   iii. By September 30, 2018, SF Department of Aging & Adults Services will provide 2 Train-the-Trainer Tai Chi for Arthritis and Fall Prevention workshops (or other fall prevention program preferred by the community) and one refresher workshop to LIA partners and graduate 36 certified fitness instructors and provide technical assistance to community-based senior center to offer fall prevention exercise classes to SNAP-Ed eligible participants.

   iv. By September 30, 2018, the certified Tai Chi instructors will provide a total of 1,272 hours of evidence-based free physical fitness classes to SNAP-Ed eligible seniors in senior community centers or facilities, reach at least 106 unduplicated seniors and at least 25% of the certified Tai chi instructors will incorporate and offer Tai Chi classes as part of the regular activities at their senior center/facility.

3. **FFY 2019 (Year 3) Objective(s):**
   i. By September 2019, demonstrate an increase in physical activity among SNAP-Ed participants identified in FFY 2018.

   ii. By September 30, 2019, Catholic Charities of San Francisco, Marin and San Mateo will provide physical activity opportunities to students in 2 SNAP-Ed eligible parochial schools and measure changes in the amount of physical activity they do as a result of this.

   iii. By September 30, 2019, SF Department of Aging & Adult Services will provide two Train-the-Trainer Tai Chi for Arthritis and Fall Prevention (or other fall prevention program based on community's needs) workshops and graduate or recertify 32 certified fitness instructors and provide technical assistance to community-based senior center to offer Tai Chi classes to SNAP-Ed eligible participants.

   vii. By September 30, 2019, the certified Tai Chi instructors will provide a total of 1650 hours of evidence based free physical fitness class to SNAP-ED eligible seniors in senior community centers or facilities, and reach at least 140 unduplicated seniors.

viii. By September 30, 2019, at least 25% of the certified Tai Chi instructors will incorporate and offer Tai Chi classes as part of the regular activities at their senior center/facility.

SNAP-Ed State Goals:

	Goal 1: Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

Three-Year SNAP-Ed Local Objective #6 (FFY 2017–FFY 2019):
By September 2019, coordinate ongoing promotion of free physical activity opportunities to 36,000 SNAP-Ed participants and 200 Community Partners, provide resources, training and technical assistance to 102 Tai Chi instructors to increase fall prevention through physical activities for at risk seniors and demonstrate increase in physical activity in youth receiving this program in SNAP-Ed eligible schools.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
6.1	The San Francisco Department of Public Health will contact and convene Parks and Recreation Department, the YMCA and other relevant partners to gather information on free physical activity opportunities county-wide and develop a mechanism to update this information on a quarterly basis. This inventory shall include evidence-based fall prevention programs.	CED CEI MPR x C&C x TTA	CWD x LHD x AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 — Q2 x Q3 x Q4 x Year 2: Q1 x Q2 x Q3 x Q4 x Year 3: Q1 x Q2 x Q3 x Q4 x	ATF/EARS; Quarterly Reports;

6.2	The San Francisco Department of Public Health will contact and convene Parks and Recreation Department, the YMCA and other relevant partners to develop an easy-to-access resource to share this information. Different modalities (print, electronic, online) will be implemented to expand reach to a variety of Community Partners. SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

X	**California Department of Social Services: CDSS: (San Joaquin County Human Services Agency CWD)**
X	**University of California: UC CalFresh (University of California Cooperative Extension San Joaquin County/UC CalFresh Nutrition Education ProgramUCCE/UC CalFresh)**
X	**California Department of Public Health: CDPH: (San Joaquin County Public Health Services LHD)**
X	**Catholic Charities of California: CCC: (Catholic Charities of the Diocese of Stockton: CCC)**

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP-Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

San Joaquin County's (SJC) is located in California's Central Valley, one of the richest agricultural areas in the world, and is the fifth richest agricultural county in the country. SJC has a population of 715,597 residents, of which 38.2% are SNAP-Ed eligible (i.e., at or below 185% of the Federal Poverty Level). The county's food insecurity rate is 16.3%. Nearly a third (32.4%) of all county census tracts and 71.7% of the county's schools are SNAP-Ed eligible and thus considered underserved According to the 2013 CHNA, ten Communities of Concern (CCs) were identified by zip code, where conditions were considered dire compared to the rest of the county. LIAs will be serving all ten CCs, with particular emphasis in the south east Stockton area (San Joaquin's collective impact zone). These CCs are home to more than 257,000 residents and are found in all areas of SJC. In addition, SJC has a total of 121,420 CalFresh participants, and 90,487 students eligible for Free/Reduced Price Meals. The majority of SNAP-Ed eligible are located in and around the incorporated cities of the county—Escalon, Lathrop, Lodi, Manteca, Ripon, Stockton, and Tracy.

