City of Berkeley | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 8/9/2017**

County Name: City of Berkeley

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
x	California Department of Public Health: CDPH: (Local Health Department: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Demographics

The City of Berkeley is an urban city within Alameda County and is home to 117,384[1] diverse residents with some significant changes in the population. The large university and high school student population influences Berkeley's demographics. Per the 2010 U.S. Census Data, 12.3% of the total population is under 18 years of age, 51.1% are female, and the median age is 31.4 years. Berkeley has an ethnic mix of White (54.7%), Asian (19.3%) African-American (10%), Latino (10.8%), American Indian/Native Alaskan (0.2%), Pacific islander (0.2%), those that identify as two or more races (6.2%), and other (.4%).[1]

Health Status and Health Inequities

The City of Berkeley Public Health Division is one of three city-operated local health jurisdictions in California, and has been dedicated to improving the health and wellness of its residents for over 130 years. Berkeley is considered a healthy community overall. Residents generally live long and live well; they eat well, exercise regularly, are well educated, and enjoy a high standard of living. More than 60% of Berkeley adults are of healthy weight, meeting the City's Healthy People 2020 National Objective. However, obesity is not evenly distributed in Berkeley, and significant health inequities are correlated with factors such as race/ethnicity, income, housing, and education. For instance, African Americans and those with lower levels of education have rates of obesity greater than 60% and African Americans living in Berkeley's impoverished South and West neighborhoods have a higher rate of diet-related chronic diseases than residents of other neighborhoods. Understanding patterns of nutrition, physical activity, and obesity allows us to intervene early to create and affect healthy habits and healthy environments. The City of Berkeley Public Health Division and the Health, Housing and Community Services (HHCS) Department recognize health inequities as a priority.

Poverty and Food Environment

According to the 2011–2015 American Community Survey (ACS), 20.4% of Berkeley's population is living below the poverty level, of which 23.5% are living in less than 125% of the poverty level. A quarter of those Berkeley families living under the Federal Poverty Level are headed by single females. Among seniors, 7.9% live under the Federal Poverty Level.

The 2013 Berkeley Health Status Report noted that over one third of Berkeley's African American children live in poverty and children living in poverty are concentrated in South and West Berkeley. Poverty among African American youth is more than double the rate among all Berkeley youth and nearly 7 times the rate among White children. Twenty percent of Berkeley Latino children live in poverty. This is 4 times the rate among white children. African Americans are least likely to have a college degree or higher and Latinos are the least likely to have graduated from high school. Based on the 2011–2015

[1] U.S. Census Bureau (2015) https://www.census.gov/quickfacts/table/PST045215/0606000

ACS data 1,763 (1.6%) households were receiving food stamps/SNAP, while 43,911 (39%) food stamp/SNAP-eligible households were not and 28.1% of children under 18 years were living in households with Supplemental Security Income, cash public assistance income, or Food Stamp/SNAP benefits.

The City of Berkeley has a wide array of food delivery and pantry services providing emergency food and groceries to families in need such as:

a. The Berkeley Food Pantry provides monthly emergency groceries to Berkeley and Albany families and individuals in need.

b. Berkeley Food and Housing Project offering free community meals.

c. The Dorothy Day House providing nutritional support, emergency winter shelter and other services to Berkeley's homeless and very low-income residents.

d. The Berkeley Food Network organizing a network of food pantries, emergency grocery services for the homeless and low-income families in Berkeley.

Schools, Youth Obesity Rates, and Nutrition and Physical Activity Behaviors

There are significant rates of child poverty; Based on the Free and Reduced Meal (FRPM) data, of the 19 schools within BSUD, 15 (78.9%) are SNAP-eligible. According to the 2013 Berkeley Health Status Report, 29% percent of Berkeley Unified School District (BUSD) students are overweight or obese and this percentage is higher in African American and Latino children than in other racial/ethnic groups. Among BUSD 9th graders, over 40% are overweight. In 2011, only 20% of Berkeley 9th graders passed national aerobic fitness testing with BUSD students lagging significantly behind students in Alameda County and California in aerobic fitness. Obese or overweight children are less healthy than their peers of normal weight and they are at higher probability for chronic diseases such as high blood pressure, Type 2 diabetes, heart disease, stroke, arthritis, respiratory problems and some types of cancer in the future. Children who are overweight or obese often grow up to be obese as adults.[2]

City of Berkeley's Nutrition-Related Programs

Throughout the City of Berkeley, collaborative efforts are under way to address the health and behavioral disparities related to obesity prevention. These efforts include partnerships with the following nutrition related programs with the department shared by the SNAP-Ed Program:

[2] Serdula MK, Ivery D, Coates RJ, Freedman DS, Williamson DF, Byers T. Do obese children become obese adults? A review of the literature. Prev Med. 1993;22:167- 177.

City of Berkeley Department of Health, Housing and Community Services

a. Berkeley Black Infant Health (BBIH) Program

This program aims to improve birth outcomes and health for African American mothers and their babies and to reduce disparities by empowering pregnant and mothering African American women to make healthy choices for themselves, their families, and their communities. BIH clients participate in a curriculum based group intervention (10 prenatal; 10 postpartum sessions) designed to encourage and support a healthy pregnancy and women's health, build parenting and life skills, increase social support, and provide community/family education about current health issues. Participants build skills in navigating social service systems to improve health care access, goal setting, and self-improvement techniques. In addition to the weekly education and social support groups, case management and resource linkages ensure that clients are connected with the appropriate community and social services to meet their needs. The SNAP-Ed Program has conducted and will continue to conduct nutrition education classes for adults and parents of children ages 0-5 years at the BBIH service programs.

b. Healthy Berkeley Program

The Healthy Berkeley Program (formerly the Sugar Sweetened Beverage Program) oversees the implementation of the City's groundbreaking tax on the distribution of sugary beverages in Berkeley and the distribution of the funding allocations to support community- and school-based strategies for reducing the consumption of sugar-sweetened beverages and raising awareness about the harmful health impacts of sugar-sweetened beverages in children, youth, and adults in Berkeley. The City's strategies for reducing the consumption of sugar-sweetened beverages and its impact on type 2 diabetes, obesity, and tooth decay in Berkeley include taxation on sugary beverages, establishing a panel of experts commission, fund community-based and school-based initiatives that promote healthy beverage choices and reduce sugary beverage consumption, promote public education on the harmful health impacts of sugary beverages on health and serve as resource for other jurisdictions. Partnership between the Healthy Berkeley and the SNAP-Ed Programs offer a natural synergy of objectives i.e. to improve and promote healthy choices in food and beverage consumption among the target populations. The two programs both involve youth outreach work that offers fertile ground for coordination. Collaborative activities will include coordinating direct education in at least one school and indirect education at community events such as Juneteenth and Harvest of the Month where SNAP-Ed currently conducts youth outreach. This partnership will also involve youth from both programs in conducting an assessment of accessibility and availability of healthy food and beverages in at least one SNAP-Ed qualifying site and developing an intervention plan.

c. Heart to Heart

Heart to Heart (H2H) uses a holistic, community-based approach to addressing health inequities in Berkeley. The program focuses on preventing high blood pressure and heart disease in South Berkeley. H2H serves to bridge community, programs, resources, and services that are necessary to address the needs of community members. In partnership with LifeLong Medical Care and other community organizations, H2H engages community members in accessing resources, assets, and information to promote healthier living in selected South Berkeley neighborhoods. Currently, the SNAP-Ed and H2H

Programs are collaborating through the Mobile Van hypertension prevention services and providing indirect education to improve and promote healthy choices in food and beverage consumption at community health fairs in West and South Berkeley neighborhoods. The proposed activities in this three-year integrated work plan will offer ongoing opportunities for the two programs to support each other in the City's outreach efforts to the low-income neighborhood in Berkeley.

d. The Child Health and Disability Prevention Program (CHDP)

The Child Health and Disability Prevention Program (CHDP) provide health care and periodic preventive health assessments to California children in low-income families. Eligible children include all Medi-Cal recipients through age 20 and other low-income eligible children up to 19 years of age. As part of routine assessments, physicians monitor childhood physical development and indicators of anemia. Partnering with CHDP links the SNAP-Ed Program to parents as does the partnership with Berkeley Black Infant Health (see above). Given the relevance of working with parents, the SNAP-Ed Program will explore future partnerships with the Child Health and Disability Prevention Program to reach more parents in providing nutrition education for families.

Inter-Departmental Collaborations:

a. City of Berkeley, Aging Services Division

The Aging Services Division promotes a dignified, healthful quality of life for older adults by offering connections to services & resources to learn, grow, and discover new ways to be actively engaged in living. Through two vibrant senior centers and a multi-resource center, their programs touch the lives of older adults each year by serving as a resource for recreation, group meals, health & wellness education and other supportive services for adults 55 and older in the City of Berkeley. The SNAP-Ed Program offers healthy food and beverage promotion through direct education presentations to SNAP-Ed eligible seniors at the centers and tables at the Annual Senior Center Health Fairs providing indirect education.

b. City of Berkeley, Parks and Recreational Department

The goal of the Parks and Recreational Department is to provide quality parks, recreation and waterfront facilities. The department is committed to administering excellent recreation programs at the City's community centers, camps, marina and parks while continuing to develop new programs that fulfill the City's 2020 Vision. The Recreation Division offers a variety of programs and classes for all ages ranging from Tots and Pre-K to the teens After Spot, youth and adult sports, summer camps, and adult fitness. The City of Berkeley also has 52 treasured parks located throughout the City that include athletic fields, swimming pools, tennis courts, basketball courts, skate park, community centers, Berkeley Marina and much more. The SNAP-Ed Program currently provides after school nutrition education and physical activity promotion at one of the Parks and Recreational sites.

There are programmatic synergies between the partners and the SNAP-Ed Program that can be harnessed to leverage activities and outreach efforts in the Berkeley community. The SNAP-Ed Program proposes to assess existing partnerships to identify creative ways to leverage the outcome and increase the collective impact of the programs.

4. **Community Assessment**

The information provided in this three year integrated work plan stems primarily from the 2013 City of Berkeley Health status Report, internal strategic planning discussions with the Public Health Division, as well as findings from past Community of Excellence surveys in 2012. The 2013 City of Berkeley Health Status Report includes data from Department of Social Services CalFresh Annual Trends data; the California Health Interview Survey; Feeding American's Map the Food Gap; and Food Insecurity in the City of Berkeley.

In 2012, the City of Berkeley conducted and completed a Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (Cx3) assessment in three low-income neighborhoods, namely: Downtown Berkeley, Martin Luther King Jr. Way Neighborhood (Northeast Berkeley), and South Berkeley (Heart-to-Heart Neighborhood). These neighborhoods were selected based on CX3 Neighborhood Selection requirements published by the California Department of Public Health. Each of the three neighborhoods listed face considerable barriers to the consumption of and access to healthy food and beverages by the residents who live there. It should be noted, however, that Downtown Berkeley neighborhood is influenced by a large commercial setting with a population that is influenced largely by transient college and university students living in an around University of California's Berkeley campus.

According to the City of Berkeley Health Status Report in 2013, however, Berkeley's population most affected by health, education, employment, and income disparities reside disproportionately in South and West Berkeley neighborhoods.

While the City of Berkeley is fortunate to have considerable public and community support, as evidenced in part by the passage of the nation's first Sugar Sweetened Beverage Tax, providing for opportunities to leverage SNAP-Ed work related to nutrition and physical activity education and enhance community policy, systems, and environment (PSE) changes that support healthy lifestyles will help to ensure that nutrition and physical activity interventions reach the populations in greatest need.

5. **Community Change Goals**

According to the 2014 Health Status Report, the Public Health Division and the Health, Housing and Community Services Department in Berkeley recognize health inequities as a priority.[3] Health Inequities are defined as "differences in health which are not only unnecessary and avoidable but, in addition, are unfair and unjust." Health inequities in Berkeley occur in consistent patterns by geography, race/ethnicity, and income and education. Public Health defines health broadly, to include personal and community well-being. Health through this lens is influenced by much more than health care. While the full breadth and depth of the underlying social determinants of health are beyond the control of any single program or agency, the City is committed to addressing and eliminating health inequities.

[3] http://www.ci.berkeley.ca.us/uploadedFiles/Health_Human_Services/Level_3_-_Public_Health/BerkeleyHealthSummary_online_FINAL.pdf

The Citywide goal of addressing health inequities will incorporate a broad range of services under the following 10 Essential Services of Public Health[4] developed by a national body of public health leaders:

1. Monitor health status to identify and solve community health problems.
2. Diagnose and investigate health problems and health hazards in the community.
3. Inform, educate, and empower people about health issues.
4. Mobilize community partnerships and action to identify and solve health problems.
5. Develop policies and plans that support individual and community health efforts.
6. Enforce laws and regulations that protect health and ensure safety.
7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.
8. Assure competent public and personal health care workforce.
9. Evaluate effectiveness, accessibility, and quality of personal and population-based health services.
10. Research for new insights and innovative solutions to health problems.

Healthy eating and physical fitness have been identified as top priorities in the City of Berkeley, particularly for low-income Latino and African American adults and children, based on the health disparities noted above under demographics. Efforts in FFY 2017–2019 will therefore also focus on providing best-practice nutrition education and PSE changes to support the sustainability of these educational efforts.

We recognize that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. The LHD (City of Berkeley Department of Health, Housing & Community Services) is committed to contributing to pieces of these larger community goals-based on agency expertise and SNAP-Ed allow ability.

Berkeley SNAP-Ed Program Goal:

[4] https://www.cdc.gov/nphpsp/essentialservices.html

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

City of Berkeley **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 8/9/2017**

This work plan particularly focuses on areas of activities that address health inequities using the essential services numbers 3, 4, 5, 8, and 9 as they relate to:

- Inform, educate, and empower people about healthy eating and active living.
- Mobilize community partnerships and action to identify and solve health problems related to healthy food access, healthy food environments, youth engagements, and healthy eating. These include collaboration within the city and our Alameda County SNAP-Ed partners.
- Develop policies and plans that support individual and community health efforts through partnerships and technical assistance.
- Assure competent public and personal health care workforce by conducting SNAP-Ed staff training and evaluation.
- Evaluate effectiveness, accessibility, and quality of personal and population-based health services through CX3 assessment, PEARS, and process evaluation.

In support of these broader goals, the LHD has determined based on the larger community change goals, to set three SMART local objectives for FFY 2017–2019

1. By September 30, 2019, increase healthy food and beverage consumption using a youth engagement strategy to provide education, conduct assessment and develop an intervention plan to increase healthy food and beverage access reaching at least 535 SNAP-Ed eligible youth through direct and at least 750 through indirect education in at least 1 SNAP-Ed qualifying youth school or youth center.

2. By September 30, 2019, increase promotion of healthy foods and decrease unhealthy food and beverages in South/West Berkeley by coordinating environmental changes in at least 1 SNAP-Ed qualifying retail store, and providing at least 2 indirect nutrition education per year including 2 taste testing or food demonstrations.

3. By September 30, 2019, increase promotion of healthy food and beverages by conducting education to at least 170 SNAP-Ed eligible adults/seniors through direct and at least 245 through indirect education and partnering with 2 SNAP-Ed eligible community agencies to establish at least one healthy food and beverage standard.

Given that the City of Berkeley is its own jurisdiction within a larger county (Alameda County), the City of Berkeley Department of Health, Housing & Community Services will work on the two local objectives listed above with the support and collaboration with other programs/agencies/entities that may or may not receive SNAP-Ed funding working within its population reach and area of expertise. Through these collaborations, the City will seek committed partners in achieving our community change goals through nutrition education, coalition building, training support and technical assistance. Some of the community change goal work will require additional funding to support capital improvements and policy advocacy, but the SNAP-Ed contribution will remain exclusive to SNAP-Ed eligible populations and allowable activities. Direct education is the foundation of SNAP-Ed. Berkeley SNAP-

Ed will provide nutrition and physical activity education throughout the three-year program, as well as create or coordinate supports for policy, systems and environmental changes. For example, in working with retailers in approved census tracts, Berkeley SNAP-Ed could provide technical assistance to store owners on healthy retail, provide cooking demonstrations and conduct direct/indirect education to customers and staff, and conduct evaluation to inform a healthier retail environment.

These objectives allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus on the following PSE strategies:

- Youth Engagement
- Healthy Food and Beverage Standards
- Healthy Retail Environment

The PSE strategies are detailed within each three-year objective, and speak to the connection to our community change goals.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

a. Berkeley Food Network

Berkeley Food Network (BFN) is a collaborative of Berkeley food pantries and emergency grocery services for the homeless and low-income families in Berkeley. The Berkeley SNAP-Ed staff participates in BFN's network meetings with food delivery, pantries and grocery services for Berkeley's low-income, SNAP-Ed eligible families and the homeless populations. SNAP-Ed Program will partner with BFN to provide direct education and establish healthy food and beverage standards.

b. County Nutrition Action Plan (CNAP)

The County Nutrition Action Plan (CNAP) Workgroup includes both Food and Nutrition (FNS) funded and unfunded partners serving SNAP-Ed eligible populations. The workgroup is coordinated by DHS staff and is chaired by SNAP-Ed funded partners. CNAP workgroups help coordinate and leverage nutrition messages, education, and services between USDA FNS partners in the County in order to maximize resources and outcomes for the priority groups (low resource Californians at or below 185% federal poverty level) served by these programs. In FFY 2015, the CNAP Workgroup selected Healthy Retail as its priority strategy through FFY 2016.

c. Bay Area Nutrition and Physical Activity Collaborative (BANPAC)

Bay Area Nutrition and Physical Activity Collaborative is a regional collaborative of over 250 health-related organizations dedicated to empowering communities to make system and environmental change to support better nutrition, physical activity and increased access to healthy foods. BANPAC uses the collective expertise and influence of its member organizations to facilitate system or environmental change that shape nutrition and physical activity behaviors. BANPAC works through nutrition education initiatives to address health inequities in the bay area and to improve nutrition, physical-activity behaviors, and increased access to healthy foods among low-income residents, their families, and other community members. Berkeley SNAP-Ed Program participates in the monthly BANPAC meetings and will assess ways to leverage our collaboration.

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017–2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

The City of Berkeley reviewed the approved integrated curriculum list provided but the state agencies, and reviewed each different piece to determine the best option for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population, as well as our chosen SNAP-Ed three-year and annual objectives. Most of our chosen curriculum is geared towards school-based settings, parks and recreational centers, senior services centers, and neighborhood stores that serve SNAP-Ed eligible communities. These resources and curricula have been identified within the work plan under section C.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agency (LHD) in the City of Berkeley will provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with partners throughout the county. The agency will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change. The LHD will conduct activities at all levels of the Social Ecological Model. In addition to education, the work will include staff and partner training, environmental changes based on site and community assessments, and policy changes. They will incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venues; address Training and Technical Assistance of their personnel or the community. Additionally, the LHD will provide Community/Nutrition Education Direct, Community/Nutrition Education Indirect, Media, Social Media, Public Relations and Messaging, and Coordination and Collaboration with their service populations.

The LHD will employpractice-based interventions and research-based interventions. The objectives and activities for the integrated work plan were derived from results obtained via the agency's community assessments, including current partnerships in addition to the data used in FFY15. Given that the City of Berkeley is responsible for its own jurisdiction, the LHD created the Work Plan so that objectives and activities will be done based on its experience and expertise to successfully complete the Work Plan Objectives.

The chosen objectives will include community engagement strategies for all SNAP-Ed eligible populations in the City of Berkeley. Community Engagement activities may include youth engagement activities (with specific attention paid to middle and high school students and the use of the Youth Participatory Action Research (YPAR) model), and increased opportunities for physical activity and affordable healthy food access to support positive behavior change There are opportunities for youth, adult, family, and senior engagement throughout the work plan activities. The LHD will use CX3 tools

to engage the community. The CX3 tools will be used to bring in youth, adults, and corner store owners to assess their environments. The specific residents chosen for these activities will depend on individual need, opportunity and interest. The CX3 tools will be used to train the public in participating in action research, allow residents to be a part of the change in their community, and hopefully encourage and create a new generation of community health champions and leaders.

Evaluation processes will be used to assess and improve services for all local objectives. The LHD will use formative,, process and impact/outcome evaluations to determine effectiveness. For example, participants in SNAP-Ed eligible activities may complete a pre and post survey that addresses MyPlate Behaviors (MT1), Shopping Behaviors (MT2) and Food Security (LT6) indicators included in the Western Region's SNAP-Ed Evaluation Framework. We will be using multiple indicators from the National SNAP-Ed Evaluation Framework. On the Individual Level, we will be looking at are My Plate knowledge shopping knowledge and intentions, and physical activity goals. In the Sectors of Influence indicators, we will be looking at community partnerships, capacity building, and education. On Social/Cultural Norms and Values indicators, we will be looking at the family meals, obesity prevention beliefs and physical activity norms.

To achieve these changes, the City of Berkeley SNAP-Ed program has established the following three objectives :

1. By September 30, 2019, increase healthy food and beverage consumption using a youth engagement strategy to provide education, conduct assessment and develop an intervention plan to increase healthy food and beverage access reaching at least 535 SNAP-Ed eligible youth through direct and at least 750 through indirect education in at least 1 youth school or youth center.

2. By September 30, 2019, increase promotion of healthy foods and decrease unhealthy food and beverages in South/West Berkeley by coordinating environmental changes in at least 1 retail store, and providing at least 2 indirect nutrition education per year including 2 taste testing or food demonstrations.

3. By September 30, 2019, increase promotion of healthy food and beverages by conducting education to at least 170 SNAP-Ed eligible adults/seniors through direct and at least 245 through indirect education and partnering with 2 SNAP-Ed eligible community agencies to establish at least one healthy food and beverage standard

Program delivery sites include but are not limited to SNAP-Ed eligible sites including retail in target neighborhoods, senior centers and housing, Parks and Recreational Departments sites in target neighborhoods, and middle schools.

City of Berkeley

Three-Year Integrated Work Plan FFY 2017–2019

Rev. 8/9/2017

Based on the 2013 Health Status report and the monitoring and evaluation assessment conducted by the California Department of Public Health, Berkeley's SNAP-Ed Program proposes to focus our next Cx3 assessment in South and West Berkeley starting in FFY2018 in two SNAP-Ed neighborhoods. Narrowing efforts to two neighborhoods will allow the Berkeley team to maximize our limited staff time to implement an array of program activities such as corner markets to provide healthier food options to community members; nutrition education and physical activity promotion to Berkeley youth, adults and seniors; and initiate staff training and monitoring efforts.

In the revised 2017–2019 work plan, we anticipate: a) strengthening our partnershipsto establish a collaborative youth engagement intervention leading toward adoption a healthy food and beverage intervention to aid in the promotion of nutrition; b) making positive changes in the food environment in a low-income neighborhood through the neighborhood corner store project to promote greater access to healthy fruit, vegetables and beverages; c) strengthening partnerships to develop healthy food standards and education in food delivery sites; d) participating in the Alameda County Nutrition Action Plan (CNAP) workgroup and the Bay Area Nutrition and Physical Activity Collaborative (BANPAC) Leadership Council to impact healthy food and beverage actions; and e) to enhance staff capacity within the Nutrition team through staff training and monitoring and train-the-trainer workshops for more effective and accurate delivery of nutrition education based on the recommendations in the American Dietary Guidelines and ensure SNAP-Ed program curriculum fidelity.

SECTION B: Target Audience Description

Three-Year
Integrated Work Plan (Revised)
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, increase healthy food and beverage consumption using a youth engagement strategy to provide education, conduct assessment and develop an intervention plan to increase healthy food and beverage access reaching at least 535 SNAP-Ed eligible youth through direct and 750 through indirect education in at least 1 youth school or youth center.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

Youth Engagement
Healthy Food and Beverage Standards

III. Annual Objectives to Support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, provide nutrition education to at least 120 low-income SNAP-Ed eligible youth through direct and at least 200 through indirect education in after school and summer education programs in Berkeley.

b. By September 30, 2017, conduct at least 2 SNAP-Ed staff trainings on SNAP-Ed approved youth engagement and educational tools such as those in Youth-led Participatory Action Research (YPAR).
c. By September 30, 2017, identify at least one partner among the Healthy Berkeley-funded programs to develop a strategy using a youth engagement model to improve access to and raise awareness of healthy food and beverages.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, provide nutrition education and physical activity promotion to at least 175 low-income SNAP-Ed eligible youth through direct and at least 250 through indirect education in after school and summer education programs in Berkeley.
   b. By September 30, 2018, the City of Berkeley SNAP-Ed will build on existing partnerships to recruit youth advocates and train them in conducting environmental assessments around healthy food and beverage availability and accessibility.
   c. By September 30, 2018, conduct an assessment in collaboration with Healthy Berkeley Program community agency partners identified in the previous year, to promote healthy food and beverages in at least one youth center or school selected by the youth.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, provide nutrition education and promotion to at least 240 low-income SNAP-Ed eligible youth through direct and at least 300 through indirect education in after school and summer education programs in Berkeley.
   b. By September 30, 2019, continue to work with Healthy Berkeley program partners to to implement youth engagement strategies and develop 2 PSE changes at qualified site(s)to increase availability and accessibility to clean tap water and reduce availability of sugary beverages in at least one Parks and Recreation and/or school setting.
   c. By September 30, 2019, share results from the assessment of public drinking water sources including filling-stations, and develop a policy recommendation for promoting healthy food and beverages.

Three-Year
Integrated Work Plan (Revised)
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 20, 2017, at least two SNAP-Ed Program staff members will participate in Communities of Excellent in Nutrition, Physical Activity and Obesity Prevention (Cx3) Assessment training[5].
    b. By September 30, 2017, work with partners to identify questions and assessment tools such as and intercept survey.
    c. By September 30, 2017, identify educational and promotional resources for target retail environments and population.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, begin the Cx3 Assessment[6] to capture and communicate in-depth data on at least 2 Berkeley neighborhoods' (West and South Berkeley) nutrition environment to promote healthier communities.
    b. By September 30, 2018, continue working with partners to build partnership with at least 1 corner store in a South/West Berkeley to promote access to healthy food and beverages and implement the intercept survey.
    c. By September 30, 2018, provide healthy food and beverage merchandizing materials, and conduct at least 2 indirect education at 1 qualifying retail site and conduct the intercept survey.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, at least one corner store in South/West Berkeley neighborhoods will apply at least 2-3 physical, environmental, or systems (PSE) changes to increases access to and/or promotion of healthy foods and beverages.
    b. By September 30, 2019, identify at least one additional corner store in a South/West Berkeley to promote access to healthy food and beverages and implement the intercept survey.
    c. By September 30, 2019, provide healthy food and beverage merchandizing materials, and conduct at least 2 indirect education at 1 qualifying retail site and conduct the intercept survey.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

City of Berkeley

Three-Year
Integrated Work Plan (Revised)
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase promotion of healthy food and beverages by conducting education to at least 170 SNAP-Ed eligible adults/seniors through direct and at least 245 through indirect education and partnering with 2 SNAP-Ed eligible community agencies to establish at least one healthy food and beverage standard.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

IV. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy food and beverage standard.
- Explore feasibility of proposing an environmental changes and/or policy change to improve healthy food and beverage choices.

V. Annual Objectives to Support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, provide nutrition education and promotion to at least 35 low-income SNAP-Ed eligible adults/senior through direct and at least 50 through indirect education in at least 1 Berkeley senior center, community agencies serving low-income adults and/or in temporary shelter in Berkeley.

b. By September 30, 2017, establish relationships with one food distribution partner to secure new food distribution sites for older adults and families at a community based site.
c. By September 30, 2018, conduct at least 1 community event to promote healthy food and beverages to reach 50 individuals in SNAP-Ed eligible neighborhoods.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, provide nutrition education and promotion to at least 55 low-income SNAP-Ed eligible adults/senior through direct and at least 80 through indirect education in at least 1 Berkeley senior center, community agencies serving low-income adults and/or in temporary shelter in Berkeley.
   b. September 30, 2018, collaborate with food distribution partners and provide technical assistance and training in healthy food and beverage standards.
   c. By September 30, 2018, conduct at least 2 media or community events to promote healthy food and beverages to reach 100 individuals in SNAP-Ed eligible neighborhoods.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, provide nutrition education and promotion to at least 80 low-income SNAP-Ed eligible adults/senior through direct and at least 115 through indirect education in at least 1 Berkeley senior center, community agencies serving low-income adults and/or in temporary shelter in Berkeley.
   b. September 30, 2019, develop and implement healthy food and beverage standards in at least one food distribution site.
   c. By September 30, 2019, conduct at least 2 media or community events to promote healthy food and beverages to reach 125 individuals in SNAP-Ed eligible neighborhoods.

Butte County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

County Name: Butte County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: Butte County Cooperative Extension
X	California Department of Public Health: CDPH: Butte County Public Health Department
X	California Department of Aging: CDA: (Area Agency on Aging: CSU, Chico Research Foundation)
X	Catholic Charities of California: CCC: Northern Valley Catholic Social Services

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Geographically, Butte County is largely rural with most of the residents concentrated in one of the five incorporated towns or cities: Biggs, Chico, Gridley, Oroville, or Paradise. It is the largest county north of Sacramento, with a population of 224,241 people. Of this population, 84,983 (39.5%) are SNAP-Ed eligible at less than 185% of the Federal Poverty level. The primary language in the county is English.

Butte County is an agricultural area, with thousands of acres under cultivation. The main food crops grown are almonds, walnuts, rice, prunes, peaches, kiwis, olives and citrus. There are two year-round Farmers Markets in Chico and seasonal Farmers Markets in Oroville, Paradise and Gridley.

The ethnic make-up of Butte County residents is 68% White, 19% Hispanic, 3% Asian, 1% African-American, and 1% American Indian/Alaska Native. Census data estimates that 20.4% of the population lives below the federal poverty level, compared with 15.9% for California as a whole.

Butte County is estimated by CDA to have about 57,974 seniors (60 years or older). It is one of 12 counties that is projected to have 150-199.9% increase in its senior population from 1990 to 2020. According to Butte SNAP-Ed 2015 County profile, 27% of 65 years and older are SNAP-Ed eligible.

Based on the SNAP-Ed County Profiles for 2015, 68% of SNAP-Ed adults are overweight/obese and 25% are obese. Local data from the Butte County WIC program show that 43% of 2-5 year olds enrolled in WIC are overweight or obese. Data from the Pediatric Nutrition Surveillance System (PedNSS) show that approximately 40% of low-income Butte County school-age children enrolled in the CHDP program are overweight or obese.

Data from Butte County school districts show that Gridley, Oroville, Palermo and Thermalito (all South County) have the highest percentage of overweight/obese children. Out of all 9th graders, Hispanic students have the lowest percent (31.3%) meeting all fitness standards. Less than one quarter of children report at least one hour daily of physical activity.

California Health Interview Survey (CHIS) data show that many Butte County children eat fast food at least twice a week. This is particularly true for Hispanics. Majority of teens drink soda/sugary beverages daily, and a great majority of teens, particularly Whites, don't eat 5 servings of fruits/vegetables a day. Approximately one third of children reported eating fast food at least twice in the last week. Over half of all teens reported having 1 or more servings of soda or sugary drinks yesterday. Almost 85% of teens reported having less than 5 servings of fruits and vegetables yesterday.

The food environment contributes to the problem. Seven percent of Butte County children have limited access to healthy food (they are low-income and do not live close to a grocery store), compared to 3% for California. In addition, 54% of all restaurants in Butte County are fast food restaurants, compared to 48% for California.

4. Community Assessment

This FFY 17-19 Integrated Work Plan was developed using information listed in the jurisdiction section, County Health Rankings, CX3 community assessment results, Butte County Community Health Assessment and Community Health Improvement Plan (2015), and experience gained from the Local Implementing Agencies (LIAs) providing SNAP-Ed nutrition interventions for several years in Butte County. Specific examples are below.

County Health Rankings and Roadmaps

Butte County ranked 38th out of 57 California counties in overall health outcomes of our residents in the 2016 County Health Rankings compiled by the Robert Wood Johnson Foundation. Twenty-five percent (25%) of Butte County adults are obese (25%) versus 23% of Californians. Ten percent (10%) of Butte County adults have diabetes, the same as for Californians as a whole. The Butte County population is older than California as a whole, 17% versus 12.9% are age 65 or older. The Butte County population is largely Non-Hispanic White (73.5%) compared with 38.5% for California. The median household income for Butte County residents is $42,300, considerably lower than for California overall at $61,900. Seven percent of Butte County residents have limited access to healthy foods, versus 3% of Californians. The percent of Butte County residents who are physically inactive is 18%, similar to 17% of Californians as a whole.

CX3 Assessment

Our CX3 assessment (2014) took a ground-level look at three neighborhoods in Oroville (Las Plumas, Southside and Thermalito). (The community of Gridley had been assessed previously in 2013.) In all three neighborhoods over half of the population is at or below 185% federal poverty level, and 0% of the population lives within ½ mile of a supermarket or large grocery store. Common issues were identified in all of the neighborhoods: fresh, affordable, and accessible foods are not available in many areas of this community as well as convenient public transit to local grocery stores and supermarkets does not exist. Findings on the physical activity environments that were surveyed varied, but results indicate that all three neighborhoods have a lack of sidewalks and other infrastructure challenges that would make walking and other physical activity viable. In addition, there were also concerns about safety. These issues are contributing risk factors for serious and/or chronic health conditions.

Community input on the CX3 data showed some support for 1) working with small stores in the neighborhoods to improve their offering of healthier food items, and higher levels of support for 2) establishing community gardens, 3) supporting local and regional food systems and 4) connecting local food to retail. Community feedback on the physical activity environment in these neighborhoods showed the highest levels of support were for 1) implementing a Safe Routes to Schools program to improve safety and promote walking and biking to school, and 2) promoting the overall community aesthetic and atmosphere of safety to encourage outdoor physical activity and recreation.

For Gridley area residents, the high cost of healthy foods and neighborhood safety in outdoor play spaces were top concerns. Community leaders in Gridley prioritized working with local community gardens, and supporting local food systems.

Butte County Community Health Assessment

A county-wide Community Health Assessment was spear-headed by Butte County Public Health in 2015. Community input was sought through focus groups, surveys, and other methods. The top three health topics selected as strategic priorities to be addressed in the Community Health Improvement Plan were 1) substance abuse, 2) chronic disease, and 3) socio-economic factors.

Obesity was considered one of the top three health issues facing Butte County by 22.3% of survey respondents. Over half of Butte County adults are overweight or obese, and over 40% of 5-19 year olds are overweight/obese. The childhood obesity rate in Butte County is lower than that for California overall; however, the childhood obesity rate is higher in certain population groups, such as African American/Black, Asian, and Hispanic Latino children in Butte County than in California as a whole. The underlying factors leading to differences in childhood obesity rates among racial/ethnic groups can likely be attributed to socioeconomic status (SES), culture, environment, some biological factors, and how these factors are interrelated.

Senior Needs Assessment

According to the SNAP-Ed 2015 County profiles, there are 15,624 documented (65 years and older) who are SNAP-Ed eligible in PSA 3 counties, which include Butte, Colusa, Glenn, Tehama, and Plumas. Residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. The aging of the population is particularly noticeable in PSA 3, where the senior population is already a significant portion of the total population and is continuously growing. Butte County is estimated by CDA to have about 57,974 seniors (60 years or older). It is one of 12 counties that are projected to have 150-199.9% increase in its senior population from 1990 to 2020.

A needs assessment was conducted in FFY14 by the Center for Healthy Communities for each SNAP-Ed eligible Senior Center in FFY14. The assessments identified the needs and opportunities necessary to enhance nutrition education, physical activity, and food security of CalFresh-participating and/or eligible seniors at congregate meal sites. Gaps in services provided to the seniors in the counties assessed were also determined. Possible areas to improve on, as identified by the site assessments and the site supervisor were the: 1) provision of support for increased physical activity; 2) provision of additional nutrition education; and 3) increase in reach to low income seniors. In Butte County, the focal points will be on 1) developing a system to provide constant nutrition and physical activity information to seniors, to encourage them to eat healthy and live actively, and 2) increasing access to healthy food and beverages. These interventions are essential, as the 2015 Butte County Congregate Meal site nutrition assessment showed that 32.1% of the senior population was considered to be in the high nutritional risk group and 28.7% were in moderate nutrition risk group. The assessment also showed that 51% ate fewer than two servings of fruits or vegetable per day and 18% did not always have enough money to buy the food he/she needed.

Butte County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Current Nutrition Education and Physical Activity Promotion Efforts

Nutrition education and physical activity promotion is currently being provided at 10 preschools by Butte County Office of Education, a subcontractor of the Butte County Public Health Department (BCPHD). Educational materials are offered to all elementary schools by UC CalFresh, and 12 schools are actively participating. Intensified efforts are provided at three schools through the “Shaping Healthy Choices” program piloted by UC Davis. Middle schools and high schools receive nutrition education and physical activity promotion, as well as youth engagement activities, provided by the Center for Healthy Communities (CHC), a subcontractor of BCPHD.

CHC also receives funding from the California Department of Food and Agriculture (CDFA) to deliver Harvest of the Month tastings with produce that is purchased from local farms, Farmer of the Month educational newsletters and videos, and nutrition education information including recipes. Teachers in the program also receive a monthly email which contains nutrition education information and resources. In addition to teachers, the school Nutrition Services staff also receive monthly tastings, emails and technical assistance to support local procurement. Butte County schools receiving this program for K - 6 grade include Paradise Unified School District, Oroville Elementary School District, Palermo Union School district, Thermalito Union School District, Biggs Elementary School District, Gridley Unified School District, Blue Oak Charter School, Sherwood Montessori Charter School and Chico Country Day School. The current funding for this activity ends 6/30/16. BCPHD intends to begin providing Harvest of the Month materials to some south county schools as part of a planned Farm-to-Fork effort in FFY 17-19.

CHC’s Farmers' Market SNAP Support Grant (FMSSG), funded by the USDA for 3 years – with the first year in Butte County in partnership with 5 farmers' markets - 2 in Chico, 2 in Paradise, and 1 in Oroville. This grant aims to *increase EBT participation in North Valley Farmers’ Markets* by developing and implementing a SNAP outreach and marketing campaign, purchasing CalFresh EBT signage and other supplies, training farmers' market staff on SNAPbenefits and program strategies, hosting farmers’ market tours to promote EBT use at the market, and providing cooking demonstrations to promote fruit and vegetable consumption. The key goal of the farmers' market grant is to make sure that families and individuals who receive CalFresh benefits understand that they can "spend" them at farmers' markets to buy fish, eggs, meat, fresh vegetables and fruits, and other eligible items, including food-producing plant "starts" and seeds.

Northern Valley Catholic Social Service (NVCSS) conducts nutrition and physical education to adults and seniors in Chico, Paradise, and Oroville. Educational efforts include cooking demonstrations, food tasting demonstrations, food resource management classes, and physical activities to low income housing units, community resource centers, schools, churches and family resource centers. These classes were held in both single and series based sessions that focus on behavioral changes in reducing sugar consumption, and increasing physical activity along with fruit and vegetable consumption. NVCSS also provides, on an ongoing basis, the distribution of monthly newsletters and advertisements promoting the consumption of healthy foods and beverages, tips on food resource management, and recipes provided by the USDA. NVCSS also uses resources such as Facebook, Instagram, Google and other media sources to expand the overall presence and social awareness of the SNAP-ED program.

In addition to the services provided by BCPHD subcontractors, BCPHD provides direct education to adults at a variety of sites including libraries and Head Start parent meetings. PSE work has been the main focus of BCPHD and will remain so throughout the FFY17-19 years. BCPHD staff also facilitates monthly CNAP meetings in Oroville (Mobilize for Health) and Gridley Reaching Out for Wellness (GROW) groups. Meetings focus on collaboration and support of partners' goals and objectives, and support planning and implementation of community events such as Fruit and Veggie Fest and Food Day. Meetings also focus on support and implementation of policy, systems and environmental (PSE) change objectives. Limited direct education targeting the adult population will continue in FFY 17-19 with an emphasis placed on food preparation/resource management and physical activity; as well continued support and recruitment for the local CNAP groups.

One of our PSE objectives for Oroville has been to support Safe Routes to Schools (SRTS) programs. Butte County has received two SRTS grants focusing on the Las Plumas neighborhood. Infrastructure improvements have already been completed at one elementary school and improvements are scheduled to begin at a nearby high school and elementary schools. SNAP-Ed partners have collaborated to support these efforts by helping with walk/bike to school events, helping to establish a school garden, and hosting a Kids Farmers Market. We plan to continue supporting SRTS efforts in this neighborhood in the FFY 17-19 IWP.

Another PSE objective for Oroville has been to promote healthier options at small markets, one in each CX3 neighborhood. Although there has been some success in promoting healthy eating through use of in-store merchandising materials and Fruit and Veggie Fest events, small market owners have been reluctant to make any substantial changes that they perceive will impact their bottom line in a negative way. For the FFY 17-19 IWP we intend to continue a limited retail effort, but shift the focus more toward a Farm to Fork effort - making connections between local food growers and buyers, whether they be retail stores, schools or other venues. This is a strategy that was ranked highly by community members during the CX3 process.

PSE work in Gridley has been focused on supporting an existing community garden, and planning for an additional 2 gardens. For the FFY 17-19 IWP we plan to continue that support of those established gardens and offer technical assistance when needed. A greater emphasis in FFY 17-19 will be placed on increasing access and appeal to sustainable low-cost/no-cost recreational opportunities through park/worksite/community-based wellness programs and shared-use agreements in the cities of Oroville and Gridley.

5. **Community Change Goals**

Based on community health assessments, and considering the status of ongoing nutrition education and physical activity promotion efforts in Butte County, we have developed the following community change goals to increase the overall health and well-being of Butte County residents.

With our larger community partnerships (Mobilize for Health Oroville and Mobilize for Health Gridley), we have determined that these three areas of need are essential to increasing the overall health of Butte County. The Butte County Community Change Goals are the following:

1. By September 30, 2019, LIA partnership will assist a minimum of 4 qualifying school districts in Butte County with updating and/or implementation of their School Wellness Policies while improving the school environment to better support healthy eating and promote physical activity. Smarter Lunchrooms Movement, HOTM, assisting with local procurement, and other activities will be incorporated in the classroom and school cafeterias to achieve this outcome.
2. By September 30, 2019, increase access, consumption, and appeal for healthy fruits, vegetables, and beverages, with an emphasis on increasing availability to local produce at a minimum of 70 SNAP-Ed qualifying sites which may include, but are not limited to neighborhood retail stores, food pantries/food banks, senior centers/public housing facilities, schools, and community sites.
3. By September 30, 2019, increase access and appeal to physical activity at a minimum of 14 SNAP-Ed qualifying sites which may include, but are not limited to schools, recreational facilities, and community sites through education, stenciling, and/or policy change.

The following will be the focus areas as they relate to the Community Change Goals:

- school and community settings
- helping families
- social marketing
- live and learn portfolios

The Butte County PSE strategies which include: School Wellness, CX3, SRTS, Retail and Edible Farmers Markets will support these community change goals.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The CNAP in Butte County consists of two separate groups, each specific to an individual jurisdiction within the county. The CNAP groups include SNAP-Ed funded (BCPHD, UCCE, AAA, and CCC) and non-SNAP-Ed-funded interested partners working together to inspire and empower the county's diverse communities to pursue healthy eating and safe, active living. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, Work Training Centers, Farmworker Institute for Education and Leadership Development (F.I.E.L.D) programs, etc. The Butte County PSE strategies which include: School Wellness, Community/School Gardens, Farm-to-Fork, Structured Physical Activity/Safe Routes, Shared Use Agreements, Healthy Food/Beverage Standards and Edible Farmers Markets will support these community change goals.

Butte County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/22/2017**

The Gridley Reaching Out for Wellness (GROW) group is a collaborative effort of Gridley community members that meet monthly with the goal to increase holistic health within the Gridley/Biggs/Richvale area by bringing consistent awareness and increased access to healthy foods/physical activity through the Roots Community Gardens #1/#2, Farmer's Market, Community Events, Recreation Center Classes and Health/Nutrition Education.

The Oroville group (Mobilize for Health – Greater Oroville) is a partnership of funded and non-funded agencies that has focused on increasing appeal and access to fruits and vegetables through events such as Fruit and Veggie Fest and Food Day. The Oroville group has also collaborated on activities (school garden, Kids Farmers Market, walk-to-school days) at a Safe Routes to Schools grantee in south Oroville. FFY 2017-19 will have a concentrated effort/focus on the re-organization and development of the Oroville Area group through local recruitment and community goal planning.

LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc. Examples of funded and non-funded CNAP partners include, but are not limited to: Butte County Public Health Department; UC CalFresh; Expanded Food and Nutrition Education Program (EFNEP); California State University, Chico Center for Healthy Communities; Butte County Office of Education; AMPLA Health; Orchard Hospital; Gridley Chamber of Commerce; Feather River Recreation and Park District; City of Gridley Recreation Department; Women Infants & Children (WIC); Valley Oak Children's Services; Butte County Libraries; African American Family Cultural Center; Farmworker Institute of Education and Leadership Development (FIELD); local service groups; educational leaders; local religious groups; community gardeners – including several local garden clubs & the Butte County UC Master Gardeners.

Non SNAP-Ed funded, UC Expanded Food and Nutrition Education Program (EFNEP) is in five sites and assists limited-resource families with children, through series based, behaviorally focused nutrition education. Participants learn about healthier food consumption and meals and snacks, how to stretch their food dollar, reduce the risk of food-borne illnesses, and to be physically active. EFNEP also contributes to participants' personal development and the improvement of their family's diets and nutritional welfare. EFNEP is supported by the USDA's National Institute of Food and Agriculture (NIFA), Smith-Lever funds. The EFNEP adult program includes eight lessons and provides education through the Promotora Model. The effectiveness of these nutrition education lessons is evaluated by the changes in baseline questionnaires and post-intervention questionnaires (Food Behavior Checklist and 24-hour food recalls) which are completed by the participants. EFNEP youth participate in a series of educational lessons which focus on teaching them to eat healthier, increase physical activity as well as use their food dollar wisely. In addition, EFNEP also partners with community based organizations. Methods for program delivery include direct nutrition education in groups, training of volunteers to assist with direct education with adults and youth as well as the use of educational materials to complement other teaching methods. The AAA-PSA3 will collaborate with Glenn County LHD and other unfunded partners to provide comprehensive multi-level behavior focused strategies and interventions which include nutrition education, physical activity, training and technical assistance to SNAP-Ed eligible seniors and senior congregate meal sites to improve their health and well-being.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website and/or USDA approved UC Cal Fresh, California Department of Aging or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials List.

9. **Intervention and Evaluation Plan Narrative Summary**

Butte County has four state implementing agencies – UC Cal Fresh, LHD, AAA, and CCC. The Butte County Public Health Department (BCPHD) is subcontracting with California State University, Chico Research Foundation Center for Healthy Communities (CSUC), Butte County Office of Education (BCOE), and an evaluator. Catholic Charities of California will deliver SNAP-ED service through Northern Valley Catholic Social Service; a regional private non-profit located in six northern California counties. The California Department of Aging activities will be delivered via CSUC. SNAP-Ed funded Local Implementing Agencies (LIAs) and their subcontractors will collaborate to provide education and support to increase consumption of healthy foods and beverages and increase physical activity among the SNAP-Ed eligible population at each level of the socio-ecological model. This will be accomplished through comprehensive behavior-focused nutrition education/physical activity promotion with environmental supports, community events, training and technical assistance. In addition, media and public relations efforts and collaboration with community based organizations (CBOs), governmental programs, the business sector, school districts, treatment centers, Cal-Fresh Outreach, and other non-SNAP-Ed-funded partners throughout the county will help to enhance our messages and leverage funds throughout our community. This true collaborative approach will serve as a combination of strategies across settings which will result in a significant impact on decreasing the

incidence of overweight and obesity and the onset of related chronic diseases by combined diet and physical activity interventions in school, home, and community settings.

It is recognized that multi-level programming may enhance the impact and effectiveness of nutrition and physical activity education/promotion efforts. Using CX3 data, local needs assessments, and community identified needs, the SNAP-Ed funded agencies identified the greater Oroville area and the city of Gridley as the communities to focus our cross-programming and integrated nutrition education efforts. Currently each of the agencies has programming in this area that will continue through FFY19. The LHD will focus on PSE and CX3 work, BCOE will focus on preschools, CSUC will focus on middle and high schools, UCCE will focus on a comprehensive approach in the elementary schools to include education and PSE strategies, and AAA's target audience will be the senior population. NVCSS will focus on adult/family centered programs, specific low income housing units and the senior population with an emphasis on reaching underserved and isolated pockets of the population. Over half of the population in these communities lives in poverty. Through strategic, our environmental change efforts will coordinate and complement our direct education efforts. Butte County will focus on increasing access to healthy foods and increasing physical activity. Our comprehensive strategies in the greater Oroville area and the city of Gridley will include:

- School Wellness Policies: LHD, UC Cal Fresh and CSUC will collaborate with the local school wellness policy committees to encourage school policy, system, and environmental improvements to encourage increased consumption of healthy foods and beverages and increased physical activity among the students and staff.
- Community and School Gardens: In an effort to improve accessibility to healthy foods, all local implementing agencies will collaborate with schools and community agencies to support "edible gardens". Agencies will use Garden Enhanced Nutrition Education to increase understanding of healthy foods and beverages and in the process increase accessibility to fresh, local fruits and vegetables.
- Farm-to-Fork efforts: LHD will promote connections between producers of locally grown fruits, vegetables and other healthy foods and buyers, whether they are retail stores, schools, or other institutions.
- Community and Media Events: LIA's will attend and/or assist with community and media events to promote messages aimed at increasing consumption of healthy foods/beverages and physical activities
- Improving Walkable Communities: LHD and UC Cal Fresh will collaborate with Public Works on Safe Routes to School (SRTS) grants to enhance the walkability of the neighborhood surrounding Oakdale Heights Elementary and Palermo Unified School District to increase physical activity among residents. These improvements will allow students and parents to walk and bike safely to school. In addition, LHD and UC Cal Fresh will continue holding monthly Walk to School events at Oakdale Heights Elementary, which will encourage students, parents and teachers to walk and bike to school.
- Champions for Change Program: LHD, UC Cal Fresh, and CCC will continue efforts to identify and recruit "Champions". These champions will promote healthy messages aimed at increasing food accessibility and physical activity within their communities.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Butte County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

LHD

The Butte County Public Health Department (BCPHD) will focus on PSE changes in the community centered around school wellness policies, procurement of locally sourced healthy foods, healthy retail, Safe Routes to School, physical activity and healthy food and beverage standards. These PSE strategies have been chosen to directly correlate with the LIVE and LEARN core portfolio settings. In addition to PSE work, BCPHD will continue to provide direct and indirect education to adults and families in the community utilizing approved curriculum that supports the delivery of nutrition, garden, physical activity, and food resource education. While services will be provided throughout the county, the main focus will be in the Oroville and Gridley areas.

BCPHD will also continue to support and provide technical assistance in community nutrition education promotion, including but not limited to State/National Campaigns (Fruit and Veggie Fest and Food Day) and local celebrations throughout the county, with the main focus in the Oroville and Gridley areas. BCPHD will continue to participate in and/or facilitate the local CNAP work groups situated in both Oroville and Gridley. The CNAPs will continue to work with funded and unfunded partners and community members to determine the needs and goals of the communities including PSE and LIVE/LEARN portfolio objectives.

BCPHD will continue to subcontract for evaluation services. The evaluator will conduct Impact Outcome Evaluation on the three to five series classes provided by CSUC at the elementary, middle and/or high schools. This subcontracted staff member will also assist in evaluating the two PSE changes in BCPHD's approved PSE Plan. Based on the evaluation results, this staff member will also assist with modification of the plan and completion of a final report to CDPH in the future.

LHD Subcontractor - BCOE

In FFY17, the Butte County Office of Education (BCOE) will provide direct and indirect education to the students and families of 10 preschools, utilizing approved curriculum that supports the delivery of nutrition, garden, physical activity, and food resource education. Lessons may include the use of story books with nutrition education messages, tastings, physical activity demonstrations, garden-focused nutrition education activities and cooking activities. Due to decreased funding in FFY18 and FFY19, BCOE will scale back their efforts, but will utilize SNAP-Ed funds to augment their on-going nutrition education in classrooms.

AAA

The AAA implementing agency in Butte County is the Center for Healthy Communities at CSU, Chico Research Foundation ("CHC," AAA PSA3-LIA). When compared to previous years, the intervention plan progresses at the environmental level of the Social Ecological Model (SEM) through the inclusion of policy, systems, and environmental (PSE) change efforts. Utilizing site assessment data collected in FFY 2015 and 2016, it was determined that environmental changes to the physical dining space at the three eligible congregate meal sites would be a desirable strategy. Thus, a Nutrition and Physical Activity Center (NPAC) toolkit will be developed and displayed as an environmental support to SNAP-Ed eligible congregate meal participants in an effort to increase: consumption of healthy foods and beverages; awareness of food safety practices; and physical activity opportunities among seniors at eligible congregate meal sites. The NPAC toolkit will feature the four lessons of Eat Smart, Live Strong on display, rotating one per quarter along with additional SNAP-Ed approved resources and messages.

Though each site will have the NPAC on display, just one site will receive supporting direct education. Surveys will be collected at each site to determine the most effective, comprehensive strategy. One site will showcase the NPAC only. Another site will receive at least two independent direct education lessons, one at the beginning of the intervention and another at the end, using SNAP-Ed approved lesson plans and resources. These lessons will bookend the NPAC intervention and will also provide the opportunity to gather pre- and post- surveys. Survey results will be compared to FFY 2016 results of implementing four consecutive lessons utilizing the Eat Smart, Live Strong curriculum without the NPAC. The survey tools will remain the same as FFY 2016, the Food Behavior Checklist (FBC) and the Rapid Assessment of Physical Activity (RAPA), to facilitate this comparison.

The congregate site staff will be given the NPAC toolkit elements and supported with additional training and ongoing technical assistance related to the curriculum and to the use the NPAC toolkit. In addition to the NPAC support, the congregate site staff will receive training regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to SNAP-Ed seniors. Training the staff will leverage resources, build program sustainability, and enhance the program's overall capacity to encourage and support healthful behaviors among the senior population.

To increase awareness among Butte County low-income seniors, monthly flyers will be developed containing information about senior meals, sample menu items, quarterly nutrition and physical activity promotion topics, and other local food resources. The flyers will be distributed at the CalFresh office, local churches and clinics, and other community organization sites that serve the SNAP-Ed eligible seniors. This will be the senior-focused compliment to other LIA efforts to improve food resource management behaviors and increase food security via retail stores, emergency food distribution sites, and farmer's markets.

CHC will continue to collaborate with Butte LIAs to provide evidenced-based direct nutrition and physical activity education programs to other senior service areas. CHC will also continue to coordinate with local SNAP-Ed LIAs to create a complete and collaborative county work plan. With limited funding to support interventions via PSA 3, efforts will focus solely on congregate meal sites and we will rely on the other LIAs to reach eligible seniors at other intervention sites.

The evaluation results will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process, and outcome evaluation activities using state and locally developed surveys. The number of SNAP-Ed eligible individuals reached through direct education and indirect education will be documented in the ATF.

UCCE

UC CalFresh will utilize multiple delivery methods and intervention strategies to reach low-income elementary school students, their parents, and school educators and administrators. UC CalFresh will focus on direct education to eligible elementary school students utilizing approved curriculum. Education will be offered in multiple locations, but with the greatest intensity at schools in the priority neighborhoods. Staff will provide teacher training at school staff meetings and grade level meetings. Nutrition education resources will be available to teachers on a checkout basis. Additional meetings with teachers will occur throughout the year or in conjunction with planning school-wide events focused on healthy living. UC CalFresh staff will provide at least two lesson

demonstrations to teachers within the school year to support comprehensive classroom nutrition education. In addition to lesson demonstrations, school based programming will extend from classroom nutrition education into school food service programs (Smarter Lunchrooms Movement), school gardens, and wellness committee work. Parent Teacher Association or Organizations (PTA/Os) will be targeted for recruitment of adults and families for series based nutrition education. End of the year school wide nutrition events will occur at school sites to emphasize the connection between nutrition and physical activity and to practice goal setting for positive health behaviors. UC CalFresh will also provide series based direct education to SNAP-Ed eligible adults and parents utilizing Making Every Dollar Count; helping families stretch their foods dollars and make positive food resource management decisions.

School-based programming will extend beyond the classroom in an effort to change the school environment. UC CalFresh educators will work collaboratively with the School Food Service at one elementary school to make environmental changes to school lunchrooms using Smarter Lunchrooms Movement (SLM) principals. Additionally, UC CalFresh will continue to work towards supporting and expanding school gardens at five elementary school sites to support environmental changes made, UC CalFresh will assist in the development of two school wellness policies and continue to support the efforts of Parent Teacher Organizations to change school environments. Family-centered approaches will be used to help students achieve a healthy lifestyle through role modeling; engaging children in food preparation; changing current eating and shopping habits. Healthalicious and Eat and Play Together curricula activities including goal setting will be implemented for family centered nutrition education. Environmental change efforts will coordinate and complement our direct education efforts. We will focus on increasing access to healthy foods and increasing physical activity. SLM strategies and school wellness policy language to include SLM elements and/or principles will be adopted at four school sites. Additionally, garden education lessons will be provided to pre K-5th grade students. Playground stenciling projects will occur at four school sites to promote physical activity.

Results from previous Youth Taste Testing Tool evaluation data will inform approaches about foods that will be offered for taste tests in FFY16.

CCC

Catholic Charities of California, Northern California extension titled Northern Valley Catholic Social Services will provide direct and indirect education that focuses on intervention strategies reaching low income housing, community and faith based organizations. NVCSS will utilize a variety of educational curriculum including Food Smarts, Eat Healthy Be Active, Cooking Matters, Harvest of the Month, My Plate, Eat Well Live More Be Well, Eat Healthy Active Series, Rethink Your Drink & Cooking Matters. NVCSS will be working with primarily parent teens, adults and seniors. NVSCSS will provide cooking and food tasting demonstrations that focus on the promotion of healthy eating and an active lifestyle, as well as provide technical training and assistance that focus on developing tools and tips to increase the rate of independent cooking at home.

NVCSS's PSE strategy will be working Food Pantries and Soup Kitchens to develop Healthy Food and Beverage standards. The primary goal of the PSE is to assist in creating nutritional standards to increase the nutritional value of the foods donated, distributed, and prepared. This will be complemented with the intervention strategies listed below.

Provide technical assistance in creating healthy food donor letters. NVCSS Butte will assist in creating a letter with healthy requests to send out to food donors in order to improve the quality of food being distributed at each center.

Train the Trainer (TTT): NVCSS Butte will adopt and implement the TTT at a local community organization who specializes in providing the community with hot meals or is a registered food pantry / bank restructuring and improving their current food distribution system. All instruction and resources will be utilize My Plate in educating the Directors, Managers, and Workers. All staff who work directly with the general public in distributing food or preparing meals will be provided with the tools, tips and resources in order to ultimately provide healthier more nutritious meals as well as teaching their clientele in how they can prepare and make healthier meals with the food they are provided. Using approved curricula, once a month for the first 6 months and providing TA after this initial 6-month period. We will assist in the implementation of policy change for food distribution, food preparation, food purchases/donations, and local procurement of fruits and vegetables for the duration of year 1. Implementation of PSE strategies will begin with at least 1 Food Distribution / Soup Kitchen for year 1, adding 1 additional food distribution / soup kitchen each year. The Hope Center Food Bank has served as the initial starting point and will continue to serve as the implementing model that we will use to expand to other Food Banks and organizations in surrounding areas of Butte County.

NVCSS will participate in providing indirect education through social media, online promotion and other digital resources such as Facebook, Twitter, Instagram and Google to promote key SNAP-Ed messages using NEOPB approved materials. NVCSS will create and distribute monthly newsletters to all low income housing sites, community based organizations and faith based organizations using SNAP-ED NEOPB approved curriculum. The overall goal is to promote healthy eating and active living while working towards increasing public awareness of SNAP-Ed and farmers market participation through weekly posts and blogs in order to gain popularity using the most current platforms and reach out to a larger population.

Evaluation

Process evaluation reporting will document the range of SNAP-Ed services provided in Butte County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated) and indirect education will be documented in the ATF/EARS and compared to original reach targets. The actual number of SNAP-Ed eligible individuals reached by PSE change activities will also be compared to targets and sites that showed high performance in terms of reach and multi-intervention strategies will be identified and considered for replication.

NVCSS will participate in Process Evaluation, as well as Impact Outcome Evaluation (IOE) and evaluation of PSE efforts where appropriate and as funds allow. Evaluation tools used by CCC contracted evaluators include the Food behavior Checklist, Food Smarts Survey and other curriculum-specific tools, as well as the RE-AIM framework to evaluate PSE efforts. Evaluation results are used to measure participant behavior change and to inform program improvement.

The Impact Outcome Evaluation (IOE) of the high school, middle school and elementary school nutrition education series will document the participants' individual behavior changes and dietary practices.

The AAA will use a series of process evaluation protocols and fidelity measures will be used to assess the technical training and assistance. Effectiveness of training of nutrition and physical activity will be measured. Retrospective surveys will be used in every training. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings. AAA PSE will use the Food Behavior Checklist (FBC) and Rapid Assessment of Physical Activity (RAPA) to measure changes. The evaluation survey addresses, but is not limited to, the following indicators from Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes [MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3), and Fruit and Vegetable (LT2)]. Policy, system and/ or environmental change to promote healthy food and beverage at a congregate meal site/ senior living will be documented using RE-AIM indicators. The RE-AIM indicators will be evaluated on an annual basis to inform future strategies and potential enhancements for greater impact.

The PSE changes, including, but not limited to: promoting school wellness policies, CX3, Safe Routes to School, and school/community sites including edible gardens and retail will be reported using the Western Region SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, Butte County will adjust PSE strategies to address challenges.

UCCE will be working with the UC CalFresh state office to align, as appropriate, evaluation tools and results to the Western Regions SNAP Ed evaluation framework. The information gathered will be used to improve SNAP-Ed services in Butte County.

- UC CalFresh will utilize the Teacher Tasting Tool (TTT) evaluation tool to gather data on food-tasting behaviors. It will be used in the classroom during nutrition education lessons when students receive their tastings. The tool will evaluate students' previous exposure to the target food and willingness to try the food again.
- UC CalFresh will utilize the Adult Tasting Tool (A/TTT) evaluation tool to gather data on food-tasting behaviors. It will be used during nutrition education lessons when adults receive their tastings. The tool will evaluate adults' previous exposure to the target food and willingness to try the food again.
- The Teacher Observation Tool (TOT) evaluation tool will be used to gather data from teachers regarding behavior change in regards to nutrition and physical activity within the classroom. Teachers will report both qualitative and quantitative data including narratives about observed behavior change amongst students.
- The effectiveness of UC CalFresh adult nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist, Demographic data collected will be used to measure reach).
- To evaluate PSE changes, UC CalFresh will utilize the REAIM framework to monitor reach, effectiveness, adoption, implementation and maintenance of SLM strategies and new garden development in schools.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	51%		0 to 4 years old (Preschool):	1931
Female	49%		5 to 17 years old (School Age):	12648
			18 to 59 years old (Adult):	39381
			60 years old and over (Senior):	4540

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, LIA partnership will assist a minimum of three qualifying school districts in Butte County with updating and/or implementing their School Wellness Policies while improving the school environment to better support healthy eating and promote physical activity. Smarter Lunchrooms Movement, HOTM and other relevant strategies will be incorporated in the classroom and school cafeterias to achieve this outcome.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness
  - Smarter Lunchrooms Movement (SLM)
  - Farm to Fork
  - Safe Routes to School
  - School Edible Gardens

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, LIA partners will focus on building new relationships and establishing quarterly planning meetings in collaboration with the district School Wellness Coordinator in two school districts, and provide continued support to Oroville City Elementary School District (OCESD). (UCCE - CUSD, CHC/LHD - TUSD)

b. By September 30, 2017, LIA partners will provide training, technical assistance and education on the implementation of OCESD current school district wellness policy (OCESD) in two qualifying schools reaching a minimum of 50 staff/administrators, 500 youth, and 100 adults.

c. By September 30, 2017, LIA partners will improve school environments in three targeted school districts, including Oroville City Elementary School District, by adopting Smarter Lunchrooms Movement strategies in two qualifying schools, supporting local food procurement through Harvest of the Month (HOTM) in 11 qualifying schools, and continue efforts to support sustainable implementation of physical activity through murals/stencils, edible gardens, and/or Safe Routes to School (SRTS).

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, LIA partners will focus on building new relationships and establishing quarterly planning meetings in collaboration with the district Wellness Coordinator in one new school district. (UCCE - PUSD) while providing continued support to the three school districts from FFY17.

b. By September 30, 2018, LIA partners will provide training and technical assistance on the implementation of two current school district wellness policies in three qualifying schools reaching a minimum of 75 staff/administrators, 600 youth, and 150 adults (OCESD & CUSD).

c. By September 30, 2018, LIA partners will continue to improve school environments in two targeted school districts by adopting Smarter Lunchrooms Movement strategies in two (UCCE) new schools, and continue efforts to support local food procurement, sustainable implementation of physical activity through murals/stencils, edible gardens, and/or SRTS.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, LIA partners will continue to focus on supporting quarterly planning meetings in collaboration with the district Wellness Coordinator at the established four school districts.

b. By September 30, 2019, LIA partners will provide training and technical assistance on the implementation of three current school district wellness policies in four qualified schools reaching a minimum of 100 staff/administrators, 800 youth, and 200 adults.

c. By September 30, 2019, LIA partners will continue to improve school environments in three targeted school districts by adopting Smarter Lunchrooms Movement strategies in two new schools and continue efforts to support local food procurement, sustainable implementation of physical activity through murals/stencils, edible gardens, and/or SRTS.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Butte County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partners will assist a minimum of four qualifying school districts in Butte County with updating and/or implementing their School Wellness Policies while improving the school environment to better support healthy eating and promote physical activity. Smarter Lunchrooms Movement, HOTM and other relevant strategies will be incorporated in the classroom and school cafeterias to achieve this outcome.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Provide approved curricula, support materials, training and/or technical assistance to eligible school districts to facilitate school wellness policies and/or enhance identified environmental supports such as smarter lunchrooms, local food procurement, nutrition education, physical activity, and/or gardening education. In year 1 =1 school district, 2sites, year 2 = 2 districts, 3 sites, year 3 = 3 districts, 4 sites. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access, consumption, and appeal for healthy fruits, vegetables, and beverages at 80 SNAP-Ed qualifying sites which may include, but are not limited to neighborhood retail stores, food pantries/food banks, senior centers/public housing facilities, schools, worksites and community sites**.**

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy Food and Beverage Standards and Choices
  - Distribution and Food Preparation Standards
  - Marketing and Promotion
  - Increased access utilizing environmental changes
  - On-site and social marketing and promotion of healthy foods and beverages
- Farm to Fork/School
  - Local Procurement (may include sites such as schools, retail locations, etc.)
- Healthy Retail
  - Healthy in-store marketing and promotions
- School & Community Gardens
  - Technical assistance, support and education for established and new sites

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30th, 2017, LIA educators will provide direct education to 6,000 SNAP-Ed eligible participants and indirect education to 6,000 SNAP-Ed eligible participants to increase awareness and access to of healthy fruits, vegetables, beverages and physical activities.

   b. By September 30th, 2017, LIA partners will increase partnership collaboration by working with a minimum two new community partners/sites to increase their capacity to promote and/or implement PSE changes.

   c. By September 30th, 2017, LIA educators will provide training & technical assistance, promotion, support and education to a minimum of seven established and/or new school/community gardens and a minimum of four farmer's market sites in SNAP-Ed eligible communities.

   d. By September 30th, 2017, LHD will explore water access and begin collaboration with key agencies in a minimum of five SNAP-Ed sites which may include recreational facilities situated in the Oroville and Gridley areas.

e. By September 30th, 2017, LHD will provide continued facilitation, recruitment and on-going Technical Assistance to local community CNAP Groups for a minimum of eight meetings.

f. By September 30, 2017, LIA partners will continue annual recruitment of a minimum of 2 qualified community members into the Champions for Change program who are committed to improving the health landscape of the community and to promote healthy eating and active living.

g. By September 30, 2017, LIA partners will provide technical assistance to at least one retail store, school district, or other institution to encourage and aid with increased procurement of locally sourced food by at least one item.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30th, 2018, LIA educators will continue to provide direct education to a total of 4,000 SNAP-Ed eligible participants and indirect education to 4,000 SNAP-Ed eligible participants to increase awareness and access to healthy fruits, vegetables, beverages and physical activities

b. By September 30th, 2018, LIA partners will work with existing and new collaborating community partners/sites, provide support for health promotion guidelines in an effort to increase awareness of and/or access to healthy fruits, vegetables, beverages, physical activity resources.

c. By September 30th, 2018, LIA educators will continue to provide training & technical assistance, promotion, support and education to a minimum of nine (5UC, 4 LHD gardens) established and/or new school/community gardens and a minimum of four farmer's market sites in SNAP-Ed eligible communities.

d. By September 30th, 2018, LHD will continue collaboration with key agencies identified in year one and develop/promote increased water access in the identified SNAP-Ed sites.

e. By September 30th, 2018, LHD will provide continued facilitation, recruitment and on-going Technical Assistance to local community CNAP Groups for a minimum of eight meetings.

f. By September 30, 2018, LIA partners will continue annual recruitment of a minimum of two qualified community members into the Champions for Change program who are committed to improving the health landscape of the community and to promote healthy eating and active living.

g. By September 30, 2018, LIA partners will provide technical assistance to at least one additional retail store, school district, or other institution to encourage and aid with increased procurement of locally sourced food by at least one item.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30th, 2019, LIA educators will continue to provide direct education to a total of 4,000 SNAP-Ed eligible participants and indirect education to 4,000 SNAP-Ed eligible participants to increase awareness and access to of healthy fruits, vegetables, beverages and physical activities.

b. By September 30th, 2019, LIA partners will work with existing and new collaborating community partners/sites, provide support for health promoting guidelines in an effort to increase awareness of and/or access to healthy fruits, vegetables, beverages, physical activity resources.

c. By September 30th, 2019, LIA educators will continue to provide training & technical assistance, promotion, support and education to a minimum of nine established and/or new school/community gardens and a minimum of four farmer's market sites in SNAP-Ed eligible communities.

d. By September 30th, 2019, LHD will continue collaboration with key agencies identified in year one and develop/promote increased water access and consumption in identified SNAP-Ed sites.

e. By September 30th, 2019, LHD will provide continued facilitation, recruitment and on-going Technical Assistance to local community CNAP Groups for a minimum of eight meetings.

f. By September 30, 2019, LIA partners will continue annual recruitment of a minimum of two qualified community members into the Champions for Change program who are committed to improving the health landscape of the community and to promote healthy eating and active living.

g. By September 30, 2019, LIA partners will provide technical assistance to at least two additional retail stores, school districts, or other institutions to encourage and aid with increased procurement of locally sourced food by at least one item.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Butte County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, increase access, consumption, and appeal for healthy fruits, vegetables, and beverages at 80 SNAP-Ed qualifying sites which may include, but are not limited to neighborhood retail stores, food pantries/food banks, senior centers/public housing facilities, schools, worksites and community sites.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation

****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By Sept 30th, 2019 increase access and appeal for PA at fourteen SNAP-Ed qualifying sites which may include but are not limited to schools and various community sites.

SNAP-Ed State Goals:

	Goal 1: Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Structured Physical Activity:
  - All-ages direct education
  - Playground Stenciling/Murals
  - Community/Worksite/Park-Based Wellness Programs
- Joint Use Agreements:
  - Recreational Use of School Property by Communities
  - Safe Routes to School

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, LIA partners will reach 1,000 PreK-12 children/adolescents/teens and adults with direct education, and 1,000 SNAP-Ed eligible individuals with indirect education to increase the appeal, access and/or integration of physical activity in targeted schools, worksites, and/or communities.

b. By September 30, 2017, LIA partners will reach 30 parents and children through structured physical activity that incorporates approved program/curricula using a family centered approach.

c. By September 30, 2017, LIA staff will work with partners including, but not limited to school wellness committees to improve at least five school /community environments through playground stenciling.

d. By September 30, 2017, LIA staff will work with partners including local CNAPs, to gauge the community desire for and if appropriate, develop and start to offer both park-based and community-based wellness programs that are focused on increasing the appeal and participation in physical activity.

e. By September 30, 2017, LHD will work with partners to increase low-cost/free community recreational access to at least one new school property through the development of shared use policies.

f. By September 30, 2017, LHD will explore physical activity resources (including but not limited to local parks, schools, sports facilities, fitness centers, and community centers) and public perceptions of rural environments in at least one Butte County city.

3. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, LIA partners will reach 500 PreK-12 children/adolescents/teens/adults with direct education and 1,000 SNAP-Ed eligible individuals with indirect education to increase the appeal, access and/or integration of physical activity in targeted schools, worksites, and/or communities.

b. By September 30, 2018, LIA partners will reach 30 parents and children through structured physical activity that incorporates approved program/curricula using a family centered approach.

c. By September 30, 2018, LIA staff will work with partners, including but not limited to school wellness committees to improve at least three school / community environments through playground stenciling.

d. By September 30, 2018, LHD will work with partners, including local CNAPs, to continue to offer and promote at least one new community-based wellness program focused on increasing the appeal and participation in physical activity

e. By September 30, 2018, LHD will continue to work with partners to increase low-cost/free community recreational access and program development/implementation to utilize at least one property obtained through shared use policies from the previous year.

4. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, LIA partners will reach 500 PreK-12 children/adolescents/teens/adults with direct education and 1,000SNAP-Ed eligible individuals with indirect education to increase the appeal, access and/or integration of physical activity in targeted schools, worksites, and/or communities.

   b. By September 30, 2019, LIA partners will reach 30 parents and children through structured physical activity that incorporates approved program/curricula using a family centered approach.

   c. By September 30, 2019, LIA staff will work with partners, including but not limited to school wellness committees to improve at least two school / community environments through playground stenciling.

   d. By September 30, 2019, LHD will work with partners, including local CNAPs, to continue to offer and promote at least one new community-based wellness program that is focused on increasing the appeal and participation in physical activity

   e. By September 30, 2019, LHD will continue to work with partners to increase low-cost/free community recreational access and program development/implementation to utilize at least one property obtained through shared use policies from previous years.

   f. By September 30, 2019, LHD will re-assess the physical activity resources (including but not limited to local parks, schools, sports facilities, fitness centers, and community centers) and public perceptions of rural environments in the same Butte County location chosen in FFY 2017.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

14			NFCS Advisor	Vacant	in kind				$0.00		$0.00	$0.00	$0	3.36 Fte Carry in Funds Salaries and Benefits $253,433 Thank you for your comment. The Community Education Specialist (CES) positions primarily focus on delivery of the SNAP-Ed programs, including PSEs within the county. The percentages for these positions can be reviewed and re-adjusted as appropriate. The CE Manager and CE Supervisor positions spend a percentage of their time on management/administrative duties, such as program review and assessing the quality and delivery of program; trainings; recruitment and hiring new staff; reviewing and processing staff time sheets and work related travel; conducting staff performance appraisals; and staff professional development for the CES positions they lead and supervise. Based on the definitions previously provided by USDA and also as noted in the FFY 2018 SNAP-Ed Guidance (page 70), we may need further clarification since both performing management and training and professional development are considered administrative. Therefore we feel the percentages of administrative vs. direct delivery are justified. Based on the definitions previously provided by USDA and also as noted in the FFY 2018 SNAP-Ed Guidance, the percentage of administrative vs. direct delivery for the CE Manager and CE Supervisor positions can be re-evaluated if these responsibilities are considered direct delivery.
				Total Staffing: Salaries/Benefits:				**8.39**	**$333,719**		**$206,457**	**$164,008**	**$540,177**	

Definition and basis for calculations of benefit rate(s): *Describe what is covered in the benefit rate for your agency.*	"Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries. The projected FY17/18 composite benefit rate is .4264 for group A, and .6438 for group C; The FY 18/19 composite benefit rates are .4477 for Group A and .6759 for group C. The average rate listed on the budget is for calculation purposes only and is an estimate of the combined rates

FFY 2018 SNAP-Ed Budget

Organization Name: UC CalFresh Nutrition Education Program
County/Jurisdiction: Butte/Colusa/Glenn/Sutter/Yuba

	Budget Adjustment		2. Non-Capital Equipment/Supplies:						Budget Adjustment
	Add Delete Increase Decrease	Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Justification
1			Standard Operating Supplies	Binders, postage, folders, ink cartridges, batteries, tri-fold boards, posters, bins for storage needed to carry out programming, carts with wheels, and and other day-to-day office supplies such as pencil, pens, paper, and post-its	11.5	$35.71	12	$4,928	
2			Reproductions	Duplication/printing of documents for administrative tasks and office operations including Nutrition Actviity Reporting Forms, family newsletters and recipes.	11.5	$16.67	12	$2,300	
				Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1			Computer - Laptop	CES-2 #4 Jamie Lambert- Off Site Work, Webinars, and presentations	1	$1,500.00	1	$1,500	
2			Computer - Laptop	Laptop shared use all CES-2 positions #5,6,11 - offsite work, webinars, and presentations	1	$1,500.00	1	$1,500	
3			Computer - Desktop	CES-1 #7 Tracy Yang - replacement	1	$1,500.00	1	$1,500

7			Computer-Monitor	CES-1 #7 Tracy Yang - replacement SUP-2 #2 Suzanne Lawry Hall	1	$400.00	2	$800	
8			Monitor-Adjustable Arms for Dual Monitors	SUP II #2 Suzanne Lawry Hall and CES 1 #7 Tracy Yang - equipment to enable adjusting monitors at workstations while conducting administrative tasks and data input. Adjustable monitor arms provide ergonomic flexibility with work space for employees spending a greater percentage of time at their desks inputting program data. Staff members (2) have completed UC ANR Environmental Health & Safety Department ergonomic training and workstation assessment. The requested adjustable dual monitor arms allign with assessment recommendations. Additionally, adjustable monitor arms support improved ergonomic comfort for the workstations where "hot desking" or the shared computer use is occuring. Each user can readily adjust monitors to complete tasks decreasing the risk of neck, back and/or eye pain. The Butte Cluster utilizes college interns each Spring semester which impact office space and computer workstations. The adjustable monitor arms allow UC CalFresh staff to return to their computer work and readily adjust their monitors for their comfort and ergonomic health. Adjustable monitor arms aid in collaborative work where monitors can be turned and viewed by a group of employees.	1	$370.00	2	$740	
9			Portable Speaker	Various positions - Amplify music and announcements/instructions at large outdoor classroom settings where program implementation including physical activities and gardening occur.	1	$150.00	1	$150

3. Materials:

	Budget Adjustment		Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment
	Add Delete Increase Decrease	Last Amount Approved						Budget Justification
2			Food Demonstration Costs - for taste test only	Includes taste testings and supplies needed for food demonstrations, including paper goods, folding tables, shelving, hand sanitizer, food safety preparation, and food preparation materials. We reviewed the number of extenders, workshops, lesson series, and pilot project in progress for FFY17 to project the number of tasting our cluster would deliver in FFY18. Taste testing are administered after a lesson demonstration to reinforce learning. To stay compliant with ServSafe, proper food handling supplies are purchased to ensure safe preparation for extenders and safe food for participants. Further explanation has been provided below. The list consist of but are not limited to the items needed to be compliant. Paper goods: cups, silverware, napkins, plates, bowls, etc... Food safety preparation: Sani-wipes, cutting boards, serving gloves,hand wipes, surface wipes, dish soap, insulated bags, ice chest, cold packs, etc.. Food Preparation: kitchen tools (knives, can opener, peeler), cutting boards, bowls, skillets, heating skillets, blenders, etc..	$0.64	24570	$15,725	
3			Lesson Supplies	Printing/duplication (includes lease contract for per copy printing) of handouts, activity sheets for each student, and teacher materials. Print materials for nutriton decathlon/walk to schools/community events and adult classes. Nutrition and healthy lifestyle displays for additional community and retail sites. Production of updated displays for revised curricula. Support SNAP-Ed messaging including murals, SLM and other SNAP-Ed related themes. The lesson supplies include, but are not limited to, tracking forms, handouts, activity sheets for each student, teacher materials; print materials for nutrition decathlon/walk to schools/community events and adult classes; nutrition and healthy lifestyle displays for additional community and retail sites; production of updated displays for revised curricula; etc. These supplies will serve an estimated 3300 youth from October-April and an estimated 200 educators. Additional print materials will be distributed to school cafeteria staff implementing SLM strategies.	$516.67	12	$6,200	
4			Garden Supplies	Building gardens including beds, watering cans,hose, pest prevention fencing and wire, MBraces for raised beds, soil, seeds/seedlings, and garden tools for kids and families. Used to implement approved GENE curriculum-NTGO, SHCP, TWIGS, Farm to Fork, JR.Master Gardner (including Learn!Grow!Eat!Go!), Fresh from the Garden, etc.	$860.00	12	$10,320	
5			PA Lesson Supplies	Hula hoops, jump ropes, poly spots, scarfs, balls, flying discs, chalk for marking course, push up mats, relay games, resistance bands, bean bags/toss, weights, cones, balancing equipment, equipment specificed by approved curricula needed for PA trainings and safe physical activity implementaion. Multiple sized paint brushes, paint, paint trays, tarps, mats, canopies, buckets, and stencils needed for implemetnting interactive stencils and or murals projects at elibable sites including cost for proper disposal of hazard materilas (i.e. empty paint containers). Additonally, use approved SNAP-Ed PA curriculum-CATCH and supplies needed to support implementation of CATCH activities.	$762.92	12	$9,155	
6			Curriculum	Curricula and lesson supplies from approved UC CalFresh & USDA Curriculum list includes Garden, Agriculture, Nutrition, and Physical Activity Curricula for enrolled extenders.	$800.00	12	$9,600	
7			NERI	Flying discs, various athletic balls, hoops, jump ropes, sidewalk chalk, bubbles, pencils, pens, stickers, erasers used to reinforce physical activities and nutrition concepts for participating eligible youth and families at Healthy Me Jubilees and other health fairs.	$4.00	4500	$18,000

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension – Central Sierra: UCCE)
X	California Department of Public Health: CDPH: (Calaveras County Public Health Services: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

4. **Jurisdiction Description**

Calaveras County is located in the Sierra foothills and is one of the original California counties. It was established in 1850 as part of the California gold rush.[1] The county encompasses an area of 1,037 square miles with over 17 square miles of water. The county seat is San Andreas and there is one incorporated city within the county, Angels Camp.

The population of Calaveras County has been decreasing since 2008. Most recent numbers estimate the county population at 44,515.[1,2] This estimate, however, has been dramatically affected as a result of the Butte Fire. The Butte Fire took place in September 2015, burned more than 70,000 acres, and is estimated to have affected more than 12,000 people – many who were the most in-need and disenfranchised members of the community. In response to this community-changing event, an additional community assessment may take place. Depending on the results of the assessment, the services provided (and how they are administered) over the next 3 years could need to be altered to better serve our community.

Over 75% of Calaveras County residents live rurally: towns are spread widely apart; transportation options are limited; and natural disasters occur (such as wildfires and flooding).[2] There is one transit system, but it is incredibly limited in scope, routes, and availability. There are only 10 census tracts in the county and none of them are SNAP-Ed Eligible.[3] According to the SNAP-Ed County Profile of 2015, 12.5% of the County are CalFresh participants and there is a 15.2% overall food insecurity rate (the rate for children in the County is 23.2%.)

Calaveras' population is over 82.5% non-Hispanic white, 11.1% Hispanic, almost 2% Asian Pacific Islander, about 1.8% American Indian, and less than 1% African American.[2] The vast majority of the county population speaks English as their primary language (99.1%).[2] Adults 65 years of age or older account for 24.3% of the population (almost double the California average of 12.5%).[2] The unemployment rate (calculated before the Butte Fire) is 10.4%.[2]

While the county enjoys wide-open spaces, state parks, and some outdoor recreation activity availability, Calaveras residents report more poor physical health days than the California average (4.3 vs. 3.7) and less access to exercise opportunities than the state average.[2] There are many considerations that influence these factors including transportation challenges, lack of public open spaces (most wide-open spaces are privately owned), lack of sidewalks or street lights, wildlife, and dangerous roads. Chronic disease is seen throughout Calaveras County including 11% of the population with diabetes.[2] Tobacco use is also a factor in the county with an over 19% smoking rate by adults.[2]

Calaveras County lacks many of the most basic services that other counties enjoy. There is neither a birthing hospital nor obstetrician. The ratio of mental health provider (1 provider for every 824 people) and primary care physician (1 physician to every 2237 people) is much higher than the state average.[2] There is no community college. There is no specialty health care or even Veterans' Clinic. There are no dentists who accept DentiCal and for every 1 dentist there are 2120 people. There isn't a store to buy family basics like clothes or shoes.

In spite of all these challenges and an often physically demanding landscape, the residents of Calaveras County are a tight knit community who care deeply for each other. With a culturally appropriate approach and sensitivity to recent events, Calaveras County is capable of making community level change.

[3] SNAP-Ed County Profiles 2015: https://www.cdph.ca.gov/programs/NEOPB/Documents/Calaveras.pdf

5. Community Assessment

Unless noted otherwise, the following information was obtained from the 2015 SNAP-Ed County Profile. These numbers were obtained prior to the Butte Fire of September 2015, therefore the numbers could now be significantly higher.

Calaveras County is a rural county located in the Sierra Nevada foothills with an estimated population of 44,515.[1,2] Of the SNAP-Ed eligible population, 73.7% are white, 17.5% are Hispanic, and 21.5% are 65 years of age and older.

According to the SNAP-Ed County Profile of 2015, Calaveras County had a SNAP-Ed eligible rate of 23.4%. Of the more than 10,300 people who live at less than 185% of the Federal Poverty Level, 47% are children (17 years of age and younger) and 21.5% are seniors (aged 65 and older). Calaveras County also has a food insecurity rate of 15.2% with a jump to 23.2% for children specifically.

Overall, Calaveras County has some challenges. Calaveras ranks 40th of 57 evaluated counties for physical environment.[2] Long commutes, driving alone, and air pollution contribute to this ranking. Calaveras also has a higher than the state average rate of unemployment with 10.4% of the county without a job.[2]

The Poverty level is 10.9%, with 23.4% of the population being eligible for Supplemental Nutrition Assistance program (SNAP). Of the eligible SNAP population, 26.2% are children under the age of 6 and 21.5% are seniors. Food Insecurity remains a problem with food insecurity rates at 15.2% for the overall population but over 23% for children.

County-specific rates of obesity and overweight populations for SNAP-specific populations are not available, however when combined with other small, rural counties in the area (Alpine, Amador, Calaveras, Inyo, Mariposa, Mono, and Tuolumne) it is clear that there is a great deal of work to be done. The Calaveras County population in general has an obesity rate of 25% among adults. [2] For SNAP-Ed adults in the aforementioned combined counties, the prevalence is 61.3% are overweight/obese while 36.5% are obese. Countywide, the rate of diabetes is 10% (versus 8% for the state as a whole).[2]

Fresh produce availability is limited in many of the small communities and frequently expensive. This can significantly limit low-income families' ability to stretch food dollars far enough to purchase fruits and vegetables routinely. Fruit and vegetable consumption specific to Calaveras County is difficult to assess for the SNAP population. Providing education specific to fruit and vegetable consumption is critical.

One of the major challenges providing nutrition education in this area is the population is spread out between several small towns and communities that are all relatively isolated from one another, especially in winter. Public transportation in the area is limited. It is extremely difficult for limited resource families and individuals to travel to central locations for services or education. To address this challenge, it is necessary to provide education opportunities out in the communities at schools, community settings, and at the limited retail environments. In many of these communities, the local elementary school is the hub of community activity and it is important to utilize this setting to create an innovative and engaging learning community focused on changing lifestyle choices whenever possible. Over half of the students enrolled in Calaveras County schools are eligible for Free/Reduced Price Meals (FRPM). Of the 23 schools within the county, 13 are SNAP-Ed eligible.

In September 2015, Calaveras County experienced the Butte Fire. This community-changing event burned more than 70,000 acres, destroyed more than 900 structures, and is estimated to have affected more than 12,000 people – many who were the most in-need and disenfranchised members of the community. No community assessment has been completed, as of yet, to clearly understand the impact this catastrophic event has had on Calaveras County.

6. **Community Change Goals**

Calaveras County Public Health Services and UCCE collaborated in conjunction with the CNAP partners to develop the community change goals related to the SNAP-Ed work plan. The goals include: nutrition and physical activity system and environment change at qualified school sites; increased consumption of fruits, vegetables, and healthy beverages by low-income families and individuals; increase in physical activity by low-income community members; and an increase in healthy food and beverage option availability.

With our partners, these four areas of need are vital to improve the overall health of Calaveras County. The community goals for each area include the following:

1. Nutrition and physical activity system and environment change at qualified school sites

- Increased nutrition education at school sites
- Increased collaboration on healthy nutrition and physical activity promotion messages
- Development and implementation of school wellness activities

- Support for water promotion campaigns
- Increased training for teachers/school volunteers/parent groups to deliver positive nutrition and physical activity promotion messages
- Creation and support of school gardens
- Local food procurement opportunities for the school meal program
- Increase implementation of food service best practices to increase healthy food access and consumption

2. Increased consumption of fruits, vegetables, and healthy beverages by families and individuals

- Increased nutrition education to individuals/families at qualified sites
- Increased healthy food promotion through newsletters, school and community events
- Increased healthy food promotion at monthly community dinners/food bank sites
- Increased collaboration and coordination among agencies promoting nutrition education
- Increased nutrition and physical activity education and promotion at food banks, food pantries
- Increased nutrition and physical activity education and promotion at community workshops
- Increased promotion of local programs that promote healthy food options and increased physical activity via media campaigns and social media
- Increased promotion of water campaigns
- Development of school wellness policies

3. Increase in physical activity by low-income community members

- Increased promotion of physical activity at community events
- Increased promotion of physical activity at school events
- Development and support of School Wellness Policies
- Promotion of safe, walkable communities
- Support and development of low-cost, outdoor activities for families
- Support and development of local community parks

4. Increase in healthy food and beverage option availability

- Increased promotion of healthier choices via community events, local media and social media
- Increased availability of healthier choices at stores frequented by low-income families and individuals

- Increase of inclusion of locally grown produce at qualified stores and markets
- Development and support of healthy food and beverage display and promotion practices

These multi-year strategies will require a great deal of commitment and dedication from the community, partners, and everyone associated with this important work. While it is understood that many of these community change goals will not happen overnight, there is confidence of eventual success through collaborative efforts.

In conjunction with community partners, the local SNAP-Ed program has set the following 3 SMART local objectives:

1. By September 30, 2019, 13 low resource schools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

2. By September 30, 2019, LIAs will provide nutrition education to at least 400 people from all age ranges who are SNAP-Ed-eligible in Calaveras County. Educational workshops will promote the consumption of fruits and vegetables, healthy beverage options, and awareness of best practices in food resource management.

3. By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 2-4 SNAP-Ed qualifying grocery stores and markets through adopted and implemented policy and physical site changes.

The LIA and local partners will work together on the 3 local objectives listed above. Each has knowledge of the specific population reach and area of expertise. The SNAP-Ed contribution will remain exclusive to qualified and eligible populations and allowable activities. Calaveras County Public Health Services, UCCE, and community partners will provide nutrition education, physical activity education, and support for policy, systems, and environment changes.

Local Objective #1 will focus on making policy, system, and environment change at qualifying schools. This supports State Goals 1, 2, 4, and 5. With the proposed changes at qualified school sites, healthy foods and beverages will be increased, physical activity will be increased, and access and appeal of healthy dietary choices will increase.

Partnership Activities are listed in the three year integrated work plan. Schools contribute to the objective by providing the qualifying sites, providing access to individuals developing school wellness policies, and allowing collaboration in working with students directly. To support this goal, community and school based education will be provided using evidence based and approved curricula.

Local Objective #2 will focus on promoting increased consumption of fruits, vegetables, and healthy beverages, as well as, an increased understanding of food resource management. This supports State Goals 1, 3, and 4. With the promotion of healthy food and beverage consumption and raised awareness of food

resource management best practices, there will be an increase in healthy eating/drinking and resource management practiced by SNAP-Ed populations within Calaveras County.

Partnership Activities are listed in the three year integrated work plan. Local food banks, food pantries, and other qualifying locations contribute to the objective by providing means-tested qualifying sites as there are no qualifying census tracts in our county. To support this goal, community education will be provided using evidence based and approved curricula.

Local Objective #3 focuses on working with qualifying stores and markets to create environments supportive of healthy nutrition choices and options. This supports State Goals 1, 3, and 5. Working in collaboration with local, qualified/approved retailers will serve to create a setting where healthy food and beverage choices are a reality for the SNAP-Ed population of Calaveras County. Through this environment change and proposed activities, healthy food and beverage consumption and access/appeal to healthy choices will increase while food resource management will also be improved.

Partnership Activities are listed in the three year integrated work plan. Calaveras County Public Health Services will collaborate with qualifying stores and markets to provide opportunities to place healthy choices in more advantageous locations and promote healthy nutrition messages.

7. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The CNAP meets quarterly and consists of community partners including: UC Cooperative Extension; WIC; Head Start (Amador and Calaveras); Calaveras and Amador Public Health; local Maternal Child Adolescent Health (MCAH) Program; First 5 (Amador and Calaveras); and The Resource Connection. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc.

Calaveras County Public Health: Conducts nutrition/physical activity education and food resource management to qualified individuals; provides direct and indirect education to youth at qualified school and alternative high school sites; collaborates with Health and Human Services Agency to provide direct and indirect education to limited resource parents and young adults; coordinates SNAP-Ed healthy messaging with others working on obesity prevention; participates in the CNAP; supports water promotion campaigns; works with local retail environments to increase their capacity and availability to serve the SNAP community within Calaveras County; actively collaborates and coordinates with CHASSIS (Creating Healthy And Sustainable Systems In Schools/Society)/Resilient Schools Community Project.

UC Cooperative Extension: Conducts nutrition/physical activity and food resource management education to qualified individuals; provides direct education to youth at qualified school sites; participates in CNAP; actively collaborates and coordinates with CHASSIS (Creating Healthy And Sustainable Systems In Schools/Society)/Resilient Schools Community Project.

Head Start/WIC (non-funded partner): Provides education to children and families around healthy food choices and increased physical activity; participates in CNAP.

Local Maternal Child Adolescent Health Program (non-funded partner): Provides breastfeeding education and support to new mothers.

First 5 (non-funded partner): Encourages healthy eating choices and physical activity in local schools; participates in the CNAP.

8. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other:
X	Fats and Oils	X	Food Shopping/ Preparation		Other:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

9. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2017-19 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California, or the California Department of Public Health Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

10. **Intervention and Evaluation Plan Narrative Summary**

Calaveras County Public Health Services (LHD) and University of California Cooperative Extension (UCCE) have been collaborating on SNAP-Ed work for a number of years. The collaborative efforts put forth by both entities are based on the specific needs of the people of Calaveras County. These needs have intensified since the devastating Butte Fire that took place in September 2015. While the community continues down the long road to recovery, SNAP-Ed efforts will

provide much needed education and PSE (policy, systems, and environment) change regarding healthy food/beverage consumption and access, food management practices, and increased physical activity.

The three local objectives include: making policy, system, and environment change at qualifying schools; promoting increased consumption of fruits, vegetables, and healthy beverages as well as an increased understanding of food resource management within SNAP-Ed qualifying community members; and working with qualifying stores and markets to create environments supportive of healthy nutrition choices and options.

State level goals are supported throughout the three-year plan. All three of the Local Objectives focus in one way or another on increasing the consumption of healthy foods and beverages whilst decreasing consumption of unhealthy foods and beverages (State Goal 1). The first Local Objective efforts address work within school systems to increase physical activity as well as increase the access and appeal of physical activity opportunities for SNAP-Ed eligible community members (State Goals 2 & 5). Both the second and third Local Objectives address improving food resource management by providing direct and indirect education to SNAP-Ed eligible populations within Calaveras County regarding best practices and hands-on store tour opportunities (State Goal 3). Finally, all three Local Objectives address increasing access and/or appeal of healthy dietary choices where people eat, live, learn, work, play, and shop by creating PSE change within schools, food banks/pantries, and local retail stores/markets.

The SNAP-Ed activities will be delivered in multiple venues and incorporate a comprehensive scope of approaches. Additionally, attention has been paid to include complimentary levels of the Social Ecological Model to set up successful PSE work within Calaveras County.

Community/Nutrition Education and Physical Activity Direct

Series based workshops: These are a series of three to four 30 - 45 minute sessions. For adult and young adult populations, these workshops will be conducted by UCCE through programs sponsored by the Resource Connection and other community partners. Workshops will also be conducted at the San Andreas Apartment Complex (low-income housing), and at senior congregate meal sites located throughout the county. These workshops will be promoted to families and individuals participating in emergency food distributions in the area and will progress in number and scope each year.

For youth populations, a variety of approved nutrition curricula will be utilized by UCCE and LHD to provide eight to ten, 30 – 45 minute classroom lessons at qualified school sites.

For the first year, LHD will conduct a nutrition environment assessment at each qualified school site and communicate the suggested efforts and timeline with the assessed school. Based on the results of the assessment, LHD will utilize approved water campaigns and nutrition curriculums as well as promote the Harvest of the Month Campaign (HOTM) to a minimum of 350 youth at four qualified schools and three alternative high schools. In the second year, LHD will reassess the nutrition environment as well as assess the environment, capacity, and readiness for garden activities/education. Additionally, LHD will build upon year one (nutrition, water education and HOTM) and add physical activity education/activities as well as garden-enhanced nutrition education utilizing approved

curriculums and support materials to a minimum of 350 youth at four qualified schools and three alternative high schools. Finally, in the third year, LHD will reassess nutrition, garden, and physical activity environment and capacity as well as build upon all that has been previously utilized (nutrition, water education, HOTM, physical activity education/activities, garden-enhanced nutrition education).

UCCE will continue to build upon the strong foundation of nutrition education that has been built over the years at qualified school sites. Each school is assessed annually to determine the readiness of additional direct education, moving to an extender model and/or using or building a school garden to complement classroom nutrition education.

One-time stand-alone workshops: These cover a variety of nutrition and physical activity topics requested by the community and will be conducted by both UCCE and LHD. These will be offered at Calaveras Health and Human Services Agency, mobile emergency food distribution sites, as well as, qualified target sites such as store tours of qualifying retail environments. Tasting or cooking demonstrations are a crucial part of these workshops and will be included whenever possible. LHD will conduct one-time stand-alone workshops at Calaveras County Health and Human Services Agency, Calaveras County Office of Education and qualifying retail environments. All stand-alone workshops will progress in number and scope each year depending greatly on the availability, capacity, and readiness of the community.

Garden Enhanced Nutrition Education (GENE): This education will continue to be utilized at schools that have worked with UCCE, as well as, introduced to the previously untargeted schools that Calaveras County Public Health Services (LHD) will be working with. For LHD, this will be incorporated into year 2 and/or 3 depending on the capacity of each qualified school.

Smarter Lunchrooms Movement: UCCE will continue to work with district and school food service programs with which they have established relationships (increasing scope and reach over the next three years) while LHD will start the work with the previously untargeted schools in year 3. The approach will work to "nudge" kids toward selecting and consuming a balance diet, while at the same time increasing meal sales. This program utilizes research-based Best Practices --- solution-based principles which focus on specific aspects of the school meal.

Community/Nutrition Education and Physical Activity Indirect

School based events: These events are very much community involved and allow us to connect with parents directly and provide education and opportunities to discuss school policy and Smarter Lunchroom Movement (SLM) related to nutrition and physical activity and provide nutrition education for the family. LHD and UCCE anticipate presenting at a variety of these throughout the school year. Additionally, these activities will progress in scope each year. LIAs will provide indirect education activities for students, parents, and family members at qualified schools. The topics, scope, and intensity will match and progress in accordance with the direct education efforts of each year (including the efforts in nutrition, garden, and physical education as well as Smarter Lunchroom

Movement efforts. Additionally, LIAs will attend parent-teacher organization meetings, school wellness committee meeting, and district level school wellness policy committees at the qualified schools/alternative high schools that each organization is actively serving.

Community events: These events present an opportune learning arena for family-centered education. Health fairs, Children's Fair, Kids in the Garden and other events provide us with the opportunity to promote Rethink Your Drink information and raise awareness related to sweetened beverage consumption. Being an active participant in these events also allows us to become part of the planning process and introduce healthy food and beverage policies.

Food banks/pantries: UCCE will offer continued approved educational interventions and tastings will take place at food banks/pantries and other eligible community sites. Those sites most conducive to indirect education interventions have been identified.

Retail Environments: LHD will offer continued support and approved educational interventions and tastings at eligible retail locations. Retail sites have been identified and offer the SNAP community new opportunities. In the first year of the plan, each participating/approved retail environment will be assessed. The findings will be summarized and developed into an action plan to identify the areas in which change is needed. This will be shared with retail managers/owners. Additionally in the first year, depending on where the retailers fall on the assessment, retail environments will receive marketing materials (those not ready for sampling events) and/or monthly food samplings (those ready for sampling events). In the second year, each retail environment will be assessed and an action plan will be developed and shared. If appropriate, each retail site will receive a monthly food sampling event. For those new to the concept, basic indirect education will be provided. For those sites more with more capacity, the sampling events will highlight the TTA work being done on healthy checkout lanes. In the third year, a final assessment will be conducted for all retail environments and an action plan will be developed and shared. For those with the limited capacity in year two, the sampling events will highlight the TTA work being done on healthy checkout lanes. For those with more advanced capacity, the sampling events will also include the benefits and availability of utilizing locally grown produce.

Media, Social Media, Public Relations, and Messaging

LHD and UCCE will be utilizing their corresponding Facebook pages and websites, as well as, other social media outlets such as twitter and Instagram. These accounts will promote approved messages and events. In addition, email blasts via the school districts will be utilized to provide parents with monthly messages and recipes related to nutrition and physical activity training provided to their student. We will collaborate with other partners to focus on key messages to intensify dose and ensure consistency. LHD and UCCE will coordinate a minimum of three local media and public relations efforts that highlight local program and communicate SNAP-Ed approved key messages.

LHD will also catalogue any healthy site changes and sample wellness policies at the 7 qualified school/alternative high school sites and share this information with participating organizations, post on websites, and present at local and statewide meetings/conferences when applicable. Additionally, LHD will share all

appropriate media, social media, and messaging resources with retail sites. Finally, LHD will utilize media and social media outlets to advertise the monthly tasting events of healthy food/beverage approved recipes.

Coordination and Collaboration

LHD provides a direct understanding of local and county-wide needs and realities. UCCE is the bridge from the University of California to local communities by providing research-based information to individuals and community agencies. Both serve as active partners in the County Nutrition Action Plan (CNAP) and will continue to provide support and expertise as well as meet at least quarterly. CNAP projects include, but are not limited to: 1) increasing agency participation 2) promotion, assessment and implementation of a Summer Food Service Program 3) developing healthy food and beverage policies for CNAP agencies to implement at their worksites.

The partnership between LHD and UCCE will deliver consistent nutrition/physical activity messaging, programs, and multi-level interventions through clear communication, complimentary approaches, and ensuring that the interests of those served in Calaveras County are paramount. All efforts will be made to continue frequent communication through quarterly meetings between LHD and UCCE nutrition educators, as well as, partnerships and collaborations through the CNAP. Collaboration and coordination of qualified intervention sites will also continue through these in-person meetings and clear communication. Additionally, LHD and UCCE will coordinate three local media and public relations efforts annually that highlight local programs and communicate SNAP-Ed approved key messages.

In the 7 qualified schools/alternative high schools, LHD will annually conduct an assessment to identify areas of success and opportunities for change as well as attend parent-teacher organization/wellness committee meetings. Furthermore, in the school settings, LHD will coordinate and collaborate with teachers and administrators on a regular basis to ensure that direct and indirect education, school garden efforts, and Smarter Lunchroom Movement activities are appropriate.

In the retail environment, LHD will coordinate and collaborate with store managers/owners to review and summarize assessment findings and develop action plans to address the identified areas where changes are needed and can be made. Additionally, LHD will coordinate quarterly store tours of 1-2 qualifying retail stores.

Training and Technical Assistance

UCCE will provide training and technical assistance to all teachers participating in the UCCE Nutrition Ed program. UCCE will ensure that all the necessary materials to deliver the lessons with minimal effort are provided. In addition, UCCE will continue to recruit and train extenders to deliver approved curriculum in the classrooms or at after school programs. Teachers and extenders will be trained throughout the year.

Technical assistance and training will also be provided by UCCE as part of the Smarter Lunchroom Movement (SLM). As part of the SLM, UCCE looks forward to incorporating the "No Time to Train – A Year of 10-Minute Workshops for Lunchroom Staff" guide into the trainings with cafeteria staff. The CATCH Physical Activity (PA) program will also be recommended for use to school and preschool staff. A trained, Lead PA staff member will provide training on the use of the program.

LHD and UCCE will provide technical assistance at quarterly CNAP meetings.

LHD will conduct an assessment at the 7 school/alternative high school sites and develop an action plan to address the identified areas where changes are needed. This action plan and a timeline will be communicated to the assessed schools and will include progressively more areas of assessment with each year. Throughout the developing relationships with the 7 schools, LHD will provide various levels of training and technical assistance to teachers and administrators on a regular basis regarding nutrition/physical activity education/activities, school gardens/GENE, SLM, and policy, systems, and environmental changes. As LHD attends and participates in parent-teacher organization/district wellness committee meetings, technical assistance will be provided as needed as well.

LHD conduct an assessment at 2-4 selected SNAP-Ed approved retail environments and an action plan to address the identified areas where change is needed will be developed. The summary of the findings and suggestions will be presented to the retail managers/owners. LHD will provide technical assistance and training to store managers and owners of approved retail environments. The trainings will include: the health importance of fruits, vegetables, and healthy beverages; proper fruit/vegetable storage; healthy alternatives; creative display/marketing options; and the benefits and availability of utilizing locally grown produce. Additional trainings and technical assistance may be offered based on the results of the retail environment needs assessment conducted at approved retail environments. Additionally, training and technical assistance will be provided to retail environments regarding store tours. Finally, a post-intervention retail assessment at the 2-4 retail environments that have received the interventions will be conducted. These assessments will note any changes in access to healthy foods and beverages.

Evaluation Plan Narrative Summary

The number of SNAP-Ed eligible individuals reached through direct education (unduplicated), indirect education (duplicated) and PSE change activities will be compared to targets numbers established in the joint work plan and reported in the final report. Community Partners and nutrition activities that demonstrate high performance in terms of reach and effect will be identified and will be replicated. UCCE will conduct Impact and Outcome evaluations for the nutrition education/physical activity education series and stand-alone workshops utilizing approved evaluation tools including: Food Behavior Checklist, Taste Testing Tool, Pre/Post-test and Intent to Change tool. These tools will document achievement related to individual level behaviors and dietary practices as highlighted in the SNAP-Ed Evaluation Framework.

LHD will conduct process evaluation for the SNAP-Ed direct and indirect nutritional education activities. LHD will track and report direct education provided and use the evaluation tools assigned to each specific curriculum for the 7 qualified schools/alternative high schools. LHD will report progress made with school gardens and GENE starting in year 2 as well as the progress made in physical activity education. For school site and district level wellness committees, LHD will report on the needs identified and the policies adopted/implemented. In the third year of the work with the 7 schools/alternative high schools, LHD will analyze and report the SLM adoption and progress.

The number of participants for indirect activities will be kept by the LHD Community Health Assistant per intervention site. Surveys will be completed for participants of the direct education activities to assure an unduplicated count that will be entered in ATF system. All supporting documentation for the activities (recipes, lesson plans, etc.) will be maintained on a monthly basis.

For retail environments, LHD will conduct key informant interviews with 1-2 store owners/managers. Additionally, LHD will conduct a community retail food environments assessment annually for each approved retail environment in collaboration. Finally, LHD will report annually on PSE progress as well as track and report all trainings provided.

Quarterly meetings will occur with UCCE and LHD to promote collaboration and cooperation. Documentation notes will include areas discussed and follow-up. Collaborative effort will be used to review and revise activities to ensure program integrity and curricula fidelity is a priority. Social and environmental change related to school wellness policy, school/community gardens and agencies' adoption of Healthy Work Place Policies will provide evidence of the environmental level indicators included in the SNAP-Ed evaluation framework. When necessary, PSE strategies will be adjusted to address challenges and potential improvements for greater impact. Through quarterly meeting with LHD and UCCE will evaluate the effectiveness of the SNAP Ed projects utilizing the RE-AIM indicators:

Reach - *How will the targeted population with the intervention be reached?*

Efficacy - *How is it known that the intervention is effective?*

Adoption - *How is organizational support to deliver the intervention developed?*

Implementation - *How is it ensured that the intervention is delivered properly?*

Maintenance - How is the intervention incorporated so that it continues to be delivered over the long term?

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	50		0 to 4 years old (Preschool):	5.1%/ 2,303

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, 13 low resource schools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Physical Activity: structured physical activity, murals/stencils, Safe Routes to School/walk to school programs
- Healthy Eating: Smarter Lunchrooms Movement (SLM), edible gardens
- Local Procurement: from farm and school gardens
- Access to Healthy Foods: garden-enhanced nutrition education
- Wellness Policies: district and school site

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, LHD will conduct a nutrition environment assessment at 3 qualified schools and 3 alternative high schools then develop an action plan to address the identified areas in which changes are needed.
    b. By September 30, 2017, LHD will establish and communicate the action plan follow-up procedures and timelines with the 6 assessed schools.
    c. By September 30, 2017, LHD will provide healthy beverage education utilizing approved curriculum and support materials to a minimum of 350 youth at 6 qualified schools.

d. By September 30, 2017, LHD will provide nutrition education and physical activity education using approved lessons and support materials to a minimum of 350 youth at 6 qualified school.
e. By September 30, 2017, at 4 low-resource school sites, UCCE educators and 2 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 400 elementary students with direct education and 1000 parents and family members with indirect education.
f. By September 30, 2017, UCCE staff will work with partners committees to improve 4 of the 7 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
g. By September 30, 2017, a new structured PA program such as CATCH will be implemented by UCCE educators and 2 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 1 low-resource school sites already receiving nutrition education.
h. By September 30, 2017, UCCE staff will work with partners to assess School Wellness Committees and School Wellness Policies at one district and 2 school sites.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, LHD will conduct a nutrition environment and garden assessment at 7 qualified schools/alternative high schools then develop an action plan to address the identified areas in which changes are needed.
    b. By September 30, 2018, LHD will establish and communicate the action plan follow-up procedures and timelines with the 7 assessed schools.
    c. By September 30, 2018, LHD will provide healthy beverage education utilizing approved curriculum and support materials to a minimum of 350 youth at 7 qualified schools.
    d. By September 30, 2018, LHD will provide garden-enhanced nutrition education by assisting in the creation, development, and sustained operation of 3-7 school gardens at qualified schools in conjunction with approved lessons and support materials to a minimum of 350 youth at 7 qualified school.
    e. By September 30, 2018, at 6 low-resource school sites UCCE educators and 4 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 600 elementary students with direct education and 1000 parents and family members with indirect education.
    f. By September 30, 2018, UCCE staff will work with partners to improve 5 of 7 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
    g. By September 30, 2018, a new structured PA program will be implemented by UCCE educators and 4 trained extenders, such as classroom teachers, afterschool staff, and PE specialists at 2 low-resource school sites already receiving nutrition education.
    h. By September 30, 2018, UCCE staff will work with partners and School Wellness Committees to update School Wellness Policies at 1 district and 3 school sites.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, LHD will conduct a nutrition, garden, and physical activity assessment at 4 qualified schools/alternative high schools then develop an action plan to address the identified areas in which changes are needed.
    b. By September 30, 2019, LHD will establish and communicate the action plan follow-up procedures and timelines with the 4 assessed schools.
    c. By September 30, 2019, LHD will provide healthy beverage education utilizing approved curriculum and support materials to a minimum of 300 youth at 4 qualified schools.
    d. By September 30, 2019, LHD will utilize the Smart Lunchroom program to implement food service best practices and strategies to increase healthy food access and consumption at two qualified schools whilst utilizing approved lessons and support materials to a minimum of 300 youth at 4 qualified schools.
    e. By September 30, 2019, at 7 low-resource school sites UCCE educators and 6 trained extenders (classroom teachers, volunteers, and afterschool staff) will reach 700 elementary students with direct education and 1000 parents and family members with indirect education.
    f. By September 30, 2019, LIA staff will work with partners to improve all 7 of the school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies and school/district level wellness policy language includes SLM.
    g. By September 30, 2019, a new structured PA program such as CATCH will be implemented by UCCE educators and 6 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 3 low-resource school sites already receiving nutrition education.
    h. By September 30, 2019, UCCE staff will work with partners including School Wellness Committees to implement updated wellness policies and facilitate environmental or policy changes at 1 districts and 4 school sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Calaveras County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, 11 low resource schools and preschools will make changes to school policies, nutrition and physical education, and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Conduct an assessment at 4 qualified schools and 3 alternative high schools, develop an action plan to address the identified areas in which changes are needed, and communicate the suggested efforts and timeline with the assessed schools. Year 1: Nutrition environment Year 2: Reassess nutrition environment, assess garden environment Year 3: Reassess nutrition and garden environment, assess physical activity	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 , Q4 Year 2: Q1 X, Q2 X, Q3 , Q4 Year 3: Q1 X, Q2 , Q3 , Q4	Assessments; Action Plan; Timeline
1.2	Provide direct nutrition/physical activity and healthy beverage education utilizing approved curriculum and support materials to a minimum of 350 youth at 7 qualified schools/alternative high schools.	CED: X; CEI: ; MPR: ; C&C: X; TTA:	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 , Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly Reporting Tools Workbook; photos; informational fliers

1.3	Provide quarterly indirect education activities at 7 qualified schools/alternative high schools to a minimum of 350 students, parents, and family members. Activities include but are not limited to classroom, cafeteria, and lobby display boards; family activity nights, family newsletters, etc. and may communicate messages from Rethink Your Drink, Harvest of the Month, etc.	CED: ; CEI: X; MPR: ; C&C: X; TTA:	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 ; Q2 X; Q3 X; Q4 X Year 2: Q1 X; Q2 X; Q3 X; Q4 X Year 3: Q1 X; Q2 X; Q3 X; Q4 X	Quarterly Reporting Tools Workbook; photos; informational fliers
1.4	Catalogue any healthy site changes, sample wellness policies, etc. at 7 qualified schools. Share the information with participating organizations, post on websites, and present at local and statewide meetings and conferences when applicable.	CED: ; CEI: ; MPR X; C&C: ; TTA:	CWD: ; LHD X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 ; Q2 X; Q3 X; Q4 X Year 2: Q1 X; Q2 X; Q3 X; Q4 X Year 3: Q1 X; Q2 X; Q3 X; Q4 X	Quarterly Reporting Tools Workbook; screen shots
1.5	Coordinate three local media and public relations efforts annually that highlight local programs and communicate SNAP-Ed approved key message(s) through local media, nutrition education briefs, e-mail blasts, or social media sites.	CED: ; CEI: ; MPR X; C&C: ; TTA:	CWD: ; LHD X; AAA: ; UCCE X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 ; Q2 X; Q3 X; Q4 X Year 2: Q1 X; Q2 ; Q3 X; Q4 X Year 3: Q1 X; Q2 X; Q3 ; Q4 X	Quarterly Reporting Tools Workbook; photos; informational fliers

1.6	Attend parent-teacher organization meetings and school wellness committee meetings at 3-7 qualified schools/alternative high schools (LHD). UCCE will continue attending these meetings at schools sites they serve. 1.11	Establish or reinvigorate school gardens at 4-7 qualified school sites; each school site may begin at a different step, depending on the stage of development of the particular program: Step 1: Assess the interest and capacity for developing and utilizing school gardens for nutrition education. Step 2: Build partnerships and a coordinating committee at the school and assist in establishing a plan for building, maintaining, and promoting the school garden and program. Step 3: Identify the curricula to be utilized in the school garden and classroom in conjunction with UCCE Master Gardeners, garden committee and other partners. Step 4: Train teachers and other extenders and prepare materials for implementation of the program. Step 5: Assist in designing a sustainability plan for the school garden program e.g. funding, utilizing extenders as instructors, ongoing maintenance, etc. Year 1: 4 school sites UCCE Year 2: 5 (UCCE) and 2-4 (LHD) school sites = 9 total Year 3: 7 (UCCE and 4 (LHD) school sites = 11 total	X CED X CEI MPR X C&C X TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Meeting agendas and sing-in sheets; meeting notes; reporting Tools Workbook PSE annual reporting

1.12	Assist in adopting Smarter Lunchroom Movement (SLM) strategies in school cafeterias at 7-9 qualified school sites; each school site may begin at a different step, depending on the progression of the SLM program at each site: Step 1: Assess and identify site interest and capacity to implement the SLM. Step 2: Provide SLM training to food service directors and staff. Step 3: Conduct a SLM scorecard assessment with food service staff. Step 4: Assess the capacity of the school site to establish a student committee to involve students in SLM activities, including artwork, adding signage, creating names for entrees, etc. Step 5: Establish student committees as identified; assist the group to delineate goals and projects. Step 6: Assess if the school cafeteria environment would be improved by adding a mural; if yes, be sure to include students in designing the mural for the cafeteria. Step 7: Provide ongoing technical assistance to identify which 4-6 SLM strategies to employ and assist in implementation. Step 8: Conduct another assessment	<table><tr><td></td><td>CED</td></tr><tr><td>X</td><td>CEI</td></tr><tr><td></td><td>MPR</td></tr><tr><td>X</td><td>C&C</td></tr><tr><td>X</td><td>TTA</td></tr></table>	<table><tr><td></td><td>CWD</td></tr><tr><td>X</td><td>LHD</td></tr><tr><td></td><td>AAA</td></tr><tr><td>X</td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table>	CWD: LHD: AAA: UCCE: CCC:	Year 1 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 2 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 3 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table>	SLM scorecard assessment; sign-in sheets; meeting notes Reporting Tools Workbook PSE annual reporting

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Calaveras County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, LIAs will provide nutrition education to at least 400 people from all age ranges who are SNAP-Ed-eligible in Calaveras County. Educational workshops will promote the consumption of fruits and vegetables, healthy beverage options, and awareness of best practices in food resource management.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

I. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Eating: increase access to fresh fruits and vegetables, nutrition and food resource management education
- Access to Healthy Foods: build capacity to implement healthy food and active living standards policy at the community level and by community organizations, implement healthy food procurement policies at food banks and food pantries
- Communication Environment: link to online resources, eatfresh.org text messages, etc.
- Physical Activity: increase PA education and opportunities

II. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

III. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, LIAs will conduct a minimum of 6-series based, and 26-single session nutrition and/or food resource management education sessions using approved curricula to reach 300 SNAP-Ed-eligible adults and young adults.
b. By September 30, 2017, UCCE staff will work with community partners to develop a relationship with the food pantry with a goal of implementing a new healthy food procurement policy by providing technical assistance and support.

c. By September 30, 2017,LIAs will conduct approved indirect nutrition and/or food resource education to approximately 300 SNAP-Ed eligible adults and youth at food banks, pantries, events and festivals at qualified sites.

IV. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, LIAs will conduct a minimum of 6-series based and 31-single session nutrition and/or food resource management education sessions using approved curricula to reach 350 SNAP-Ed-eligible adults and young adults.
b. By September 30, 2018, UCCE staff will work with community partners to provide technical assistance with the Nutrition Policy Institute to write a new healthy food procurement policy for the food bank.
c. By September 30. 2018, LIAs will conduct approved indirect nutrition and/or food resource education to approximately 400 SNAP-Ed eligible adults and youth at food banks, pantries, events and festivals at qualified sites.

V. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, LIAs will conduct a minimum of 6-series based and 36-single session nutrition and/or food resource management education sessions using approved curricula to reach 400 SNAP-Ed-eligible adults and young adults.
b. By September 30, 2019, UCCE staff will work with community partners to implement the new healthy food procurement policy at the food bank.
d. By September 30, 2019, LIAs will conduct approved indirect nutrition and/or food resource education to approximately 500 SNAP-Ed eligible adults and youth at food banks, ~~pantries~~, events and festivals at qualified sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Calaveras County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, LIAs will provide nutrition education to at least 400 (direct education) and 3000 (indirect education) people from all age ranges who are SNAP-Ed-eligible in Calaveras County. Educational workshops will promote the consumption of fruits and vegetables, healthy beverage options, and awareness of best practices in food resource management.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	UCCE: Will conduct a minimum 6 series-based and 15-20 single session nutrition and physical activity education lessons utilizing approved curricula. We anticipate reaching a minimum of: Year 1: 100 people; Year 2: 120 people; Year 3: 130 people. LHD: Will complete a minimum of 3-6 single session nutrition and physical activity education lessons with a total of 25-50 people per year. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 2-4 SNAP-Ed qualifying grocery stores and markets through adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy food and beverage policies/stocking standards
- Local procurement
- Healthy in-store marketing and promotions

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, conduct an assessment of the retail environment in 2-4 selected SNAP-Ed qualifying grocery stores and markets.
    b. By September 30, 2017, provide healthy food and beverage merchandising materials, conduct monthly taste testing of healthy food/beverage approved recipes, and conduct quarterly meetings with management of 2-4 SNAP-Ed qualifying retail locations.
    c. By September 30, 2017, 2- 4 SNAP-Ed qualifying retail stores will increase access and/or promotion of healthy foods and beverages.
2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, conduct an assessment of the retail environment in 2-4 selected SNAP-Ed qualifying grocery stores and markets.
    b. By September 30, 2018, provide healthy food and beverage merchandising materials, conduct monthly taste testing of healthy food/beverage approved recipes, and conduct quarterly meetings with management of 2-4 SNAP-Ed qualifying retail locations.

c. By September 30, 2018, 2-4 SNAP-Ed qualifying retail stores will increase access and/or promotion of healthy foods and beverages.
d. By September 30, 2018, 1-2 SNAP-Ed qualifying retail stores will have at least 1 healthy checkout lane.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, conduct an assessment of the retail environment in 2-4 selected SNAP-Ed qualifying grocery stores and markets.
   b. By September 30, 2019, provide healthy food and beverage merchandising materials, conduct monthly taste testing of healthy food/beverage approved recipes, and conduct quarterly meetings with management of 2-4 SNAP-Ed qualifying retail locations.
   c. By September 30, 2019, 2-4 SNAP-Ed qualifying retail stores will increase access and/or promotion of healthy foods and beverages.
   d. By September 30, 2019, 1-2 SNAP-Ed qualifying retail stores will have at least 1 healthy checkout lane.
   e. By September 30, 2019, 1-2 SNAP-Ed qualifying retail stores will incorporate locally grown produce.
   f. By September 30, 2019, 1-2 SNAP-Ed qualifying retail stores will conduct quarterly store tours with SNAP-Ed eligible populations.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 2-4 SNAP-Ed qualifying grocery stores and markets through adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation

	Total Direct Costs:	**$21,765**	**$117,721**	**$138,925**	**$160,690**	36.50%
9	Indirect Costs*** Indirect Cost Rate= 10%	$735	$9,545	$11,075	$11,810	23.73%
	Total Federal Funds	**$22,500**	**$127,266**	**$150,000**	**$172,500**	35.54%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	The reasons the budgets are so much higher are because CDPH/SNAP-Ed increased the budget from $127,266 to $150,000 for FFY 2017 and then instructed us to budget 15% Carry Forward to a total of $172,500 for FFY 2018.
2	Non-Capital Equipment/Supplies	Less Office Supplies and copies are anticipated
3	Materials	Fewer Small Cooking Tools and Cooking Utensils will be needed as purchased in prior years.
4	Travel	Less Travel is anticpated in FFY 2018.
5	Building/Space	N/A
6	Maintenance	N/A
7	Equipment and Other Capital Expenditures	N/A
8	Contracts/Sub-Grants/ Agreements**	N/A
9	Indirect Costs	The reasons the budgets are so much higher are because CDPH/SNAP-Ed increased the budget from $127,266 to $150,000 for FFY 2017 and then instructed us to budget 15% Carry Forward to a total of $172,500 for FFY 2018.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

6. Maintenance:

Budget Adjustment: Add Delete Reduce Increase	Budget Adjustment: Last Amount Approved	Location Name/Address	Calculation Description	FTE	Cost per Month	# of Month(s)	Total	Budget Adjustment: Budget Justification
1		Public Health Main Office: 700 Mountain Ranch Road, Suite C-2, San Andreas, CA 95249	Utilities monthly amount $596 x 12 months x (1.65 Snap Ed FTE/ 15.15 dept. total FTE).	.1089	$596.00	12	$779	
2		Public Health Main Office: 700 Mountain Ranch Road, Suite C-2, San Andreas, CA 95249	Communications (Phone, Fax, Internet) Monthly Amount $708.33 x 12 mo. X (1.65 Snap Ed FTE/15.15 Dept. total FTE).	.1089	$708.33	12	$926	
3		Public Health Main Office: 700 Mountain Ranch Road, Suite C-2, San Andreas, CA 95249	Janitorial/custodial services monthly amount $833.33 x 12 months x (1.65 Snap Ed FTE/ 15.15 dept. total FTE). Custodial services are provided through the county (county employees) and that is the price we were given by the Public Works Facilities department. We budgeted $10,000 annually for custodial. $10,000 ÷ 12 months = $833.33 per month for the entire price of the health department. Facilities then invoices us on a quarterly basis for actual hours performed by the custodial crew. We get a special discount price on electric utilities through Calaveras Public Power Agency (CPPA) that provides electricity to public facilities in the county of Calaveras. Heating and the water heater use natural gas which is a much lower cost than propane, coal, or oil.	.1089	$833.33	12	$1,089	
						Total Maintenance:	**$2,794**

County Name: Colusa

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
x	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
x	California Department of Public Health: CDPH: (Local Health Department: CSU Chico, Research Foundation)
x	California Department of Aging: CDA: (Area Agency on Aging, CSU Chico, Research Foundation: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

The information in the jurisdiction description comes in part from the 2015 SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources, California Food Policy Advocates, the Centers for Disease Control and Prevention (CDC) and the UCLA Center for Health Policy Research.

Colusa County is considered a small rural county located in the northern region of California. It has a population of 21,056 with 37.7% SNAP-Ed eligible (income <185%FPL), including 54.4% children (ages 0-17). Of the 17 schools in Colusa County, 16 (94.2%) are SNAP-Ed eligible (>50% FRPM Enrollment, 2012). The number of SNAP-Ed eligible people living in Colusa County is 7,938 with 76.2% identifying themselves as Hispanic, 20.3% White (non-Hispanic) and 3.4% unknown. The two primary languages spoken in this county are English and Spanish. With this large Hispanic population in this county, it is important to consider the health disparities between this population and the general population. According to the CDC, Hispanic adults are 1.2 times more likely to be obese and 1.7 times more likely to have diabetes compared to non-Hispanic white adults. According to the Community Health Needs Assessment conducted in 2013, both obesity and diabetes ranked in the top three health concerns for Colusa County. Language barriers and lack of access to preventative health care and health insurance all contribute to the overall health profile of the Hispanic population. Additionally, this population tends to have a lower income and a higher percentage of individuals living below poverty compared to non-Hispanic whites (US Census Bureau, 2015).

Approximately 1,820 residents participate in CalFresh. Recent CalFresh participation data shows that this represents only 57% of those eligible in the County--ranking in the bottom ten of all California Counties according to the Program Access Index. Even though, the rate of food insecurity is 14.8% in the county for total population and 29.0% for children (higher than the California rate of 25.1%), the county ranks 49th out of California's 58 counties in CalFresh participation according to Program Access Index (PAI) report released by the California Food Policy Advocates in 2015. According to the UCLA Center for Health Policy Research in 2014, 57.8% of adults were food insecure, an increase of 19.6% from the previous year.

Less than 65% of SNAP-Ed adults can always find fruits and vegetables in their neighborhood. Additionally, the consumption of fast food by SNAP-Ed eligible adults is high with 51.5% choosing fast food more than 1 time per week. With that said, the adult overweight/obesity prevalence in Colusa County is 60.7% overall, approximately 1% above the statewide average. According to FFY 2014 data, SNAP-Ed eligible adults had an overweight/obesity prevalence rate of 71.1%, whereas 2015 data reports that rate has dropped 48.4%. This drastic change in just one year has lead us to question the validity of this data; however, we are confident that the many improvements made Colusa County in recent years, both SNAP-Ed and non-SNAP-Ed funded, are certainly making an impact in the lives of the SNAP-Ed eligible population.

More than half (61.5%) of children and teens 2-17 years eat 2 or more servings of fruit per day. Although these consumption percentages are slightly higher than the state's average for children and adults, the percentage of overweight/obese children aged 12-17 in this county 38.8%, is over six percent higher than the state rate for that age group. Among children and teens, 62.3% choose fast food once or more per week, compared to an average of 71.6% in California. Though Colusa is a rural county with open space, only 54% of children age 5-11 are physically active at least one hour every day.

According to the SNAP-Ed 2015 County profiles, there are 15,624 documented seniors (65 years and older) who are SNAP-Ed eligible in PSA 3 counties, which include Butte, Colusa, Glenn, Tehama, and Plumas. Residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. The aging of the population is particularly noticeable in PSA 3, where the senior population is already a significant portion of the total population and is continuously growing. Colusa County is estimated by CDA to have about 4,547 seniors (60 years or older). According to the SNAP-Ed 2015 County profiles, there are 15,624 documented seniors in PSA 3 (65+) who are SNAP-Ed eligible. It is one of 8 counties that is projected to have more than 300-399% increase in its senior population from 1990 to 2020.

4. **Community Assessment**

According to the Robert Wood Johnson Foundation's 2015 County Health Rankings, Colusa County ranks 35th out of 57 for Health Factors and the CX^3 community assessment results indicate access to healthy foods is severely limited in three communities (Colusa, Williams, and Arbuckle). Due to the rising disparity in healthy food availability, particularly for the low-income population, the overall goal of this work plan is improving food environments, increasing resource management behaviors and increasing food security among the SNAP-Ed eligible population. This FFY 17-19 Integrated Work Plan is developed using the information in the jurisdiction section, CX^3 community assessment results, data from the Robert Wood Johnson Foundation and UCLA Center for Health Policy Research, Colusa Counties SNAP-Ed County Profile, input from other county health and social service programs, various community stakeholders and partnering community based organizations.

According to the 2013 Colusa Regional Medical Center's Community Health Needs Assessment, 50% of respondents rated their community as "Somewhat Healthy" while 33% felt their community was "Healthy" (n=134). This indicates an opportunity to improve Colusa County's residents' perception of their community's health. Respondents were also asked to identify the three most serious health concerns in the community. Of 132 respondents, the number one health concern was "Alcohol/substance abuse" (52%), followed closely behind by "Obesity" (44%) and then "Diabetes" (38%).

The Colusa County CX^3 results indicate that access to healthy foods is severely limited throughout the county. There is one large supermarket in the City of Colusa. The remaining stores surveyed were small markets and convenience stores. None of the small markets surveyed meet the access and availability to healthy foods standard, as defined by CX^3. Less than 50% of the stores meet the WIC and Food Stamp vendor acceptance and signage standards. Less than 30% meet the standards for selling fruits, vegetables, and other healthy foods. Less than 40% meet the standards for safe, walkable streets. None of the 10 fast food outlets meet the fast food quality standard. Due to the political climate and stakeholder involvement, it is difficult to address the rather high fast food availability and consumption in this county. Thus, future efforts will be addressing healthy food access via corner stores. In conjunction with other non-SNAP-Ed programs (CDFA funded farm to school efforts, Farmers' Market Promotion Program (FMPP) funded school site farmers' market, etc.), the focus of the past three years has

been on increasing access to healthier, locally grown, low-cost foods. Eventually, a fast food initiative may be added to a comprehensive plan so that families are well equipped to make healthier choices in a community that supports such choices.

According to the SNAP-Ed County profile, the percentage of overweight/obese children aged 12-17 in this county 38.8%, over six percent higher than the state rate for that age group. In 2016, the FMPP (USDA) funded research project is gathering data from students at Egling Middle School regarding fruit and vegetable preferences, availability, consumption, cooking attitudes and self-efficacy. Results of these surveys indicate that almost two thirds of students (65%) purchase their own food to eat at home and only 57% of them are “very sure” they can make healthy choices at the grocery store. Thus, efforts in corner stores frequented by youth and their families and school-based interventions will continue to address this. Additionally, almost a quarter of students (24.8%) indicated that vegetables were only “sometimes” or “never” available to eat at school. Twenty two percent said the same of fruits being available to eat at school. With continued efforts to support school wellness policies and enhance fresh, local food procurement practices, we hope to increase the availability of appealing, healthy foods during the school day and at school supported functions.

Currently, Nutrition And Physical Activity Self-Assessment for Child Care (NAP SACC) assessments on infant and child physical activity, infant and child nutrition, outdoor play and learn, and screen time are being conducted in early childhood education settings in Colusa County. The results of these assessments will be used to identify future interventions; however those results will not be available until late in 2016. These findings will not only ensure that early childhood education activities will address the most pressing nutrition- and health-related issues for this age group, but will also provide a baseline for capturing the results of interventions over time.

Needs assessments conducted at congregate meal sites in FFY14 identified the needs and opportunities necessary to enhance nutrition education, physical activity, and food security of CalFresh-participating and/or eligible seniors. Gaps in services provided to the seniors in the counties assessed were also determined. In Colusa County, focus will be on 1) developing a system to provide constant nutrition and physical activity information to seniors, to encourage them to eat healthy and live actively, and 2) increase access to healthy food and beverages. This is essential, as the 2015 Colusa County Congregate Meal site nutrition assessments showed that 55.7% of the senior population were considered to be in the high nutritional risk group and 31.4% were in moderate nutrition risk group. The assessment also showed that 43.5% have an illness or condition that made him/her change the kind/or amount of food he/she consumed.

5. **Community Change Goals**

Based on the results of the Community Assessments and the collaborative input of various Colusa partners, the overarching goals by setting for FFY 2017-2019 include:

1. Core setting: Educational environments pre-k through high school
    a. By September 30, 2019, five low resource learning environments, including pre-k through high school, will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and staff.
        i. Efforts will focus on increased access to and demand for and availability of healthy fruits, vegetables, and beverages during the school day and at school supported functions. A primary focus will be on the Smarter Lunchrooms Movement (SLM) and continue to be on Farm-to-School opportunities such as school gardens and farmer agreements in an effort to increase local food procurement. A secondary focus will be on HOTM via indirect education to compliment the primary focus.
        ii. In the secondary setting, early childcare centers: Based on NAP SACC results and initial interventions in 2016, preschool sites will continue to develop and/or implement site wellness practices, including making healthy site changes to improve the nutrition and physical activity environment for participating children.
2. Complimentary setting: Community centers, senior centers
    a. By September 30, 2019, collaborate with LIAs and community partners to increase awareness of and access to healthy fruits, vegetables, beverages, and physical activity resources at one senior meal site and eight SNAP-Ed qualifying community sites via nutrition and physical activity direct education, indirect education, and adopted and implemented policy and physical site changes.
        i. Efforts will focus on improving food resource management skills or strategies in an effort to increase food security for SNAP-Ed eligible residents. This will heavily involve the partnership of the Family Action Centers, a local CalFresh Outreach subcontractor and emergency food distribution site, as well as our retail partners and other community based organizations where families congregate. Additionally, key messages will be coordinated with HOTM to reemphasize the information youth and families receive regarding low-cost, in-season produce via school and retail interventions.
3. Core setting: Retail food outlets/corner stores
    a. By September 30, 2019, increase access to healthy fruits, vegetables, and beverages at **four** SNAP-Ed qualifying neighborhood retail stores through adopted and implemented policy and physical site changes.
        i. Efforts will primarily be in those qualifying markets frequented by low-income school youth, families and older adults.

It is recognized that many of these community change goals are long-term and require the support of external partners and additional funding streams. The Colusa CNAP partners have taken on these larger goals, and the Colusa County SNAP-Ed LIA partnership has committed to contributing allowable pieces of these larger community goals based on agency expertise, SNAP-Ed guidance, and alignment with the United States Department of Agriculture (USDA)-Western Regional Office's Evaluation Framework. While Colusa County data and needs are described in the above sections, the selected goals and settings are provided in more detail below.

The early childcare providers will be following up on NAP SACC assessment results from FFY 2016 to implement self-identified environmental improvements to support lasting changes. The K-12 schools will be losing two key programs ending in 2016: 1) the California Department of Food and Agriculture's funded Farmer of the Month program which was based on the CDPH developed Harvest of the Month program with a strong emphasis on locally procured specialty crops and included monthly tastings; and 2) the USDA Farmers' Market Promotion Program funded School Farm Stand Pilot Project which established the bi-monthly farm stand located at Birchfield Primary School during after school pick-up hours for the children and their families to taste a healthy, fresh recipe and then be able to purchase the ingredients to prepare at home. Due to these programs ending, the emphasis in the elementary schools will be on continuing HOTM activities and school wellness efforts. Additionally, as a follow up to the FMPP funded research, efforts to enhance fresh, local food procurement practices via the Smarter Lunchrooms Movement (SLM) and Farm to School will continue in the hopes of increasing the availability of appealing, healthy foods during the school day and at school supported functions. Efforts towards physical activity in both the early childcare and K-12 school settings will include the development of action plans to address identified needs and provide training, support and technical assistance to staff pertaining to PA environmental improvements, as well as proposing new language for site policies/practices related to PA interventions or environments.

While the retail objective focuses on improving the food landscape, the education and partnership building in the complimentary community settings are focused on increasing the demand for healthful foods and beverages so that residents are poised to take advantage of the improved food landscape. The partnership with the Family Action Centers (FAC), a CalFresh Outreach (CFO) subcontractor and Emergency Food Distribution Site, will focus on improving CFO redemption rates and offering food security and food resource management education to low-income families frequenting their sites. The partnership with Colusa County Resource Conservation District will be a conduit for disseminating information via their Food Guide and participation in events such as the Farm Show for which they receive CA Department of Food & Agriculture (CDFA) funding. Additional partnerships with community organizations frequented by low-income families will also be nurtured to include more HOTM messaging as well as more health promoting policies and practices.

CX3 in 2015 resulted to interventions at one retail site, El Toro Loco, in Colusa in 2016. These efforts are continuing to maintain the impact at the Colusa site and the intervention is expanding to the Williams site in 2016. The plan is to continue bringing on new retail outlets in 2018 & 2019 while also increasing and varying the intervention strategies at the initial sites for continued improvements. Additionally, key partners including the Tobacco Education Program and their relationship with community youth (via Friday Night Live and Colusa High School) which provides the community connections and additional resources making this a ripe time to focus on improving the food landscape of Colusa County.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

This proposed work plan will seamlessly advance Colusa County's SNAP-Ed programming, which is coordinated through Colusa County's County Nutrition Action Plan (CNAP) group named Colusa County Grown Food Council. Given the limited resources and players in this unique rural county, Colusa County Health & Human Services Agency and the Center for Healthy Communities (CHC) have been actively working for many years to collectively coordinate activities.

Colusa County Grown Food Council is comprised of SNAP-Ed funded and unfunded partners serving the eligible population in the areas of food programs, nutrition education and physical activity promotion. Over the past four years, the Colusa County Grown Food Council has aimed to create an environment for Colusa County residents prioritizing health, food equality, local agriculture and physical activity in all facets of the community via education, outreach, policy and systems change.

The CNAP group meets at least four times per year, with subcommittees meeting intermittently as needed. LIAs will promote SNAP-Ed services and activities by connecting with other agencies and partners. Agencies and partners include: UC CalFresh, Colusa County Health & Human Services Agency, PSA 3, WIC, CalFresh Outreach, Colusa County Office of Education (CCOE), Colusa County First 5 Family Action Centers, Colusa County Indian Community Council, Colusa County Resource Conservation District, Maternal & Child Health, Tobacco Education Program, Colusa Regional Medical Center, Colusa Unified School District, Williams Unified School District, Maxwell Unified School District, local growers, retail owner/managers, and community stakeholders. In 2017-19, efforts will be made to pull in local government officials to elevate the work of these partners.

Letters of commitment have been submitted from Colusa Unified School District and Colusa Senior Meal Program to implement back to scratch cooking techniques and participate in quarterly trainings. This proposal was submitted to Centers for Disease Control in hopes of receiving funding beginning in FFY 2017. If funded, the LIAs working with these partners will leverage this opportunity to improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population in schools and senior meal programs.

While many of these partners offer services outside of the SNAP-Ed scope, the Council primarily focuses on areas of common interest. Many of these partners are contributing to this work plan in various objectives as outlined in the community change goals and further described in the intervention narrative. Non SNAP-Ed funded, UC Expanded Food and Nutrition Education Program (EFNEP) is in 3 sites and assists limited-resource families with children, through series based, behaviorally focused nutrition education. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and be physically active. EFNEP also contributes to participants' personal development and the improvement of their total family's diets and nutritional welfare. EFNEP is supported USDA's National Institute of Food and Agriculture (NIFA) Smith-Lever funds. EFNEP adult program is eight lessons and provides education through the Promotora Model. The effectiveness of nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Food Behavior Checklist and 24-hour food recalls) filled out by participants. EFNEP partners with community based organizations. Methods for program delivery include direct teaching to groups.

7. **Key Messages**

x	Food Safety	x	Physical Activity	x	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
x	Fruits & Vegetables	x	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
x	Fats and Oils	x	Food Shopping/ Preparation		
x	Lean Meat & Beans				
x	Sodium & Potassium				
x	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Colusa County reviewed the approved integrated curriculum list provided by the state agencies, and reviewed each different piece to determine the best option for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population, as well as our chosen SNAP-Ed three-year and annual objectives.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies in Colusa County – UC CalFresh, LHD and AAA - will collaborate to provide comprehensive multi-level behavior-focused nutrition education/physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with partners throughout the county. The existing CNAP will continue and efforts will be made to enhance the coordination of USDA food program interventions and strategies to increase food security. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies proven to change behavior. Delivery methods have been specifically identified by implementing SNAP-Ed funded partners as indicated below.

The LIAs will conduct activities at the individual and interpersonal level of the Social Ecological Model. The LIAs also incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venues. In addition, Training and Technical Assistance of community extenders and intermediaries will be offered throughout the year with sharing across agencies whenever possible. In addition, Community/Nutrition Education Direct and Community/Nutrition Education Indirect will be provided by the LHD and UC CalFresh. Coordination and Collaboration will be specifically addressed by all LIAs collaboratively and with their individual service populations.

This proposed work plan will build on activities and services accomplished by previous SNAP-Ed projects. FFY 2017-19 will focus heavily on comprehensive key messaging and interventions in schools, retail outlets, and community settings where low income families congregate. School based interventions and messaging will compliment and build on one another throughout the year to enhance the interventions taking place in the retail outlets as well as in community settings. The goal of this multi-layered approach is to saturate Colusa County from pre-K to seniors with similar messaging, primarily focusing on improving food environments, increasing resource management behaviors and increasing food security among the SNAP-Ed eligible population. For example, key messaging in schools will be focused on seasonal, low-cost Harvest of the Month produce. That same produce each month will be highlighted in the retail interventions and food distribution sites. In the community sites, lessons and outreach will promote these same foods, food resource management techniques, and promote food access programs.

UC CalFresh and the LHD will utilize multiple delivery methods and intervention strategies to reach low-income elementary school students, their parents, and school educators and administrators. UC CalFresh will focus on direct education to eligible elementary school students utilizing approved curriculum. Education will be offered in multiple locations, but with the greatest intensity at schools in the priority neighborhoods. LHD will focus on indirect education via Harvest of the Month tastings and messaging in displays/newsletters. LIA staff will provide teacher trainings at school staff meetings and grade level meetings. UC CalFresh nutrition education resources will be available to teachers on a checkout basis. UC staff will provide at least two lesson demonstrations to teachers within the school year to support comprehensive classroom nutrition education. In addition, school based programming will extend from classroom education into school food service programs via Smarter Lunchrooms and Farm to School, in partnership with the CA Farm to School Network regional lead. Parent Teacher Association or Organizations (PTA/Os) will be targeted for recruitment of adults and families for UC CalFresh series based nutrition education to reinforce school based messaging. Family-centered approaches will be used to help students achieve a healthy lifestyle through role modeling; engaging children in food preparation and changing current eating and shopping habits. Additional PSE strategies to encourage more active play will include playground stenciling and Safe Routes to School. . UC CalFresh will also provide series based direct education to SNAP-Ed eligible adults and parents utilizing Making Every Dollar Count; helping families stretch their foods dollars and make better financial decisions.

Based on NAP SACC assessments conducted in FFY 2016, healthy nutrition and physical activity policies and procedures will be implemented in early care and education settings, which will include (but are not limited to) standards for all foods and beverages offered on site, opportunities for daily physical activity, limits

on screen time and the provision of quality nutrition education, garden-based and physical activity education, marketing guidelines for materials posted and shared on site, and/or family style dining. Messaging will align with the Harvest of the Month produce cycle to reinforce key messages community wide.

The education and partnership building in community settings are focused on increasing the demand for healthful foods and beverages so that residents are poised to take advantage of the improved food landscape. The partnerships described above will focus on improving CFO redemption rates, offering food security and food resource management education, disseminating information via existing county resources, and participation in events such as the Farm Show. Additional partnerships with community organizations frequented by low-income families will also be nurtured to include more HOTM messaging as well as more health promoting policies and practices. These activities will be facilitated via CNAP convenings.

Additionally, nutrition education will be provided to the adult and older adult SNAP-Ed population that connects shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines. Focus will be placed on selecting target foods and beverages; increasing the skills for label reading, menu planning and food budgeting; increasing knowledge of MyPlate recommendations and exposure to and acceptance of new healthy foods, i.e. HOTM.

In an effort to reach low-income seniors, the AAA's intervention plan progresses at the environmental level of the Social Ecological Model (SEM) through the inclusion of policy, systems, and environmental (PSE) change efforts compared to previous years. Utilizing site assessment data collected in FFY 2015 and 2016, it was determined that environmental changes to the physical dining space at the eligible congregate meal site would be a desirable strategy. Thus, a Nutrition and Physical Activity Center (NPAC) toolkit will be developed and displayed as an environmental support to SNAP-Ed eligible congregate meal participants in an effort to increase: consumption of healthy foods and beverages; awareness of food safety practices; and physical activity opportunities among seniors at eligible congregate meal sites. The NPAC toolkit will feature the four lessons of Eat Smart, Live Strong on display, rotating one per quarter along with additional SNAP-Ed approved resources and messages. In FFY 2017, direct education will be provided by the LHD (in coordination with AAA identified topics) and lessons will also feature the Harvest of the Month produce cycle to reinforce key messages community wide. The congregate site staff will be given the NPAC toolkit elements and supported with additional training and ongoing technical assistance related to the curriculum and to the use the NPAC toolkit. Outcomes of the NPAC toolkit will be evaluated using the pre and post survey Food Behavior Checklist (FBC) and Rapid Assessment of Physical Activity (RAPA).

In addition to the NPAC support, the congregate site staff will receive training and technical assistance regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to SNAP-Ed seniors. Training the staff will leverage resources, build program sustainability, and enhance the program’s overall capacity to encourage and support healthful behaviors among the senior population. In partnership with the CalFresh office, local churches and clinics, and other community-based organizations that serve the seniors, promotional resources will be distributed to encourage participation in the congregate meal program.

Retail interventions which begun in 2015 following the initial CX3 assessments will continue in FFY 2017-19. Initial efforts at the El Toro Loco corner store in the City of Colusa continue to maintain impact and interventions will begin at the Williams site in 2016. The plan is to continue bringing on new retail outlets in 2018

& 2019 while also increasing and varying the intervention strategies at the initial two El Toro Loco sites for continued improvements. Key partners including the Tobacco Education Program and their relationship with community youth (via Friday Night Live and Colusa High School) will provide the community connections and additional resources to increase food access in underserved neighborhoods by increasing the number of fruits and vegetables available in the corner markets.

PSE efforts in retail store environments will focus on product placement strategies, Healthy check-out lanes, Healthy grab and go, smart snacking stations, healthy items in prominent store locations and improved advertising and marketing strategies. Retail events, such as the Fruit and Veggie Fest, will be located at the retail site or neighboring school. These community wide events will highlight retail improvements and will bridge the messaging that is being promoted in schools and community sites. Additionally, healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries) will be encouraged to support education efforts.

Evaluation

Process evaluation reporting will document the range of SNAP-Ed services provided in Colusa County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated) and indirect education (duplicated) will be documented in the ATF/EARS and compared to original reach targets. The actual number of SNAP-Ed eligible individuals reached by PSE change activities will also be compared to targets and sites that showed high performance in terms of reach and multi-intervention strategies will be identified and considered for replication. Effectiveness of the NPAC toolkit will be evaluated using the pre and post survey Food Behavior Checklist (FBC) and Rapid Assessment of Physical Activity (RAPA).

The LIAs will use a series of process evaluation protocols and fidelity measures will be used to assess the technical training and assistance. Effectiveness of training of nutrition and physical activity will be measured. Post survey will be used in every training. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings.

Policy, system and/ or environmental change to promote healthy policy at a congregate meal site/ senior living will be documented using RE-AIM indicators. The RE-AIM indicators will be evaluated on an annual basis to inform future strategies and potential enhancements for greater impact.

The PSE strategies for early childhood, farm to school and CX3 will be reported using the Western Region SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, adjust PSE strategy to address challenges.

UCCE will be working with the UC CalFresh state office to align, as appropriate, evaluation tools and results to the Western Regions SNAP Ed evaluation framework.

- UC CalFresh will utilize the Teacher Tasting Tool (TTT) evaluation tool to gather data on food-tasting behaviors. It will be used in the classroom during nutrition education lessons when students receive their tastings. The tool will evaluate students' previous exposure to the target food and willingness to try the food again.
- UC CalFresh will utilize the Adult Tasting Tool (A/TTT) evaluation tool to gather data on food-tasting behaviors. It will be used during nutrition education lessons when adults receive their tastings. The tool will evaluate adults' previous exposure to the target food and willingness to try the food again.
- The Teacher Observation Tool (TOT) evaluation tool will be used to gather data from teachers regarding behavior change in regards to nutrition and physical activity within the classroom. Teachers will report both qualitative and quantitative data including narratives about observed behavior change amongst students.
- UC CalFresh will utilize SLM score card to evaluate PSE changes in school cafeterias.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	51		0 to 4 years old (Preschool):	300
Female	49		5 to 17 years old (School Age):	2,680
			18 to 59 years old (Adult):	2,400
			60 years old and over (Senior):	200
Total:	100			5,580

3. Ethnicity/Race

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, five low resource learning environments, including pre-k through high school, will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and staff.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- **School Wellness Policy:** Support and enhance written wellness policies and procedures to improve the nutrition and physical activity environment.
- **Physical Activity:** Implement changes in the school environment that support and promote physical activity.
- **Healthy Eating:** Implement behavioral economic strategies including the Smarter Lunchrooms Movement (SLM), family style serving, etc. to increase selection of healthy foods and improve eating behaviors.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, at three low resource school sites, LIA educators will implement: 1) training and technical assistance with school staff and teachers, 2) direct education reaching a minimum of 600 students, 3) indirect education reaching a minimum of 2,530 students and 3,730 parents, 4) will work with partners including nutrition services to improve one of these schools' environments by initiating behavioral economic strategies including the SLM, and 5) will work with school administration and nutrition services to enhance School Wellness Policy efforts.

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, at three existing and one additional low resource school sites, LIA educators will implement: 1) training and technical assistance with school staff and teachers, 2) direct education reaching a minimum of 650 students, 3) indirect education reaching a minimum of 2,530 students and 3,730 parents, 4) will work with partners including school food service staff to improve one of these schools' environments by implementing behavioral economic strategies including the smarter lunchroom movement (SLM) and/or family style serving, 5) implement changes in the school environment that support and promote physical activity at one school site (playground stenciling, Safe Routes to School, etc.), and 6) will work with school administration and nutrition services to enhance School Wellness Policy efforts.

