funding sources. In all eight San Leandro Unified elementary schools and four of the San Lorenzo Unified elementary schools, teachers receive professional development in order to integrate nutrition education and physical activity throughout their school day from USDOE Carol M White funding. This year Project EAT will extend their youth development peer to peer High School Educators from Hayward Unified School District and San Lorenzo Unified School District to the Oakland Unified School District. Our Youth Participatory Action Research (YPAR) program invites high school youth to think about their food system, and to research and provide solutions to Adult allies in the East Bay. Kaiser Permanente continues to fund youth work in conjunction with School and Community Gardens. Also, the Hayward Promise Neighborhood is funding a Student Advisory Board for the Tennyson High School Farm. Lastly, ACOE is working in the Ashland/Cherryland unincorporated area, creating community gardens and programming using a model where youth build, mentor and maintain the space.

The University of California Cooperative Extension (UCCE) of Alameda County celebrated its 100th year of service to California constituents in September 2014. Across California, the UCCE local offices are arms of the University linking local issues with the university's educational and extension programs and basic and applied research. UCCE's academics are stewards, problem-solvers, catalysts, collaborators and educators who work in full partnership with federal, state, county and private resources. Campus-based specialists and county-based farm, family and consumer sciences, natural resources, and youth development advisors work as teams to bring practical, unbiased, science-based information to solve problems across California involving all spheres of the socio-ecological spectrum.

The Expanded Food and Nutrition Education Program (EFNEP) in Alameda County partners with community based organizations and schools to deliver behaviorally-focused nutrition education programming to low-income youth, families and communities. EFNEP educators and trained volunteers promote wellness through a nutrition and food resource management series for parents, a seven lesson nutrition series for youth, and participation in

school and community health related events. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and become more physically active. EFNEP provides programming to 30 schools, 5 Head Start centers, 2 adult schools, and 2 community centers, and reaches approximately 3,000 youth and 400 adults with series based education.

The objectives of the UC CalFresh program are to increase the knowledge and skills of SNAP eligible participants to make healthy food choices; spend food dollars wisely; reduce food insecurity; promote safe food handling to prevent food borne illness; promote lifestyle and environmental changes to increase physical activity, and to help prevent childhood obesity and other preventable chronic diseases. Target groups are Early Childhood (EC) teacher extenders at 28 sites, EC parents at 17 sites, and adults and seniors at up to 25 community sites. Program activities include direct and indirect nutrition education for adults and seniors, extender nutrition and gardening education for preschoolers, and collaboration with partner agencies to effect policy systems and environmental change in physical activity and smarter lunchroom movements for EC center.

In addition to the UC CalFresh program, Alameda County UCCE benefits the SNAP population through its 4-H Youth Development Program that reaches about 750 youth annually and the Master Gardener Program makes over 16,000 contacts. Applied research examines educational strategies for vulnerable/at--risk audiences; environmental research addresses urban gardening issues related to soil toxicity, integrated pest management, and smart water-use strategies. Research on food security examines food production, delivery, availability and access. Assessing a secure food supply also examines safe food handling from production to the point of consumption in the home and community.

OUSD Health & Wellness and Nutrition Services

In order to implement the OUSD comprehensive Wellness Policy, several strategies, initiatives and programs are in place. The Wellness Champion program stipends school site staff (and sometimes parents) to lead site wellness councils, create site wellness plans and incorporate nutrition education, garden education, physical activity, safe routes to school, staff wellness and youth leadership programming into their school sites. In the 15-16 school year, there are 80 site wellness champions at 55 schools. The District Wellness Council is the advisory body for the Wellness Policy and the Wellness Champion program.

OUSD Nutrition Services not only oversees the school meal program, but works in partnership with OUSD Health & Wellness to develop opportunities for students and families to increase access to healthy food and nutrition education. They train after school providers to cook and provide nutrition education at their sites, salad bar parent champions to promote the salad bar, food service staff to cook in the classroom, as well as coordinate produce markets at 15 or more school sites each year.

Alameda County Social Services Agency (ACSSA) provides weekly farm stands at Social Service Agency office locations three days a week. The Social Services Agency's Farm Stands create a sustainable workforce/subsidized wage program that provides job training and employment to CalWORKS

participants, while also making locally-grown fruits and vegetables available to the County's impoverished neighborhoods. The farm stands are presented in collaboration with Dig Deep Farms & Produce, a project of the Alameda County Deputy Sheriffs' Activities League.

All In To End Hunger 2020 is a collective impact project initiated by Alameda County Board of Supervisor Wilma Chan. All In to End Hunger 2020 represents a diverse group of organizations and individuals working in pursuit of a hunger-free Alameda County. Alameda County and its cities have a strong history of promoting community health by addressing the social and environmental factors that drive disease. All In to End Hunger 2020 is attempting to utilize programmatic and policy efforts to stop the cycle of poverty that leads to hunger by looking at inefficiencies in the food supply system and addressing structural economic inequities.

Fresh Approach is a 501(c)3 non-profit organization that works to create long-term change in local food systems by connecting California communities with healthy food from California farmers and expanding knowledge about food and nutrition. Fresh Approach provides nutrition education and cooking demonstration programs to communities throughout the San Francisco Bay Area, including Alameda County, and conducts community outreach to promote the use of CalFresh at local farmers' markets and the Market Match program which provides a bonus to CalFresh customers at local farmers' markets. Fresh Approach also operates a mobile farmers' market called *Freshest Cargo* that addresses the lack of access to fresh, locally-grown produce in many food desert communities by selling farmers' market produce at wholesale rates in areas where traditional farmers' markets do not exist.

Healthy Oakland People and Environments (HOPE) is a collaborative of community-based organizations, public agencies, and Oakland residents working to support community-driven, environmental changes which will reduce health inequities within the most vulnerable communities of the Oakland flatlands. HOPE focuses on health equity efforts in the areas of Food Systems, Built Environment, and Community and Youth Engagement.

Mandela Marketplace is a non-profit organization that works in partnership with local residents, family farmers, and community-based businesses to improve health, create wealth, and build assets through cooperative food enterprises in low income communities. Programs include: Mandela Co-op, a grocery store and nutrition education center; Community farm stands; Healthy Corner Store Alliance; and Ashland Cherryland Food Policy Council and the Urban Greening Master Plan.

Oakland Food Policy Council (OFPC) is a 21-seat volunteer council that is working to establish an equitable and sustainable food system. OFPC works with diverse constituencies across different food system sectors to create a healthy and resilient local and regional food system. OFPC aims to make a healthy, local food system a top priority in our city and engages in state and national action for food policy reform. OFPC carries out research, fosters collaboration and engages in collective advocacy for four priority policy initiatives: economic security & development; food access; local and sustainable food procurement; and urban agriculture.

Peoples Grocery – working on food access and food justice leadership development.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

The Alameda County Women, Infant and Children (WIC) Supplemental Nutrition Program assists low income pregnant women and mothers who just had their babies, infants, and children 1-5 years old. WIC provides nutrition education, breastfeeding support, and food vouchers to buy healthy foods. Some of the WIC activities include nutrition classes, individual counseling, and lactation assistance. Breast pumps may be on loan or free for breastfeeding moms upon assessment. WIC also offers non-invasive hemoglobin tests for participants over 2yrs old. WIC partners with Office of Dental Health to provide dental screenings for children, with Help Me Grow to assess developmental milestones and First 5 to identify families who may need further support. In the summer, WIC provides cash value vouchers to use at the nearest farmers market to purchase fresh fruits and vegetables.

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used to implement this three-year integrated work plan will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2017-2019 USDA approved California SNAP-Ed Integrated Curricula list. Alameda County partners reviewed the approved lists and selected educational materials that are most relevant to the age and ethnic background of our target audience, the purpose of the intervention, and which best reflected the needs of the population, as well as our chosen three-year and annual objectives. All curricula and materials will be defined in more detail in Section C of this work plan, and appropriate for the target audience identified in Section B:" Target Audience Description" of this document.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

9. **Intervention and Evaluation Plan Narrative Summary**

Alameda County's implementing agencies (ACPHD, AAA, & UCCE), subcontractors, and non-SNAP funded partners will collaborate to offer comprehensive integrated healthy lifestyle, physical activity, and obesity prevention education programming over the next 3 years, covering four setting portfolios: Live, Learn-A, Learn-B, and Shop. Coupled with policy, system, and environmental change activities, the plan will serve a high percentage of the SNAP-Ed eligible population in the Alameda County catchment area. Collaborating partners will include traditional and nontraditional agencies and groups (i.e. faith-based institutions, retail outlets, and community based organizations) serving SNAP-Ed eligible residents in Alameda County.

Using the guidance of the SNAP-Ed Interventions Toolkit for States, the Alameda County implementing agencies will conduct community assessments and collaborate on identifying client needs. The findings will be used to establish healthy nutrition and wellness education, policy, systems, and environmental change strategies. These combined interventions are expected to facilitate the adoption of healthier individual, family, community, and societal attitudes and lifestyle behaviors. The results of which are expected to lead to an increased consumption of healthy foods/beverages and physical activity, and a decrease in the consumption of sugar-sweetened foods/beverages among early childhood, school aged, adults, and the elderly.

The Integrated Work Plan FFY 2017-2019, details comprehensive multi-level delivery strategies, and the intervention methods include direct and indirect nutrition education/physical activity promotion, and will support policy, systems, and environmental changes. The intervention plan offers:

- Direct nutrition, wellness, and physical activity education to address individual, family, and community needs of population groups across the life span; teachers are trained to extend direct nutrition and wellness and garden-based education to preschool children and seniors; peer educators/champions are trained to conduct direct nutrition and wellness education to youths and adults.
- Indirect education will include provider education, community events and countywide messaging to expand the reach of the nutrition, wellness, and obesity prevention program, and to increase community awareness, motivation, participation, and community action/change.
- Policy, Systems and Environmental change strategies conducted are expected to generate positive support for changes in various spheres of the socio-ecological model; help make healthy foods and beverages and physical activity opportunities easily accessible and affordable to SNAP-Ed Eligible residents; improve the health inequity of county residents; and address unmet needs for program access and sustainability in low income underserved communities.
- Multi-level, place-based nutrition and/or physical activity intervention strategies in two targeted neighborhoods will test the ability of the collaborating partners to coalesce the people, community and financial resources, and stakeholder influences to impact on the nutrition and lifestyle related problems and issues in selected underserved SNAP-Ed eligible communities.