Of the 258,934 SNAP-Ed eligible residents, 51.3% identify themselves as Hispanic, 22.4% as White, 14.3% as Asian, 8.1% as African American, 2.9% as multi-racial, 0.5% as American Indian/Alaska Native, 0.5% as Native Hawaiian/Pacific Islander and 0.1% as another race. As seen in the table below, SJC's SNAP-Ed eligible population by age group is higher than the state averages:

Ages	San Joaquin County	California
Children <6 years old	52.1%	44.6%
Children 6-17 years old	46.9%	42.2%
Adults 18-64 years old	34.8%	30.5%
Seniors 65 years and older	29.6%	27.7%

The percentage of languages other than English spoken at home with children over 5 years of age is 39.9%. The top five languages spoken in SJC homes other than English are Spanish, Hmong, Khmer (Cambodian), Tagalog (Filipino), and Punjabi. Spanish is the leading alternate language. For those languages where SNAP-Ed curricula and materials are not available, LIAs will outreach to community partners to provide translation services.

Overweight and obesity continue to be a serious problem in SJC, particularly in some minority groups such as Hispanics and African Americans and in low-income populations. The prevalence of obese (Body Mass Index of 30 or higher) adults is 29.1%. This may be due in part to the accessibility of fast-food chains, limited recreational facilities, as well as personal behaviors such as physical inactivity and consumption of unhealthy foods and/or beverages. According to survey data, 69.7% of the county's adults reported consuming fast food one or more times in the past week; 50.6% reported consuming one or more sugar-sweetened beverage per week; and 21.0% of adults reported not exercising in the past month. However, SJC's youth showed poorer behavioral habits. Nearly 71% of the county's youth reported consuming fast food at least once in the past week and 45.1% reported consuming one or more sugar-sweetened beverage per day. Additionally, 58% of youth (ages 2-11) reported not being physically active at least one hour every day.

These behavioral and environmental influences not only contribute to obesity but also to chronic diseases such as cardiovascular disease, stroke, osteoporosis, Type II diabetes, and some cancers. According to CDPH, out of the 58 counties in the state, SJC was ranked seventh highest for diabetes mortality rates and nineteenth highest for coronary heart disease death rates. Furthermore, according to the Centers for Disease Control and Prevention (CDC) Pediatric Nutrition Surveillance System (PedNSS) and the Pregnancy Surveillance System (PNSS), 40% of children in grades 5, 7, and 9 are overweight or obese. More than 50% of women are overweight or obese immediately prior to pregnancy and 15% of children under the age of 6 are overweight. According to the SNAP-Ed County Profile 2015, 8.2% of children between the ages of two and eleven years are overweight, and approximately thirty-three percent of children (20.7% overweight and 12.2% obese) ages 12 to 17 are overweight and obese. The rates of obesity and chronic disease are higher for low-income children and adults of all ages.

The county has a number of nutrition related programs serving San Joaquin's low income population. These include, but are not limited to, the county's three WIC organizations, food banks/food pantries (eg. Emergency Food Bank, Second Harvest, Catholic Charities, etc.), Child and Adult Care Food Program through Family Resource and Referral Center, San Joaquin County Behavioral Health Services, and St. Joseph's Community Nutrition Program. Additional services can be found under section six, Partnerships and Collaborative Efforts.

4. Community Assessment

SJC's SNAP-Ed Local Implementing Agencies (LIAs) continue to use a variety of sources to inform the county's Integrated Work Plan (e.g., county's 2013 and 2015 Community Health Needs Assessment (CHNA); 2015 California Food Policy Advocates Nutrition and Food Insecurity Profile for San Joaquin County; Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3); California Health Interview Survey; and SJC Nutrition and Food Security Profile) in addition to having discussions with County Nutrition Action Plan (CNAP) partners, including the Human Service Agency's CalFresh office.

According to the California Food Policy Advocates SJC Nutrition and Food Security Profile, there are approximately 148,481 CalFresh-eligible individuals, adults and children, at or below 125% of Federal Poverty Level (FPL). Of these individuals, 121,420 or 82% are participating in the program.

The 2013 CHNA identified ten Communities of Concern (CCs), by zip code, where conditions are dire compared to the rest of the county. The ten CCs are served by all LIAs. These CCs are home to more than 257,000 residents and are found in all areas of SJC. Below is a synopsis of relevant CHNA and California Food Policy Advocates findings:

- Several of the CCs have a poverty rate exceeding the national benchmark by as much as two to three times.
- Six (6) of the CCs have a rate of residents over 65 years of age living in poverty three times the national average.
- Five (5) of the CCs are located in census tract where 50% of the population is CalFresh eligible and living below 185% of the poverty level.
- Over 46% of low-income households in San Joaquin County are food insecure.