3. **FFY 2019 (Year 3) Objective(s):**

    a. By September 30, 2019, at four existing and one additional low resource school sites, LIA educators will implement: 1) training and technical assistance with school staff and teachers, 2) direct education reaching a minimum of 700 students, 3) indirect education reaching a minimum of 2,530 students and 3,730 parents, 4) will work with partners including school food service staff to improve two school environments by implementing behavioral economic strategies including the smarter lunchroom movement (SLM) and family style serving, 5) implement changes in the school environment that support and promote physical activity at two school sites, and 6) will work with school administration and nutrition services to enhance School Wellness Policy efforts.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Colusa County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/20/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, five low resource learning environments, including pre-k through high school, will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and staff.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Meet with school teachers and administrators to discuss and assess the status of school wellness policies currently in place. Continue to participate in district level school wellness committees, assist work groups as identified, and establish and communicate action plan follow-up procedures and timelines with partnering sites for all PSE changes. For ECE sites, this may done be at the individual site level or the Office of Education. Meetings will follow up on the progression of the NAP SACC assessments conducted in 2016 for a minimum of two sites to implement PSE changes. Year 1= assess the status of school wellness policies currently in place, Year 2= strengthen school wellness policies to support obesity prevention efforts based on assessments, Year 3= develop an action plan and monitor implementation of school wellness policies. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, collaborate with LIAs and community partners to increase awareness of and access to healthy fruits, vegetables, beverages, and physical activity resources at one senior meal site, one public housing site, and eight SNAP-Ed qualifying community sites via nutrition and physical activity direct education, indirect education, and adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Support and enhance system and environment to increase consumption of healthy fruits, vegetables, beverages, and physical activity (AAA)
- Increase access to healthy foods, beverages and opportunities for physical activity via partnering organizations (Farm Show, library, food distribution sites, public housing, parks & rec, hospital, CICC, etc.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, LIA educators will provide direct education to a minimum of 100 SNAP-Ed eligible participants and indirect education to a minimum of 500 SNAP-Ed eligible participants to increase awareness of healthy fruits, vegetables, beverages, and physical activity resources. This direct education will take place at the following locations; senior sites, public housing, Family Action Centers and other community sites.

b. By September 30, 2017, increase partnership collaboration by working with three new agencies to increase their capacity to promote and implement organizational and PSE changes. For example, tie-in and/or establish new health promoting guidelines for events, meetings, workshops, and other interventions.

c. By September 30, 2017, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, LIA educators will provide direct education to a minimum of 100 SNAP-Ed eligible participants and indirect education to a minimum of 500 SNAP-Ed eligible participants to increase awareness of healthy fruits, vegetables, beverages, and physical activity resources.

b. By September 30, 2018, with existing and new collaborating partners, provide support for health promoting guidelines in an effort to increase awareness of and/or access to healthy fruits, vegetables, beverages, and physical activity resources at a minimum of two sites/venues.

c. By September 30, 2018, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

2. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, LIA educators will provide direct education to a minimum of 100 SNAP-Ed eligible participants and indirect education to a minimum of 500 SNAP-Ed eligible participants to increase awareness of healthy fruits, vegetables, beverages, and physical activity resources.

b. By September 30, 2019, with existing and new collaborating partners, provide support for health promoting guidelines in an effort to increase awareness of and/or access to healthy fruits, vegetables, beverages, and physical activity resources. At a minimum of two sites, PSE changes will be implemented (e.g. healthy vending policies, healthy meetings and event policies, etc.)

c. By September 30, 2019, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Colusa County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/20/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, collaborate with LIAs and community partners to increase awareness of and access to healthy fruits, vegetables, beverages, and physical activity resources at one senior meal site, one public housing site, and eight SNAP-Ed qualifying community sites and/or events via nutrition and physical activity direct education, indirect education, and adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Each year, attend a minimum of four community meetings per year to share information and coordinate with local community based partners. (CNAP) Year 1 & 2 - Focus on opportunities for new collaboration and fostering potential partnerships. Year 3 – Maintain strong partnerships by continued and regular communication and coordination.	CED: ; CEI: ; MPR: ; C&C: x; TTA:	CWD: ; LHD: x; AAA: x; UCCE: x; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF; Sign in sheets; Agendas
2.2	Work with up to 6 partner agencies who work in Colusa County to increase their capacity to promote and implement organizational and PSE changes. Example partners include existing CNAP partners (i.e. Maternal & Child Health, Tobacco Education Program, Colusa County Resource Conservation District, Colusa First 5, etc.) as well as new and developing partnerships (retail owners, recreation district, hospital, etc.). Year 1 & 2 - Focus on fostering relationships and providing resources. Expand reach to at least one new partners each year. Year 3 - At a minimum of two partnering sites/ organizations, PSE changes will be implemented (e.g. healthy	CED: ; CEI: ; MPR: ; C&C: x; TTA: x	CWD: ; LHD: x; AAA: x; UCCE: x; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF; list of resources shared, PSE annual reporting

	vending policies, healthy meetings and event policies, etc.). The focus of the PSE changes will compliment healthy retail and/or school efforts.					
2.3	In year 1, provide direct nutrition education using approved curricula either through direct delivery or by extenders to 100 SNAP-Ed eligible participants at a minimum of three qualified community sites to reinforce retail campaign messaging, HOTM produce and information, and food resource management topics. In Year 2, provide direct nutrition education using approved curricula to 100 SNAP-Ed eligible participants at a minimum of three qualified sites. In Year 3, provide direct nutrition education using approved curricula to 100 SNAP-Ed eligible participants at a minimum of three qualified sites. Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to healthy fruits, vegetables, and beverages at three SNAP-Ed qualifying neighborhood retail stores and two food distribution sites through adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy food and beverage policies by working to improve the healthfulness of existing products
- Local procurement
- Healthy in-store marketing and promotions
- Store exterior improvements

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least two retail stores, two food distribution sites, and provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location in an effort to increase access and/or promotion of healthy foods and beverages.

b. By September 30, 2017, provide food resource management education to adults and/or high school youth at two community sites and promote the retail, emergency food and farmers' market opportunities to access healthy foods.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least two retail stores, two food distribution sites, and provide support for one Fruit and Veggie Fest marketing event in at least two qualifying retail locations in an effort to increase access and/or promotion of healthy foods and beverages.

   b. By September 30, 2018, provide food resource management education to adults and/or high school youth at two community sites and promote the retail, emergency food and farmers' market opportunities to access healthy foods.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least three retail stores, two food distribution sites, and provide support for one Fruit and Veggie Fest marketing event in at least three qualifying retail locations in an effort to increase access and/or promotion of healthy foods and beverages.

   b. By September 30, 2019, provide food resource management education to adults and/or high school youth at two community sites and promote the retail, emergency food and farmers' market opportunities to access healthy foods.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Colusa County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/20/2017**

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to healthy fruits, vegetables, and beverages at three SNAP-Ed qualifying neighborhood retail stores and two food distribution sites through adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Provide healthy marketing materials, which may include NEOPB Retail and Harvest of the Month signage, posters, newsletters, and NEOPB recipe cards to approved retail intervention sites. • Year 1: two SNAP-Ed qualifying retailers and two food distribution sites • Year 2: two SNAP-Ed qualifying retailers and two food distribution sites • Year 3: three SNAP-Ed qualifying retailers and two food distribution sites.	( ) CED (x) CEI (x) MPR ( ) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF, before and after photos
3.2	Educators will host a retail event quarterly including taste testing to promote consumption and access to healthy foods reaching a minimum of 250 SNAP-Ed eligible residents annually: • Year 1: two continuing SNAP-Ed qualifying retailers and one food distribution site • Year 2: two SNAP-Ed qualifying retailers and one food distribution site • Year 3: three (two continuing, one new) SNAP-Ed qualifying retailers and one food distribution site	( ) CED (x) CEI ( ) MPR ( ) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF

3.3	Educate a minimum of two retail managers/owners and two food distribution/bank managers on the health importance of healthy foods and beverages. Training and technical assistance will also cover proper food storage and display protocol to help improve the quality and quantity of healthy foods and beverages available to local SNAP-Ed-eligible residents. Provide training and technical assistance as needed. Physical Activity and Nutrition

Physical Activity

Percent of teens (12-17) physically active 1+ hour every day	*
Percent of children (5-11) physically active 1+ hour every day	27%
Percent of children/teens (2-17) sedentary 2+ hours on typical week day	46%

Fast Food
Consumed one or more times in the past week

Children/Teens (2-17)	Adults	SNAP-Ed Adults
64%	55%	64%

Soda
Consumed one or more sodas daily (adults) or yesterday (children/teens)

Children/Teens (2-17)	Adults	SNAP-Ed Adults
17%	7%	*

Fruits and Vegetables
Consumed five or more servings yesterday

Children (2-11)	Teens (12-17)
35%	30%

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

County Name: Contra Costa

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	**California Department of Public Health: CDPH: (Contra Costa Health Services: LHD)**
X	**California Department of Aging: CDA: Contra Costa Area Agency on Aging: AAA)**
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. **Jurisdiction Description**

Contra Costa County (County) is located in the San Francisco Bay Area of Northern California. The county sits northeast of San Francisco and southwest of Sacramento. Contra Costa is approximately 806 square miles and includes 19 incorporated cities and numerous unincorporated areas such as Bay Point, El Sobrante, and North Richmond that reside within the East, West, and Central regions.

The 2014 Census data estimated that Contra Costa's population was 1,111,339. The average median income for residents currently living in Contra Costa is more than $79,799. However, a little more than 10% (10.5%) of the population lives below the Federal Poverty Level (FPL), and 21.7% of the population lives in households with incomes below 185 percent of the FPL, making them eligible for the federally funded Supplemental Nutrition Assistance Program Education (SNAP-Ed). In Contra Costa there are 207 census tracts; 12 (5.8%) of which are SNAP-Ed eligible.

Contra Costa is an ethnically diverse county. However, low-income communities, especially those of color, disproportionately qualify for food assistance programs. Of the 21.7% SNAP-Ed-eligible individuals living in Contra Costa, 41% identify as Hispanic; 30% as White; 14.5% as African American; 10.7% as Asian; 0.3% as American Indian/Alaskan Native; 0.6% as Native Hawaiian/Other Pacific Islander; 2.5% as multiracial; and 0.5% identify as another race. This data shows that the Hispanic community disproportionately has the largest number of individuals who qualify for SNAP-Ed, yet the Hispanic population only represents 24.9% of all Contra Costa residents. The same holds true for the African American community who represents a little over 9% of the County's residents, but over 14% of African Americans are SNAP-Ed eligible.

According to the US Census and 2015 SNAP-Ed County Profiles, there are 207 census tracts in Contra Costa County, where 12 qualify for SNAP-Ed services with the majority living in the following cities: Antioch, Bay Point, Pittsburg, Richmond, and San Pablo. The county has 18 school districts, 280 schools, with 118 or 42% of those schools eligible for SNAP-Ed services. The number of SNAP-Ed Intervention sites eligible for services within Contra Costa also include 6 CalFresh offices, 6 Elderly Services Centers/Senior Centers, 24 Food Assistance Sites/Food Banks, 21 Early Childcare and Education (ECE) Site Head Start Programs, 8 Retail and Food Stores with Qualifying CalFresh Redemption, 10 Shelters/Temporary Housing, and 5 Women, Infants, and Children (WIC) Programs. The City of Richmond, which includes the West Contra Costa Unified School District, has the largest number of SNAP-Ed eligible residents in the County, with the majority of students eligible for the Free and Reduced Price Meals (FRPM) Program. Richmond also has the largest number of neighborhoods where Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) reassessment efforts has been concentrated in relation to the retail outlets.

The rate of food insecurity is almost 12.9% for the County's population overall, and just over 19% (19.8%) for children. This is one indication that a sizeable portion of the population experiences challenges in meeting their food and nutritional needs. Although the data records a low percentage (2.8%) of residents reporting limited access to healthy foods, it is evident through the CX3 reassessment efforts that this is not representative of all

communities in Contra Costa County. Another indication of food insecurity includes the number of individuals who qualify for CalFresh (71,323), and the fact that on average, 2,600 seniors visit congregate meal sites each week day. In addition, of the 280 schools within Contra Costa, 118 (42.2%) are SNAP-Ed eligible and 70,314 students qualify for Free/Reduced Price Meals.

The dietary habits of individuals living in Contra Costa demonstrate that a great deal of the population has had some nutrition education exposure. For example, a survey conducted by the California Health Interview Survey (CHIS) for 2011/2012 show that when asked how many servings of fruits and vegetables the survey taker had eaten the day before, 63.6% of children (2-11 years) reported that they had eaten 5 or more servings of fruits and vegetables; and 29.9% of adults reported that they had eaten fruits and vegetables 3 times the day prior to the survey.

Yet, the need still exists for nutrition education and the promotion of physical activity among youth and adults. The 2011/2012 CHIS data also indicated that 29% of children and teens (ages 2-17) and 30.5% of adults consume 1 or more sugar sweetened beverages a day, and that the prevalence of adults who identify as overweight or obese within the SNAP-Ed eligible population was 72.7% among SNAP-Ed eligible adults. The rate of adults who are overweight or obese for the County as a whole is 52.5%.

While nutritional habits greatly influence quality of health, the impact of physical activity must also be considered when assessing quality of life. Physical activity plays a large role in maintaining a healthy weight for both adults and children, and rates of physical activity is one way to measure a community's ability to engage in regular exercise every day. According to the 2015 SNAP-Ed County Profiles Data, in Contra Costa 17.0% of adults ages 20 and older reported that they had no leisure time for physical activity; 6.5% of children and teens (2-17) reported being physically active at least 1 hour every day; and 33.9% of children (2-11) reported that they are physically active at least 1 hour every day. This data is an indication of the need for adults ages 20 and older to find mechanisms for increasing their ability to be physically active that complements their daily routines and can be incorporated into activities they have already committed to.

In 2016, Contra Costa County's Tobacco Prevention Program will reassess the Healthy Stores for a Healthy Community survey. This study will continue to assess the surveying of product marketing and the availability of healthy and unhealthy options offered in stores that sell tobacco. In the previous 2013 study a total of 226 stores were surveyed in Contra Costa County. The data revealed that more than half (67.3%) of stores had unhealthy exterior advertising, compared to 11.9% who had healthy exterior advertising. Of the stores surveyed, nearly 40% of stores near schools advertise sugary drinks, including sodas and sports drinks, at the check-out area. In addition, less than half (49%) had a good selection of quality fresh fruits and vegetables available for purchase. It is expected that the 2016 Tobacco Program reassessment data from this surveying tool will continue to provide support with the activities included in this three-year Integrated Work Plan.
The snapshot above provides a glimpse of the nutrition education, physical activity and food security climate for Contra Costa County. This data helps to paint a picture of the existing community needs. When all of the data is taken into consideration, it demonstrates that nutrition education and obesity

prevention interventions would be highly beneficial for this County, and that there is still much that can be done to improve the nutritional and physical health of all of Contra Costa's residents, especially the SNAP-Ed eligible population.

As the Local Health Department (LHD), we are excited to carry on this work because we believe that our skills and expertise uniquely positions us to work effectively with the SNAP-Ed eligible population for a variety of reasons. CCHS has worked tirelessly to develop and implement strategies, especially those pertaining to the built environment, to improve the health of its residents; especially those most impacted by health inequities and health disparities. For example, in 2008 CCHS leveraged non-SNAP-Ed funding to provide support and technical assistance to the City of Richmond as they developed one of the first Community Health and Wellness Elements for a general plan in the State of California. This health and wellness element is a tool for addressing social determinants of health and its ultimate goal is to create social and physical environments that promote good health. The planning objectives for the Community Health and Wellness Element include access to recreational and open space; access to healthy foods; access to public transit and active transport, and completeness of neighborhoods. As the Community Health and Wellness Element has moved into the implementation phase, CCHS has continued to provide support to and partner with the City of Richmond, especially in endeavors that relate to obesity prevention as is evidenced by the partnership between these two agencies to conduct a health impact assessment (HIA). In 2011, at the request of the City of Richmond's Planning Department, CCHS used non-SNAP-Ed funding to partner with the City of Richmond to conduct a HIA on the benefits and potential negative impacts of developing and implementing a mobile vending ordinance. CCHS was responsible for gathering data, providing nutrition education to residents and policy makers, developing reports on the impacts of the ordinance and making recommendations for the ordinance itself. The passing of the ordinance however, is still pending.

Additionally, for more than 15 years, CCHS has played a lead role in providing nutrition education and promoting physical activity among the SNAP-Ed eligible population in Contra Costa. CCHS is committed to continuing to provide nutrition education and promote physical activity among SNAP-Ed eligible individuals, community partners, other federally funded and unfunded Food and Nutrition programs, and aims to continue to work with the other Implementing Agency for Contra Costa, the Area Agency on Aging (AAA), to accomplish the 3 year goals and objectives detailed in FFY17-19 work plan.

4. **Community Change Goals**

According to the 2014 County Health Rankings and Roadmaps in California, Contra Costa County ranks 17th among California's 57 counties for health outcomes, based on length and quality of life. This county health ranking and local data indicates that health disparities, in particularly the obesity rates, continue to exist among the SNAP-Ed eligible populations. Recent research of best practices in obesity prevention efforts have shown that it is not enough to educate individuals about the importance of eating right and exercise, but it is also imperative that effective policies, systems, and environmental (PSE) changes are in place in order to sustain healthy behaviors within our communities. This FFY17-19 Integrated Work Plan was created utilizing a variety of reports, input from community partners, and data to inform our work and PSE strategies. They include the following data sources:

- SNAP-Ed County Profiles (prepared by the CDPH)
- Contra Costa County Department of Social Services CalFresh Annual Trends data
- The California Department of Education's Free and Reduced Meals Data
- The California Health Interview Survey(CHIS) Data
- The Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) Data
- Contra Costa Early Childcare Education CHOICE Data
- The Area Agency on Aging (AAA) senior population data

The data listed above was instrumental in the development of our workplan and helped to analyze the SNAP-Ed eligible profile of our county in relation to obesity prevalence among all ages (0-65+ yrs. old), the current Cal Fresh trends and data, the percentage of schools who serve free and reduced meals to children in school, and the surveying of individual behaviors in relationship to nutrition and physical activity. The CX3 results were another source of valuable data that assisted us in identifying potential intervention strategies with local stores and markets to be a healthy food retailer for the community. In addition, it provided mapping of the local food banks, food pantries, and farmer's markets where interventions can be placed and families can access fruits and vegetables in their neighborhoods. As a result of this local assessment data of Contra Costa County, we aim to integrate more policies, systems, and environmental strategies into our FFY17-19 work plan.

Contra Costa's Creating Healthy Opportunities in Child Care Environment (CHOICE) assessment data is another source of information as it relates to the childcare practices with nutrition and physical activity. This data will aid in our partnership with the Contra Costa Head Starts Early Childcare Education sites to implement stronger wellness policies and procedures that promote access to healthy foods, beverages, physical activity and reduce screen time.

Other data sources that play a key in our development of the FFY17-19 Integrated Work Plan include FFY 2016 data from the following sources:

- *2013-14 California Food Policy Advocates Nutrition and Food Insecurity Profile*, which provides data on improving the school nutrition environments
- 2014 *California Food Advocates* annual data on the access and participation related to the federally funded summer nutrition programs in California
- 2010 *Hunger in America*, 2010 county profile of seniors 65 and older that were food insecure

Additional local data sources from last year also included: UCCE Nutrition Education Program's study shows there is an improvement among student's knowledge and behaviors in choosing healthy foods at lunch, thereby giving evidence of a Smarter Lunchroom practice in school cafeterias, and finally

Contra Costa Health Service's Safe Routes to School (SRTS) assessment data of students who walk/bike to school and consume a healthy breakfast either before or on their way to school.

All of the data sources listed in our community assessment have given us a broader perspective of the obesity prevention strategies that can benefit the diverse SNAP-Ed eligible populations living in Contra Costa County. The work plan activities have been designed to ensure that the SNAP-Ed eligible community is encouraged to act on their increased awareness about eating healthy as a result of the nutrition education information they receive by providing an environment where the healthy choice becomes the easy and preferred choice through policy, systems, and environmental changes.

5. **Community Change Goals**

The rates of obesity among youth and adults are similar to trends across the nation and this health issue is of major concern in particularly for those underserved populations who are living in Contra Costa County. Contra Costa Health Services (CCHS) is an integrated system of care that strives to improve the health of the most vulnerable populations through its delivery of services and programs. While the prevention of obesity has been a major priority for CCHS, it is one of several issues that threaten the health of the community. Other health issues that are also a priority for CCHS include reducing health inequities among low-income, poorly educated communities of color; increasing the life expectancy of county residents, in particular those at greater risk for poor health outcomes throughout the life course; and reducing the number of deaths for persons of color for specific causes of death, including homicide, unintentional injuries, fetal and infant deaths, HIV disease, stroke, heart disease, cancers (all types), and diabetes.

Community wide assessments have given a greater perspective of the health concerns related to nutrition and obesity issues and have been instrumental in guiding Contra Costa County Health Service's long term community change goals and activities for our work plan in FFY17-19. Recent county-wide assessment data from our health care partners, Kaiser Permanente and John Muir Medical Center, has shown that residents top 10 concerns entail the following among all age ranges: eating healthy; access to safe outdoor spaces, especially at the neighborhood level; affordable physical exercise and sports activities for youth; and access to low-cost healthy foods as many respondents considered the areas they lived in to be food deserts.

While preventing and reducing the rate of obesity among all age groups in Contra Costa is a priority, in recent years additional attention has been paid to the 0-5 age group. Childcare affiliated partner efforts to reduce and prevent obesity have been aimed at increasing healthy eating and active play among all children. However, more interventions need to be addressed to increase availability, accessibility, and demand for affordable, healthy foods in all neighborhoods; increase availability and utilization of safe places to play for all young children and their families; improved nutrition and physical activity environments in preschool and childcare settings by offering nutritious foods and opportunities for physical activity; support the reduction of screen time and marketing of unhealthy foods to children 0-5; and provide information and support for parents and providers to make healthy eating and activity choices for their children.

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

While the LIA's mined multiple sources of data in assessing community needs, data that focuses on improving the nutrition and physical activity environments will provide the underpinnings for the objectives and activities of this work plan. In addition, the LIA's will concentrate their efforts on SNAP-Ed eligible populations and allowable interventions that align with the USDA WRO Evaluation Framework.

The LIA's endeavors will bolster the long term goals of our partners throughout Contra Costa to reduce and prevent obesity by working effectively with the County Nutrition Action Plan (CNAP) and other collaboratives to identify multi-sector strategic partnerships through education and strategies that support healthy behaviors at multiple levels of influence. This includes: providing evidence-based nutrition education and physical activity promotion (indirect and direct) to SNAP-Ed eligible populations (0-65 yrs of age) with a focus on behavior change goals; improving accessibility, availability and a demand for healthy foods and beverages within the community settings; increasing opportunities for and enhancing the physical activity environment with Safe Routes to Schools (SRTS) at targeted SNAP-Ed approved sites and in the built environment of SNAP-Ed eligible neighborhoods; utilizing effective social marketing strategies to encourage an increase in the consumption of healthy foods and physical activity among the SNAP-Ed eligible population (i.e. county-wide campaigns and challenges, etc.); working with Champion Providers to utilize effective social marketing strategies to encourage an increase in the consumption of healthy foods, physical activity and to provide SNAP-Ed eligible populations no or low-cost resources for meeting their food and exercise needs; working with retailers to improve the accessibility of healthy foods; strengthening school wellness policies by building staff capacity through evidence-based nutrition education and physical activity promotion as well as improving the schools nutrition and physical activity environment through increased access and opportunities for the consumption of healthy foods and beverages, and physical activity; educating community partners about policy, systems and environmental changes that could improve the built and retail environments to encourage healthy nutrition and physical activity behaviors; working with partners to improve the farmers markets and supplemental meal and/or food site environments to promote healthy eating and physical activity as well as expand their services, hours, and/or locations to meet the needs of the SNAP-Ed eligible population.

More specifically, Contra Costa's SNAP-Ed eligible LIA's will achieve the following three-year objectives:

1. By September 30, 2019 encourage an increase in the consumption of healthy foods and beverages, and physical activity in a minimum of 4 SNAP-Ed qualifying faith-based organizations and 4 SNAP-Ed qualifying community agencies serving seniors by providing direct and indirect evidence-based nutrition education and physical activity promotion to strengthen knowledge, self-efficacy skills, healthy food preference, and support policy, systems and environmental change that improves the nutritional and physical health of a minimum of 40,000 SNAP-Ed eligible residents 18 or older in Contra Costa County.

2. By September 30, 2019 15 Early Childhood Education (ECE) Sites will develop and implement site wellness policies and procedures to increase access to and improve the nutrition, healthy beverage consumption, and physical activity for a minimum of 1,200 SNAP-Ed eligible children ages 0-5 and 500 parents while also encouraging a reduction in screen time for SNAP-Ed eligible children ages 0-5 in Contra Costa County.

3. By September 30, 2019, a minimum of 3 SNAP-Ed eligible school districts reaching 60,000 SNAP-Ed eligible students and parents will either implement and/or expand existing school wellness policies to improve the institutional nutrition and physical activity environments of the school and after school settings, increase the promotion of and opportunities for physical activity in the school and after school settings, and provide support for healthy behaviors among students, teachers, and parents.

4. By September 30, 2019, increase access to and a demand for healthy fruits, vegetables, and beverages by improving the nutrition environment of a minimum of 2 retail outlets and 2 farmer's markets in SNAP-Ed eligible neighborhoods through adopted policies and environmental changes that encourage the purchase of healthy foods and beverages and reaches a minimum of 900 SNAP-Ed eligible adults and their families.

5. By September 30, 2019, increase access to and a demand for healthy fruits, vegetables, and beverages in a minimum of 6 organizations that provide supplemental sources of food for the SNAP-Ed eligible population (i.e., food banks, food pantries, school and after-school programs, summer meal programs, faith-based institutions, senior meal sites, etc.) reaching a minimum of 6,000 SNAP-Ed eligible adults and their families through evidence-based nutrition education and the development/implementation of policy, systems, and environmental changes that support a healthy nutrition environment and promotes physical activity.

The five objectives listed above will allow Contra Costa to address the larger community change goals and stay within the SNAP-Ed allowable interventions. Strategies for policies, systems and environmental change (PSE) fall under the following categories:

- Early Childcare
- Farm to Fork
- Farm to Preschool and School
- Farmer's Markets
- Healthy Retail
- Healthy Schools
- Healthy Food and Beverage Standards
- Hydration Stations
- Safe Routes to School
- School Gardens
- School Wellness
- Smarter Lunchroom Movements
- Structured Physical Activity

PSE strategies are detailed within each three-year objective and they demonstrate connectivity with the community change goals.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The County Nutrition Action Plan (CNAP) is comprised of nutrition education professionals who have joined forces to address the nutrition education needs of Contra Costa County. The CNAP is staffed by the LHD (Local Health Department) and this group includes other federally funded Food and Nutrition Service (FNS) programs such as the Area Agency on Aging (AAA), as well as, additional unfunded partners who serve the SNAP-Ed eligible population in the areas of food programs, nutrition education and physical activity promotion.

The CNAP is comprised of nutrition education professionals and other community partners. The roles of the partners are to promote participation in all FNS partner programs with the goal of increasing fruit and vegetable purchasing power among low-income families; coordinating consistent nutrition education messages across all FNS programs and campaigns; coordinating nutrition education and physical activity promotion efforts to avoid duplication; and strengthening local food security through greater awareness and access to local resources. Another role of the partners is to inform each other of any new resources available that can be provided to the communities we serve. Past accomplishments of the collective group include, continued coordinated efforts to promote the Rethink Your Drink campaign, working with local school districts to promote their summer meal programs, and developing collaborative messages to be used in flyers, newsletters and other publications that are disseminated on a quarterly basis. The messages are themed and promote nutrition and physical activity, as well as the use of local resources such as the farmer's market.

The CNAP group meets four times a year. Partners include the following agencies: City of San Pablo, Contra Costa Certified Farmer's Markets, Contra Costa Child Care Council, Contra Costa County Community Services Bureau (Head Start), Contra Costa County Department of Education, Contra Costa County Employment and Human Services, Contra Costa Crisis Center 2-1-1, Contra Costa Health Services (which includes: Child Health and Disability Prevention, Community Wellness and Prevention Program, Contra Costa Health Plan, WIC Program, Senior Nutrition Program), Dairy Council, Food Bank of Contra Costa and Solano, Healthy and Active Before 5, John Muir/Mt. Diablo Health System, Michael Chavez Center, Mt. Diablo Unified School District Food Services, Pacific Coast Farmer's Market Association, Pittsburg Unified School District Food Service Department, University of California Cooperative Extension, Weigh of Life, Bay Area Community Resources, West County YMCA, RYSE Center, La Clinica De La Raza, Monument Crisis Center, Youth Enrichment Services, and Mt. Diablo Unified School District Collaboration for Academics, Recreation and Enrichment for Students (CARES).

The LHD continues developing relationships with the Richmond Food Policy Council and the Contra Costa Food Systems Alliance. While these agencies have not officially joined the CNAP, many of their members do attend and represent their work. In addition, the LHD has been a member of the Bay Area Nutrition & Physical Activity Collaborative (BANPAC) for more than a decade and LHD staff have represented Contra Costa as members of the steering committee. Additionally, the LHD also participates in the City of San Pablo Obesity Task Force which has been recognized for their work around the national *Let's Move* initiative and its' city-wide challenge to increase physical activity among San Pablo residents, the African American Health Collaborative which is

addressing health inequities in the African American community, and the Contra Costa Food Systems Alliance which strives to improve the food and nutrition environment throughout Contra Costa. The efforts of these four collaboratives and the LHD's relationship with them have helped to shape the community context for many of the regionally focused objectives. In addition, the LIA's will promote SNAP-Ed services and activities by connecting with other agencies such as county welfare departments.

7. **Key Messages**

	Food Safety	x	Physical Activity	x	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
x	Fruits & Vegetables	x	Limit Added Sugars or Caloric Sweeteners	x	Other *(specify): Rethink Your Drink*
x	Fats and Oils	x	Food Shopping/ Preparation		Other *(specify)*:
x	Lean Meat & Beans				
x	Sodium & Potassium				
x	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**
All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2016 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document. All materials, resources, and curriculum have also been identified for each objective proposed in the integrated work plan under Section C: Intervention Plan.

9. **Intervention and Evaluation Plan Narrative Summary**
In Contra Costa County, SNAP-Ed funds from two State implementing agencies will support two local SNAP-Ed programs for FFY 2017-2019 as they deliver programs and services that align with the State SNAP-Ed program goals and objectives. The California Department of Public Health's Nutrition and Education Obesity Prevention Branch (NEOP) program will be administered by the local public health department, Contra Costa Health Services

(LHD). The California Department of Aging's program will be administered by the Contra Costa County Area Agency on Aging (AAA). Together they will make up the local implementing agencies (LIA).

Over the next three years, Contra Costa County LIA's will pool their efforts to provide nutrition education and obesity prevention services targeting the SNAP-Ed eligible population. Intervention strategies will meet the standards for evidence-based, research-tested, practice-tested, or emerging programs as defined in the *SNAP-Ed Strategies Interventions: An Obesity Prevention Toolkit for States – January 2016 (SNAP-Ed Toolkit)* and/or the approved *California SNAP-Ed Integrated Curricula List*.

The LIA's will collaborate with Food and Nutrition Service (FNS) funded and unfunded partners throughout the Contra Costa, to increase the consumption of healthier foods and beverages and levels of physical activity among the SNAP-Ed population using intervention strategies proven to change behavior. In addition to the LIA's, trained subcontractors, and partners will also provide support in the delivery of multi-level behavior-focused strategies and interventions that include providing comprehensive evidenced-based direct nutrition education and physical activity promotion where children, youth, adults and seniors eat, live, work, play, and pray. Implementation of this strategy will include efforts to increase knowledge of healthy eating practices; time spent being physically active; the awareness and use of community resources that provide access to healthy foods and opportunities for physical activity; and to improve shopping behaviors through nutrition education and physical activity promotion individually, and/or in the family or group setting.

Staff trainings and coordinated implementation strategies for various segments of the childcare and educational systems such as teachers, aides, food services and after-school staff, will allow the LHD to have a greater reach and impact on SNAP-Ed eligible children and youth in multiple settings (i.e., classroom, cafeteria, on-site after school and community programs, etc.). Targeted activities for this age group will include age appropriate direct and indirect nutrition education (i.e., Power Play!, Harvest of the Month (HOTM), Rethink Your Drink); and increasing opportunities for physical activity through structured and unstructured play (i.e., stencils, use of active transport to and from school, park resources, etc.).
Adults and the senior SNAP-Ed eligible populations will be reached by the LIA's through the dissemination of findings from the CX3 reassessment and evidence- based nutrition education and physical activity promotion that focuses on the connection between shopping behaviors and choices in various retail settings (i.e., corner and grocery stores, food pantries and distribution sites, farmer's markets, etc.) and how making better choices can lead to better health outcomes per MyPlate and the 2010 Dietary Guidelines. These two age groups will also be the focus of targeted activities to increase social networks and encourage physical activity in the faith-based, community, and clinical (Champions for Change) settings.

Nutrition education messages promoting healthy eating and physical activity through NEOP approved media campaigns will be used in conjunction with direct nutrition education. The LIA's will utilize messages from the media campaigns, direct education and CX3, to work with selected SNAP-Ed eligible

communities to develop and implement projects for policy, systems, and environmental change that will ultimately lead to improvements in organizational practices to make accessing the healthy choice the easy choice.

The LIA's will collaborate on activities and coordinate intervention sites to ensure that there's no duplication of services and that each program's efforts complement one another. Both the LHD and AAA have varying areas of expertise as is reflected in the work plan and they will take the lead on various activities according to their specialized skill set. The LHD and AAA will provide cross training opportunities when available for their respective staff and targeted members of the communities they serve. For example, AAA will share with the LHD best practices on engaging the senior community, focusing in particularly on the best methods for including the senior population in CX3 related activities.

The LIA's activities will address all levels of the Socio-Ecological Model (SEM) to enhance the capacity of the SNAP-Ed eligible population to increase behaviors that promote healthy eating and physical activity. The LIA's will use strategic partnerships and community-wide multi-sector collaboratives to improve nutrition and physical activity, conduct community health needs assessments, and prioritize approaches and strategies to meet the needs of SNAP-Ed eligible communities in Contra Costa County. The interventions developed for this work plan are layered to provide support at the individual and environmental levels, as well as to speak to multiple sectors of influence and social/cultural norms. The intervention plan demonstrates a progression at the environmental level of the SEM through the inclusion of policy, systems, and environmental change efforts that include updating and expanding school wellness policies; providing education on policy and/or legislative initiatives that have the potential to impact local efforts such as efforts to implement Second Chance Breakfast in schools; and supporting local efforts to enhance changes being made to local ordinances and/or general plan health elements to improve the nutrition and physical activity environment by improving the built environment.

The LIA's will use a variety of settings and delivery models to reach and target the SNAP-Ed eligible population across sectors and to administer SNAP-Ed programs using innovative methods of delivery which include the utilization of the Youth Participatory Action Research (YPAR). Data gathered during or used as an assessment for FFY 2016 have also been mined and provide baseline data for objectives and activities listed in this work plan. A variety of strategies will be employed in the implementation of the intervention plan and the goals and objectives will support State-level goals in the following ways:

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

State Level Objectives	Local Objectives That Support State Objectives
1. Increase Consumption of Healthy Foods and Beverages	1. Nutrition Education
	2. Early Childhood Education
	3. School Wellness Policies
	4. Food Retail and Farmer's Markets
	5. Supplemental Food Sites
2. Increase Physical Activity	1. Nutrition Education
	2. Early Childhood Education
	3. School Wellness Policies
	5 Supplemental Food Sites
3. Improve Food Resource Management	1. Nutrition Education
	2. Early Childhood Education
	4. Food Retail and Farmer's Markets
	5 Supplemental Food Sites
4. Increase Access/Appeal Of Healthy Dietary Choices Where People Eat, Live, Learn, Work, Play, or Shop.	1. Nutrition Education
	2. Early Childhood Education
	3. School Wellness Policies
	4. Food Retail and Farmer's Markets
	5. Supplemental Food Sites
5. Increase Access/Appeal Of Physical Activity Opportunities	1. Nutrition Education
	2. Early Childhood Education
	3. School Wellness Policies
	5. Supplemental Food Sites

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

Listed below are the areas of focus for the intervention plan along with the corresponding local objective:

Early Childhood Education (Local Objective #2)

Early Childhood Education (ECE) activities will use evidence-based curricula as a mechanism to teach children, their families, and Contra Costa's Head Start Program staff about the importance of eating healthy and being physically active. Activities will also focus on providing support for the Head Start Program to develop policies that support a healthy nutrition and physical activity environment at the 15 qualifying program sites in Contra Costa County. Over the three year period, the LHD will provide training for a minimum of 30 Head Start Program staff who will then provide age-appropriate nutrition education interventions for 1,200 SNAP-Ed eligible preschool aged children and their families. Evidence-based and research-tested curricula and resources such as Farm to Preschool, Coordinated Approach To Child Health (CATCH), Power Play!, My Plate, and Harvest of the Month (HOTM) will be utilized. As appropriate information that emphasizes the benefits of consuming fruits and vegetables and planning meals accordingly; having opportunities for physical activity through structured and unstructured play; consuming and having access to drinking water; limiting screen time; local procurement of fresh produce will be shared. Contra Costa has provided technical assistance by offering consultations on strategies that could assist schools with becoming community nutrition and wellness hubs, all of which we understand to be allowable. As stated in the SNAP-Ed Guidance, SNAP-Ed agencies are allowed to provide "consultation with partner organizations on promoting organizational policy and practice changes that support healthy foods and beverages", such is the case and the focus of our activities relating to supporting local procurement efforts.

In Years 1 and 2, the LHD will partner with Head Start staff to assess the health implications of site practices and policies on the nutrition and physical activity environment of the sites, expanding the number of sites each year until all 15 SNAP-Ed qualifying sites have been assessed. This will be accomplished through the use of the Contra Costa CHOICE assessment tool. Findings from the assessment will be shared with Head Start staff and parents and provide an opportunity for the staff and parents to determine what policies and/or environmental changes can be made to support preschool aged children in developing healthy eating and physical activity behaviors. Information that demonstrates the benefits of policies and environmental changes at the Head Start sites such as the Farm to Preschool Program, implementation of hydration stations, and the use of Stencils will be highlighted.

It is expected that the combination of trainings, as well as direct and indirect education will lay the foundation for the Head Start Programs to identify areas where improvements can be made, and this will be the goal for this area of focus in Years 2 and 3. The LHD will meet with Head Start staff and support them in identifying a plan for developing policies for systematic and environmental changes by providing technical assistance. Policy, systems and environmental changes could result in such outcomes as the implementation of hydration stations, Stencil implementation, a local procurement program, and/or a Farm to Preschool Program.

The LHD will provide additional support to SNAP-Ed eligible preschool aged children and their families by developing and/or updating two resource guides that provide information to assist them in providing basic needs for their families. Information about low-cost methods for providing healthy foods for their families, low or no-cost medical services, and housing and employment training/opportunities will be included in the resource guides. Finally, the LHD will strive to improve the environmental factors that contribute to healthy behaviors by partnering with community organizations as well as local municipalities to explore increasing opportunities for physical activity and access to drinking water at parks, recreational facilities, and/or schools that are close to Head Start sites and frequented by SNAP-Ed eligible preschool aged children and their families.

Schools (Local Objective #3)

The LHD will use a competitive solicitation process to identify, select, and subcontract with two school districts to provide nutrition education and promote physical activity. Staff from the school districts will be trained on a variety of topics such as integrating evidence based nutrition education into existing lesson plans, conducting garden nutrition education, encouraging students to make healthy choices when purchasing food from the school cafeteria and/or snack bars through the use of such strategies as the *Smarter Lunchroom Movement (SLM)*, the benefits of purchasing fresh produce locally through strategies such as Farm to School, and strategies for increasing opportunities to eat healthy and be physically active during the school day and after school such as *Let's Move Salad Bars in Schools* and Power Play! Contra Costa has provided technical assistance by offering consultations on strategies that could assist schools with becoming community nutrition and wellness hubs, all of which we understand to be allowable. As stated in the SNAP-Ed Guidance, SNAP-Ed agencies are allowed to provide "consultation with partner organizations on promoting organizational policy and practice changes that support healthy foods and beverages", such is the case and the focus of our activities relating to supporting local procurement efforts.

The subcontracted school districts will also be responsible for evaluating current school wellness and other district/site policies to assess the need for developing and implementing new policies, systems, and/or environmental changes to improve the nutrition and physical activity environment in both the school and after-school setting.

The LHD recognizes the need of one school district in particular, to increase its ability to provide nutrition education and physical activity resources through our work in West Contra Costa County. Therefore, the LHD will lend its' support to this third school district as they continue to build their capacity for delivering nutrition education and physically activity promotion, as well as to update and/or expand their school wellness policies to increase students likelihood of eating healthy and being physically active. This school district will not be funded for their activities, but the LHD will offer more intensive trainings to increase their ability to address the nutritional needs of their students, as well as direct and indirect nutrition education and technical support.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

All three school districts will be expected to deliver direct evidence-based nutrition education and physical activity promotion through the use of educational materials such as HOTM, Power Play! , Rethink Your Drink for students and MyPlate for parents. Indirect nutrition education will be provided through school communications such as newsletters and/or email blasts. In addition, active transport will also be promoted through the LHD's partnership with Safe Routes to School (SRTS) and collaborative efforts to promote Walk To School Day and develop projects such as a Walking School Bus in a minimum of 6 SNAP-Ed eligible school sites. A total of 60,000 students and parents will be reached through the efforts of the school district objective.

Within the past two years the LHD has used non-SNAP-Ed funding to pilot a health career pathway/work-based learning project that focuses on exposing high school to careers in public health in the health academies of two SNAP-Ed qualifying schools. The LHD understands that this provides an opportunity for SNAP-Ed eligible high school youth to develop the knowledge and skills that ultimately will prepare them for college and expose them to health careers that they might not have considered. Currently one of the health academies has integrated strategies for improving the nutrition and physical activity environment into their curriculum through special projects that introduce the students to the importance of considering health when planning neighborhoods and communities. The LHD has provided technical assistance and support for the project. The LHD intends to expand this partnership to other career academies that could also benefit from integrating principles of PSE changes to the nutrition and physical environments such as the culinary academies and/or hospitality academy by providing nutrition education and PSE strategies that compliments and supplements their existing career pathway curriculums.

The LHD will combine nutrition education to students, staff, parents and the community with technical assistance to support the efforts all three school districts to create policy, systems and environmental changes that enhance nutrition education efforts and increase access to healthy foods and beverages.

<u>Youth Engagement (Local Objective #3)</u>
The LHD will use a competitive solicitation process to subcontract with three youth serving community-based organizations to implement projects that specifically engage SNAP-Ed eligible youth. These organizations will oversee youth projects that complement efforts to improve the school nutrition and physical activity environment utilizing the Youth Participatory Action Research Model (YPAR). YPAR encourages youth to be engaged in their community and provides them with leadership, critical thinking, and problem-solving skills, as well as, an understanding of how to use community based research to identify and address concerns regarding physical activity and access to healthy foods and beverages in areas where they live, play, work and attend school.

The LHD will support Adult Allies who work with the youth by providing training and technical assistance throughout the project. The *Empowering Youth with Nutrition and Physical Activity* curriculum will be the focus of the training, and the youth will use Choose MyPlate and the *Network for a Healthy California* cookbooks as part of their activities within their SNAP-Ed qualifying schools and qualifying neighborhoods.

A primary goal of the YPAR project is for youth to conduct research, analyze the data, and identify a public health strategy to address a nutrition and/or physical activity concern through a policy, system, and/or environmental change in their community. The findings from their research will be presented to key stakeholders, decision makers, and other members of the community. The California Project LEAN *Playing the Policy Game* curricula will be employed to assist youth with understanding of how policies are developed and can positively impact a community. The *CANFIT Social Media Manual-The Youth E-Advocacy Manual,* which offers interactive trainings that help create Youth E-Advocates, will also be used to train SNAP-Ed eligible youth. The Youth E-Advocates will use social media as an advocacy tool to influence the implementation of local, statewide, and national policy.

Previously, LHD subcontracted YPAR projects have focused on making improvements to the school and community nutrition environment through the implementation of salad bars, encouraging the development and implementation of Second Chance Breakfast programs in the schools, increasing access to drinking water through the implementation of hydration stations, and working with corner stores to increase availability of healthy foods. It is anticipated that the foundation laid through these previous efforts will be continued through the FFY 2017-2019 work plan as the PSE's that these subcontracted agencies have been working on are yet to be finalized and/or implemented.

<u>Communities (Local Objectives #1 and #5)</u>
The LIA's will use a variety of strategies to engage and reach the SNAP-Ed eligible populations of all ages, for example delivering nutrition education and physical activity promotion in faith-based organizations and community organizations that serve seniors. Single and series classes will cover topics such as *Eat Smart, Live Strong*; *HOTM*; *Cooking Matters for Adults*; *Shape of Yoga*; and *Faithful Families Eating Smart and Moving More*. In addition to offering nutrition education to these organizations, the LHD and AAA will also work with the organizations to develop and/or expand social networks to increase participation in physical activity among SNAP-Ed eligible congregant members and seniors. Activities for these organizational groups are designed to impact the knowledge, behaviors, and environment of SNAP-Ed eligible adults, especially seniors, by encouraging them to be physically active and make healthy food choices that do not strain their often times limited budgets. By the end of the three years, the LHD and AAA will have provided nutrition education, physical activity promotion, and technical assistance to a minimum of 4 faith-based organizations and 4 community organizations serving the senior population reaching 400 SNAP-Ed eligible adults and seniors as they increase opportunities for and provide social support for physical activity.

The LIA's will use the 2016 CX3 reassessment as the basis for PSE changes in the at least 3 SNAP-Ed eligible neighborhoods and work with a minimum of 50 engaged community residents to develop and implement a plan for improving their nutrition and physical activity environments in their respective

neighborhoods. In Year 1, engaged residents will receive training on nutrition education, findings from the CX3 assessment, and the benefits associated with community mobilization. In Year 2, the engaged residents will develop action plans for improvement which could include improving the retail environment, enhancing access to safe and walkable neighborhoods, and assessing parks for areas of improvement to enhance and increase access to drinking water and/or create opportunities for structured and unstructured play. In Years 2 and 3, the LHD will support the efforts of engaged residents to implement the plans. The LHD will work closely with AAA to incorporate opportunities for intergenerational activities providing a comprehensive approach that is inclusive for engaging all ages of the SNAP-Ed eligible community in PSE changes. The LHD will take the lead on coordinating trainings and providing nutrition education for this activity, and AAA will provide technical assistance on ways to actively include the SNAP-Ed eligible senior population.

Finally, the LIA's will join forces to develop a community-challenge that encourages all SNAP-Ed eligible age groups to increase their level of physical activity, while also having the opportunity to engage inter-generationally. These activities will target SNAP-Ed eligible adults, and will focus on challenges such as a Zumba Fest; parks trail challenge; and/or a daily steps challenge, all of which have proven to be highly popular in other SNAP-Ed counties. The LIA's acknowledge that initially participation in the challenges may be small as this will be a pilot project for Contra Costa. It is anticipated that in Year 1 the LIA's will reach 50 SNAP-Ed eligible adults, and reach 75 SNAP-Ed eligible adults in Year 2, and will result in a minimum of 100 SNAP-Ed eligible adults having participated in the challenge by the end of Year 3.

Retail (Objectives #4 and #5)

Using the 2016 CX3 reassessment data, the LIA's will identify and work with 2 local retailers and 2 farmer's markets in SNAP-Ed eligible neighborhoods, to encourage members of the SNAP-Ed eligible community to make healthier choices when purchasing foods and beverages by providing social marketing materials that promote healthy foods and beverages, conducting taste testings and store tours, offering age appropriate cook books, and coordinating signature events like the Fruit and Veggie Fest annually. The LIA's will provide retail owners with training utilizing evidence-based nutrition education, social marketing materials, and strategies for improving the retail environment through mechanisms such as the placement of healthy products at the point of sale to encourage an increase in the purchase and consumption of healthy foods and beverages by SNAP-Ed eligible customers.

The 2016 CX3 reassessment data will also be used to identify 2 farmer's markets and/or mobile farmer's markets that offer fresh produce in SNAP-Ed eligible neighborhoods and are a part of the local Farmer's Market Association. In partnership with the local Farmer's Markets Association, the LIA's will work to promote the Market Match Program, assess current usage of the program, and gather baseline data of the number or persons who use Electronic Benefits Transfer (EBT) in Year 1. Efforts will focus on increasing EBT participation among the SNAP-Ed eligible population through the use of social marketing, taste testing's and the dissemination of resource materials that provide information on farmer's market locations

The LIA's will work with the Farmer's Market Association as they seek to expand their reach and increase opportunities for the purchase of healthy foods by the SNAP-Ed eligible population. The LIA's will provide technical assistance as the association explores the possibility of adding new locations for the mobile farmer's market, for example offering the mobile farmer's market at SNAP-Ed qualifying schools; and extending the hours of the mobile farmer's markets to increase opportunities for the working and commuting SNAP-Ed eligible population to access and purchase healthy fruits and vegetables after normal closing time which is usually 5:00 p.m.

Over the three year work plan the LIA's will advance the efforts of a minimum of 6 organizations that provide supplemental sources of food for the SNAP-Ed population (i.e., food banks, food pantries, senior meal sites, summer meal programs, etc.) to develop and implement PSE changes that encourage and enhance opportunities for healthy nutrition and promotes physical activity. In addition to providing nutrition education and physical activity promotion, food tastings that highlight fruits and vegetables being distributed will also be conducted at the sites. The LIA's will partner with the organizations to develop and/or expand existing healthy food and beverage policies, and local procurement programs.

The LIA's will support one another in achieving this objective. AAA will coordinate activities and provide technical assistance for PSE changes at senior meal sites, while the LHD's activities will comprise of engaging and providing PSE technical assistance to agencies that coordinate food distribution for the summer meal programs and food pantries. Additionally, the LHD will seek to increase food security for SNAP-Ed eligible families by partnering with summer meal programs to find mechanisms for ensuring that not only will SNAP-Ed eligible children who participate in their programs have an opportunity to be fed, but that their SNAP-Ed eligible parents will also have access to a nutritious meal as many summer meal programs have age restrictions on who is eligible to receive a meal. The LHD will assist in helping to find and provide support for non-restrictive grants that allow meals to be provided SNAP-Ed eligible adults whose children receive food from the summer meal program.

Social Marketing/Media (All Local Objectives)

The three year work plan will include activities focused on developing and implementing PSE strategies along with promoting complementary NEOP approved messages that can make it easier and more attractive for SNAP-Ed eligible children and their families to make healthier nutrition and physical activity choices. The LIA's will enhance the ability of SNAP-Ed eligible families to make healthier choices by supporting existing NEOP social marketing campaigns and materials (i.e., Champions for Change, Power Play, Retail Program, Rethink Your Drink) and by developing and disseminating messaging in a variety of settings to increase parental and other influencers support through nutrition education and physical activity promotion.

Champion Providers (Local Objectives #2 and #3)

The LIA's will work with Champion Providers and other clinical providers in the Contra Costa Health Services that see SNAP-Ed eligible families. The Champion Providers and other LHD Clinical Providers will capitalize on their influence, power, and respect by advocating for policy, systems and

environmental changes to improve health outcomes of their SNAP-Ed eligible patients in SNAP-Ed qualifying clinics and communities. In partnership with the LIA's, during this three year period the Champion and other LHD Clinical Providers will provide social marketing materials at a total 10 SNAP-Ed qualifying clinics; develop and implement a "parks prescription" program in conjunction with the East Bay Regional Parks System to encourage families to increase their physical activity and explore local park resources in their community; and pilot a *Safe Routes to Parks* pilot project with SNAP-Ed patients and their families providing information at 6 SNAP-Ed qualifying schools and clinics.

In addition, the Champion and other LHD Clinical Providers will develop and implement a referral system for SNAP-Ed eligible families to the Health Leads Program Advocates. Health Leads is a clinical program that works with clinicians to screen low-income households most impacted by health disparities to improve their health outcomes. Once a patient has been identified as being in need, Health Leads Advocates will provide them with assistance in meeting basic needs such as having enough food to eat, or finding employment. Health Leads is currently being piloted at one SNAP-Ed qualifying clinic in Contra Costa and it is expected to increase the number of clinics participating in the program annually until all clinics have access to this resource. The LIA's will work with Champion and/or other LHD Clinical Providers to develop a screening and referral for SNAP-Ed eligible adults and their families to receive support and resources to help meet their food, nutrition education, and physical activity needs from Health Leads Advocates.

Evaluation Plan Summary

The LIA's work plan will encompass a rigorous evaluation component that exhibits the effectiveness of the program as well as identifies areas where improvements can be made in the delivery of the SNAP-Ed program. Prior to the FFY 17-19, the LHD will have reassessed 7 SNAP-Ed eligible neighborhoods through the implementation of CX3, and the data would have been aggregated and analyzed by NEOP. Findings from CX3 will be employed to mobilize community members to support and work towards policy, systems and environmental change in their community through the FFY 17−19 program years.

Process evaluations will be used to document the reach of the SNAP-Ed programming and progress made towards the implementation of local goals and objectives through the use of the Activity Tracking Form (ATF) which supports documentation throughout the duration of the program, and the corresponding Education and Administrative Reporting System (EARS) reports which will be generated online quarterly. The data collected will be used to assess and identify challenges with implementing programs and to record progress and success in achieving local goals and objectives. Separate tracking of direct education facilitated by LHD staff and/or trained partners, subcontractors, and others such as teachers, will aid in monitoring effectiveness and areas of improvement and/or strength.

The Impact Outcome Evaluation (IOE) and SMART objectives have been designed to measure change in nutritional and physical activity behaviors, food resource management, and factors that influence these behaviors. Corresponding activities will be accomplished through the efforts of the LHD.

Participants will be requested to complete an evaluation survey that addresses, but will not limited to, the following indicators from the *Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity and Obesity Prevention Outcome* Indicators:

Individual Level - MyPlate Knowledge (ST1); MyPlate Behaviors (MT1); Shopping Knowledge and Intentions (ST2); Shopping Behaviors (MT2); Physical Activity Goals (ST3); Physical Activity Behaviors (MT3); Fruits & Vegetables (LT2); Dairy (LT4); Non-Dairy Beverages (LT5); Food Security (LT6); Physical Activity Recommended Level (LT7); Screen Time (LT8)

Environmental Level – Opportunity Identification (ST4); Local Champions (ST5); Partnerships (ST6); Nutrition Supports Adopted (MT4); Physical Activity Supports Adopted (MT5); Marketing/Messaging (MT6); Nutrition Supports Implementation (LT9); Physical Activity Program Implementation (LT10); Program Recognition (LT11); Media Coverage (LT12); Barriers Mitigated (I5)

Sectors of Influence – Food Industry (MT7); Agriculture (MT9); Health Care (MT12); Media (MT13); Food Industry Health Outlets (LT13); Agriculture Sales (LT15); Healthy Advertising (LT19); *Let's Move* Recognition (I6); Nutrition in Community General Plan (I8)

An IOE plan and report will be submitted annually by the LHD. Policy, systems and environmental changes will be implemented by the LHD and subcontracted community partners and activities will be monitored and reported using the Reach, Effectiveness, Adoption, Implementation and Maintenance (RE-AIM) evaluation framework that will measure effectiveness and adoption of the PSE. Data will be collected and entered into the RE-AIM Access database and the reports generated from the database will provide insight to the LHD on challenges and successes of the PSE implementation and maintenance phases.

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	35%		0 to 4 years old (Preschool):	1,200
Female	65%		5 to 17 years old (School Age):	16,800
			18 to 59 years old (Adult):	17,845
			60 years old and over (Senior):	1,200

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019 encourage an increase in the consumption of healthy foods and beverages, and physical activity in a minimum of 4 SNAP-Ed qualifying faith-based organizations and 4 SNAP-Ed qualifying community agencies serving seniors by providing direct and indirect evidence-based nutrition education and physical activity promotion to strengthen knowledge, self-efficacy skills, healthy food preference, and support policy, systems and environmental change that improves the nutritional and physical health of a minimum of 40,000 SNAP-Ed eligible residents 18 or older in Contra Costa County.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- ✓ Provide nutrition education, physical activity promotion, and resource management skills through evidence-based single and series nutrition education classes
- ✓ Implement findings from community assessment (CX3) to prioritize community needs and develop a plan that supports efforts for policy, systems and environmental changes to improve the nutrition and physical activity environment
- ✓ Develop a social marketing campaign (i.e., using social media, newsletters, radio, etc.) to provide indirect nutrition education and promote physical activity
- ✓ Increase access to and opportunities for physical activity and/or encourage physical activity by supporting efforts to improve the built environment
- ✓ Develop and/or expand existing policies to increase availability of and access to healthy foods and beverages, and support efforts to improve the nutrition environment to make the healthy choice the easy choice
- ✓ Develop and/or enhance existing social support networks for healthy eating and physical activity to build, strengthen, and maintain individual efforts to be healthy (i.e., walking groups, bicycling groups, healthy cooking classes, population based classes, etc.)

- ✓ Increase partnerships with medical providers and health advocates to promote messaging that supports increasing and/or improving healthy eating and physical activity behaviors
- ✓ Implement community events to promote nutrition and physical education utilizing media campaigns to highlight events
- ✓ Implement a community challenge to promote being physically active using local, low and/or no-cost resources

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, conduct a minimum of 20 single and series classes that provide nutrition education, physical activity promotion and resource management skills, to reach a minimum of 1,000 SNAP-Ed eligible adults.
    b. By September 30, 2017, present findings from the 2016 CX3 reassessment and work with community members in at least 1 SNAP-Ed qualifying neighborhood reaching a minimum of 20 engaged SNAP-Ed eligible residents to develop and prioritize strategies for improving the nutrition and physical activity environments.
    c. By September, 30, 2017, use approved media campaigns to provide healthy messages targeting 6,500 SNAP-Ed eligible residents using a minimum of 2 media sources to disseminate the messages (i.e., Face book, partner newsletters, radio, etc.)
    d. By September 30, 2017, support the efforts of a minimum of 2 SNAP-Ed qualifying faith-based organizations and 2 SNAP-Ed qualifying community agencies serving seniors reaching 200 SNAP-Ed eligible participants to develop and/or expand organizational networks to increase participation in physical activity (i.e., walking groups, yoga groups, senior Tai Chi classes, etc.)
    e. By September 30, 2017, partner with 2 Champion and/or other LHD clinical providers to assess the viability of screening and referring SNAP-Ed eligible adults ages 18 and older for basic nutritional and physical activity needs to Health Leads Program Advocates who will provide resources and support for patients to eat healthy and be physically active.
    f. By September 30, 2017, SNAP-Ed partners will collaborate to coordinate at least 2 community/signature events reaching 700 SNAP-Ed residents that promote healthy eating and physical activity, and invite a minimum of 2 local media outlets to attend.
    g. By September 30, 2017 SNAP-Ed partners will develop a community-challenge that encourages a minimum of 50 SNAP-Ed eligible residents ages 18 and older to be physically active (i.e., daily steps challenge, parks trail challenge, Zumba Fest, etc.).

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, conduct a minimum of 30 single and series classes that provide nutrition education, physical activity promotion and resource management skills, to reach a minimum of 1,500 SNAP-Ed eligible residents.

b. By September 30, 2018, present findings from the 2016 CX3 reassessment and work with community members in at least 2 SNAP-Ed qualifying neighborhoods reaching a total of 40 engaged SNAP-Ed eligible residents to develop and prioritize strategies for improving the nutrition and physical activity environments.
c. By September, 30, 2018, use approved media campaigns to provide healthy messages targeting 10,000 SNAP-Ed eligible residents using a minimum of 3 media sources to disseminate the messages (i.e., Facebook, partner newsletters, radio, etc.).
d. By September 30, 2018, support the efforts of a minimum of 3 SNAP-Ed qualifying faith-based organizations and 3 SNAP-Ed qualifying senior community agencies reaching 300 SNAP-Ed eligible participants to develop and/or expand organizational networks to increase participation in physical activity (i.e., walking groups, yoga groups, senior Tai Chi classes, etc.).
e. By September 30, 2018, partner with 2 Champion and/or other LHD Clinical Providers to develop and implement a mechanism for referring a minimum of 100 SNAP-Ed eligible adults ages 18 and older for basic nutritional and physical activity needs to Health Leads Program Advocates who will provide resources and support for patients to eat healthy and be physically active.
f. By September 30, 2018, partner with Champion Providers and/or other LHD Clinical Providers and East Bay Regional Park District to develop a "parks prescription" program and to prescribe a minimum of 50 park prescriptions to SNAP-Ed eligible residents and their families to explore park resources in their community.
g. By September 30, 2018, SNAP-Ed partners will collaborate to coordinate at least 3 community/signature events that promote healthy eating and physical activity, and invite a minimum of 3 local media outlets to attend reaching 1,000 SNAP-Ed eligible residents.
h. By September 30, 2018 SNAP-Ed partners will develop a community-challenge that encourages a minimum of 75 SNAP-Ed eligible residents ages 18 and older and their families to be physically active (i.e., daily steps challenge, parks trail challenge, Zumba Fest, etc.)

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, conduct a minimum of 40 single and series classes that provide nutrition education, physical activity promotion and resource management skills, to reach a minimum of 2,000 SNAP-Ed eligible adults.
   b. By September 30, 2019, present finding from the 2016 CX3 reassessment and work with community members in at least 3 SNAP-Ed qualifying neighborhoods reaching 50 engaged SNAP-Ed eligible residents to implement a plan of action for improving the nutrition and physical activity environments.
   c. By September, 30, 2019, use approved media campaigns to provide healthy messages targeting 14,000 SNAP-Ed eligible residents using a minimum of 4 media sources to disseminate the messages (i.e., Facebook, partner newsletters, radio, etc.).
   d. By September 30, 2019, support the efforts of a minimum of 4 SNAP-Ed qualifying faith-based organizations and 4 SNAP-Ed qualifying senior community agencies reaching 400 SNAP-Ed eligible participants to develop and/or expand organizational networks to increase participation in physical activity (i.e., walking groups, yoga groups, senior Tai Chi classes, etc.).

e. By September 30, 2019, partner with 2 Champion and/or other LHD Clinical Providers to develop and implement a mechanism for referring a minimum of 200 SNAP-Ed eligible adults ages 18 and older for basic nutritional and physical activity needs to Health Leads Program Advocates who will provide resources and support for patients to eat healthy and be physically active.

f. By September 30, 2019, partner with Champion and/or other LHD Clinical Providers and East Bay Regional Parks District to develop a "parks prescription" program and to prescribe a minimum of 60 park prescriptions to SNAP-Ed eligible residents and their families to explore park resources in their community.

g. By September 30, 2019, SNAP-Ed partners will collaborate to coordinate at least 4 community/signature events that promote healthy eating and physical activity, and invite a minimum of 4 local media outlets to attend reaching 2,000 SNAP-Ed eligible residents.

h. By September 30, 2019, SNAP-Ed partners will develop a community-challenge that encourages a minimum of 100 SNAP-Ed eligible residents ages 18 and older and their families to be physically active (i.e., daily steps challenge, parks trail challenge, Zumba Fest, etc.)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019): By September 30, 2019 encourage an increase in the consumption of healthy foods and beverages, and physical activity in a minimum of 4 SNAP-Ed qualifying faith-based organizations and 4 SNAP-Ed qualifying community agencies serving seniors by providing direct and indirect evidence-based nutrition education and physical activity promotion to strengthen knowledge, self-efficacy skills, healthy food preference, and support policy, systems and environmental change that improves the nutritional and physical health of a minimum of 40,000 SNAP-Ed eligible residents 18 or older in Contra Costa County.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	In Years 1, 2, and 3 the LHD will identify and coordinate potential opportunities to conduct direct education with SNAP Ed eligible faith-based and community agencies serving seniors. In Year 1, the LHD will conduct 20 single and series evidence-based nutrition education and physical activity promotion to reach a minimum of 1,000 SNAP-Ed eligible residents 18 or older. In year 2, the LHD will conduct 30 single and series evidence based nutrition education and physical activity promotion to reach a minimum of 1,500 SNAP-Ed eligible residents 18 or older. In year 3, the LHD will conduct 40 single and series evidence based nutrition education and physical activity promotion to reach a minimum of 2,000 SNAP-Ed eligible residents 18 or older. <tr><td>1.2</td><td>The LHD and AAA will use 2016 CX3 reassessment data to provide support and technical assistance to engaged SNAP-Ed eligible residents in PSE changes to improve the nutrition and physical activity environment.

In Year 1, LHD staff will analyze and prepare 2016 CX3 data to share with SNAP-Ed eligible residents from qualifying neighborhoods. Data will be prepared in English and Spanish.

In Years 1, 2 and 3 LHD staff will identify potential opportunities to reach SNAP-Ed eligible residents to present the CX3 findings. This may be through direct single and series workshops and larger presentation venues within the community. The information presented will also include approaches for community empowerment, mobilization, and how to facilitate PSE changes.

The CX3 findings will be shared within the subsequent years for the purposes of developing and prioritizing strategies with engaged SNAP-Ed eligible residents to develop and implement PSE strategies to improve the nutrition and physical activity environments of SNAP-Ed qualifying neighborhoods:

In Year 1, LHD staff will present the 2016 CX3 findings in at least 1 SNAP-Ed qualifying neighborhoods reaching a</td><td><table><tr><td></td><td>CED</td></tr><tr><td></td><td>CEI</td></tr><tr><td></td><td>MPR</td></tr><tr><td>X</td><td>C&C</td></tr><tr><td></td><td>TTA</td></tr></table></td><td><table><tr><td></td><td>CWD</td></tr><tr><td>X</td><td>LHD</td></tr><tr><td>X</td><td>AAA</td></tr><tr><td></td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table></td><td>CWD:

1.7	The LHD will work with Champion and/or LHD Clinical Providers to refer SNAP-Ed eligible patients to Health Leads Advocates and the Parks Prescriptions Project. Year 1 activities will include the following: The LHD will identify at least 2 Champion and/or LHD Clinical Providers who will assist in promoting healthy messaging in their discussions with SNAP-Ed eligible clients in the clinical settings. The LHD will research NEOP approved best practice approaches for partnering with 2 Champion and/or other LHD Clinical Providers to screen and refer SNAP-Ed eligible clients to resources and programs that will support them in endeavors to meet their nutritional and physical activity needs (i.e., local park programs, Health Leads Program which will provide additional information on how SNAP-Ed eligible clients can meet their food, nutrition education, and physical activity needs).). The LHD will contact the East Bay Regional Parks District to discuss potential collaboration for increasing SNAP-Ed eligible residents' utilization of community parks. The LHD will coordinate with the identified Champion Providers and/or other LHD Clinical Providers to assess the viability of screening and referring SNAP-Ed eligible adults ages 18 and older for basic nutritional and physical activity needs to Health Leads Program Advocates. The Health Leads Program is currently being piloted in SNAP-Ed qualifying medical clinics and it specializes in providing resources and support for	X CED CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Parks Prescriptions Pad Meeting Agenda Sign In Sheet ATF

	patients to meet basic needs such as housing, accessing transportation for medical appointments and for healthy foods. SNAP-Ed eligible adults 18 and older will be targeted to ensure that they have access to resources such as food assistance sites that can aid families with having enough food to meet their daily needs, as well as mechanisms for being physically active. The LHD and Champion and/or other LHD Clinical Providers will explore the potential opportunities for including a referral to Health Leads Advocates in their everyday interactions with the SNAP-Ed eligible clientele. The LHD will provide technical assistance and monthly meetings as well as media trainings for Champion and/or other LHD Clinical Providers to ensure consistent and effective nutrition and PA message delivery of SNAP-Ed and meets the needs of the provider and client. In Year 2, the following activities include: The LHD will research NEOP best practice approaches of "park prescriptions" programs that will align with the needs of the 2 Champion and/or other LHD Clinical Providers SNAP-Ed eligible clients. The LHD will contact the East Bay Regional Parks District to discuss promoting programmed activities at local parks as a mechanism for increasing physical activity and the number of SNAP-Ed eligible residents who utilize the community parks system.					

	The Champion and/or other LHD Clinical Providers will prescribe a minimum of 50 park prescriptions to SNAP-Ed eligible residents and their families to explore park resources in their community. In Year 3, the Champion and/or other LHD Clinical Providers will expand their reach to 60 park prescriptions to SNAP-Ed eligible residents and their families to explore park resources in their community.					
1.8	The LHD will partner with local community organizations or city challenges to identify potential collaboration efforts to reach the SNAP-Ed eligible populations within Contra Costa County. Challenges could include a Zumba Fest, Daily Steps, and/or Parks Trail Challenge. In Year 1, the LHD will develop and implement a community-wide challenge that targets and encourages a minimum of 50 SNAP-Ed eligible adults 18 and older to be physically active. In Year 2, the reach will expand to 75 SNAP-Ed eligible adults 18 and older to be physically active. In Year 3, the reach will expand to 100 SNAP-Ed eligible adults 18 and older to be physically active.	<table><tr><td></td><td>CED</td></tr><tr><td>X</td><td>CEI</td></tr><tr><td>X</td><td>MPR</td></tr><tr><td>X</td><td>C&C</td></tr><tr><td></td><td>TTA</td></tr></table>	<table><tr><td></td><td>CWD</td></tr><tr><td>X</td><td>LHD</td></tr><tr><td></td><td>AAA</td></tr><tr><td></td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table>	CWD: LHD: AAA: UCCE: CCC:	Year 1 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 2 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 3 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table>	Event Flyer Pictures Sign Up Sheet ATF

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019 15 Early Childhood Education (ECE) Sites will develop and implement site wellness policies and procedures to increase access to and improve the nutrition, healthy beverage consumption, and physical activity for a minimum of 1,200 SNAP-Ed eligible children ages 0-5 and 500 parents while also encouraging a reduction in screen time for SNAP-Ed eligible children ages 0-5 in Contra Costa County.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- ✓ Develop and implement ECE site wellness policies and procedures that promote access to healthy foods, beverages, physical activity and reduces screen time.
- ✓ Create an environment where the healthy choice is the easy choice for pre-school aged children 0-5, and their parents.
- ✓ Increase access to healthy foods through the procurement and use of fresh fruits and vegetables from local farmers and community gardens (Farm to Preschool Program).
- ✓ Increase opportunities for active play through environmental changes at ECE sites that support and promote physical activity (Stencils).
- ✓ Provide training and technical assistance for ECE staff on programs that promote active play (i.e., Stencils, CATCH, PowerPlay!, etc.)
- ✓ Develop a resource guide that provides information on emergency food outlets (i.e., food pantries, food bank, etc.), supplemental food programs (i.e., Summer Meal Program, WIC, Cal-Fresh, etc.), low or no-cost medical services, and housing and employment training/opportunities for parents of pre-school aged children 0-5.
- ✓ Increase opportunities for active play in the community settings by supporting local efforts to improve the built environment of neighborhoods surrounding ECE sites where SNAP-Ed eligible pre-school aged children 0-5 and their families live.
- ✓ Develop messaging promoting healthy foods and active play for parents of pre-school aged children 0-5 in health related settings outside of ECE's where pre-school aged children 0-5 and their families are targeted (i.e., medical clinics, dental clinics, etc.)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, SNAP-Ed funded partner and LHD will reach 200 SNAP-Ed eligible parents through indirect education (i.e. newsletters, social media, etc.) and train 10 staff at 5 SNAP-Ed qualifying ECE sites to teach a minimum 300 SNAP-Ed eligible pre-school aged children 0-5 about the importance of nutrition and physical activity.
    b. By September 30, 2017, SNAP-Ed funded partners will conduct an assessment of the nutrition and physical activity environment of a minimum of 5 SNAP-Ed qualifying ECE sites using the Contra Costa CHOICE tool data to share with site directors, teachers, and parents of SNAP-Ed eligible pre-school aged children 0-5.
    c. By September 30, 2017 SNAP-Ed funded partner activities will provide education and staff trainings at a minimum of 5 SNAP-Ed qualifying ECE sites reaching at least 10 staff about the benefits of purchasing produce from local farmers and community gardens, and participation in a Farm to Preschool Program.
    d. By September 30, 2017 SNAP-Ed funded partner activities will provide education and staff trainings at a minimum of 5 SNAP-Ed qualifying ECE sites on programs that increase opportunities for active play (i.e., Stencils, CATCH, PowerPlay!, etc.)
    e. By September 30, 2017, SNAP-Ed funded partner activities through the efforts of collaboratives such as the CNAP will develop and/or update a tailored resource guide that provides information for a minimum of 200 SNAP-Ed eligible parents of SNAP-Ed eligible pre-school aged children 0-5 about low-cost methods for providing healthy foods for their families (i.e., Farmer's Markets that use EBT, Market Match Program, etc.)
    f. By September 30, 2017, SNAP-Ed funded partner activities through the efforts of collaboratives such as the CNAP will identify potential municipal and community partners who are interested in enhancing the built environment of neighborhoods surrounding a minimum of 2 SNAP-Ed qualifying ECE sites to increase access to healthy beverages (i.e., hydration stations) and/or opportunities for active play for SNAP-Ed eligible families.
    g. By September 30, 2017, provide Champion and/or other LHD Clinical Providers with social marketing materials to utilize in a minimum of 3 SNAP-Ed qualifying clinics reaching 300 SNAP-Ed eligible families with pre-school aged children 0-5.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, SNAP-Ed funded partner activities will reach 400 SNAP-Ed eligible parents and 600 SNAP-Ed eligible pre-school aged children 0-5 with indirect education and provide trainings on nutrition education and physical activity promotion to 20 staff at 10 SNAP-Ed qualifying ECE sites.

b. By September 30, 2018, SNAP-Ed funded partners will use the data collected from the initial Contra Costa CHOICE assessment of the physical activity at 5 SNAP-Ed qualifying ECE sites to develop a plan and/or policies and procedures for improving access to and opportunities for active play.
c. By September 30, 2018, SNAP-Ed funded partners will conduct an assessment of the nutrition and physical activity environment of 8 SNAP-Ed qualifying ECE sites, using the Contra Costa CHOICE tool and compile, analyze, and share data with site directors, teachers, and parents of SNAP-Ed eligible pre-school aged children 0-5.
d. By September 30, 2018, SNAP-Ed funded partner activities will conduct a community scan and develop an plan of action and a list of local farmers and community gardens that could potentially partner with a minimum of 5 SNAP-Ed qualifying ECE sites to develop a Farm to Preschool Program.
e. By September 30, 2018, SNAP-Ed funded partner activities through the efforts of collaboratives such as the CNAP will develop and/or update a second comprehensive resource guide that provides information that connects 200 SNAP-Ed eligible parents of pre-school aged children 0-5 to services such as emergency food outlets (i.e., food pantries, food banks, etc.) supplemental food programs (i.e., Summer Meal Program, WIC, Cal-Fresh, etc.), low or no-cost medical services, and housing and employment training/opportunities.
f. By September 30, 2018, SNAP-Ed funded partner activities through the efforts of collaboratives such as the CNAP will develop a plan for enhancing the built environment of neighborhoods surrounding a minimum of 2 SNAP-Ed qualifying ECE sites to increase access to healthy beverages (i.e., hydration stations) and/or opportunities for active play for SNAP-Ed eligible families.
g. September 30, 2018, provide Champion and/or other LHD Clinical Providers with social marketing materials to utilize in a minimum of 6 SNAP-Ed qualifying clinics reaching 600 SNAP-Ed eligible families with pre-school aged children 0-5.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, SNAP-Ed funded partner activities will reach 800 SNAP-Ed eligible parents and 1,200 SNAP-Ed eligible pre-school aged children 0-5 with indirect education and provide trainings on nutrition education and physical activity promotion to 30 staff at 15 SNAP-Ed qualifying ECE sites.
   b. By September 30, 2019, SNAP-Ed funded partners will implement policies and procedures to improve access to and opportunities for active play at 5 SNAP-Ed qualifying ECE sites.
   c. By September 30, 2019, SNAP-Ed funded partners will use the data collected from the initial Contra Costa CHOICE assessment at 8 SNAP-Ed qualifying ECE sites to develop a plan and/or policies and procedures for improving the nutrition and physical activity environment of SNAP-Ed eligible pre-school aged children 0-5.
   d. By September 30, 2019, SNAP-Ed funded partner activities will apply wellness policies and procedures to begin implementation of a Farm to Preschool Program at a minimum of 5 SNAP-Ed qualifying ECE sites.

e. By September 30, 2019, SNAP-Ed funded partner activities, through the efforts of collaboratives such as the CNAP, will disseminate a minimum of 2 resource guides that provides information that connects a minimum of 400 SNAP-Ed eligible parents of SNAP-Ed eligible pre-school aged children 0-5 to services and low-cost methods for providing healthy foods for their families, emergency food outlets (i.e., food pantries, food banks, etc.) supplemental food programs (i.e., Summer Meal Program, WIC, Cal-Fresh, etc.), low or no-cost medical services, and housing and employment training/opportunities.

f. By September 30, 2019 SNAP-Ed funded partner activities through the efforts of collaboratives such the CNAP will implement a plan for enhancing the built environment of neighborhoods surrounding a minimum of 2 SNAP-Ed qualifying ECE sites to increase access to healthy beverages (i.e. hydration stations) and/or opportunities for active play for SNAP-Ed eligible families.

g. September 30, 2019, provide Champion Providers and/or LHD Providers with social marketing materials to utilize in a minimum of 10 SNAP-Ed qualifying clinics reaching 900 SNAP-Ed eligible families with pre-school aged children 0-5.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019 15 SNAP-Ed qualifying Early Childhood Education (ECE) Sites will develop and implement site wellness policies and procedures to increase access to and improve the nutrition, healthy beverage consumption and physical activity environment of a minimum of 1,200 SNAP-Ed eligible children ages 0-5, and 500 SNAP-Ed eligible parents while also encouraging a reduction in screen time for SNAP-Ed eligible children ages 0-5 in Contra Costa County.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	The LHD staff will collaborate and coordinate with the Contra Costa Head Start Program (ECE sites) to identify opportunities to provide NEOP approved nutrition education and physical activity promotion to reach 200 SNAP-Ed eligible parents (i.e. newsletters). In Year 1, the LHD staff will identify NEOP approved physical activity materials related to the importance of active play in SNAP-Ed eligible pre-school aged	( ) CED (X) CEI ( ) MPR (X) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	Sign In Training agendas Materials ATF

	children 0-5 and support the ECE sites by promoting the availability of the playground stencils to increase opportunities for physical activity. The LHD will utilize these materials to train 10 staff at 5 SNAP-Ed qualifying ECE sites. In Year 2, the LHD staff and Contra Costa Head Start will reach 400 SNAP-Ed eligible parents through indirect education and train 20 staff at 10 SNAP-Ed qualifying ECE sites. In Year 3, the LHD staff and Contra Costa Head Start will reach 800 SNAP-Ed eligible parents through indirect education and train 30 staff at 15 SNAP-Ed qualifying ECE sites. In each of the years described above there will be an increase in ECE staff and sites reached through this activity (i.e., Year 1 - 10 staff, and 5 ECE sites; Year 2- 20 staff and 5 additional ECE sites (for a total of 10 ECE sites by the end of Year 2); Year 3 – 30 staff and 5 additional ECE sites (for a total of 15 ECE sites by the end of Year 3).				Year 3 Q1: X Q2: X Q3: X Q4: X	
2.2	The LHD staff will collaborate and coordinate with the Contra Costa Head Start Program to utilize the Contra Costa CHOICE tool to assess the nutrition and physical activity environment of SNAP-Ed qualifying ECE sites. <tr>
<td>2.3</td>
<td>The LHD will partner with Contra Costa Head Start to explore the possibility of developing and implementing a Farm to Preschool Program.

In Year 1, the LHD will research NEOP approved garden education curriculums and best practices related to the benefits of implementing local procurement programs with community farmers and a Farm to Preschool Program.

In Year 1, LHD staff will train a minimum of 10 staff at 5 ECE SNAP-Ed qualifying sites about the benefits of purchasing produce from local farmers and community gardens. The training will emphasize how ECE staff can integrate the Farm to Preschool curricula into existing lesson plans, and the benefits of participating in a Farm to Preschool Program
Efforts to develop and implement a procurement program (i.e., Farm to Preschool Program) will include working with collaboratives and agencies such as the Contra Costa Food Bank, Pacific Coast Farmer’s Market Association, and Contra Costa Farm Bureau to assist in identifying local farmers.