The activities of the Local Implementing Agencies, subcontracted partners, and non-SNAP-Ed funded partners are grounded in the Recommended Dietary Guidelines for Americans, 2015, and approved science-based information and strategies to affect change in individual, family, and community behaviors. Collaborative assessments and programming strategies are designed by CNAP to ensure that SNAP-Ed interventions are spread appropriately

across eligible geo-regions, and prevent duplication of efforts. Special efforts are made to insure that populations are served, and specific activities are delivered by agencies best positioned, with staff and resources to address the language, cultural, literacy and other population and age-specific needs of children aged 0-5, school aged children, youth, adults, and seniors age 60 and older.

Direct and Indirect Interventions and Methods:

- **Nutrition education/physical activity delivered in early childhood settings:**
    - ACPHD will train and support at least 15 family advocates/parent educators annually to assist with nutrition education activities, parent participation in nutrition interventions, and promote healthy eating for children aged 0-5.
    - UCCE will train teachers on approved curricula to conduct series based nutrition and wellness and physical activity education in the classroom for children aged 0-5 at 28 qualifying early childhood sites to reach more than 2,000 children and 200 parents annually .
    - UCCE will train teachers on approved curricula to conduct garden-based education at up to 24 sites over the 3 year cycle using existing infrastructure and prior assessments, reaching over 17,000 preschool students.
- **Nutrition education/physical activity in school settings:**
    - ACPHD will train and provide technical assistance to teachers at 25 schools to conduct nutrition education in the classroom.
    - ACPHD will train and support teachers, after school coordinators and staff, food service workers, and high school youth to conduct nutrition education at a minimum of 20 schools and after school sites.
- **Nutrition education/physical activity in faith institutions:**
    - ACPHD will conduct nutrition education and physical activity classes at qualifying faith-based institutions reaching over 300 SNAP-Ed eligible participants.
- **Nutrition education/physical activity in senior settings:**
    - UCCE will conduct series-based nutrition education for more than 500 SNAP-eligible mature adults and seniors annually at community/senior centers and low-income housing sites.
    - AAA will conduct series based nutrition education classes for more than 100 seniors at 2 low income senior housing sites.
- **Nutrition education/physical activity in retail outlets:**
    - ACPHD will conduct nutrition education through monthly retail tours and cooking demos at 4 qualifying retail outlets reaching up to 400 SNAP-eligible residents.
    - UCCE will teach participants in direct education classes and workshops on how to plan, shop, and save to make economical healthy food choices at retail stores where they shop.
- **Nutrition education/physical activity in community settings:**
    - ACPHD will conduct training and support for 20 community members/peer health educators and 10 culinary arts/nutrition students to provide series-based nutrition education for 1,500 or more SNAP-eligible residents.
        - ACPHD will conduct nutrition education in one time only and series-based classes reaching 420 SNAP-Ed eligible residents.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

Policy, systems, and environmental (PSE) Support:

- **PSE in early childhood settings:**
  - ACPHD will provide technical assistance and training for educators, staff, and family advocates/parent educators at up to 18 early childhood sites over 3 years to establish and/or implement policies supporting healthy environmental changes to increase fruit and vegetable consumption and physical activity for children 0-5.
  - UCCE will pilot Smarter Lunchrooms Movement activities at 2 early childhood sites in Year one, 3 sites in Year 2, and 3 sites in Year 3 reaching over 600 students.
- **Promoting PSE in school settings:**
  - ACPHD will train, provide technical assistance, and collaborate with school district staff, school administrators, Wellness Champions, and mobile food vendors at a minimum of 30 schools to implement the School Wellness Policy on fruit and vegetable consumption and physical activity for school-aged youth.
  - ACPHD will train and provide support for youth leaders at a minimum of 3 schools (Year 1) and 2 schools (Years 2 and 3) to conduct environmental assessments and affect environmental changes to promote fruit and vegetable consumption and physical activity in SNAP-Ed eligible communities.
  - ACPHD will promote the consumption of healthy foods and beverages and/or physical activity through health fairs/events, print, mass media, social marketing, and other public relations methods to reach school-aged youth at 20 qualifying schools.
- **Promoting PSE changes in faith-based institutions:**
  - ACPHD will train and provide technical assistance to faith leadership, health ministries, and community members at 6 faith-based institutions to establish and/or implement policies supporting healthy environmental changes to increase fruit and vegetable consumption and physical activity in faith-based communities.
  - ACPHD will promote consumption of healthy foods and beverages and/or physical activity through health fairs/events, print, mass media, social marketing, and other public relations methods to reach at least 600 SNAP-eligible residents annually.
- **Promotion PSE in senior settings:**
  - AAA will train and provide technical assistance for staff and participants at 2 senior service organizations to establish and/or maintain community gardens and implement garden-based nutrition education and policies to promote/support an increase in fruit and vegetable consumption and physical activity.
  - UCCE will support the maintenance of 1 established garden and a monthly produce stand at I senior site reaching 150 residents
- **Promoting PSE in retail outlets:**
  - ACPHD will train and provide technical assistance for staff and store owners/managers for up to 6 retail outlets to establish and/or implement policies supporting healthy environmental changes to increase fruit and vegetable purchases.
  - ACPHD will partner with community organizations and County departments working in retail settings to leverage resource sharing, and community engagement to impact on environmental change.

- ACPHD will promote consumption of healthy foods and beverages and/or physical activity through events at retail sites i.e. Fruit and Veggie Fest, print, mass media, social marketing, and other public relations methods to reach at least 300 SNAP-eligible residents.

- **PSE policy development for county/city agencies.**
  - ACPHD will review and update the Alameda County Nutrition and Physical Activity Policy and Guidelines.
  - ACPHD will train and provide technical assistance to county agencies on the implementation of the Policy and Guidelines.
  - ACPHD, AAA, & UCCE will educate county and city administrators on the need to prioritize and develop potential policy solutions.
- **Promoting PSE changes in partner agencies.**
  - ACPHD will train, provide technical assistance, and peer-to-peer mentoring opportunities for up to 10 food bank partner agencies to establish and/or implement nutrition policies.
  - ACPHD will conduct a Train-the-Trainer workshop annually to increase capacity of partner agencies to promote healthy eating and physical activity.
  - ACPHD will train medical and health care professionals, and provide technical assistance on how to make PSE changes to better serve SNAP-Ed eligible populations.
  - ACPHD will train and provide technical assistance for 10 partner organizations to establish and/or implement policies supporting healthy environmental changes to promote fruit and vegetable consumption and physical activity in SNAP-eligible communities.
  - UCCE will train early childhood professionals at 6 new sites on healthy nutrition, wellness, and food safety in early childhood center environments.
- **Partnerships for change with community organizations:**
  - All implementing agencies (ACPHD, UCCE, and AAA) and other CNAP partners will collaborate to disseminate previously developed joint food safety net programs outreach materials, cross training, streamlined referral processes, and coordinate messaging, interventions, reach, and food access to increase food security.
  - All implementing agencies, CNAP partners, and other community partners such as Unity Council, Youth Uprising, Lotus Bloom, and La Clinica de la Raza, will promote consumption of healthy foods and beverages and/or physical activity through health fairs/events (such as Zumba Fest), print, media, social marketing, and other public relations methods to reach at least 1000 annually.
  - CNAP partner agencies will provide annual updates to local decision makers: school/district administrators, City Council members, and Board of Supervisors on healthy nutrition and obesity prevention needs and priorities.
- **Coordination and Collaboration:**
  - AAA, ACPHD, and UCCE will together identify, assess, and conduct baseline assessments in two specific geographic areas where low-income, ethnically diverse neighborhoods, known to have poor access to healthy foods, to target multi-level concentrated campaign.
  - AAA, ACPHD, and UCCE will develop a strategic targeted campaign, in the two specific geographic areas, providing culturally-appropriate direct and indirect education, training of champions, and assisting in the development of policies in faith-based organizations, retail outlets, schools, community centers, food pantries, and housing sites located in the target area. Strategies will be revised, based on post assessment findings. A sustainability plan of action will be created for maintenance and expansion of obesity prevention efforts.

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

Evaluation Plan Narrative Summary

Alameda County's 2017-2019 evaluation plan is strategically designed to capture the annual and cumulative SNAP-Ed programs' progress, skill development, behavior changes, and environmental changes realized by multi-level intervention strategies over the 3 year cycle. The strategy proposed is intended to evaluate outcomes or impacts achieved within the four spheres of the Socio-ecological model. The plan is detailed and organized by objective, intervention strategy, activity type, collaborating agency(s) and the evaluation tools/documentation proposed. While not fully evidenced the local implementing agency partners expect to derive an approach to evaluate selected indicators by intervention type across agencies to offer a countywide perspective and comparison to the statewide goals and smart objectives

The evaluation plan incorporates approved tools and processes selected to document progress/performance in relation to the statewide smart objectives; positive progress/knowledge gain/behavior change/intent to change derived from multiple educational approaches and strategies to achieve local goals and objectives; and to document policy development, implementation, and support achieved through environmental change interventions:

a) Pre/post-test with approved University of California Food Behavior Checklist will be used by ACPHD and UCCE to evaluate the level of behavior change achieved with direct individual/family-focused series based nutrition and wellness education/physical activity; the Cooking Attitude and Self-efficacy Survey will be used by ACPHD for adults; and UCCE's Intent to Change surveys for one time only workshops;

b) Pre/post-test with approved University of California Fruit and Vegetable Checklist will be used to evaluate outcomes associated with garden-based education with seniors at 2 sites;

c) Train-the-trainer early childhood teacher direct nutrition and wellness education, and physical activity promotion in the classroom will be evaluated with the approved UCCE retrospective Teacher Observation Tool during the third quarter of the program year;

d) Peer youth education will be evaluated with the approved CDPH Youth Nutrition and Physical Activity Survey/Youth Risk Behavior Survey;

e) Public education for community, providers, public officials, and stakeholder's will use exit evaluations to rate/rank effectiveness;

f) A tool for evaluating the multi-level coordinated nutrition and wellness and healthy lifestyle education, policy, and social media approaches and strategies in 2 targeted neighborhoods will compile selected indicators found in approved standardized tools i.e. Pre/Post Food Behavior Checklist, Fruit and Vegetable Checklist, Youth Survey tools, to gauge success. Other approved tools/methods will be selected during Year 1 based on the activities agreed upon by the collaborating groups for the 3 year cycle;

g) The Pre/Post CHOICE evaluation tool will be used to assess PSE changes facilitating nutrition, wellness, and physical activity policy development and implementation in preschools and Head Start programs;

h) PSE RE-AIM and Garden Surveys will document PSE changes facilitating increased fruit and vegetable consumption by gardening education in preschools and elders living in low income senior housing;

i) PSE RE-AIM, SLM Scorecard for SLM, process evaluations and internal tracking tools will document PSE changes facilitating increased consumption of healthy beverages and active lifestyle in homes and communities leading to safe environments for families to increase activity.