The 2015 CHNA (under review) outlined additional findings:

- 30% of Community Survey respondents reported diabetes as the top health concern in their community.
- 35.2% of Community Survey respondents indicated poor eating habits are a high concern in their community.
- 34.3% of Community Survey respondents indicated that there are not enough safe active places in their community.
- Obesity was reported more frequently among female respondents.

Below is additional data provided by the Human Service Agency addressing food insecurity at eight participating community centers located in the ten CCs. Even though effective intervention strategies are being provided at the community centers, food insecurity and consumption of fruits and vegetables continues to be problematic:

- More than half (54.1%) of participants of the Human Service Agency's 2013 Community Center Needs Assessment Survey noted that in the last 12 months, they have eaten less than they felt they should because there wasn't enough money to buy food.
- More than 50% of the residents reported NOT eating at least five servings of fruits or vegetables daily, as recommended by the United States Department of Agriculture (USDA).

The needs assessment found that almost 20% of SJC residents have expressed food insecurity and three CCs have been identified as federally designated food desert tracts where at least 500 people and/or 33% of the population live more than one mile from a supermarket or large grocery store. In addition to limited access to nutritious food, lack of physical activity is another contributing risk factor for several serious chronic diseases (i.e., heart disease, hypertension, stroke and diabetes) which are significant health issues in all CCs. Analysis of environmental indicators shows that conditions in many of the CCs are barriers to healthy behaviors and active lifestyles such as, elevated crime rates, limited access to recreational facilities, heightened fear of violence, high concentration of fast food restaurants, and food deserts. Local survey data demonstrates the limited access to healthy food outlets and a greater concentration of fast food and convenience stores, all of which may contribute to community members' decisions to select unhealthy food options. SJC's recent CX3 survey found that only two out of 34 sampled small markets, grocery, and convenience stores in Stockton met standards for accessibility, quality, and promotion of fresh produce. Out of 120 stores surveyed in the recent SJC Public Health Services' Healthy Stores for a Healthy Community campaign, only 20% sold low- or non-fat milk, while an overwhelming majority sold unhealthy, calorie-dense snack foods and sugary drinks. In response to these issues, the local implementing agencies have developed a collaborative work plan and undertaken a collective impact approach to address the unmet needs of the county.

5. Community Change Goals

The local needs of the SNAP-Ed eligible population in San Joaquin County were identified as a result of community assessment, consultation with partners, and LIA's own assessments of the unmet needs of their clientele. Working collaboratively as well with our community partners (see table below), the LIAs have determined that the following long-term community change goals are vital to reducing the obesity rate in San Joaquin County:

Goal 1: Increase consumption of healthy foods and beverages and increase physical activity. (State Level Goals 1, 2 and 5) and (Three-Year SNAP-Ed Local Objective 1, 2, and 3). *(PSEs: Wellness Policies and Procedures; Healthy Retail Recognition; Edible Gardens; Smarter Lunchroom Movement; Active Transportation; and Structured Physical Activity)*

According to the Human Service Agency's 2013 Community Center Needs Assessment Survey, more than 50% of surveyed community center residents indicated they had not eaten their daily recommended serving of fruits and vegetables. Based on this information, the LIAs have selected a variety of objectives to address these needs. LIAs will increase consumption and/or demand for healthy foods and beverages, as well as increase the frequency and/or levels of physical activity within the SNAP-Ed eligible populations, through direct (individual level) and indirect (individual/sector levels) education that supports environmental level strategies (i.e., policy, system, environmental changes (PSE)). Strategies include:

- *Increasing consumption and awareness of healthy food and beverage choices,*
- *Providing training and promoting opportunities to increase physical activity,*
- *Utilizing the Smarter Lunchroom Movement to encourage healthy food/beverage choices among students,*
- *Facilitating the development and maintenance of community and school gardens,*
- *Implementing healthy food distribution policies to encourage healthy food/beverage choices,*
- *Building awareness and appeal of healthy dietary choices through the Healthy Shopper program and community events, and*
- *Supporting the recognition of Healthy Retail Sites where consumers can purchase healthy food/beverage items.*

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Joaquin County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

LIAs Three-Year SNAP-Ed Local Objective 1:
By September 30, 2019, up to ***3,500 youth 0-4 years of age and 2,058 of their parents*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****. Additionally, by the end of 2019, a minimum of* ***35 Early Child Care sites will*** *make healthy site changes designed to improve their NE, PA, and screen time environments for children 0-4 years of age.*

According to the SNAP-Ed Profile, 8.2% of SNAP-Ed eligible youth 2-11 years of age are overweight and 1 out of 3 children 12 to 17 years of age are overweight/obese. This points to the need for implementing a comprehensive strategy to increase consumption of healthy foods/beverages and physical activity. LIAs will utilize education and training to increase knowledge and encourage behavioral change, as well as support systems changes (e.g., edible gardens, structured physical activity, wellness polies/procedures) that enhance the youth's environments.