Topics May Include:
Farm to Preschool Curriculum California Thursdays
Local sourcing and procurement
Garden-based nutrition education

In Year 2, LHD staff and Contra Costa Head Start will conduct a community scan with a minimum of 5 SNAP-Ed qualifying ECE sites to assess the</td>

	implementation of a Farm to Preschool Program. In Year 2, the LHD staff and Contra Costa Head Start will develop a plan of action with a minimum of 5 SNAP-Ed qualifying ECE sites to develop a Farm to Preschool Program. In Year 2, the LHD staff and Contra Costa Head Start will develop a list of local farmers and community gardens that could potentially partner with a minimum of 5 SNAP-Ed qualifying ECE sites to develop a Farm to Preschool Program. In Year 3, the LHD staff will provide technical assistance to 5 SNAP-Ed qualifying ECE sites that are developing strategies to apply and implement the wellness policies and procedures to start a Farm to Preschool Program.					
2.4	The LHD will work with Contra Costa Head Start to assess opportunities for physical activity in the ECE environment. In Year 1, the LHD staff and Contra Costa Head Start will assess the physical activity opportunities within 5 SNAP-Ed qualifying ECE sites. LHD staff will research NEOP approved physical activity resources to share with the staff at the 5 ECE sites.	X CED CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	Training agenda List of materials NEOP approved physical activity curriculum ATF Copy of Policy

	LHD staff will schedule and conduct trainings for staff at a minimum of 5 SNAP-Ed qualifying ECE sites on strategies for increasing opportunities for active play using resources and curricula such as the Stencils, CATCH, PowerPlay! etc. Emphasis will be placed on training ECE staff how to integrate the NEOP approved Eat Well, Play Hard in Child Care Settings curriculum into existing lesson plans. In Year 2, the LHD and Contra Costa Head Start Program will use the data collected from the CHOICE assessment of physical activity at 5 SNAP-Ed qualifying ECE sites to develop a plan and/or policies and procedures for improving access to and opportunities for active play. In Year 3, the LHD and Contra Costa Head Start Program will expand its assessment of the physical activity to an additional 3 SNAP-Ed qualifying sites (for a total 8 ECE sites by the end of year 3) to develop a plan and/or policies and procedures for improving access to and opportunities for active play.				Year 3 Q1: X Q2: X Q3: X Q4: X	Eat Well, Play Hard in Child Care Settings Lesson Plans

2.5	The LHD will partner with CNAP to develop 2 resource guides that support SNAP-Ed families in meeting their basic needs. In Year 1, LHD will partner with members of the CNAP and other local collaboratives to develop and/or update one resource guide for SNAP-Ed eligible parents of pre-school aged children 0-5 that offers tailored information about low-cost methods for providing healthy foods for their family (i.e., Farmer's Markets that use EBT, Market Match Program, etc.) In Year 1, the LHD staff will research linkages and connectivity between community representatives serving the same target population by partnering with CNAP and community representatives to develop and/or update a second, more comprehensive resource guide for SNAP-Ed eligible parents of pre-school children that connects them to services such as emergency food outlets (i.e., food pantries, food banks, etc.) supplemental food programs (i.e., Summer Meal Program, WIC, CalFresh, etc.) low or no-cost medical services, and housing and employment/training opportunities. In Year 2, one resource guide will be disseminated to all 10 SNAP-Ed qualifying ECE sites reaching 200 SNAP-Ed eligible parents. In Year 2, the LHD staff will develop and/or update a second comprehensive resource guide for parents of pre-school children that connects them to services	☐ CED ☒ CEI ☐ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 X, Q2 X, Q3 X, Q4 X Year 2 Q1 X, Q2 X, Q3 X, Q4 X Year 3 Q1 X, Q2 X, Q3 X, Q4 X	CNAP list of partners Sample Resource Guides Meeting Agenda ATF

****Time Frame: Year & Quarter:**
Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)
Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, a minimum of 3 SNAP-Ed eligible school districts reaching 60,000 SNAP-Ed eligible students and parents will either implement and/or expand existing school wellness policies to improve the institutional nutrition and physical activity environments of the school and after school settings, increase the promotion of and opportunities for physical activity in the school and after school settings, and provide support for healthy behaviors among students, teachers, and parents.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- ✓ Increase access to healthy foods and beverages, and opportunities for physical activity through the expansion and implementation of school wellness policies.
- ✓ Improve the school nutrition environment and increase access to healthy foods and beverages (Smarter Lunchroom Movement, implementation of salad bars and/or hydration stations, Farm to School Program, expanding community gardens, etc.)
- ✓ Increase opportunities for physical activity through structured play, the use of active transport, environmental cues that promote physical activity (i.e., CATCH, Safe Routes to School, Stencils Kit, etc.)
- ✓ Integrate messaging that emphasizes the importance of eating healthy and being physically activity into school and district wide events that reach students, school and after-school staff, and parents (i.e., Back To School Night, World Food Day, Walk To School Day, Parent Meetings, Fun In The Sun, etc.)
- ✓ Provide training for school site staff (classroom and after-school program teachers, school garden staff, etc.) on ways to incorporate evidence based nutrition education into lesson plans (i.e., Harvest of The Month, My Plate, Rethink Your Drink, California Thursday, etc.)
- ✓ Promote school garden and school site farmer's market program to encourage participation of parents, school staff and students.

- ✓ Provide training for school site staff (PE and after-school program teachers, etc.) on ways to increase opportunities for active play into existing curriculums and lesson plans (i.e., Stencils Kit, PowerPlay!, CATCH, Shape of Yoga, etc.)
- ✓ Provide training for food services staff on ways to encourage students to purchase fruits and vegetables when buying snacks and/or meals in the cafeteria and/or at school site snack bars (HOTM, California Thursdays, etc.)
- ✓ Work with SNAP-Ed eligible youth to develop social marketing messages that support and promote healthy eating and physical activity
- ✓ Provide training for school and after school staff on Youth Participatory Action Research (YPAR) and technical support for conducting environmental assessments to identify opportunities for policy, systems, and environmental changes in the school and after-school environment.
- ✓ Develop messaging promoting healthy foods and active play for parents of pre-school aged children 0-5 in health related settings outside of ECE's where pre-school aged 0-5 and their families are targeted (i.e., medical clinics, dental clinics, etc.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, work with a minimum of 2 SNAP-Ed eligible school districts to assess the implementation of and mechanism for expanding the existing school wellness policies to enhance and improve the schools nutrition and physical activity environments.
   b. By September 30, 2017, SNAP-Ed funded partner activities will reach a minimum of 2,000 parents and 5,000 students with indirect and direct nutrition education and physical activity promotion through Back to School nights, parent nights, and Summer Meal Kick Off events at a minimum of 3 SNAP-Ed eligible school districts.
   c. By September 30, 2017, SNAP-Ed funded partner activities will provide training for a minimum of 2 SNAP-Ed eligible schools and/or after-school programs on ways to integrate nutrition education and physical activity promotion into lesson plans reaching 30 staff.
   d. By September 30, 2017, identify and assess the culinary and/or health career pathways programs at a minimum of 2 SNAP-Ed eligible schools.
   e. By September 30, 2017, work with a minimum of 1 SNAP-Ed eligible school to assess the current nutrition environment of the school cafeteria using tools and strategies from the Smarter Lunchroom Movement (SLM) and the Alliance for A Healthier Generation.
   f. By September 30, 2017 provide training for 1 school garden and/or food services to 20 staff on mechanisms to encourage the consumption and purchases of healthy foods and beverages by students at 2 SNAP-Ed eligible schools.
   g. By September 30, 2017, work with a minimum of 1 SNAP-Ed eligible school garden project to assess the feasibility of establishing an on-site farmer's market using surplus produce from the school garden project.

h. By September 30, 2017, work with a minimum of 1 SNAP-Ed eligible school to assess the need for and/or mechanisms needed to improve access to and the use of hydration stations on the school and after-school program sites.
i. By September 30, 2017, partner with the Safe Routes to School Program (SRTS) for Contra Costa Health Services to promote active transport to and from school through events at a minimum of 4 SNAP-Ed eligible schools reaching 5,000 students and 2,000 parents.
j. By September 30, 2017, partner with SRTS and Champion Providers and/or LHD Providers at 1 SNAP-Ed eligible clinic to provide education about the importance of physical activity and assess the feasibility of developing a Safe Routes to Parks Program.
k. By September 30, 2017, train a total of 30 staff and students in 2 SNAP-Ed schools utilizing the Youth Participatory Action Research (YPAR) model to identify opportunities for policy, systems, and environmental changes to increase access to healthy foods and/or opportunities for physical activity (i.e., 2nd Chance Breakfast, Joint Use Agreement, implementation of salad bar and/or hydration station, etc.).
l. By September 30, 2017, work with minimum of 1 high school and/or afterschool program to develop a plan for the implementation of an impact evaluation that assesses the effectiveness of a NEOP approved nutrition education and physical activity promotion curriculum (to be determined) and reaches a minimum of 100 ninth to twelfth grade SNAP-Ed eligible students..

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, work with a minimum of 3 SNAP-Ed eligible school districts to assess the implementation of and mechanism for expanding the existing school wellness policies to enhance and improve the schools nutrition and physical activity environments.
   b. By September 30, 2018, SNAP-Ed funded partner activities will reach a minimum of 2,500 parents and 6,000 students youth with indirect and direct nutrition education and physical activity promotion at a minimum of 3 SNAP-Ed eligible school districts.
   c. By September 30, 2018, SNAP-Ed funded partner activities will provide training for a minimum of 3 SNAP-Ed eligible schools and/or after-school programs on ways to integrate nutrition education and physical activity promotion into lesson plans reaching 40 staff.
   d. By September 30, 2018, provide training on nutrition education and physical activity promotion for a minimum of 5 culinary and/or health career pathways staff at a minimum of 2 SNAP-Ed eligible schools and reach a minimum of 20 culinary and/or health career pathway students through direct nutrition education and physical activity promotion.
   e. By September 30, 2018, work with a minimum of 1 SNAP-Ed eligible school garden projects to establish and/or expand an on-site farmer's market using surplus produce from the school garden projects reaching 150 parents and 20 students.
   f. By September 30, 2018, work with a minimum of 1 SNAP-Ed eligible school to implement a SLM strategy to improve the nutrition environment of the school cafeteria reaching 400 students (i.e., product placement of healthy foods and beverages, presentation of healthy foods and beverages, utilizing Harvest of The Month (HOTM), food services workers encouraging healthy foods and beverages choices, etc.)

g. By September 30, 2018, utilize the YPAR model to develop and implement a plan of action to improve the school nutrition and physical activity environment and/or the nutrition and physical activity environment of the surrounding neighborhoods of a minimum of 2 SNAP-Ed eligible schools and/or after-school programs reaching 600 students (i.e., 2nd Chance Breakfast, Joint Use Agreement, implementation of salad bar and/or hydration station, retail improvements, active transport to and from school, etc.).
h. By September 30, 2018, partner with the Safe Routes to School Program (SRTS) for Contra Costa Health Services to promote active transport to and from school through events at a minimum of 5 SNAP-Ed eligible schools reaching 6,000 students and 3,000 parents.
i. By September 30, 2018, provide Champion Providers with social marketing materials to utilize in a minimum of 3 SNAP-Ed eligible clinics reaching 2,000 SNAP-Ed eligible families with children 0-18.
j. By September 30, 2018, partner with Champion Providers and/or LHD Providers to develop and implement a Safe Route to Parks Prescriptions program in a minimum of 1 SNAP-Ed eligible clinic that provides health services for 100 SNAP-Ed eligible school aged children 0-18 and their families.
k. By September 30, 2018, work with minimum of 1 high school and/or afterschool program to develop a plan for the implementation of an impact evaluation that assesses the effectiveness of a NEOP approved nutrition education and physical activity promotion curriculum and reaches a minimum of 110 ninth to twelfth grade SNAP-Ed eligible students.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, support efforts to implement policy changes to improve the nutrition and physical activity environment within a minimum of 2 SNAP-Ed eligible schools, after-school program and/or the surrounding neighborhoods.
   b. By September 30, 2019, SNAP-Ed funded partner activities will reach a minimum of 3,000 parents and 6,000 students with indirect and direct nutrition education and physical activity promotion at a minimum of 4 SNAP-Ed eligible schools.
   c. By September 30, 2019, SNAP-Ed funded partners will provide training for a minimum of 4 SNAP-Ed eligible schools and/or after-school programs on ways to integrate nutrition education and physical activity promotion into lesson plans reaching 60 staff.
   d. By September 30, 2019, provide training on nutrition education and physical activity promotion for a minimum of 6 culinary and/or health career pathways staff at a minimum of 2 SNAP-Ed eligible schools and reach a minimum of 25 culinary and/or health career pathway students through direct nutrition education and physical activity promotion.
   e. By September 30, 2019, work with a minimum of 2 SNAP-Ed eligible school garden projects to establish and/or expand an on-site farmer's market using surplus produce from the school garden projects reaching 175 parents and 30 students.
   f. By September 30, 2019, work with a minimum of 1 SNAP-Ed eligible schools to implement a SLM strategy to improve the nutrition environment of the school cafeteria reaching 500 students (i.e., product placement of healthy foods and beverages, presentation of healthy foods and beverages, utilizing HOTM, food services workers encouraging healthy foods and beverages choices, etc.)

g. By September 30, 2019, utilize the YPAR model to develop and implement a plan of action to improve the school nutrition and physical activity environment and/or the nutrition and physical activity environment of the surrounding neighborhoods of a minimum of 2 SNAP-Ed eligible schools and/or after-school programs reaching 700 students (i.e., 2nd Chance Breakfast, Joint Use Agreement, implementation of salad bar and/or hydration station, retail improvements, active transport to and from school, etc.).
h. By September 30, 2019, partner with the Safe Routes to School Program (SRTS) for Contra Costa Health Services to promote active transport to and from school through events at a minimum of 6 SNAP-Ed eligible schools reaching 6,500 students and 3,200 parents.
i. By September 30, 2019, provide Champion Providers and/or LHD Providers with social marketing materials to utilize in a minimum of 4 SNAP-Ed eligible clinics reaching 3,000 SNAP-Ed eligible families with children 0-18.
j. By September 30, 2019, partner with Champion Providers and/or LHD Providers to disseminate information about local parks and recreation programs in a minimum of 6 SNAP-Ed eligible clinics and 6 SRTS SNAP-Ed eligible schools that provide health services for 4,000 SNAP-Ed eligible school aged children 0-18 and their families.
k. By September 30, 2019, work with minimum of 1 high school and/or afterschool program to develop a plan for the implementation of an impact evaluation that assesses the effectiveness of a NEOP approved nutrition education and physical activity promotion curriculum (to be determined) and reaches a minimum of 120 ninth to twelfth grade SNAP-Ed eligible students.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, a minimum of 3 SNAP-Ed eligible school districts reaching 60,000 SNAP-Ed eligible students and parents will either implement and/or expand existing school wellness policies to improve the institutional nutrition and physical activity environments of the school and after school settings, increase the promotion of and opportunities for physical activity in the school and after school settings, and provide support for healthy behaviors among students, teachers, and parents.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	The LHD and subcontractors will work with at least 2 school districts to increase access to healthy foods and beverages and opportunities for physical activity through the school wellness policies. Please note that the LHD will be responsible for 1 school district and the subcontractors will be responsible for 2 school districts. In Year 1, the LHD staff and subcontractors will work with 2 school districts, Year 2, work with 3 school districts. Activities for each year include: In Year 1, the LHD will participate in district level School Wellness Policy (SWP) committees. Work with groups at a minimum of 2 school districts to become aware of their SWP and to more fully implement the SWP at their school. In Year 2, the LHD will expand its efforts in district level School Wellness Policy to work with 3 school districts to assess the implementation of and mechanism for expanding the school wellness policies to enhance and improve the schools	☐ CED ☐ CEI ☐ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: TBD AAA: UCCE: CCC:	Year 1 Q1 X, Q2 X, Q3 X, Q4 X Year 2 Q1 X, Q2 X, Q3 X, Q4 X Year 3 Q1 X, Q2 X, Q3 X, Q4 X	Contact list Agendas Meeting notes District policy Recommendations ATF

	In Year 1, the LHD will schedule and conduct a meeting with the Safe Routes to School Program (SRTS) for Contra Costa Health Services. In Year 1, the LHD and SRTS staff will identify potential schools that the SRTS can assist with promoting active transport to and from schools. In Year 1, the LHD and SRTS staff will schedule and meet with identified school administration and staff to discuss the SRTS program. In Year 1, the LHD and SRTS staff will schedule classroom and school wide presentations and/or assemblies that promote healthy eating and active transport. In Years 2 and 3, the LHD staff and SRTS staff will continue to establish a partnership to meet with the school administrators and staff about the SRTS program. In addition, the LHD staff and SRTS staff will continue to schedule classroom and school wide presentations/assemblies that promote healthy eating and active transport. In Year 1, 2 and 3 the LHD and SRTS will establish a Walking School Bus with each of the 6 identified school sites. In Year 1, 2 and 3 the LHD will participate in promoting healthy eating and active transportation to and from school through district wide school events (i.e. Walk to School Day).					

3.9	The LHD staff will assist Champion and/or other LHD Clinical Providers to promote NEOP approved nutrition education and physical activity social marketing materials (i.e., Rethink Your Drink, Power Play, MyPlate, etc.) and a Safe Route to Parks Program to SNAP-Ed eligible school aged children 0-18 and their families. Nutrition Education and Physical Activity Social Marketing Materials (i.e., Rethink Your Drink, Power Play, MyPlate, etc.): In Year 2 work with 3 SNAP-Ed eligible clinics, reaching 2,000 clients. In Year 3, work with 4 SNAP-Ed eligible clinics, reaching 3,000 clients. Safe Routes to Parks Prescriptions: In Year 2, 100 prescriptions, In Year 3, disseminate to 4,000 school aged children 0-18 and their families. LHD staff will identify a Champion and/or other LHD Clinical Providers to partner with for Year 1, 2 and 3 to assist with educating patients on nutrition education and physical activity. In Year 1, the LHD staff will research best practices of a Healthy Parks Prescription program. In Year 1, the LHD staff will conduct meetings with the Champion and/or other LHD Clinical Providers to discuss potential resources to share with patients about the importance of nutrition educations and physical activity, with an emphasis on physical	 CED X CEI X MPR X C&C X TTA	 CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	ATF Meeting Notes Parks Prescriptions Sample Parks and PA resources

	activity and its direct correlation to local parks and the Safe Routes to Parks Program. In Year 1, the LHD staff will provide education to the Champion and/or other LHD Clinical Providers with NEOP approved social marketing materials for showcasing in 1 eligible clinics reaching families with children 0-18. In Year 2, the LHD staff and Champion and/or other LHD Clinical Providers will develop the Healthy Parks Prescriptions in both English and Spanish. In Year 2, the Champion and/or other LHD Clinical Providers will pilot the Healthy Parks Prescriptions to reach 100 SNAP Ed school aged children 0-18 and their families and record the feedback to the LHD. In Year 2, the LHD staff will provide the Champion and/or other LHD Clinical Providers with NEOP approved social marketing materials for showcasing in a minimum of 3 SNAP-Ed eligible clinics reaching 2,000 SNAP-Ed eligible families with children 0-18. In Year 2, the Champion and/or other LHD Clinical Providers and LHD staff will meet quarterly to discuss the implementation phase of the project. In Year 3, the LHD will provide the Champion and/or other LHD Clinical Providers with information about local parks and recreation programs in a minimum of 6 SNAP Ed eligible clinics and 6 SRTS eligible schools that provide health services for 4,000 SNAP-

<td>3.10</td>
<td>The LHD staff will conduct the Impact Outcome Evaluation (IOE) to assess the nutrition and physical activity curriculum. Educational Materials, Resources, and Curriculum are not yet determined and will not be included until the intervention is approved.

Impact and Outcome Evaluation activities will be conducted for Years 1, 2, and 3 and include:

The LHD staff and evaluation team will research and identify a NEOP approved curriculum and intervention to measure change in healthy food and beverage consumption and preferences for fruit and vegetables.

The LHD staff and evaluation team will identify a matched pair-pre-and post-food behavior checklist.

LHD staff will identify a school to conduct the intervention.</td>

</table>

	LHD staff will meet with the identified teacher and administrators to schedule the intervention. The LHD staff will administer a follow-up test to measure sustained changes from the intervention, after the post-testing. The LHD staff will complete fidelity logs for each session they conduct to track fidelity to the intervention plan. The logs will also be used to capture information about challenges with any of the lessons, attendance, participation, and the behavioral change with the students that participated which could help inform future changes to these activities. The LHD staff and evaluation team will maintain a database of the attendance and nutrition education and physical activity. LHD staff and evaluation team will submit the final Impact Outcome Evaluation report, including providing process information about the intervention, helping interpret data in the context of the intervention design/implementation. It is expected that the LHD will increase the number of ninth to twelfth students reached in the intervention in the following years:					

	In Year 1, LHD staff will conduct the intervention and administer the pre-post tests to a minimum of 100 ninth to twelfth grade students. In Year 2, LHD staff will conduct the intervention and administer the pre-post tests to a minimum of 110 (additional 10 students) ninth to twelfth grade students. In Year 3, LHD staff will conduct the intervention and administer the pre-post tests to a minimum of 120 (additional 10 students) ninth to twelfth grade students.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and a demand for healthy fruits, vegetable, and beverages by improving the nutrition environment of a minimum of 2 retail outlets and 2 farmer's markets in SNAP-Ed eligible neighborhoods through adopted policies and environmental changes that encourage the purchase of healthy foods and beverages and reaches a minimum of 900 SNAP-Ed eligible adults and their families.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- ✓ Increase exposure to new and culturally diverse healthy foods through taste testing's (HOTM, Rethink Your Drink, etc.)
- ✓ Increase resource management skills (i.e., menu planning, food budgeting, etc.)
- ✓ Increase knowledge of healthy dietary recommendations (My Plate, Rethink Your Drink, etc.)
- ✓ Improve interior retail environment through product placement strategies, healthy advertising, etc.
- ✓ Improve exterior retail environment by increasing advertising of healthy products
- ✓ Increase availability of healthy foods and improve quality of fresh produce
- ✓ Market, promote, and provide technical assistance in aiding retail stores and farmer's markets to become WIC/EBT vendors as an economic incentive
- ✓ Expand sites and hours of mobile farmer's market; establish new farmer's markets
- ✓ Increase participation of farmer's markets in Market Match Program

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, develop a CNAP subcommittee of 10 representatives to partner with a local community collaboratives (i.e., Richmond Food Policy Council, Contra Costa Food Systems Alliance, etc.) to increase access to healthy foods and beverages, and improve the retail environment in at least 1 retail outlet and 1 farmer's market in 1 SNAP-Ed eligible neighborhood.
    b. By September 30, 2017, provide at least 1 taste testing and store tour in 1 SNAP-Ed eligible store to promote consumption of healthy foods and beverages in 1 SNAP-Ed eligible neighborhood.
    c. By September 30, 2017, provide at least 1 nutrition education opportunity for 2 retail owners/staff on the importance of healthy nutrition and strategies to increase the sale of healthy foods and beverages at a minimum of 1 retail store in 1 SNAP-Ed eligible neighborhood.
    d. By September 30, 2017, coordinate 1 Fruit and Veggie Fest marketing event reaching 200 SNAP-Ed eligible families in at least 1 SNAP-Ed eligible retail outlet.
    e. By September 30, 2017, coordinate with a minimum of 1 farmer's market in 1 SNAP-Ed eligible neighborhood to gather baseline data on the Market Match and/or EBT participation rate.
    f. By September 30, 2017, utilizing findings from the 2016 CX3 reassessment, SNAP-Ed partners will work with the local farmer's market association to assess the feasibility of expanding the hours and/or locations of 1 mobile farmer's market program in a minimum of 1 SNAP-Ed eligible neighborhood.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, the 10 CNAP subcommittee representatives will partner with local community collaboratives (i.e., Richmond Food Policy Council, Contra Costa Food Systems Alliance, etc.) to increase access to healthy foods and beverages, and improve the retail environment in at least 2 retail outlets and 2 farmer's markets in 1 SNAP-Ed eligible neighborhood.
    b. By September 30, 2018, provide at least 2 taste testing and/or store tour in 2 SNAP-Ed eligible stores to promote consumption of healthy foods and beverages in 1 SNAP-Ed eligible neighborhood.
    c. By September 30, 2018, provide at least 2 nutrition education opportunities for 4 retail owners/staff on the importance of healthy nutrition and strategies to increase the sale of healthy foods and beverages at a minimum of 2 retail stores in 1 SNAP-Ed eligible neighborhood.
    d. By September 30, 2018, a minimum of 2 retail stores will have a minimum of 2 healthy snacks and 1 healthy beverage placed in or near the checkout area.

e. By September 30, 2018, coordinate a minimum of 1 Fruit and Veggie Fest marketing event reaching 300 SNAP-Ed eligible families in at least 1 SNAP-Ed eligible retail outlet.
f. By September 30, 2018, increase participation by 3% in the Market Match and/or EBT rate at a minimum of 1 farmer's markets in 1 SNAP-Ed eligible neighborhood.
g. By September 30, 2018, SNAP-Ed partners will work with the local farmer's market association to increase access to healthy fruits and vegetables through the expansion of hours and/or locations of 1 mobile farmer's markets in a minimum of 1 SNAP-Ed eligible neighborhood.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, the 10 CNAP subcommittee representatives will partner with local community collaboratives (i.e., Richmond Food Policy Council, Contra Costa Food Systems Alliance, etc.) to increase access to healthy foods and beverages, and improve the retail environment in at least 2 retail outlets and 2 farmer's markets in 1 SNAP-Ed eligible neighborhood.
   b. By September 30, 2019, provide at least 2 taste testing and/or store tour in 2 SNAP-Ed eligible stores to promote consumption of healthy foods and beverages in 2 SNAP-Ed eligible neighborhood.
   c. By September 30, 2019, a minimum of 2 retail stores will have a minimum of 3 healthy snacks and 2 healthy beverages placed in or near the checkout area.
   d. By September 30, 2019, coordinate a minimum of 1 Fruit and Veggie Fest marketing event reaching 400 SNAP-Ed eligible families in at least 1 SNAP-Ed eligible retail outlet.
   e. By September 30, 2019, a minimum of 2 farmer's market in 1 SNAP-Ed eligible neighborhood will see an increase in their Market Match and/or EBT participation by an additional 3% (6% total increase by 2019).
   f. By September 30, 2019, SNAP-Ed partners will work with the local farmer's market association to increase access to healthy fruits and vegetables through the expansion of hours and/or locations of 2 mobile farmer's markets in a minimum of 2 SNAP-Ed eligible neighborhoods.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and a demand for healthy fruits, vegetable, and beverages by improving the nutrition environment of a minimum of 2 retail outlets and 2 farmer's markets in SNAP-Ed eligible neighborhoods through adopted policies and environmental changes that encourage the purchase of healthy foods and beverages and reaches a minimum of 900 SNAP-Ed eligible adults and their families.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	The LHD will partner with community agencies providing support and technical assistance for improving the nutritional environment of retail outlets. The LHD will identify in Year 1: 1 retail store and 1 farmer's market in 1 SNAP Ed eligible neighborhood; Years 2 and 3: 2 retail stores and 2 farmer's markets in 2 SNAP Ed eligible neighborhoods to increase access to and the promotion of healthy foods and beverages (work initiated in Year 2 will be carried over into the same stores and farmer's markets in Year 3 in order to ensure PSE changes). In Year 1, the LHD will research and utilize best practices from the NEOP Retail Campaign and utilize marketing materials. In Year 1, the LHD staff and partners will establish a healthy retail advisory committee that will be a part of the CNAP; 10 members will be recruited for the committee including CNAP and /or other food coalition partners (i.e., Richmond Food Policy Council, Contra Costa Food Systems Alliance, etc.).	☐ CED ☐ CEI ☒ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 X, Q2 X, Q3 X, Q4 X Year 2 Q1 X, Q2 X, Q3 X, Q4 X Year 3 Q1 X, Q2 X, Q3 X, Q4 X	Partners list Photos Documenting Any Progress Made CX3 reassessment data Action Plan Marketing Materials NEOP marketing materials and recipe cards

	In Year 1, the LHD will provide education and technical assistance sessions to 5-10 retail advisory subcommittee members to teach skills needed to conduct retail assessments. In Year 1, the LHD and retail advisory subcommittee will assess CX3 data to improve the retail environment in 1 SNAP Ed eligible retail stores and 1 farmer's market in at least 1 SNAP-Ed eligible neighborhoods. In Year 2, the LHD staff and retail advisory subcommittee will assess CX3 data and provide strategies to improve the retail environment in 2 SNAP Ed eligible retail stores and 2 farmer's market in at least 1 SNAP-Ed eligible neighborhoods. In Year 3, develop a plan of action to increase access to and the consumption of healthy foods and beverages in the retail environment in 2 SNAP-Ed eligible retail stores and locations of 2 mobile farmer's markets in at least 1 SNAP-Ed eligible neighborhoods.					

4.2	The LHD will work with retail owners to increase access to healthy foods and beverages, and improve the nutrition environment of their stores. In Year 1: Identify 2 retail manager/owners at 1 retail store in 1 SNAP Ed eligible neighborhood. In Year 2: Identify 4 retail managers/owners at 2 retail stores in 1 SNAP Ed eligible neighborhood to provide nutrition education and strategies for increasing the sale of healthy foods and beverages. In Year 1, the LHD and partners will meet with the retail owners/managers. In Year 1, the LHD staff and partners conduct education on the importance of access to healthy foods as it relates to chronic disease and obesity prevention. In Year 1, the LHD will utilize the NEOP Retail Campaign educational and marketing materials to educate retailers about increasing access to and the promotion of healthy fruits/vegetables and beverages at their stores, and product placement in or near the check out area. In Year 1, the LHD will provide healthy marketing materials, which may include NEOP Retail and Harvest of the Month social marketing signage, posters, newsletters, and NEOP recipe cards for retail stores to display. The LHD will provide technical assistance to retailers to improve the nutrition environments.	x CED x CEI x MPR x C&C x TTA	x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	ATF Healthy Retail Marketing Materials NEOP marketing materials and recipe cards

	In Year 1, LHD staff and partners will identify dates and locations to conduct at least 1 taste testing and 1 store tour in 1 SNAP-Ed qualifying store. In Year 2, the LHD staff and partners conduct education on the importance of access to healthy foods as it relates to chronic disease and obesity prevention for 4 retail managers/owners at 2 retail stores in 1 SNAP Ed eligible neighborhood. In Year 2, LHD staff and partners will identify dates and locations to conduct at least 2 taste testings and 2 store tours in 2 SNAP-Ed eligible stores in 1 SNAP-Ed eligible neighborhood. In Year 2, the LHD will provide support and technical assistance for 2 retail stores to have at least 2 healthy snacks and 1 healthy beverage placed in or near the checkout area. In Year 3, 2 retail stores will implement at least 3 healthy snacks and 2 healthy beverages placed in or near the checkout area. Annually the LHD will conduct at least 1 Fruit and Veggie Fest celebration at one SNAP-Ed eligible retail site reaching 200 SNAP-Ed eligible families in Year 1; 300 SNAP-Ed eligible families in Year 2; and 400 SNAP-Ed eligible families in Year 3.					

4.3	The LHD will partner with the local farmer's market association to expand and increase opportunities for SNAP-Ed eligible families to have access to healthy fruits and/or vegetables. In Years 1 and 2 the LHD will identify and partner with 1 mobile farmer's market in 1 SNAP- Ed eligible neighborhood; in Year 3, partner with 2 mobile farmer's markets in 2 SNAP-Ed eligible neighborhoods to increase access to healthy fruits and vegetables through the use of EBT and/or Market Match Program, and the expansion of hours and/or locations of the mobile farmer's market outlets. Year 1, activities will include the following: The LHD staff and partners will provide education on the importance of access to healthy foods as it relates to chronic disease and obesity prevention. The LHD will meet with Pacific Coast Farmer's Market Association and get baseline data on current EBT and/or Market Match participation rates. The LHD will meet annually with Pacific Coast Farmer's Market to receive updated EBT and/or Market Match usage data. The LHD will provide healthy marketing materials, which may include NEOP Retail and Harvest of the Month social marketing signage, posters, newsletters, and NEOP recipe cards to farmer's markets. The LHD will provide technical assistance to farmer's markets to improve the nutrition environments.	 CED CEI x MPR x C&C TTA	 CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	CX3 reassessment data EBT and Market Match data Event flyers

	The LHD will utilize the findings from the CX3 data to assess the feasibility of expanding the hours and/or locations of 1 mobile farmer's market program in 1 SNAP-Ed eligible neighborhood. In Year 2, activities will include the following: The LHD staff will contact and meet with 1 Farmer's Market managers to track and monitor EBT and/or Market Match usage rates. Efforts such as highlighting the acceptance of EBT and/or Market Match will be used to increase EBT and/or Market Match participation rate by a minimum of 3% at the end of Year 2. The LHD staff will provide healthy marketing materials, which may include NEOP Retail and Harvest of the Month social marketing signage, posters, newsletters, and NEOP recipe cards to retail stores and farmers' markets. The LHD staff and CNAP partners will partner with the Fresh Approach to identify potential strategies with increasing access to healthy fruits and vegetables and the expansion of extended hours and/or location of mobile farmer's markets. The LHD staff, CNAP partners and Fresh Approach will provide promotional marketing strategies to increase awareness of the new mobile market hours and/or locations.					

	The LHD staff and partners will work with Fresh Approach to pilot the expansion of hours and/or locations of mobile farmer's market in at least 1 SNAP-Ed eligible neighborhood. In Year 3 the activities will include the following: In year 3, the LHD staff and partners will collaborate with Fresh Approach and implement the expanded hours and/or locations of 2 mobile farmer's markets in a minimum of 2 SNAP-Ed eligible neighborhoods. In Year 3, the LHD will develop relationships with farmers' markets managers to assess the EBT and/or Market Match Programs at a minimum of 2 farmer's markets in 2 SNAP-Ed eligible neighborhoods. Efforts such as highlighting the acceptance of EBT will be used to increase EBT participation rate a minimum of an additional 3%, for a total of a 6% increase by the end of Year 3.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #5 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and a demand for healthy fruits, vegetables, and beverages in a minimum of 6 organizations that provide supplemental sources of food for the SNAP-Ed eligible population (i.e., food banks, food pantries, school and after-school programs, summer meal programs, faith-based institutions, senior meal sites, etc.), reaching a minimum of 6,000 SNAP-Ed eligible adults and their families through evidence-based nutrition education and the development/implementation of policy, systems, and environmental changes that support a healthy nutrition environment and promotes physical activity.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- ✓ Increase knowledge of healthy dietary recommendations (My Plate, Rethink Your Drink, etc.)
- ✓ Increase access to healthy foods and beverages through the development and implementation of healthy food and beverage policies/standards within organizations that provide supplemental meals
- ✓ Increase access to healthy foods for additional SNAP-Ed eligible populations by expanding their ability to participate in restrictive feeding programs (i.e., summer meal programs)
- ✓ Provide nutrition and resource management education to support SNAP-Ed eligible populations
- ✓ Develop a resource guide that provides information on emergency food outlets, supplemental food programs, low or no-cost medical services, and housing and employment training/opportunities for SNAP-Ed eligible populations
- ✓ Increase access to healthy foods by providing support and technical assistance to develop a local procurement program
- ✓ Increase access to healthy beverages in community settings by supporting local efforts to improve the nutrition environment of community supplemental meal sites where SNAP-Ed eligible children and their families live (i.e., parks, recreation centers, etc.)

Contra Costa County

Three-Year
Integrated Work Plan
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, provide evidence-based nutrition education and physical activity promotion for SNAP-Ed eligible populations at a minimum of 2 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 1,000 SNAP-Ed eligible participants.
   b. By September 30, 2017 conduct a minimum of 1 food tasting per site that highlight fruits and/or vegetables being distributed at a minimum of 2 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 400 SNAP Ed eligible participants.
   c. By September 30, 2017, SNAP-Ed partners will assess existing healthy food and beverage policies with a minimum of 2 coordinating organizations that oversee sites that provide supplemental meals to SNAP-Ed eligible populations (i.e., food bank, faith-based organizations, senior meal programs, etc.).
   d. By September 30, 2017, SNAP-Ed partners will work with a minimum of 1 coordinating organization that oversees local summer meal programs (i.e., school district, parks and recreation departments, etc.) to assess opportunities for overcoming barriers (i.e., funding restrictions) that prohibit all community members (i.e., parents of SNAP-Ed eligible children and youth) from having the ability to access foods from summer meal programs.
   e. By September 30, 2017, SNAP-Ed partners will work with a minimum of 1 food bank distribution site and/or 1 senior meal site to assess the feasibility of developing a local procurement program for healthy fruits and vegetables.
   f. By September 30, 2017, SNAP-Ed partners will work with a minimum of 1 food bank distribution site and/or 1 senior meal site to assess the feasibility of expanding services to increase access to healthy foods and beverages.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, provide evidence-based nutrition education and physical activity promotion for SNAP-Ed eligible populations at an additional 4 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 1,500 SNAP Ed eligible participants.
   b. By September 30, 2018, conduct a minimum of 1 food tasting per site that highlight fruits and/or vegetables being distributed at an additional 4 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 600 SNAP Ed eligible participants.

c. By September 30, 2018, SNAP-Ed partners will work with a minimum of 2 coordinating organizations (i.e., food bank, faith-based organizations) that oversee sites that provide supplemental meals to SNAP-Ed eligible populations to increase access to healthy foods and beverages by developing and/or expanding existing healthy food and beverage policies.
d. By September 30, 2018, SNAP-Ed partners will support the efforts of a minimum of 1 coordinating organization that oversees local summer meal programs and are looking to increase access to healthy foods and beverages by including the parents of SNAP-Ed eligible children and youth as participants in the summer meal programs.
e. By September 30, 2018, SNAP-Ed partners will work with a minimum of 1 food bank distribution site and/or 1 senior meal site to develop a local procurement program for healthy fruits and vegetables.
f. By September 30, 2018, SNAP-Ed partners will work with a minimum of 1 food bank distribution site and/or 1 senior meal site to develop a policy and/or systems changes that expand services to increase access to healthy foods and beverages.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, provide evidence-based nutrition education and physical activity promotion for SNAP-Ed eligible populations at 6 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 2,000 SNAP Ed eligible participants.
   b. By September 30, 2019, conduct a minimum of 1 food tasting per site that highlight fruits and/or vegetables being distributed to 6 supplemental meal sites (i.e., food bank, food pantries, summer meal program, senior meal sites, etc.) reaching 800 SNAP Ed eligible participants.
   c. By September 30, 2019, SNAP-Ed partners will work with a minimum of 2 coordinating organizations (i.e., food bank, faith-based organizations) that oversee sites that provide supplemental meals to SNAP-Ed eligible populations to increase access to healthy foods and beverages by implementing updated or expanded healthy food and beverage policies.
   d. By September 30, 2019, SNAP-Ed partners will support the efforts of a minimum of 2 coordinating organizations that oversee local summer meal programs and are looking to increase access to healthy foods and beverages by including the parents of SNAP-Ed eligible children and youth as participants in the summer meal programs.
   e. By September 30, 2019, SNAP-Ed partners will work with a minimum of 1 food bank distribution site and/or senior meal site to support the implementation of a local procurement program for healthy fruits and vegetables.
   f. By September 30, 2019, SNAP-Ed partners will work with a minimum of 2 food bank distribution sites and/or 2 senior meal sites to implement policy and/or systems changes that expand services to increase access to healthy foods and beverages.

SECTION A: OVERVIEW

1. SNAP-Ed Implementing Agency Names

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
x	**California Department of Public Health: CDPH: Del Norte County Local Health Department (LHD)**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

Del Norte County is located in the most northwest corner of California along the Pacific Ocean; the county encompasses 1,006 square miles of land and sits just south of the Oregon border, extending along the Klamath River into Humboldt County. The area is known for its beautiful and diverse topography including redwood forests, rugged coast-lines, mountain ranges, and numerous tributaries. Previously, the major economic activities in the region were natural resource extractive industries, such as timber, fishing and mining. Today, jobs in these industries are severely diminished, and the economy has shifted toward more service-based industry. Del Norte County has an estimated 2014 population of 27,212 based upon the 2010 United States Census. The county is considered extremely rural with the county seat and only incorporated city being Crescent City with a population of 7,470. Due to the extremely rural nature of the county, the four main communities are identified by zip codes as a means of tracking populations. The 95531 zip code for Del Norte County includes Crescent City as the most central community, with the largest total population of 24,528 which includes Pelican Bay State Prison (3,240 inmates). There are three other rural communities including Klamath (95567) with population of 1373, northern most community of Smith River (95567) with population of 1,930 and Gasquet (95543) community with 661 people who travel 19 miles east along the winding Smith River canyon. The mountainous terrain associated with the Coastal Range and the Klamath Mountains dominates Del Norte County's geography. Elevation ranges from sea level to over 6,400 feet. Although much of the county is made up of steep terrain, there are small patches of flat terrain along the coast and in isolated mountain valleys. This wilderness terrain makes transportation and access between Crescent City and outlying communities difficult, and extreme winter weather increases travel time and decreases access to services.

Del Norte County has 10,297 SNAP-Ed eligible, with that number identifying themselves as follows: 66.2% —White (non-Hispanic); 15.1% —Hispanic; 8.9%—Multiracial; 4.8%—American Indian/Alaska Native; 4.2%—Asian; .7%—African American and .1%—Native Hawaiian/Other Pacific Islander. The racial/ethnic composition is becoming more diverse with an increase in the Hispanic population. The elderly population is growing proportionally larger as well. The highest SNAP-Ed eligible group is children under age 6 years old with 64.5%.

In 2010-2012 there were 9,500 households in Del Norte County, with families making up 63% percent of those households. This figure includes both married-couple families (44%) and other families (19%). Of other families, 8% are female householder families with no husband present and own children under 18 years. Non-family households made up 37% of all households in Del Norte County. Most of the non-family households were people living alone, but some were comprised of people living in households in which no one was related to the householder. More than half (68.5%) of households with related children under 5 years where the female is the head of household (without husband present) had income in the past 12 months that was below the poverty level. When children in similar household were under 18 years old, 50.1% families were below poverty in the last 12 months.

Del Norte County has an overall food insecurity rate of 19.2% and a child food insecurity rate of 30.6% from the County Profile 2015. Both rates are slightly increased compared to 2014, 18% and 29% respectively, and the food insecurity rates are higher than the state rates, 15.0% overall and 25.1% children. The population below Federal Poverty Level for Del Norte County is 21.8%, and the rate is higher than the state rate, 15.9%. A total 10,297 (41.7%) people in the county are eligible for SNAP-Ed program. 5,146 people (20.8%) are participating in the CalFresh program monthly. SNAP-Ed eligible population by the age groups; Children under age 6 years old: 1, 263 (64.5%), Children 6-17 years old: 1,832 (46.7%), Adults 18-64 years old: 5,818 (38.9%), Seniors 65 years and older: 1,384 (35.6%). Poverty and risk of food insecurity are discouragingly high for children, especially the SNAP-Ed eligible rate among households with young children under 6 years old age in Del Norte, which at 64.5% is a lot higher than the state rate of 44. 6%. Based on the 2010-2014 American Community Survey for Del Norte County, 68.5% of households with related children under 5 years with female head of house and with no spouse is below the poverty level, and in similar households with related children 18 years old, 50.1% families were below poverty in the last 12 months. The strong correlation between poverty and food insecurity, as well as between the household characteristics that are linked with both, demonstrates that poverty and household structure in communities can strongly indicate where food insecurity is occurring. Food insecurity has been linked to obesity, diabetes, dietary nutrient deficiencies, low fruit and vegetable intake and other indicators of unhealthy diets. Research suggests that food insecurity is related to increased risks for health problems such as overweight/obesity, heart diseases, and high blood pressure. From the county profile 2015, 54.2% overall adults is overweight/obese and 25.3% adults is obese.

4. Community Assessment

The assessment data utilized to identify intervention strategies are the following; information on demographic, health, and community and environmental setting. By utilizing a comprehensive set of assessment measures to inform the development of the work plan, Del Norte County LHD has identified a set of interventions that address all levels of socio-ecological model and provide long term benefits to the SNAP-Ed eligible population.

Based on existing data sets, the following are examples of the assessment data used in Federal Fiscal Year 2017-2019.

- SNAP-Ed County Profiles (provided CDPH)
- A Community Food Assessment for Del Norte County and Adjacent Tribal Lands (prepared by CCRP, California Center for Rural Policy)
- Del Norte County A Look at Childhood Obesity, 2013 (prepared by CCRP, California Center for Rural Policy)
- Del Norte County Safe Route to School (SRTS) Research and Policy Report, 2012-2013 (prepared by California Center for Rural Policy)
- Key Informant Interviews (community partners, teachers and staff in early childhood settings, retail store owners, Champions for Change), Surveys (preschool parent survey, walkability survey, High school Rethink Your Drink survey, Food Council Priority Survey), Observation, Farmers Market Match and SNAP utilization data

- Good Food Makes Us All Healthy Evaluation Plan by California Center for Rural Policy at Humboldt State University (five perennial food forest projects led by Tolowa Dee-ni' Nation in partnership with Community Food Council)
- Seamless Summer Meal Program Data in 2015
- Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention(CX^3) assessments on retail stores, walkability, and fast food restaurant ground survey findings

According to the "*Del Norte County, A Look at Childhood Obesity, 2013*" report conducted by California Center for Rural Policy, between 2011-12 and 2012-13 kindergarten students showed a dramatic increase in the percent of students who are overweight or obese (increased from 30% to 45% and is statistically significant) . The Del Norte County LHD has conducted interviews with the Del Norte County Unified School District Afterschool Program Coordinator who has been monitoring students BMI over the last two years. Based on the data and her observation on students eating behaviors, the Afterschool Program Coordinator has reported seeing the obesity rate reducing slowly, with her belief being that the reduction is based on children feeling safe and not worrying about food and hunger given healthy foods is consistently accessible throughout the day from breakfast to supper meal programs at the school. This sense of safety and lack of worry allows them to be able to enjoy academic and enrichment activities as they know the healthy food is always available and accessible at school. Strengthening food security by increasing the availability, stability, and access of nutrient dense foods such as fruits, vegetables and whole grains among the high risk SNAP-Ed eligible groups and Empowering SNAP-Ed eligible with education will be the key intervention goals and activities, with the obesity rate reduced as a result. Community Food Council, First 5 and SNAP-Ed in partnerships with the Del Norte County Unified School District Nutrition Program have promoted the USDA Seamless Summer Meal Program and the Winter Meal Program with funding made available through a Building Healthy Community Initiatives mini grant funded. Through the Seamless Summer Meal Program, 3,500 meals were served in 2015, with 15,000 additional meals were served in 2015 through the addition of two new multi-unit low income apartment sites and extended serving time. Del Norte County LHD has found that children who are living under poverty are faced with food insecurity and hunger during summer months after school is let out for the summer—especially in the remote outlying areas. Coordination and collaboration with the Food Council, First 5 Vista, and the Del Norte County Unified School District Nutrition Program will be essential to recruit and train volunteers to ensure these valuable programs continue to be successfully promoted and implemented in the future. SNAP-Ed will work as a partner for these programs. The 2015-2016 Food Council priority survey (of which 59 people responded) indicates that healthy food access, food and nutrition education in school and community and Farm to School activities were the highest ranked issues. Local food security efforts will be strengthened in FFY17-19 through greater awareness and more coordinated messages and nutrition information being made accessible among insecure communities in Del Norte County. This will be addressed in the FFY17-19 work plan as a key objective and intervention activities by supporting the integration of nutrition education, Farm to School Program, school and community gardens, community food forest project, and Seamless Summer and Winter Meal programs, with coordination and collaboration between the programs.

Based on farmers market surveys conducted by market managers to access consumers' eating behavior and attitude and interviews from market managers from both Saturday market and Wednesday market, total sales have increased almost double as the market vendors grew—with more produce (and especially more fruits) coming from Oregon as the price is comparable with superb and excellent quality. Promotion of farmers markets through radio advertisement and flyer distribution, and nutrition education at the markets to enhance food resource management skills, were the catalyst to bring the new shoppers to the market, with the Fruits and Veggie vouchers made available by the Open Door Clinic to their patients being one of the most successful incentives to bring new EBT eligibles to the markets. Even with all the promotions and the voucher program from Open Door Clinic, WIC and Senior Farmers' Market Nutrition Program, Del Norte County LHD has found that limited people utilize their benefits at the local farmers market. On a weekly basis during June to November, only about 20 people came to the market and utilized EBT benefits, with the sales of approximately $250 on a weekly basis. This resulted to about 200 EBT participants during the season, which is a very small number compared to the total number of 5,146 CalFresh participants residing in Del Norte County. Even with paid radio advertisements and education and promotion at the markets, according to the farmers' market manager there was only 1.4% increase of EBT usages in 2015 compared to 2014. The survey conducted at the Saturday and Wednesday farmers market indicates the most effective way to promote farmers market and to attract new EBT shoppers is to educate CalFresh participants directly about the benefits of eating fresh and local, and the impact it has on their health and community through educational handouts, promotion and outreach of the incentive programs (Market Match, Fruit and Veggie Voucher Program, WIC and Senior Farmers' Market Nutrition Program). Direct promotion such as produce comparison taste testing at the markets and at Social Services programs, and indirect promotion and outreach using Social Media and “Go Wild Rivers Coast App” have been considered as possible outreach activities through collaborated efforts within the community. To increase food access and maximize the reach and impact between the programs, the farmers' market promotional flier and handouts will be distributed to all newly enrolled and renewing CalFresh participants through collaboration with the Social Service CalFresh Program and other programs under the Department of Health and Human Services where SNAP-Ed eligibles are enrolled. SNAP-Ed will provide on-going technical supports to make EBT accessible and promoted through volunteers’ recruitment and trainings and other related supports.

Three major full-service grocery stores have been closed and remain vacant since 2013, with no indication they will reopen. This has rendered the whole County as a Food Desert by USDA standards, with outlying and tribal communities relying on small convenience-type stores with very limited offerings of whole foods, especially fruits and vegetables. If accessed by a personal vehicle, residents of Smith River, Gasquet, Klamath, and the Upper Yurok Reservation are a minimum of 15-20 minutes from a full-service grocery store. If residents do not have access to a vehicle, the travel time is much longer utilizing the limited public transportation available to them. One of the priorities of SNAP-Ed through this IWP is to increase healthy food access in the outlying areas in Smith River and Klamath communities. By partnering with Community Food Council and retail store owners and managers, Del Norte County LHD will be committed to and make efforts to bring farmers market to Klamath and Smith River and promote Farm to Store by bringing local foods and produce to the stores. The CX^3 Availability & Marketing Survey, the Fast Food Marketing Environment Survey and the Walkability Survey has been completed and submitted to NEOPB, with the County profile scheduled to be completed by the end of FFY16. The data from these surveys will be shared with community partners and PSE interventions will be created to improve retail environment and increase food security and food management skills within a budget among low income SNAP participants. The Del

Norte County Tobacco Use Prevention Program has focused on the retail environment as part of the Healthy Stores for a Healthy Community Campaign, with a new policy adopted to reduce outdoor advertisement under 10% in 2015. One of the First 5 Del Norte Impact Grant Initiatives is the health and wellbeing of the young children, with retail interventions being part of the "Growing Healthy" campaign of the Impact Consortium work plans. Del Norte County LHD will work with the Tobacco Use Prevention Program (TUPP) and First 5 to improve the retail environment as a way to promote healthy foods through education and through the "Healthy Stores for a Healthy Community Campaign" and "Growing Healthy Campaign".

According to the report, "*Del Norte, County A Look at Childhood Obesity, 2013*", 43% of students are overweight or obese, with a higher percent of low-income children aged 2 to 4 years in Del Norte County overweight (20.9%) compared to California(16.1%). Less than ¼ of the students are meeting the physical activity recommendation. Over 75% of students have non-active transport to and from school. Up to 67% of students did not eat breakfast and up to 84% of students drank soda or sweetened beverages in the past 24 hours. Up to 42% of students did not eat any fruit in the past 24 hours, and up to 42% of students did not eat any vegetables in the past 24 hours. Based on the interviews with Del Norte County Unified School District Nutrition Service and school nurses, coordinated programs and policies to increase opportunities for physical activity and healthy eating are needed to reduce this child hood obesity rate. The most current data will be added and monitored over time to continue looking into targeted interventions which will promote healthy weight factors (physical activity, fruits, vegetables, breast feeding as infants) and reduce the obesity promoting factors (sedentary activity, skipping breakfast, eating fast food and soda). A new School Wellness Policy was adopted in November 2015, by which Del Norte County LHD will support implementation and monitoring of the progress of the policies around nutrition, physical activity, and Farm to School program, which will address this childhood obesity issues.

5. Community Change Goals

Based on the results of the Community Assessments, existing and new data were incorporated to help determine local needs. Del Norte County LHD, working with community partners including Community Food Council, Rural Human Services, Del Norte County Unified School District Nutrition Program, First 5 Del Norte, First 5 Vista, Del Norte Child Care Council, Public Health Prevention Programs, local Champions for Change, Tolowa Dee-ni, Good Food Makes Us All Healthy (Community Food Forest) Project, determine our community change goals. They include: (1) Strengthening local food security and increasing fresh and healthy food access and consumption for low-income SNAP eligibles of Del Norte and Adjacent Tribal Lands'; and (2) Increasing access to nutrition and physical activity education opportunities and resources to low-income SNAP eligibles and at risk of food insecurity of Del Norte and Adjacent Tribal Lands'.

Del Norte County LHD, with community partners, has determined that these two areas are essential to increase the overall health of Del Norte County by increasing healthy food access and strengthening local food security and increasing access to nutrition and physical activity education opportunities and resources to low-income SNAP eligibles of Del Norte and Adjacent Tribal Lands'. Overall community change goals for each area include:

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Del Norte County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 1/20/2017**

1. Strengthen local food security and increase fresh and healthy food access and consumption every year progressively:
    - Promote and support bringing new farmers markets in outlying communities in Smith River, Klamath, and Gasquet.
    - Support community gardens and school gardens to be successfully managed, implemented, and sustained though Farm to Fork/Farm to School programs; and as a mechanism to feed the residents through distribution and sales of the surplus; and to feed the children through cafeteria connection
    - Coordinate and collaborate with the County food projects, programs and campaigns which strengthens local food security and access, such as "Good Food Makes Us All Healthy" funded by USDA—National Institute of Food and Agriculture Grant, “Seamless Summer Meal” USDA food program, “Winter Meal Program” funded by Building Healthy Community, “Growing Healthy Campaign” by First 5 Del Norte, “Healthy Stores for a Healthy Community Campaign” by Tobacco Use Prevention Program.
    - Provide comprehensive nutrition education and physical activity promotion and education to the specific target sectors, with children and their parents in the early child hood setting being the main target audiences and core setting based on the obesity rates, child food insecurity and poverty rate; farmers markets and retail setting will be the complementary setting

2. Increase access to nutrition and physical activity education opportunities and resources to low-income SNAP-Ed eligible population and at risk of food insecurity of Del Norte and Adjacent Tribal Lands' every year progressively:
    - Identify best outreach and marketing tools for each sectors: children, childcare providers, teachers, parents, general public
    - Utilize mobile certified kitchen for cooking classes and demos at farmers markets and other location in outlying communities.
    - Support the integration of nutrition education, coordinated messages and information between programs.
    - Provide a series of nutrition education and physical activity promotion and education consistent with the current Dietary Guidelines for Americans and Physical Activity Guidelines for Americans to low-income SNAP-Ed eligible population
    - Coordinate and collaborate with the Summer Youth Academy Program to promote nutrition/physical activity at farmers markets and Summer Meal sites.
    - Support “Cooking Matters” Train-the-Trainer models in partnership with Community Food Council and Champions for Change, and recruit and train the volunteers to assist with nutrition promotion
    - Build community leadership through Champions for Change recruitment and Leadership and Community Engagement trainings
    - Support implementation and Evaluation of the current School Wellness Policy
    - Adopt and implement the policy promoting access to healthy foods, beverage and physical activity at early child hood settings
    - Create "Growing Healthy Daycare" and "Growing Healthy Retail" programs as part of Growing Healthy Community Campaign

Del Norte County LHD, with community partners, recognizes that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. Community Food Council, Smith River Rancheria (Tolowa Dee ni Nation Tribe), Rural Human Services, Del Norte County Unified School District Nutrition Program, First 5 Del Norte, Prevention Programs have taken on larger community change goals, and Del Norte County LHD has committed to work to achieve community change goals with these key partners and other community organizations and local Champions for Change as a catalyst and action driven task force.

Del Norte County LHD has determined based on the larger community change goals to work to support and set the following two SMART Three Year SNAP-Ed Local Objectives for FFY 17-19:

1. By September 30,2019, increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles at 5 SNAP-Ed eligible qualifying neighborhood retail stores, 3 farmers markets, 5 school gardens and 5 community gardens/food forests, through the adopted and implemented policy and environmental changes.
2. By September 30, 2019, 10 Early Care and Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition, physical activity, and/or screen time environment for participating children.

Del Norte County LHD is uniquely positioned to support these community change goals with work in nutrition education, media and public relations, coalition building, training supports and technical assistance. Much of the larger community change goal work will require additional funding to support policy, system, environment advocacy and changes, but Del Norte County LHD contribution will remain exclusive to SNAP-Ed eligible population and allowable activities and interventions. Direct education is the foundation of SNAP-Ed. Del Norte County LHD provides nutrition education and physical activity promotion and education, as well as support for policy, systems, and environment changes to increase access to and appeal of healthy dietary choices and decrease access to and appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

Del Norte County LHD will work to achieve SNAP-Ed Local Objective 1, which will focus on increasing fresh and healthy food access and consumption through education, coordination and collaboration with County food project and programs. Del Norte County LHD will focus on improving retail and corner store environment and increase healthy food access and nutrition promotion to low-income SNAP-Ed eligible population in Smith River and Klamath and the stores around school settings. CX^3 On The Ground-Food Availability & Marketing Survey and Store Environment Walkability Survey will be completed at 15 stores including full scale grocery stores, corner stores and gas station fuel mart at Smith River, Klamath, and Crescent City and the findings shared with community partners and stakeholders, including city councils and County Board of Supervisors, thorough meetings and community forum. Once the priorities are identified, Del Norte County LHD will implement Healthy Retail/Healthy Corner Store PSE interventions and activities for FFY 17-19 progressively to improve the retail

environment and to increase healthy food access and promotion. Del Norte County LHD will support community/school gardens to be managed successfully, utilized optimally and self-sustained to benefit SNAP-Ed eligible community residents and students addressing the Farm to Fork/Farm to School principle and activities. Del Norte County LHD will support existing farmers market to increase EBT utilization and SNAP participation and also will support the efforts to establish new farmers market in the outlying areas in Smith River and Klamath neighborhood. This supports State Behavioral Outcomes Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages; Goal 3: Improve Food Resource Management, and Goal 4: Increase access to and/ or appeal of healthy dietary choices and decrease access to and/ or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop. This objective will be achieved through the direct and indirect evidence-based nutrition and garden education to the target SNAP- Ed eligible population. Champions for Change, community food project coalition with Community Food Council, First 5 Vista, and School District and community Volunteers and Master Gardeners will be the leading task force to achieve this objective and activities.

Del Norte County LHD will work to achieve Local Objective 2, which will focus on increasing access to nutrition and physical activity education opportunities and resources to SNAP-Ed eligible population through the promotion of school wellness policy. Del Norte County Unified School District revised and approved in 2015 their School Wellness Policy, with it now ready for implementation and monitoring of the progress and evaluation. A Wellness Committee will be the leading task force to achieve this goal. Del Norte County LHD has been working in early childhood settings the last two years. We have built trust and capacity through garden based nutrition education using USDA curriculum, “Grow It, Like It, Try It", and physical activity curriculum, "SPARK". Garden Clubs at SNAP-Ed qualified Head Start sites have also been supported by Del Norte County LHD. Del Norte County LHD will continue their support through nutrition and physical activity education and promotion in ECE settings as a primary intervention population and sites, and will extend the efforts with indirect education and environmental and policy supports to the home day care providers and the Head Start’s Home Visiting Program and Public Health Nurses Home Visiting Program. In partnership with First 5 Del Norte Impact Grant Initiatives, “Growing Healthy Campaign”, Del Norte County LHD will support the policy, system and environmental changes that support fruit and vegetable access and consumption, nutrition/physical activity/Rethink Your Drink/limiting screen time at ECE settings. Partnerships and collaboration will be essential to maximize the impact and reach more of the target population group. Del Norte County LHD will focus on the SNAP-Ed eligible population ECE settings for FFY17-19, partnerships and collaboration between First 5 Del Norte and Child Care Council, State preschools, Head Starts, Public Health and Social Service’s Home Visiting Program for the target population will be essential to achieve the SNAP-Ed goals and to meet the bigger needs of the community by leveraging resources and filing the gaps between the agencies and different funding sources. This supports State Behavioral Outcomes Goal 1, Goal 2: Increase Physical Activity, Goal 4, and Goal 5: Increase access to and /or appeal of physical activity opportunities for SNAP-Ed eligible populations.

6. Partnerships and Collaborative Efforts

The Del Norte County Community Food Council serves as County Nutrition Action Plan (CNAP) Partners. Del Norte County Community Food Council is a larger community partnership started in October 2011 with the mission, "build a vibrant, sustainable, local food system through opportunity, education, innovation, advocacy, and promotion." The Community Food Council meets monthly and has 20-25 regular council members and over 100 members who attend sporadically. The Community Food Council is composed of business, college, faith-based organizations, farmers, funded and non-funded government agencies, hospital and health care systems, and non-profit organizations including food banks, primary and secondary schools. They facilitate meaningful dialogue and assessment of the current food system, identify and prioritize issues and make recommendation at local, state, and federal level. Community Food Council organize a series of Do-It-Yourself Food Workshops and garden workshops that teach local residents do-it-yourself cooking and gardening skills; educates the community about food and nutrition issues both locally, regionally, and nationally; invites people working in the food system to speak at the meetings to educate members about food issues; promotes the local food business and works with regional and state level Food Policy Councils' priorities. One of the Community Food Councils priorities is food and nutrition education in schools and community. The Community Food Council is planning to bring "Cooking Matters" train-the-trainer workshops to young children, youth, and adults audiences to the community. Local Champions for Change will partner up with Food Councils' "Cooking Matter" project, with many Champion trainers recruited and trained to present the mastered skills-at classes and workshops to the various community settings and events. Tolowa Dee-ni Nation in Smith River Rancheria and Community Food Council was awarded a USDA-National Institute of Food and Agriculture (NIFA) grant for implementation of a community food forest project. Five perennial food forests will be established and more community gardens will be created and expanded on tribal lands and throughout Del Norte County with this grant food forest project. The food forest and garden coalition will be established and the coordinated strategic work plan will be created and implemented and evaluated collectively. In addition, SNAP-Ed services and activities are promoted by connecting with other agencies, such as County Welfare Departments, etc.

7. Key Messages

x	Food Safety	x	Physical Activity	x	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
x	Fruits & Vegetables	x	Limit Added Sugars or Caloric Sweeteners	x	Other *(specify): eating with limited budget*
x	Fats and Oils	x	Food Shopping/ Preparation	x	Other *(specify)*: family meals and kids' cooking
x	Lean Meat & Beans				
x	Sodium & Potassium				
x	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or USDA approved UC CalFresh, California Department of Aging, and California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of the document. All materials, resources, and curriculum have also been identified for each objective proposed in this integrated work plan under section C.

9. Intervention and Evaluation Plan Narrative Summary

Del Norte County LHD will collaborate to provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with partners throughout the county. The LHD will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change.

Del Norte County LHD will conduct activities at the individual and interpersonal level of Social Ecological Model. The LHD also incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venue. The LHD will address Training and Technical Assistance of their personnel or the community-sharing training opportunities across agencies when possible.

Del Norte County LHD will employ evidence-based practice-based interventions. The LHD will also include research-based interventions. The objectives and activities for the integrated work plan were driven from results obtained via agency's community assessments.

Three Year SNAP-Ed Local Objective 1: By September 30,2019, increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles at 5 SNAP-Ed qualifying neighborhood retail stores, 3 farmers markets, and 5 school/community gardens and food forests, through the adopted and implemented policy and physical changes.

This objective will be achieved with multi-level behavior-focused strategies and interventions. Del Norte County LHD has built trust with retail store owners in Smith River and the Fuel Mart manager in Klamath who are now willing to bring farmers market at their property with no cost for the vendors. Both outlying areas are considered as Food deserts. Bringing farmers markets to the communities will increase healthy food access. Del Norte County LHD will provide direct nutrition education with indirect supports to the SNAP-Ed eligible at the SNAP-Ed qualifying markets to increase healthy food consumption, especially with fruits and vegetables, with coordination with the Mobile Education Kitchen. School and community gardens will be successfully managed by cultivating champions at

each garden through the trainings and technical supports, and Farm to School and Farm to Fork initiatives will be implemented at the SNAP-Ed eligible sites to access and use produce from the school garden in the cafeterias, and facilitate the distribution from the community gardens and food forests to emergency food distribution outlets such as the food banks and public housing facilities. To increase food access and consumption at the retail settings, Del Norte County LHD will provide nutrition education that connect shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines, and improve store environment for both interior and exterior through adopting product placement strategies and healthy advertising. Based on the CX^3 assessment and findings, the priorities will be identified and interventions and activities will be implemented at the 5 qualifying retail stores. The objective will be achieved through coordination and collaboration with the funded and non-funded community partners' program and the First 5 Del Norte "Growing Healthy Campaign", "Healthy Stores for a Healthy Community" by the "Tobacco Use Prevention Program", and "Community Food Forest Project" by Smith River Rancheria (Tolowa di ni Nation). Direct and indirect nutrition and garden education and promotion at the intervention target retail stores, gardens and farmers markets will support State SNAP-Ed Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages and Goal 3: Improve Food Resource Management. State SNAP-Ed Goal 4: Increase access to and/or of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, or play, will be supported and achieved through the strategies: healthy advertising, product placement strategies, Healthy Family Checkout lanes, local procurement, EBT/WIC promotion.

Three Year SNAP-Ed Local Objective 2: By September 30, 2019, Ten SNAP-Ed eligible Early Care and Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition, physical activity, and/or screen environment for participating children, and receive the recognition as a "Growing Healthy Day Care/ECE" site.

This objective will be achieved with multi-level behavior-focused strategies and interventions. Del Norte County LHD has built trust and capacity with the educators, staff and parents and community partners in ECE sites. Del Norte County LHD has provided garden based nutrition education to the target Head Start sites and State preschool sites and provided indirect support through Harvest of the Month distribution and parent newsletter distribution. Del Norte County LHD has provided monthly "Grow It, Like It, Try It" garden based monthly parent workshops. Parent garden clubs were created and supported at the several Head Start sites. These activities and support will continue to be provided by Del Norte County in FFY 2017-2019. Del Norte County LHD will identify strategic partners and convene community-wide, multi-sector coalitions to improve nutrition and physical activity in ECE settings and community settings to prioritize, select, and adopt collective impact to meet diverse needs of the community. Through the coalition between First 5 Del Norte, Childcare Council, WIC, North Coast Children Services, and State preschools and parents at ECE settings, SNAP-Ed goals will be created to address the needs which the coalition will work collectively to achieve. Del Norte County LHD has implemented "Grow It, Try It, Like It", garden based nutrition USDA curriculum at 9 ECE sites for FFY-15-16. Del Norte County LHD will continue to provide comprehensive education on proper nutrition and physical activity for children, parents, education providers, and care providers through direct education and trainings and technical supports. Del Norte County LHD has provided SPARK early childhood curriculum binders and equipment and trainings and demonstration at 9 ECE sites for FFY15-16. The educators and care providers will be encouraged to fully implement SPARK

curriculum for FFY17-19 with the ongoing supports from Del Norte County LHD. This will support State Level SNAP-Ed goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages and Goal 2: Increase physical activity. Del Norte County LHD will implement farm to preschool focused procurement activities and implement changes in the school environment that support and promote physical activity at ECE sites progressively each year. Del Norte County LHD has received Stencil Kits to enhance community environments to support active play and is now ready for implementation of this strategy for FFY 17-19. This objective will support State Level SNAP-Ed goal 4: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, play, or shop, as well as Goal 5: Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations. Del Norte County LHD will promote First 5 Del Norte Impact Grant Initiatives' "Growing Healthy Campaign" to achieve this goal.

Evaluation processes will be used to improve services for all local objectives. Del Norte County LHD will use Formative, Process (Re-AIM), curriculum-specific evaluations to determine effectiveness. To measure the outreach effectiveness of the NEOPB campaigns and initiative, a brief evaluation report will combine quantities analysis with qualitative data from Key Informant Interviews, surveys, and observation. Administrative data will be collected via ATF form to provide the process evaluation and quantities analysis will be accessed on a quarterly basis to measure the reach data and effectiveness of the resources and costs of implementations and evaluation of the interventions. To measure the outcomes of adult nutrition education series, participant pre and post survey will be conducted and percentages and frequencies will be tallied and summarized along with lists of any qualitative responses about the participants 'experiences. The survey will assess at a minimum the perceived usefulness of the presentation, challenges to implement the intervention and future intervention needs. To determine if the participants have achieved the skill-based outcomes of State Preschools, Head Starts at ECE sites, visual and verbal assessments will be made in the beginning and end of the each lesson. Key informant interview guide will be developed to assess the effectiveness and challenges implementing Harvest of the Month, Grow It, Try It, Like It, Color Me Healthy parent newsletter, SPARK. Key informants will be educators at ECE, care providers, administrators at ECE, and parents. Pre-intervention Key informant interview and survey will be used to identify perceived barriers and potential solutions. Follow-up Key informant interview and survey will identify perceived strengths and weakness of intervention, and challenges and solution identified. Additionally, monitoring increased EBT and Match program utilization will be conducted at farmers markets. Del Norte County will continue making efforts to find and utilize approved effective evaluation survey tools such as farmers market Dot Survey, IPod survey, Preference survey using beans in the jar as visual tallies. In collaboration with Tobacco Use Prevention program, IPod and evaluation software has been useful tool to measure EBT utilization and shoppers' demographics and behaviors and preferences. Sign in sheets and photos and video will be captured for the record and program sharing and presentation.

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30,2019, increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles at 5 SNAP-Ed eligible qualifying neighborhood retail stores, 3 farmers markets, 5 school gardens and 5 community gardens/food forests, through the adopted and implemented policy and environmental changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- **Corner store market conversion**
- **Local procurement**
- **Improve store environment**
- **Healthy in-store marketing and promotions**
- **Product placement strategies**
- **Farm to School/Farm to Fork**
- **Establish consumer economic incentives at the farmers markets and retail stores**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):** Increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles through the adopted and implemented policy and environmental changes as follows:

    i. By September 30, 2017, establish a Healthy Retail Advisory Committee that includes up to 3 community and retail partners representing up to 3 select SNAP-Ed qualifying neighborhoods to develop identified activities and a coordinated implementation plan for a Healthy Retail Recognition Program in a minimum of 3 retail stores.

    ii. By September 30, 2017, increase EBT utilization and SNAP participation at the Crescent City farmers market by 5% from the previous year and support to establish one new farmers market in qualifying outlying communities in Smith River/Klamath through the provision of nutrition education, promotional materials and technical support.

    iii. By September 30, 2017, recruit, educate and train Garden Champions and Student and/or Parent Garden Clubs at 10 SNAP-Ed qualifying school gardens/community gardens/food forests to provide USDA SNAP-Ed approved garden based nutrition education at three school gardens and one community garden.

2. **FFY 2018 (Year 2) Objective(s):** Increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles through the adopted and implemented policy and environmental changes as follows:

    i. By September 30, 2018, implement identified activities for a Healthy Retail Recognition Program in a minimum of 3 retail store in up to three SNAP-Ed qualifying communities.

    ii. By September 30, 2018, increase EBT utilization and SNAP participation at the Crescent City farmers market by 10% from the previous year and support one new qualifying farmers market to increase EBT utilization and SNAP participation in outlying communities of Smith River/Klamath through the provision of nutrition education, promotional events, materials and technical support.

    iii. By September 30, 2018, Garden Champions will be established to provide USDA SNAP-Ed approved garden based nutrition education at 4 school gardens and 2 community gardens/food forests.

3. **FFY 2019 (Year 3) Objective(s):** Increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles through the adopted and implemented policy and environmental changes as follows:

   i. By September 30, 2019, implement and evaluate identified activities for a Growing Healthy Retail Recognition Program in a minimum of 5 retail stores in up to three SNAP-Ed qualifying communities, with up to 3 retail stores recognized and incentivized as a Healthy Retail site.

   ii. By September 30, 2019, increase EBT utilization and SNAP participation at the Crescent City farmers market by 15 % from the previous year and support two new qualifying farmers markets to increase EBT utilization and SNAP participation in Smith River/Klamath.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30,2019, increase fresh and healthy food access and consumption to low-income SNAP-Ed eligibles at 5 SNAP-Ed eligible qualifying neighborhood retail stores, 3 farmers markets, 5 school gardens and 5 community gardens/food forests, through the adopted and implemented policy and environmental changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Compile and share with community partners and stakeholders the FFY 2016 CX^3 Index of Unhealthy to Healthy Food Sources assessment results on retail stores, walkability, and fast food environment. These assessments results will be used to create PSE intervention and activities for implementation for FFY 2017-2019. LHD will convene and establish a Healthy Retail Advisory Committee that includes CNAP partners and up to 3 community and retail representatives from up to 3 select SNAP-Ed qualifying neighborhoods. The Healthy Retail Advisory Committee will determine interventions and activities based on the CX^3 data and each community and store profile, with NEOPB intervention recommendations. 1.5	Provide 2-4 educational presentations annually (15-20 minutes each) to community residents, neighborhood groups, and community organizations on the importance of fruits, vegetables and healthy beverages and on the Growing Healthy Retail/Corner Stores Campaign. These presentations will focus on the benefits of a healthy checkout lane, healthy advertising, and an improved store environment made available through the campaign, as well as the impact unhealthy food and product advertising has on the children and community residents' health and environment.	( ) CED (x) CEI ( ) MPR ( ) C&C (x) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1: ( ) Q2: x Q3: ( ) Q4: x Year 2 Q1: ( ) Q2: x Q3: ( ) Q4: x Year 3 Q1: ( ) Q2: x Q3: ( ) Q4: x	Growing Healthy Retail/Corner stores Campaign materials for presentations, sign in, photo, ATF, Progress Report
1.6	Provide direct education workshops using approved curricula to middle school and high school health class to educate on marketing strategies that influence food choices and tactics to educate youth to make healthier decisions to increase fruits and vegetable consumption (one per each semester annually).	(x) CED ( ) CEI ( ) MPR ( ) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1: x Q2: ( ) Q3: x Q4: ( ) Year 2 Q1: x Q2: ( ) Q3: x Q4: ( ) Year 3 Q1: x Q2: ( ) Q3: x Q4: ( )	Lesson plan and handouts, pre-post evaluations, ATF, EARs, Progress Report
1.7	Provide a garden-based nutrition education series and workshop at SNAP-Ed qualified school/community gardens on a quarterly basis each year. The classes and workshops will be coordinated and supported with master gardeners using USDA approved curriculum and supported materials. • <u>Year 1</u>: Nutrition education at 3 school gardens and 1 community garden;	(x) CED (x) CEI ( ) MPR (x) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1: x Q2: x Q3: x Q4: x Year 2 Q1: x Q2: x Q3: x Q4: x	Lesson plan, sign-in, data cards ATF, EARS, Progress Report

	• Year 2: Nutrition education at 4 school gardens and 2 community garden; • Year 3: Nutrition education at 5 school gardens and 5 community garden;				Year 3 Q1 Q2 Q3 Q4 x x x x	
1.8	Develop and maintain an electronic database of facilities, agencies, physicians, nurses, and health care providers as a mechanism to distribute information on SNAP-Ed events and activities occurring within the county for the SNAP-Ed population, as well as to share resources between agencies and to build the referral system. One-on-one single lesson or series nutrition education and Food Resource Management classes to SNAP-eligible clients provided upon referral by agencies, along with healthy recipe demonstrations. Information distributed may include information on farmers markets and other nutrition and garden promotion events to be held in SNAP-Ed qualified sites, as well as SNAP-Ed approved materials based on 2015 Dietary Guidelines and current Physical Activity Guidelines and other USDA approved materials. Update SNAP-Ed event information on the social media app, "Go Wild River Coast" to reach diverse SNAP-Ed eligible population group, including youth and family. Coordinate at least one SNAP-Ed approved local media and public relation effort annually that supports farmers market, local food, and fruits and vegetables. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, Ten SNAP-Ed eligible Early Care and Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition, physical activity, and /or screen environment for participating children, and receive recognition as a "Growing Healthy Day Care/ECE" site.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- **Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment and to reduce screen time.**
- **Implement changes in the preschool environment that support and promote physical activity.**
- **Increase access to healthy foods, beverages and opportunities for active play**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):** By September 30, 2017, SNAP-Ed funded activities will reach 200 preschool-age children and 50 parents of preschool-age children with direct education and 300 preschool-age children and their parents with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures at up to three SNAP-Ed qualified ECE sites in the SNAP-Ed qualifying neighborhoods.

2. **FFY 2018 (Year 2) Objective(s):** By September 30, 2018, SNAP-Ed funded activities will reach 250 preschool-age children and 80 parents of preschool-age children with direct education and 400 preschool-age children and their parents with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in up to five SNAP-Ed qualified ECE sites in the SNAP-Ed qualifying neighborhoods; including making at least one new healthy site change per site to improve the nutrition, physical activity, and/or screen time environment for participating children at FFY 2017 and FFY 2018 sites.