Summary: The combined outcomes from the evaluation tools and strategies proposed will help Alameda County identify/quantify the progress made toward achieving local goals within the spheres of the Socioecological Model as well as its contribution toward advancing state-wide objectives. Overall, the evaluation plan will provide: nutrition education (behavioral change) outcome data from multiple venues, representing highly diverse audiences with cultural, ethnic, language, and literacy needs; coverage of ages from preschool to seniors; environmental changes to increase access, opportunities, and motivation for participation; integrated partnerships to make collective impact on long-term healthy eating practices; and evidence that positive inroads are being made on shaping positive attitudes towards healthy nutrition, physical activity, and healthy weight over time.

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019): [PARTNERSHIPS]

By September 30, 2019, expand and diversify our CNAP collaboration to include a minimum of ten (10) new, non-SNAP-Ed-funded/non-traditional partners to implement two collaborative projects with our partners in targeted neighborhoods to achieve local goals that are aligned with selected statewide goals.

SNAP-Ed State Goals:

X	Goal 1: Food and Beverages (Behavioral)
X	Goal 2: Physical Activity (Behavioral)
X	Goal 3: Food Resource Management (Behavioral)
X	Goal 4: Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy that supports the Three-Year SNAP-Ed Local Objective listed above:

- **Healthy Food and Beverage Standards**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**

   By September 30, 2017, expand and diversify CNAP collaborative by identifying and establishing relationships with 10 new, non-SNAP-Ed-funded/non-traditional partners to achieve selected aligned goals.

2. **FFY 2018 (Year 2) Objective(s):**

   By September 30, 2018, these expanded and diversified collaborative partnerships will have built consensus, identified and prioritized mutually approved projects and/or strategies to implement in Year 3 to achieve selected aligned goals.

3. **FFY 2019 (Year 3) Objective(s):**

   By September 30, 2019, these expanded and diversified collaborative partners will have implemented and evaluated the progress of at least <u>two</u> mutually approved collaborative projects and/or strategies developed in FFY 2018.

SECTION C: INTERVENTION PLAN CONTINUED

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, at least 50 SNAP-Ed eligible sites will make at least one policy, system, or environmental (PSE) change that will improve and/or increase access to and/or support for healthy food and/or safe environments to increase physical activity.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- **Community/School Gardens**
- **Early Childhood Education Settings**
- **Healthy Food and Beverage Standards**
- **Healthy Retail Environment**
- **Healthy School Settings**
- **School Wellness**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

a. **FFY 2017 (Year 1) Objective(s):**

By September 30, 2017, identify and assess opportunities for at least 50 SNAP-Ed eligible sites to determine which agencies have nutrition and lifestyle practice policies, and assist in the development of a policy for sites that do not. Improve access and/or support for

healthy nutrition and lifestyle practices, i.e., physical activity. For sites with existing policies, determine and implement the next step to improve support for the policy.

b. **FFY 2018 (Year 2) Objective(s):**

By September 30, 2018, reassess/review and/or identify new opportunities to implement at least one PSE change in at least 50 SNAP-Ed eligible sites to support healthy nutrition and lifestyle practices.

c. **FFY 2019 (Year 3) Objective(s):**

By September 30, 2019, assist at least these 50 SNAP-Ed eligible sites to develop a sustainability plan that includes staff training and institutional/community support for continued policy/program implementation.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, at least 50 SNAP-Ed eligible sites will make at least one policy, system, or environmental (PSE) change that will improve and/or increase access to and/or support for healthy food and beverage consumption, and/or safe environments to increase physical activity.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Conduct PSE interventions at three low-income senior housing complexes: a) AAA will work with Gardening Together to create community gardens at two low-income senior housing sites and will incorporate nutrition education and physical activity. b) UCCE will revitalize a community garden at one site (Palo Vista); and assess the interest in individual small container fruit/vegetable/herb gardening in windows/balconies. Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019): [DIRECT/INDIRECT ED]

By September 30, 2019, Alameda County will reach 11,000 SNAP-Ed eligible residents through evidence based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

SNAP-Ed State Goals:

X	Goal 1: Food and Beverages (Behavioral)
X	Goal 2: Physical Activity (Behavioral)
X	Goal 3: Food Resource Management (Behavioral)
X	Goal 4: Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- **Community/School Gardens**
- **Early Childhood Education Settings**
- **Healthy Food and Beverage Standards**
- **Healthy Retail Environment**
- **Healthy School Settings**
- **School Wellness**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

FFY 2017 (Year 1) Objective(s):

By September 30, 2017, Alameda County SNAP-Ed funded agencies will reach 11,000 SNAP-Ed eligible residents through evidence based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

FFY 2018 (Year 2) Objective(s):

By September 30, 2018, Alameda County SNAP-Ed funded agencies will train 50 community partners and leaders, and together, reach 11,000 SNAP-Ed eligible residents through evidence-based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

FFY 2019 (Year 3) Objective(s):

By September 30, 2019, Alameda County's community partners and leaders will secure the funding and resources necessary to reach 11,000 SNAP-Ed eligible residents through evidence-based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):

By September 30, 2019, Alameda County will reach 11,000 SNAP-Ed eligible residents through evidence based direct nutrition education, and 22,000 SNAP-Ed eligible residents through indirect nutrition education and physical activity promotion designed to increase awareness, knowledge, intent to change, self-efficacy skills, and consumption of healthy foods and beverages.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Conduct a series of two 90 minute nutrition education and physical activity promotion classes (one class per week for five weeks) connected to the community gardens in at least two senior low income housing sites (not being served by UCCE); and based on interest of the administration, size of the building and space for a garden, reach at least 40 unduplicated seniors. [LIVE]	X CED CEI MPR C&C X TTA	CWD LHD X AAA UCCE CCC	CWD: LHD: AAA: ACPHD UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X Year 2 Q1 Q2 Q3 Q4 Year 3 Q1 Q2 Q3 Q4	On File: Agendas Sign-in sheets Food Gardening Guide, Fruit and Vegetable Checklist, Participant data cards Submit: ATF

3.2	Provide follow up site visits and presentations to the two (2) original senior living sites three times over the year – in conjunction with the quarterly visits from City Slickers Farms staff – to provide cooking demonstrations, highlighting harvested seasonal fruits and vegetables. [LIVE]	X CED CEI MPR C&C X TTA	CWD LHD X AAA UCCE CCC	CWD: LHD: AAA: ACPHD UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	On File: Agendas, Sign-in sheets, Food Gardening Guide, Participant data cards Fruit and Vegetable Checklist data/results Submit: ATF
3.3	Implement single session nutrition direct education and physical activity promotion workshops using Body and Soul curriculum and the Fruit & Vegetable Toolbox to reach a minimum of 300 SNAP-ED eligible residents at 6 faith-based sites in year 1, and 180 residents years 2 and 3. ****Time Frame: Year & Quarter:**
Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)
Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN CONTINUED

I. Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019) [TARGETED COMMUNITY INTERVENTION]

By September 30, 2019, align county partners around a specific place-based nutrition and/or physical activity campaign, implementing up to 20 multi-level, intervention strategies in two targeted neighborhoods.

SNAP-Ed State Goals:

X	Goal 1: Food and Beverages (Behavioral)
X	Goal 2: Physical Activity (Behavioral)
X	Goal 3: Food Resource Management (Behavioral)
X	Goal 4: Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategies that support the Three-Year SNAP-Ed Local Objective listed above:

- **Early Childhood Education Settings**
- **Healthy Food and Beverage Standards**
- **Healthy Retail Environment**
- **School Wellness**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

FFY 2017 (Year 1) Objective:

By September 30, 2017, identify and assess needs and community resources in two targeted neighborhoods; develop campaign focus, intervention strategies and plan of action activities to facilitate positive, multi-level, place-based, behavior change; and identify indicators to evaluate outcomes and/or impacts.

FFY 2018 (Year 2) Objective:

By September 30, 2018, continue campaign and expand to at least 10 strategies, including direct education, indirect education, technical assistance, coordination/collaboration/partnership, media/messaging, training, and/or policy development, to achieve positive multi-level, place-based outcomes in the two targeted neighborhoods.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Alameda County

Three-Year
Integrated Work Plan
FFY 2017–2019

FFY 2019 (Year 3) Objective:

By September 30, 2019, continue to implement and expand campaign to up to 20 strategies to achieve multi-level, place-based outcomes in the two targeted neighborhoods; reassess needs, outcomes/impacts; evaluate the effectiveness of the deep intervention approach and make recommendations for revisions/realignments /successful replication in other neighborhoods.