LIAs Three-Year SNAP-Ed Local Objective #2:
By September 30, 2019, up to ***4,230 youth 5-17 years of age*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****. Additionally, by the end of 2019, a minimum of* ***46 SNAP-Ed eligible sites*** *serving these youth will make healthy site changes designed to improve their NE and PA environments.*

The Pediatric Nutrition Surveillance System (PedNSS) and Pregnancy Surveillance System (PNSS) also indicates that 40% of the county's children in grades 5, 7, and 9 are overweight or obese. Additionally, 32.9% of the county's SNAP-Ed eligible youth ages 12-17 are considered overweight (20.7%) or obese (12.2%). Again, LIAs recognize the need and importance of using a comprehensive approach to increasing consumption of healthy foods/beverages and physical activity. LIAs will use education and training to increase knowledge and encourage behavioral change, and support schools and youth-serving sites to promote systems changes (e.g., smarter lunchrooms, structured physical activity, edible gardens, active transportation).

***LIAs Three-Year SNAP-Ed Local Objective #3*:**
By September 30, 2019, ***3,645 adults 18 years of age and older in year one and 1,930 in years two and three*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****.* Additionally, a minimum of* ***14 sites*** *serving these adults will make healthy site changes designed to support their improved nutrition and physical activity behaviors.*
**Due to CDSS funding ending for CWD in 2017, direct education numbers are reduced in years two and three.*

The county continues to struggle with issues of obesity within the adult population. Nearly 30% of the county's adult population is obese, and 69.7% of adults reported consuming fast food and 50.6% reported consuming sugar-sweetened beverages per week. A comprehensive approach is utilized to increase knowledge and encourage behavioral change, as well as support schools and youth-serving sites to promote systems changes (e.g., wellness policies/procedures and edible gardens).
Goal 2: Increase food security through strategies to improve resource management behaviors and increase access to and/or appeal of healthy dietary choices where people eat, live, learn, and shop. (State Level Goals 3 and 4) and (Three-Year SNAP-Ed Local Objective 1, 2, 3, and 4). *(PSEs: Food Security/Food Access, Edible Gardens, Healthy Retail Recognition, Healthy Food and Beverage Standards, Wellness Policies and/or Procedures*)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Joaquin County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

As identified in the county needs assessment, over 46% of low-income households suffer from food insecurity. According to the survey conducted by Human Service Agency, more than half of the respondents indicated that they had eaten less than they felt they should because of limited budgets. LIAs will increase food security through nutrition and food resource management education supporting environmental and sector level strategies. Strategies include:

- *Promoting enrollment in CalFresh and other food programs serving SNAP-eligible populations,*
- *Improving food resource management strategies utilized by CalFresh beneficiaries,*
- *Facilitating the development and maintenance of community and school gardens,*
- *Improving the retail environment,*
- *Implementing food access strategies in collaboration with the Hunger Task Force's Food Access Workgroup,*
- *Increasing retailer access to wholesale fruit and vegetable distribution,*
- *Building awareness and appeal of healthy dietary choices through the Healthy Shopper program and community events,*
- *Supporting the recognition of Healthy Retail Sites, and*
- *Implementing healthy food distribution policies at emergency food distribution centers.*

LIAs Three-Year SNAP-Ed Local Objective 1:
By September 30, 2019, up to ***3,500 youth 0-4 years of age and 2,058 of their parents*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****. Additionally, by the end of 2019, a minimum of* ***35 Early Child Care sites will*** *make healthy site changes designed to improve their NE, PA, and screen time environments for children 0-4 years of age.*

According to the SNAP-Ed Profile, 8.2% of SNAP-Ed eligible youth 2-11 years of age are overweight and 1 out of 3 children 12 to 17 years of age are overweight/obese. This points to the need for implementing comprehensive programs that include educational opportunities that will improve food resource management behaviors for both youth and their parents. Additionally, LIAs will institute PSE changes that will support healthy dietary choices and increase physical activity.