3. **FFY 2019 (Year 3) Objective(s):** By September 30, 2018, SNAP-Ed funded activities will reach 300 preschool-age children and 100 parents of preschool-age children with direct education and 400 preschool-age children and their parents with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures successfully at up to ten SNAP-Ed qualified ECE sites in the SNAP-Ed qualifying neighborhoods, with the sites recognized as "Growing Healthy" ECE sites.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, Ten SNAP-Ed eligible Early Care and Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition, physical activity, and /or screen environment for participating children, and receive the recognition as a "Growing Healthy Day Care/ECE" site

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide direct nutrition education lessons integrating physical activity programs and classes when appropriate at state preschools, Head Start and home daycare facilities to reach 200 SNAP-Ed eligible preschool aged children in FFY 2017, 250 preschool aged children in FFY 2018, and 300 preschool aged children in FFY 2019. "*Grow It, Try It, Like It*" USDA curriculum is the main instructional materials, with "Color Me Healthy" and "MyPlate" incorporated as supplemental materials. Indirect education will also	x CED x CEI MPR x C&C TTA	CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 Year 2: Q1 x, Q2 x, Q3 x, Q4 Year 3: Q1 x, Q2 x, Q3 x, Q4	Lesson materials, photo, distribution materials, Harvest of the Month newsletter, ATF, Progress Report

	be included at the ECE sites through the incorporation of Harvest of the Month activities including taste testing locally sourced produce, and distribution of nutrition and physical activity resources and materials and parent newsletters. Recruited and trained Champions for Change and Master Gardeners will be invited for the education and training settings.					
2.2	Provide SPARK (Sports, Play and Active Recreation for Kids) curriculum binder and associated minor equipment to SNAP-Ed targeted ECE sites to promote physical activity education at up to 3 ECE sites in FFY 2017, up to 5 ECE sites in FFY 18, and up to 10 ECE sites in FFY 2019. Training and on-going technical supports will be provided to sites receiving this curriculum.	☐ CED ☒ CEI ☐ MPR ☐ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 x, Q2 x, Q3 x, Q4 Year 2 Q1 x, Q2 x, Q3 x, Q4 Year 3 Q1 x, Q2 x, Q3 x, Q4	Lists of sites receiving SPARK, TA Log, Teachers' SPARK activity log
2.3	Inform all engaged ECE sites regarding the availability of playground stencils to promote physical activity, including an orientation to relevant resources. Provide stencil kit and support for interested ECE sites to implement playground stencil projects each year to enhance the physical and built environment around the target ECE sites and neighborhood. [Implement at up to 3 sites in FFY 2017, 5 sites in FFY 2018 and up to 10 sites in FFY 2019.]	☐ CED ☐ CEI ☐ MPR ☐ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	Site contact list, list of interested and painted sites, ATF, Stencil lending application, Photo

2.4	Provide one nutrition education and physical activity training and technical assistance session to teachers/staff at SNAP-Ed targeted ECE sites per program year to share nutrition and physical activity curriculum and resources available for the conduct of SNAP-Ed interventions implemented at the ECE site (including but not limited to "*Grow It, Try It, Like It*", "Color Me Healthy", "MyPlate", Harvest of the Month, etc.). [Trainings provided at up to 3 sites in FFY 2017, 5 sites in FFY 2018 and up to 10 sites in FFY 2019.]	☐ CED ☒ CEI ☐ MPR ☐ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 , Q4 x Year 2 Q1 x, Q2 x, Q3 , Q4 x Year 3 Q1 x, Q2 x, Q3 , Q4 x	Sign-in, training materials, agenda
2.5	Establish and, ongoing through all program years, maintain regular communication and referral system with key ECE partner contacts for organizations and agencies focused on serving and access to preschool age young children and their families, including but not limited to WIC, Coastal Connection (teen parent foster care program), Family Connection, Childcare Council, First 5, Open Door Clinic and health care providers, school and public health programs, etc. Communication between the agencies will be used as a mechanism to distribute information on parent workshops and nutrition classes occurring within the county for the SNAP-Ed population and the distribution of Harvest of the Month newsletters and nutrition and physical activity promotion materials based on current Dietary Guidelines and current Physical Activity Guidelines, as well as to share other resources between agencies and to build the referral system.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	Harvest of the Month newsletters, educational materials, Communication & Distribution List

2.6	Partner and collaborate with community organizations focused on and serving SNAP-Ed eligible preschool age young children and their families by providing nutrition education support to the SNAP-Ed eligible population they serve through Harvest of the Month/Grow It, Try It, Like/SPARK direct education, and indirect support including healthy taste testing and food demonstrations (10-15 per program year) and promotion of Harvest of the Month and MyPlate, including posting of information on bulletin boards at the selected sites (monthly delivery from October to May annually). ECE community partner organizations may include, but not limited to Social Services, Family Connection, Child Care Council, Family Resource Centers, Del Norte County First 5 Wonder Bus, WIC, and Coastal Connection.	X CED x CEI MPR C&C X TTA	x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	Harvest of the Month newsletters, educational materials,
2.7	Convene and establish a Wellness Policy Committee that includes CNAP, community and ECE partners to make an assessment of need and develop an action plan to address identified areas in which changes are needed. Action plans may include the development and/or implementation of voluntary nutrition and physical activity policies and procedures to institute healthy site changes in SNAP-Ed eligible ECE sites. Healthy site changes and policies may include (but are not limited to) standards for all foods and beverage offered on site, opportunities for daily physical activity, limits on screen time and the provision of quality nutrition education.	CED CEI MPR x C&C TTA	x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	Meeting agenda, Sign-in, Wellness policy and list of site changes and sites

	• Year 1: Support, develop and/or implement site wellness policies and procedures at up to three SNAP-Ed qualified ECE sites; • Year 2: Support, develop and/or implement site wellness policies and procedures at up to five SNAP-Ed qualified ECE sites, including making at least one new healthy site change per site; • Year 3: Support, develop and/or implement site wellness policies and procedures successfully at up to ten SNAP-Ed qualified ECE sites, with the sites recognized as "Growing Healthy" ECE sites.					
2.8	Provide "*Grow It, Try It, Like It*" family nutrition/garden classes monthly from October to May per each program year at SNAP-Ed eligible ECE sites receiving SNAP-Ed intervention, integrating physical activity programs and classes when appropriate, to reach 50 parents of preschool aged children in FFY 2017, 80 parents of preschool aged children in FFY 2018, and 100 parents of preschool aged children in FFY 2019. Indirect education will also be included through the incorporation of Harvest of the Month and MyPlate, and distribution of nutrition and physical activity resources, materials and parent newsletters.	x CED X CEI MPR C&C TTA	CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 Year 2 Q1 x, Q2 x, Q3 x, Q4 Year 3 Q1 x, Q2 x, Q3 x, Q4	Educational materials, lesson plan, sign in, data card, photos , ATF, Progress Report
2.9	Provide a four to five week series based nutrition education workshop integrating physical activity to the SNAP-Ed eligible population in targeted ECE settings, focusing and targeting on teen parents and parents with preschool aged children (at least two series per program year).	x CED CEI MPR C&C TTA	CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x	Educational materials, lesson plan, sign in, data card, photos

	Sample topics may include: • Benefits of Fruits and Vegetables • Meal Planning and cooking on a Budget • Rethink Your Drink • Label Reading • Active Play for ages 2-5 • Harvest of the Month				Year 3 Q1: x, Q2: x, Q3: x, Q4: x	
2.10	Support and incentivize the "Growing Healthy Day Care/ECE" sites with promotion and education such as Harvest of the Month promotion and nutrition education and store/farm field trip.	( ) CED ( ) CEI (x) MPR (x) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1: , Q2: , Q3: , Q4: x Year 2 Q1: x, Q2: x, Q3: x, Q4: x Year 3 Q1: x, Q2: x, Q3: x, Q4: x	Photo, Growing Healthy adopted wellness policy

Integrated Work Plan
FFY 2017–2019

El Dorado County

SECTION A: OVERVIEW

1. SNAP-Ed Implementing Agency (counterpart local agency) Names

	California Department of Social Services:
X	University of California: UC CalFresh UCCE: UCCE –Central Sierra
X	California Department of Public Health: CDPH**:** El Dorado County Health and Human Services Agency, Public Health Division
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

El Dorado County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. Jurisdiction Description

El Dorado County, located in east-central California, encompasses 1,805 square miles of rolling hills and mountainous terrain and has approximately 185,441 (Nielsen Claritas, 2016) residents. The County's western boundary contains part of Folsom Lake, and the eastern boundary is also the California-Nevada State line. The County is topographically divided into two zones. The northeast corner of the County is in the Lake Tahoe basin, while the remainder of the County is in the "western slope" the area west of Echo Summit.

There are two municipalities within El Dorado County. The largest city in the County is the City of South Lake Tahoe, with a population estimate of 21,529. The City of Placerville, the County seat, is located 45 miles northeast of Sacramento, the State capital. The City of Placerville has an estimated population of 10,556. The remainder of the County's 146,401 residents lives outside of the two incorporated areas which includes a large portion of El Dorado County's historic Gold Rush region. The area includes about 40 communities along the Highway 50 corridor including the towns of Placerville, El Dorado Hills, Cameron Park Shingle Springs, Camino, Pollock Pines, Kyburz, Strawberry, Myers and the South Lake Tahoe basin.

Agriculture, tourism, and light industry are the area's primary industries. The County is served by Los Rios Community College District–El Dorado Center and Lake Tahoe Community College. The County's location and natural setting provide for outdoor activities including whitewater rafting on the American River and skiing on the eastern border.

El Dorado County is one of 58 counties in California. It has 1,710.8 square miles in land area and a population density of 102.9 per square mile. According to the SNAP-Ed County 2015 Profiles, 9% of the population is below the Federal Poverty Level (FPL). English is the predominant language spoken throughout the county. SNAP-Ed eligible population totals 36,712 with 9,629 of those being under the age of 18 years. The SNAP-Ed eligible demographic (< 185% FPL) is 36,712 or 20.5%. Of those who are SNAP-Ed eligible, 13,261 are CalFresh participants. The SNAP-Ed eligible participants are 67.6% White (non-Hispanic), 25% Hispanic, 2.5% Asian (non-Hispanic), 1.1% American Indian/Alaska Native, 2.8 Multiracial (non-Hispanic) or another race and 1.0% classified as unknown. Children, 0-6 years of age comprise the largest percentage of SNAP-Ed eligible participants at 26%, followed by school age children (23.3%) and adults 18-64 (20%) and Seniors 65 and older (17%).

There are 42 census tracts in El Dorado County with one qualifying tract for SNAP-Ed services based on the SNAP-Ed County 2015 profiles. Of the 42 census tracts in El Dorado County, 2.4%, or one (1) census tract is SNAP-Ed eligible (= < 50% incomes= <185% FPL) based on all races data for 2015. The county has 15 school districts, seven Charter Alternative Programs, six programs that operate under the El Dorado County Office of Education umbrella. Made up from the School Districts are 74 public schools, 29 of which are eligible for SNAP-Ed services. There are 8,408 Students eligible for Free/Reduced Price Meals (FRPM). Of the 74 schools in El Dorado County, 33 or (44%) are SNAP-Ed eligible (>50% FRPM Enrollment, 2012).

The adult overweight or obesity prevalence is 64.5%. 48.8% of children (2-11) ate five or more servings of fruits and vegetables and only 37.6% adults ate fruits and vegetables three or more times yesterday. El Dorado County has an overall food insecurity rate of 13.6% and a child food insecurity rate over 21% for children 0-17 years of age.

El Dorado County also has a low number of recreational facilities per 100,000 residents; however the percentage of children and teens (ages 1-17 years) that have a park or open space within walking distance is higher than the state rate, 35% and 84.7% respectively. Even given this data, El Dorado County would stand to benefit from nutrition education paired with physical activity related interventions, due to its high number of fast-food restaurants and because of lack of access to low-cost and reliable transportation, many of the SNAP-Ed eligible residents do not have access to healthy foods within a .5 mile radius.

4. Community Assessment

According to the recently released annual County Health Rankings 2016, compiled by Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute, El Dorado County ranks ninth among California's 58 counties. In 2015, El Dorado County ranked seventh in their county ranking position. Data indicates health disparities exist between the low-income population and population-at-large, and improvements are needed in several areas, including obesity rates. The assessment data was used to identify intervention strategies and includes the following information on community and environmental settings, demographics, and health. By utilizing these assessment measures, El Dorado County Local implementing Agency partnership (LIA) has identified the populations and areas of the highest need and designed multiple strategies to implement a coordinated set of interventions that address the needs of all SNAP-Ed eligible populations.

Based on new and/or existing data sets, the following are examples of the assessment data used in Federal Fiscal Year 2017-19 (FFY17-19) to complete the Integrated Work Plan (IWP).

- SNAP-Ed County Profiles 2014–2015
- Nielsen Claritas, 2015
- US Census Bureau, 2015
- County Health Rankings & Roadmaps, 2015–2016
- South Lake Tahoe Hunger Study, 2014
- California Health Interview Survey (CHIS) 2013-2015
- El Dorado County Community Health Status Assessment, 2014
- El Dorado County Healthy Stores for a Healthy Community, 2013
- Trust for America's Health and Robert Wood Johnson Foundation, 2014
- First 5 El Dorado Annual Report Compilation, 2014–2015

The SNAP eligible demographics increased from 19.2% to 20.5% in 2015. This might seem like a small difference however, reflects an increase of 2,271 residents. El Dorado County had 13,264 individuals participating in Cal-Fresh in 2015. Food Insecurity security rates remain a concern at 13.6% overall, but the rate is over 21% for children. This has direct bearing on children (under 18 years of age) living in households that experienced food insecurity at some point during the year. Research shows that food-insecure adults face higher risks of chronic disease (such as diabetes and hypertension), as well as depression and poor mental health. Children exposed to food insecurity are of particular concern given the implications scarce food resources pose to a child's health and development. Children who are food insecure are more likely to be hospitalized and may be at higher risk for developing obesity and asthma.

The South Lake Tahoe Hunger Study indicated that 83% of South Lake Tahoe residents surveyed reported a need for more food assistance. It was also found that 23% of the households had no transportation and 12% of the households have medical/health problems that prevent them from getting emergency food and assistance. South Lake Tahoe has remote areas that have limited food pantries available. Residents in those areas must travel, sometimes further than resources allow, to access emergency food.

The 2015 SNAP-Ed County Profile indicates 9% of individuals residing in El Dorado County are living in households with income below the FPL. Research shows that income is a strong predictor of the health of an individual. The lower the income, the less likely a person will have a healthy diet or regular physical activity. This leads to greater chance of chronic diseases such as diabetes, heart disease, obesity and depression.

Additional data reported that 47% El Dorado County children and adolescents aged 3-11 watch television or play video games for three or more hours on the weekends. Children and adolescents are particularly vulnerable to many negative health messages conveyed through television shows and commercials, which influence their perceptions and behaviors

Nearly 49% of children (2-11) ate two or more servings of fruits and vegetables and only 37.6% adults ate fruits and vegetables three or more times per day. Fresh produce availably is limited in many of the outlying areas, and often poor in quality and quite expensive. Although fruit and vegetable consumption is difficult to assess for the SNAP population, it is estimated that only 48% of all children eat 5 or more servings of fruits and vegetables per day. Providing education specific to fruit and vegetable consumption is critical.

Sugar sweetened beverage (SSB) intake is also a concern with 32% of children and teens consuming one or more SSB each day. Although schools have policies related to the sale of SSB during school meals, more work is required to ensure schools have strong School Wellness Policies to address SSB at fundraisers, as well as during before and after-school activities. Working with parents, teachers and administrators will be crucial to develop policies and practices that support increase healthy beverage choices.

El Dorado County Healthy Stores for a Healthy Community (HSHC) data indicated the retail environment is lacking in fresh vegetables, whole wheat bread, corn/wheat tortillas and low-fat/non-fat milk. HSHC also revealed high amounts of tobacco, alcohol, and sugary drink advertisements. More than 83% of stores surveyed had sugary drinks at the check- out and only 42% offered a good quality of fruits and vegetables in low-income areas. Nearly 90% of the stores sold alcohol and over 74% displayed alcohol ads near candy/toys or below three feet. In-store marketing at the three feet and below level influences children's consumption of unhealthy products. Many SNAP-Ed eligible residents have to access the small independent owned stores, which are less likely to have a healthy food environment, but also have unhealthy interior/exterior advertising.

El Dorado County's access to exercise opportunities is 94% compared to the state average of 93%. Adults aged 20 and over reported no leisure-time physical activity at 14% with 64.5% of adults being overweight or obese, with 27.7% obese, compared to California's obesity rate of 24.7%. Only 28.6% of children and teens aged 2-17 are physically active at least one hour per day. While El Dorado offers a wide range of year round outdoor recreation, physical activity levels for adults remains low. Challenges for regular activity include the lack of sidewalks, little to no street lighting, dangerous roads the presence of wildlife.

Lack of transportation in rural areas makes it difficult to access healthy and varied food options within the many communities. Living in rural areas means traveling to a grocery store a minimum of 10 miles away, while non-rural areas may travel less than one mile. Many towns are widely spread apart. Travel for daily living items generally involves significant travel. Winter weather often creates additional travel barriers. Over 7% of low-income families have low access to a grocery store without driving more than 10 miles to a supermarket or large grocery store. People living further away from grocery stores are less likely to access healthy food options on a regular basis and more likely to consume foods that are readily available at convenience and corner stores, as well as fast food outlets. This is a contributing factor; in El Dorado County 57% of adults consume fast food at least one time in the last week.

5. Community Change Goals

Based on new and/or existing data, the implementing LIAs and with the assistance from the members of the County Nutrition Action Plan (CNAP), determined the direction of the community change goals. El Dorado County LIAs will address and support State Goals 1, 2, 3, 4, and 5.

The SNAP-Ed interventions have been aligned with the progression of the IWP from year one, to year two and through year three. The SNAP-Ed LIAs have based their rationale on the Theory of Change: 1) Social Norm Change which will change what the culture says we should do or shouldn't do about reducing unhealthy foods, reducing sugars and sodium; 2) Health Belief Model to promote Individual change through voluntary adoption of policies by SNAP-Ed partners; 3) The Diffusion of Innovations that show that once one program adopts a wellness policy, that others are more likely to make policy adoption. Adopting Wellness policies creates an effective way to exponentially improve the well-being of the community; and leading to 4) Community

Organizing which states that people become engaged and motivated to participate when they perceive a need and feel capable of acting to address the need. People will remain involved when the issues remain relevant, they see a result of their efforts, and are rewarded, even if just intrinsically.

Health problems are taking a terrible toll on communities with limited resources and government must direct resources to communities in greatest need. Reasons for this include that up-to-date evidence related to the nature of chronic diseases is not in the hands of decision makers and strong beliefs persist that chronic diseases afflict only the affluent and the elderly, that they arise solely from freely acquired risks, and that their control is ineffective and too expensive and should wait until infectious diseases are addressed. We believe that it is vital to elevate chronic diseases on the health agenda of key policymakers, providing them with better evidence about risk factors and of the need for health systems change. A more concerted, strategic, and multi-sectoral policy approach, supported by research and data, is essential to help reverse the negative trends in the incidence of chronic disease.

Also, the interventions focus on fostering the skills among schools, retailers, Early Childhood and Education (ECE) programs, publics schools (elementary, middle and high schools), alternative school site settings (such as Charter Schools), WIC, CalFresh offices, employment services, Famers' Markets, emergency food assistance (including food pantries and soup kitchens), elderly service/senior centers, health centers and other community agencies/organizations to engage the SNAP-Ed eligible population to make a change under the assumptions made by the Health Belief Model.

Partnering with other agencies and meeting SNAP-Ed eligible clients in other community site settings increases a supportive warm hand-off and additional resources for the client. An example might include providing a community resource/service brochure to nutrition education class participants may assist them in locating food pantries or employment services.

To address the focus area as a whole, each LIA will work in their area of expertise and divide geographically, not to duplicate our efforts. The Local Health Department (LHD) will sub-contract with the Food Bank of El Dorado County. The sub-contractor's work will be implemented within the emergency food assistance distribution sites which include food pantries and soup kitchens, as well as Farmers' Markets. The sub-contractor's work will not begin until there is the final SIA approval of the IWP and Site List.

Community agencies/organizations will be able to effectively and appropriately offer key messages to the SNAP-Ed eligible population to help them recognize they are susceptible to poor health if they continue unhealthy eating patterns. There are a number of benefits from adopting wellness policies, from the consumers' improved health, to their pride in their healthy eating choices and health outcomes over a lifetime. The policies will reinforce this message. Partners are often an effective voice in an individual's life to cue them to take action. Nutrition and obesity issues have been determined to be areas of focus in El Dorado County.

El Dorado County

Three-Year
Integrated Work Plan
FFY 2017–2019

Long-term community change goals for El Dorado County also include improving the number of residents who are in a healthy weight category and reverse the trend of increasing diabetes rates, improving wellness and quality of life for older adults, and increasing the proportion of residents who experience food security, emotional, and mental well-being throughout their lifespan.

El Dorado County's SNAP-Ed funded LIAs will focus their efforts on the SNAP-Ed eligible portion of the county's population and on SNAP-Ed allowable interventions and activities which align with the United States Department of Agriculture (USDA)-Western Regional Office (WRO) Evaluation Framework. LIAs support long-term community change goals in the county by working with community partners to identify strategic partners and convene community-wide, multi-sector coalitions to improve nutrition and physical activity; create an environment that makes healthy food and beverage options the routine, easy choice; improve availability, accessibility and demand for healthy foods and beverages; ensure opportunities for physical activity and enhance the physical and built environment around the targeted institutions where the SNAP-Ed population can be found; develop and support a sustained, targeted physical activity and nutrition social marketing program (e.g., community-wide campaigns to promote healthy eating and active living) and provide evidence-based education with a focus on behavior changes goals; build capacity and engagement at school sites for comprehensive nutrition and physical programs that help to achieve and further strengthen school wellness policies through nutrition education, increased access to physical activity as well as improvements to the school environments and practices, assist school sites to achieve federal healthy school recognition standards, and educate community/partners about policy/legislative changes that would improve retail environment.

Through coordination and collaboration, we aim to support partners and help low-income residents in El Dorado County create norms and environments in which the healthy choices become the easier and expected choices at home, at work, in school, shopping and in all places where lifestyle decisions happen. The LIAs have contributed to the development of the three-year IWP.

Specifically, El Dorado County SNAP-Ed LIAs will achieve the following three year objectives:

1. By September 30, 2019, LIAs will reach at least 200 adults and at least 100 youth with indirect education on healthy foods and beverages at three SNAP qualifying retail stores and one store will make healthy site changes.
2. By September 30, 2019, LIA activities conducted at Early Childhood and (ECE) sites will reach at least 150 parents of preschool-age children with direct education and at least 600 preschool-age children with indirect education and four ECE sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity.

3. By September 30, 2019, LIA activities will reach at least 600 SNAP-Ed eligible participants with direct education and at least 6,000 SNAP-Ed eligible participants with indirect education; provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in six SNAP-Ed eligible community agency/organization sites to improve nutrition, physical activity, and/or wellness environment for their SNAP-Ed eligible participants; including making at least one healthy site change per site to improve the nutrition and physical activity.
4. By September 30, 2019, 10 low resource schools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

Intervention strategies have been expanded and show progression from year one, to year two and through year three. Continued expansion of our reach and our ability to achieve our goals may be changing as our funding levels may be decreased and/or eliminated such as the case for the County Welfare Department (CWD) in FFY 2018–FFY 2019. The expanded reach written in the IWP may need to be decreased and/or eliminated to reflect the decreased funding levels. Should fund levels remain constant it still may be difficult to expand without increased funding.

These objectives allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus on the following PSE strategies in the following settings:

- Healthy Retail Environment
- Early Childhood and Education settings
- Community settings
- School settings

The Portfolio Settings Learn and Shop provides us with the strategies to support and correspond to the individual level approaches and the ability to layer different types of activities within a single organization to maximize impact. One example is a whole school approach to obesity prevention. The approaches move form one-time events to multiple informational and environmental changes.

This multi-level approach is what El Dorado County as a whole is moving toward a prevention oriented system that addresses the community conditions that shape health. All partners can take key steps to promote community health and engage in population health strategies while delivering high-quality social support services and nutrition education, as well as physical activity environmental supports to individuals. We are exploring current movements in population health; examining the intersections of health equity, social justice, and the social justice determinants of health; understanding ways that population health is financed, assessed, and measured; and learn from place-based initiatives that promote healthy, equitable communities.

El Dorado County

Three-Year
Integrated Work Plan
FFY 2017–2019

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

El Dorado County's CNAP workgroup has been meeting for three years on a quarterly basis to exchange information, track progress and improve local coordination of SNAP-Ed efforts in the county. The group consists primarily of the USDA-Food and Nutrition Services (FNS) funded partners and select non-funded partners. FNS partners include the CWD, UCCE, LHD, AAA, Head Start, Summer Meal and other assistance programs. Non-funded partners include El Dorado County Office of Education, Food Bank of El Dorado County, Dairy Council of California, El Dorado County Employment Services, Healthy Roads for Community Health, Federally Qualified Health Centers (FQHC), El Dorado County Chronic Disease Prevention Coalition, the Tobacco Use Prevention Program, Healthy Stores, Healthy Community (HSHC) partners and other community-based organizations. LIAs will promote SNAP-Ed services and activities with other agencies not only through CNAP, also with but not limited to the County Welfare Departments (such as employment services, CalFresh), the El Dorado County Office of Education programs (such as Head Start, charter/alternative schools), schools and school districts, the Food Bank of El Dorado County, food pantries and soup kitchens, HSHC partners, WIC, Public Health Nursing, retailers, Progress House, Choices for Children, Tahoe Family Resource Center, and Placerville/South Lake Tahoe boys and Girls Club.

The CNAP has three primary goals: 1) Increase participation in all FNS programs, 2) Ensure coordination of education efforts and 3) Work with partners to attract and create an environment conducive to healthy eating and active living. The group jointly created a strategic plan that helps CNAP partners in achieving their goals. The strategic plan was based on the Spectrum of Prevention (Figure 1) developed by Larry Cohen in 1983. The Spectrum was derived from practice and developed to address complex issues with comprehensive solutions. The Spectrum helps the LIAS and community partners to specify the variety of activities necessary for effective campaigns. Also, the Spectrum emphasizes the importance of influencing policy and legislation.

Level of Spectrum	Definition of Level
1. Strengthening Individual Knowledge and Skills	Enhancing an individual's capability of preventing injury or illness
2. Promoting Community Education	Reaching groups of people with information and resources to promote health
3. Educating Providers	Informing providers who will transmit skills and knowledge to others
4. Fostering Coalitions and Networks	Bringing together groups and individuals for broader goals and greater impact
5. Changing Organizational Practices	Adopting regulations and shaping norms to improve health and safety
6. Influencing Policy and Legislation	Developing strategies to change laws and policies to influence outcomes

Figure 1: Spectrum of Prevention

Creating the CNAP Strategic Plan provided members with ways to improve our Collective Impact efforts. Additionally, LIAs and CNAP members are positioned to create sustained community change. These efforts led to the following outcomes: 1) worked with El Dorado County Procurements/Contracts to improve healthy food choices in vending machines. The new Vendor now offers some healthy food choices; 2) partnered with the Tobacco Use Prevention and Alcohol/Drug Programs to provide input to the County Signage Ordinance regarding unhealthy marketing/signs.

Also, the CNAP promotes programs that may need extra assistance to increase participation such as WIC. As evident by the fore-mentioned outcomes, CNAP partnerships have been beneficial to our work.

Nutrition education efforts and materials will be shared to ensure coordinated core messaging and efficient use of available resources. In addition, the CNAP will be working with HSHC to improve the health of El Dorado County residents through changes in retail and food stores with qualifying CalFresh redemption and to educate people on how in-store product marketing influences the consumption of unhealthy products. The CNAP will provide education with community/partners about policy legislation that would make El Dorado County a healthier place and maintain a vibrant retail/business community.

We will rely on our partners to focus on other aspects of our community change goals. Our local partner, the El Dorado County Tobacco Use Prevention Program will focus on municipal and county level policy changes regarding the retail environment through their grant funding.

FFY 2017–2019

8. Educational Materials, Resources and Curriculum

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health–Nutrition Education Obesity Prevention Branch (NEOP) Approved Nutrition Education Materials list.

El Dorado County reviewed the approved integrated curriculum list provided by the state agencies, and reviewed each different piece to determine the best option for the specific target population, as well as the selected SNAP-Ed three-year and annual objectives. Most of the selected curriculum is geared towards early childcare and education, school and community settings, as this reflects the detail provided throughout the narratives summaries and below in the target audience description.

9. Intervention and Evaluation Plan Narrative Summary

The implementing agencies in El Dorado County will conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites, reaching a large portion of the SNAP-Ed eligible population. They will be assisted by the LHD's sub-contractor, the Food Bank of El Dorado County and extenders who will support these efforts. The intervention plan includes activities that provide comprehensive education on proper nutrition and physical activity; approaches, which when used in combination provide high strength intervention strategies, with implementation of nutrition education and physical activity (PA) focused direct delivery, staff training and coordinated implementation strategies for direct care and education providers, food service providers, and other staff that interface with and impact children in the multiple settings. Building upon relationships with elementary schools already existing within the county, LIAs will continue to provide direct nutrition education and to provide physical activity education. LIAs will also train and support teachers as extenders to provide direct education in the classroom and in after school programs. Additionally, nutrition education will be provided to the adult and older adult SNAP-Ed population that connects shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines. Focus will be placed on selecting healthy foods and beverages; increasing the skills for label reading, menu planning and food budgeting; increasing knowledge of MyPlate recommendations and exposure to and acceptance of new healthy foods.

Progressing to the sector level of the SEM, LIAs identified strategic partners and community-wide, multi-sector coalitions which will be convened to improve nutrition and physical activity; conducted a community health needs assessment; and prioritized, selected, and adapt approaches unique to the needs of El Dorado County. Community partners will be educated about policy/legislative changes and Smarter Lunchrooms Movement (SLM) principles that improve the school lunchroom and the retail environment and support efforts in establishing zoning ordinances for type and amount of marketing of less healthy foods and beverages.

The intervention plan progresses to interventions at the environmental level of the Social Ecological Model (SEM) via the inclusion of policy, systems and environmental (PSE) change efforts that include implementing school wellness policies that promote access to healthy foods, beverages and physical activity. Healthy nutrition and physical activity policies and procedures will be implemented in early childhood education settings, afterschool programs (e.g. Boys and Girls Clubs, Foothill Indian Education Center, etc.) and elementary schools, which will include (but are not limited to) standards for all foods and beverage offered on site, opportunities for daily structured physical activity, limits on screen time and the provision of quality nutrition education, youth engagement projects (UCCE–Central Sierra, Year 3) , Walking School Bus/Safe Routes to School programs, garden-based and physical activity education and marketing guidelines for materials posted and shared on site. PSE efforts will also be focused on improving the school lunchroom utilizing the Smarter Lunchrooms Movement (SLM) principles and retail store environments with product placement strategies, Healthy Check-out Lanes, Healthy Grab and Go, smart snacking stations, healthy items in prominent school lunchroom and store locations with the removal of child oriented advertising and less healthy foods and beverages at children's eye level. Additionally, healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries) will be investigated and proposed to support education efforts to improve nutrition and food resource management. Area Agencies will build on established relationships with food banks to secure new food distribution sites to support El Dorado County older adults.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process and outcome evaluation activities using State and locally developed surveys. Past evaluation efforts have been helpful in informing the program and these efforts will continue. A locally developed Report of Activity (RAF) will be used to collect needed supporting documentation and verify SNAP-Ed Activity Tracking Form (ATF) and Reporting Tools Workbook (RTW) entries. Education and Administration Reporting System (EARS) and Semi Annual Activity Report results will be generated from the ATF and quarterly RTW. Separate tracking of direct education taught by LIA staff and site staff trained by LIAs, such as teachers, will continue in an effort to better monitor effectiveness. Impact Outcome Evaluation (IOE) and UC CalFresh approved direct education evaluation tools and SMART objectives, designed to measure change in dietary and physical activity behaviors, food resource management and the factors that influence these behaviors will be completed by the LIAs. Participants will be requested to complete evaluation surveys that addresses, but not limited to, the following indicators from the Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3) and Fruits and Vegetables (LT2), Physical Activity Recommended Labels (LT7) and Entertainment Screen Time (LT8). At the environment level, LIAs will also report as appropriate on the following SNAP-Ed Evaluation Framework priority indicators – Identification of Opportunities (ST4), Partnerships (ST6), Nutrition Supports Adopted (MT4) and Physical Activity Supports Adopted (MT5). An IOE Plan and Report will be submitted annually by LHDs and other LIAs will also collect, report and use evaluation data as well. All LHD PSE projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). Other interested LIAs may also utilize the RE-AIM reporting as appropriate. The locally developed PSE

tracking forms have made it consistently easier to monitor PSE site efforts and complete the RE-AIM Access database. Reports generated from the database will be used to track, inform and improve continued PSE program reports in El Dorado County as well.

Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, LIAs will reach at least 200 adults and at least 100 youth with indirect education on healthy foods and beverages at three SNAP qualifying retail stores and one store will make healthy site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

Healthy retail PSE strategies include:

- Healthy food and beverage policies/stocking standards
- Purchased food/donated food policies
- Healthy in-store marketing and promotions
- Store exterior improvements

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessments will be conducted in the qualifying census tract and Qualifying CalFresh Redemption retail stores to assess the CX3 index of Unhealthy to Healthy Food Sources in Placerville and South Lake Tahoe.

El Dorado County

Three-Year
Integrated Work Plan
FFY 2017–2019

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, SNAP-Ed funded activities will reach at least 100 adults and at least 50 youth with indirect education on healthy foods and beverages; provide healthy food and beverage merchandising materials, and provide twice yearly owner/retail staff education opportunities to at least two qualifying retail stores and conduct one Fruit and Veggie Fest marketing event in at least one qualifying retail location.
3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, SNAP-Ed funded activities will reach at least 100 adults and at least 50 youth indirect education on healthy foods and beverages; provide healthy food and beverage merchandising materials, and provide twice yearly owner/retail staff education opportunities to at least three retail stores and conduct one Fruit and Veggie Fest marketing event in at least two qualifying retail locations.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019, SNAP-Ed funded activities will reach at least 200 adults and at least 100 youth with indirect education on healthy foods and beverages at three SNAP qualifying retail stores and one store will make healthy site changes.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, SNAP-Ed funded partner activities conducted at Early Childhood and Education (ECE) sites will reach at least 150 parents of preschool-age children with direct education and at least 600 preschool-age children indirect education and four ECE sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment and to reduce screen time.
- Implement changes in the preschool environment that support and promote physical activity.
- Increase access to healthy foods, beverages and opportunities for active play.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, SNAP-Ed funded partner activities conducted at ECE sites will reach at least 50 parents of preschool-age children with direct education and at least 200 preschool-age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in one ECE site.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, SNAP Ed funded partner activities conducted at ECE sites will reach at least 50 parents of preschool-age children with direct education and at least 200 preschool-age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in one new ECE site; including making at least one new healthy site change per site to improve the nutrition and physical activity.
3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, SNAP Ed funded partner activities conducted at ECE sites will reach at least 50 parents of preschool-age children with direct education and at least 200 preschool-age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in two new ECE sites; including making at least one new healthy site change per site to improve the nutrition and physical activity.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, SNAP-Ed funded partner activities conducted at Early Childhood and Education (ECE) sites will reach at least 150 parents of preschool-age children with direct education and at least 600 preschool-age children indirect education and four Early Childhood Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, SNAP-Ed funded partner activities will reach at least 600 SNAP-Ed eligible participants with direct education and at least 6,000 SNAP-Ed eligible participants with indirect education; provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in six SNAP-Ed eligible community agency/organization sites to improve nutrition, physical activity, and/or wellness environment for their SNAP-Ed eligible participants; including making at least one healthy site change per site to improve the nutrition and physical activity.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment.
- Implement changes in the community environment that support and promote physical activity.
- Increase access to healthy foods, beverages and opportunities for physical activity.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Three-Year
Integrated Work Plan
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. SNAP-Ed funded partner activities will reach at least 200 SNAP-Ed eligible participants with direct education and at least 2,000 SNAP-Ed eligible participants with indirect education; provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in two SNAP-Ed eligible community agency/organization sites to improve nutrition, physical activity, and/or wellness environment for their SNAP-Ed eligible participants; including making at least one healthy site change per site to improve the nutrition and physical activity.

2. **FFY 2018 (Year 2) Objective(s):**
   a. SNAP-Ed funded partner activities will reach at least 200 SNAP-Ed eligible participants with direct education and at least 2,000 SNAP-Ed eligible participants with indirect education; provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in two SNAP-Ed eligible community agency/organization sites to improve nutrition, physical activity, and/or wellness environment for their SNAP-Ed eligible participants; including making at least one healthy site change per site to improve the nutrition and physical activity.

3. **FFY 2019 (Year 3) Objective(s):**
   a. SNAP-Ed funded partner activities will reach at least 200 SNAP-Ed eligible participants with direct education and at least 2,000 SNAP-Ed eligible participants with indirect education; provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in two SNAP-Ed eligible community agency/organization sites to improve nutrition, physical activity, and/or wellness environment for their SNAP-Ed eligible participants; including making at least one healthy site change per site to improve the nutrition and physical activity.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, 10 SNAP-Ed eligible schools will make changes to school policies, nutrition and physical activity education and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Physical Activity: structured physical activity, murals/stencils, Safe Routes to School/walk to school programs
- Healthy Eating: Smarter Lunchrooms Movement (SLM), edible gardens
- Local Procurement: from farm and school gardens
- Access to Healthy Foods: garden-enhanced nutrition education
- Wellness Policies: district and school site

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at 6 low-resource school sites, UC CalFresh educators and 40 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 1,380 students with direct education and 2,000 parents and family members with indirect education.
    b. By September 30, 2017, UC CalFresh staff will work with PTOs, School Wellness Committees, etc. to improve 6 of the 10 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.

c. By September 30, 2017, a new structured PA program such as CATCH will be implemented by UC CalFresh educators and 15 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 5 low-resource school sites already receiving nutrition education.
d. By September 30, 2017, UC CalFresh staff will work with partners to assess School Wellness Committees and School Wellness Policies at one district and 5 school sites.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at 8 low-resource school sites UC CalFresh educators and 44 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 1,560 students with direct education and 2,000 parents and family members with indirect education.
   b. By September 20, 2018, UC CalFresh staff will work with partners to improve 8 of 10 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
   c. By September 30, 2018, a new structured PA program will be implemented by UC CalFresh educators and 18 trained extenders, such as classroom teachers, afterschool staff, and PE specialists at 8 low-resource school sites already receiving nutrition education.
   d. By September 30, 2018, UC CalFresh staff will work with partners and School Wellness Committees to update School Wellness Policies at 2 district and 8 school sites.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at 10 low-resource school sites UC CalFresh educators and 50 trained extenders (classroom teachers, volunteers, and afterschool staff) will reach 1,800 students with direct education and 2,000 parents and family members with indirect education.
   b. By September 30, 2019, LIA staff will work with partners to improve all 10 of the school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies and school/district level wellness policy language includes SLM.
   c. By September 30, 2019, a new structured PA program such as CATCH will be implemented by UC CalFresh educators and 25 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 10 low-resource school sites already receiving nutrition education.
   d. By September 30, 2019, UC CalFresh staff will work with partners including School Wellness Committees to implement updated wellness policies and facilitate environmental or policy changes at 2 districts and 8 school sites.
   e. By September 30, 2019, UC CalFresh staff and partners will identify one youth group to explore a youth engagement project to improve healthy living and access health food and physical activity opportunities.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

El Dorado County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):
By September 30, 2019, 10 low resource schools will make changes to school policies, nutrition and physical education, and physical environment to support improved nutrition and physical activity behaviors among students, parents, teachers, staff, and administrators.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Provide direct nutrition education using approved curricula, utilizing UCCE staff and extenders at 6-10 SNAP-Ed qualified schools each year. Approved garden-enhanced nutrition education curricula will be utilized at schools with school gardens. Year 1: 6 schools – 1380 students Year 2: 8 schools – 1560 students Year 3: 10 schools – 1800 students	X CED CEI MPR C&C X TTA	CWD LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly Reporting Tools Workbook; copies of evaluations
4.2	Provide training for 40-50 extenders (teachers, parents, volunteers, UC Master Gardeners) on approved curricula. In addition, we will provide ongoing support, supplies and refresher training. • Years 1, 2 & 3-train extenders on learner-centered teaching methods and curriculum fidelity. • Years 1, 2 & 3-review extenders delivery with lesson observation tool and provide feedback. • Analyze program qualitative and quantitative data and plan for changes in training extenders, if necessary. Year 1: 40 trained extenders Year 2: 44 trained extenders Year 3: 50 trained extenders	CED CEI MPR C&C X TTA	CWD LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly Reporting Tools Workbook; copies of evaluations; sign-in sheets; informational fliers

4.3	Provide indirect nutrition education annually at 6-10 qualified schools for 2000 parents, students and family members through newsletters, take-home handouts, cafeteria tasting activities and school events.	☐ CED ☒ CEI ☐ MPR ☐ C&C ☐ TTA	☐ CWD ☐ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly Reporting Tools Workbook; informational fliers; photos
4.4	Establish or reinvigorate school gardens at 6-10 qualified school sites; each school site may begin at a different step, depending on the stage of development of the particular program: Step 1: Assess the interest and capacity for developing and utilizing school gardens for nutrition education. Step 2: Build partnerships and a coordinating committee at the school and assist in establishing a plan for building, maintaining, and promoting the school garden and program. Step 3: Identify the curricula to be utilized in the school garden and classroom in conjunction with UCCE Master Gardeners, garden committee and other partners. Step 4: Train teachers and other extenders; prepare materials for implementation of the program. Step 5: Assist in designing a sustainability plan for the school garden program e.g. funding, utilizing extenders as instructors, ongoing maintenance, etc. Year 1: 6 school sites Year 2: 8 school sites Year 3: 10 school sites	☒ CED ☒ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☐ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Meeting agendas and sign in sheets; meeting notes; Reporting Tools Workbook PSE annual reporting; sustainability plan.

4.5	Assist in adopting Smarter Lunchroom Movement (SLM) strategies in school cafeterias at 6 qualified school sites; each school site may begin at a different step, depending on the progression of the SLM program at each site: Step 1: Assess and identify site interest and capacity to implement the SLM. Step 2: Provide SLM training to food service directors and staff. Step 3: Conduct a SLM scorecard assessment with food service staff. Step 4: Assess the capacity of the school site to establish a student committee to involve students in SLM activities, including artwork, adding signage, creating names for entrees, etc. Step 5: Establish student committees as identified; assist the group to delineate goals and projects. Step 6: Assess if the school cafeteria environment would be improved by adding a mural; if yes, be sure to include students in designing the mural for the cafeteria. Step 7: Provide ongoing technical assistance to identify which 4-6 SLM strategies to employ and assist in implementation. Step 8: Conduct another assessment after 6-8 months to identify changes in scores. Step 9: Adaptive Management – evaluate results and make necessary changes to begin the next implementation cycle.	<table><tr><td></td><td>CED</td></tr><tr><td>X</td><td>CEI</td></tr><tr><td></td><td>MPR</td></tr><tr><td>X</td><td>C&C</td></tr><tr><td>X</td><td>TTA</td></tr></table>	<table><tr><td></td><td>CWD</td></tr><tr><td></td><td>LHD</td></tr><tr><td></td><td>AAA</td></tr><tr><td>X</td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table>	CWD: LHD: AAA: UCCE: CCC: :	Year 1 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 2 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 3 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table>	SLM scorecard assessment; training sign in sheets; Reporting Tools Workbook annual PSE reporting

County Name: Fresno County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
x	University of California: UC CalFresh UCCE: University of California Cooperative Extension of Fresno County (UCCE)
x	California Department of Public Health: CDPH: Fresno County Department of Public Health
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
x	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Fresno County is the sixth largest county in California. One of the fastest growing and most diverse populations in California, the County's population has grown at a rate nearly twice that of California. In 2014, its estimated population was 965,974; with more than half living in a single metropolitan area and the rest of the county's population located within rural cities and in unincorporated areas. According to the SNAP-Ed Fresno County Profile 2015, there are 98 SNAP-Ed eligible census tracts out of a total of 199 in Fresno County. The LHD currently provides services in the 13 following targeted specifics census tracts: Lowell (06019000600), West Fresno (06019000901, 06019000902) Reedley, (06019006604, 06019006603) Parlier (06019008501, 06019008502), Kerman (06019004002, 06019003900, 06019004001) and Sanger (06019006202, 06019006201, 06019006100). University of California Cooperative Extension (UCCE) - UC CalFresh currently provides services primarily in Fresno Unified, Coalinga Huron Unified, Firebaugh Unified, and Central Unified Schools but also provides services to adults throughout Fresno County. Additionally, Catholic Charities Diocese of Fresno (CCC) will deliver SNAP-Ed services at their well utilized social service center within the Lowell census tract, as well as at various qualifying community and faith-based sites in the Fresno and Clovis areas to target low-income and hard-to-reach populations.

The 2015 SNAP-Ed County Profiles indicated that population distribution was 64.4% Hispanic, 17.3% White (non-Hispanic), 9.9% Asian, 6.0% African American, 0.5% American Indian/Alaska Native, and 0.1% Native Hawaiian and other Pacific Islander. The US Census Bureau estimates that in 2014, 44% of the County population speaks a primary language other than English at home. Local Hispanic culture is varied, originating from Mexico and Central and South America. The County is home to the second largest U.S. Hmong population with approximately 32,000 Hmong in residence. Smaller numbers of Cambodians, Vietnamese and Laotians also reside in the County. As a result, LHD has established relationships with Hmong serving agencies in FFY 14 and continues to provide nutrition and physical education services upon requests and continually explores opportunities to develop champions within the six targeted communities. LHD has one Hmong bilingual staff person taking lead on these efforts.

The 2010-2014 median household income was estimated at $45,201 compared to $61,489 statewide. According to the SNAP-Ed Fresno County Profiles 2015 provided by California Department of Public Health, 26.0% of the County's population lives below the poverty line and the food insecurity rate is 16.6% overall and 30.7% for children. Although the County's population living below the poverty line has increased from 2014 (24.8%), the overall and children food insecurity rate has decreased from 2014 (20.8% and 33.7% respectively). This data may suggest that the Fresno County SNAP-Ed local policy systems and environmental (PSE) change efforts to increase access to healthier foods are having a positive impact. Additionally, there were 229,388 CalFresh participants and 142,894 students eligible for Free/Reduced Price Meals, a slight increase from 2014, in Fresno County. Furthermore, 283 schools out of 348 schools in Fresno County are considered SNAP-Ed eligible schools. Lastly, according to the 2014 Fresno Hunger Report, out of the 192,180 households surveyed in the Fresno-Clovis Metropolitan area, approximately 64,000 adults indicated food insecure one or more months out of the year.

Even though Fresno County is referred to as the Bread Basket of the World, a majority of the targeted communities were either at or near United States Department of Agriculture (USDA) designated food deserts, areas where a substantial number of residents has low access to a supermarket or large grocery store. Limited access to grocery stores results in fewer choices to quality food and restricts purchase of fresh fruits and vegetables. While some of the targeted communities lack farmers markets or large grocery stores, there were no shortages of fast food outlets. According to the SNAP-Ed Fresno County Profiles 2014, 68.8% of SNAP-Ed adults and 82.9% of SNAP Children/Teens, ages 2 -7 years of age, consumed fast food 1 or more times in the last week. Furthermore, the SNAP-Ed Fresno County Profile 2015 indicates that 69.4% of SNAP-Ed adults consumed fast food 1 or more times in the last week. With few healthy food options, families often depend on fast foods or corner stores to feed their children, a diet that is rich in calories but results in little nutritional benefit. Consequently, obesity rates and chronic diseases are often higher in areas with high poverty and low access to quality food.

4. **Community Assessment**

Information used for developing this Work Plan comes in part from the SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3), Vital Records Business Intelligence System , and USDA's Food Security website.

Initially, selection of the six low income communities targeted for services by LHD in Fresno County was aided by Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessments conducted in 2012, data on Years of Potential Life Loss (YPLL), USDA designated food desert data, and leading causes of death. In 2009, the Fresno County Department of Public Health developed an analysis of YPLL by community clusters. The data collected by zip codes on Years of Potential Life Lost per 1000 people under the age of 65. The YPLL data is used because it measures how young people die, and it allows the LHD to compare across communities, i.e. zip code clusters. Eight zip code clusters were identified based upon population aggregates of 10,000 or more and death counts of at least 100 were used for the years 1997-2005. Initial findings revealed: 1) county YPLL compared to the state is 28.7 years and 23.1 years respectively; and 2) five clusters 93728, 93706 (West Fresno), 93701 (Lowell), 93721, 93640 (Firebaugh/Mendota), representing four urban and one rural area had a YPLL that was one standard deviation higher than the county overall. Additionally, in Fresno County, twelve food deserts have been identified by the USDA Economic Research Service. Food desert designations are defined as urban neighborhoods and rural towns without ready access to fresh, healthy, and affordable food. Fresno County food deserts have been identified by census tracts with eight of the twelve deserts located in urban areas. The West Fresno area has the highest percentage of low-income people with low-access at 52.7%, accounting for about 1,973 people.

The 2012 CX3 was conducted in the six targeted low income communities. LHD staff conducted focus groups and shared the findings with area residents and community partners. Ideas for future actions were promoted to the residents and shared with community partners. Area residents and community partners showed interest in working with LHD to implement favorable Policy, Systems and Environment (PSE) changes, including working with local retailers to improve their food store quality scores, especially those located near public schools.

In 2013, as LHD and UC CalFresh began working on coordination of locations and activities, it was determined that there was overlap and challenges in the LHD targeted communities of Firebaugh and Hamilton because of UC CalFresh established locations. LHD and UC CalFresh held a meeting to strategize and come to an agreement about the two communities. UC CalFresh was providing direct nutrition education for a five-year study in Firebaugh as part of a large community obesity prevention project. As to not skew the research results, LHD was asked to not provide nutrition education in the community as well. To avoid duplication of service and skewing results, LHD activities was redirected from Firebaugh to Kerman, (06019004002, 06019003900) which also meets criteria. Hamilton was also dropped in favor of Sanger (06019006202, 06019006201) since the main access point in the small Hamilton community is the elementary school and UC CalFresh has an established relationship at the approved school location. Besides meeting criteria, Sanger is bigger, has more access points and proved ready for involvement in interventions. These communities were also identified based the same resources mentioned above. To establish a baseline, LHD Evaluator, Sarah Samuels Center for Public Health Research and Evaluation (Samuels Center) conducted CX3 in Kerman and Sanger in FFY 14 The data has informed programming and support community wide CNAP efforts of all partners. Most recently, Catholic Charities Diocese of Fresno integrated into the work plan to begin delivering additional SNAP-Ed services in Fresno County in Federal Fiscal Year 2018. CCC will work with county partners to avoid duplication of services and will work toward collaborative programming to greater the impact of SNAP-Ed in the region.

According to the results of the 2012 LHD Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3), a majority of the targeted communities have no fruits and vegetable markets. In Lowell neighborhood, just north of downtown Fresno and proposed project site location, only 14% of the local stores met the standard for having safe and easy access and 72% of the food sources in Lowell only had food that were high in fat and sugar. The ratio of unhealthy food sources in Parlier was 91%, with 0% of the local stores meeting standards for safe and easy access. Results in other neighborhoods were equally striking: in Reedley – 63% unhealthy food sources and 0% meeting standards; in West Fresno – 73% unhealthy food sources and 0% meeting standards; in Hamilton – 75% unhealthy food sources and only 17% meeting standards; and in Firebaugh – 100% unhealthy food sources and 0% meeting standards.

In 2014, two additional neighborhoods were surveyed using the CX3 tools and analyses: Kerman (06019004001) and Sanger (06019006100), two towns outside of the city of Fresno, to slightly increase the LHD geographic focus. In Kerman, 95% of food sources were identified as high fat/sugar, or unhealthy sources, but 32% of all stores met standards for healthy options offered and accessibility. In Sanger, 90% of food sources fell in the same unhealthy category, and 19% of stores met food quality standards.

The Fresno County LHD model of focused intervention in census tract-defined communities has demonstrated early successes. LHD would like to add the following census tracts adjacent to current target census tracts, expanding the target area: West Fresno (06019001000) and Reedley (06019006602). In addition to meeting the minimum SNAP-Ed requirements as an eligible census tract, additional research demonstrates high need for SNAP-Ed intervention in these additional census tracts.

Census tract 10 (06019001000) in West Fresno is defined as severely economically disadvantaged, according to the California Department of Public Health, due to their median household income falling between $0 - $39,000, as reported by the American Community Survey 2009 – 2014. When evaluating deaths associated with preventable causes such as diabetes, heart disease, and chronic lung disease, Census tract 10 was ranked 84% (100% being the most ill) compared to the remainder of the Fresno County, according to Vital Records Business Intelligence System (VRBIS). Census tract 10 ranked in the 94% (100% being the most years lost) for years of potential life lost (set at age 75) compared to the rest of the Fresno County. Census tract 10 was ranked in the 77% (100% being the most pre-term births).

Census tract 66.02 (06019006602) in Fresno County is defined as severely economically disadvantaged, according to the California Department of Public Health, due to their median household income falling between $0 - $39,000, as reported by the American Community Survey 2009 – 2014.

With the additional census tracts, LHD will be able to extend current wrap-around education, capacity-building, and PSE efforts to reduce obesity among the SNAP-Ed eligible population in Fresno County. To establish a baseline, LHD will work with the LHD Evaluator to conduct CX3 in the additional census tracts in FFY 2016 and in Year 1 (West Fresno, and Reedley) and Year 3 (Sanger) of the FFY 17-19 Integrated Work Plan.

According to the SNAP-Ed County Profile 2015, Fresno County's percentages of SNAP-Ed overweight and obese adults were 26.1% and 59.4% respectively. This demonstrates a decrease in overweight and an increase in obesity from SNAP-Ed County Profile 2014 (38.8% and 35.1% respectively). The obesity target is still significantly above the Healthy People 2020 target of 30.6%. Additionally, 46.7% of adults consumed 1 or more sugar-sweetened beverages per week and 18% of adults aged 20 and over reporting no leisure-time physical activity. Also, children age 12-17 years of age had rates of overweight and obesity at 14.4% and 13.7% respectively. Only 17.1% children and teens (2-17) were physically active at least 1 hour every day and 37.9% of children 2-11 were physically active at least 1 hour every day. According to the SNAP-Ed County Profile 2014, 58.1% SNAP-Ed children consumed 5 or more servings of fruits and vegetables daily where as 23.2% of teens, ages 12-17, consumed 5 or more servings daily. The UCLA Center for Health Policy Resource 2012-2013 Fresno County Health Profiles for Adults indicated that adults engaged in regular walking "in the past week" was 27.6% and 18.5% of adults consume one or more sodas per day. As reported in the Fresno County Community Health Needs Assessment (2012-2013), physical activity for adults and youth is a concern in Fresno County, and rates of physical activity vary by socioeconomic status. In one lower income school district, 9.6% of 5th graders passed the California assessment for physical fitness, compared to 55% of 5th grader in a higher income school district. The percentage of adults who report engaging in physical activity increases with income bracket (from 35.2% living below FPL to 51% living above 300% FPL). Therefore, it is important to address barriers to participating in physical activity for SNAP-Ed eligible residents of Fresno County.

The 2015 California County Health Status Profiles indicated that Fresno County out-ranked California in most death and disease categories. Fresno County's 2011-2013 age-adjusted death rate from coronary heart disease was 112.9 compared to HP 2020's target at 103.4 per 100,000 population and California's rate of 103.8. Fresno County ranked 44 out of 58 California counties for deaths attributed to heart disease. The 2011-2013 age-adjusted death rate due to

stroke was 45.7, higher than the HP2020 target of 34.8 per 100,000 population. In March 2016, the California Center for Public Health Advocacy stated that 49% of adults in Fresno County are estimated to have prediabetes or undiagnosed diabetes and 8% of adults have been diagnosed with diabetes.

Fresno County is designated as a Health Professional Shortage Area in primary care. The CHIS 2012-2013 Health Profile indicated that 24.9% of people had no usual source of care compared to 16.6% of people within California. Fresno County's rate of uninsured was 35.0% compared with California's 26.1%. An estimated 21.7% of residents receive Medi-Cal and other public benefits. Among the many health-related issues the Department addresses across its county jurisdiction, the disproportionate rate of chronic disease among low-income residents is a primary focus area.

In addition to the sources of information indicated above to develop the current FFY 16 Work Plan and proposed FFY 17-19 Work Plan, LHD also utilized results from the 2013 Healthy Stores for a Healthy Community Observation (HSHC) Survey conducted in the summer of 2013. During FFY13, LHD NEOP staff assisted the LHD's Tobacco Prevention Program complete 408 observation surveys at a random sampling of retail sites throughout Fresno County to assess 1) types of tobacco and alcohol products sold; 2) advertising and placement of these products in stores; and 3) availability and promotion of unhealthy and healthy food options including low-or non-fat milk, fresh fruits and vegetables in retail stores that sell tobacco. LHD staff and volunteers were trained using Healthy Stores for a Healthy Community 2013 Surveillance Survey developed by the California Tobacco Control Program and Stanford Prevention Research Center. Surveys were conducted in unincorporated areas and in the communities of Clovis, Coalinga, Firebaugh Fresno, Huron, Kingsburg, Parlier, Reedley, and Selma. Only 115 (28.2%) of the 408 stores surveyed in Fresno County sell fresh vegetables. Additionally, 228 of the stores surveyed did not sell fresh fruit. Furthermore, only 113 (27.7%) of the 408 stores surveyed sold non-fat or low-fat (1%) milk. Similarly, 111 (27.2%) of the stores sold whole-wheat bread and 167 (40.9%) sold tortillas (soft corn or whole wheat). As a result of this survey and the CX3 results, local retail intervention PSE strategies were included in the Work Plan to focus on increasing access to and the consumption of fruits and vegetables. It should be noted that in the Spring/Summer of FFY 16, LHD NEOP staff will assist the LHD's Tobacco Prevention Program to reassess the stores from 2013 and conduct the 2016 Healthy Stores for a Healthy Community Observation Survey. LHD NEOP will utilize the results from both CX3 and HSHC surveys and re-evaluate and modify the healthy retail intervention work as appropriate.

Furthermore, LHD staff conducted a Key Informant Interview with Community Partners within each of the six targeted communities during the month of February 2016. The purpose of the survey was to assess current Champions for Change focused interventions, identify needed Champions for Change intervention work to best impact the community and determine if there were any priorities missing from the local priorities identified during the local community forums in FFY 14 and FFY 15. LHD staff conducted 41 key informant surveys with both established as well as new community partners. Overall, the responses demonstrated that our intervention work is on target. Community safety continues to be a community concern. LHD has connected residents with resources for technical assistance, however, resources are limited and residents are lacking tools to solve this significant barrier to physical activity. Also, partners believe there would be a benefit to hosting community forums every third year for Champions for Change to adapt and address the emerging and changing needs of the communities. A few new priorities were identified in the interviews. For example, West Fresno community partners mentioned

public transportation challenges and Parlier community partners mentioned prediabetes. These challenges are addressed through the proposed PSE interventions and activities in the work plan.

5. **Community Change Goals**

Based on community assessment described above, current SNAP-Ed work plan activities, and current participation in Fresno Community Health Improvement Partnership (FCHIP), the following community change goals were identified: increasing access to and consumption of fresh fruits and vegetables; increasing access to and consumption of healthy beverages; increasing physical activity rates for all residents; and increasing school-based wellness strategies and environmental changes within schools.

Increase access to and consumption of fresh fruits and vegetables

- Increased Healthy Retail Options – including healthy corner store options and worksite wellness options
- Improved food resource management strategies and increased food security so SNAP-Ed participants' funds' are available to purchase fruits and vegetables
- More community and school gardens
- Farm To Table such as Community Supported Agriculture (CSA) programs and increasing captured food and donation mechanisms
- Increased transit opportunities in high-need communities

Increase access to and consumption of healthy beverages

- Increased Healthy Retail Options – including healthy corner store options and worksite wellness options
- Increased access to free potable water in schools, worksites and community venues
- Rethink Your Drink education

Increase physical activity rates for all residents

- Increased joint use opportunities in high-need communities
- Increased safe-routes to school, work, parks and community venues to include infrastructure, lighting, traffic calming measures
- Completed sidewalk networks
- Increased signage and pedestrian amenities around schools, senior centers, parks and community centers
- Increased access to free to low-cost physical activity opportunities for all residents
- Improved park amenities such as walking trails, basketball courts with hoops, safe play structures for small children

Increase school-based wellness strategies and environmental changes within schools

- Implementation of School Wellness Policies
- Administrator, teacher, parent and student education
- Joint-use agreements with local community organizations
- Farm To Table opportunities such as school gardens, schools as delivery sites for CSAs
- Smarter Lunchrooms Movement activities relating to school environmental changes
- Increasing access to healthy foods in schools
- Increased access to free potable water throughout the day

Fresno County SNAP-Ed partners recognize that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. Many of our current CNAP non-SNAP-Ed partners have also taken on these larger goals as well and are committed to aligning and collaboration in order to meet these larger community goals; based on agency expertise and SNAP-Ed allowability.

The Fresno County SNAP-Ed partners have identified based on the larger community change goals, the following policy, systems and environmental (PSE) change SMART three-year local objectives for the FFY 17-19 Three-Year SNAP-Ed Integrated Work Plan:

1. By September 30, 2019, recruit, identify and engage at least 160 (70 existing + additional 30 annually) adult and 255 (105 existing +50 annually) youth Champions, through direct and indirect nutrition and physical activity education, and 18 (6 x 3 years) agency champions through collaboration, who will participate and/or lead at least 8 community-driven and built environment PSE strategies in the six LHD targeted communities, and in CCC targeted sites, to increase access to healthy foods and physical activity opportunities.
2. By September 30, 2019, increase access to healthy foods of SNAP-Ed qualifying adults and/or children by making at least 7 food access sustainable environmental changes in LHD six targeted communities and CCC targeted sites.
3. By September 30, 2019, qualify and continue to partner with a total of 15 worksites (12 qualifying worksites and at least 3 qualifying school district worksites) to implement worksite wellness activities utilizing the Get Fit Business Kit and to create at least 2 policy, systems and environmental changes to support the healthy behavior changes of their employees, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support in the six targeted communities in Fresno County.
4. By September 30, 2019, at least 61 participating schools, will report successful implementation (put into practice) at least 1 policy system and environmental change that will support nutrition and physical activity education and opportunities to increase knowledge, skills, self-efficacy, and positive attitudes that promote healthy eating and physical activity, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population.

SNAP-Ed partners will work to support local identified SNAP-Ed eligible neighborhoods and schools. The three SNAP-Ed partners will work together on the 4 three-year local objectives listed above; each working with their population reach and area of expertise. The Fresno County SNAP-Ed partners are uniquely positioned to support these larger community change goals with work in nutrition and physical activity education, media and public relations, local champion building, and technical assistance and training support. Much of the larger community change work has required linking and aligning with other non-SNAP-Ed partners and additional funding sources to support capital improvements and policy advocacy. The SNAP-Ed contribution will remain exclusive to SNAP-Ed eligible populations and allowable activities. Direct education is the foundation of SNAP-Ed and the local SNAP-Ed partners will provide nutrition and physical activity education. To the extent possible, nutrition education will be paired with approved curricula designed to build the capacity of local agencies and champions to identify, participate in and lead obesity prevention policy, systems and environmental changes.

The Fresno County SNAP-Ed partners will work together to achieve **Local Three-Year Objective 1,** which will focus on building adult and youth champions, SNAP-Ed eligible residents, who will identify and achieve community-driven PSE strategies; direct and indirect nutrition and physical activity education; and will focus on implementation of the required Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) neighborhood reassessments by the LHD with support from adult and youth champions in years 1 and 3. This supports the following State Level Goals: **1** – Increase Consumption and Access to Healthy Foods and Decrease Consumption of Unhealthy Foods and Beverages; **2** – Increase Physical Activity; **3** – Improve Food Resource Management. **4** – Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices; and **5** – Increase access to and/or appeal of physical activity opportunities. This objective is focused on working to build adult and youth champions that will create synergy to promote and create behavioral and environmental changes in their home, school, work, retail and neighborhoods, including faith-based settings. Community-driven changes lead to sustainable changes. To support this objective, SNAP-Ed partners will provide community direct and indirect nutrition education, training and support, adult and youth champion support, media, public relations and social media will be utilized, and referral and resource opportunities through Fresno Community Health Improvement Partnership (FCHIP), Land Use and Planning Workgroup and Diabetes Collaborative convenings, as well as other collaborations. Additionally, LHD subcontractors and champion volunteers will receive technical assistance and training support in years 1 and 3 to conduct CX3 reassessments and work in coordination and collaboration with California Department of Public Health NEOPB to conduct and analyze the data collected.

Local Three-Year Objective 2 will focus on increasing sustainable food access and promotion in retail and community settings to increase the consumption of fresh, locally-sourced produce as well as other healthy items. This objective supports the following State Level Goals: **1** – Increase Consumption and Access to Healthy Foods and Decrease Consumption of Unhealthy Foods and Beverages; and **3** – Improve Food Resource Management. **4** – Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices. To support this objective, community indirect nutrition education, technical assistance and support will be provided along with media and public relations and adult and youth champion support.

In collaboration with the Fresno Food Security Network and Healthy Retail Committee, this objective will be supported by the NEOPB Retail Program, indirect nutrition education, best practice models to expand access to fruits and vegetables, PSE efforts supported and lead by adult and youth champions such community gardens, public relations including media and social media, and training and technical support. CCC will also work to increase access to fruits and beverages through work with local food distribution centers.

Local Three-Year Objective 3 will focus on increasing the number of worksite wellness (school and general) policy, system and environmental changes that support employee healthy behavior changes such as increased healthy eating, increased physical activity opportunities, increased consumption of healthy beverages and decreased consumption of unhealthy beverages. This supports the following State Level Goals: **1** – Increase Consumption and Access to Healthy Foods and Decrease Consumption of Unhealthy Foods and Beverages; **2** – Increase Physical Activity; **4** – Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices; and **5** – Increase access to and/or appeal of physical activity opportunities. Utilizing the California Fit Business Kit, this objective will be supported by community indirect nutrition education, adult champion support, providing linkages to resources and technical assistance for PSE efforts, and training and technical support.

Local Three-Year Objective 4 will focus on reviewing school wellness policies, making school environment changes to support healthy eating and increased physical activity, and implementation of Smarter Lunchroom Movement with at least 61 participating schools throughout Fresno County. This supports the following State Level Objectives: **1** – Increase Consumption and Access to Healthy Foods and Decrease Consumption of Unhealthy Foods and Beverages; **2** – Increase Physical Activity; **4** – Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices; and **5** – Increase access to and/or appeal of physical activity opportunities. To support this objective, direct and indirect nutrition education will be provided in the classroom, afterschool and with parents, PSE efforts supported and lead by adult and youth champions, public relations including media and social media, and training and technical support.

All 4 Local three-year Objectives support at least one or more of the 5 State Objectives as well as the identified community change goals listed above.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

As discussed in the FFY 15 Integrated Work Plan, the Fresno Community Health Improvement Partnership (FCHIP) that serves as the Fresno County CNAP. In 2015, SNAP-Ed agencies (LHD and UC CalFresh, and CCC) and non-SNAP-Ed agency partners joined the FCHIP which allows us to also be a part of a larger collective effort (over 275 partners) to address the lack of healthy eating and physical activity opportunities in our targeted communities and the County in general. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc. The purpose of the FCHIP is to build on the existing good work in Fresno County communities and coalesce these efforts into one cohesive Fresno County Community Health Improvement Plan with focus and alignment. SNAP-Ed eligible populations are a target of FCHIP as reflected in the FCHIP mission of working toward a healthy

community: "Free of disparities and offers fair opportunities for everyone to realize their full potential." In 2015, FCHIP created a learning environment for the multi-sector partnership to develop necessary skills for alignment of organizations and community members around shared goals and objectives. Additionally, FCHIP initiated a collective impact approach by identifying how each organization and individual is best positioned to address barriers to better health.

SNAP-Ed agencies attend all quarterly FCHIP convenings with all other partners to network, receive workgroup, community health improvement plan development and partner updates. FCHIP currently has seven active workgroups that meet regularly. SNAP-Ed agencies are involved in following FCHIP workgroups: Land Use and Planning – a workgroup that is working to develop a data map system that highlights selected health indicators for poorly performing census tracts and developing recommendations for improving conditions in the census tracts; and 2) Diabetes Collaborative – a workgroup looking into the awareness of prediabetes, diabetes and how to align with current obesity prevention efforts. Recently, the collaborative added three subgroups, the Diabetes Prevention Program (DPP), Communications, and Education. The number of workgroup meetings is stipulated in the work plan activities. The FCHIP, administered by LHD along with a leadership team of community partners, includes participants from community based organizations, health plans, hospitals, media, federally qualified health care clinics, schools, universities, faith-based organizations, city and county planning, adult and youth serving organizations, as well as SNAP-Ed funded agencies.

As SNAP-Ed funding continues to decrease, FCHIP allows us to also be a part of a larger collective effort and aligns efforts to address the lack of healthy eating and physical activity opportunities in our targeted communities and the County in general. SNAP-Ed agencies will utilize FCHIP resources and expertise to achieve our SNAP-Ed Integrated Work Plan and specifically PSE efforts in Local Objectives 1, 2, and 4.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

X	Fats and Oils	X	Food Shopping/ Preparation		
X	Lean Meat & Beans				
	Sodium & Potassium				
	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**
   All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2016** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

During FFY 17-19, the local implementing agencies (LIAs) in Fresno County, UC CalFresh, Fresno County Department of Public Health (LHD), and Catholic Charities Diocese of Fresno (CCC), will collaborate and coordinate to provide direct and indirect nutrition and physical activity education and PSE support to a total of 374,421 estimated SNAP-Ed Fresno County participants (year one=95,702, year two=127,050, and year three= 151,669) and those eligible up to 185 percent Federal Poverty Level (FPL) to consume healthy foods and beverages, reduce consumption of less healthy foods and beverages and to increase physical activity. Measurable impact in target communities will continue to be accomplished through strategic and coordinated action by all implementing partners to provide integrated, layered, and community-driven interventions that aim to increase nutrition and physical activity knowledge and self-efficacy, but also environmental opportunities required for behavior change. Through consistent messaging, agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change.

The LHD, UC CalFresh, and CCC will conduct activities at all levels of the Social Ecological Model, including individual, interpersonal, organizational, and community levels. All LIAs will collaborate to reach all levels through the following types of activities: 1) Training and technical assistance: The LHD,UC CalFresh, and CCC will address training and technical assistance of their personnel or the community and will share training opportunities across agencies when possible; 2) Community/Nutrition education: Both direct and indirect nutrition and physical education is provided by all LIAs; 3) Media, social media, public relations and messaging: These community-wide activities are addressed by all LIAs; 4) Coordination and collaboration: This is specifically addressed by the LIAs collaboratively and with their individual service populations.

As defined in the SNAP-Ed Interventions: A Toolkit for States, all agencies will employ evidence-and practice-based obesity prevention programs and PSE strategies and interventions. The three-year and annual objectives and activities for the integrated work plan were derived from results obtained via each agency's experience, community assessments, in addition to the data used in FFY16. The LIAs, through weekly meetings, collaborated and coordinated to create the Work Plan so that three-year and annual objectives and activities will be done by the agency with the most content expertise to successfully complete each Work Plan Objective.

The LIAs use data-driven methods to choose communities for targeted interventions. Generally, LHD chose six communities (West Fresno, Parlier, Sanger, Reedley, Lowell, and Kerman) and their respective census tracts to work with based on income, CX3 assessments, data on Years of Potential Life Lost, USDA

designated food desert data, and leading causes of death. To prevent overlap and coordinate maximize impact, LIAs have developed a communication process in which the LIAs contact each other via phone or e-mail and confirm and share information about a potential community partner or education/event opportunity. In communities where more than one LIA is doing work, the LHD will primarily provide environment support activities and UC CalFresh will primarily provide direct/indirect nutrition education, while CCC will focus on targeted faith-based and social service settings where strong partnerships have been established. The exceptional collaborative relationship between LIAs has maximized SNAP-Ed funding in Fresno County to impact the SNAP-Ed eligible population. Regular communication and participation in FCHIP Quarterly Convenings and the FCHIP Healthy Stores for a Healthy Community, Farm to Table, Land Use and Planning, and Diabetes Collaborative Workgroups also provides insight into current and future nutrition and physical activity-related activities in the County and opportunities for collaboration and coordination.

Throughout FFY 17-19 Work Plan, media, social media and public relations activities are incorporated in the Local Objectives. LHD will coordinate their local media and public relation efforts of Work Plan activities, anticipated and unanticipated, in partnership with the LHD Public Health Communication (PHC). PHC coordinates the media for the LHD and has the capacity to disseminate news releases to 111 media outlets and conduct follow up with media regarding LHD SNAP-Ed sponsored events. UC CalFresh will also coordinate their local media and public relation efforts of Work Plan activities; anticipated and unanticipated. This includes monthly newsletters to parents about food tastings, a Facebook account, a Twitter account, and a blog where people can find success stories and learn about incorporating nutrition and physical activities in their daily lives. CCC will incorporate SNAP-Ed messaging and promotion into existing agency social media and messaging platforms, as well as through appropriate opportunities within the faith community. LIAs and their subcontractors will continue to maintain agency web pages and social media as appropriate. The web pages and social media will promote SNAP-Ed programs; USDA approved messages, and provide links to USDA approved resources targeting local SNAP-Ed targeted audience. To the extent possible, LIAs will coordinate public relations and media to maximize resources and impact.

As described in Community Change Goals section, all proposed interventions support the following State's behavioral outcomes: 1) Increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages; 2) Increase physical activity; 3) Improve food resource management; 4)Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live learn, work, play, or shop; and 5) Increase access to and/or appeal of physical activity opportunities for SNAP-Ed populations.

<u>Healthy Communities (State Level Objectives 1, 2, 3, 4, and 5)</u>

Given the size of our County, the diverse population, and the concentrated poverty and chronic disease rates as described in the Jurisdiction and Community Assessment sections above, success requires that LIAs engage the community in the process of identifying intervention strategies through two community forums held annually. The LHD has aligned their community-driven focus with the State's Champions for Change initiative by locally rebranding the program as Fresno County Champions for Change (C4C) Program. Utilizing the Social Ecological Model, a large focus of the local C4C Program is to identify, recruit, and train individual and agency Champions. LHD will take lead on recruitment, training and building adult and youth champions. LHD subcontractors will support LHD with

recruitment and providing hands on nutrition and physical activity education and PSE experiences. Champion adults and youth will be encouraged to participate and/or lead in community-driven PSEs. LHD will continue the implementation process for a Champion Engagement System (Champ System), a referral system, for SNAP-Ed agencies to track community and agency champions' work. Besides the basic information of Champion Name, community, address and phone number, NEOP is tracking the Champions' best available day and time, what work/interventions they are passionate about, and skills and interest. Furthermore, the Champ System will help the NEOP Program Team fully utilize, link and refer the Champions in the NEOP communities and assist with NEOP program classes, activities, events, and PSE interventions. Lastly, LHD will work with Sarah Samuels Center (SSC) to continually identify and connect with best practice models for resident engagement that align with Fresno County NEOP goals to keep the program innovative and relevant.

In addition to recruiting agency champions, LHD, in collaboration with CCC will focus on recruitment and engagement of churches to begin efforts in identifying organizational and systems changes in the church community. Furthermore, in collaboration with other Central Valley NEOP Project Directors, UC CalFresh and Central Valley Health and Nutrition Collaborative (CVHNC) Built Environment Workgroup will meet at least three times a year to build capacity for development and implementation of future land use and planning PSE efforts. During the last meeting of the Central Valley Training Resource Center, it was determined that Central Valley NEOP programs wanted to work on land use and planning to achieve PSE but many of us didn't know how to go about doing it. Fresno County LHD informed the CVHNC of the land use and planning PSE effort and asked if the CVHNC would like to form a Built Environment Workgroup and collectively work on building capacity on land use and planning and its impact on access to healthy foods and physical activity. CVHNC agreed and over the next three years, collectively, the Built Environment Workgroup will build capacity, identify land use and planning opportunities, and support the community-driven PSE efforts within our respective county as appropriate.

UC CalFresh adult and senior education series and workshops are held year-round utilizing research-based curriculum for adults and seniors. Some common sites include: housing authority sites, adult training and technical assistance sites, churches, senior centers and community centers. Adult mini workshops utilized to introduce the program and recruit participants for class series are held at The Adult Transition program, Parks, After School, Recreation and Community Services (PARCS) sponsored events, Bringing Broken Neighborhoods Back to Life block parties and food bank distribution sites. Family-centered approaches are utilized as well. UC CalFresh conducts "family nights" as appropriate with groups where a nutrition lesson and food demonstration is done with parents and their kids together. Also, parent groups at school sites participating in the youth program are exposed to mini-lessons during coffee hours and other parent events at school sites. Lastly, UC CalFresh trains Extenders, adult community members, to assist and lead single session workshops, series-based classes and other community events. This allows for greater reach of the UC CalFresh program and greater buy-in from the community through these volunteer efforts. Moreover, this program serves the community as a professional development program for adults that are interested in training in the public health field. Lastly, UC CalFresh will continue to lead and maintain the online Nutrition and Physical Activity Resources website for SNAP-Ed eligible population. This is an online resource directory to help SNAP-Ed eligible population find links to organizations that can assist with locating free or low-cost nutrition and physical activity resources in their community.

CCC will provide Direct and Indirect education to adults and older adults within faith-based and community settings. These educational activities will support wellness policy work including healthy food and beverages standards and increased access to opportunities for physical activity.

LHD subcontractor A will also provide adult and youth single session education nutrition and physical activity presentations, 15 minutes or more, within the six targeted communities at qualified community centers, schools, churches, worksites, public housing locations, retail locations and others as appropriate. Subcontractor A leads the nutrition and physical activity education component with a larger portion of reach direct and indirect education numbers. Based on the local obesity and prediabetes information provided in the Community Assessment section, the Rethink Your Drink single session lesson continues to be a priority for LHD but will also provide a variety of USDA evidence based lessons regarding nutrition and physical activity. Additionally, subcontractor A will provide direct and indirect nutrition education and food tastings at food distribution locations and at other qualified community based organizations utilizing a mobile kitchen vehicle. Food tastings will incorporate foods that are being disseminated to show participants how to cook the food they are receiving.