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):

By September 30, 2019, align county partners around a specific place-based nutrition and/or physical activity campaign, implementing up to 20 multi-level, intervention strategies in two targeted neighborhoods.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Identify potential geographic areas in Ashland and East Oakland to target a multi-level concentrated campaign. Select neighborhoods that are low income, ethnically diverse, and known to have poor access to healthy foods and beverages. Each area will include at least one school, one faith-based organization, one retail site, one senior housing unit, and one food pantry. [LIVE] [LEARN] [SHOP]	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: X; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3, Q4 Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	On File: GIS Map of areas with layers of various indicators
4.2	Assess needs, resources, and current programming by other CBOs and government agencies in the targeted neighborhoods**.** Develop collaborations with partners needed to implement the planned intervention strategies: Health	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: X; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3, Q4	On File: Assessment Findings, including listing of partners and partner assets/resources

	Departments and other health and wellness systems, local/university educational systems, food systems, the Interagency Children's Policy Council, Parks and Rec departments, community and professional groups, political and community leaders, including county supervisors, district council members, and city council members, and other key stakeholders. [LIVE] [LEARN] [SHOP]				Year 2 Q1 Q2 Q3 Q4 Year 3 Q1 Q2 Q3 Q4 	
4.3	Identify/establish the roles and responsibilities of the partners: overall program planning and development; promoting the campaign activities and energizing the community; adopting and embracing the program strategies; identifying and/or developing informal channels of communication most effective in the two targeted low-income ethnically-diverse communities. [LIVE] [LEARN] [SHOP]	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☒ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X Year 2 Q1 Q2 Q3 Q4 Year 3 Q1 Q2 Q3 Q4 	On File: List of roles and responsibilities of partner agencies
4.4	Define measurable baseline and follow-up assessment indicators necessary to evaluate outcomes/impacts in Years 2 and 3. Gather data for pilot evaluation, such as observational, Photovoice, Walkability Audit, Focus Groups, postal or face-to-face survey. 2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Office Supplies	Day to day office and desk supplies, such as paper ($30), ink ($75), scissors ($6), pens ($6), pencils ($6), markers ($9), sharpies ($9), highlighters ($7), staplers ($12), staples ($3), calculators ($8), notebooks ($2), notepads ($1), tape dispensers ($5), tape ($3), flip charts ($30), stickers ($5), labels ($20), envelopes ($3), display cases ($12), document holders ($8), plastic organization bins for storage ($15), portable files ($16), portfolios for transporting educational materials ($20).	8	$10.00	25	$2,000	
3			Business Cards	Business cards for community members and partners ($50)	2	$50.00	1	$100	
4			County Membership	County Membership to CCLHDN - Local Health Department Rate	1	$155.00	1	$155	
5			Postage	Direct program costs: postcards/stamps and registered mail specifically purchased for SNAP-Ed, as well as proportionally shared costs for all shared costs for project mailings such as daily correspondence, progress reports, cost reports, mass mailings of educational information, based on programs quarterly - cost vary permonth but on average $20 per month x 12 months = $240.	1	$20.00	12	$240	
6			Software	Shared software to be loaded on one computer, which is needed for NEOPB Admin staff assisting with supporting all SNAP-Ed work.	1	$250.00	1	$250	
				Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1			Electronic Replacement Parts.	PC/desktop computer electronics peripheries such as mouse, keyboard, cables, monitors, etc.; external hard drive for file backup, Spy ware . For Manny Flores, Annette Laverty, Dale Murai, Cheryl Lott, Cindia Sanchez.	2.5	$32.00	10	$800	
							Total Non-Capital Equipment/Supplies:	**$3,545**	

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Printing and Duplicating	Based on anticipated needs for SNAP-Ed use such as class participant workbooks ($7), newsletters ($.25), class and event flyers ($.10), posters ($4), recipes ($.10), pre and post Food Behavior Checklist and surveys ($1.50), Harvest of the Month calendars ($1.30), messaged bookmarks ($.50), messaged folders ($.75), messaged notepads ($1), banners ($50), large cutouts ($50), signage/wobblers for retail interventions ($4), signage for edible gardens ($5), clings/stickers/decals that promote fruits and vegetables ($.10), day to day network copier charges, etc. Some printing jobs are packaged with graphic design included.	$50.00	195	$9,750	
2			Nutrition Education	Providing materials to train teachers and other partners on nutrition education interventions and physical activity promotion, such as fact sheets, activty sheets, lesson plans and tool kits. Items used include preapproved materials produced locally as well as state provided materials.	$50.00	100	$5,000	
3			Food for Classes, Demonstration, and Taste Testings	Purchase and use of grocery store and other food vendors for fruits, vegetables, whole grains and other food items to conduct cooking classes, cooking demonstrations, and taste testings. We will use only USDA approved and allowable recipes; expected range of activities involving food all align with the Integrated Work Plan activities. No taste test including serving supplies will exceed $2.50/person and includes nutrition education messaging. This will reach a minimum of 16,500 participants through taste tests, because not all taste tests will reach the $2.50/person max. Reasonable food will also be provided for focus group participants.	$2.50	16500	$41,250	
4			Direct Nutrition Education and Physical Activity Materials to Support Activities	Materials to support staff/community partners on nutrition education interventions and physical activity promotion. Activities include providing training & supporting materials on nutrition and physical activity promotion topics, (exercise handouts) Harvest of the Month (receipts and calendars), etc., and conducting annual assessments in the community to support Cooking for Health Academy, other workshops, classes, events, and activities in the Integrated Work Plan. SNAP-Ed funded staff and subcontracted partner staff will conduct the training and provide the technical assistance and supporting materials. Materials include: recipes, health/wellness fair handouts, Harvest of the month calendars, cook books.	$15.00	150	$2,250	

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Public Health
County/Jurisdiction: Alameda County Health Care Services Agency, Public Health Department, Nutrition Services

5			Gardening Related Tools and Supplies	Gardening related tools and supplies used for garden based nutrition education interventions, including lumber ($25), hardware ($1), soil ($7), seeds ($1), starts ($1.50), gloves ($5), shovels ($5), trowels ($5), stakes ($3), trellises ($7), planting pots ($3), hats/visors for outdoor sun protection ($3), including reasonable and necessary shipping costs, etc. We would like to serve up to 30 school gardens and 1 faith based garden, and promote Rethink Your Drink through small potted herbs such as basil and mint.	$9.97	260	$2,592	
6			Small Appliances and Kitchen Supplies for Food Demos	Rethink Your Drink water dispensers ($25) and pitchers ($3), cutting boards ($1), knives ($20), electric skillets ($50), pots and pans ($50), bowls and other food demo containers ($10), small food-carrying trays ($3), baskets ($10), or canvas bags ($3), coolers ($40), blenders ($50), rice cookers ($50), slow cookers ($50), portable single burners ($50), stainless steel and glass mixing bowls and storage bowls ($25), food thermometers ($4), colanders ($4), peelers ($4), kitchen shears ($4), can openers ($4), graters ($4), taste test-sized bowls ($25), plates ($25), cups ($25), forks ($25), spoons ($25), mason jars ($1), professional table clothes ($40) and disposable table cloths ($1), etc. Items include new, replacement, and disposable.	$15.00	400	$6,000	
7			Minor non-cooking related equipment	Chairs ($20) and tables ($50) for office and for events, shade canopies for events ($100), fruit and vegetable costumes for events ($50), portable food carts ($50), shelves ($200), file cabinets ($200), bookcases ($200), dolly/hand trucks ($150), Safe Routes to School and Safety Patrol support equipment such as safety cones ($10), hand-held stop signs ($20), whistles ($2), reflective vests ($4), (encorporates PSE and physical activity from walking to and from home/school. Similar to the walking school bus).etc.	$1.00	836	$836

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Food Demo Costs - for taste only (Describe in detail)	Early Childhood Education (ECE) students: serving 28 sites, approximately 2,000 students for 9 seasonal fruit and vegetable taste testings in collaboration with the school district's Harvest of the Month cycle (approx 18,000). ECE Parents: serving approximately 800 adults and seniors with 4-6 taste testings during series based Nutrition Education classes (approx 4,800). For a total of 22,800 tastings for FFY 2017-18	$0.64	22800	$14,592	
2			Lesson Supplies (Describe in detail)	Will include any materials necessary for curriculum implementation. Such as: poly spots, music, baskets, food model pictures, markers, large plastic bins, poster board. Lesson supplies are used to support the extenders in executing curriculum and for UC CalFresh staff in teaching series based nutrition education classes. We anticipate that the lesson supplies will be purchased to support 28 sites, reaching 73 teachers and an estimated 2000 participants. Also, reaching up to 30 senior/adult sites reaching upwards of 350 participants. The average cost of lesson supplies per site will equate to $137.93/site x 58 sites = $8000.	$137.93	58	$8,000	
3			Gardening Supplies (Describe in Detail)	Will include materials to sustain 17 current gardens and to start 3 additional gardens. Supplies needed include: soil, seeds, garden tools, books, magnifying glasses, gloves, seed starter kits. These supplies are used to teach garden based learning and to support PSE efforts at the sites. We anticipate that gardening supplies will be purchased to support 20 sites, reaching 55 classrooms and an estimated at 1,500 participants. The average cost per site will equate to $375/site x 20 sites = $7500.	$375.00	20	$7,500	
4			Curriculum	Approved Curriculum from UC CalFresh and USDA Curriculum lists	$14.14	1139	$16,105	
5			Reproductions	Reproducing Food Behavior Checklist and handouts	$0.25	11000	$2,750

Alpine County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

County Name: **Alpine**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	**California Department of Public Health: CDPH: (Local Health Department: LHD)**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Alpine County is a very small, rural county located in the Sierra Nevada mountain range of eastern California. The county spans just 743 square miles of rugged, high-altitude terrain. Approximately 95% of the land in Alpine County is public land administered by the USFS and BLM. Alpine County is the smallest county by population size in California, with just 1,107 residents, averaging 1.5 persons per square mile. Approximately 35% of the population is Snap-Ed eligible (income ≤185% FPL), or an estimated 383 SNAP-Ed eligible residents. Approximately 16.6% of the population is below the federal poverty level, or an estimated 184 residents. Of the SNAP-Ed eligible residents, 46.1% identify as White (non-Hispanic) and 53.9% have an unknown racial/ethnic background. It is worth noting that 24% of the overall population in Alpine County is American Indian. The primary language spoken is English. Alpine County currently has an estimated 163 CalFresh participants, representing 43% of the county's SNAP-Ed eligible population.

Alpine County has just one census tract and it is not SNAP-Ed eligible; SNAP-Ed eligible sites are determined by means-tested programs and alternative methodology. All three of the schools in Alpine County are SNAP-Ed eligible schools in FFY2017, based on the percentages of free and reduced price lunch participation (≥50% FRPM Enrollment). Approximately 51 students, or 65.2% of the total student population, receive a free or reduced price lunch.

Approximately 24% of all adults in Alpine County are obese. Combined data for Mono, Alpine, Amador, Calaveras, Inyo, Mariposa, and Tuolumne Counties suggests that 61.3% of low income adults are considered overweight or obese, and 36.5% of low income adults are considered obese. There is no data available regarding the overweight/obesity rate for children in this cluster of counties.

Combined county data for Mono, Alpine, Amador, Calaveras, Inyo, Mariposa, and Tuolumne Counties shows that 78.9% of children ages 2 years to 11 years consume two or more servings of fruits per day; among children and teens ages 2 years to 17 years, 72.6% consume two or more servings of fruit each day. Approximately 57.1% of children in those counties reported having consumed fast food one or more times in the week prior to the survey; less than half (43.4%) of SNAP-Ed eligible adults had consumed fast food within the previous week. Among all adults in the cluster of counties, 24.2% reported consuming one or more sugar sweetened beverage per week.

Alpine County has a few small population centers: the Hung A Lel Ti American Indian community in Woodfords; the town of Markleeville; and the ski-resort villages of Kirkwood and Bear Valley. The western and eastern sides of the county are connected by mountain passes that are usually closed in the winter due to heavy snowfall. The county has few retail outlets for purchasing fruits and vegetables. There are no large grocers, only small mom and pop general stores that mostly cater to the large number of tourists that visit Alpine County every year. There are no stores in Alpine County that accept EBT cards. Combined data from the previously mentioned counties indicates that 65% of SNAP-Ed eligible adults report being able to find fruits and vegetables in their neighborhoods. However, due to the frontier, mountainous nature of Alpine County, a variety of fresh produce is often expensive and difficult to obtain. Most residents must travel out of state to neighboring Douglas County, Nevada, or out of county to South Lake Tahoe, to purchase affordable produce and grocery items. In 2015, 13% of low Income Alpine County residents had limited access to healthy foods. Alpine County has an overall food insecurity rate of 16.7%, with 24.8% of children experiencing food insecurity.

Among adults age 20 and older in Alpine County, 18% reported no leisure-time physical activity. Among all residents of Alpine County, 100% have access to physical activity opportunities. Combined data for the previously mentioned counties indicates that 83.3% of children and teens visited a park, playground, or open space in the month prior to the survey.

4. **Community Assessment**

In order to identify the needs of the SNAP-Ed community in Alpine County, data was partly derived from the 2015 SNAP-Ed Alpine County profile developed by CDPH. This includes data from a variety of sources, including the American Communities Survey (ACS) five-year estimates, the California Interview Health Survey, the Robert Wood Johnson Foundation, the Lucille Packard Foundation, the Pediatric Nutrition Surveillance System, the California Department of Education, the California Department of Social Services, the California Department of Finance, and Feeding America. The most recent Census data was used where available. Data was also derived from the 2015 County Health Rankings & Roadmaps.

The Project Director also met with representatives of several Alpine County agencies to discuss the unique needs of low income residents in Alpine County and determine where limited SNAP-Ed resources will be most effective. The agencies represented include Alpine County Public Health, Alpine County Health and Human Services, Alpine County Behavioral Health Services, and Alpine First 5. Taking into consideration the limited resources, the rural nature of the county, the suggestions of county agency representatives, along with the data from the sources mentioned above, the most efficient approach is to work with other agencies in reaching the SNAP-Ed population through established activities and events. This will best address the unmet nutrition education needs of the SNAP-Ed eligible community.

The assessment data indicates that nutrition education and physical activity interventions should target both low-income adults and low-income children in Alpine County. The assessment data supports a combination of nutrition education and physical activity interventions in schools and qualifying community sites; as well as effective policy, systems, and environmental change that will support healthier food and beverage environments. Low-income adults will best be reached through nutrition education interventions at the emergency food distribution site, as well as nutrition education and physical activity interventions at tribal locations. In order to reach low-income children and their parents in Alpine County, nutrition education and physical activity interventions were developed for students attending qualifying schools, with emphasis on promoting MyPlate messaging and healthy beverage consumption via Rethink Your Drink. There is no known regular nutrition education curriculum at the schools; the lessons taught by the Project Director will help address this unmet need. The assessment data also supports policy, systems, and environmental change at qualifying schools by improving food and beverage environments, as well as physical activity opportunities and environments, in these locations.

The assessment data also suggests the importance of community and school events in reaching SNAP-Ed eligible members of Alpine County. These events include back to school nights, annual Kindergarten Roundups, and annual Health Fairs. These events provide a wonderful opportunity for nutrition education messaging, physical activity promotion, and dissemination of the availability of food programs to larger numbers of SNAP-Ed eligible residents in the county.

The Project Director reviewed alternative targeting methodologies to identify any viable options for Alpine County. There is one centrally located country store that could serve as an appropriate complementary setting for SNAP-Ed eligible adults in the community of Woodfords; however it does not currently accept EBT cards. We will be requesting approval to make this site allowable for SNAP-Ed interventions. The Project Director would like to work with the proprietor of this country store to encourage and provide technical assistance on becoming an EBT vendor. The Project Director would then attempt to target the SNAP-Ed eligible audience through indirect education, social marketing, and environmental changes as able, to include healthy advertising, product placement strategies, and increasing the availability of affordable foods.

5. **Community Change Goals**

Long-term change goals in Alpine County, as specifically pertains to nutrition and obesity, include reducing obesity by fostering a healthier community; increasing the availability and affordability of healthy foods; and improving the school nutrition and physical activity environment. The long-term change goals directly align with the community assessment, which indicates a need to reduce obesity among children and adults through nutrition education and physical activity interventions; efforts to improve the availability, affordability, and appeal of healthy foods and beverages through policy, systems, and environmental changes; and a need to implement strong school wellness policies and environmental changes.

Community Service Solutions will focus its efforts on the SNAP-Ed eligible population of Alpine County, working within the framework and guidelines of USDA SNAP-Ed to address each of the long-term change goals as allowable, through comprehensive activities in our three-year integrated workplan. Taking into consideration the community needs assessment and long-term community change goals, as well as the very limited budget, Community Service Solutions will specifically achieve the following three-year objectives in Alpine County:

1. By September 30, 2019, increase access to and appeal of healthy foods and beverages and physical activity information among 100 participants of emergency food distributions, CalFresh, WIC, TANF, and Tribal programs, as well as at one country store, by implementing healthy food and beverage standards and making healthy site changes.

2. By September 30, 2019, one qualifying school will improve the food, beverage, and physical activity environment by implementing and maintaining the school wellness policy and making healthy site changes.

Our long-term community change goals will be supported by policy, systems, and environmental changes in the following settings:

- Schools (LEARN): strengthen existing school wellness policy, monitor implementation to create a supportive nutrition and physical activity environment.
- Community (LIVE/SHOP): promote and improve access to and availability of healthy foods and beverages; encourage healthy food and beverage standards and policies; mobilize community partnerships to support healthy eating and active living; and encourage participation in federal food and nutrition assistance programs.

6. **Partnerships and Collaborative Efforts**

LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc. Alpine County does not have an established CNAP group. However, the Project Director will work regularly with the Alpine County Health and Wellness Coalition to accomplish community change goals, as is SNAP-Ed allowable. The Coalition aims to create a healthier community through collaboration, advocacy, and education. Current members of the Coalition include Alpine County Public Health, Alpine County Behavioral Health, Alpine County Health & Human Services, Alpine County Office of Education, First 5 Alpine, Alpine Kids, Alpine Trails Association, and the Alpine Watershed Group, as well as individual residents of Alpine County.

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

The Project Director reviewed the approved integrated curriculum provided by the state agencies and considered each approved resource/curriculum to determine the best options for Alpine County. Curriculum and resources were specifically chosen that will best serve the needs of Alpine County's SNAP-Ed eligible population, both adults and children, and will align with our three-year and annual SNAP-Ed objectives. All materials will be available in English. The Project Director will also be utilizing the available American Indian materials.

9. **Intervention and Evaluation Plan Narrative Summary**

Community Service Solutions is the sole SNAP-Ed implementing agency in Alpine County. We developed two three-year local objectives, based on the needs of Alpine County, which address both adults and children in our SNAP-Ed eligible population in places where they learn, live, and shop. Our first three-year local objective is to increase access to and appeal of healthy foods and beverages and physical activity information among 100 participants of emergency food distributions, CalFresh, WIC, TANF, and Tribal programs, as well as at one country store, by implementing healthy food and beverage standards and making healthy site changes. This local objective will support all five State-level goals throughout the three-year period. The policy, systems, and environmental strategies supporting this three-year objective include promoting access to and availability of healthy foods and beverages, encouraging healthy food and beverage standards and policies, mobilizing community partnerships to support healthy eating and active living, encouraging participation in federal food and nutrition assistance programs, and encouraging local retail participation in EBT. The comprehensive intervention strategy will include direct education to participants of American Indian social service programs, focusing on healthy foods and beverages, physical activity, and food resource management skills; indirect education at the Alpine County CalFresh office, WIC location, TANF site, and emergency food distribution site by creating informational displays with posters, brochures, and recipe cards, as well as direct distribution of SNAP-Ed materials to participants by these partner agencies; participating in an annual Community Health Fair to reach the SNAP-Ed eligible population with healthy food and beverage messaging, as well as the opportunity to have direct access to food and nutrition assistance programs in Alpine County; meeting with the proprietor of one local country store to encourage EBT participation and help implement healthy site changes to include healthy advertising, product placement strategies highlighting healthy foods and beverages, and increase the variety and availability of healthy foods, especially fresh produce; and encouraging partner agencies to adopt healthy food and beverage standards and/or policies, such as creating healthy vending at their sites and implementing healthy food and beverage standards during community classes and events. The numbers of SNAP-Ed eligible persons reached through direct education, indirect education, and policy, systems, and environmental changes is not expected to increase from FFY2017 through FFY2019, due to limited funding each year. The overall goal of Three-Year Local Objective #1 is to increase the appeal and availability of healthy foods and beverages among the SNAP-Ed eligible population, making healthy living an easier and routine choice long-term.