LHD, in partnership with SSC, will implement the required Communities of Excellence in Nutrition Physical Activity and Obesity Prevention (CX3) neighborhood reassessments with support from adult and youth champions. The CX3 tools will be used to bring in youth, adults, and corner store owners to assess their retail and neighborhood environments in two communities (Sanger and Kerman) in year one and four communities (West Fresno, Parlier, Reedley, Lowell) in year three, allowing residents to be part of a change in their community and encourage participation and leadership. In addition to retail, fast food, and walkability, additional assessments of food banks and emergency food outlets and alternative food sources (such as community gardens and farmers markets) will be conducted. Two of the neighborhoods that were assessed in the initial 2012 Fresno County CX3 were Firebaugh and Hamilton. As discussed earlier, these two neighborhoods were not chosen by the LHD as part of their 6 targeted neighborhoods and were replaced by Sanger and Kerman (CX3 conducted in 2014).

Furthermore, LIAs will participate in community events targeting SNAP-Ed eligible population and has many indirect education methods in place in which education is less than 15 minutes and written materials are being distributed or displayed. Indirect education allows our programs to enhance education messaging from student to parent, recruit for direct education activities, and deliver consistent behavior-focused messages to the community.

To the extent possible, nutrition education will be paired with approved curricula designed to build the capacity of local agencies and champions to identify, participate in and lead obesity prevention policy, systems and environmental changes.

<u>Retail, Food Access and Marketing (State Level Objectives 1 and 3)</u>

As of the 2012 CX3, an average of only 10% of food retail outlets in the six targeted neighborhoods met the standards for healthy options and accessibility. LHD subcontractor California Health Collaborative (CHC) will work in partnership with the LHD Lifetime of Wellness Communities in Action (LWCA) Healthy Retail Committee to recruit local stores to participate in the NEOPB Retail Program and provide support to 2 local retail stores annually by making sustainable environmental changes that will increase fresh, locally sourced produce and other healthy items in the targeted stores. Support includes providing NEOPB approved Retail Campaign materials, store tours; Rethink your Drink presentations, food demonstrations, media and public relations, and coordination of Fruit

and Veggie Fests. To improve fruit and vegetable consumption among Fresno County children and teens, which is currently at 58.1% and 23.2% respectively, the LHD will work in partnership with the Fresno Food Security Network (FFSN) to explore, identify, and implement local best practice of over the three years to expand access to fruits and vegetables through PSE efforts. CCC will work with a large local food pantry to establish a purchased and donated food policy to increase the availabity of fruits and vegetables, and decrease the availability of unhealthy options. This distribution center is open daily to needy families. The agency will also host and promote a monthly produce market offering 10,000 – 40,000 pounds of free local fruits and vegetables. These distribution efforts serve hundreds of low-income families, and address both hunger and health. These efforts will be reinforced with SNAP-Ed messaging, indirect education activities, food demos and tastings, as well as promotion of direct education classes offered on-site. SNAP-Ed will also work with community partners working to increase fruit and vegetable access. SNAP-Ed will pair nutrition education and fruit and vegetable promotion with partner efforts to increase access in order to increase purchase and consumption of produce. SNAP-Ed will also provide technical assistance to access partners to increase vendor enrollment to accept EBT and participate in programs such as market match as needed. Lastly, as SNAP-Ed funding continues to decrease, LHD has determined that it is essential that sustainability be addressed over the next three years.

Worksite Wellness (State Level Objectives 1, 2, and 5)

Adults spend a significant amount of time at their worksites. Among adults in Fresno County, only 27.6% reported participating in regular walking and about 46.7% of adults consume one or more sugar sweeten beverages per week—both are issues that could be improved with worksites that allow physical activity breaks and only offer healthy snack/vending options. LHD subcontractor CHC will qualify and work with 15 qualifying worksites by September 30, 2019 to promote healthy eating and physical activity and create environmental changes that support the healthy behavior changes of their employees utilizing the California Fit Business Kit. Qualifying worksites, including school districts, receive nutrition and physical activity education and ongoing technical assistance requesting support in developing and implementing environmental support activities. LHD subcontractor CHC will also work with participating worksites to identify and implement PSE that support healthy behavior changes, increase consumption of healthy foods and increase physical activity practices amount their employees. Additionally, LHD subcontractor CHC will also connect participating worksites with technical assistance and resources to ensure employee lactation accommodations. Lastly, LHD feels that it is important that LHD should practice the same principles that we are promoting with local worksites. In partnership with LHD Lifetime of Wellness, Communities in Action (LWCA) program, LHD will continue to participate on the Department's Worksite Wellness Committee and provide technical assistance and support in implementation of environmental supports that support healthy behavior changes among LHD staff.

School Wellness (State Level Objectives 1, 2 and 5

As mentioned above, over 25% of children ages 12 to 17 years of age in Fresno County are either overweight or obese and at risk of developing a chronic illness. Sugar sweetened beverage consumption for children aged 2-17 is 58%, and the percent of teens consuming five fruits or vegetables daily is 23.2%. Many of these issues can be addressed in the school environment, where children spend a significant percentage of their time. UC CalFresh and LHD subcontractor Fresno County Office of Education (FCOE) will provide ongoing support and technical assistance to qualifying school districts through the provision of direct and

indirect nutrition and physical activity education, school wellness policy, environmental supports for nutrition and physical activity through school wellness policy updates, Smarter Lunchrooms, and creating an intersection between school gardens and classroom nutrition education curriculum.

UC CalFresh provides nutrition education to Fresno Unified, Coalinga Huron Joint Unified, Firebaugh Las Deltas Unified, and Central Unified School Districts. In FFY 16, UC CalFresh joined the Smarter Lunchrooms Movement (SLM) by providing support, guidance and resources to schools in the Fresno Unified School District (FUSD), as Technical Advising Professionals (TAP's). The Smarter Lunchrooms Movement champions the use of evidence-based, simple low and no-cost changes to lunchrooms, which increases the school lunch programs participation, profit and reduces waste. Most importantly, SLM transforms the school cafeteria form an institutional place to a welcoming dining area. SLM implements behavioral economics, using physical and social environmental factors such as price, appearance, convenience, information, state of mind, habit and expectations to influence student food choices. SLM aims to increase student's consumption of healthier foods, decrease food waste, improve staff morale, and develop and foster a culture of wellness. The SLM timeline for a phased implementation at FUSD schools began in FFY16 at 16 middle schools, approximately 22 elementary schools FFY 18 and will continue through FFY19 reaching an additional 22 elementary schools. In FFY17, FUSD had food service staffing challenges preventing them from implementing SLM in their 8 high schools. As a result in December 2016, UCCE moved forward to identify and recruit 3 Child Development Centers, totaling 9 classrooms, in the Coalinga-Huron Joint Unified School District (CHJUSD) and Firebaugh Unified School District (Firebaugh USD). UC CalFresh's simultaneous participation in SLM along with nutrition education in FUSD classrooms and supporting school wellness policy development and implementation, provides a linkage between the classrooms, their school cafeterias and their entire school environment.

LHD subcontractor FCOE will provide teacher training and direct and indirect nutrition and physical activity education to students for the youth interventions in Kerman Unified, Parlier Unified, Reedley Unified, and Sanger School Districts. These school districts serve a rural, socioeconomically disadvantaged student population. Combined enrollment is approximately 29,394 of which over 90% of students are Hispanic and over 85% are eligible to receive free or reduced price meals. This intervention is a K-12 comprehensive approach to integrating nutrition learning and physical activity at participating school sites and after-school programs. Strategies include but not limited to education and training for teachers, nutrition and physical activity education and cooking-in-the classroom and after-school programs, healthy messaging in schools through posters, student-led nutrition-focused morning announcements, school wellness policies, Smarter Lunchroom Movement and other related environmental changes.

Additionally, UC CalFresh will also provide on-going parent nutrition education and explore support to school wellness committees at FUSD schools. Based on gap analysis, conducted by SNAP-Ed Partners in FFY 15, of unmet needs within schools of school districts located in high need areas, UC CalFresh will continue to explore and expand its youth and parent education program into Central Unified School District in FFY 17-19 with the potential of reaching SNAP-Ed eligible children.

Furthermore, both UC CalFresh and LHD will also be enhancing USDA approved messaging by augmenting reach through parent newsletters, homework assignments, utilizing social media, and other opportunities. Lastly, UC CalFresh and LHD subcontractor FCOE will be helping to coordinate and/or participate in

school events, as appropriate, and provide indirect education regarding nutrition education and physical activity education to youth reaching 3,100 youth in year one, 3,450 year two, and 3,800 in year three.

Required Evaluation Narrative Summary:

LHD

Overall, the LHD evaluation plan is aligned with the WRO SNAP-Ed Evaluation Framework, April 2014. LHD will utilize the following evidence-based activity approaches: individual and group-based nutrition education, health promotion, and intervention strategies; comprehensive, multi-level interventions at multiple complementary organizations and institutional levels; and community and public health approaches to improve nutrition and physical activity. LHD process evaluation reporting will document the range of SNAP-Ed services provided in the local jurisdiction, the locations and specific SNAP-Ed eligible audiences reached as well as other required EARS elements. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated), indirect education (duplicated), and PSE change activities will be compared to the original reach targets. The Impact Outcome Evaluation of the youth nutrition education series as measured by the NEOP-approved Harvest of the Month Workbook survey will document change in individual level behaviors and dietary practices highlighted in the USDA's Western Regional Offices SNAP-Ed Evaluation Framework. Other education activities will be evaluated with CDPH approved curriculum evaluation tools.

For PSE strategies, the PEARS will inform the evaluation design and plan for the four main objectives- Healthy Communities, Healthy Retail, Food Access and Marketing; Worksite Wellness, and School Wellness. Defined evaluation methods will include PSE reporting using the PEARS and CX3 reassessment. Other methods to evaluate the PSE strategies within the four Objectives will be determined by the intervention strategy. Such methods may include activity and communications tracking; in-person and/or online surveys; in-depth interviews of key stakeholders; observational assessments; nutritional assessments; and/or policy review.

Evaluation activities of Objective 1: Healthy Communities will focus on champion-led and community-driven PSE efforts in settings such as schools, faith-based organizations, and the built environment (land use and planning). In addition, activities will include CX3 data collection and developing, piloting, and implementing an innovative joint evaluation effort between the LHD and UCCE focused on evaluating shared outcomes in either school wellness or nutrition education. Lastly, SSC will conduct baseline comprehensive environmental assessments in at least five of the six communities to identify barriers and opportunities for physical activity. Champions and stakeholders will utilize results to identify priorities to increase physical activity opportunities. Within Objective 2: Healthy Retail, Food Access and Marketing, evaluation activities will be tailored to program strategies, which may include evaluating the impact of healthy retail efforts on healthy food availability and customer behavior, assisting in the development and evaluation of a sustainability model of a mobile demonstration kitchen, and evaluating a local best practice to expand fresh fruit and vegetable access to SNAP-eligible populations.

The evaluation of Objective 3: Worksite Wellness will use pre- and post-surveys such as those included in the California Fit Business Kit to measure key program outcomes. Objective 4: School Wellness strategy evaluation may focus on a variety of intervention strategies such as parent training, school wellness policy implementation, and/or nutrition education.

The findings from the evaluations will be shared with LHD, subcontractors, CDPH, and other key stakeholders, as appropriate, to inform future program activities over the course of the three-year work plan.

UC CalFresh

UC CalFresh utilizes research-based age specific curricula in the classroom with youth participants. Several of the curricula have specific pre and post tests administered at the beginning and end of the year to assess knowledge gain and behavior change in students. Additionally, teachers are surveyed using the Teacher Observation Tool (TOT) to assess their perception of student's baseline exposure to various foods as well as teachers' perceived behavior change of the students concerning the foods tasted. PSE work in the school setting will include supporting school wellness policy and school garden efforts. Utilizing various nutrition education and gardening resources such as Nutrition To Grow On, these PSE efforts will be assessed and evaluated. In the implementation of the Smarter Lunchroom's Movement in selected school sites, UC CalFresh uses the SLM Scorecard, before & after photos as well as, Site Visit Summary forms to assess the progress of each lunchroom.

UC CalFresh's adult evaluation's include pre and posts tests specific to adult and senior research-based curricula in series-based lessons. Series-based adult lessons use Eat Smart, Be Active and Plan, Shop, Save and Cook. Senior series-based lessons use the Eat Smart, Live Strong curriculum. These assessments measure knowledge gain and behavior change. For single session workshops, UC CalFresh utilizes intent to change (ITC) surveys to measure the participants' readiness to change behavior. Single session workshops also collect qualitative success stories. For process evaluation, UC CalFresh submits quarterly reporting tools youth and adult workbooks with number of participants and site details. UCCE will be working with UC CalFresh state office to align, as appropriate, evaluation tools and results to the Western Region's SNAP-Ed evaluation framework.

CCC

Catholic Charities Diocese of Fresno has outlined a scope of work targeting adults and older adults with evidence-based curricula. The overall number of adults reached through education activities will be tracked and compared to original targets through the use of the ATF and/or comprehensive PEARS system, as well as Catholic Charities of California progress reporting system. Outcome evaluations, in alignment with the SNAP-Ed Evaluation Framework, will be used as staff capacity allows. Results will be used for monitoring quality and for program improvement. PSE efforts will also be captured through the PEARS system in conjunction with qualitative methods completed by the CCC contracted evaluation team, as appropriate. Evaluation and capture of PSE data will be used to communicate comprehensive program impact, as well as to inform improvement of current PSEs and opportunity for future community change strategies.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	25		0 to 4 years old (Preschool):	3,609
Female	75		5 to 17 years old (School Age):	180,476
			18 to 59 years old (Adult):	151,600
			60 years old and over (Senior):	25,266
Total:	100			360,951

3. Ethnicity/Race

Ethnicity

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, recruit, identify and engage at least 160 (70 existing + additional 30 annually) adult and 255 (105 existing +50 annually) youth Champions, through direct and indirect nutrition and physical activity education, and 18 (6 x 3 years) agency champions through collaboration, who will participate and/or lead at least 8 community-driven and built environment PSE strategies in the six LHD targeted communities, and CCC target sites, to increase access to healthy foods and physical activity opportunities.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:** Safe routes to school, school meal improvement, park improvement, joint use agreements, playground stencils, community and school gardens, hydration stations, built environment (land use and planning), healthy food/beverage standards at parishes/parish wellness policies & increased access/opportunity to community PA

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, in partnership with the Central Valley NEOP Project Directors, UCCE, and the Central Valley Health and Nutrition Collaborative (CVHNC) Built Environment Workgroup, explore, identify and receive 3 training and education activities to build capacity on development and implementation of land use and planning PSE efforts.

   b. By September 30, 2017, provide training and support to an additional 30 adult, 50 youth and 6 agency new champions and existing champions to complete community-driven nutrition and physical activity future PSE projects.

c. By September 30, 2017 conduct 2 community forums with champions and community partners in target communities where community forums were previously conducted to reassess priorities identified by the community.

d. By September 30, 2017, conduct the Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) neighborhood reassessment process in two Fresno County neighborhoods (Sanger and Kerman) in partnership with local Champions in order to measure the nutrition and physical activity environments, measure any change since FFY 2014, and provide updated data to drive future PSE work and community engagement in those neighborhoods.

e. By September 30, 2017, UCCE and LHD will provide direct education to 27,883 (UCCE=19,963 and LHD=7,920), and indirect education to 43,860 (UCCE=23,524 and LHD=20,336), SNAP-Ed eligible individuals throughout Fresno County.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, in partnership with adult, youth and/or agency champions, identify potential and develop plans in at least 1 built environment PSE strategies to increase access to healthy foods and physical activity opportunities.

b. By September 30, 2018, provide training and support to an additional 30 adult, 50 youth and 6 agency new champions and existing champions to complete at least 2 community-driven and 1 faith based nutrition and physical activity PSE projects.

c. By September 30, 2018 conduct 2 community forums with champions and community partners in target communities where community forums were previously conducted to reassess priorities identified by the community.

d. By September 30, 2018, UCCE, CCC and LHD will provide direct education to 31,113 (UCCE=21,963, CCC=500 and LHD=8,650), and indirect education to 49,960 (UCCE=24,024, CCC=1,500 and LHD=24,436), SNAP-Ed eligible individuals throughout Fresno County.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, in partnership with adult, youth and/or agency champions, implement at least 1 built environment PSE strategies that will increase access to healthy foods and physical activity opportunities.

b. By September 30, 2019, provide training and support to an additional 30 adult, 50 youth and 6 agency new champions and existing champions to complete at least 3 community-driven and 4 faith based nutrition and physical activity PSE projects.

c. By September 30, 2019 conduct 2 community forums with champions and community partners in target communities where community forums were previously conducted to reassess priorities identified by the community.

d. By September 30, 2019, conduct the Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) neighborhood reassessment process in four Fresno County neighborhoods (Lowell, West Fresno, Parlier, and Reedley) in partnership with local Champions in order to measure the nutrition and physical activity environments, measure any change since FFY 2016, and provide updated data to drive future PSE work and community engagement in those neighborhoods.

e. By September 30, 2019, UCCE, CCC and LHD will provide direct education to 39,113 (UCCE=28,463, CCC=500 and LHD=10,150), and indirect education to 50,810 (UCCE=24,524, CCC=1,500 and LHD=24,786), SNAP-Ed eligible individuals throughout Fresno County.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, recruit, identify and engage at least 160 (70 existing + additional 30 annually) adult and 255 (105 existing +50 annually) youth Champions, through direct and indirect nutrition and physical activity education, and 18 (6 x 3 years) agency champions through collaboration, who will participate and/or lead at least 8 community-driven and built environment PSE strategies in the six LHD targeted communities, and CCC target sites to increase access to healthy foods and physical activity opportunities.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Support and assist Champions with at least two PSE related events annually to create awareness and support for identified PSE reaching 225 community residents.	☐ CED ☒ CEI ☒ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: Sub A, PHI AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF On file: Agenda, sign-in sheet, flyers, media articles, pictures, Summary reports *Contributes to annual objective 1.b, 2.b, 3.b

****Time Frame: Year & Quarter:**
Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)
Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to healthy foods of SNAP-Ed qualifying adults and/or children by making at least 7 food access sustainable environmental changes in LHD six targeted communities and CCC targeted sites.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

Healthy Retail, Community Gardens, Community Supported Agriculture (CSA), Farmers Market, Food Pantry Policy

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, in partnership with the LWCA and Healthy Retail Committee, increase the consumption of fruits and vegetables and healthy beverages of SNAP-Ed qualifying adults and/or children by making 1 sustainable environmental system change within each of at least 2 local retail stores within the six the targeted communities, to increase the promotion and purchase of fresh, locally sourced produce and other healthy items.

   b. By September 30, 2017, in partnership with Fresno Food Security Network (FFSN), explore local best practices for expanding access to fruits and vegetables to identify at least 1 PSE project targeting SNAP-Ed eligible populations within the six targeted communities.

   c. By September 30, 2017, recruit a total of at least 6 qualifying retail sites within the six targeted communities to reach a minimum of 7,500 SNAP-Ed eligible individuals using NEOPB Retail program activities and merchandising materials.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, in partnership with the LWCA and Healthy Retail Committee, increase the consumption of fruits and vegetables and healthy beverages of SNAP-Ed qualifying adults and/or children by making 1 sustainable environmental system changes within at least 2 additional LHD local retail stores within the six targeted communities and CCC will identify at least 1 food pantry and draft the healthy food and beverage standards to increase the promotion and purchase of fresh, locally sourced produce and other healthy items.

   b. By September 30, 2018, in partnership with Fresno Food Security Network (FFSN), establish partnerships and memorandum of understandings (MOU's) and secure additional resources needed to implement local best practices to expand access to fruits and vegetables targeting SNAP-Ed eligible populations within the six targeted communities.

   c. By September 30, 2018, maintain at least 4 retail sites and recruit a total of at least 3 additional qualifying retail sites within the six targeted communities to reach a minimum of 8,750 SNAP-Ed eligible individuals using NEOPB Retail program activities and merchandising materials.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, in partnership with the LWCA and Healthy Retail Committee, increase the consumption of fruits and vegetables and healthy beverages of SNAP-Ed qualifying adults and/or children by making 1 sustainable environmental system changes within at least 2 additional LHD local retail stores within the six targeted communities and CCC will implement healthy food and beverage standard policy for at least 1 food pantry to increase the promotion and purchase of fresh, locally sourced produce and other healthy items.

   b. By September 30, 2019, in partnership with Fresno Food Security Network (FFSN), to implement at least 1 local best practice to expand access to fruits and vegetables targeting SNAP-Ed eligible populations within the six targeted communities.

   c. By September 30, 2019, maintain at least 6 retail stores and recruit a total of at least 3 additional qualifying retail sites within the six targeted communities to reach a minimum of 11,250 SNAP-Ed eligible individuals using NEOPB Retail program activities and merchandising materials.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Fresno County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 7/31/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to healthy foods of SNAP-Ed qualifying adults and/or children by making at least 7 food access sustainable environmental changes in LHD six targeted communities and CCC targeted sites.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, qualify and continue to partner with a total of 15 worksites (12 qualifying worksites and at least 3 qualifying school district worksites) to implement worksite wellness activities utilizing the Get Fit Business Kit and to create at least 2 policy, systems and environmental changes to support the healthy behavior changes of their employees, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support in the six targeted communities in Fresno County.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

Worksite Wellness

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, recruit and qualify at least 6 worksites and 1 school district worksites in the six targeted communities in Fresno County to incorporate worksite wellness activities utilizing California Fit Business Kit that will increase the knowledge, skills, self-efficacy, and positive attitudes of their employees that promote healthy eating and physical activity.

   b. By September 30, 2017, work with participating worksites to each complete a minimum of 1 activity in the California Fit Business Kit and identify policy, system and environmental changes to implement that will support the healthy behavior changes of their employees., increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, recruit and qualify at least 3 additional worksites and 1 additional school district worksites in the six targeted communities in Fresno County to incorporate worksite wellness activities utilizing California Fit Business Kit that will increase the knowledge, skills, self-efficacy, and positive attitudes of their employees that promote healthy eating and physical activity.
    b. By September 30, 2018, work with participating worksites to each complete a minimum of 1 activity in the California Fit Business Kit and identify policy, system and environmental changes to implement that will support the healthy behavior changes of their employees., increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support.
    c. By September 30, 2018, at least 1 participating worksite will develop and implement at least 1 policy, system environmental change that support the healthy behavior changes of their employees, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, recruit and qualify at least 3 additional worksites and 1 additional school district worksites in the six targeted communities in Fresno County to incorporate worksite wellness activities utilizing California Fit Business Kit that will increase the knowledge, skills, self-efficacy, and positive attitudes of their employees that promote healthy eating and physical activity.
    b. By September 30, 2018, work with participating worksites to each complete a minimum of 1 activity in the California Fit Business Kit and identify policy, system and environmental changes to implement that will support the healthy behavior changes of their employees., increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support.
    c. By September 30, 2019, at least 2 participating worksites will develop and implement at least 1 policy, system environmental change that support the healthy behavior changes of their employees, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population through worksite environmental support.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, at least 61 participating schools, will report successful implementation (put into practice) at least 1 policy system and environmental change that will support nutrition and physical activity education and opportunities to increase knowledge, skills, self-efficacy, and positive attitudes that promote healthy eating and physical activity, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

School Wellness Policies, Smarter Lunchrooms, School Gardens, New/Improved access to structured PA programs

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, at least 2 (UCCE=1, LHD=1) participating schools will implement at least 1 school wellness policy (SWP) and make at least 1 environmental or policy change that may include school garden, structured PA, etc., at the site.

   b. By September 30, 2017, UCCE staff will work with school staff at 3 participating Child Development Centers (CDC's) and LHD will work with food service staff and/or youth at 1 participating school to successfully implement the Smarter Lunchrooms Movement (SLM).

   c. By September 30, 2017, at least 22,000 (LHD=4,000 + UCCE= 18,000) participating youth will receive direct nutrition and physical activity education in the form of USDA approved lessons in qualifying school sites.

d. By September 30, 2017, at least 24,500 (LHD=5,000 + UCCE=19,500) parents and at least 5,400 (LHD=2,100 + UCCE 3,300) youth will receive indirect nutrition and physical activity education utilizing USDA approved materials.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, at least 2 additional (UCCE=1, LHD=1) participating school districts or schools will implement at least one school wellness policy (SWP) and make at least 1 environmental or policy change that may include school garden, structured PA, etc., at the site.

b. By September 30, 2018, UCCE staff will work with food service staff and/or youth at 22 additional participating FUSD elementary schools and LHD will work with food service staff and/or youth at 1 additional participating school to successfully implement the Smarter Lunchrooms Movement.

c. By September 30, 2018, at least 24,000 (LHD=5,000 + UCCE=19,000) participating youth will receive direct nutrition and physical activity education in the form of USDA approved lessons in qualifying school sites.

d. By September 30, 2018, at least 25,000 (LHD=5,500 + UCCE=10,000) parents and at least 5,850 (LHD=2,200 + UCCE=3,650) youth will receive indirect nutrition and physical activity education utilizing USDA approved materials.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, at least 2 additional (UCCE=1, LHD=1) participating school districts or schools will implement at least one school wellness policy (SWP) and make at least one environmental or policy change that may include school garden, structured PA, etc., at the site.

b. By September 30, 2019, UCCE staff will work with food service staff and/or youth at 22 additional participating FUSD elementary schools and LHD will work with food service staff and/or youth at 1 additional participating school to successfully implement the Smarter Lunchrooms Movement.

c. By September 30, 2019, at least 26,500 (LHD=6,500 + UCCE=20,000) participating youth will receive direct nutrition and physical activity education in the form of USDA approved lessons in qualifying school sites.

d. By September 30, 2019, at least 25,500 (LHD=5,500 + UCCE=20,000) parents and at least 6,300 (LHD=2,500 + UCCE=3,800) youth will receive indirect nutrition and physical activity education utilizing USDA approved materials.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Fresno County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 7/31/2017**

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):

By September 30, 2019, at least 61 participating schools, will report successful implementation (put into practice) at least 1 policy system and environmental change that will support nutrition and physical activity education and opportunities to increase knowledge, skills, self-efficacy, and positive attitudes that promote healthy eating and physical activity, increase consumption of healthy foods and beverages, reduce consumption of unhealthy foods and beverages, and increase physical activity practices among Fresno County SNAP-Ed eligible population.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Review and assess participating schools' current wellness policies. County/Jurisdiction: Fresno County

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Office Supplies	Pens, pencils, paper products, desk supplies, toner and ink, etc.	8.35	$12.77	50	$5,331	
2			Postage	Correspondence to NEOPB, community individuals/organizations	8.35	$0.98	32	$262	
			Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)						
1			None					$0	
							Total Non-Capital Equipment/Supplies:	**$5,593**	

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Nutrition Education Materials	USDA approved nutrition educaiton and physical activity promotion matierals including large-scale duplication for education sessions, community forums, CX3, and other scope of work activities	$2.00	1000	$2,000	
2			Small Kitchen Wares	Durable kitchen items for taste testing activities, including but not limited to electric, skillet, spa water dspensers, cooking utensils, storage containers	$20.00	15	$300	
3			Food for taste testing	Produce (fresh, frozen, canned) and other items for use in USDA approved recipes	$2.50	800	$2,000	
4			Garden Supplies	Supplies for at least six community/school gardens including but not limited to seeds and seedlings, soil and fertilizer; small gardening tools such as trowels, shears, watering cans, hand forks, and gloves, etc.	$2.50	1500	$3,750	
5			PSE Community Projects	Meetings with Champions to support their projects in six target communities. : Approximately 36 project meetings with adult and youth Champions to support their community-identified PSE projects in six target communities (6 per community—3 for adults and 3 for youth). This may include meeting room rental fees to bring together NEOP staff, community residents, stakeholders and key decision-makers; project-specific materials needed to complete their chosen PSE projects; printing of NEOP-approved PSE community signs to increase awareness of the subject matter; and other materials promoting the specific PSE in accordance with NEOPB and USDA guidelines. Past community-driven PSE projects have included a walking school bus route, a cycling group, hydration stations, community gardens, and healthy vending in community centers. Project goals are determined by each target community and age group with input and technical assistance from NEOP staff, and thus project needs may vary.	$50.00	200	$10,000	
6			Bus Tokens	Provide city of Fresno bus tokens to Champions working on PSE projects. : $1.10 per token (regular fare is $1.25). The requested amount will provide 110 bus rides across our approximately 175 adult and youth champions we are working with to provide nutrition education and PSE efforts in their respective communities. Transportation can be a challenge for the low income SNAP-Ed eligible population we work with. This would provide them an opportunity to attend NEOP-specific meetings and trainings as needed.	$55.00	0	$0	
						Total Materials:	**$18,050**

				Contracts/Sub-Grants/Agreements that are $25,000 or more		
A			Nutrition Education	Nutrition Education Subcontractor: Leads scope of work activities to provide all direct and indirect nutrition and physical activity education to SNAP-Ed participants and SNAP-Ed eligible population in all six targeted communities. Additionally, assist with supporting champion building activities.	$260,000	
B			California Health Collaborative	Retail & Marketing and Worksite Wellness Subcontractor: Leads recruitment for and implementation of NEOPB retail program, and policy, systems and environmental changes in retail settings to expand access to healthy foods in target communities. Additionally, Leads scope of work activities to recruit worksites to implement nutrition education and physical activity promotion through worksite wellness initiatives using the California Fit Business Kit.	$296,000	
C			Fresno County Superintendent of Schools	School Wellness Subcontractor: Leads scope of work activities to implement nutrition and physical activity interventions in classroom and afterschool settings, as well as policy, systems and environmental changes in schools, e.g., Smarter Lunchrooms. Coordinates staff and parent participation in events targeting Fresno County students that promote youth engagement in nutrition education and physical activity promotion.	$336,500	
D			Sarah Samuels Center	Evaluation Subcontractor: Leads development and implementation of program evaluation activities, community-driven PSE work, Champion engagement system, evaluation plan and Impact/Outcome Evaluation. Identifies local best practices to increase access to healthy foods and sustainability models. The evaluation contract will bring the evaluation expertise needed to document PSE outcomes of the unique approach in Fresno (target community focus). LHD does not carry this expertise in house and it is not provided through the CDPH statewide evaluation. The evaluation budget is a template from current contract used as aplace holder until new contract can be established for the next three years. This was the directive received from our CDPH Contract Manager when developing our budget for FFY 17.	$120,000	

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Public Health
County/Jurisdiction: Fresno County

				Contracts/Sub-Grants/Agreements that are less than $25,000		
1			RD Consultant	Registered Dietician Consultant: Provides assistance, expertise, and training to LHD NEOP staff and subcontractors to implement nutrition education on an as-needed basis. CDPH requires that LHDs have an RD as part of the staffing of the grant or the LHD should have access to an RD. It is not cost effective for Fresno County LHD to have an RD on staff. As a result, need to set up a consulting service with a RD to utilize as needed.	$24,000	
2			Be Better Media Campaign	Media spots that may include radio, TV, newspaper, bus ads, etc. utilizing CDPH/USDA developed and approved media materials from the "Be Better" media campaign	$7,990	
3			TBD	Community-driven PSE projects: TBD, vendors may include community-benefit organizations, etc. and will be distinguished in this document once determined. Vendors will be evaluated based on their demonstrated ability to implement PSE projects in the target communities in accordance with approved IWP activities and CDPH/USDA program guidance.	$20,262	
4			TBD	Community-driven PSE projects: TBD, vendors may include faith-based organizations, etc. and will be distinguished in this document once determined. Vendors will be evaluated based on their demonstrated ability to implement PSE projects in the target communities in accordance with approved IWP activities and CDPH/USDA program guidance.	$20,262	
5			TBD	Community-driven PSE projects: TBD, vendors may include local mucipalities, etc. and will be distinguished in this document once determined. Vendors will be evaluated based on their demonstrated ability to implement PSE projects in the target communities in accordance with approved IWP activities and CDPH/USDA program guidance.	$20,262

87			CE-SUPER-2/Miramontes, Javier	Santa Cruz, CA	Life Lab 2-day Training - The Growing Classroom Workshop is a 2-day intensive in the garden based learning training. Those that attend this training will "Learn to use a garden to breathe life into standards-based lessons, promote ecological literacy, encourage healthy eating, and support students' social development to help support the work plan goals and the use of gardens as PSE on school campuses. Participants in this hands-on workshop experience tried-and-true garden-based lessons linked to Common Core Language Arts and Math and Next Generation Science Standards; practice basic gardening techniques; and develop management strategies for a school garden program. Key components include: How to use a garden to provide opportunities for students to develop their creativity, critical thinking, communication and collaboration skills; Basic gardening techniques, including composting, seed sowing, preparing garden beds, transplanting, and garden planning; how to make outdoor, inquiry-based education work for different student populations and outdoor classroom management tips."	1	1	3	2	$74.00	$125.00		320	$300.00		$943	
88			CES-2/Schultz-Sharp, Kristi	Santa Cruz, CA	Life Lab 2-day Training This training is specifically designed for education in the garden as it pertains to school campuses which makes it very valuable. After attending this training, one would be able to take a UC CalFresh approved curriculum and help make the connection between the curriculum, common core and the garden and thus train others. It is in Santa Cruz at the Life Lab training center and is the only teaching lab of its kind in California.	1	1	3	2	$74.00	$125.00			$300.00		$772

X	California Department of Aging: CDA: (Area Agency on Aging, CSU Chico Research Foundation: AAA, PSA3)
X	Catholic Charities of California: CCC: (Northern Valley Catholic Social Service: NVCSS)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

Glenn County in northern California has a total population of 27,552 with most of the residents living in Willows, Orland, and Hamilton City. Forty percent, or 11,131 are SNAP-Ed eligible (income <185% FPL). Of that number, 12.7% are children age 0-6, 21.0% are children age 6-17 years old, 54.8% are adults age 18-64 years, and 11.4% are seniors 65 years and older. Forty-seven percent (47.2%) identified themselves as white, 42.7% Hispanic, 2.8% American Indian/Alaska Native and 7.3% unknown. The majority of residents, 75%, speak English as their primary language while twenty-five percent (25%) speak Spanish.

The 3,682 CalFresh participants represent 13.4% of Glenn County's total population. However, Glenn County ranks 37th out of the 58 California Counties in terms of CalFresh enrollment, indicating a much larger portion of the population is eligible to participate. Students eligible for Free/Reduced Price Meals are 3,987 and account for 65.1% of the student population, an increase of over five percent from 2014.

Fifty percent of Glenn County children (Age 0-17) live below 185% FPL. Of the 29 schools in Glenn County, 26 (89.7%) are SNAP-Ed eligible (>50% FRPM Enrollment).

The adult overweight/obese prevalence in Glenn County is 60.7% for all adults and 48.4% for SNAP-Ed eligible adults. Thirty four percent of all adults are obese and 27.1% of SNAP-Ed eligible adults are obese (combined county data for Tehama, Glenn, and Colusa). The rate for all adults is much higher than the California rate of 27.0%, while the rate for SNAP-Ed eligible adults is slightly lower than the state rate of 31.5%.

According to the California Department of Education, in Glenn County only 52% of children are within the Healthy Fitness Zone which is a measure of body composition. This is four percent lower than the percent of children throughout California within the Healthy Fitness Zone.

Rates of Food Insecurity in Glenn County are higher than the state average for total population (15.5% vs. 15.0%) and children (27.0% vs. 25.1%).

When surveyed, 61.5% of children and teens (aged 2-17) reported consuming two or more servings of fruit per day. Of this same group, 62.3% reported consuming fast food one or more times in the past week. Forty four percent of adults reported consuming one or more sugar-sweetened beverages per week.

In Glenn County, 64.5% of SNAP-Ed eligible adults can always find fruits and vegetables in their neighborhood. Five percent of residents have limited access to healthy foods. However, this is self-reported data and may not reflect actual and reliable access to healthy foods.

Seventeen percent of adults aged 20 and over report no leisure-time physical activity. Only 27.0% of children and teens (aged 2-17) are physically active for at least one hour every day. Of children aged 2-11, 56.4% are physically active for at least one hour every day.

Glenn County is estimated by CDA to have about 6,479 seniors (60 years or older). It is projected to have more than 50- to 149.9% increase in its senior population from 1990 to 2020.

In November-December 2015, four qualifying neighborhoods were surveyed through the Community of Excellence in Obesity Prevention, Nutrition and Physical Activity (CX^3) process. Data has been mailed to the state and we are awaiting results. Those results will help guide the Healthy Retail project in FFY 17-19.

4. Community Assessment

The assessment was developed using the SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, Feeding America's Map the Food Gap, and Food Insecurity in Your County.

According to the Robert Wood Johnson Foundation's 2015 County Health Rankings, Glenn County ranks 33rd out of 57 for Health Factors. The food environment index in the county is below the state index of 7.5 at 6.9. Although we don't yet have our analyzed data, our preliminary CX^3 data indicates that access to food is severely limited in Glenn County due to the limited number of supermarkets and grocery stores, especially in more rural areas such as Elk Creek. Glenn is a high producing agricultural county and ranks 18th in the state in terms of crop value (CDFA, 2014), however, the majority of the produce is shipped out. Historically there have been only two farmers markets in the county where residents have access to these products. Unfortunately, it has recently been decided that only one market will remain open beginning the summer of 2016, which will be in Orland and on a Thursday. The day and the time of the market do not allow the majority of people to be able to attend. Because of this very limited access to fresh and healthy foods and because of the health concerns described in the above jurisdiction description, a strategy using core, secondary, and complimentary settings will be implemented.

In Glenn County, 29% of children live in poverty compared to the state rate of 24%. As poverty is tightly linked to health outcomes, this population is at a higher risk for poor health consequences. Therefore, preschool and school-aged children will be receiving nutrition education services at schools. These same children will be reached through direct education, teacher trainings, and implementation of school wellness policies. In addition these interventions, Glenn County children and families will receive retail site interventions, ReThink Your Drink activities , parent education, and indirect education such as health fair type events. Single session and series classes will reach community members. These policy and environmental changes will help increase the consumption of healthy foods and promote physical activity in the communities served. All interventions will occur at locations with a high rate of SNAP-Ed eligible participants. Nutrition education topics will emphasize healthy food and beverage choices, and many will include tasting activities. Physical activity will be promoted along with the nutrition education, especially when working within the schools. Opportunities for physical activity will be increased through improved environments in SNAP-Ed eligible communities.

According to the SNAP-Ed 2015 County profiles, there are 15,624 documented seniors (65 years and older) who are SNAP-Ed eligible in PSA 3 counties, which include Butte, Colusa, Glenn, Tehama and Plumas. Residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. The aging of the population is particularly noticeable in PSA 3, where the senior population is already a significant portion of the total population and is continuously growing.

Results of the Needs Assessment, which was conducted in FFY14, identified the needs and opportunities necessary to enhance nutrition education, physical activity, and food security of CalFresh-participating and/or eligible seniors at congregate meal sites. Gaps in services provided to the seniors in the counties assessed were also determined. In Glenn County, focus will be on 1) developing a system to provide constant nutrition and physical activity information to seniors, to encourage them to eat healthy and live actively, and 2) increase access to healthy food and beverages. This is essential, as the 2015 Glenn County Congregate Meal site nutrition assessment showed that 36.9% of the senior population was considered to be in the high nutritional risk group and 22.7% were in moderate nutrition risk group. The assessment also showed that 26% eat fewer than two servings of fruits or vegetable per day and 17% do not always have enough money to buy the food he/she needs.

5. Community Change Goals

The Community Change Goals for Glenn County have been based on the current SNAP-Ed County Profiles and the Robert Wood Johnson Foundation's 2015 County Health Rankings. From the ongoing intervention efforts of the past work plans and the current FFY16 work plan, collaborations with other SNAP-Ed LIAs and unfunded partners, and discussions with the CNAP group and local county officials, it was determined that a focus is nutrition issues such as obesity and the high rate of diabetes especially prominent in the Hispanic and Native American populations. Hispanic/Latino and Native Americans account for 44.22% of the Glenn County population. Long term desired outcomes include an increase in access to and consumption of fresh local fruits and vegetables, an increase in rates of physical activity, an increase in rates of food security, and ultimately increasing the overall physical of Glenn County residents. Efforts of the SNAP-Ed funded LIAs will focus on the SNAP-Ed population in Early Childhood Education and school-based settings, community settings, and healthy retail settings.

Creating these changes is a collaborative effort that will require ongoing support, collaboration, continued and additional funding, and time. Current SNAP-Ed funding will provide direct and indirect nutrition and physical activity education, school wellness policy training and support, and healthy retail for SNAP-Ed populations through three main LIAs: CSU, Chico on behalf of the Glenn County Local Health Department and Area Agencies on Aging, University of California Cooperative Extension, and Northern Valley Catholic Social Services. SNAP-Ed funding will additionally provide technical assistance and training as well as support for policy, systems and environmental changes. Unfunded partners support and align with these strategies and collaborate on efforts to support the three year objectives and Policy, Systems and Environmental changes that will take place.

Working together, the LIAs will work toward achieving the following three-year objectives:

1. By September 30, 2019, a total of five schools and/or ECE sites will develop and/or revise school wellness policies and change environments that support healthy eating and promote physical activity among students, families and school staff.
2. By September 30, 2019, funded and unfunded community partners will increase awareness of and access to healthy fruits and vegetables, healthy beverages, and physical activity resources at a total of eight food pantries, retail sites, senior centers, faith-based organizations, and/or community settings through education and policy changes.

The community change goals will be achieved through the LIAs and the support of the other unfunded partners in Glenn County through the CNAP and other avenues. The portfolios chosen for this Integrated Work Plan include Portfolio 1: LIVE; Portfolio 2A: LEARN; Portfolio 2B: LEARN; and Portfolio 3: SHOP. Early Childhood Education sites and school sites will be targeted due to the large population of SNAP-Ed eligible populations there. Families will also be targeted through these sites. The goals at these sites are to provide direct and indirect education, update school wellness polices, create environments that support the consumption of fruits and vegetables and healthy food choices and increased physical activity, and train staff and administration in providing supportive strategies that will enhance and sustain the LIA efforts. Community efforts include providing direct and indirect education to the SNAP-Ed eligible population, healthy retail, training and technical assistance for food bank staff and personnel to improve the quality of donated foods at sites including food banks, churches, libraries, and various other community venues.

We plan to work closely with our unfunded partners including Orland City Council, WIC, Health and Human Services Agency and Glenn County First 5. The CPHL meetings (CNAP group) will provide a foundation for which to plan, collaborate and support the goals of the Integrated Work Plan, with the ultimate goal of increasing the health and wellbeing of Glenn County residents. The collaboration and support of the partners on board will allow further momentum and opportunities to create sustainable PSE changes.

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

The Community Partnerships for Healthy Living, formerly the Glenn County Food Policy Council, serves as the County Nutrition Action Plan (CNAP) group. Partners currently include funded and unfunded interested partners and community members serving the SNAP-Ed eligible population in the areas of food programs, nutrition education and physical activity promotion, and food resource management. The group's Vision Statement is: Nutrition, Fresh Food and Community Wellness. The Mission Statement is: To promote agriculture, economic vitality, and healthy choices while maximizing the local food system for Glenn County and its residents. The CNAP group will meet at least six times per year. Current funded partners include: UC CalFresh Nutrition Education Program, Glenn County LHD (CSUC), AAA, and CCC. Current unfunded partners include Glenn County First 5, AmeriCorp, WIC, Glenn County Human Resource Agency, Orland City Council. Efforts are being made to recruit local health professionals and Food Service personnel from local school districts. LIAs will promote SNAP-Ed services and activities by connecting with these unfunded agencies.

Unfunded partners such as schools and school districts, First 5, AmeriCorp, WIC, Orland City Council and Mayor have been instrumental in the coordination of services and collaboration with others to create awareness, create new partnerships, and provide guidance.

Although the Farmers' Market is no longer a PSE strategy for this Integrated Work Plan, efforts will be made to coordinate with staff supporting the CalFresh EBT at the Farmers' Market program in Glenn County in FFY17. The goal of that program is to increase the CalFresh EBT redemption rate at local Farmers' Markets and ultimately increase the consumption of fresh local fruits and vegetables. These strategies include providing cooking demonstrations and tastings, market

walks, and visual marketing materials to increase awareness and promotion of the program. Currently in Butte County, it has been successful in increasing participation in CalFresh EBT use at the market and it is anticipated the success will continue in Glenn County.

As funding is cut to AAA, the Center for Healthy Communities on behalf of AAA-PSA3 will collaborate with other LIAs to ensure an evidenced based direct education is provided to seniors in Glenn County to nurture increased access to healthy food and beverages, fruit and vegetable consumption, physical activities and healthy lifestyle choices. LHD will provide the direct education while AAA will focus on PSE which uses indirect education, T.A. and community collaboration.

Non SNAP-Ed funded, UC Expanded Food and Nutrition Education Program (EFNEP) is in 5 sites and assists limited-resource families with children, through series based, behaviorally focused nutrition education. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and to be physically active. EFNEP also contributes to participants' personal development and the improvement of their total family's diets and nutritional welfare. EFNEP is supported by USDA's National Institute of Food and Agriculture (NIFA) Smith-Lever funds. EFNEP adult program is eight lessons and provides education through the Promotora Model. The effectiveness of nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist and 24-hour food recalls) filled out by the participants EFNEP partners with community based organizations. Methods for program delivery include direct teaching in groups The AAA-PSA3 will collaborate with Glenn County LHD and other unfunded partners to provide comprehensive multi-level behavior focused strategies and interventions which include nutrition education, physical activity, training and technical assistance to SNAP-eligible seniors and senior congregate meal sites to improve their health and well-being.

7. Key Messages

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify):* Increase water consumption, decrease sugary beverages
X	Fats and Oils	X	Food Shopping/ Preparation	X	Other *(specify)*: Healthy Eating on a budget
X	Lean Meat & Beans				
	Sodium & Potassium				
	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2016** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

The curriculum, materials and resources chosen have been based on prior implementation success, support from schools, and feedback from participants as well as the needs of the populations being served. The chosen curricula, materials and resources are geared toward the targeted populations including Pre-K, elementary schools (K-8), and community participants. All curricula, materials and resources are SNAP-Ed approved.

9. **Intervention and Evaluation Plan Narrative Summary**

The FFY 17-19 work plan employs various strategies and interventions which will ultimately help to create sustainable policy, systems, and environmental changes in Glenn County. The Local Implementing Agency (LIA) partners will build upon current programs to coordinate nutrition education and physical activity promotion for SNAP-Ed eligible residents. Additionally, extenders will provide ongoing services at school sites to ensure sustainability of programming

The implementing agencies (UCCE, LHD, AAA and NVCSS) in Glenn County will collaborate to provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with partners throughout the county. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change using SNAP-Ed approved curriculum, resources and materials.

The LIAs will conduct activities at the individual and interpersonal level of the Social Ecological Model. The LHD, UCCE and NVCSS will also incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venues. The LHD and UCCE will address Training and Technical Assistance of their personnel or the community – and sharing training opportunities across agencies when possible. In addition, Community/Nutrition Education Direct and Community/Nutrition Education Indirect will be provided by all the LIAs. Media, Social Media, Public Relations and Messaging will be addressed by the LHD and UCCE. Coordination and Collaboration will be specifically addressed by all the LIA's.

In order to successfully complete the Work Plan Objectives, the LIAs will employ emerging- and practice-based interventions. All LIAs will also include research-based interventions. The objectives and activities for the integrated work plan were derived from results obtained via each agency's community assessments, in

addition to the data used in FFY15, as well as successes from FFY15-16. All the LIAs collaborated and coordinated to create the Work Plan so that objectives and activities will be done by the agency with the most experience and expertise in order to successfully complete the Work Plan Objectives.

FFY17-19 will build on activities/services accomplished by previous SNAP-Ed projects while also addressing unmet needs specifically in the early childhood and school settings. The LHD will collaborate with Glenn County First 5 and Glenn County Office of Education to deliver nutrition education services and promotions to preschool students and parents. The Integrated Work Plan will focus heavily on PSEs including healthy food and beverage standards, school wellness policies, recollecting CX^3 data (FFY18), and healthy retail. The LHD and UCCE will also collaborate on education to PreK-12 schools and AAA's target audience will be the senior population.

Over half of the population in these communities lives in poverty. Through strategic and intentional planning, our environmental change efforts will coordinate and complement our direct education efforts. We will focus on increasing access to healthy foods and increasing physical activity. Smarter Lunchrooms Movement strategies and school wellness policy language to include SLM elements and/or principles will be adopted at four school sites. A minimum of two edible school gardens will be built or enhanced. Additionally, garden education lessons will be provided to pre K-5th grade students. Playground stenciling projects will occur at four school sites to promote physical activity. Community events and/or resource fairs in qualifying neighborhoods will be used to promote healthy food and beverages, increased physical activity, and/or improved food security. This will occur through activities such as interactive booths, exhibits and/or displays. Media messages will be reinforced at the community events by SNAP-Ed funded staff among target audience attendees. The Healthy Retail program will continue efforts to help store owners promote the purchasing of fresh fruits and vegetable and other healthy options and in store marketing.

LHD

The Local Health Department (CSUC) will focus on pre-school and K-12 school site strategies including direct education in classrooms, indirect education events, school gardens, school wellness policies and environmental changes to increase awareness of and access to fruits and vegetables, increase physical activity and create sustainable practices. Training and technical assistance will be utilized at school sites with teachers, food service workers and administration. The Smarter Lunchroom Movement will be a strategy to create a wellness culture and train food service staff. CSUC will work with retailers and a food bank to promote healthier options and choices. Healthy Retail will be another strategy to create change in a neighborhood with a high SNAP-Ed population.

In addition to PSE work in the school setting, CSUC will continue to provide direct and indirect education to adults and families in the community utilizing approved curriculum that supports the delivery of nutrition, physical activity, and food resource education. CSUC will also continue to participate in community nutrition education and physical activity promotion events, including hosting a Fruit and Veggie Fest in a CX^3 neighborhood. Community education will focus on nutrition, garden, physical activity, and food resource management. The majority of direct and indirect education will include taste testing. Additionally, CSUC employs bilingual staff to provide direct education and indirect education outreach in Spanish to accommodate the high percentage of Hispanic residents (42.7%), especially in the Hamilton City area.

Curriculum and resources will include MyPlate; ReThink Your Drink; Get Cooking; SPARK; Color Me Healthy; EatPlayGrow; Grow it, Try it, Like it; Serving Up MyPlate: A Yummy Curriculum; Power Play; Power Up Your Summer; Shaping Up My Choices; Pick a Better Snack; and Growing Healthy Habits.

CSUC will continue to participate in and/or facilitate the CNAP work groups. The CNAPs will continue to work with funded and unfunded partners and community members to determine the needs and goals of the communities as well as share resources and create a collaborative environment for all partners. The CNAPs will continue to focus on increased consumption of healthy foods and beverages and increased physical activity among the SNAP-Ed eligible residents.

CX^3 data will be re-collected in FFY 18.

UCCE

UC CalFresh will utilize multiple delivery methods and intervention strategies to reach low-income elementary school students, their parents, and school educators and administrators. UC CalFresh will focus on direct education to eligible elementary school students utilizing approved curriculum. Education will be offered in multiple locations, but with the greatest intensity at schools in the priority neighborhoods. Staff will provide teacher training at school staff meetings and grade level meetings. Nutrition education resources will be available to teachers on a checkout basis. Additional meetings with teachers occur throughout the year or in conjunction with planning school-wide events focused on healthy living. UC staff will provide at least two lesson demonstrations to teachers within the school year to support comprehensive classroom nutrition education. In addition to lesson demonstrations, school based programming will extend from classroom nutrition education into school food service programs (Smarter Lunchrooms), school gardens, and wellness committee work. Parent Teacher Association or Organizations (PTA/Os) will be targeted for recruitment of adults and families for series based nutrition education. End of the year school wide nutrition events will occur at school sites to emphasize the connection between nutrition and physical activity and to practice goal setting for positive health behaviors. UC CalFresh will also provide series based direct education to SNAP-Ed eligible adults and parents utilizing Making Every Dollar Count; helping families stretch their foods dollars and make better financial decisions.

School-based programming will extend beyond the classroom in an effort to change the school environment. UC CalFresh educators will work collaboratively with the School Food Service at one elementary school to make environmental changes to school lunchrooms using Smarter Lunchrooms principals. Additionally, UC CalFresh will continue to work towards supporting and expanding a school garden at two elementary school site to support environmental changes made, UC CalFresh will assist in the development of two school wellness policies and continue to support the efforts of Parent Teacher Organizations to change school environments. Family-centered approaches will be used to help students achieve a healthy lifestyle through role modeling; engaging children in food preparation; changing current eating and shopping habits. Eat and Play Together curricula activities including goal setting will be implemented for family centered nutrition education. Environmental change efforts will coordinate and complement our direct education efforts. We will focus on increasing access to healthy foods and increasing physical activity. SLM strategies and school wellness policy language to include SLM elements and/or principles will be adopted at

four school sites. A minimum of two edible school gardens will be built or enhanced. Additionally, garden education lessons will be provided to pre K-5th grade students. Playground stenciling projects will occur at four school sites to promote physical activity.

Results from previous Youth Taste Testing Tool evaluation data will inform approaches about foods that will be offered for taste tests in FFY16.

AAA

The AAA implementing agency in Glenn County is the Center for Healthy Communities ("CHC," AAA PSA3-LIA). In an effort to reach low-income seniors, the AAA's intervention plan progresses at the environmental level of the Social Ecological Model (SEM) through the inclusion of policy, systems, and environmental (PSE) change efforts compared to previous years. Utilizing site assessment data collected in FFY 2015 and 2016, it was determined that environmental changes to the physical dining space at the eligible congregate meal sites would be a desirable strategy. Thus, a Nutrition and Physical Activity Center (NPAC) toolkit will be developed and displayed as an environmental support to SNAP-Ed eligible congregate meal participants in an effort to increase: consumption of healthy foods and beverages; awareness of food safety practices; and physical activity opportunities among seniors at eligible congregate meal sites. The NPAC toolkit will feature the four lessons of Eat Smart, Live Strong on display, rotating one per quarter along with additional SNAP-Ed approved resources and messages. In FFY 2017, direct education will be provided by the LHD (in coordination with AAA identified topics) and will promote SNAP-Ed key messages community wide. The congregate site staff will be given the NPAC toolkit elements and supported with additional training and ongoing technical assistance related to the curriculum and to the use the NPAC toolkit. Outcomes of the NPAC toolkit will be evaluated using the pre and post survey Food Behavior Checklist (FBC) and Rapid Assessment of Physical Activity (RAPA).

In addition to the NPAC support, the congregate site staff will receive training and technical assistance regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to SNAP-Ed seniors. Training the staff will leverage resources, build program sustainability, and enhance the program's overall capacity to encourage and support healthful behaviors among the senior population. In partnership with the CalFresh office, local churches and clinics, and other community-based organizations that serve the seniors, promotional resources will be distributed to encourage participation in the congregate meal program. To increase access to healthy food and beverages to seniors at Glenn County, monthly flyers will be developed. It will contain information about senior meals, its monthly menu and other local food resources. The flyers will be distributed along with USDA approved materials. It will be distributed at the CalFresh office, churches and clinics, and other community partners that serve the SNAP-Ed eligible seniors. This will be complimented by the intervention of other LIA's to provide food resource management and nutrition education at retail stores, emergency food distribution sites, and farmer's market.

CHC will continue to collaborate with Glenn LIA's to provide an evidenced-based direct nutrition/physical activity education program to the senior congregate meal site. CHC will also continue to coordinate with local SNAP-Ed LIAs to create a complete and collaborative county work plan.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process, and outcome evaluation activities using state and locally developed surveys. The actual number of SNAP-Ed eligible individuals reached through direct education and indirect education will be documented in ATF and EARS.

NVCSS

NVCSS's PSE strategy will be working with faith based organizations to develop Healthy Food and Beverage standards to guide their food donors. The primary goal of the PSE is to increase the nutritional value of the foods donated and distributed. This will be complemented with the intervention strategies listed below.

NVCSS will conduct healthy nutrition presentations using evidence-based curricula/materials to low-income populations at churches, libraries and a school. throughout Glenn County. Presentations will include lessons and healthy snack demonstrations and physical activity handouts/logs covering the following possible education topics: healthy eating, healthy drinks, and physical activity. These presentations will be 30 minutes to one hour in length and will be conducted once per month at each location.

Community Indirect Education: NVCSS Glenn will provide nutrition and physical activity education information at community fairs, events and booths to underserved and diverse populations. Possible education topics include healthy eating, grocery shopping, meal planning, healthy drinks and physical activity. Five events will be targeted throughout the year.

Train the Trainer (TTT): NVCSS Glenn will adopt and implement the TTT at a local community / faith based organization that specializes in providing the community with hot meals or is a registered food pantry / bank restructuring and improving their current food distribution system. All curriculum and guidelines will be utilized using My Plate to each Director, Manager, and Worker while all staff who works directly with the general public in providing meals and or food to the community will be provided with the tools, tips and resources in order to ultimately provide healthier more nutritious meals as well as teaching their clientele in how they can prepare and make healthier meals with the food they are provided on a weekly basis.

Evaluation

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The plan includes formative, process, and outcome evaluation activities using state and locally developed surveys.

Process Evaluation reports will document the range of SNAP-Ed services provided in Glenn County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated) and indirect education (duplicated) will be documented in the ATF/EARS and compared to original reach targets.

Outcome Evaluation will be implemented to document and assess the impact of the LHD Cooking Matters series on the participants' individual behavioral changes and dietary practices. AAA and other LIAs may use the Food Behavior Checklist (FBC) and Rapid Assessment of Physical Activity (RAPA) to measure these changes. The evaluation survey addresses, but is not limited to, the following indicators from Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes [MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3), and Fruit and Vegetable (LT2)].

UCCE will be working with the UC CalFresh state office to appropriately align evaluation tools and results to the Western Regions SNAP Ed evaluation framework.

UC CalFresh will utilize the Teacher Tasting Tool (TTT) in the evaluation to gather data on food-tasting behaviors. It will be used in the classroom during nutrition education lessons when students receive their tastings. The tool will evaluate the students' previous exposure to the target food and their willingness to try the food again.

UC CalFresh will utilize the Adult Tasting Tool (A/TTT) in the evaluation to gather data on food-tasting behaviors. It will be used during nutrition education lessons when adults receive their tastings. The tool will evaluate the adults' previous exposure to the target food and willingness to try the food again.

The LIAs will use a series of process evaluation protocols, and fidelity measures will be used to assess the technical training and assistance provided. The effectiveness of training on nutrition and physical activity will be measured. The evaluation results will be used to revise and improve future trainings.

All LHD PSE projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation and Maintenance (RE-AIM). The RE-AIM indicators will be evaluated on an annual basis, to provide information useful in improving future strategies with potential enhancements for greater impact. Other LIAs may also utilize the RE-AIM reporting as appropriate.

Glenn County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	50.6		0 to 4 years old (Preschool):	1,421
Female	49.4		5 to 17 years old (School Age):	2,336
			18 to 59 years old (Adult):	6,103
			60 years old and over (Senior):	1,271
Total:	100			

3. Ethnicity/Race

Ethnicity

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity
42.7%	57.3%	100%

RACE	Hispanic/Latino	Not Hispanic/Latino
Black or African American	.10%	.48%
Asian	0%	1.39%
American Indian/Alaskan Native	.69%	1.52%
Native Hawaiian/Other Pacific Islander	0%	.01%
White	29.2%	46.63%
Multiple/Other	12.8%	7.28%
Total:	42.7%	57.3%

4. Languages Used in Intervention Activities and Materials

English	75%	Farsi	0%	Russian	0%
Spanish	25%	Hmong	0%	Tagalog	0%

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, five schools and ECE sites will develop and/or revise school wellness policies and change environments that support healthy eating and promote physical activity among students, families and school staff.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

1. **Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment.**
2. **Implement SLM strategies**
3. **Increase access to healthy eating and physical activity.**
4. **Provide environmental strategies to promote physical activity.**

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30th, 2017, SNAP-Ed funded and unfunded partners will form school wellness committees at two school sites to assess, develop and/or update school wellness policies and improve school environments to support healthy eating and promote physical activity.
    b. By September 30th, 2017, LIA staff will work with partners to adopt Smarter Lunchrooms Movement (SLM) strategies and school level wellness policy language to include SLM elements and/or principles at two school sites.
    c. By September 30th, 2017, LIA staff will provide nutrition education and physical activity focused staff training activities for teachers, food service providers and other staff who interact with young children in the ECE and/or school settings at a minimum of one site.

d. By September 30th, 2017, LIA staff and trained educators will provide direct nutrition education to 1,800 students and 40 parents, and indirect education to 350 students and 1,000 parents
e. By September 30th, 2017, LIA staff, unfunded partners and school personnel will build, enhance, or update a garden at one school site and provide garden education lessons to K-5 students.
f. By September 30th, 2017, LIA staff and school personnel will enhance school playground through stenciling projects in a minimum of two school sites.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30th, 2018, Snap-Ed funded and unfunded partners will form one additional school wellness committees to develop and/or update school wellness policies and improve the school environment to support healthy eating and promote physical activity.
   b. By September 30th, 2018, LIA staff will work with partners to adopt SLM strategies and school level wellness policy language to include SLM elements and/or principles at one additional school site.
   c. By September 30th, 2018, LIA staff will provide nutrition education and physical activity focused staff training activities for teachers, food service providers and other staff who interact with young children in the ECE and/or school settings at a minimum of one additional site.
   d. By September 30th, 2018, LIA staff and trained educators will provide direct nutrition education to 1,800 students and 25 parents, and indirect education to 350 students and 1,000 parents.
   e. By September 30th, 2018, LIA staff, unfunded partners and school personnel will build, enhance, or maintain a garden at one additional school site and provide garden education lessons to PreK-5 students.
   f. By September 30th, 2018, LIA staff and school personnel will enhance school playground through stenciling projects in a minimum of two schools.
   g. By September 30th, 2018, LIA staff will conduct reassessment CX^3 data collection in Glenn County.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30th, 2019, SNAP-Ed funded and unfunded partners will form one additional school wellness committee to develop and/or update school wellness policies and improve the school environment to support healthy eating and promote physical activity.
   b. By September 30th, 2019, LIA staff with work with partners to adopt SLM strategies and school level wellness policy language to include SLM elements and/or principles at one additional school site with a total of four school sites.
   c. By September 30th, 2019, CATCH/SPARK will be implemented by LIA educators and 15 trained extenders such as classroom teachers, afterschool staff, and PE specialists at a minimum of three sites

d. By September 30th, 2019, LIA staff and trained educators will provide direct nutrition education to 1,800 students and 25 parents, and indirect education to 350 students and 1,000 parents.
e. By September 30th, 2019, LIA staff and school personnel will maintain two school gardens and provide garden education to at least 100 Prek-5 students.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, funded and unfunded community partners will increase awareness of and access to healthy fruits and vegetables, healthy beverages, and physical activity resources at six food pantries, retail sites, senior centers, faith-based organizations, and/or community settings through education and policy changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

1. Establish healthy food and beverage standards at food banks, senior centers, and faith-based organizations.
2. Encourage food banks to create programs that bring local produce into the distribution system.
3. Provide Healthy Retail strategies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30th, 2017, establish and build relationships with two food banks and provide training and technical assistance to one food bank to increase awareness of and access to healthy foods and beverages and improve the quality of foods being distributed.
    b. By September 30th, 2017, work with at least one qualifying retail market or food truck to make improvements to encourage increased sales of healthy foods.
    c. By September 30th, 2017, provide direct education at a minimum of five community sites to increase awareness of and access to local healthy fruits and vegetables to reach 100 SNAP-Ed eligible residents.
    d. By September 30th, 2017, provide indirect education and/or signature events at a minimum of four community sites to reach 2,000 SNAP-Ed eligible residents.
    e. By September 20, 2017, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30th, 2018, maintain relationships with two food banks and provide training and technical assistance to one food bank to increase awareness of and access to healthy foods and beverages and improve the quality of foods being distributed.
    b. By September 30th, 2018, work with at least one qualifying retail market or food truck to make improvements to encourage increased sales of healthy foods.
    c. By September 30th, 2018, provide direct education at a minimum of five community sites to increase awareness of and access to local healthy fruits and vegetables to reach 100 SNAP-Ed eligible residents.
    d. By September 30th, 2018, provide indirect education and/or signature events at a minimum of four community sites to reach 2,000 SNAP-Ed eligible residents.
    e. By September 30th, 2018, LIA staff will re-collect CX^3 data in three neighborhoods in Glenn County.
    f. By September 20, 2018, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30th, 2019, maintain relationships with two food banks to increase awareness of and access to healthy foods and beverages and improve the quality of foods being distributed.
   b. By September 30th, 2019, work with at least one qualifying retail market or food truck to make improvements to encourage increased sales of healthy foods.
   c. By September 30th, 2019, provide direct education at a minimum of five community sites to increase awareness of and access to local healthy fruits and vegetables to reach 100 SNAP-Ed eligible residents.
   d. By September 30th, 2019, provide indirect education and/or signature events at a minimum of four community sites to reach 2,000 SNAP-Ed eligible residents.
   e. By September 20, 2019, increase senior's access to healthy food and beverage by increasing enrollment in senior meal sites by 5%.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	The CNAP team (CPHL or similar) will meet a minimum of four times to share resources, coordinate efforts, share successes and challenges, and support partner efforts. Humboldt County

SECTION A: OVERVIEW

1. SNAP-Ed Implementing Agency Names

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
x	**California Department of Public Health: CDPH: Humboldt County Department of Health and Human Services (DHHS)**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

Located in northwest California, Humboldt County is one of the largest counties in the state. The county is approximately 300 miles north of San Francisco, and encompasses 2.3 million acres, 80 percent of which is forestland, protected redwoods and recreation areas. Humboldt is a rural county with roughly 33 people per square mile. Nearly half of the county's residents live in incorporated communities, and 59 percent of the people live in the area surrounding Humboldt Bay. The county has a population of approximately 134,625. Approximately 12% of its population is of Hispanic or Latino origin, with the remaining population identifying themselves as African American (1.4%), Asian (2.4%), American Indian/Alaskan Native (6.8%), Native Hawaiian/Other Pacific Islander (0.3%), multiracial or another race (4.5%), and White (non-Hispanic 72.3%), with the remaining 0.3% identified as unknown origin.

According to the SNAP-Ed County Profile of 2015, the 20,875 CalFresh participants represent 16% of Humboldt County's total population. Over 39% of the total population is SNAP-Ed eligible. Just under 19% of Humboldt County residents are food insecure with almost 27% being children. Preschool age children comprise the largest percentage of SNAP-Ed eligible participants at 52.8%, followed by adults (40.6%), school age children (39.8%) and older adults (27.4%). Of the 91 schools in Humboldt County, 58 (63.8%) are SNAP-Ed eligible (≥50% FRPM Enrollment, 2015). Fifty-five percent of children are eligible for free lunch.

There are 30 census tracts in Humboldt County, with seven qualifying for SNAP-Ed services based on the 2010-14 all races American Community Survey (ACS) data. Eureka makes up the county's largest population center, with approximately 33% of the population. Eureka also has the largest number of SNAP-Ed eligible residents. According to the November 2015 "Humboldt County DHHS—Health & Nutrition Services Quarterly Report for CalFresh Participant Distribution", Eureka comprises 42% of the county's total active CalFresh households. This makes Eureka a good choice for Local Health Department (LHD) intervention activities. One of the two qualifying census tracts in Eureka has been part of the Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessment efforts. There are a number of means-tested sites in Eureka eligible for SNAP-Ed services including a Federally Qualified Health Center with a community garden, approximately four emergency food outlets, two public housing units, one senior housing unit, a Women, Infants and Children (WIC) clinic, two Family Resource Centers, one senior congregate meal site, one soup kitchen, five temporary housing/shelters, a weatherization program through the Redwood Community Action Agency, and two Head Start sites. There are four residential adult rehabilitation centers and three outpatient rehab centers in Eureka. A large number of fast food chains and independent liquor retail markets contribute to 6.6% of the low income population having limited access to healthy food compared to the State average at 3%. Because of the county's rurality, transportation is the biggest challenge to accessing healthy food outlets.

According to Humboldt County's 2015 SNAP-Ed County Profile, 63% of SNAP-Ed adults are overweight or obese. According to KidsData.org, 2015 FitnessGram data indicate 42% of Humboldt 5th graders, 41.6 % of 7th graders, and 39% of 9th graders are overweight or obese. This is slightly higher than the California data indicating 40% of 5th graders, 38.5% of 7th graders and 36% of 9th graders are overweight or obese. SNAP-Ed County Profile data indicates 15% of adults age 20 and over report no leisure time physical activity. Fewer than 19% of children and teens report at least one hour of activity every day. Almost 56% of SNAP-Ed adults consume one or more fast food meals per week and 43% drink sugar- sweetened beverages one time or more per week.

4. Community Assessment

The FFY 17-19 Integrated Work Plan was developed using information from the 2015 SNAP-Ed County Profiles, Robert Wood Johnson Foundation's County Snapshots, community assessment results, various reports, and input from community partners.

Humboldt County's Community Health Assessment (CHA) was completed in 2013 by Humboldt County Department of Health and Human Services (DHHS). It provides a comprehensive overview of the health of its residents. In addition to the traditional public health measures of illness, death rates, and access to care, this report includes information on economic vitality, nutrition and physical activity, and other underlying social determinants of health. The CHA shows there are marked health disparities in Humboldt County. Those who are poor or have a serious mental illness statistically have significantly shorter lives (Humboldt County Department of Health and Human Services, *Community Health Assessment,* 2013, page 15). Cardiovascular disease is the number two cause of death for those ages 45-64 and number 5 for those ages 25-45. The importance of adopting healthy eating and active living for all residents are important factors in improving overall health in the county.

According to the CHA, Humboldt County has high rates of substance abuse which contributes significantly to the county's poor overall health outcomes. The impact of substance abuse affects the entire community and burdens our local health care system with drug-related hospitalizations and emergency room visits. Several factors may contribute to the problem: Isolation can prevent forming supportive relationships; geographic distance hinders access to basic services, and a community tolerance of heavy drinking and drug use creates an environment where dependence is tolerated.

There are several residential and outpatient adult treatment programs in the area, especially concentrated in Eureka's qualifying neighborhoods. Many have received partnership contracts from our county DHHS-Social Service Branch to conduct CalFresh outreach and improve their resident's health and food access. This began a relationship where LHD staff provided nutrition education to residents and strengthened ties to county services. Facility residents are making positive changes in their lives and are interested in healthy eating and physical activity to support their sobriety. According to pre/post-test evaluations, the interventions to-date has shown statistically significant improvements in healthy eating and food resource management. This was a factor in selecting Adult Rehabilitation Centers as a priority in our FFY 2017-19 IWP. Additionally, several of these Adult Rehab Centers are located in areas with few healthy food options but the corner food market or Dollar Tree. The LHD has plans to approach these retailers to consider healthy changes.

In 2014, Humboldt County DHHS released its Community Health Improvement Plan 2014-2019 (CHIP) with the purpose of identifying how to strategically address community priority areas to improve the health and well-being of Humboldt County residents. In the development of this plan, DHHS Public Health, DHHS Mental Health, St Joseph Health – Humboldt County, 30 partner organizations, and over 300 community partners vetted the eight leading causes of premature death identified in the CHA to determine the root causes of these poor outcomes and develop a plan of improvement. The CHIP can be found at http://humboldtgov.org/DocumentCenter/View/28999. The CHIP identified the lack of access to healthy foods as an important factor for two of six major

priorities. These two priorities include "Increase access to quality health and preventative care," and "Increase affordability, availability and knowledge of healthy foods."

Other sources referenced include the Humboldt County Community Food Assessment produced by the California Center for Rural Policy (CCRP) at Humboldt State University. It identified increasing the number of and geographic distribution of healthy food stores among top priorities for improving community health in Humboldt County. The draft Planning Issues and Opportunities Report produced for the Eureka General Plan Update identified the high incidence of tattoo parlors, pawn shops, liquor and cigarette stores and conversely the lack of neighborhood grocery stores.

Our 2011 CX^3 analysis in three low-income communities showed the total Neighborhood Food Store Quality ratings were low (range 25% - 33%) and the percent of fast food restaurants meeting standards were also low (range 0%- 17%). None had supermarkets or large grocery stores with convenient public transit. State and local data from the Healthy Stores for a Healthy Community Survey was also used to shape our work plan.

5. Community Change Goals

We worked with our larger community partnership in the process of developing our County Health Improvement Plan (CHIP) to determine community change goals (that relate to this SNAP-Ed work plan). They include improving the affordability, availability and knowledge of healthy foods within the larger community with a focus on partnerships, schools, and the health care system.

These areas of need are essential to increasing the health of Humboldt County. Overall community goals for each area include the following:

Priority 1: Strengthen social and family cohesion

Priority 2: Shift social norms around alcohol and other drug use

Priority 3: Increase access to quality health care and preventive care

Priority 4: Increase access to and use of diverse mental health options

Priority 5: Ensure safe neighborhoods for residents, pedestrians, and bicyclists

- Goal 1: Increase options for active modes of transportation
- Goal 2: Increase safety in neighborhoods experiencing high collision rates (all modes)

Priority 6: Improve affordability, availability, and knowledge of healthy foods

- Goal 1: Increase Access to Affordable Nutritious Food
  - i. Develop Plans and partnerships to identify and address produce desserts
  - ii. Increase coordination and collaboration across the food system spectrum

Goal 2: Increase Understanding of what healthy eating means

i. Increase provider (clinician, school meal providers) knowledge and ability to encourage and support healthy eating
ii. Increase the number of physician and clinic offices using the Food RX prescription tool
iii. Increase school meal quality and use by students

The LHD will support long term community change goals in the county by working with community partners to identify strategic partners and convene community-wide, multi-sector coalitions to improve nutrition and physical activity. The LHD will work to create an environment that makes healthy food and beverage options the easy choice by improving availability and accessibility and the demand for healthy foods and beverages. We will work to improve opportunities for physical activity and enhance the physical and built environment around the targeted sites where the SNAP-Ed population can be found. We will provide evidence-based education with a focus on behavior change. Along with our partners, we will build capacity and engagement at Eureka school sites for comprehensive nutrition and physical activity programs that help strengthen school wellness policies through nutrition education, increased access to physical activity as well as improvements to the school environments and practices. The LHD will work to educate community/partners about policy/legislative changes that would improve retail environment with zoning ordinances affecting food availability. We will work with partners to attract and create an environment conducive to new healthy retail venues such as healthy mobile markets, produce sold in stores, and farm stands. We will research the value and feasibility of retailer incentives and recognition programs for those who offer healthier food options.

Specifically, Humboldt County SNAP-Ed LHD will achieve the following three-year objectives:

1. By September 30, 2019, increase access to, and demand for, healthy foods and beverages at two to four SNAP-Ed qualifying adult rehabilitation/public or temporary housing facilities and two to four county agencies/community organizations through adopted and implemented policy and physical site changes.

2. By September 30, 2019, four low resource schools with 50% or higher free and reduced school lunch eligibility will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

3. By September 2019, increase availability of healthy foods through adoption and implementation of Healthy Retail/Mobile Vendor policies that incentivize the provision of healthy foods in retail settings and/or mobile vending services in qualifying neighborhoods in the City of Eureka.

These objectives allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus on the following Policy Systems and Environmental (PSE) strategies:

- Healthy Food & Beverage Standards
  - Develop and implement written site wellness policies and procedures to improve the nutrition and physical activity environment
  - Encourage compliance with federal menu labeling regulations
- Healthy Eating
  - School Wellness Policies
  - Local procurement/Farm to School
- Healthy Food & Beverage Standards
  - Healthy Food Zones
  - Stocking standards
  - Corner store market conversions
  - Healthy food and beverage policies/ stocking standards
  - Healthy in-store marketing and promotions

The PSE strategies are detailed within each three-year objective and speak to the connection to the community change goals.

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

Humboldt County's CNAP was implemented over 10 years ago and meets a minimum of four times a year, with the overall goal to increase fruit and vegetable consumption and physical activity through consistent messaging, strengthening local food awareness, and promoting participation in programs in Humboldt County. The coalition seeks to create resources that promote USDA food program participation through referral and coordination with LHD staff. There is strong commitment to plan and participate in collaborative events.

Humboldt County's Health Improvement Plan (CHIP) identified CNAP as an important partner to help achieve improvements in the affordability, availability and knowledge of healthy foods by increasing coordination and collaboration across the food system. CNAP is poised to move from a focus on coordination and collaboration to environmental changes that promote healthy eating and physical activity as the easy choices. Humboldt County's NEOP program can be a catalyst for work in policy, system, and environmental change. The LHD partners support efforts to make environmental changes that promote safe access to schools, healthy school meals, healthy options at retail locations, and supportive senior and public housing.

The Humboldt Food Policy Council (HFPC) works to enhance a regional food system that is equitable, culturally appropriate, and both environmentally and economically sustainable, and does so by facilitating collaborative partnership of diverse stakeholders throughout the food system. The HFPC existed for over ten years and has focused on networking, education, outreach, and policy issues, with its work tied into the CHIP. HFPC's recent notable successes include a Food Summit in 2016 with approximately 400 attendees, endorsement of the California Food Policy Council's annual Legislative Report, and support of the Food Desert subcommittee which informs and educates about how food deserts affect a large segment of CalFresh eligible residents in rural Humboldt County.

The HFPC has two specific focus areas that naturally align with NEOP's work. This work includes: access to healthy, affordable, and high quality food; and assurance that residents have the opportunity to gain knowledge and accurate information on how to acquire or produce, prepare, cook and preserve healthy food. The HFPC is part of a larger network of agency partnerships and collaborative projects that are working together in Humboldt County to create an environment of healthy eating and physical activity for all its residents, including CalFresh eligible families and individuals.