The second three-year local objective is to have one qualifying school improve the food, beverage, and physical activity environment, to be accomplished by strengthening the existing school wellness policy, monitoring its implementation, and making healthy site changes. This local objective will support all five State-level goals throughout the three-year period. The Project Director will use a mix of intervention strategies over the three years, to include direct education to students in a classroom setting that will focus on nutrition and physical activity; distribution of school newsletters and other materials to students and their parents, focusing on healthy foods and beverages, physical activity, and food resource management; hosting interactive booths at school events, such as back to school nights, open houses, and kindergarten roundups, with a focus on healthy foods and beverages and availability of food programs; encouraging the use of the Playground Stencil Kit to promote physical activity; evaluation of the school wellness policy and assistance with strengthening both nutrition and physical activity standards within the policy; monitoring the implementation of the school wellness policy through regular discussions with administrators, teachers, staff, and parents; making healthy site changes by offering training and technical assistance with the implementation of Smarter Lunchrooms Movement principles and practices; and making healthy site changes by offering training and technical assistance with implementation of the CATCH program. Due to the very small

student population as well as the very limited budget, the activities will not show much progression each year from FFY2017 through FFY2019. The Project Director plans on delivering direct education to all students each year and implementing healthy site changes in the K-8 school in FFY2017. The overall goal of Three-Year Local Objective #2 is to reduce rates of overweight and obesity among SNAP-Ed eligible children in Alpine County, as well as their parents, by creating a healthier culture where nutritious meals and snacks are the norm, as well as routine physical activity; fruit and vegetable intake is increased; added sugars in the diet are decreased; and low-income families have increased their food resource management skills in such a way that they not only have enough food to eat every month, but they are able to create healthy, nutritious meals on a budget.

The intervention plan addresses each level of the Social Ecological Model, by providing direct education to individual children and adults; training and technical assistance to schools, organizations, and a business; and policy, systems, and environmental changes within schools and the community. Community Service Solutions will continue to collaborate with the Alpine Health & Wellness Coalition and other partner agencies throughout the three-year period to achieve our Three-Year Local Objectives. We will work together to continue identifying and addressing unmet needs in Alpine County, as allowable by SNAP-Ed, in our efforts at achieving our community change goals.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	30		0 to 4 years old (Preschool):	33

SECTION C: INTERVENTION PLAN

a. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and appeal of healthy foods and beverages and physical activity information among 100 participants of emergency food distributions, CalFresh, WIC, TANF, and Tribal programs, as well as at one country store, by implementing healthy food and beverage standards and making healthy site changes.

SNAP-Ed State Goals

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

b. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- promote and improve access to and availability of healthy foods and beverages
- encourage healthy food and beverage standards and policies
- mobilize community partnerships to support healthy eating and active living
- encourage participation in federal food and nutrition assistance programs
- encourage local retail participation in EBT

c. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, Community Service Solutions will reach up to 50 community members with direct education in SNAP-Ed eligible venues and up to 100 community members with indirect education in SNAP-Ed eligible venues; and will encourage and provide technical assistance to one country store in becoming an EBT vendor.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, Community Service Solutions will reach up to 50 community members with direct education in SNAP-Ed eligible venues and up to 100 community members with indirect education in SNAP-Ed eligible venues; and will continue to provide technical assistance to one country store in becoming an EBT vendor and assist in making healthy site changes.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, Community Service Solutions will reach up to 50 community members with direct education in SNAP-Ed eligible venues and up to 100 community members with indirect education in SNAP-Ed eligible venues; and will continue to assist one country store in making healthy site changes.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019): By September 30, 2019, increase access to and appeal of healthy foods and beverages and physical activity information among 100 participants of emergency food distributions, CalFresh, WIC, TANF, and Tribal programs, as well as at one country store, by implementing healthy food and beverage standards and making healthy site changes.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, one qualifying school will improve the food, beverage, and physical activity environment by implementing and maintaining the school wellness policy and making healthy site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- strengthen existing school wellness policy, monitor implementation to create a supportive nutrition and physical activity environment

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, Community Service Solutions will reach up to 100 students with direct education and up to 100 students and their parents with indirect education; and will support the implementation of the school wellness policy and the Smarter Lunchrooms Movement in one primary school.
2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, Community Service Solutions will reach up to 100 students with direct education and up to 100 students and their parents with indirect education; will continue to support implementation of the school wellness policy and Smarter Lunchrooms Movement in one primary school; and will support the implementation of the CATCH program in one primary school.
2. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, Community Service Solutions will reach up to 100 students with direct education and up to 100 students and their parents with indirect education; and will continue to support implementation of the school wellness policy, Smarter Lunchrooms Movement, and CATCH program in one primary school.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019): By September 30, 2019, one qualifying school will improve the food, beverage, and physical activity environment by implementing and maintaining the school wellness policy and making healthy site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide 30-60 minute nutrition education, healthy beverage, and physical activity lessons in classrooms in one elementary school (that includes middle school aged children), one high school, and one preschool, reaching up to 100 total students annually. Amador County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	**University of California: UC CalFresh UCCE: UC Cooperative Extension- Central Sierra**
X	**California Department of Public Health: CDPH: (Local Health Department: Amador County Public Health)**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Amador County is located in the Sierra Nevada Mountains of California approximately 45 miles Southeast of Sacramento in a part of California known as the foothills. As of 2010, its population is 38,091 with approximately 3,500 inmates housed at Mule Creek State prison.

According to the U.S. Census Bureau, the county has a total area of 605 square miles, of which, 593 square miles of it is land and 12 square miles of it is water. Amador County ranges in elevation from approximately 250 feet in the western portion of the county to over 9,000 feet in the eastern portion of the county. The county boasts 8 stoplights, 2 billboards, both owned by the Indian Casino, a public transportation system, which operates only during the day Monday-Friday, no weekend service, and three incorporated towns, Ione, Sutter Creek and Jackson. Sixty (60) percent of the population lives in rural unincorporated areas. As the population density is very low throughout the county, areas of low income are dispersed amongst areas of affluence. Amador, not unlike many of the smaller rural counties, does not have any identifiable low-income census tracts.

According to Amador's SNAP-Ed 2015 County Profile, approximately 12.6% of the population is below the federal poverty level, with an overall food insecurity rate of 15.4%, but identifying children at 26.5%.The county is primarily white, 80.1%, with Latinos coming in as the second largest population at 12.4% Hispanic. English is the predominant language spoken throughout the county. SNAP-Ed eligible population totals 8,624 (26.2%). According to the Amador Social Services Department for the month of July 2015, there were 1,973 households receiving CalFresh benefits. Of these households, 1596 were white, 150 Hispanic, 49 American Indian, 18 black and 13 Asian with the remainder of households of varied ethnicities. The breakdown of the CalFresh recipients mirror the county's racial percentages as 81% of the recipients are white and 7.6% have self-declared as Hispanic. Amador hosts one Casino, Jackson Rancheria, and two more Indian casinos still under consideration. However, the Native American population encompasses only 2.5% of the CalFresh recipient population. The black population totals less than 1% of households receiving Cal Fresh benefits.

Amador's main food bank is located in the center of the county in Martell, with 15 alternative sites throughout the county. The food bank alone in 2015 served 2,440 (unduplicated) families totaling 6,162 individuals: of these 474 under 5 years of age, 1209 were 5 to 18 years of age and seniors over 60 years of age totaled 995.

University of California Cooperative Extension (UCCE) has been serving SNAP- Ed eligible families with nutrition education for the past 15 years. During this time, they have forged strong relationships with all the local agencies and community based organizations serving both the low income and general population. UCCE nutrition educators are presently providing direct nutritional education all the eligible school sites, working with administrators to reintroduce School Wellness Policies, supporting the establishment of school gardens and promoting increase participation in structured physical activities. UCCE is also contracted with Amador Social Services to provide nutritional education to Cal Work's recipients, working alongside the community centers in their preschool programs and consulting with the Amador Head Start sites.

Amador Public Health has been providing SNAP-approved recipe food demonstrations at the WIC sites, Emergency Food Distribution sites and the Food Bank in support of the UCCE monthly food lesson plans and WIC's monthly nutritional themes. In the new work plan, ACPH will venture into the policy,

systems and environmental world by working with the local food bank to increase healthy food and beverage offerings at their food distribution sites. Moreover, in order to increase local access to healthy fruits and vegetables to work in conjunction with the state to certify local farmer's market and encourage EBT services at this site. Public Health will also collaborate with UCCE on their food resource education by providing materials at monthly WIC sites.

Sutter Amador Hospital is currently engaged in updating their 2013 Community Needs Assessment. However, what Sutter Amador Hospital's 2013 Community Needs Assessment stated regarding outdoor activities has not changed in the past 3 years, "Community experts and focus groups reported that most parks are too far away to be accessed without a car and that routes to parks often involve traveling on roads that are not safe for bicycles and pedestrians. Focus group participants also identified rattlesnakes as a safety concern on many walking trails and in rural areas. Given this assessment, Amador County would benefit from a physical activity component added to nutrition education interventions.

4. **Community Assessment:**

Unless noted otherwise, the following information was obtained from the 2015 SNAP-Ed County Profile.

Amador County is a rural county located in the Sierra Nevada foothills with an estimated population of 364,742.[1,2] Of the SNAP Ed eligible population, 82.9% are white, 9.6% are Hispanic, and 20.7% are 65 years of age and older.

According to the SNAP-Ed County Profile of 2015, Amador County had a SNAP-Ed eligible rate of 10.5%. Of the people who live at less than 185% of the Federal Poverty Level, 32.8% are children (17 years of age and younger) and 24.6% are adults between the ages of 18-64-year-old

County-specific rates of obesity and overweight populations for SNAP-specific populations are not available, however when combined with other small, rural counties in the area (Alpine, Amador, Calaveras, Inyo, Mariposa, Mono, and Tuolumne) it is clear that there is a great deal of work to be done. For SNAP-Ed adults in the aforementioned combined counties, the prevalence is 61.3% are overweight/obese while 36.5% are obese. Countywide, the rate of diabetes is 10% (versus 8% for the state as a whole).[2]

Fresh produce availability is limited in many of the small communities and frequently expensive. This can significantly limit low-income families' ability to stretch food dollars far enough to purchase fruits and vegetables routinely. Fruit and vegetable consumption specific to Amador County is difficult to assess for the SNAP population. Providing education specific to fruit and vegetable consumption is critical.

One of the major challenges providing nutrition education in this area is the population is spread out between several small towns and communities that are all relatively isolated from one another especially in winter. Public transportation in the area is limited. It is extremely difficult for limited resource families and individuals to travel to central locations for services or education. To address this challenge, it is necessary to provide education opportunities out in the communities at schools, community settings, and at the limited retail environments. In many of these communities, the local elementary school is the hub of community activity and it is important to utilize this setting to create an innovative and engaging learning community focused on changing lifestyle choices whenever possible.

In September 2015, Amador County experienced the Butte Fire. This community-changing event burned more than 70,000 acres, destroyed more than 900 structures, and is estimated to have affected more than 12,000 people – many who were the most in-need and disenfranchised members of the community. No community assessment has been completed as of yet to clearly understand the impact this catastrophic event has had on Amador County.

5. **Community Change Goals:**

The Amador County Nutrition Action Plan was developed as part of the visioning process for the County Nutrition Action Plan (CNAP) stakeholders. While many ideas were presented, four community wide goals seemed to encompass the spirit of the process. The three goals for the next work plan cycle and are as follows:

1) By September 30, 2019, increase access to healthy fruits, vegetables and beverages at the Interfaith Foodbank, 2 food pantries, 1 farmer's market by adopting healthy food policies and implementing EBT.

2) By September 30 2019, eight (8) low resource schools and preschools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

3) September 30, 2019, promote the consumption of fruits and vegetables, healthy beverage options, awareness of best practices in food resource management, and physical activity to at least 4000 people from all age ranges who are CalFresh/SNAP Ed-eligible in Amador County.)

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The Amador Calaveras CNAP is a bi-county coalition between Amador and Calaveras County. This particular collaborative has been in existence for over 15 years under the name of HANDS (Health Activity Nutrition Directions) as an informal way to assist both communities access healthy lifestyle education with limited resources. This coalition has transitioned into a formal CNAP for the purposes of streamlining the nutrition education and physical activities resources across both counties. The CNAP currently functions with the following active partners: Amador/Calaveras WIC Nutritionist, University of California Cooperative Extension (UCCE), Amador and Calaveras Public Health SNAP-Ed staff, First5 Amador, First5 Calaveras, Food Bank of Calaveras County, Head Start nutrition staff from Amador and Calaveras counties, and Amador County's Tobacco Program. While other partners have been invited, the core group continues to sustain the efforts.

Four goals have been established by the CNAP:

- Amador County Schools will provide healthy lunchroom choices at all school sites
- Amador County Residents will increase their consumption of fruits and vegetables
- Amador County Residents will decrease their consumption of Sugary Beverages
- Amador County Residents will increase their amount of time spent in physical activity

The CNAP has determined that a monthly healthy lifestyle message calendar will be developed and shared across all participating agencies. UCCE has agreed to provide the technical function to develop the calendars. Topics will be agreed upon during the quarterly CNAP meetings. This is an exciting advancement of the CNAP. Given this degree of engagement throughout the two counties, messaging the same theme at the same time will continue to provide a depth of communication related to healthy lifestyle messaging. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc.

1) **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

2) Educational Materials, Resources and Curriculum

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health–Nutrition Education Obesity Prevention Branch (NEOP) Approved Nutrition Education Materials list. Amador LIAs reviewed the approved integrated curriculum list provided by the state agencies, and studied each piece to determine the best option for the specific target population, as well as the selected SNAP-Ed three-year and annual objectives.

3) Intervention and Evaluation Plan Narrative Summary

Nutrition Education – Adult

University of California Cooperative Extension – Central Sierra (UCCE) with UC CalFresh has been providing nutrition education and physical activity promotion to low income individuals and families for over 15 years in Amador County. The local health department (LHD) and UCCE have a strong working relationship and have worked closely on many nutrition education/physical activity promotion projects for several years. Both are very involved with agencies and projects working to influence individual and family behavior, the school environment, and community wide changes interrelated to the Social Ecological Model (SEM). UCCE will deliver direct education through a variety of methods listed below. LHD and UCCE will provide coordinated indirect education and continue work in the areas of Policy, Systems and Environment during the next three years.

Adult target population delivery methods include:

- Series based workshops (UCCE) – These are a series of three to four 30- 45-minute sessions. Workshops are conducted at a variety of programs sponsored by Amador County Health and Human Services including CalFresh, TANF Job Readiness and perinatal services. In addition, we are working with Amador Interfaith Food Bank to provide education, tastings and recipes at the fruit and vegetable distributions held from May – October each year. UCCE is also providing nutrition education at three congregate meal sites for the senior population, adults and families at Jackson and Kennedy Meadows Apartments and at the homeless shelter. In partnership with ARC, UCCE is teaching special needs adults as well as the staff as extenders.

- One-time stand-alone workshops (UCCE) – These cover a variety of nutrition and physical activity topics requested by the community. These will be offered at the target sites with tasting or cooking demo as part of each lesson.

- Parent Teacher Groups (PTGs) (UCCE) – We will continue to work with our PTGs at our target schools to educate adults and help facilitate changes in schools meals, food items offered at schools and physical activity policy. We have found that these groups are very receptive to suggestions for improving nutrition and physical activity policy and practices at the schools when we provide information and suggestions.

- School based events (UCCE) – These events allow us to connect with parents directly and provide education and opportunities to discuss school policy related to nutrition and physical activity and provide nutrition education for the family. We anticipate presenting at a variety of these throughout the school year.

- The LHD will provide depth into the community regarding key nutritional messages by providing taste testing at approved sites in support of UCCE/WIC monthly nutritional topics.

Nutrition Education – Youth

The University of California Cooperative Extension (UCCE) formed a partnership with Amador Unified School District, Nexus and family resource centers to ensure nutrition education and physical activity promotion was provided in the classroom and at preschool and after school programs. UCCE is also serving parents and children participating in The Bridge program for children entering kindergarten. Through these partnerships we have been able to provide both direct and indirect nutrition and physical activity education to all Title I schools, preschools, Head Starts and after school programs serving low -income youth.

UCCE utilizes the following strategies for our youth population:

- Harvest of the Month – UCCE has found this is very appealing to teachers and encourages teachers to participate in more intensive classroom direct nutrition education.

- Series-based lessons – A variety of approved nutrition curricula are utilized for evidence-based series lessons. UCCE works with schools and the UCCE Master Gardener Program to create school gardens. These gardens offer experiential learning to supplement classroom activity.

- Special events – We participate in special events such as the Celebrate Our Children Festival. UCCE generally provides simple messages – Re-Think Your Drink, Vary your Veggies or Eat a Rainbow. We provide tasting and handouts for these type of events.

Nutrition Education - Family Centered

- Whenever possible we provide family focused activities to engage the parent and child in the learning process. We frequently use cooking activities, and nutrition and physical activity games at community and school events that encourage all members of the family to get involved.

Progression Across the Three-Year IWP

Each of the IWP Objectives moves in a progression over the three years to meet each goal.

Objective #1: Foodbanks and Farmer's Markets
Food Banks - In 2017, begin meeting and educating the Interfaith Foodbank leadership team on the benefits of health food and beverage standards and policies. Follow up in Year 2, by supporting the Foodbank Manager in adapting and/or designing a health food policy and implementing the standards and policy at one site. During 2019, food pantries in the county will implement the food policies and standards at their sites.

Farmer's Markets – Begin by identifying a Farmer's Market in the county that is in an area that has a SNAP eligible population. Continue working with the Farmer's Market Manager to add EBT payment as a means of purchasing fruits and vegetables. In Year 3, the LIA will work with the Manager to outline a sustainability plan for the use of EBT.

Objective #2: Schools
The work with the low-income schools will include five areas of focus. Each year of the IWP, we will increase the total population reached as the Social Ecological Model (SEM) "ripples" continue from individual to family to school to community. The areas of focus include:

- Direct and indirect education
- School gardens
- Improvements in cafeteria healthy food and beverage offerings and sales
- Increase structure physical activity
- Assessment, adoption, and implementation of School Wellness Policies at the district and site levels.

Objective #3: Direct and Indirect Education
The LIAs will add classes and workshops offered to the SNAP eligible adults (including seniors) reach and documented impact. The numbers reached will grow each year throughout the implementation of the IWP. Workshops and training will be centered on general nutrition education, resource management, nutrition of preserved foods and increasing physical activity. Indirect education reach will grow each year as LIAs participate at community and school events and festivals.

Media, Social Media, and Public Relations

The UC CalFresh Nutrition Education Program will be utilizing our UCCE Central Sierra Facebook page, website and the Central Sierra UCCE CalFresh Nutrition Education Instagram account to promote approved messages and events. In addition, we send a bi-monthly nutrition newsletter to workshop participants who have provided email address. We will collaborate with other partners to focus on key messages to intensify dose and ensure consistency. The LHD will post key nutrition messages on Public Health's Facebook and Twitter pages.

Coordination and Collaboration

UCCE is the bridge from the university to local communities, providing research-based information to individuals and community agencies. The UC CalFresh Nutrition Education Program at UCCE provides information via curricula with aligned strategies that can positively affect health outcomes. Both the LHD and UCCE are looking forward to being active partners in the County Nutrition Action Plan (CNAP) with WIC, First 5 Amador, and Head Start and will continue to provide support and expertise. The LHD, UCCE and WIC will meet regularly to identify a specific key message that will be promoted by all three agencies. We will establish a cycle for the messages to ensure maximum dose is provided.

Training and Technical Assistance

UCCE will provide training and technical assistance to all teachers participating in the UC CalFresh Nutrition Ed program. We will ensure they are provided all the necessary materials to deliver the lessons with minimal effort. In addition, we will continue to recruit and train extenders to deliver approved curriculum in the classrooms or at after school programs. Teachers and extenders will be trained throughout the year. In addition, we will provide training to community based organization staff who will serve as extenders for the program including (but not limited) The Amador Interfaith Food Bank, ARC and Nexus staff.

Policy, System and Environmental Change

UCCE will work with parents, teachers, and administrators in Amador County to review current School Wellness policies and identify areas for improvement. In addition, assistance with promotion and implementation of new policies will be a focal point of the UCCE work. The Smarter Lunchrooms Movement will be utilized to implement food service best practices and strategies to increase healthy food access and consumption. UCCE will assess the need to create and/or support development of school gardens. We will explore ways to utilize garden enhanced nutrition education in the classroom and garden. We will utilize the expertise of the UCCE Master Gardeners and other partners to ensure the success of the garden programs. UCCE will offer technical expertise in implementing structured physical education on the school campuses, and at preschools and after school sites.