We will be working with our tobacco and alcohol prevention colleagues on our combined healthy retail strategies. In addition, our LHD has a strong Safe Routes to School program. We leverage this relationship and partner with local bike and pedestrian safety advocates and the Redwood Community Action Agency. We support efforts to make environmental changes that promote safe access to schools, retails locations, senior and public housing.

The Humboldt County DHHS—Social Services Branch funds local community based organizations to do CalFresh outreach. This has been successful in decreasing bureaucratic barriers to accessing CalFresh and other services. It also allows outreach to occur within agencies that best know how to access and serve their participants. Some CalFresh outreach funds can go towards the purchase of food as part of outreach efforts. The Humboldt LHD supports these funded agencies with nutrition and physical activity education, resources, and model practices as able as well as through the promotion of SNAP-Ed services and activities. One area for future development is a food purchasing and menu guidelines policy to be included in the funding of CalFresh Outreach projects.

7. Key Messages

x	Food Safety	x	Physical Activity	x	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

x	Fats and Oils	x	Food Shopping/ Preparation		Other:
x	Lean Meat & Beans				
x	Sodium & Potassium				
x	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All educational materials, resources, and curriculum chosen will be from the approved USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Humboldt County reviewed the approved integrated curriculum list provided by the state agencies, and reviewed each different piece to determine the best option for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population, as well as our chosen SNAP-Ed three-year and annual objectives. The specifics on the chosen curriculum, materials and resources that will be used for SNAP-Ed program interventions can be found within Section C of this IWP.

9. Intervention and Evaluation Plan Narrative Summary

The implementing agencies in Humboldt County will conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites, reaching a targeted segment of the SNAP-Ed eligible population at multiple levels. They will be assisted by subcontractors and community partners who will support these efforts. The intervention plan includes activities that provide comprehensive education on proper nutrition and physical activity. Its approach is to utilize: high strength intervention strategies, nutrition education and physical activity (PA) focused direct delivery, staff training and coordinated implementation strategies. These strategies include a plan for direct care and education providers, food service providers, and other staff that interface with and impact children and adults in multiple settings.

Building upon relationships with elementary schools, adult rehabilitation centers, public/temporary housing facilities, community based organizations, and fellow Humboldt County DHHS programs (Women, Infants and Children [WIC], Mental Health, Social Services), as the sole SNAP-Ed Local Implementing Agency (LIA) in Humboldt County, Humboldt County LHD LIA will continue to provide direct nutrition education and physical activity promotion. LIA will also train and support teachers as extenders to provide direct education in the classrooms and train staff at these sites to provide direct education at their facilities. Additionally, nutrition education will be provided to the adult SNAP-Ed population connecting shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines. The educational focus will be: selecting target foods and beverages; increasing the skills for label reading, menu planning and food budgeting; increasing knowledge of MyPlate recommendations and exposure to and acceptance of new healthy foods.

The intervention plan progresses to interventions at the environmental level of the Social Ecological Model (SEM) via the inclusion of policy, systems and environmental (PSE) change efforts that include better food and beverage purchasing policies promoting access to healthy foods, beverages and physical activity. Healthy nutrition and physical activity policies and procedures will be implemented in the treatment and housing facilities which will include (but are not limited to) healthy purchasing standards for all foods and beverage offered on site, opportunities for physical activity, garden-based education, and marketing

guidelines for materials posted and shared on site. PSE efforts will also be focused on improving retail sites near these facilities with healthy prompts and signage, product placement strategies, and smart snacking.

At the sector level of the SEM, LIA will identify strategic partners and community-wide, multi-sector coalitions that will be convened to improve nutrition and physical activity; conduct a community health needs assessment; and implement approaches unique to the needs of Humboldt County. Smarter Lunchrooms Movement (SLM) principles that improve the school lunchroom will also be executed and evaluated. Community partners will be educated about policy/legislative changes and the retail environment and support efforts in establishing zoning ordinances that promote healthy foods and beverages.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes process and outcome evaluation activities using State and locally developed surveys. Past evaluation efforts have been exceedingly helpful in informing the program and these strong efforts will continue. Education and Administration Reporting System (EARS) and Semi Annual Activity Report results will be generated from the online Activity Tracking Form (ATF). Separate tracking of direct education taught by LIA staff and site staff trained by LIA, such as teachers, will continue in an effort to better monitor effectiveness. Participants will be requested to complete evaluation surveys that address, but are not limited to, the following indicators from the Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3) and Fruit and Vegetables (LT2) Physical Activity Recommended Labels (LT7). At the environmental level, LIAs will also report as appropriate on the following SNAP-Ed Evaluation Framework priority indicators – Identification of Opportunities (ST4), Partnerships (ST6), Nutrition Supports Adopted (MT4) and Physical Activity Supports Adopted (MT5).

All LHD PSE projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). The locally developed PSE tracking forms have made it consistently easier to monitor PSE site efforts and complete the RE-AIM Access database. Reports generated from the database will be used to track, inform and improve continued PSE program efforts in Humboldt County as well.

SECTION B: Target Audience Description

1. GENDER

Gender	%
Male	50.2%
Female	49.8%
Total:	**100%**

2. AGE

Age	#
0 to 4 years old (Preschool):	7,464
5 to 17 years old (School Age):	19,250
18 to 59 years old (Adult):	80,731
60 years old and over (Senior):	27,168
Total:	**134,613**

3. ETHNICITY/RACE

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity
12%	**88%**	**100%**

Race	Hispanic/Latino	Not Hispanic/Latino
Black or African American	0%	1.4%
Asian	0%	2.4%
American Indian/Alaskan Native	0%	6.8%
Native Hawaiian/Other Pacific Islander	0%	0.3%
White	12%	72.3%
Multiple/Other	0%	4.8%
Total:	**12%**	**88%**

4. Languages Used in Intervention Activities and Materials

English	**95%**	Farsi	0%	Russian	0%
Spanish	**5%**	Hmong	0%	Tagalog	0%
Arabic	0%	Khmer (Cambodian)	0%	Vietnamese	0%
Armenian	0%	Korean	0%	Other:	0%
Bosnian	0%	Lao	0%	Other:	0%
Cantonese	0%	Mandarin	0%	**Total:**	**100%**

5. Projected Number of Low-Income Persons Reached

	FFY 17	FFY 18	FFY 19
Direct Education (estimated unduplicated):	1,200	1,150	1,150
Indirect Education:	1,010,150	1,009,750	1,009,600
Policies, Systems, and Environment (PSE) Change/Supports	3,000	4,750	15,250

Note: Direct Education numbers were derived at by considering the current NEOPB guidance to limit geographic area. Also considered was the reduction in funding in Year 1 and further reduction in funding Years 2 & 3. The direct education numbers are only a part of the work we intend to complete. The indirect education and PSE work will reach an even greater portion of the SNAP-Ed target population. Overall we have placed a larger emphasis on our PSE work as it was felt the emphasis on PSE and indirect reach follows the new NEOP guidance on creating greater systemic change.

6. Intervention Sites

Site Setting	#	Site Setting	#	Site Setting	#
Adult Education and Job Training Sites	0	Food Assistance Site: Food Pantries	1	Schools: Students (Middle/Junior High)	0

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to, and demand for, healthy foods and beverages at two to four SNAP-Ed qualifying adult rehabilitation/public or temporary housing facilities and two to four county agencies/community organizations through adopted and implemented policy and physical site changes

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Food & Beverage Standards
  - Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment
  - Encourage compliance with federal menu labeling regulations

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, provide approved SNAP-Ed nutrition education and physical activity materials, resources and/or curriculum to residents in 1-2 adult rehabilitation centers/public/temporary housing facilities, and to 1-2 county agency/community sites.

b. By September 30, 2017, provide 2-4 trainings and TA to staff of 1-2 of adult rehabilitation centers/public/temporary housing facilities to improve menus, better manage food resources, and integrate physical activity.

c. By September 30, 2017, at least 1-2 adult rehabilitation center/public/temporary housing facility will develop and/or implement healthy site changes and policies to improve menu offerings, food resource management and access to healthy fruits, vegetables and beverages, and physical activity opportunities.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, provide approved SNAP-Ed nutrition education and physical activity materials, resources and/or curriculum to residents in 1 additional adult rehabilitation center/public/temporary housing facility and to 1 additional County agency/community site, while also maintaining support to intervention sites from FFY 2017.

b. By September 30, 2018, 1 additional adult rehabilitation center/public/temporary housing facility will develop and/or implement healthy site changes to improve menu offerings, food resource management and access to healthy fruits, vegetables and beverages, and physical activity opportunities.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, provide approved SNAP-Ed nutrition education and physical activity materials, resources and/or curriculum to residents in 1 additional adult rehabilitation center/public housing/temporary housing facility and to 1 additional County/community site, while also maintaining support to intervention sites from FFY 2017 and FFY 2018.

b. By September 30, 2019, 1 additional adult rehabilitation center/public/temporary housing facility will develop and/or implement healthy site changes to improve menu offerings, food resource management and access to healthy fruits, vegetables and beverages, and physical activity opportunities.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Humboldt County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to, and demand for, healthy foods and beverages at two to four SNAP-Ed qualifying adult rehabilitation/public or temporary housing facilities and two to four county agencies/community organizations through adopted and implemented policy and physical site changes

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Educators will provide culturally appropriate single or series-based direct education at 2-4 SNAP-Ed approved adult rehabilitation centers/public/ temporary housing facilities. • Year 1, provide direct nutrition education using SNAP-Ed approved curricula through direct delivery to a minimum of 200 unduplicated SNAP-Ed adult participants at approved housing sites. • In Year 2, provide direct nutrition education using approved curricula through direct delivery to minimum of 140 unduplicated SNAP-Ed adult participants at approved housing sites. • In Year 3, provide direct nutrition education using approved curricula through direct delivery to minimum of 140 unduplicated SNAP-Ed adult participants at approved housing sites.	x CED CEI MPR C&C TTA	CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	Sign in sheets; materials distributed; presentations if used, ATF

1.2	Provide trainings on SNAP-Ed approved curricula and ongoing support to staff at SNAP-Ed qualifying adult rehabilitation centers/public/temporary housing facilities and county agencies/community organizations: 1-2 sites in Year 1 (approx 30 indiv.) ; 1-3 sites in Year 2 (approx. 25 indiv.) ; and 2-3 sites in Year 3 (appox 25 indiv.)	x CED CEI MPR C&C x TTA	x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	Sign in sheets; materials distributed; presentations if used; ATF
1.3	Provide site wellness policy training and technical assistance and ongoing support to aid adult rehabilitation centers, public/temporary housing facilities and/or county agencies/community organizations to identify, implement and/or adopt site changes and/or policies for their facility such as: • Healthy menu guidelines • Improved access to fruits and vegetables • Increased access to water and decreased availability to unhealthy beverages • Installation of edible garden • Increased physical activity opportunities 1-2 sites In Year 1; 1 additional site in Year 2; 1 additional site in Year 3, and provide ongoing support to all through year 3. SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, four low resource schools with 50% or higher free and reduced school lunch eligibility will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Eating
  - School Wellness Policies
  - Local procurement/Farm to School

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, at 4 low resource school sites, LIA educators and 75 trained extenders (classroom teachers) will reach 535 elementary students with direct education, 1250 students with indirect education, and 1500 parents with indirect education, and LIA staff will work with partners including school food service staff/school wellness committees to improve school wellness policies.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, at 4 low resource school sites, LIA educators and 60 trained extenders (classroom teachers) will reach 1550 elementary students and their parents with indirect education, and LIA staff will work with school food service partners/school wellness committee to improve the school environment at one additional school site by increasing local procurement and adoption of school wellness policies while also maintaining support as needed to intervention sites from FFY 2017.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, at 4 low resource school sites, LIA educators and 45 trained extenders (classroom teachers) will reach 1100 elementary students and their parents with indirect education.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, four low resource schools with 50% or higher free and reduced school lunch eligibility will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Develop and distribute annually Harvest of the Month (HOTM) schedule for school year 2016-2017, 2017-2018, 2018-2019 for use by qualifying school sites to reinforce nutrition education message.	CED: ; CEI: ; MPR: x; C&C: ; TTA:	CWD: ; LHD: x; AAA: ; UCCE: ; CCC:	CWD: LHD: HCOE AAA: UCCE: CCC:	Year 1: Q1 x; Q2; Q3; Q4 Year 2: Q1 x; Q2; Q3; Q4 Year 3: Q1 x; Q2; Q3; Q4	List of sites receiving HOTM schedules, HOTM schedules
2.2	Increase local procurement and Farm to School connections with monthly HOTM tastings at four SNAP-Ed eligible school sites annually. Make cafeteria connections through distribution and promotion of HOTM using posters, point of services materials. SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 2019, increase availability of healthy foods through adoption and implementation of Healthy Retail policies and physical site changes that incentivize the provision of healthy foods in retail settings and/or mobile vending services in qualifying neighborhoods in the City of Eureka.

SNAP-Ed State Goals:

	Goal 1: Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above include:

- Healthy Food Zones
- Corner store market conversions
- Healthy food and beverage policies/ stocking standards
- Healthy in-store marketing and promotions
- Store exterior improvements.

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, educate local stakeholders and City of Eureka staff through 1-3 meetings and public forums about the need for healthy retail improvements and/or policies.

b. By September 30, 2017, develop collaborative relationships with community based organizations, individuals and other stakeholders interested in promoting access to healthy foods through implementation of Healthy Retail improvements and/or policies.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, develop relationships with 1-2 retailers in qualifying census tracts to educate them on the importance of access to healthy foods and beverages as it relates to chronic disease and obesity and Healthy Retail policies and physical site changes.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 1-3 SNAP-Ed qualifying neighborhood retail stores through adopted and implemented policy and physical site changes.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 2019, increase availability of healthy foods through adoption and implementation of Healthy Retail changes that incentivize the provision of healthy foods in retail settings in qualifying neighborhoods in the City of Eureka.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Work with the "Healthy Stores for a Healthy Community" Task Force to plan coordinated and combined efforts to provide training and technical assistance for planning efforts supporting healthy retail policies and strategies in Smarter Lunchrooms Movement (SLM) principles that improve the school lunchroom will also be executed and evaluated in the City of Eureka. 9	Indirect Costs*** Indirect Cost Rate= __ %	$622	$14,956	$9,386	$10,008	-33.08%
	Total Federal Funds	**$36,000**	**$393,173**	**$240,000**	**$276,000**	-29.80%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	Salaries and benefits have been reduced due to reduced allocation of NEOP funds. Total NEOP FTE has decreased from 3.195 in FFY 2017 to 1.775 in FFY 2018.
2	Non-Capital Equipment/Supplies	Non-capital Equipment/Supplies have decreased due to decreased FTE in the NEOP program.
3	Materials	Materials have decreased due to decreased FTE in the NEOP program.
4	Travel	Travel expenses has decreased due to decreased FTE in the NEOP program.In FFY 2017-19, the IWP's georgraphically targeted approach reduces the need for local travel as nutrition education efforts will be concentrated within the City of Eureka. Additionally, staff will not be attending any large conferences in FFY 2018, such as the Childhood Obesity Conference in FFY 2017.
5	Building/Space	Building/Space rental fees are based on FTE. They have decreased due to decreased FTE in the NEOP program in FFY 2018. Total NEOP FTE has decreased from 3.195 in FFY 2017 to 1.775 in FFY 2018.
6	Maintenance	Maintenance fees are based on FTE. They have decreased due to decreased FTE in the NEOP program in FFY 2018. Total NEOP FTE has decreased from 3.195 in FFY 2017 to 1.775 in FFY 2018.
7	Equipment and Other Capital Expenditures	n/a
8	Contracts/Sub-Grants/ Agreements**	Sub-contracts have been decreased commensurate with reduction in program allocation in FFY 2018.
9	Indirect Costs	Indirect costs are based on salaries and have been reduced due to reduced FTE. Total NEOP FTE has decreased from 3.195 in FFY 2017 to 1.775 in FFY 2018.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

County Name: Imperial

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	**University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE) University of California, Cooperative Extension, Imperial County**
X	**California Department of Public Health: CDPH: (Local Health Department: LHD) Imperial County Public Health Department**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
X	**Catholic Charities of California: CCC: (Catholic Charities of California: CCC) Catholic Charities Diocese of San Diego**

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Imperial County is a unique rural community located in the southeast corner of California, bordered by Riverside and San Diego Counties, State of Arizona, and Mexico. It covers 4,597 square miles with over 800 square miles dedicated to irrigated farmland. Imperial County is predominantly Latino and Spanish-speaking, and has a significantly higher percentage of families who experience geographic, financial, and/or cultural barriers.

Imperial County has a population of approximately 179,000, and of that, 88.4% are Hispanic/Latino, 7.7% White (non-Hispanic), 1.7% African American (non-Hispanic), 0.5% Asian (non-Hispanic), 1.3% American Indian/Alaska Native, 0.3% multiracial, and 0.1% unknown. Over 60% of the population lives in the three major cities, El Centro, Brawley and Calexico: 19% live in the 4 smaller cities and 19% in unincorporated areas of the county. According to the SNAP-Ed Profile, 23.3% of Imperial County's population lives below the federal poverty line compared to 15.9% statewide. Per capita family income in Imperial County is $16,409, compared to $29,906 statewide. According to the California Department of Public Health (CDPH) SNAP-Ed County Profiles 2015, 79,415 (48.3%) people are SNAP-Ed eligible and 42,432 (25.8%) are CalFresh participants in Imperial County. Of the 68 local schools, 59 (87%) are SNAP-Ed eligible sites, and 27,579 (74%) students are eligible for Free and Reduced Price Meals (FRPM). According to the U.S. Census Bureau, 74.3% of Imperial County's population 5 years and older speaks a language other than English at home. Additionally, there are 16,119 (43.1%) English learners in Imperial County public schools, and of those, 16,017 (99.4%) speak Spanish. Historically, the primary language used in local SNAP-Ed interventions is Spanish, with over 75% of activities and materials delivered in that language.

Imperial County has one of the highest unemployment rates in the state and the nation. According to the California Employment Development Department, the unemployment rate in the Imperial County was 19.2% in January 2016, down from 21.5% percent in December 2015. The unadjusted unemployment rate in California and the nation was 5.8% and 5.3%, respectively, during the same period. According to Feeding America, 17.4% of Imperial County low income households are food insecure, while 35% of children live in food insecure households. Of the total residents, 8.1% had limited access to healthy foods. Of the SNAP-Ed adults, 69% reported always finding affordable fruits and vegetables in their neighborhood; however, only 35.7% reported always finding affordable fruits and vegetables in their neighborhood. As of February 2016, 19 community agencies were assisting with the distribution of food received from the Imperial Valley Food Bank and the USDA Commodity Program. Additionally, the Imperial Valley Food Bank's Mobile Food Pantry distributes food at 7 outlining area sites; these include at faith-based organizations, community centers and a resource center. Currently, the Imperial Valley Food Bank's Weekend Backpack Program operates in 34 schools in the county, serving over 600 students. Through this program and each Friday, a backpack of food is provided to students in need of food for the weekend. Also, the Summer Food Service Program has been operating in Imperial County for several years now. In 2015, 24 sites throughout the county served breakfast, lunch and/or an afternoon snack: all, except 2 sites, were open to the community. Finally, the Women, Infants and Children (WIC) program operates in 6 sites, including 3 that are in outlining and hard to reach areas.

The prevalence of overweight and obesity and pre-diabetes is high in Imperial County. The CDPH SNAP-Ed County Profile data indicate that 78% of adults are overweight or obese. Of the County's 5th, 7th, and 9th graders, over 40% were overweight or obese in 2015 according to the Department of Education. The University of California, Los Angeles (UCLA) Center for Health Policy Research reported that 51% of children ages 2-17, drank one or more sugar-sweetened beverages per day, and 51.5% of children of that same age, ate fast food 2 or more times in the past week. Fast food consumption is also high among adults with 59% of them consuming 1 or more times in the past week. Among SNAP-Ed adults, 44% consumed fast food 1 or more times in the past week. Also, 55.7% of adults consumed 1 or more sugar-sweetened beverages per day. Slightly over 23% of adults self-report no leisure time for activity, compared to 17% statewide. Approximately 19% of children 2-17 and 23% of children 2-11 years of age were physically active at least 1 hour every day. In Imperial County, there are approximately 4 recreational facilities per 100,000 residents.

4. **Community Assessment**

This section of the integrated work plan highlights findings from specific data sources that were used to help identify and inform local objectives and strategies.

Data sources that were used to identify local jurisdictional needs and to help inform the development of the local work plan are as follows; a) 2015 SNAP-Ed County Profiles prepared by CDPH, b) California's Food Policy Advocate's Nutrition & Food Insecurity Profile, c) United States Census Bureau, d) Centers for Disease Control and Prevention (CDC) 2013 Health Disparities and Inequalities Report, e) Healthy Stores for a Healthy Community Campaign, Kidsdata.org, f) Maternal, Child, and Adolescent Health (MCAH) Needs Assessment 2015-2019, g) Department of Education; h) University of California, Los Angeles (UCLA) Center for Health Policy Research; and i) Imperial County Community Health Assessment process. Additionally, a local Healthy Eating, Active Living environmental scan was conducted to assess service gaps in the community. Demographic, health, and environmental data were used to identify local intervention strategies that address all levels of the socio-ecological model. This data also helped identify the populations and areas of highest need that should be served.

There were several key findings that helped tailor our work plan. In Imperial County, there are high rates of food insecurity (35%), unemployment (19%), and poverty (23%). There are also high rates of overweight and obesity among adults (78%) and children (over 40% of our 5th, 7th, and 9th grade students). Data from the CDPH's 2013 Healthy Stores for a Retail Campaign Survey showed that of the stores that sell tobacco, 56% sell sugary drinks at the check-out, 66% sell sugary drinks at the check-out and are near schools, 50% sell any fresh fruit or vegetable, 37% sell good quality fruits & vegetables in low income vs. 43% in not low income areas. Of the stores assessed, 50% accept WIC and 54% of the stores that sell good quality fresh fruits and vegetables accept CalFresh. Also, 92% of the stores sell alcohol, 87% sell alcopops, 40% post alcohol ads near candy/toys or below 3 feet, and 76% have alcohol exterior advertising.

Additionally, the local needs assessment conducted by the local MCAH Program in 2015 identified overweight/obesity as a priority indicator. Problem areas identified included lack of policies to address systems and environmental change, access and availability to healthy foods at neighborhood stores and eateries, and insufficient training for service providers.

Recently, our community [large external stakeholder group] completed a Community Health Assessment (CHA) using the MAPP process. This process included collecting information, thoughts, opinions, and perceptions from community members around health issues. As part of this process, a community forum was held and a Community Survey (n=2328) distributed. For purposes of this document, relevant findings from the Community Survey and Community Forum are highlighted below.

The Community Survey included questions that focused on different topics, including, care access and utilization, community needs and areas of improvement, local service satisfaction, health issues and local health risks, physical activity and access to food. Regarding the Community Survey data, based on those who responded, relevant findings are as follows:

- ***Level of Satisfaction with Different Services***
  - Parks, Sports and Recreational Facilities: Over 50% (1,283) indicated that they were not satisfied
  - Community Programs/Activities for Teens: Almost 60% (1,307) indicated that they were not satisfied
  - Before and After School Programs: More than one-third (921) indicated that they were not satisfied
  - Community Food Assistance (food bank, food pantries, etc.): Half (653) indicated that they are satisfied

- ***Important Health Risks***
  - Child Overweight/Obesity: Close to half (986) indicated that this is one of the top important health risks in Imperial County
  - Poor Nutrition and Inactive Lifestyle: Almost 25% (490, 512) indicated that these two are important health risks in Imperial County, respectively
  - Diabetes: Almost one-third (619) indicated that this is one of the top important health risks in Imperial County

- ***Barriers to Physical Activity***
  - Weather: Close to half (1,014) indicated that this is one of the top reasons for physical inactivity
  - Cost of a Gym Membership: More than one-third (774) indicated that this is one of the top reasons for physical inactivity
  - No time: Almost 25% (519) indicated that this is one of the top reasons for physical inactivity
  - No Place to be Physically Active and Existing Activities are not available at a date/time that is Convenient: Thirteen percent (234, 320) indicated that these two are top reasons for physical inactivity, respectively

- ***Grocery Shopping/Food Access***
  - Grocery Store: Over 80% (1,893) indicated that this is where they most often go for food and groceries
  - Wholesale Stores (Costco, Smart N Final): Close to 60% (1,371) indicated that this is where they most often go for food and groceries

- Dollar/99 cent Stores: 41% (961) indicated that this is where they most often go for food and groceries
- Neighborhood Corner Market/Convenience Stores and Fast Food Restaurants: 23% (534) and 20% (471) indicated that this is where they most often go for food and groceries

- ***Quality of Life – "What are three things that would most improve your life?"***
  - Access to healthier Food 27%; learn how to make healthier food choices 27%; engage in more physical activity 39%; and neighborhood sidewalks and/or street lights 16%.

The Community Forum provided an opportunity to discuss some of the preliminary findings from the Community Survey, as well as other issues that were of concern. Issues that were discussed included access to medical care, information sharing across communities, and access to healthy foods, community gardens and farmers markets. Strategies and ideas specifically given around access to healthy foods, community gardens and farmers markets included:

- Ensuring adequate promotion of community events/offerings;
- Using social media to share information and promote upcoming events;
- Posting flyers at local stores to promote events;
- Master gardener to develop and post on a gardening website;
- Offer/provide cooking classes/demonstrations at Farmers Markets;
- Community Gardens promotion; and
- Increasing community gardens with cooking classes.

The data presented above, helped inform the development of the local work plan and intervention strategies. It also provided an opportunity to select strategies that best align with the community and that help leverage some of the work being conducted by the LIAs.

5. **Community Change Goals**

Long-term community change goals around obesity prevention were identified based on our community assessment, with the overarching goals of increasing consumption of affordable, accessible and nutritious foods, engaging in affordable and safe opportunities for physical activity and achieving and maintaining healthy weight. Specific community change goals related to this SNAP-Ed work plan include: 1) adoption and/or implementation of wellness strategies and environmental changes within schools, shelters, emergency food assistance and congregate meal sites, and childcare centers to support healthy eating and active living; and 2) increased consumption of and access to healthier foods and beverages at retail stores and food distribution sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Imperial County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/22/2017**

With our community partnerships, including CNAP, we've determined that our community change goals will help our community work in a coordinated manner to help close service gaps and will be essential to improving the overall health of the community. Overall community change goals include:

• Wellness strategies and environmental changes within schools, shelters, emergency food assistance and congregate meal sites, child care centers and other community organizations to support healthy eating and active living through the following:

- Development, modification, and /or implementation of written site wellness policies and procedures to improve the nutrition and physical activity environment
- Implementation of changes in the environment that support and promote physical activity
- Establishment of environmental supports to increase access to healthy foods, beverages and opportunities for active play
- Establishment of health or wellness councils (child care)
- Development, implementation and evaluation of healthy eating and active living standards/policies
- Establishment of strong school wellness educational programs and policies
- Improvement in the capacity of child care providers to provide children with opportunities for physical activity throughout the day including outside play when possible
- Establishment of school and/or community gardens

• Strategies that will lead to increased consumption of and access to healthier foods and beverages through the following:

- Healthy food and beverage policies at retail stores and/or food distribution sites
- Healthy in-store marketing and promotion
- Store exterior and interior improvements
- Purchased/donated food policies
- Point-of-purchase labeling to favor healthy foods and beverages
- Increased number of school pantries

The identified long-term community change goals and multi-year strategies align well with the recently identified CHA Healthy Eating and Active Living priorities. Such goals will require the support of additional community partners and funding. COPA and CNAP are working on the overarching goals and the local LIA partnership will support the larger community goals as allowed by SNAP-Ed guidelines. The following SNAP-Ed local objectives have been set for FFY17-19 and were based on the larger community change goals with consideration on SNAP-Ed allowability and agency expertise.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Imperial County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

1. By September 30, 2019, a minimum of **12** school districts will adopt, implement and maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 58,300 SNAP-Ed children and adults.

2. By September 30, 2019, a minimum of 7 community sites including but not limited to shelters, emergency food assistance, congregate meal sites, and adult education/job training sites will adopt, implement and maintain site policies/guidelines and practices that create changes in their environment to support healthy eating, active living, and increase access to healthy foods and beverages reaching at least 4,400 of SNAP-Ed eligible individuals who will also receive direct and/or indirect education.

3. By September 30, 2019, a minimum of 5 early childcare centers, will adopt, implement and maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 2,600 children and adults

4. By September 30, 2019, at least 7 SNAP-Ed qualifying retail stores will have increased access to healthy food and beverage options through the adoption and/or implementation of policy, systems and/or environmental interventions, reaching at least **15,715** SNAP-Ed eligible individuals.

Objective 1: UCCE and the LHD will coordinate to achieve the 3-year local objective 1 which is focused on the adoption and/or implementation of wellness policies to help create change in specific community environments to support healthy eating and active living for the SNAP-Ed population. This local objective supports all state-level objectives listed on page 2 of this SNAP-Ed work plan. Community partners will support the SNAP-Ed work plan efforts by providing a variety of resources and expertise. Direct and indirect education, training and technical assistance will be provided using approved, practice-tested or research-tested curriculum and resources to support this objective.

Objective 2: CCDSD will implement the three-year Objective 2 which is focused on education and healthy policies/practices and the adoption of environmental supports at various community sites including but not limited to, food distribution sites, congregate meal sites, shelters/transitional housing sites, and adult education/job training sites to increase awareness of SNAP-Ed messaging and access and availability to healthy food and beverage options in the community. This local objective supports state-level objectives 1-4 listed on Page 2 of this SNAP-Ed work plan. Community partners will support the SNAP-Ed work plan efforts by providing a variety of resources and expertise. Direct and Indirect Education, training and technical assistance will be provided using approved, practice-tested or research-tested curriculum and resources to support this objective.

Objective 3: UCCE will coordinate to achieve the 3-year local objective 3 which is focused on the adoption and/or implementation of wellness policies to help create change in specific community environments to support healthy eating and active living for the SNAP-Ed population. This local objective supports all state-level objectives listed on page 2 of this SNAP-Ed work plan. Community partners will support the SNAP-Ed work plan efforts by providing a variety of resources and expertise. Direct and indirect education, training and technical assistance will be provided using approved, practice-tested or research-tested curriculum and resources to support this objective.

Objective 4: The LHD will implement the 3-year local Objective 4 which is focused on healthy practices at retail stores to increase access and availability to healthy food and beverage options in the community. This objective supports state-level goals 1, 3 and 4. Strategies used to support the three-year state and local objectives include education and training for retail store owners, managers and/or staff, promotional events at stores reaching SNAP-Ed eligible youth and adults, and using media and public relation techniques to promote and highlight success in increasing access to healthy foods and beverages. Non-SNAP-Ed funded partners will support these efforts by supporting COPA and CNAP in the work with retailers and food distribution sites. Community partnerships with the local Tobacco Coalition, COPA and CNAP have proved to be an asset to SNAP-Ed. Agency partners such as the American Lung Association, Tobacco Education Program, and the Imperial County Asthma Program are also targeting local retail stores in an effort to expand “healthy” retail which includes decreased access to tobacco products and sales to minors. This work will be done in coordination with LIA’s to help increase consumer knowledge of food labels and nutritional value, as well as to increase access to healthy foods and beverages. In particular, partners will support specific activities such as reassessments, training opportunities for store owners and consumers, and resources that may offer financial incentives for store upgrades that will help provide access to healthier food and beverage options.

All local 3-year objectives support and provide education (direct & indirect) and technical assistance for improved nutrition and physical activity. Also, the 3 Imperial County LIAs will work jointly and as appropriate on the objectives, each working within its own population reach and area of expertise. Although some of the larger community change goals require support and additional funding from external partners to complete infrastructure and policy work, the SNAP-Ed contribution will remain exclusive to the SNAP-Ed eligible populations and allowable activities. LIAs will provide direct nutrition and physical activity education, as well as support for policy, systems, and environmental changes.

Imperial County LIAs understand that everyone plays a vital role in supporting healthy changes within our environment. By working together to understand the challenges and opportunities, and by prioritizing action steps, an entire community can improve the nutrition and physical activity environment in its neighborhoods. LIAs understand that engaging community members and key stakeholders in PSE change efforts is also vital in building trust and creating a sense of ownership. It is anticipated that LIAs and key partners such as schools, retailers, shelters, community organizations and cities will be engaged through existing and new groups including COPA and its 4 workgroups: CNAP, Safe Routes to School, Early Care Education and School Wellness, and Rethink Your Drink. Additionally, LIAs intend to communicate the goals identified within the SNAP-Ed integrated work plan through community engagement and existing/new

partnership opportunities. As part of these processes, the intent is to keep the public informed of the objectives, involve the public by taking into consideration their feedback and making appropriate changes, engage them in decision making processes, and finally, empower them to take action.

6. **Partnerships and Collaborative Efforts**

The SNAP-Ed LIAs will continue to work closely with partnerships and collaboratives, such as the Imperial County Childhood Obesity Prevention Alliance (COPA) and CNAP Workgroup, to promote SNAP-Ed services and activities by connecting with other agencies including, but not limited to the County Welfare Departments and Area Agency on Aging. CNAP meets as a subgroup of COPA and reports its progress and/or outcomes to the larger group during quarterly meetings. COPA brings together key traditional and non-traditional partners to work on local obesity prevention efforts. The group convened in 2009 and currently has a membership of over 45 individuals representing over 23 agencies. Its mission is "to improve and/or maintain the health of children and their families through the prevention of obesity and related complications," and its vision is "to encourage an environment that promotes and supports a healthy lifestyle for children and families in Imperial County." COPA's goals are to: 1) serve as a forum to discuss childhood obesity issues and best practices related to childhood obesity, prevention and treatment; 2) provide trainings and workshops related to childhood obesity; and 3) build partnerships within the community to promote policy change related to health. Active COPA workgroups include the following: COPA Leadership; Early Care and Education and School Wellness; ReThink Your Drink; Safe Routes to School; and CNAP.

The CNAP workgroup started as a stand-alone group in 2011, but merged into COPA in 2014 to enhance and leverage the work conducted in Imperial County. This workgroup includes SNAP-Ed funded partners including the Imperial Valley Food Bank, AAA, UCCE, Catholic Charities Diocese of San Diego (CCDSD), Imperial County Public Health Department, Farm Smart Program at the UC Desert Research and Extension Center (DREC), as well as non-funded partners such as Clinicas de Salud del Pueblo, Inc., Molina Healthcare, American Cancer Society, City of El Centro Parks and Recreation Department and Proyecto Heber, a nonprofit organization. Also, CNAP anticipates working closely with the Tobacco Education Project and its partners on Healthy Stores for a Healthy Community Campaign efforts to help leverage the work being done in our community. The CNAP overarching goal is to ensure local-level leadership and coordination of obesity prevention efforts to create active living and healthy eating environments and synergize efforts to work toward the elimination of health inequities. Its objectives focus on strategies that lead to: 1) expansion and strengthening of local collaboration and partnership with traditional and nontraditional partners; 2) synchronization and standardization of messages and materials disseminated; and 3) guidance and assistance for agencies and organizations interested in policy, system and environmental change efforts that lead to sustainable changes within the environment. COPA meets at least 4 times per year. All workgroups, including CNAP, meet more often and throughout the year to help move forward healthy eating, active living and obesity prevention efforts in the community.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved SDA SNAP-Ed Connection website (https://snapped.fns.usda.gov/), and/or from the FFY 2017-19 USDA approved UC CalFresh, California SNAP-Ed Integrated Curricula, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document. Curriculum, materials, and resources were selected to best meet the needs of the target population, and fit well with the strategies and activities that will be delivered through the work plan. The curriculum, materials and resources are mostly geared towards retailer and
school settings.

9. **Intervention and Evaluation Plan Narrative Summary**

All SNAP-Ed LIAs (UCCE, LHD, and CCC) will collaborate to provide comprehensive, multi-level, behavior-focused strategies and interventions, including nutrition education/physical activity promotion sessions, and training and technical assistance. LIAs will also utilize media and public relations and coordination and collaboration with partners throughout Imperial County. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change. The LIAs will conduct activities at the individual and interpersonal level of the Social Ecological Model, and will also incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal, as well as organizational and community venues. All three LIA's will participate in developing/updating/technical assistance with health and wellness policies. LHD and

UCCE will work primarily with these policies at schools and early child care centers, and CCC will work with shelters/transitional housing sites and congregate meal sites. UCCE Smarter Lunchrooms Movement (SLM) Technical Advising Professionals (TAPS) will assist school cafeteria directors/superintendents/principals incorporate the nutrition message throughout the cafeteria and in the classrooms by initiating a Smarter Lunchrooms Self- Assessment scorecard at each targeted school to help them evaluate their lunchroom and identify areas of opportunity and improvement. UCCE will use the CATCH (Coordinated Approach to Child Health) physical activity curriculum in schools and early child care centers. The LHD will be the only LIA with a subcontractor, and that will be the Imperial Valley Food Bank (IVFB). The IVFB will be engaged in objectives 1 and 4, and will work, primarily, with schools and retail stores. The LIAs will provide training and technical assistance to organization personnel or the community, and will be sharing training opportunities across agencies when possible. In addition, direct and indirect community/nutrition education, media, social media, public relations, messaging, as well as coordination and collaboration are addressed by all LIAs.

Imperial County objectives and intervention strategies:

Evidence-, practice-, and research-based interventions will be implemented by all Imperial County LIAs. The objectives and activities for the integrated work plan were derived from results obtained in the recent community assessments, as described in section 4 of the work plan, as well as from existing historical Imperial County data. The three LIAs worked collaboratively for several weeks to develop the work plan objectives and strategies, and ensured that the plan included PSE change efforts. Healthy nutrition and physical activity policies and procedures will be implemented in early care and education settings and elementary schools which include, but are not limited to standards for all foods and beverage offered on site, opportunities for daily physical activity, limits on screen time and provision of quality nutrition education, garden-based and physical activity education and marketing guidelines for materials posted and shared on site. PSE efforts will also be focused on improving the school lunchroom utilizing the Smarter Lunchrooms Movement (SLM) principles and retail store environments with product placement strategies, healthy check-out lanes, healthy grab and go, smart snacking stations, healthy items in prominent school lunchroom and store locations with the removal of child oriented advertising and less healthy foods and beverages at children's eye level. Additionally, healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries/congregate meal sites) will be implemented to support education efforts to improve nutrition and food resource management. Harvest of the Month messaging and meal planning will be incorporated in shelters/transitional housing sites and congregate meal sites as well as environmental changes such as community gardens and educational boards. These sites were chosen as PSE sites since the clients who receive services at those sites are also receiving Direct/Indirect Education. The PSE work at these sites will reinforce the messaging that clients are receiving. As already described in section 4 of the work plan, barriers to physical activity which showed that places to be physically active are limited and existing activities are not available at a date/time that is convenient. By offering the physical activity curriculum in the schools, we make it convenient and the time is accounted for in the school day. Poor nutrition and inactive lifestyles are addressed in health and wellness policies. Finally limited access to healthier food is addressed in health and wellness policies as well as in The Smarter Lunchrooms Movement and through the strategies addressed in assisting our local retail store managers/owners to increase their access to fruits and vegetables and healthy beverages.

Additionally, LIAs selected intervention sites, strategically, to have a greater impact in the community. Intervention sites mostly include schools and surrounding SNAP-Ed eligible sites such as child care, neighborhood stores, shelters, and emergency food assistance and congregate meal sites. Interventions at schools and early childcare centers provide a unique opportunity to reach a captive, student population in a learning environment that can help foster behavior change. Additionally, local data shows that almost 50% of Imperial County-school aged children are overweight or obese, thus the focus on this setting and on this population. Data also show that 51% of children ages 2-17, drank one or more sugar-sweetened beverages per day and 51.5% of children of that same age ate fast food 2 or more times in the past week confirming the need for intervention and technical assistance. Schools to be intervened were selected based on the percentage of students receiving Free or Reduced Price Meals. Early childcare centers were based on students receiving free and reduced price meals as well as means tested. The LHD will intervene mostly middle and high schools, while UCCE will intervene mostly elementary schools and child care sites. The retail stores intervened will include those that are in close proximity to the school districts being intervened through this program.

Objective 1 is a three-year objective that focuses on the adoption, implementation and maintenance of wellness policies and procedures at SNAP-Ed eligible school districts to help create changes that support healthy eating and active living and increase access to healthy foods and beverages. It is anticipated that the following policy, systems and/or environment (PSE) strategies will be implemented and will help support the 3-year objective:

- Development, modification, and /or implementation of written site wellness policies and procedures to improve the nutrition and physical activity environment
- Implementation of changes in the environment that support and promote physical activity
- Increased access to healthy foods, beverages and opportunities for physical activity
- Development, implementation and evaluation of healthy eating and active living standards/policies
- Establishment of strong school wellness educational programs and policies
- Improvement of the capacity of child care providers to provide children with opportunities for physical activity throughout the day including outside play when possible

In the first year, LIA's will meet with key stakeholders and officials from school districts to assess the level of readiness in adopting new and/or strengthening existing wellness policies. Technical assistance and guidance will be provided, as needed, to sites to help them develop and/or update their policies. In years 2 and 3, it is expected that training and technical assistance for implementation efforts, as well as ongoing support will continue to be provided to sites, and in particular, to those that create or enhance at least one healthy change per site that supports healthy eating and active living.

There are a range of activities that support the 3-year local objective 1, and are focused on direct and indirect community/nutrition education and physical activity, media, social media, public relations, messaging, coordination, collaboration, training and technical assistance. It is the intent of the LIAs to continue convening regularly with COPA, CNAP, the Tobacco Coalition, and other local groups to assist in the development of a plan that supports healthy eating-related

policy systems and/or environmental change strategies at SNAP-Ed eligible sites in the community. LIAs will meet with the proper stakeholders and/or officials to discuss and asses the status of their wellness policies, provide needed support (resources, materials, education, training, technical assistance, etc.) to help sites move forward with wellness policies adoption and/or implementation. SNAP-Ed eligible youth and adults, as well as teachers, site officials, and other key stakeholders will be trained on various topics, including, but not limited to leadership skills, PSE 101, wellness policies, Smarter Lunchrooms Movement, school gardens, Coordinated Approach to Child Health (CATCH), and/or Safe Routes to School programs. LIAs will participate, as needed, in the sites' wellness/advisory committee meetings to add on another layer of consulting from the LIAs. LIAs will also provide direct and indirect education to children and adults at schools child care centers, and other SNAP-Ed eligible sites to promote and support the healthy eating and active living intervention strategies. UCCE and CCC will also work with SNAP-Ed eligible sites to identify potential community garden projects. Additionally, approved media and public relation techniques will be used to promote and highlight PSE successes in the community.

Objective 2 focuses on direct and indirect education and the adoption, implementation and maintenance of healthy guidelines/policies, environmental changes at SNAP-Ed qualifying sites including but not limited to, food distribution sites, congregate meal sites, shelters/transitional housing sites, and adult education/job training sites to help create changes that support healthy eating and active living and increase access to healthy foods and beverages.

In the first year, CCDSD will identify a minimum of 2 shelters/transitional housing sites, a minimum of 6, and up to 9 congregate meal sites, and 1 emergency food assistance site that can benefit from healthy policies/guidelines such as a healthy donated foods policy, incorporating HOTM messaging and meal planning and environmental changes such as community gardens and educational boards. Policies will be drafted and reviewed by sites in order to adopt policies for the various locations.

In the second year, a minimum of 1 shelter/transitional housing site, 5 congregate meal sites, and 1 emergency food assistance site will begin implementing a healthy policy/guideline relating to accepting donated foods, healthy meals, and /or committing to environmental changes.

In the third year, a minimum of 1 shelter/transitional housing site, 5 congregate meal sites, and 1 emergency food assistance site will begin evaluating the impact and effectiveness of the previously adopted policies and environmental changes. Outreach should also be conducted at a minimum of 5 additional locations to begin the implementation of healthy policies or environmental changes at sites that did not implement in the second year.

Objective 3 UCCE will focus on the adoption, implementation and maintenance of wellness/healthy lifestyle policies and procedures at SNAP-Ed eligible early childcare centers to help create changes that support healthy eating and active living and increase access to healthy foods and beverages. It is anticipated that the following policy, systems and/or environment (PSE) strategies will be implemented and will help support the 3-year objective.

- Development, modification, and /or implementation of written site wellness policies and procedures to improve the nutrition and physical activity environment
- Implementation of changes in the environment that support and promote physical activity
- Increased access to healthy foods, beverages and opportunities for physical activity
- Establishment health or wellness councils for child care.
- Development, implementation and evaluation of healthy eating and active living standards/policies
- Improvement of the capacity of child care providers to provide children with opportunities for physical activity throughout the day including outside play when possible

In the first year, UCCE will meet with key stakeholders and officials from child care/preschool centers to assess the level of readiness in developing and or adopting new wellness policies and/or strengthening existing wellness policies. Technical assistance and guidance will be provided as needed. In years 2 and 3, it is expected that training and technical assistance for implementation efforts as well as ongoing support will continue to be provided to sites, and in particular, to those that create or enhance at least one healthy change per site that supports healthy eating and active living.

There are a range of activities that support the 3-year local objective 3, and are focused on direct and indirect community/nutrition education and physical activity, media, social media, public relations, messaging, coordination, collaboration, training and technical assistance. It is the intent of the LIAs to continue convening regularly with COPA, CNAP, the Tobacco Coalition, and other local groups to assist in the development of a plan that supports healthy eating-related policy systems and/or environmental change strategies at SNAP-Ed eligible sites in the community. LIAs will meet with the proper stakeholders and/or officials to discuss and asses the status of their wellness policies, provide needed support (resources, materials, education, training, technical assistance, etc.) to help sites move forward with wellness policies adoption and/or implementation. SNAP-Ed eligible youth and adults, as well as teachers, site officials, and other key stakeholders will be trained on various topics, including, but not limited to leadership skills, PSE 101, wellness policies, school gardens, Coordinated Approach to Child Health (CATCH). UCCE will participate, as needed, in the sites' wellness/advisory committee meetings to add on another layer of consulting from the LIAs. UCCE will also provide direct and indirect education to children and adults at child care centers to promote and support the healthy eating and active living intervention strategies. Additionally, approved media and public relation techniques will be used to promote and highlight PSE successes in the community.

Through the 3-year local **Objective 4,** the LHD will work with SNAP-Ed qualifying retail stores to help increase access to healthy food and beverage options through the adoption and/or implementation of policy, systems and/or environmental interventions. It is anticipated that the following policy, systems and/or environment (PSE) strategies will be implemented and will help support the 3-year objective:

- Healthy food and beverage policies adopted and implemented
- Healthy in-store marketing and promotions adopted and implemented
- Store exterior and interior improvements made
- Purchased/donated food policies adopted and implemented
- Point-of-purchase labeling adopted and implemented to favor healthy foods and beverages
- Increased number of school pantries adopted and implemented
- Donated food policies adopted and implemented

It is anticipated that the LHD will intervene in at least 7 retail stores. The intent is for 4 retail store owners and/or staff be reached in the first year, 2 in the 2nd year and 1 in the 3rd year. It is also expected that since not all retailers will be intervened on the same year, activities will evolve at different paces, but for the most part, the intent will be to do the following with all, regardless of the year they are being intervened: develop and/or strengthen partnerships with retail store owners, staff and/or key community stakeholders; conduct baseline assessments and review results; seek opportunities to address healthy store changes; and develop an action or implementation plan to work on identified healthy retail store strategies. Additionally A healthy retail store intervention using USDA-approved nutrition messages and display materials will be implemented to help increase demand for, and consumption of, fruits and vegetables and healthy beverages. Finally, resource management, nutrition and active living education will be provided yearly to SNAP-Ed eligible individuals at retail stores and surrounding SNAP-Ed eligible sites to help increase awareness around healthy eating and active living and promote opportunities to access healthy foods and beverages from retail stores. As with objective 1, LIAs will work with COPA, CNAP and other local groups throughout the 3 years to help move the work forward at retail stores. Partnerships with store owners, staff, and key community stakeholders will be developed and/or strengthened. Support will be provided to store owners in the form of education, training, and technical assistance, and will be done to help move PSE efforts forward at the identified sites. For store owners and staff, strategies may include, but are not limited to, promoting healthy items through placement, and promotional and healthy point of purchase strategies, as well as the development and implementation of a healthy stores plan. Nutrition, physical activity, and food resource management direct and indirect education will be provided at various qualifying venues. Approved media and public relation strategies will also be used to implement a local social marketing campaign to help promote the availability of healthier foods and beverages and promote and highlight retailer and school district successes in increasing access to healthy foods and beverages.

LIAs worked on the 3-year and annual objectives keeping in mind the state goals and objectives. **State Goal 1**, centers on increasing consumption of healthy foods and beverages, and decreasing consumption of unhealthy foods and beverages, will be addressed in both local objectives and through a variety of interventions at schools, shelters, emergency food assistance and congregate meal sites, and child care centers. Imperial County's 3-year Local Objective 1 is focused on adopting and/or implementing wellness policies in local school districts to help create change in specific community environments to support healthy

eating and active living for the SNAP-Ed population in Imperial County. Three-year local objective 2 CCDSD will implement the three-year Objective 2 which is focused on education and healthy policies/practices and the adoption of environmental supports at various community sites including but not limited to, food distribution sites, congregate meal sites, shelters/transitional housing sites, and adult education/job training sites to increase awareness of SNAP-Ed messaging and access and availability to healthy food and beverage options in the community. This local objective supports state-level objectives 1-4 listed on Page 2 of this SNAP-Ed work plan. Community partners will support the SNAP-Ed work plan efforts by providing a variety of resources and expertise. Direct and Indirect Education, training and technical assistance will be provided using approved, practice-tested or research-tested curriculum and resources to support this objective. Three year local objective 3 is focused on adopting and/or implementing wellness/healthy lifestyle policies in early childcare centers to help create changes in their policy, systems, and environment that support healthy eating and active living for the SNAP-Ed eligible population. Three-year local Objective 4 focuses on healthy practices at retail stores and food distribution sites to increase access and availability to healthy food and beverage options in the community. **State Goal 2**, focuses on increasing physical activity, will be mostly addressed through local objective 1. Local Objective 1 will target wellness policies and the healthy eating environment in schools. Wellness policies will be reviewed, and where possible, LIA partners will encourage the adoption and/or implementation of gardening, Safe Routes to School, and other physical activity-related programs to help increase physical activity. **State Goal 3**, centered food resource management, will be addressed by all objectives. In particular, food resource management will be addressed through education sessions for children and adults in various community settings, including schools, child care centers, shelters, food distribution sites, food resource centers, temporary housing facilities, day centers, grocery stores, farmers markets, and other SNAP-Ed eligible sites. **State Goal 4**, focuses on increasing access to and/or appeal of healthy dietary choices and decreasing access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop, is addressed in all local objectives. All local objectives are focused on providing support, training, technical assistance and education to individuals from schools, child care centers, shelters, food distribution sites, food resource centers, temporary housing facilities, day centers, and retails stores: all are places where people eat, live, learn, work, play or shop. Finally, **State Goal 5** addresses the access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations. LIAs will mostly support that goal through local objectives 1 and 3.

Local objective 1 includes training and technical assistance to a variety of partners, including schools and child care centers, which will be encouraged to adopt or implement strategies that address increased access to physical activity opportunities.

SNAP-Ed funded agencies will be engaged and unfunded partners will be highly encouraged to participate in COPA and CNAP: COPA is the primary obesity prevention collaborative in Imperial County. LIAs and its partners have been actively engaged in the promotion of healthier communities for the last several years; it is expected that partners will continue to participate in the collaborative, and will also support the state goals and messages, which in turn, will help meet the community change goals. Also, the selected objectives include community engagement strategies for all SNAP-Ed populations. In particular, youth and adults, through the school's Health Occupations Students of America Program, Imperial Valley Regional Program, and/or parent/teacher organizations or associations, will have the opportunity to actively engage in work plan activities and help move forward PSE efforts. LIAs will work closely with such programs

and groups to provide the needed training, tools and resources, and will serve as a consultant to them. Additionally, LIAs will use COPA and CNAP as a vehicle to engage community residents by recruiting community leaders, engaging residents to identify resources and assets within their community that can be mobilized to improve health and quality of life, and through special meetings or forums, as needed. Additionally, youth will be engaged through youth community engagement activities such as youth leadership, decision-making, and organizing opportunities to help support behavior change.

SNAP-Ed implementing agencies will document services provided in Imperial County, the locations and specific SNAP-Ed eligible audiences reached, as well as, other required EARS data through process evaluation reporting. The impact and outcome evaluation of nutrition education series will document achievement of the type of individual level behaviors and dietary practices highlighted in the USDA's Western Regional Offices SNAP-Ed Evaluation Framework. Particular tools, such as the Food Behavior Checklist (FBC) will be administered to low income individuals to self-report on their behaviors. Evaluation through pre/post assessments will be conducted to measure behavior change relating to consumption of healthy foods, resource management, and food security status with adult participants. The RAPA will quickly assess the level of physical activity and can track progress toward building up to 30 minutes of exercise of 30 minutes on most days of the week. The FBC will document client behavior change by assessing eating behavior before and after the nutrition education lesson. Environmental changes will be evaluated through surveys before and after the completed session. The Food Behavior Checklist, pre/post assessments and surveys will be used to first, collect information/data that will tell us the needs of the community and second, determine if the level of knowledge acquired is leading to positive healthy eating, increased physical activity and positive behavioral changes. This information may be used as a needs assessment in determining if we need to make changes in teaching practices, curriculum used and the evaluation process to continually improve our program.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	40%		0 to 4 years old (Preschool):	365
Female	60%		5 to 17 years old (School Age):	15,957
			18 to 59 years old (Adult):	7,653
			60 years old and over (Senior):	4,125
Total:	100%			

3. Ethnicity/Race

Ethnicity

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, a minimum of 12 school districts will adopt, implement and/or maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 58,300 SNAP-Ed children and adults.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed**

- Develop, modify, and /or implement written site wellness policies and procedures to improve the nutrition and physical activity environment.
- Implement changes in the environment that support and promote physical activity
- Increase access to healthy foods, beverages and opportunities for active play
- Develop, implement and evaluate healthy eating and active living standards/policies
- Establish strong school wellness educational programs and policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

a. By September 30, 2017, the LHD and UCCE will provide training and technical assistance to at least 6 school districts on the implementation and/or enforcement of wellness strategies and/or strategies to support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, and/or opportunities for active play, reaching 12, 293 (8,693 by LHD and 3,600 by UCCE) NAP-Ed eligible individuals.

b. By September 30, 2017, the LHD and UCCE will conduct direct nutrition education sessions reaching at least 8,921 (2,692 by the LHD and 6,229 by UCCE) SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, the LHD and UCCE will provide training and technical assistance to at least 3 school districts on the implementation and/or enforcement of wellness strategies and/or strategies to support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, and/or opportunities for active play, reaching 9,391 (5,491 by LHD and 3,900 by UCCE) SNAP-Ed eligible individuals.

b. By September 30, 2018, the LHD and UCCE will conduct direct nutrition education sessions reaching at least 6,346 (1,724 by LHD and 4,622 by UCCE) of SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2018, the LHD and UCCE will provide training and technical assistance to at least 3 school districts on the implementation and/or enforcement of wellness strategies and/or strategies to support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, and/or opportunities for active play, reaching 9,486 (5,486 by LHD and 4,000 by UCCE) SNAP-Ed eligible individuals.

b. By September 30, 2019, By September 30, 2017, the LHD and UCCE will conduct direct nutrition education sessions reaching at least 6,346 (1,724 by LHD and 4,622 by UCCE) of SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Imperial County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed local Objective #1 (FFY 2017-FFY 2019):

By September 30, 2019, a minimum of 12 school districts will adopt, implement and/or maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 58,300 SNAP-Ed children and adults.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	LIAs will convene through the existing Childhood Obesity Prevention Alliance's (COPA) County Nutrition Action Plan (CNAP) Workgroup, Tobacco Coalition and/or other local groups at least 6 times per year to engage partners in SNAP-Ed efforts and to help advance SNAP-Ed goals using a collective impact approach. In year 1, LIAs, with the assistance of community partners, will develop a plan of action that addresses local strategies, in particular healthy eating related policy systems and/or environmental change strategies to be implemented at SNAP-Ed eligible schools and child care sites. (Note: this activity overlaps with 3.1)	( ) CED ( ) CEI ( ) MPR (x) C&C (x) TTA	( ) CWD (X) LHD ( ) AAA (x) UCCE (X) CCC	CWD: LHD: Imperial Valley Food Bank AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X x Year 3 Q1 Q2 Q3 Q4 x x x x	Sign-in sheets, agenda, meeting notes, developed plan
1.2	Meet with 1-2 representatives per year from at least 12 SNAP-Ed eligible schools. Site representatives	( ) CED ( ) CEI ( ) MPR	( ) CWD (X) LHD ( ) AAA	CWD: LHD: Imperial Valley Food Bank	Year 1 Q1 Q2 Q3 Q4 X X X X	Sign in sheets, agenda, meeting notes, listing of

	may include, but are not limited to site directors, administrators, managers, and other key staff. The rate by which activities are completed will vary from site to site, and in part, will depend on the level of readiness of each. The following are the core activities to be conducted per year: Year 1: Request to participate in wellness/advisory meeting. Discuss and assess the status of their wellness policies. Policies will be assessed using approved & appropriate tools based on the type of site. Identify opportunities and barriers for addressing healthy eating and physical activity in wellness policies. Year 2: Provide technical assistance, resources, templates and sample materials to all sites, as needed. Year 3: provide technical assistance, as needed, to schools on the adoption, implementation and/or maintenance or enforcement of policies.	x C&C TTA	x UCCE CCC	AAA: UCCE: CCC:	Year 2 Q1 Q2 Q3 Q4 X X X x Year 3 Q1 Q2 Q3 Q4 x x x x	sites selected for interventions, developed plans, assessment results, written policies

1.3	Participate in school district wellness, advisory, and/or parent committees, as needed and appropriate, to discuss and assess current wellness policies in place, or the possibility of new policies. Collaborate with committees to address healthy eating and active living practices and wellness policies. Seek opportunities to develop, adopt and/or implement wellness policies that support healthy eating and active living. Opportunities will include, but are not limited to the following: 1) Creating an environment that makes fresh fruit and vegetable an option the routine and easy choice by assisting in the implementation of a salad bar in a school cafeteria; and 2) Adoption of requirements in school wellness policy that support the establishment of a Safe Routes to School Program. Estimated number of SNAP-Ed eligible individuals reached by the adoption and/or implementation of **PSEs** is **23,800** by the end of the 3 years: 9,601 (6,001 LHD and 3,600 UCCE) in Year 1; 7,050 (3,150 LHD and 3,900 UCCE) in Year 2, and 7,149 (3,149 LHD and4000 UCCE) in Year 3.	<table><tr><td></td><td>CED</td></tr><tr><td></td><td>CEI</td></tr><tr><td></td><td>MPR</td></tr><tr><td>x</td><td>C&C</td></tr><tr><td>x</td><td>TTA</td></tr></table>	<table><tr><td></td><td>CWD</td></tr><tr><td>X</td><td>LHD</td></tr><tr><td></td><td>AAA</td></tr><tr><td>x</td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table>	CWD: LHD: Imperial Valley Food Bank AAA: UCCE: CCC:	Year 1 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 2 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>X</td><td>X</td><td>X</td></tr></table> Year 3 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>X</td><td>x</td><td>X</td><td>X</td></tr></table>	Sign-in sheets, agenda, meeting notes, listing of sites selected for interventions, developed plans, assessment results, written policies

1.4	Provide training to key stakeholders including parents, from targeted schools on wellness policies and PSE 101 using USDA-approved, age and developmentally appropriate curriculum. Areas of improvement that support healthy eating and active living will be identified. At least **34** individuals will be trained by the end of the 3 years: 15 (9 LHD and 6 UCCE) will be reached in Year 1; 11 (6 LHD and 5 UCCE) in Year 2; and 8 (5 LHD and 3 UCCE) in Year 3.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: Imperial Valley Food Bank AAA: UCCE: CCC:	Year 1 Q1 X, Q2 X, Q3 X, Q4 X Year 2 Q1 X, Q2 X, Q3 X, Q4 X Year 3 Q1 X, Q2 X, Q3 X, Q4 X	Training outline, sign-in sheets, agenda, listing of areas of improvement, draft policies
1.5	Provide training to youth, and/or parents from targeted schools on, but not limited to leadership, advocacy skills, PSE 101, wellness policies, and/or Smarter Lunchrooms Movement using approved curriculum and materials. Youth will present to peers and school governing bodies to advocate for healthy eating and active living policy, systems and/or environmental change. At least **50** individuals will be trained by the end of the 3 years: 24 (9 LHD and15 UCCE) in Year 1; 15 (6 LHD and 9 UCCE) in Year 2; and 11 (5 LHD and 6 UCCE) in Year 3. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, a minimum of 7 community sites including but not limited to shelters, emergency food assistance, congregate meal sites, and adult education/job training sites will adopt, implement and maintain site policies/guidelines and practices that create changes in their environment to support healthy eating, active living, and increase access to healthy foods and beverages reaching at least 4,400 of SNAP-Ed eligible individuals who will also receive direct and/or indirect education.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed**

1. Educational boards and or displays promoting HOTM or MyPlate messaging
2. Community Gardens
3. Healthy Food and Beverage Standards (Donated Food Policies, Healthy Meal Guidelines/Policies, Healthy Vending Machine Policies, etc.)
4. Track quality and quantity of fresh produce in Food Resource Center – aim to increase amount of fresh produce for distribution

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):** In the first year, CCDSD will identify a minimum of 2 shelters/transitional housing sites, a minimum of 6, and up to 9 congregate meal sites, and 1 emergency food assistance sites that can benefit from healthy policies/guidelines such as a healthy donated foods policy, incorporating HOTM messaging and meal planning and environmental changes such as community gardens and educational boards. Policies will be drafted and reviewed by sites in order to adopt policies for the various locations.

2. **FFY 2018 (Year 2) Objective(s):** In the second year, a minimum of 1 shelter/transitional housing site, 5 congregate meal sites, and 1 emergency food assistance site will begin implementing a healthy policy/guideline relating to accepting donated foods, healthy meals, and /or committing to environmental changes.

3. **FFY 2019 (Year 3) Objective(s):** In the third year, a minimum of 1 shelter/transitional housing site, 5 congregate meal sites, and 1 emergency food assistance site will begin evaluating the impact and effectiveness of the previously adopted policies and environmental changes. Outreach should also be conducted at a minimum of 5 additional locations to begin the implementation of healthy policies or environmental changes at sites that did not implement in the second year.

Three-Year SNAP-Ed local Objective #2 (FFY 2017-FFY 2019):

By September 30, 2019, a minimum of 7 community sites including but not limited to shelters, emergency food assistance, congregate meal sites, and adult education/job training sites will adopt, implement and maintain site policies/guidelines and practices that create changes in their environment to support healthy eating, active living, and increase access to healthy foods and beverages reaching at least 4,400 of SNAP-Ed eligible individuals who will also receive direct and/or indirect education.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Conduct annual single and multiple session nutrition and physical activity education sessions reaching SNAP-Ed eligible children and adults in shelters/transitional housing, food resource centers, congregate meal sites, adult education/job training sites, and other SNAP-Ed eligible sites to promote and support healthy eating and active living strategies. Sessions may include cooking demonstrations, tastings, and/or physical activity demonstrations and will reach a	X CED CEI MPR C&C TTA	CWD LHD AAA UCCE X CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Sign in sheets, ATFs, pictures, data cards

	minimum of 600 SNAP-Ed eligible individuals each fiscal year.					
2.2	Identify up to 12 congregate meal sites and/or shelters/temporary housing sites to potentially display SNAP-Ed eligible materials, including HOTM and MyPlate educational boards. Train staff on material and integrate HOTM/MyPlate into meal planning. Provide training and materials to a minimum of 5 of the 12 sites by the end of the 3 years. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, a minimum of 5 early childcare centers, will adopt, implement and maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 2,600 children and adults.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed**

1. **Develop, modify, and/or implement written site wellness/healthy living policies and procedures to improve the nutrition and physical activity environment.**
2. **Increase access to healthy foods, beverages and opportunities for active play.**
3. **Establish health or wellness councils for child care.**
4. **Establish new, and/or maintain school gardens.**
5. **Establish organizational practices that provide opportunities for physical activity throughout the day including outside play when possible.**

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, UCCE will identify a minimum of 5 early childcare centers to provide training and technical assistance on the implementation and/or enforcement of wellness strategies to support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, opportunities for active play, and establish or maintain school gardens reaching 400 SNAP-Ed eligible individuals.

b. By September 30, 2017, UCCE will conduct direct nutrition education sessions reaching at least 200 SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, a minimum of 5 early childcare centers will begin implementing wellness strategies that support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, opportunities for healthy play, and establish school gardens reaching 300 SNAP-Ed eligible individuals.

b. By September 30, 2018, UCCE will conduct direct nutrition education sessions reaching at least 200 SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, a minimum of 5 early child care centers will begin evaluating the impact and effectiveness of the previously adopted wellness strategies that support at least one healthy change per site to increase access to fruits and vegetables, healthy beverages, opportunities for healthy play and maintain school gardens for a sustainable environment, reaching 300 SNAP-Ed eligible individuals.

b. By September 30, 2019, UCCE will conduct direct nutrition education sessions reaching at least 200 SNAP-Ed eligible individuals with 75% showing an increase in knowledge and awareness about benefits to increasing consumption and access to fruits and vegetables.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Imperial County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed local Objective #1 (FFY 2017-FFY 2019):

By September 30, 2019, a minimum of 5 early childcare centers, will adopt, implement and maintain site wellness policies and procedures that create healthy changes in their environment to support healthy eating and active living and increase access to healthy foods and beverages reaching 2,600 children and adults.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	LIA's will convene through the existing Childhood Obesity Prevention Alliance's (COPA) and County Nutrition Action Plan (CNAP) Workgroups at least 6 times per year to engage partners in SNAP-Ed efforts and t help advance SNAP-Ed goals using a collective impact approach. In year 1-3, LIA,s with the assistance of community partners will develop a plan of action that addresses local strategies, in particular healthy eating related policy systems and/or environmental change strategies to be implemented at SNAP-Ed eligible early child care sites. <td>or wellness councils if not already in place.
The rate by which activities are completed will vary from site to site, and in part, will depend on the level of readiness of each. The following are the core activities to be conducted each year:

Year 1: Request to participate in wellness/healthy living advisory meeting to discuss and assess the status of their wellness policies. Policies will be assessed using approved & appropriate tools. Identify opportunities and barriers for addressing healthy eating and physical activity in wellness policies.

Year 2: Provide technical assistance, resources, templates and sample materials for all sites as needed to begin implementing wellness strategies.

Year 3: Provide technical assistance, as needed on the adoption, implementation and maintenance or enforcement of policies. Begin evaluating the impact and effectiveness of the previously adopted wellness strategies.</td>

3.3	Participate in childcare centers wellness, advisory, and/or parent committees to discuss and assess current wellness policies in place or the possibility of new policies. Collaborate with committees to address healthy eating and active living practices and wellness policies. Seek opportunities to develop, adopt and/or implement wellness policies that support healthy eating and active living. Opportunities will include, but are not limited to: 1) Creating an environment that makes fresh fruit and vegetables an option and easy choice. Use of school garden produce. 2) Adoption of school gardens in wellness policies to support the availability of fresh vegetables. Estimated number of SNAP-Ed eligible individuals reached by the adoption and/or implementation of PSE's is 1000 by the end of the 3 years: 400 in Year 1, 300 in Year 2, and 300 in Year 3. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, at least 7 SNAP-Ed qualifying retail stores will have increased access to fruits and vegetables and beverage options through the adoption and/or implementation of policy, systems and/or environmental interventions, reaching at least **15,715** SNAP-Ed eligible individuals.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy food and beverage policies
- Healthy in-store marketing and promotion
- Store exterior and interior improvements
- Purchased/donated food policies
- Point-of-purchase labeling to favor healthy foods and beverages
- Increased number of school pantries
- Donated food policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

By September 30, 2019, at least 7 SNAP-Ed qualifying retail stores will have increased access to fruits and vegetables and healthy beverage options through the adoption and/or implementation of policy, systems and/or environmental interventions, reaching at least **15,715** SNAP-Ed eligible individuals.

1. **FFY 2017 (Year 1) Annual Objective:**

   i. By September 30, 2017, the LHD will recruit, support, educate and train at least 4 retail store owners and/or staff in SNAP-Ed qualifying neighborhoods, and at least 2 retail stores will have increased access and/or promotion of fruits and vegetables and healthy beverages, reaching at least 3,610 SNAP-Ed eligible individuals.

   ii. By September 30, 2017, the LHD will provide resource management, healthy eating and active living education to 1,543 SNAP-Ed eligible individuals in at least 6 SNAP-Ed eligible sites including retail stores and other SNAP-Ed eligible sites within the surrounding area to help increase awareness around healthy eating and active living and promote opportunities to access fruits and vegetables and healthy beverages from retail stores and/or emergency food sites.

2. **FFY 2018 (Year 2) Objective:**

   i. By September 30, 2018, the LHD will train and provide technical assistance and resources to at least 2 additional retail store owners and/or staff in SNAP-Ed qualifying neighborhoods, and at least 2 retail store will have increased access and/or promotion of fruits and vegetables and healthy beverages, reaching at least 1,895SNAP-Ed eligible individuals.

   ii. By September 30, 2018, the LHD will provide resource management, healthy eating and active living education to 1,029 of SNAP-Ed eligible individuals in at least 4 new SNAP-Ed eligible sites including retail stores and other SNAP-Ed eligible sites within the surrounding area to help increase awareness around healthy eating and active living and promote opportunities to access fruits and vegetables and healthy beverages from retail store, emergency food and/or farmers' market sites.

3. **FFY 2019 (Year 3) Objective:**

   i. By September 30, 2019, the LHD will recruit, support, educate and train at least 1 additional retail store owners and/or staff in SNAP-Ed qualifying neighborhoods, and at least 1 retail store will have increased access and/or promotion of fruits and vegetables and healthy beverages, reaching at least 1,895 SNAP-Ed eligible individuals.

   ii. By September 30, 2019, provide resource management, healthy eating and active living education to 1,028 of SNAP-Ed eligible individuals in at least 4 new SNAP-Ed eligible sites including retail stores and other SNAP-Ed eligible sites within the surrounding area to help increase awareness around healthy eating and active living and promote opportunities to access fruits and vegetables and healthy beverages from retail stores and/or emergency food sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Imperial County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/22/2017**

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):

By September 30, 2019, at least 7 SNAP-Ed qualifying retail will have increased access to healthy food and beverage options through the adoption and/or implementation of policy, systems and/or environmental interventions, reaching at least **15,715** SNAP-Ed eligible individuals.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Convene through the existing Childhood Obesity Prevention Alliance's (COPA) County Nutrition Action Plan (CNAP) Workgroup, Tobacco Coalition and/or other local groups at least 6 times per year to assist in the development of a plan that promotes healthy eating-related policy systems and/or environmental change strategies at retail stores. Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Inyo County

Three-Year
Integrated Work Plan
FFY 2017–2019

County Name: **Inyo**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
x	California Department of Public Health: CDPH: Inyo County Health and Human Services (LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Inyo County is a rural, geographically isolated county located on the east side of the Sierra Nevada, between two mountain ranges and near the California-Nevada border, covering 10,180 square miles. It has one of the smallest population bases in the state with 18,410 people. According to the American Community Survey (ACS) 2009-2013, the majority of Inyo County's population identifies as white, with 20.8% identifying as Hispanic and 12.7% identifying as American Indian.

Economic conditions in Inyo County impose hardships on many people due to the combination of a high cost of living and limited work availability. According to the ACS, the household income average of $61,137 is less than the state's average of $85,408. The ACS estimates that the poverty rate is 12%, and the 2015 County Health Rankings state that the child poverty rate is 23%. According to Map the Meal Gap 2015, the overall food insecurity rate is 14.8%, and the child food insecurity rate is 23.7%, which is an increase from 2014. The California Department of Education reports that 71% of students are eligible for free or reduced price school meals and approximately 69% of schools are SNAP-Ed eligible.

According to the most recent County Health Rankings by the Robert Wood Johnson Foundation, Inyo County ranked 40th for health outcomes and 27th for health factors. A few of the most troubling statistics have to do with nutrition and lifestyle. The adult obesity rate in Inyo County is 23%, as reported in the County Health Rankings. According to the 2015 SNAP-Ed County Profile, the percentage of adults ages 18-64 who are SNAP-Ed eligible in Inyo County is 24%, and the percentage of adults ages 65 and up who are SNAP-Ed eligible is 32%. The percentage of children ages < 6 years who are SNAP-Ed eligible is 47% and for children ages 6-17 it is 36%. Inyo County has a large aging population, and 84% of Medicare recipients' ages 64-75 are monitored for diabetes, which is greater than the overall state rate of 81%. The rates of overweight/obesity among school age children in Inyo County are worse than the state rates. Among school-aged children, 43% of 5th graders, 40% of 7th graders, and 38% of 9th graders are not at a healthy weight, as defined by the Fitnessgram Assessment.

A total of 5,221 people in Inyo County are eligible for SNAP-Ed. The SNAP-Ed eligible population in Inyo County has slightly different demographics than the general population. Specifically, children 0-17 years old are overrepresented, as are those identifying as Hispanic and American Indian. The primary language of the SNAP-Ed population is English or Spanish. Approximately 31% of low-income children 2-4 years old are overweight or obese, and 43.2% of low-income children 5-19 years old are overweight or obese, which is worse than the state rate. According to the USDA Food Atlas, the obesity rate among low-income preschoolers went up one percentage point between the time periods of 2006-2008 and 2009-2011 and is 14.8%. The prevalence of overweight/obesity among adults in Inyo County is 62%, which is similar to SNAP-Ed adults at 61%.

Only 2,073 (11.6%) people participate in CalFresh. One of the concerns of our staff is that many SNAP-Ed participants who qualify for CalFresh elect not to participate in CalFresh due to social stigma, as expressed by program participants.

SNAP-Ed eligible neighborhoods include census block groups on the east side of Bishop and in Lone Pine. In past years, the Inyo County SNAP-Ed Program has utilized ethnicity to qualify sites in Bishop, Lone Pine, and Tecopa. Underserved areas of the county are Lone Pine and Tecopa, as the main population base is in Bishop. Tecopa in particular does not receive as many county services due to its remote location on the other side of Death Valley National Park, a 5-hour drive from Bishop.

Inyo County possesses several key assets that make it easier for people to live healthy, active lives. Inyo County has 22 official wilderness areas, the second largest number in the state. Crime is low, and open spaces are found around towns. Only 15% of adults over 20 years of age report being physically inactive, which is better than the comparable state statistic.

Other nutrition-related programs are County WIC and Toiyabe Indian Health Project WIC.

4. **Community Assessment**

The information in the jurisdiction description comes in part from the SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, and Feeding America Map the Food Gap, Food Insecurity in Your County. These data sources have directly affected our County's plan for nutrition education interventions primarily focused on adults, seniors, and schools with a high percentage of SNAP-Ed target populations. This data informed the need to develop a strategic campaign targeting the SNAP-Ed eligible Latino community.

The Inyo County SNAP-Ed eligible population makes up about 29% of the total population of Inyo County. 48.5% identify as white, 34.5% as Hispanic, and 13.4% as American Indian. People identifying as Hispanic make up only 19.4% of the total population and are overrepresented in the SNAP-Ed eligible population. Due to the language barrier, the Latino community is the most underserved population group in the county. As a result, our program has hired a bilingual educator and capitalizes on resources from the Champions for Change Latino Campaign. Our program now offers separate classes in English and Spanish.

This same data identified the importance of continuous collaboration with various other Inyo agencies in order to promote the Rethink Your Drink campaign at community outreaches and in public messaging. According to the SNAP-Ed County Profiles, 32% of children and teens in Inyo County consume 1 or more sugar-sweetened beverages per day. Inyo agencies including First 5 have recorded a decrease in self-reported sweetened beverage consumption among their clients as a result of specific activities emphasizing Rethink Your Drink. The Inyo collaborative Team Inyo plans to continue the campaign and community education through multiple venues.

According to the ACS, roughly 18% of children 0-18 live below the federal poverty level, which increased from 14% in 2003. 24% of children under 5 live below the poverty level, up from 20% in 2000. 29% of families with children under five only, live in poverty, compared with 14% at the state level. Significantly, 82% of single female parent families with children under 5 in Inyo County are in poverty, while the percentage at the state level is 38%. Children under 6 years old make up 47% of the SNAP-Ed population in Inyo County. Based on this information, our program is adding the youngest age group and their parents as a target group.

In addition, the ACS identifies that 7% of adults 65 years and older are in poverty. Inyo County is an ageing population, 19.1% of the population is 65 years and older. 32% of these seniors are SNAP-Ed eligible. This data revealed the need for collaborating and expanding efforts to target this group in nutrition education interventions.

The only assessment tool available to us at this time is to review key national and state data sources that have county-level data. We pulled the most recent data from the US Census Bureau, Feeding America, the Robert Wood Johnson Foundation, and others to give us a picture of our jurisdiction's needs.

The SNAP-Ed County Profile does not give a clear picture of obesity prevalence or physical activity and nutrition habits of people in our jurisdiction. Due to the small size of our population, Inyo County data is combined with data from 6 other disparate counties.

From reviewing updated sources this year, we have learned that the overall adult obesity rate is higher than what is listed on our 2015 SNAP-Ed County Profile, and that Inyo child overweight and obesity rates, particularly for ages 5-19 and for low income, are high and are on the rise. We know that Hispanic and American Indian people are overrepresented in the Inyo SNAP-Ed eligible population. We also know that Inyo County has an aging population and that a high percentage of low income, older adults in Inyo suffer from diet-related health problems. This data informs our work by underlining the need for programming in both English and Spanish for children, families, and older adults.