Amador Public Health plans to increase their focus of impact by moving into the Policy, Systems and Environmental arena. Portfolio 3, “Places where People Shop for Food” was selected for the framework. In order to capitalize on the relationships that have been established with Food Bank personnel during the last 2 years of indirect food education at their distribution sites, the core setting will remain the Food Bank and its satellites. Healthy Food Access Portal’s Health statistics on Amador County, as stated by the Centers for Disease Control (CDC) displays that 64% of Amador County’s population is classified as either overweight (39%) or obese (25%). There was also a cognitive disconnect between the healthy food demonstrations that were occurring next to the “take all that you want” table filled with donuts, pastries, and white breads. The goal is to work with the leadership team of the local food banks to become aware of the need for nutritional value in all foods available for our most vulnerable population with the end resulting in adoption of a food procurement policy. Thus ending the availability of non-nutritional foods or at least limiting their intrusion into the take home selections. Also understanding that the food banks have a long standing history of taking all foods from anywhere and the rural notion that any food is better than no food, working with leadership staff will take time and patience. Beginning by introducing the concept of there is no such things as “bad” food but choices along a continuum. The LHD will work with the staff to implement a healthier choice table, “Green Means Go! Thus educating the food bank recipients on positive food choices.

Amador County consumption of fresh fruits and vegetables as stated by CDC rated poorly. They reported that 83% of adult residents of the county reported eating less than 5 fruits and vegetables per day. Farmer’s Markets are becoming larger in Amador County. Presently there are 4 seasonal markets. Two markets are in high density areas of Sutter Creek and Jackson. Two are in more rural areas of Pine Grove and Plymouth. The bring EBT

benefits to these markets would be a strong step forward in bringing fresh vegetables to the lower income population. Since Amador does not have any low income census tracks, the first goal is to SNAP-Ed certify one of the rural farmer's markets. The state NEOP Branch will be instrumental in accomplishing this task. But it is a step that is vital to the EBT population's access to farm fresh fruits and vegetables.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. Past evaluation efforts have been helpful in informing the program and these efforts will continue. The SNAP-Ed Activity Tracking Form (ATF) and Reporting Tools Workbook (RTW) will be used to track direct and indirect reach. Education and Administration Reporting System (EARS) and Semi-Annual Activity Report results will be generated from the ATF and quarterly RTW. Separate tracking of direct education taught by LIA staff and site staff trained by LIAs, such as teachers, will continue in an effort to better monitor effectiveness. Impact Outcome Evaluation (IOE) and UC CalFresh approved direct education evaluation tools and SMART objectives, designed to measure change in dietary and physical activity behaviors, food resource management and the factors that influence these behaviors will be completed by the LIAs.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	45		0 to 4 years old (Preschool):	264
Female	55		5 to 17 years old (School Age):	8184
			18 to 59 years old (Adult):	4224
			60 years old and over (Senior):	528

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to healthy fruits, vegetables and beverages at the Interfaith Foodbank, 2 food pantries, 1 farmer's market by adopting healthy food policies and implementing EBT.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

1) Healthy food and beverage policies/stocking standards
2) Purchased/donated food policies
3) Local procurement
4) Access to locally grown fruits/vegetables

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By 9/30/17 will educate 3 members of the Interfaith Foodbank leadership team on the benefits of establishing a healthy food and beverage standards
    b. By 9/30/17 will conduct nutrition education at one (1) SNAP-qualified Farmer's Market site

2. **FFY 2018 (Year 2) Objective(s):**
    a. By 9/30/18 the Interfaith Foodbank Manager will agree to adopt and implement a Healthy Food and Beverage Policy at one (1) site
    b. By 9/30/18, the qualified Farmers Market site will agree to and implement EBT during the summer growing season.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By 9/30/19 2 Amador County food pantries will agree to implement a healthy Food and Beverage Policy at their sites
   b. By 9/30/19 EBT, services will be sustained at the qualified Farmer's Market Site.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to healthy fruits, vegetables and beverages at the Interfaith Foodbank, 2 food pantries, 1 farmer's market by adopting healthy food policies and implementing EBT.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	(a) Meet/encourage foodbank to establish standards (b) Research targeted outreach tools for presentation to Food Bank Leadership staff i.e.: Banking on Health-Improving Healthy Beverage & Nutrition Standards in Food Banks (change lab), Engaging Food Bank Leadership in discussion about healthy food policies (Champions for Change) (c) Identify consumer labeling programs for food bank participants education i.e.: Color Matters (color code your foods) (d) Provide sample Healthy Procurement Policy for reference (e) Recognize positive changes in media outlets	CED CEI X MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X x Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X x	Healthy Food Procurement Policy Food Labeling program identification Pictures/messages

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, eight (8) low resource schools and preschools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Physical Activity: structured physical activity, murals/stencils, Safe Routes to School/walk to school programs
- Healthy Eating: Smarter Lunchrooms Movement (SLM), edible gardens
- Local Procurement: from farm and school gardens
- Access to Healthy Foods: garden-enhanced nutrition education
- Wellness Policies: district and school site

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at 4 low-resource school sites, UC CalFresh educators and 4 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 150 elementary students with direct education, and 500 parents and family members with indirect education.
    b. By September 30, 2017, UC CalFresh staff will work with partner's committees to improve 2 of the 4 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
    c. By September 30, 2017, UC CalFresh educators will implement a new structured PA program and 4 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 2 low-resource school sites already receiving nutrition education.

d. By September 30, 2017, UC CalFresh staff will work with partners to assess School Wellness Committees and School Wellness Policies at the school district level (1 district).

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at 6 low-resource school sites UC CalFresh educators and 8 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 250 elementary students with direct education, and 500 parents and family members with indirect education.
   b. By September 20, 2018, UC CalFresh staff will work with partners to improve 4 of 6 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
   c. By September 30, 2018, a new structured PA program will be implemented by UC CalFresh educators and 8 trained extenders, such as classroom teachers, afterschool staff, and PE specialists at 3 low-resource school sites already receiving nutrition education.
   d. By September 30, 2018, UC CalFresh staff will work with partners and School Wellness Committees to update School Wellness Policies at 1 district and 2 school sites.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at 8 low-resource school sites UC CalFresh educators and 12 trained extenders (classroom teachers, volunteers, and afterschool staff) will reach 300 elementary students with direct education, and 500 parents and family members with indirect education.
   b. By September 30, 2019, LIA staff will work with partners to improve all 8 of the school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies and school/district level wellness policy language includes SLM.
   c. By September 30, 2019, UC CalFresh educators will implement a new structured PA program and 10 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 4 low-resource school sites already receiving nutrition education.
   d. By September 30, 2019, UC CalFresh staff will work with partners including School Wellness Committees to implement updated wellness policies and facilitate environmental or policy changes at 1 districts and 4 school sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Amador County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, eight (8) low resource schools and preschools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide direct nutrition education using approved curricula, utilizing UCCE staff and extenders at 4-8 SNAP-Ed qualified schools each year. <td>Establish or reinvigorate school gardens at 1-3 qualified school sites; each school site may begin at a different step, depending on the stage of development of the particular program:
Step 1: Assess the interest and capacity for developing and utilizing school gardens for nutrition education.
Step 2: Build partnerships and a coordinating committee at the school and assist in establishing a plan for building, maintaining, and promoting the school garden and program.
Step 3: Identify the curricula to be utilized in the school garden and classroom in conjunction with UCCE Master Gardeners, garden committee and other partners.
Step 4: Train teachers and other extenders and prepare materials for implementation of the program.
Step 5: Assist in designing a sustainability plan for the school garden program e.g. funding, utilizing extenders as instructors, ongoing maintenance, etc.
• Year 1: 1 school sites
• Year 2: 2 school sites
• Year 3: 3 school sites</td>

2.5	Assist in adopting Smarter Lunchroom Movement (SLM) strategies in school cafeterias at 1-3 qualified school sites; each school site may begin at a different step, depending on the progression of the SLM program at each site: Step 1: Assess and identify site interest and capacity to implement the SLM. Step 2: Provide SLM training to food service directors and staff. Step 3: Conduct a SLM scorecard assessment with food service staff. Step 4: Assess the capacity of the school site to establish a student committee to involve students in SLM activities, including artwork, adding signage, creating names for entrees, etc. Step 5: Establish student committees as identified; assist the group to delineate goals and projects. Step 6: Assess if the school cafeteria environment would be improved by adding a mural; if yes, be sure to include students in designing the mural for the cafeteria. Step 7: Provide ongoing technical assistance to identify which 4-6 SLM strategies to employ and assist in implementation. Step 8: Conduct another assessment after 6-8 months to identify changes in scores. Step 9: Adaptive Management – evaluate results and make necessary changes to begin the next implementation cycle. Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Amador County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

I. Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019 promote the consumption of fruits and vegetables, healthy beverage options, awareness of best practices in food resource management, and physical activity to at least 4000 people from all age ranges who are CalFresh/SNAP Ed-eligible in Amador County.

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Eating: increase access to fresh fruits and vegetables, nutrition education, and food resource management education
- Physical Activity: increase active living education and awareness
- Communication Environment: link to online resources, eatfresh.org text messages, etc.

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, UCCE will conduct a minimum of 8-series based, and 15-single session nutrition, food resource management, and/or physical activity education sessions using approved curricula to reach 300 SNAP-Ed-eligible adults.
b. By September 30, 2017, conduct approved indirect nutrition and/or food resource education at 10% above FY 2016 baseline SNAP-Ed eligible adults and youth at events, festivals and other qualified sites.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, conduct a minimum of 15-series based, and 30-single session nutrition, food resource management, and/or physical activity education sessions using approved curricula to reach 325 SNAP-Ed-eligible adults.
b. By September 30, 2018, conduct approved indirect nutrition and/or food resource education at 10% above FY 2017 baseline SNAP-Ed eligible adults and youth at qualified sites.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, conduct a minimum of 40-series based, and 65-single session nutrition, food resource management, and/or physical activity education sessions using approved curricula to reach 350 SNAP-Ed-eligible adults.
b. By September 30, 2019, conduct approved indirect nutrition and/or food resource education at 10% above FY 2018 baseline SNAP-Ed eligible adults and youth at events, festivals and other qualified sites.
c. By September 30, 2019, implement a Master Food Preserver nutrition education program at the food bank to provide at least 15 single-session education lessons on freezing, drying, and canning fresh fruits and vegetables.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Amador County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

By September 30, 2019, promote the consumption of fruits and vegetables, healthy beverage options, awareness of best practices in food resource management, and physical activity to at least 4000 people from all age ranges who are CalFresh/SNAP Ed-eligible in Amador County.