Our jurisdiction lacks local data sources. In 2016, we started the CX3 process as a way to engage community members, gain understanding of SNAP-Ed eligible neighborhoods and the needs of SNAP-Ed eligible populations, as well as identify community changes that community residents want to achieve. We are currently compiling the CX assessment data that will help drive SNAP-Ed interventions in Inyo County.

5. **Community Change Goals**

Long-term community change goals in Inyo County, specifically pertaining to nutrition and obesity, include reducing overall rates of overweight and obesity among children and adults; increasing the availability and affordability of healthy foods; increasing physical activity opportunities and environments; and implementing strong school wellness policies county-wide. Our long-term community change goals directly align with our community assessment, which indicates a need to reduce rates of overweight and obesity through a combination of nutrition education and physical activity interventions for children and adults; efforts to improve the availability, affordability, and appeal of healthy foods; and a need to strengthen school wellness policies, as well as their implementation, throughout the county to create a healthier food environment for our children.

Our long-term community change goals will be supported by policy, systems, and environmental changes in the following settings:

- Schools (LEARN): strengthen and implement school wellness policies that create a supportive nutrition and physical activity environment; implement Smarter Lunchrooms Movement principles.
- Community (LIVE/SHOP): promote and improve access to and availability of healthy foods and beverages; encourage healthy food and beverage standards and policies; mobilize community partnerships to support healthy eating and active living.

Specifically, Inyo County will achieve the following Three Year Objectives:

1. By September 30, 2019, at least two schools will adopt PSE changes that improve the food and physical activity environments where students in grades K-12 learn.
2. By September 30, 2019, at least one PSE change will be implemented in a community setting to increase access and availability of healthy food and beverages and improved resource management, reaching 1000 SNAP-Ed eligible individuals.

6. **Partnerships and Collaborative Efforts**

Team Inyo for Healthy Kids is a collaborative that was established in April 2010 to address childhood obesity in Inyo County. The mission of the collaborative is to work with the community and families to prevent and reduce childhood obesity by promoting healthy eating and active living. Team Inyo meets bi-monthly. Members of the collaborative include the Assistant Superintendent of Schools, City of Bishop Parks and Recreation staff, 4-H Program Director, County of Inyo and Toiyabe WIC, Inyo County Maternal Child Adolescent Health Director, Inyo County Dental Case Manager, First 5 Program Director, Inyo County Child Health Disability Prevention Nurse Case Manager, Toiyabe Preventive Medicine Department, and a fast food restaurant owner.

Inyo County

Three-Year
Integrated Work Plan
FFY 2017–2019

In 2015, through partnership and collaboration, Team Inyo was successful in planning, purchasing, and installing a new water station in downtown Bishop near the high school in a SNAP-Ed eligible census tract. The water station is a public drinking fountain and bottle filler with one fountain arm for children that are also handicapped accessible. It is located on the corner of Main and Academy in Bishop, one of the main streets students and residents use to cross town from the schools and library to downtown and east neighborhoods. It was made possible by a partnership between the City of Bishop and Toiyabe Indian Health Project. Team Inyo will continue to educate Inyo communities on the positive health effects of drinking more water and will partner with other community centers and venues, particularly schools, to assess the need for hydration stations.

7. **Key Messages**

	Food Safety	x	Physical Activity		Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

	Lean Meat & Beans				
	Sodium & Potassium				
x	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Inyo County reviewed the approved integrated curriculum provided by the state agencies and considered each approved resource/curriculum to determine the best options for Inyo County. Curriculum and resources were specifically chosen that will best serve the needs of Inyo County's SNAP-Ed eligible population, both adults and children, and will align with our three-year and annual SNAP-Ed objectives. All materials will be available in both English and Spanish as needed.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Inyo County

Three-Year
Integrated Work Plan
FFY 2017–2019

9. **Intervention and Evaluation Plan Narrative Summary**

Inyo County SNAP-Ed with the help of partners will provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration throughout the county. We will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change.

Our SNAP-Ed Program will employ evidence- and practice-based interventions and include research-based interventions. Inyo County SNAP-Ed will conduct activities at the individual and interpersonal level of the Social Ecological Model. We will also incorporate the environmental approach which may address several or all elements of the Social Ecological Model targeting interpersonal as well as organizational and community venues. In the schools setting we will train and support teachers as extenders to provide direct education in the classroom and in after school programs as appropriate. In the community setting we will provide training, technical assistance and resources to partners such as retail, food banks, and farmers markets to deliver nutrition education and physical activity messages to the SNAP-Ed target audience.

The intervention plan progresses to interventions at the environmental level of the Social Ecological Model (SEM) via the inclusion of policy, systems and environmental (PSE) change efforts that include implementing school wellness policies that promote access to healthy foods, beverages and physical activity. Healthy nutrition and physical activity policies and procedures will be implemented in early care and education settings and K-12 schools, which will include (but are not limited to) standards for all foods and beverage offered on site, opportunities for daily physical activity, limits on screen time and the provision of quality nutrition education, garden-based and physical activity education and marketing guidelines for materials posted and shared on site. PSE efforts will also be focused on improving the school lunchroom utilizing the Smarter Lunchrooms Movement (SLM) principles and retail store environments with product placement strategies, Healthy check-out lanes, Healthy grab and go, smart snacking stations, healthy items in prominent school lunchroom and store locations with the removal of child oriented advertising and less healthy foods and beverages at children's eye level.

Evaluation processes will be used to improve services for all local objectives. Our SNAP-Ed Program will use Formative, Process (RE-AIM), and/or curriculum-specific evaluations to determine effectiveness. For example, Eating Smart, Being Active participants will complete a pre- and post-survey that according to the State Research and Evaluation Unit, addresses multiple indicators included in the Western Region's SNAP-Ed Evaluation Framework and is comprehensive in scope. Inyo County is not required to conduct impact/outcome evaluation according to our contract because our budget is $63,000 per year. Per the deliverables document, counties that receive under $350,000 are not required to complete deliverable 4, conducting impact/outcome evaluation of nutrition education classes.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, at least two schools will adopt PSE changes that improve the food and physical activity environments where students in pre-school and grades K-12 learn.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness
- Farm to Fork/Local Procurement
- Healthy Food and Beverage Standards
- Structured Physical Activity

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, Inyo County will work with at least 2 SNAP-Ed eligible school sites to assess and plan for adoption or improvements to existing school wellness policies to support improvements to physical activity and nutrition behaviors, and will provide training and technical assistance on the implementation of school wellness policies for at least 1 of the school sites.
    b. By September 30, 2017, Inyo County will provide direct and/or indirect education on healthy foods and physical activity at a minimum of one SNAP-Ed eligible school site reaching 200 students and 150 parents.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, one SNAP-Ed eligible school will adopt and implement wellness PSEs to increase availability of healthy food and beverages and access to active living opportunities, reaching 500 SNAP-Ed individuals.
    b. By September 30, 2018, Inyo County will provide direct and/or indirect education on healthy foods and physical activity at an additional SNAP-Ed eligible school site reaching 400 students and 300 parents.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, one additional SNAP-Ed eligible school will adopt and implement wellness PSEs to increase availability of healthy food and beverages and access to active living opportunities, reaching 500 SNAP-Ed individuals.
    b. By September 30, 2019, Inyo County will provide direct and/or indirect education on healthy foods and physical activity at a minimum of two SNAP-Ed eligible school sites reaching 400 students and 300 parents.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Inyo County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019, at least two schools will adopt PSE changes that improve the food and physical activity environments where students in grades K-12 learn.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Annually, reach a minimum of 350 SNAP-Ed eligible individuals in school and community settings with direct and/or indirect education using NEOPB-approved materials and curricula. Taste testing will be included.	x CED x CEI MPR C&C TTA	CWD x LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 x Year 2: Q1 X, Q2 X, Q3 X, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF, sign-in sheets, agendas
1.2	Annually, use approved media and public relations techniques to increase awareness of SNAP-Ed activities and the role of PSE changes in school settings to improve community health among SNAP-Ed eligible individuals and stakeholders. Activities may include, but are not limited to: promoting events and SNAP-Ed approved resources, disseminating success stories, and using social marketing activities. 2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Kern County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.

[2] Defined as not running out of food at the end of the month.

[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.

[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Kern County is located at the southern end of the San Joaquin Valley, bordered by the counties of Kings, Tulare, Inyo, San Bernardino, Los Angeles, Ventura, Santa Barbara, and San Luis Obispo. Kern is the third-largest county in California, the nation's third-largest state. With a total area of 8,161 square miles—land area of 8,141 and water area of 20—Kern County is larger than the land area of Massachusetts, New Jersey, or Hawaii, and larger than the states of Connecticut, Delaware, and Rhode Island combined. About one-third of the County is situated on the flat floor of the San Joaquin Valley. The Temblor Mountain Range lies to the west of the Valley and occupies the County's western border. The Tehachapi Mountains lie to the southeast of the Valley with a wide belt of Sierra-Nevada foothills and ranges extending north to cover almost a third of the County's area. East of this mountain belt is the Mojave Desert, the remaining third of the County.

A major crossroads for central California, Kern County hosts a major freeway system that provides access to locations throughout the State, country, and beyond. Highway 99 and Interstate 5 enable north-south travel to locations throughout much of the San Joaquin Valley, joining at Interstate 80 in Sacramento in the north, and between Bakersfield and the Tehachapi Mountains to the south. I-5 travels north through Oregon and Washington before entering Canada. In the south I-5 passes through Los Angeles and San Diego, reaching all the way to Mexico. Interstate 5 and Highway 99 also connect to east-west routes within Kern County—Highways 46 and 166 extend west to the Pacific coast while Highway 58 connects with Interstates 40 and 15 to provide eastward access to Arizona, Nevada, and the rest of the contiguous United States.

Kern County has a population of 856,158 with 44.6% SNAP-Ed eligible (income <185%FPL). The number of SNAP-Ed eligible people living in Kern County is 381,846. Of this population, 63.7% identify themselves as Hispanic, 24.8% White (non-Hispanic), 2.7% Asian (non-Hispanic), 6.0% African American (non-Hispanic), 0.4% American Indian/Alaska Native, 0.1% Native Hawaiian/other Pacific Islander, 2.1% multi-racial , and 0.3% another race, and languages are 491,435 (57.4%) English, 323,628 (37.8%) Spanish and 41,095 (4.8%) other. When categorized by age group, the total of children <6 years is 50,196 (58.8%), 6-17 years old is 91,142 (55.3%) adults 18-64 is 196,059 (40.3%), and seniors 65 and above is 25,174 (32.8%). As of January 2015, the 157,116 CalFresh participants represented 19.3% of Kern County's total population.

Of the 151 census tracts in the Kern County, 67 (44.4%) are SNAP-Ed eligible (≥50% incomes<185%FPL based on all races data for 2007-2011. Of the 263 schools in the Kern County, 211 (80.3%) are SNAP-Ed eligible (>50% FRPM Enrollment 2012) with 71.1% of students being eligible for free/reduced price meals. Compared to the rest of the state, Kern County bears a heavy and disproportionate burden of poor health, suffering from significantly higher rates of chronic disease and obesity. Kern has the second highest rate of death from diabetes and the fourth rate of deaths to heart disease. The adult overweight or obesity prevalence in Kern County is 77.6% overall, 75.0% among SNAP-Ed eligible adults, and almost 50% of 5th through 9th graders in Kern County are found to not be physically fit. Moreover, the California Health Interview Survey (CHIS) reports that over half (50.1%) of children (2-11 years) ate 5 or more servings of fruits and vegetables and more than a quarter (26.0%) of adults ate fruit and vegetables 3 or more times yesterday for this reason we would like to increase access and consumption of healthier foods. Kern County has an overall food insecurity rate of 18.9% and a child food insecurity rate of 31.0%. For these reasons, we would like to decrease consumption of unhealthy food and beverages, and increase consumption of water.

Further compounding the issue, Kern county has a low number of recreational facilities (n= 4.6) per 100,000 residents compared to the state which is (n=8.6) per 100,000 and the percentage of children and teens (ages 1-17 years) who have a park or open space within walking distance lower than the state rate, 73.1% and 84.7% respectively. Therefore, the need to increase physical activity opportunities throughout the day is extremely important. Kern County would greatly benefit from both nutrition education and physical activity related interventions.

4. **Community Assessment**

The information in the jurisdiction description comes in part from the SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, Feeding American's Map the Food Gap, and Food Insecurity in Your County. Using these data sources, nutrition education interventions primarily focused on students and worksites with a high percentage of SNAP-Ed target populations. Media related intervention activities were developed and formed by data showing that almost 48% of children and teens in Kern County consume one or more sugar-sweetened beverages per day. Media messages and activities that support healthy beverage promotion on a broad scale would help ensure that the SNAP-Ed eligible population is reached in all parts of the county. This same data also formed the need to develop community events such as county forums and interactive booths at health fairs. These community events provide an opportunity for SNAP-Ed funded staff to connect the messages conveyed in media interventions to the target audience who attend these fairs and county forums. The data found in the county profiles also contributed to the identification and development of coordination and collaborative intervention activities.

This work plan was also formed by Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessments conducted in eight low-income communities (Arvin, South East Bakersfield, Oildale, Shafter, Greenfield, Lamont, Weedpatch, and Delano) as well as community

forums to share the findings and identify areas for future action that encouraged resident support. Area residents and community partners were interested to work with SNAP-Ed implementing agencies on the following Policy, Systems and Environment (PSE) change efforts: working with local retailers to improve their food store quality scores especially those located near public schools, and starting or supporting school and community gardens. Baseline data retail survey data collected as part of the CDPH's Healthy Retail Campaign (Proposition 99 funded data collection) will help identify possible retail sites for SNAP-Ed interventions, resulting in a synergistic effect from a combining of public health interventions conducted by tobacco control, alcohol and drug, and SNAP-Ed to create healthier retail environments. The findings of the study "Healthy Stores for a Healthy Community Survey 2013" commissioned last summer by the California Department of Public Health Tobacco Control Program with the collaborative partnership of Alcohol and Nutrition Programs adds another factor that impacts our health: the stores where we shop. The "Healthy Store for a Healthy Community Survey 2013" was designed to assess the availability of healthy options provided in selected neighborhoods. A total of 320 retail outlets were randomly selected in Boron, California City, Ridgecrest, Bakersfield, Arvin, Lebec, Frazier Park, Taft, Shafter, and Delano. Using hand held devices, six youth Volunteers from Centennial, Frontier, Stockdale, and Arvin High Schools went store-to-store to collect survey data. They were chaperoned by staff from Kern County Public Health Services Department (KCPHSD) Tobacco Education Program, KCPHSD, and Call to Action (Community Transformation Grant (CTG), Kern County Department of Mental Health Friday Night Live Partnership, and the Kern County Superintendent of Schools Tobacco Use Prevention Education Program. In Kern County, we found that:

- The majority of stores surveyed (80%) that sell candy, mint, and liquor flavored non cigarette tobacco products are located within two blocks of schools.
- 74% of stores sell the most popular brand of cigarillos for under $1.
- Only 37% of stores surveyed sell at least one type of fresh fruit or vegetable.
- 79% of stores have unhealthy exterior advertising (alcohol, tobacco, sugary drinks).

As far as alcohol is concerned, in Kern County, 88% of stores sell alcohol and alcopops (sweetened or fruit-flavored alcohol beverage), and of stores that sell Alcohol, 40% have alcohol ads near candy/toys or below three feet. The survey also found that electronic cigarettes (e-cigarettes) are widely available with 42% of surveyed stores in Kern County selling e-cigarettes. Statewide, the number of stores selling e-cigarettes quadrupled in the two years, from 11.5% in 2011 to 45.7% in 2013. The survey also includes state, regional and county level data with new insights on the density of stores selling tobacco and their proximity to schools; types of tobacco and alcohol products being sold; advertising and placement of such products in stores; the availability of e-cigarettes; and the availability and promotion of unhealthy and healthy food options including low or non-fat milk and fresh fruits and vegetables.

Given the high level of healthy and affordable food and beverage inaccessibility, Kern County LIAs understand the importance of working in retail to reduce the number of food deserts and swamps in our county. Our county's short- and long-term goals are to engage residents in actively evaluating our environment (e.g. CX3, engaging in a communal discussion of how to improve our food and beverage landscapes (e.g. community meetings) and implementing strategies that addresses these issues (e.g. healthy retail, corner store conversions, adding water stations in parks and other public areas, etc.)

In addition, KCAASD, the local Area Agency on Aging (AAA), conducted a needs assessment of elderly adults in Kern County, which identified food insecurity and access to and the consumption of fruits and vegetables as major issues within the county. As a result of this survey, local intervention strategies will include curriculum focused on increasing access to and consumption of fruits and vegetables, increasing consumer information about availability of food programs within the county and physical activity interventions at SNAP-Ed eligible sites.

5. **Community Change Goals**

Based on results of the Community Assessments, existing data was incorporated into our LIA assessment pool to help determine local need. Nutrition and obesity issues have been determined to be priority areas of focus in Kern County. We worked with our larger community partners to determine our community change goals (that relate to this SNAP-Ed work plan). They include: increasing consumption of and access to healthy food and decreasing the consumption of sugary drinks, increasing physical activity rates for all residents, food resource management, and focusing on school-based wellness strategies. Kern County's SNAP-Ed funded LIAs will focus their efforts on the SNAP-Ed eligible portion of the county's population and on SNAP-Ed allowable interventions and activities which align with the United States Department of Agriculture (USDA)-Western Regional Office (WRO) Evaluation Framework.

While Kern County had multiple data sources to use when assessing community needs, because of the focus on nutrition and obesity issues we focused on data that supported that work. The data pointed towards efforts pertaining to healthy retail strategies, as well as school-based settings, faith base settings and senior centers.

LIAs will support long term community change goals in the county by working with community partners to identify strategic partners and convene community-wide, multi-sectorial coalitions to improve nutrition and physical activity; create an environment that makes healthy food and beverage options the routine, easy choice; improve availability, accessibility and demand for healthy foods and beverages; ensure opportunities for physical activity and enhance the physical and built environment around the targeted institutions where the SNAP-Ed population can be found; develop and support a sustained, targeted physical activity and nutrition social marketing program (e.g., community-wide campaigns to promote healthy eating and active living) and provide evidence-based education with a focus on behavior change goals; build capacity and engagement at school sites for comprehensive nutrition and physical programs that help to achieve and further strengthen school wellness policies through nutrition education,

increased access to physical activity as well as improvements to the school environments and practices, assist school sites to achieve federal healthy school recognition standards, educate community/partners about policy/legislative changes that would improve retail environment; establish zoning ordinances for type/amount of marketing; work with partners to attract and create an environment conducive to new healthy retail venues such as new grocery stores, healthy mobile markets, produce stores, and farm stands; improve transportation options to healthy retail venues and healthier food options.

Over the past six years, KCPHSD has made it a practice to develop strategies that run in parallel with various efforts and funding streams. NEOP strategies are drafted to complement existing funding from Federal, State, County and other funders, as well as to maximize the reach of each project. This is similar to how Kern County LIAs have practices sharing and integrating their efforts over the past four years. In this way, our county is able to efficiently utilize existing resources from both NEOP and non-NEOP funded partners. This format has been incorporated in order to secure project sustainability.

Specifically, Kern County SNAP-Ed LIAs goal achieve the following three-year objectives:

1. By September 30, 2019, five SNAP-Ed eligible sites will develop wellness policies and procedures at senior centers, churches, and schools including making healthy site changes to improve the nutrition, physical activity, and/or screen time environment for participants;
2. By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and non-sugar beverages at eight SNAP-Ed qualifying neighborhood retail stores, eight food banks, senior centers/public housing facilities by adopting and implementing the policy and site changes;
3. By September 30, 2019, 20 low resource schools will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers;
4. By September 30, 2019, at least 50% of class graduates (graduates complete at least three out of four classes in person) will improve at least one food resource management skill such as grocery shopping with a list, comparing prices, or using the Nutrition Facts label.

These objectives allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus on the following PSE strategies in the following settings:

- School Settings
- Senior Centers
- Churches
- Healthy Retail Environment
- Parks

The PSE strategies are detailed within each three-year objective and speak to the connection to our community change goals.

6. **Partnerships and Collaborative Efforts**

The Kern County SNAP-Ed LIA Partnership includes the Kern County Public Health Services Department (KCPHSD), the UCCE of Kern County, and the Kern County Aging and Adult Services Department. All three partners are funded through the USDA SNAP-Ed funding, and work together to create the annual work plan and complete its activities. The partnership is led by the Work Plan Coordinator (WPC), housed at the KCPHSD. The WPC coordinates monthly partnership calls, and quarterly in-person meetings to assess work plan progress and will connect with County Welfare Department to promote SNAP-Ed services to the community.

The Kern County SNAP-Ed LIA partners also participate as a part of the Kern County Nutrition Action Plan (CNAP). The Kern County CNAP is a larger community health partnership that includes Food and Nutrition Service (FNS) funded and non-funded interested partners serving Kern County in the areas of food programs, nutrition education and physical activity promotion. The group's goal is to coordinate USDA food program interventions and collaboration to increase food security in the county. The CNAP strategic plan, initiated in FFY15, will be updated with target objectives to provide access to healthy foods and/or physical activity – this sets the agenda for partner work for the year ahead. The group meets four times per year. Examples of other partners include: Women, Infants and Children (WIC), California Department of Education (CDE), Community Action Partnership of Kern (Food Bank), American Cancer Society, Bakersfield City School District, Bakersfield Homeless Shelter, California Health Collaborative, Central Valley Health and Nutrition Collaborative, Clinica Sierra Vista (WIC), Community Action Partnership of Kern, Dairy Council of California, Golden Empire Gleaners, Greenfield Family Resource Center, Greenfield Union School District, Kern County Department of Human Services, Kern County Environmental Health Services Division, , Kern County Superintendent of Schools, Kern High School District, Kernville Union School District, Lamont School District, Lamont Weedpatch Family Resource Center, United Farm Workers Foundation, Kern Food Policy Council, Paramount Farms, and Boys & Girls Club of Kern County.

The Kern County CNAP recognizes the value of the SNAP-Ed funding within the county. The collaborative works hard to include USDA FNS SNAP-Ed funded partners, as well as unfunded partners from outside the traditional health community to ensure goals are met. By including non-traditional partners (such as planners, engineers, public officials, youth, etc.), the collaborative can be flexible in its approach to health needs, as well as bring a diversified funding portfolio to the table. The Kern County CNAP sets the agenda for priority health work in the county. Partners meet to share assessment data and develop community health goals (see Section 5– Community Change Goals for more information). The Kern County SNAP-Ed LIA partners are working to ensure its activities and objectives are aligned with the larger Collaborative, and will work with the larger Collaborative to achieve greater health outcomes for the county through integrated and mutually-beneficial activities (both in the FFY17-19 three year Work Plan and the larger community plan).

7. **Key Messages .**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will defined and appropriate for the target audience in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The Local Implementing Agencies (LIAs) in Kern County will utilize the intervention strategies from the SNAP-Ed Interventions Obesity Prevention Tool Kit for States (January 2016 update), Kern County Public Health Services Department, Kern County Department of Aging & Adult Services and University of California Cooperative Extension of Kern County will collaborate to provide comprehensive multi-level behavior focused nutrition education and physical activity promotion, direct education, community events, training and technical assistance, while also utilizing media and public relations and

coordination/collaboration with partners throughout the county. The agencies will promote the 2015-2020 Dietary Guidelines and SNAP-Ed intervention strategies proven to change behavior. Delivery methods include:

- Adult: series based classes, one-time classes, special events, and parent classes in the school environment targeting food resource management curricula Plan, Shop, Save and Cook (PSSC), Making Every Dollar Count (MEDC), and Healthy, Happy Families (HHF).
- Youth: classroom lessons with FNS approved curriculums.
- Community: health fairs and community forums.
- CNAP: a strategic plan will be developed to coordinate USDA food program intervention and efforts to increase food security.
- Media: publications, social marketing/media and public relations efforts.
- Training: agencies will provide training to partners to further leverage SNAP-Ed interventions strategies.
- Utilizing CX3 assessment findings to implement PSE activities (i.e. corner store conversation and food tasting to promote more fruits and vegetables) with retailers.
- Work with six unfunded partners for walkability park project.

The implementing agencies in Kern County - Kern County Public Health Services Department (KCPHSD), Kern County Aging & Adult Services Department (KCAASD), and University of California Cooperative Extension Kern County (UCCE) - will collaborate to provide education and support to consume healthy food and beverages, decrease consumption of less healthy food and beverages and increase physical activity to the SNAP-Ed eligible population by September 2019, and will meet state goals by promoting more fruits and vegetables and physical activities. This will be accomplished through comprehensive behavior focused nutrition education/physical activity promotion with environmental supports, family resource management education, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with Community Based Organizations (CBOs) throughout the county.

Delivery methods include:

- For the adult target population: series based classes; one-time classes; community events; parent classes in the school environment.
- Youth: classroom lessons and food tasting demonstrations, Harvest of the Month, and school garden activities.
- Utilizing CX3 assessment findings to implement Policy, Systems and Environment (PSE) activities with retailers.

FFY 2017-2019:

- KCAASD will provide approved evidence-based intervention such as the "Eat Smart, Live Strong," "Eat Healthy. Be Active Community Workshop," or other curriculum to promote increased fruit and vegetable consumption and physical activity at senior centers and other sites in Kern County and will conduct evaluation of the nutrition education.
- The KCAASD will implement an approved evidence-based physical activity intervention such as the "Staying Healthy through Education and Prevention," "Young at Heart," or other curriculum. The programs will be delivered using a direct education strategy.
- KCAASD will provide Food Demonstrations to assist low income seniors to identify ways of preparing meals with healthy ingredients, such as fruits and vegetables, within a limited budget. KCAASD will conduct evaluation of the intervention.
- The KCAAS will implement an approved evidence-based physical activity intervention such as the "Staying Healthy through Education and Prevention," "Young at Heart," "Matter of Balance," or other curriculum. The programs will be delivered using a direct education strategy.
- KCPHSD will provide single session nutrition education classes at 30% of food pantries/food banks in the county.
- KCPHSD will recruit and work with at least eight motivated retailers to improve their CX3 store scores by offering and promoting healthier food items.

- KCPHSD will provide a four class series of nutrition education classes in eligible public schools for grades K–12 reaching 11 % of the eligible schools in the county.

- KCPHSD will provide a four class series of nutrition education and physical activity classes with Faith Base utilizing Body and Soul, MyPlate, Rethink your Drink and the FNS approved curriculums.

- UCCE will provide series based adult education in family resource management to Head Start Centers and other SNAP-Ed eligible participants. (See below, under Participants)

- Program Activities: UCCE will deliver the series-based nutrition education/food resource management curricula PSSC, MEDC and HHF in group settings. Physical activity breaks and structured physical activity programs are also being implemented in the PSSC and MEDC classes. Educators will also provide indirect education at community health events and fairs.

- Delivery Methods: The series, PSSC and MEDC will be delivered by UCCE-educators in group settings. UCCE also trains Head Start Home Base Educators to teach PSSC series. Head Start Home Base Educators administer the PSSC Checklist before the PSSC lessons are received and then administer an exit checklist upon participants receiving all four PSSC lessons.

- Participants: The participants of the Kern County UC CalFresh Program include CalFresh eligible adult participants from Head Start, Bakersfield Adult School, parents of Kern County elementary through high school students, residents of public and low income housing, and shelter participants.

- Location of Activities: The location of classes and workshops include 39 Head Start Centers in communities throughout Kern County, Bakersfield Adult School, 33 Kern County public schools, Kern County family resource centers, Kern County public and low income housing sites, the Bakersfield Homeless Center, adult rehabilitation sites, as well as other locations in Kern County with Snap-Ed eligible participants.

- Unique features and qualities: The UCCE program team is comprised of three staff with over 30 years combined experience providing nutrition and food resource management education in Kern County. Our reputation for providing high quality nutrition and resource management intervention in the community precedes our program. The UCCE program is often sought out because of our outstanding reputation.

- The UCCE program utilizes unique opportunities to provide interventions in Kern County. The Kern program has participated in school district cooking classes, evening parent universities, and summer school academies. The Kern County program has utilized these venues to provide workshops and classes in PSSC and MEDC curriculum to Snap-Ed eligible adults.

- The UCCE program and Expanded Food and Nutrition Education Program (EFNEP) also participate in health and resource fairs serving SNAP-Ed eligible populations throughout Kern County. Food Resource management informational visuals are available for viewing, and handouts regarding food resource management information, and recipes are provided to attendees. Rethink Your Drink materials and Infused Refreshing Water is often provided to fair participants.

- Duration and variety of Activities: The UCCE program provides series based classes and workshops in the Making Every Dollar Count (MEDC), Plan, Shop, Save, and Cook (PSSC), and Happy Healthy Family (HHF) curricula. Both curricula provide interventions in food resource management. Physical activity and structured physical activity programs are being implemented during the PSSC and MEDC classes when possible. PSSC curriculum additionally provides information to participants about the U.S. Dietary Guidelines and MyPlate. Classes and workshops generally run from one hour to 90 minutes in length.

- Number of classes and participants: The UCCE program provides approximately 60 class sessions per year and 25 workshops and directly reaches at least 365 participants.

- The University of California Cooperative Extension EFNEP Program in Kern County has been in existence since 1995. This program helps limited-resource youth and families with children, through series based, behaviorally focused nutrition education. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and to be physically active. EFNEP also contributes to participants' personal development and the improvement of their total family's diets and nutritional welfare. EFNEP is administered by University of California Cooperative Extension and is supported by USDA's National Institute of Food and Agriculture (NIFA) Smith-Lever funds.

- The EFNEP adult program utilizes the Eating Smart & Being Active curriculum and provides education through direct delivery. The effectiveness of nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist and 24-hour food recalls) filled out by the participants. EFNEP youth participate in a series of educational lessons geared at helping them to eat better, be more physically active and make wise use of their food dollars. EFNEP uses the National Youth Evaluation Tools to measure program effectiveness.

- EFNEP partners with community based organizations and schools in delivering programs. EFNEP is in 64 schools, 6 adult education sites and reaches over 5,700 youth and 600 adults. Methods for program delivery include direct teaching in groups, training of volunteers to assist with direct teaching of adults and youth and educational materials to complement other teaching methods.

- All three Local Implementing Agencies agree upon coordinating participation in at least three community health fairs in underserved communities in the county promoting healthy eating and physical activity.

Process evaluation reporting will document the range of SNAP-Ed services provided in the local jurisdiction, the locations and specific SNAP-Ed eligible audiences reached as well as other required EARS/ATF and other reporting elements. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated), indirect education (duplicated) and PSE change activities will be compared to original reach targets. Sites that show high performance in terms of reach and multi-intervention strategies will also be identified and replicated. The Impact and Outcome Evaluation (IOE) of the nutrition education series will document achievement of the type of individual level behaviors and dietary practices highlighted in the USDA's Western Regional Offices SNAP-Ed Evaluation Framework. The PSE change reporting pertaining to school/community gardens and healthy corner stores will provide evidence of the environmental level indicators included in the SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, adjustments will be made to the PSE strategies to address challenges and potential enhancements for greater impact.

Building upon community engagement models and strategies, the additional evaluation focuses on identifying and incorporating mechanisms for SNAP-Ed eligible individuals' engagement and input to improve the quality, appropriateness and sustainability of SNAP-Ed interventions. In addition, existing opportunities will be used to solicit participant feedback on the nutrition and physical activity education and promotion activities and specifically what learning activities were particularly effective as well as areas for improvement. In an effort to standardize evaluation throughout the county all the Local Implementing Agencies will utilize the Food Behavior Checklist.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	33%		0 to 4 years old (Preschool):	7,259

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, five SNAP-Ed eligible sites will develop and wellness policies and procedures at senior centers, churches, and schools including making healthy site changes to improve the nutrition, physical activity, and/or screen time environment for participants.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Provide training and TA, as well as support the development and/or implementation of written policies and procedures to improve the nutrition and physical activity environment and reduce screen time.
- Create and/or implement changes at county/city parks environment to support and promote physical activity.
- Increase access to healthy food by implementing community gardens.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, SNAP-Ed funded partner activities will reach 2,500 SNAP-Ed eligible individuals with direct education and 24,000 SNAP-Ed eligible individuals with indirect education.

b. By September 30, 2017, LIAs will provide training and TA, as well as support the development and/or implementation of wellness policies and procedures in two SNAP-Ed eligible sites.
c. By September 30, 2017, LIAs and SNAP-Ed Partners will work to implement changes including making healthy site changes at county/ city parks (at least one) to support physical activity by hosting walking clubs and community forums.
d. By September 30, 2017, LIAs and SNAP-Ed Partners will increase opportunities for healthy eating through contribution in the creation of two community gardens to increase the consumption of fruits & vegetables.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, SNAP-Ed funded partner activities will reach 2,700 SNAP-Ed eligible individuals with direct education and 24,600 SNAP-Ed eligible individuals with indirect education.
b. By September 30, 2018, LIAs will provide training and TA, as well as support the development and/or implementation of wellness policies and procedures in three new SNAP-Ed eligible sites.
c. By September 30, 2018, LIAs and SNAP-Ed Partners will work to implement changes including making healthy site changes at county/ city parks (at least two new sites) to support physical activity by hosting walking clubs and community forums.
d. By September 30, 2018, LIAs and SNAP-Ed Partners will increase the opportunities for healthy eating through contribution in the creation and maintenance of four new community gardens to increase the consumption of fruits & vegetables.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, SNAP-Ed funded partner activities will reach 3,000 SNAP-Ed eligible individuals with direct education and 30,000 SNAP-Ed eligible individuals with indirect education.
b. By September 30, 2019, LIAs will provide training and TA, as well as support the development and/or implementation of wellness policies and procedures in four new SNAP-Ed eligible sites; including making at least one new healthy change per SNAP-Ed eligible site to improve the nutrition, physical activity, and/or screen time environment for participating SNAP-Ed individuals (at FFY 2017, 2018, and 2019 sites).
c. By September 30, 2019, LIAs and SNAP-Ed Partners will work to implement changes including making healthy site changes at county/ city parks (at least three new sites) to support physical activity by hosting walking clubs and community forums.
d. By September 30, 2019, LIAs and SNAP-Ed Partners will increase the opportunities for healthy eating through contribution in the creation and maintenance of six community gardens to increase the consumption of fruits & vegetables.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Kern County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, five SNAP-Ed eligible sites will develop wellness policies and procedures at senior centers, churches, and schools including making healthy site changes to improve the nutrition, physical activity, and/or screen time environment for participants.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation

****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and non-sugar beverages at eight SNAP-Ed qualifying neighborhood retail stores, eight food banks, senior centers/public housing facilities through adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Increase access to healthy food and non-surgery beverages by healthy corner store conversions.
- Collaborate with food banks to make fruit and vegetables more accessible to SNAP-Ed eligible individuals.
- Provide training and TA, as well as support the development and/or implementation of written policies and procedures to improve healthy nutrition and physical activity environment

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017 conduct an assessment of the retail environment in up to two selected SNAP-Ed qualifying neighborhoods.
   b. By September 30, 2017, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at ten sites in qualifying census tracts.
   c. By September 30, 2017, two retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.

d. By September 30, 2017, establish relationships with one food bank in hopes of securing new food distribution sites for older adults and identify potential future distribution sites.
e. By September 30, 2017, establish partnerships with at least one non-SNAP-Ed funded agency to participate in a healthy fruit and vegetable mobile vending pilot to increase access of healthy foods to SNAP-Ed eligible individuals at qualifying census tracts.
f. By September 30, 2017, provide food resource management education to adults at eight community sites and promote the retail, emergency food opportunities to access healthy fruits, vegetables and beverages to class participants.

FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018 conduct an assessment of the retail environment in up to two new selected SNAP-Ed qualifying neighborhoods.
b. By September 30, 2018, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at 20 sites in qualifying census tracts.
c. By Sept 30, 2018, four additional retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.
d. By September 30, 2018, establish two new food distribution sites at either senior centers or public housing facilities.
e. By September 30, 2018, implement a healthy fruit and vegetable mobile vending pilot to increase access of healthy foods to SNAP-Ed eligible individuals at qualifying census tracts.
f. By September 30, 2018, provide food resource management education to SNAP-Ed qualifying adults at four additional community sites and promote the retail, emergency food opportunities to access healthy fruits, vegetables and beverages to class participants.

FFY 2019 (Year 3) Objective(s):

a. By Sept 30, 2019, Kern County will implement a healthy retailer recognition program in up to three selected SNAP-Ed qualifying neighborhoods.
b. By September 30, 2019, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at 30 sites in qualifying census tracts.
c. By Sept 30, 2019, 6 additional retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.
d. By September 30, 2019, establish three new food distribution sites at either senior centers or public housing facilities.

e. By September 30, 2019, maintain a healthy fruit and vegetable mobile vending pilot to increase access of healthy foods to SNAP-Ed eligible individuals at qualifying census tracts.
f. By September 30, 2019, provide food resource management education to SNAP-Ed qualifying adults at five additional community sites and promote the retail, emergency food opportunities to access healthy fruits, vegetables and beverages to class participants.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and non-sugar beverages at eight SNAP-Ed qualifying neighborhood retail stores, eight food banks, senior centers/public housing facilities through adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide education and technical assistance sessions to 6-10 community partners and residents to teach skills needed to conduct retail evaluations to complete Community of Excellence (CX3) for retail stores quality scorecard. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, 20 low resource schools will make changes to school wellness policies, physical environment, and official faculty to support improved nutrition and physical activity behaviors among students, parents, and teachers.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Structure Physical Activity
- Murals/Stencils
- Edible Gardens
- School Wellness Policies
- Engage youth and form two team(s) with a minimum of six students to work on environmental change and policies.
- Walking Clubs

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at 20 low-resource school sites, LIA educators will reach 6,890 elementary students with direct education, 675 parents with direct education, and 16,450 parents with indirect education.
    b. By September 30, 2017, LIA staff will work with partners including school wellness committees to improve four of the 20 school environments by establishing or strengthening school gardens.

c. By September 30, 2017, a new structured PA program such as CATCH, SPARK or any FNS approved curriculum will be implemented by LIA educators, classroom teachers, afterschool staff, and PE specialists at four of the 20 low-resource school sites already receiving nutrition education.
d. By September 30, 2017 LIA staff will work with partners including school wellness committees to implement School Wellness Policies and make physical activity related environmental or policy changes at four of 20 of these sites.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at 20 low-resource school sites, LIA educators will reach 6,375 elementary students with direct education, 680 parents with direct education, and 17,080 parents with indirect education.
   b. By September 30, 2018, LIA staff will work with partners including school wellness committees to improve eight of the 20 school environments by establishing or strengthening school gardens.
   c. By September 30, 2018, a new structured PA program such as CATCH, SPARK or any FNS approved curriculum will be implemented by LIA educators, classroom teachers, afterschool staff, and PE specialists at eight of the 20 low-resource school sites already receiving nutrition education.
   d. By September 30, 2018 LIA staff will work with partners including school wellness committees to implement School Wellness Policies and make physical activity related environmental or policy changes at eight of 20 of these sites.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at 20 low-resource school sites, LIA educators will reach 5,875 elementary students with direct education, 675 parents with direct education, and 17,500 parents with indirect education.
   b. By September 30, 2019, LIA staff will work with partners including school wellness committees to improve 12 of the 20 school environments by establishing or strengthening school gardens.
   c. By September 30, 2019, a new structured PA program such as CATCH, SPARK or any FNS approved curriculum will be implemented by LIA educators, classroom teachers, afterschool staff, and PE specialists at 12 of the 20 low-resource school sites already receiving nutrition education.
   d. By September 30, 2019 LIA staff will work with partners including school wellness committees to implement School Wellness Policies and make physical activity related environmental or policy changes at 12 of 20 of these sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Kern County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, 20 low resource schools will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Conduct 30 to 60 minute nutrition education classes to reach a minimum of 6,000 SNAP-Ed-eligible individuals utilizing FNS Approved Curriculum, with Harvest of the Month as a resource.	X CED X CEI MPR C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: KCSOS, KUSD, LSD, BGCKC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• Sign in sheets • Dates and number of classes taught • Unduplicated number of participants • ATF
3.2	Conduct 15 to 60 minute nutrition education to pre-school, elementary, and after-school program students utilizing FNS approved curriculum with Harvest of the Month as a resource.	X CED X CEI MPR C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: KCSOS, KUSD, LSD, BGCKC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• Class rosters and after-school program attendance sheets • Photos of classes • Samples of lessons and activities.

3.3	Conduct 30 to 60 minute nutrition education series with parents/caregivers of eligible students utilizing FNS approved curriculum with Harvest of the Month as a resource. Education may be informative (lecture) as well as demonstrative (e.g. cooking classes).	X CED X CEI MPR C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: KCSOS, KUSD, LSD, BGCKC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• Sign-in sheets • Agendas • Samples of lessons, curriculum, and materials used in class. • Photos of classes • ATF
3.4	Incorporate Harvest of the Month materials with FNS approved curriculum lessons throughout the school year to: • for educators to implement into the classroom • for students to take home materials to their families • for parents at parent-involved meetings • to train educators on how to incorporate Harvest of the Month to FNS approved curriculums	X CED CEI MPR C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: KCSOS, KUSD, LSD, BGCKC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• Sample of materials distributed • Number of teachers, students, parents to whom materials were given. • ATF

3.5	Identify at least ten qualifying early-childhood and education sites to conduct 30 to 120 minute nutrition education, healthy beverages and utilize the playground stencils to promote physical activity. Include policies on healthy food and beverages to engage and involve parents.	X CED X CEI MPR C&C TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: KCSOS, KUSD, LSD, BGCKC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• List of sites • Self-assessment results • Copies of policies or planned policy changes • ATF
3.6	Develop, update, coordinate and maintain webpages on the agencies websites providing nutrition education/ physical activity information for SNAP-Ed eligible residents. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, at least 50% of class graduates will improve at least one food resource management skill such as grocery shopping with a list, comparing prices, or using the Nutrition Facts label.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Increase access to healthy food and non-sugar beverages by healthy corner store conversions.
- Collaborate with food banks to make fruit and vegetables more accessible to SNAP-Ed eligible individuals.
- Increase access to healthy food by implementing community gardens.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 2017, at least 40% of MEDC and PSSC graduates will improve in at least one Food Resource Management skill such as grocery shopping with a list, comparing food prices, or using the Nutrition Facts label.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 2018, at least 45% of MEDC and PSSC graduates will improve in at least one Food Resource Management skill such as grocery shopping with a list, comparing food prices, or using the Nutrition Facts label.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 2019, at least 50% of MEDC and PSSC graduates will improve in at least one Food Resource Management skill such as grocery shopping with a list, comparing food prices, or using the Nutrition Facts label.

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):
By September 30, 2019, at least 50% of class graduates will improve at least one food resource management skill such as grocery shopping with a list, comparing prices, or using the Nutrition Facts label.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Deliver MEDC core lesson series to SNAP-Ed eligible adults in Kern County.	X CED CEI MPR C&C TTA	CWD LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	• MEDC evaluation data

Definition and basis for calculations of benefit rate(s): *Describe what is covered in the benefit rate for your agency.*	Includes Social Security (FICA), Retirement Contribution, Deferred Compensation, Group Medical/Dental/Vision, Retired Medical, Unemployment Insurance, and Workers' Compensation Insurance based on our LHD personnel for the grant program. County Extra Help employees are not full time permanent employees. At a minimum they receive Social Security (FICA); some may opt to receive Group Health Insurance to meet the ACA requirements; this equates to the Fringe Benefit Rate of 23.81%. The Fringe Benefit Rate of 81.98% is an average for full time permanent employees.

E			Boys & Girls Clubs of Kern County	Subgrantee will be conducting nutrition education/obesity prevention class series for the School and Afterschool components of the grant with SNAP-Ed eligible residents.	$96,501	
F			Adcorp Media Group	Adcorp Media Group (http://www.adcorpusa.com/) has exclusive shopping cart and Welcome Center Kiosks at Kern's Vallarta (7 stores) and Superior Grocers (1 store) supermarkets, which are eligible NEOPB retail sites. Vallarta stores include Arvin (1 store), Bakersfield (4 stores), Delano (2 stores), and Superior (1 Bakersfield store). At all 8 supermarkets, all shopping carts (200%) will have a mixture of "Be Better" 13 approved messages English and Spanish with the Department's Logo for 5 months at a cost of $49,840.00. Five of the 8 stores have the Welcome Center Kiosks (Vallarta Arvin, Bakersfield Niles Street, Delano (both stores), and the Superior Grocers) at a cost of $24,150.00. Welcome Center Kiosks will also be with a mixture of "Be Better" approved messages with the Department's Logo. One time production fee of $295.00 is required. Total Adcorp cost of $74,285.00. The 200% reference to shopping carts is actual print on an individual shopping cart, in this case 200%. There is the "Aisle Directory Ad" side; this is directly facing the shopper, as the shopper pushes the cart; this is the first 100%. Then, there is the "Front Facing Ad" side, to which faces each and every other shopper coming up to that particular shopping cart; this is the second 100%, for what is the 200% coverage. The price may seem costly, for the Adcopr Media Group we are actually securing a total of 8 supermarkets, 7 Vallarta and 1 Superior supermarkets, and all eligible carts, for a minimum total of 5 months. This price also includes the same CDPH Be-Better Campaigns on the Welcome Center Kiosks at 5 of the 8 supermarkets; these kioks at at the stores' entrances and have the stores' weekly discount/special newspapers advertisement. We have been working with the CDPH NEOPB Media and Communications Section whom have shared with us the idea of shopping cart advertisement, strategies, and investment; by incorporating the State's Be Better Campaign, we can get the State NEOPB to add our local Kern County Public Health Services Department logo, and saturate the NEOPB eligible retail stores with additional and localized Be Better messaging. It is our own Department's logo that we speak of, adding it to the Be Better Campaign materials. Supermarket advertising places the "message" and our State and Department's logo in the center of our communities supermarkets, and surrounding communities. The average grocery store has over 20,000 customers per week. The average shopper will visit the supermarket several times a week and spend an average 30-45 minutes in the store per visit.	$74,285	
G			Cartvertising	Cartvertising (http://www.cartvertising.com/) has exclusive shopping cart at Kern's FoodMaxx supermarkets, which are also eligible retail sites. FoodMaxx stores include Chester Avenue, Niles Street, Union Avenue, and Ming Avenue locations. At all 4 supermarkets, all shopping carts (200%) will have a mixture of "Be Better" 13 approved messages English and Spanish with the Department's Logo for 5 months at a cost of $28,696.00).	$28,696

1			Utilities	Utilities Expenses $3,142.00 annually prorated for nutrition education activities. Utilities cover telephone land line, propane used for heating and cooling, trash (weekly/minimal) and document destroying (monthly/minimal) pickup, and electricity at the Kernville Union School District Family Resource Center office. Utilities are split between three main grants and occasionally other funding when costs are unapproved. The KUSD Family Resource Center is home base to the Project Coordinator, Office Manager, and two Nutrition Educators for the Wallace Schools Sites located in Lake Isabella. Nutrition Educator for Kernville Elementary School is based at that school as the KUSD Family Resource Center is located 13 miles from Kernville. All such costs are fair and resonsable to conduct such program and a program out of the said KUSD Family Resource Center.	1	$261.80	12	$3,142

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Nutrition Education Materials and Resources	Materials required for the delivery of critical program activities. Will be distributed along with nutrition education at school and community activities and events. May include pamphlets, cookbooks, etc. At least 4,135 items will be distributed. Will not exceed $4 per person.	$1.00	4135	$4,135	
2			Cooking Supplies	Small cooking supplies for cooking demonstrations and taste testing for classroom activities, community events, and teacher trainings. Supplies (i.e. utensils, bowls, forks, etc.) for 15 carts x $160.00, for prepatory supplies, plastic and paper goods. Cooking supply sets @ $160.00 x 15 = $2,400.00.	$160.00	15	$2,400	
3			Harvest of the Month Taste Testing	$25/classroom x 124 classrooms x 9 months = $27,900.00. Includes materials, samples of fruits & vegetables that correspond to each month, with a minimum of 2 activities per student for an approx. total of 3,360 students per month. Will not duplicate any subcontractor taste testing activities. Cost will not exceed $2.50 per person.	$25.00	1116	$27,900	
4			Youth Engagement Activities Costs	KCSOS will provide nutrition education and support youth engagement activities in targeted grade levels. In-kind Adult Alley to assist NEOP Nutrition Educator to conduct youth-led nutrition education projects. Supplies and materials required for the delivery of Youth Engagement projects, receipe demonstration, educational materials for peer lead nutrition education classes = $700.00. Project costs and materials vary and are dependent of Youth Lead activities. $350.00 will be used for Demonstrations in the Youth Engagement Classes for 12 months which would equal $29.16 per month, while the Youth Engagement Team will provide Nutrition Education classes to their peers for 6 months and would be $58.33 per class. The costs are specific for Youth Engagement in regards to Peer Youth education at Kelly E. Blanton Ed Center (servsafe certification, food demos, food demo supplies, paper goods, fruit and vegetable posters that are student created, other supplies as needed) that is not included in food demonstrations for other sites serviced.	$700.00	1	$700	
5			Duplication Costs	Duplication of Harvest of the Month materials (approx. figures based on three color duplication up to $0.50 per sheet x 2,998 (includes layout)).	$0.50	2998	$1,499	
6			Gardening	Gardening estimated cost of $2,200 for gardening supplies, tools, gardening boxes, seeds, pony stacks and soil.	$100.00	22	$2,200	
7			Painting and Stencil Art	Stencil art estimated cost of $1,650 for stencil art paint and painting supplies.	$82.50	20	$1,650	
8			Rolling Carts	Rolling carts for Nutrition Educators, total of 4 carts at $20.00 each.	$20.00	4	$80	
						Total Materials:	**$40,564**

1			Food Demonstrations	Demonstrations of new food into the Latino community (eg.- Tofu, ginger, chicory, arugula, brussels sprouts, KanChoy, Malanga, etc.). We are planning to involve a minimum of 240 participants at $1.25 each to explore new food. Through Food Demonstrations Promotoras demonstrate to their class participants how to prepare inexpensive healthy meals using USDA approved recipes (both in Single Session and Group Session Classes). In addition, Promotoras prepare USDA approved water recipes, to encourage partcipants to drink water more often along with the RYD Campaign.	$1.25	240	$300	
2			Food Demonstrations and Rethink Your Drink	For items related to SOW related activities (i.e., nutrition curriculum, cooking supplie, etc.). Water refills for 3-gallon refillable bottles to support Rethink Your Drink flavored water tastings and new food items as mentioned on justification.	$2.50	176	$440	
						Total Materials:	**$740**

3			Accountant/Finance Analyst	LHD, San Leandro to Bakersfield, California	Associated Travel for procedural meeting with Program Assistant. "Other" is for Rental Car, Rental Insurance, Fuel, and Parking. VyC does not have any "fixed" office within Kern County. The majority of VyC staff whether on this Kern County NEOPB project or not, work out of their own homes. The Accountant has a home office in San Leandro and the Admin Assistant has a home office in Kern County; again, they work out of their own homes. The in-person accountant meeting with the Program Assistant is to prepare for the annual audit, review budget, and review reporting requirements for the project.	1	1	2	1	$46.00	$110.00				$47.00	$249	
Out-of-State																
1			None												$0	
														Total Travel:	**$9,787**	

* Lodging costs include taxes. Reimbursement at CalHR rates.

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

A breakdown of BGCKC fringe benefits are: SUI (State Unemployment Insurance); Workers Comp.; and FICA plus FICA MC (Medicare). Administrator rate is higher because that position is the only full-time employee with this grant; she is the only position that receives full benefit package (health). The other staff is considered part-time, so they do not receive this benefit package.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Kings County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

County Name: *Kings County*

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension Kings County: UCCE)
X	California Department of Public Health: CDPH: (Local Health Department: Kings Community Action Organization: KCAO)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Kings County is a small rural county located in a rich agricultural region in Central California with a population of almost 153,000. According to the CDPH SNAP-Ed Kings County Profile (2015), 21% of the total population is below the Federal Poverty Level (compared to California as a whole at almost 16%), where approximately 16% of people overall and almost 30% of children are considered food insecure, compared to California at 15% and 25% respectively. Approximately 44% of the population (58,739) are SNAP-Ed eligible (having income <185% FPL). Of these individuals, approximately 71% identified themselves as Hispanic, 22% White, 3% African-American, 2% Asian, and 2% as American Indian/Alaska Native, multiracial, or unknown. Over 60% of children under age six living within the county are SNAP-Ed eligible, as well as almost 55% of children between six and 17 years of age. Almost 39% of adults aged 18-64 are also eligible for SNAP-Ed, as are 34.6% of seniors aged 65 or older residing in Kings County. In addition, 18.5% (24,693) of individuals living within Kings County are CalFresh participants, compared to the state at about 12%.

Nine (33.4%) of the 27 total census tracks in the area are SNAP-Ed eligible (>50% incomes < 185% FPL) based on all races data for 2010-2014. Of the 65 schools located in the county, 54 (83%) are SNAP-Ed eligible (>50% FRPM Enrollment); and almost 68% of students are eligible for free/reduced price meals (FRPM). Data shows that a higher proportion of low-income children in Kings County are overweight (15% for children aged 2-11 and 20% for children aged 12-17) and obese (no data available for children aged 2-11 and 26% for children aged 12-17) relative to the statewide average data of children who are overweight (12% for children aged 2-11 and 17% for children aged 12-17) and obese (no data available for children aged 2-11 and 15.5% for children aged 12-17). Almost 82% of adults are found to be overweight/obese. The Hospital Council of Northern and Central California (2013) reported a higher proportion of adults in Kings County to be overweight and obese (63%) relative to the statewide average data (59%).

According to the SNAP-Ed Kings County Profile (2015), only 44% of SNAP-Ed adults can always find fruits and vegetables in their neighborhood within Kings County, yet only 39% of SNAP-Ed adults can always find *affordable* fruits and vegetables in their neighborhood within the county. Additionally, 53% of adults living within Kings County consumed one or more sugar-sweetened beverages per week, which is approximately 14% higher than the state average, and higher than the data from adjacent counties (Tulare at 46%, Fresno at 47%, and Kern at 49%). In addition, the SNAP-Ed Kings County Profile (2015) indicates that 65.5% of SNAP-Ed adults consumed fast food one or more times in the past week. This number is likely high due to the fact that about 65% of restaurants are considered fast-food in the county (SNAP-Ed Kings County Profile, 2014). Lack of physical activity is another problem for the county's youngest residents, where only 23% of children and teens aged 2-17 report being physically active at least one hour every day and about 39% of children aged 2-11 are physically active at least one hour every day.

Furthermore, the “Tier 1” assessment of the *Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3)* showed that in central Hanford, there are 20 fast food outlets within a .5 mile radius of schools and 6 fast food outlets within 1000 feet of schools. Additional Cx3 findings are shared below regarding a large community assessment completed concerning related efforts. In addition, only one Farmer’s Market exists

in the county, which does not accept EBT and operates during the summer months only. A survey conducted by the Healthy Stores for Healthy Community (2014) found that 83% of stores in the county, out of 107, had unhealthy exterior advertising. Thirty-three percent (33%) of stores sold at least one fresh fruit or vegetable, 29% of stores had a good selection of good quality fresh fruits and vegetables, and 60% of stores sold sugary drinks at the check-out area. In addition, according to the CDPH SNAP-Ed Kings County Profile (2014), approximately 65% of restaurants in the county are considered fast-food, while it was found in the current County Profile that about 66.7% of children aged 2 to 11 and 56.2% of children aged 2-17 consumed two or more servings of fruits per day. Finally, current weather trends further threaten food and economy security. Unfortunately for many low income communities through Kings County, the ongoing drought has added new challenges to the existing food security concerns. California is experiencing a drought that is among the most pervasive, severe and damaging in the state's modern history. The three year period between 2011 and 2014 was the driest since recordkeeping began in the 19th century, with no major change projected in the near future.

4. **Community Assessment**

Multiple data sources have pointed to the need for nutrition and physical activity promotion, and policy, systems and environmental changes related to health and nutrition in Kings County. The community assessment data from disparate sources and the Socio-ecological model have both helped to inform the work plan for Kings County. The plan will focus on educating individuals and families to address the interpersonal and personal levels of influence. The plans related to policy, systems and environmental changes will in part help to address the organizational, community, societal and cultural levels of influence (i.e., environmental, sectors of influence, and social cultural norms). Based upon data from the CDPH SNAP-Ed Kings County Profile, the implementing agencies have decided to continue to focus on children under the age of 18 and their parents as one of the primary target groups. In Kings County, 54 of the 65 schools are SNAP-Ed eligible and approximately 68% of students are eligible for free/reduced price meals. In addition, 53% of adults in the county consumed one or more sugar-sweetened beverages per week, which is approximately 14% higher than the state average, and higher than the data from adjacent counties (Tulare at 46%, Fresno at 47%, and Kern at 49%).

Kings County implementation agencies conducted both quantitative (e.g. survey) and qualitative (e.g. focus group) community needs assessments in March and April 2015 to help inform future efforts, including last year's work plan and this current one. Three total assessments were completed in the process: Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3); Avenal Farmers' Market; and Kings Community Action Organization Community Action Plan. The implementing agencies conducted the needs assessments in four target areas of the county and will continue to focus most implementation activities and efforts in these areas, which include: Avenal, Central Hanford, Corcoran, and Home Garden.

Our Cx3 assessment sought to gain community feedback on indoor/outdoor advertisements and the offerings, quality, and accessibility of foods/produce in both large supermarkets, corner stores and fast food restaurants. Findings of the assessment established that the majority (greater than 50% combined) of people either agree or strongly agree that both healthy outdoor and indoor advertising is appropriate for supermarkets, corner

stores, and fast food restaurants in their communities, county-wide. The majority of people also believe there is enough healthy food/produce found in supermarkets, as well as this food being easily accessible in these types of stores. For corner/small markets, however, it was found that almost 35% of respondents disagree (another 12% strongly disagree) that there is enough healthy food/produce in these stores, as well as these foods being easily accessible. When asked if they thought people would purchase more healthy foods in corner/small markets if they were located near check-out lanes, almost 51% of respondents agreed (another 23% strongly agreed). Respondents didn't weigh heavily on one side or another regarding there being enough healthy foods in fast food restaurants; 35% agreed, almost 42% disagreed. The same pattern was found for whether respondents believed healthy foods were easily accessible in fast foods restaurants or not. However, approximately 53% of people believed that people would purchase more healthy foods if they were advertised better in fast food restaurants; another 26% of respondents strongly agreed. A question might arise on why the LIAs did not choose to focus on the fact that there is a high proportion of fast food restaurants in the county (according to the CDPH SNAP-Ed Kings County Profile, 2014); according to our Cx3 assessment described just above, the public didn't support work within these establishments. SNAP-Ed is also up against declining program funding but ever-increasing marketing budgets of fast food chains. Lastly, we found recent research on fast food ordinances in that they just didn't work; in fact, they may have done the opposite in that the percentage of people who were overweight or obese increased significantly more in areas of Los Angeles that the ordinances covered. However, with support from our CNAP, we believe we can continue to make strong strides in Healthy Retail work within grocery and corner stores and then begin to branch out to Healthy Retail work within fast food establishments; we want to continue to consider stepping stones to gain traction within the community. Lastly, of the over 700 respondents to our Cx3 assessment, almost 48% of people stated that they participate in CalFresh, county-wide.

Implementing agencies have continued to work with City of Avenal stakeholders and other community leaders/members since 2014 to revisit the idea of providing Avenal a Farmers' Market. Avenal is a secluded area of Kings County which contains mostly smaller corner markets and one larger market. The only other Farmers' Market that takes place in Kings County is in Hanford, which is more than a 45 minute drive away, one-way. While the Hanford Farmers' Market does not accept EBT, the subject of including EBT acceptance at the Avenal Farmers' Market has been discussed as a possibility, as well as WIC and Senior Farmer's Market Coupons. Implementing agencies sought to capture community input on a possible Farmers' Market in Avenal to help inform future efforts. Preliminary findings of the Avenal Farmers' Market Needs Assessment found that nearly 91% of residents surveyed expressed a need for, and would attend a farmers' market, if offered in town. While approximately 34.5% of respondents said that a monthly Farmers' Market would suffice, 58% of respondents hoped that one could be offered twice a month. While only 18% of survey respondents indicated that they participate in CalFresh, this is a little over the county-wide rate at about 15%. In the Cx3 assessment above, 42% of Avenal respondents indicated that they participated in CalFresh. Current plans are to pilot-test a Farmers' Market in Avenal once a month from May 2016 through September 2016. The City of Avenal was able to partner with Fresno State and successfully secure funding through the university that will be used to help fund a market manager. Since the Hanford Farmer's market doesn't currently accept EBT benefits, it is hoped that EBT can be approved for use at the Avenal Farmer's Market.

Lastly, preliminary findings of the Kings Community Action Organization Community Action Plan Needs Assessment found that approximately 33% of Kings County residents have annual incomes at or below $11,770 and an additional 17.5% of respondents expressed they have incomes between $11,771 and $15,930. When asked if they are concerned about having enough food to feed their family, 40% responded in the affirmative. When asked to identify areas respondents need assistance with, roughly 44% and almost 21% expressed they need assistance with food and nutrition education, respectively. The CDPH SNAP-Ed Kings County Profile reflects this information in that 20.7% of the population is below the Federal Poverty Level within Kings County and out of the 65 school located within the county, 54 of them (83%, up from 76.9%) are SNAP-Ed eligible schools. In addition, the Profile reflects the findings that food insecurity rates are at about 16% overall and 29% for children.

5. **Community Change Goals**

Based on results of the community assessments conducted by the implementing agencies, past years' work within the county, and by working with our larger community partnership (CNAP), the community change goal includes: decreasing food insecurity of county residents, specifically among the SNAP-Ed eligible population in the target areas of Avenal, Central Hanford, Corcoran, and Home Garden.

We have determined that this area of need is still essential to increasing the overall health of residents of Kings County. We recognize that this community change goal has been brought over from the previous fiscal years as it is a multi-year strategy. We believe that it will continue on from activities conducted in previous years and into the next three years, and may require the support of external partners who may not be SNAP-Ed funded. Overall community goals for each area include the following:

Decreasing food insecurity

- Continue in increasing healthy retail options for county residents including creating healthy corner store options
- Continuing the work in creating an established and sustainable Farmers' Market with EBT access and offering another new pilot Farmers' Market with EBT access in another SNAP-Ed eligible community.
- The addition of more community and/or school gardens.
- Increasing food security throughout the county through direct and indirect education of parents, children, seniors, etc.
- Continue working with local schools in advising changes in the school environments by updating School Wellness Policies and adopting Smarter Lunchroom Movement strategies.
- Continue to partner with un-funded SNAP-Ed organizations to leverage resources that will address the issues of healthy beverages and foods, and policy, systems, and environmental supports, specifically through the county CNAP.

- Provide nutrition education, obesity prevention programs, and physical activity opportunities to SNAP-Ed eligible residents in the target communities of Avenal, Central Hanford, Corcoran, and Home Garden.

Kings County implementing agencies have determined that in order to continue to reach for the above community change goals, smaller and more localized SMART objectives are needed to be set for FFY2017-2019. The three objectives the Kings County LIAs plan to achieve in three years include:

- By September 30, 2019: increase access to and demand for healthy fruits, vegetables, and beverages through two farmers' markets offered within SNAP-Ed qualifying neighborhoods, through continued facilitation of development and technical assistance from LIAs.
- By September 30, 2019: 22 SNAP-Ed eligible school sites and/or community-based organizations will make changes to policies, the physical environment, and/or institutional capacity to support improved nutrition and physical activity behaviors among students, parents, teachers, and other community members that are SNAP-Ed eligible.
- By September 30, 2019: increase access to and demand for healthy fruits, vegetables, and beverages at 6 SNAP-Ed qualifying neighborhood retail stores through adopted and implemented policy and physical site changes.

Kings County SNAP-Ed funding will continue to work to support the work in local SNAP-Ed eligible neighborhoods, with the majority of the work focused in four areas: Avenal, Central Hanford, Corcoran, and Home Garden. The two implementing agencies in the county will continue to work together on the three local objectives listed above. While Policy, Systems, and Environment (PSE) efforts will be the foundation of Kings County's SNAP-Ed work, direct education will remain as a large supportive tool to the work, as will other activities including media, coalition building, and technical assistance. The implementing agencies will continue to provide nutrition and physical activity education within the county, as well as support policy, systems, and environmental efforts.

The implementing agencies will work together on efforts for Local Objective 1, which will continue to focus on establishing a Farmers' Market in one of the five target areas, Avenal but moving from a pilot to a regularly occurring market. Continuing to convene stakeholders and assisting in the process of getting access to EBT services at the market will be included in this work. The LIAs will approach the City of Corcoran stakeholders regarding establishing a similar project. If support exists, the LIAs desire to conduct a community needs assessment among individuals residing in qualifying census tracts on their support of a possible pilot market. This objective supports State Level Objective 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages; State Level Objective 3: Improve Food Resource Management; and State Level Objective 4: Increase Access to and/or Appeal of Healthy Dietary Choices and Decrease Access to and/or Appeal of Unhealthy Dietary Choices Where People Eat,

Live, Learn, Work, Play, or Shop. Partnership activities are listed below, and community partners/non-SNAP-Ed funded community partners will support these efforts by promoting education at farmers' markets in exchange for Supporting Value Coupons provided by said non-SNAP-Ed community partners (e.g. Kings County Aging Council). A farmer's market planning committee for Avenal has been developed and currently meets once a month; a market manager has been hired through outside (non SNAP-Ed) funding. Members have begun to approach farmers/producers who farm locally to Avenal to assess interest in selling at the market through community member connections and by attending other farmer's markets close by. Once the farmer's market gets closer to begin, implementing agencies will work with CDSS to use existing "We Accept EBT" signage. To support this goal, direct and indirect community education will also be provided by implementing agencies with approved, evidenced-based curriculum that focuses on the consumption of fresh fruits and vegetables, and food resource management.

Local Objective 2 has several focuses. One large focus will provide support to community and school gardens in the four target areas of the county which will improve the access to fresh fruits and vegetables among SNAP eligible population. The objective supports State Level Objectives 1, 3 and 4 as well as State Level Objective 2: Increase Physical Activity; and State Level Objective 5: Increase Access to and/or Appeal of Physical Activity Opportunities for SNAP-Ed Eligible Populations. Partnership activities are listed below and community partners/non-SNAP-Ed funded community partners will support these efforts though additional funding by providing services and/or materials non-allowable through SNAP-Ed funding (i.e. wood materials, equipment). To support this area of the goal, direct and indirect community education will also be provided by implementing agencies with approved, evidenced-based curriculum that focuses on the importance of fresh fruits and vegetables and gardens. Another focus under this objective will be towards Smarter Lunchroom Movement. This area will be implemented and monitored primarily by UCCE with support from the LHD, which will focus on assisting school districts and/or school sites in updating Wellness Policies and making school environment changes to support healthy eating and increase physical activity. Partnership activities are listed below and community partners/non-SNAP-Ed funded community partners will support these efforts by supporting the organization in additional policy and parent engagement work. In addition, the Farm Bureau will be engaged to work with local farmers to determine a food distribution method that could include sourcing to schools. To support the SLM area of the goal, direct and indirect community education will also be provided by implementing agencies with approved, evidenced-based curriculum focused on healthy food preferences and physical activity.

With support from UCCE, the LHD will primarily implement and monitor Local Objective 3, which will focus on working with retailers on the implementation of Healthy Retail efforts. This objective supports State Level Objectives 1 and 4. Activities include working with and educating corner store and grocery store staff, owners, and/or managers about food placement and signage. Specific activities are listed below. A partnership with the Kings County Tobacco Control Program (a non-SNAP-Ed funded partner) has been established to help with these efforts. To support this goal, direct and indirect community education will also be provided by implementing agencies with approved, evidenced-based curriculum focused on choosing healthy beverages and foods, smarter shopping practices, and meal planning. In-store food demonstrations and food tours are also planned.

6. **Partnerships and Collaborative Efforts**

The Kings County SNAP-Ed LIA Partnership continues to include Kings Community Action Organization (LHD) and the University of California Cooperative Extension (UC CalFresh). Both partners are funded through the USDA SNAP-Ed funding, and have worked together to create past annual work plans and to complete the activities listed within them. The partnership is continuing and is writing this three-year work plan. The partnership is led by the Work Plan Coordinator who is housed through Kings Community Action Organization. The Work Plan Coordinator will continue to organize quarterly in-person meetings between the two Kings County LIAs to assess progress on work plan activities. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc.

The LIA partnership also continues to participate as part of the Kings Partnership for Prevention which is a larger community health partnership that includes Food and Nutrition Service funded and non-funded partners, and acts as the CNAP for Kings County. The group meets at least quarterly and includes community organizations and stakeholders whose interests surround the areas of food programs, nutrition education, and physical activity promotion, among others. Through collaboration with funded and unfunded stakeholders, the goal of the partnership is to serve the SNAP-Ed eligible population with the use of the approved materials by the USDA, UC CalFresh, and CDPH NEOPB. The CNAP partners include, but are not limited to, the following: Kings County Public Health Department, First 5 Kings County, Kings County Commission on Aging, Community Food Bank Fresno (which serves Kings County residents), Kings Partnership for Prevention, Adventist Health, Diabesity Coalition, CalViva, and other Kings Community Action Organization programs (i.e., Head Start, Children Care Assistant Program, and Intervention, Prevention, Support Services).

The CNAP's Strategic Planning Process began in FFY15 and efforts continue to set the agenda for partner work for the years ahead. Seven Priority Areas were determined to be significant strategic planning priorities for the county, during the first stages of the Strategic Planning Process last year. Two of them will continue to be focused on by the local implementing agencies as they will both help to address this work plan's local objectives: Healthy Eating and Active Living. These two priority areas have been formed into strategic planning committees in which members of both LIAs participate. The Healthy Eating Strategic Planning Committee recognizes that obesity is a looming problem for Kings County residents, particularly children. In an effort to address the problem and thus support environmental changes that will impact the rate of unhealthy food consumption among Kings County residents, a Healthy Retail Certification Program strategy will be adopted and supported by the group. The strategy will aim to provide guidance, encouragement, technical assistance, and recognition to stores within the county that seek to provide healthier food options to their customers, in which the intended program outcome is to increase the availability and promotion of healthy product options in small retail food stores, thereby helping to create an environment where the healthier choice is the easy choice for consumers. The Active Living Strategic Planning Committee is aiming to help workplaces adopt a practice and/or policy to keep people/employees active throughout the day, such as through a social marketing campaign, creating fitness innovation challenges, and assessing and altering the built environment to make county communities more walkable and accessible. The practice

and/or policy will be supported by a proclamation adopted by each community. Workplace ideas include administrative incentives (i.e. health insurance and gym membership discounts, sponsoring company sports teams; on-site gyms; providing Fitbit or pedometers to employees), management incentives (i.e. giving employees time at work to take fitness breaks, allowing employees to have walking meetings, encouraging employees to take a "Share the Health" approach to exercise, hiring instructors for lunch time exercise), and the built environment (i.e. incentive or provision of bicycle racks for employers, walkability scores for each community, walkability plans that include tree-lined streets, bike paths and safe areas to exercise outside).

Some of the above mentioned CNAP partners will, in addition, help to address unmet needs within the community, in or out of the jurisdiction of SNAP-Ed funding; KCAO and UCCE do not have authority over the CNAP partners, and can only encourage them to participate in the CNAP partner meetings, the two Strategic Planning Committees, and events. The Kings County SNAP-Ed local implementing agencies will continue to work to ensure its activities and objectives align with the larger CNAP, and will work with it to achieve greater health outcomes county-wide.

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), SNAP-Ed Interventions and Strategies: A Toolkit for States and/or FFY 2017-2019 USDA approved UC Cal Fresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula used will be from the California SNAP-Ed Integrated Curricula List.

Kings County implementing agencies have reviewed the approved integrated curriculum list provided, and reviewed each different piece to determine the best option for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population, as well as our chosen SNAP-Ed three-year and annual objectives. Most of our chosen curriculum is geared towards children and their parents, as this reflects the detail provided throughout our narratives summaries and below in target audience description.

9. **Intervention and Evaluation Plan Narrative Summary**

The two implementing agencies for Kings County (UCCE and LHD) will continue to collaborate to provide comprehensive multi-level strategies and interventions which will include direct and indirect nutrition education and physical activity promotion as a base, as well as participating and offering community events, providing trainings and technical assistance, all while also using media efforts and coordination/collaboration with community partners throughout Kings County. The agencies will promote the current Dietary Guidelines, and utilize approved curriculum and resources, and other SNAP-Ed intervention strategies that have been proven to support behavior change.

Activities conducted will occur at the individual and interpersonal levels of the Social Ecological Model; an environmental approach will also be utilized to address the organizational and community levels of the model. While both LIAs will address all areas of objective implementation (i.e. Community/Nutrition Education Direct; Community/Nutrition Education Indirect; Media, Public Relations, and Messaging; Coordination and Collaboration; and Training and Technical Assistance) to stress the importance of collaboration and integration of SNAP-Ed work within the county, each of the implementing agencies will continue to focus on certain areas based upon the most experience and expertise to ensure successful completion of objectives.

Many of the Work Plan objectives contain direct and indirect education as a base to support all activities, which will include nutrition and physical education among adults, children, and families in Kings County at: (1) schools (including Head Start sites), (2) community-based organizations (e.g. county agencies, senior centers), (3) health and community fairs/events (e.g. farmers' markets, fruit and veggie fest), and (4) gardens (e.g. school sites, community sites). Through partnership with CNAP agencies, and the new focused work within the two Strategic Planning Committees, the goal is to extend intervention efforts in qualifying census track areas.

Regarding policy, systems, and environmental levels of intervention, one of the plans is to continue the discussion with elementary schools and community based organizations (e.g., KCAO sites) to mobilize a wellness policy of nutrition and physical activity. Implementation agencies plan to continue to participate with school wellness councils to help inform efforts and aid in updating wellness policies. Another plan is to support the creation of systematic changes at elementary schools (e.g., continued adoption of Smarter Lunchroom strategies) and community organizations. The focus of

these systematic changes will be in the areas of healthy food choices and nutrition/physical activity in elementary schools and community based organizations.

As mentioned above, the completion of the Cx3 ground surveys and the resulting quantitative and qualitative data collection efforts has helped to better inform the environmental needs of the community. Based on the data, the objective is to continue in specific projects from last fiscal year such as healthier interior and exterior advertising and improved access to healthier foods at supermarkets and corner stores so the work can be sustained and supported. Another goal is to continue speaking with local retailers to improve their food store quality scores based on the Cx3 ground survey, especially those located near public schools. Community engagement will be utilized to offer opportunities for youth, adults, families, and older adult throughout work plan activities, especially around the community gardens and work with retailers. The need for additional media campaigns is also manifested through various data sources. Media interventions will help promote positive messages in the community environment, such as healthy beverage and nutrition at school sites (e.g., murals) among children and will also help to promote healthy nutrition and physical activity on a broad scale (e.g., billboards). As we did last fiscal year, our local billboard advertising campaign will continue to be coordinated with the statewide NEOPB media campaign; we will work directly with our SIA to coordinate these efforts. These projects can help ensure that all SNAP-Ed eligible populations are being reached in all parts of the county and at all levels of the Social Ecological Model.

Both agencies will continue to utilize evidence-, practice-, and research-based interventions. The objectives found in the three-year integrated work plan were created based upon results from three community assessments developed and completed by the implementing agencies. Other sources of information were also referenced when developing the objectives and activities. Both LIAs collaborated and coordinated to create this work plan so that the efforts are completed by the agency with the most expertise in a certain area. Through a multi-pronged intervention that addresses the different levels of influence, the goals of the Kings County work plan is to achieve short, medium, and long-term prioritized objectives as identified in the Western Regional SNAP-Ed Evaluation Framework.

Evaluation processes will be utilized to improve services for all local objectives. The implementing agencies will use RE-AIM and Impact Outcome (IOE) and/or curriculum-specific evaluations to determine effectiveness. For example, Plan, Shop, Save, Cook workshop participants will complete a pre and post survey that addresses MyPlate Behaviors (MT1), Shopping Behaviors (MT2), and Food Security (LT6) indicators included in the Western Region's SNAP-Ed Evaluation Framework. The LHD will evaluate any Policies, Systems, or Environmental (PSE) work using RE-AIM, whereas the IOE will be conducted using an approved curricula and thus evaluation will be done with one of the survey tools found in the Compendium of Surveys. UCCE will utilize the Smarter Lunchroom Movement scorecard to evaluate those efforts that addresses Identification of Opportunities (ST4), Partnerships (ST6), and Nutrition Supports Adopted (MT4).

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019: increase access to and demand for healthy fruits, vegetables, and beverages by establishing two farmers' markets within SNAP-Ed qualifying neighborhoods, through continued facilitation of development and technical assistance from LIAs.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

Farmers' Markets

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017: establishment and sustainability of a regular occurring farmers' market in Avenal that accepts EBT and is held at least once a month for five months.
2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018: begin discussions with City of Corcoran stakeholders to possibly establish a pilot farmers' market in Corcoran that accepts EBT and that will be held at least once a month for three months.
    b. By September 30, 2018: conduct an assessment of residents of the City of Corcoran on their support of a possible pilot farmers' market.
3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019: assist in the application for EBT acceptance at the pilot farmers' market in Corcoran that will be held once a month for three months.

b. By September 30, 2019: continue in the development of a pilot farmers' market in Corcoran that accepts EBT and that will be held at least once a month for three months.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019: increase access to and demand for healthy fruits, vegetables, and beverages through two farmers' markets offered within SNAP-Ed qualifying neighborhoods, through continued facilitation of development and technical assistance from LIAs.