LIAs Three-Year SNAP-Ed Local Objective #2:

By September 30, 2019, up to ***4,230 youth 5-17 years of age*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****. Additionally, by the end of 2019, a minimum of* ***46 SNAP-Ed eligible sites*** *serving these youth will make healthy site changes designed to improve their NE and PA environments.*

The Pediatric Nutrition Surveillance System (PedNSS) and Pregnancy Surveillance System (PNSS) indicates that 40% of the county's children in grades 5, 7, and 9 are overweight or obese. Additionally, 32.9% of the county's SNAP-Ed eligible youth ages 12-17 are considered overweight (20.7%) or obese (12.2%). Again, this

points to the need for implementing comprehensive programs that include educational opportunities that will improve food resource management behaviors for both youth and their parents. Additionally, LIAs will institute PSE changes that will support healthy dietary choices and increase physical activity.

***LIAs Three-Year SNAP-Ed Local Objective #3*:**
By September 30, 2019, ***3,645 adults 18 years of age and older in year one and 1,930 in years two and three*** *will receive* ***direct nutrition (NE) and physical activity (PA) education annually****.* Additionally, a minimum of* ***14 sites*** *serving these adults will make healthy site changes designed to support their improved nutrition and physical activity behaviors.*
**Due to CDSS funding ending for CWD in 2017, direct education numbers are reduced in years two and three.*

The county continues to struggle with issues of obesity within the adult population. Nearly 30% of the county's adult population is obese, and 69.7% of adults reported consuming fast food and 50.6% reported consuming sugar-sweetened beverages per week. As previously stated, this points to the need for implementing comprehensive programs that include educational opportunities that will improve food resource management behaviors for both youth and their parents. Additionally, LIAs will institute PSE changes that will support healthy dietary choices and increase physical activity.

LIAs Three-Year SNAP-Ed Local Objective #4:

By September 30, 2019, San Joaquin County LIAs will collaborate with SNAP-Ed funded and non-SNAP-Ed funded partners to adopt and/or implement healthy food access/food security PSE changes and activities at ***9 sites*** *serving SNAP-Ed eligible youth and adults in community and retail settings.*
According to the Human Service Agency Needs Assessment addressing food insecurity at eight participating community centers located in the ten CCs, more half (54.1%) of participants noted that in the last 12 months, they have eaten less than they felt they should because there wasn't enough money to buy food. Additionally, the needs assessment found that almost 20% of SJC residents have expressed food insecurity and three CCs have been identified as federally designated food desert tracts. Furthermore, SJC's recent CX3 surveys found that only two out of 34 sampled small markets, grocery, and convenience stores in Stockton met standards for accessibility, quality, and promotion of fresh produce. Out of 120 stores surveyed in the recent SJC Public Health Services' Healthy Stores for a Healthy Community campaign, only 20% sold low- or non-fat milk, while an overwhelming majority sold unhealthy, calorie-dense snack foods and sugary drinks. All of this points to the need to have a collaborative work plan that addresses issues of food access and food insecurity.

In summary, the LIAs will work together on the goals listed above, each working in areas based on their level of expertise and access, to implement strategies and deliver services to the eligible population. The local objectives outlined in the Integrated Work Plan (IWP) support the goals by providing education and technical assistance for improved nutrition and physical activity, access to healthy foods and beverages and address the issues of food insecurity/food access. Completion of IWP activities will not only improve the health and wellbeing of SNAP-Ed eligible residents, but will also complement the State Level Objectives to reduce the prevalence of obesity and the onset of related chronic diseases within the California SNAP-Ed eligible populations.

The LIA partnerships, along with its non-SNAP-Ed partners, are committed to working together through the following strategies (see Section 6 below):

- nutrition/physical activity education (direct and indirect)
- media and public relations
- collaboration expansion and community stakeholder "buy-in" through coalitions and partnerships
- training and technical assistance to the community
- community events and target population outreach
- policy, system, and environmental change

6. Partnerships and Collaborative Efforts

The LIAs partnerships and collaborative efforts involve three main groups: 1) the Obesity and Chronic Disease Prevention (OCDP) Task Force; 2) the Healthy San Joaquin (HSJ) Collaborative; and 3) the Hunger Task Force for San Joaquin County (HTF). The OCDP Task Force is a collaborative of individuals and/or organizations concerned about the high rates of obesity, diabetes, cardiovascular disease, and asthma in San Joaquin County. The San Joaquin CNAP was established in 2012 as a major component of the OCDP Task Force with the overall aim to coordinate and leverage nutrition messages, education, and services between partners and to maximize resources and outcomes for low resource Californians at or below 185% FPL. San Joaquin CNAP (SJ CNAP) meets every other month as part of the OCDP Task Force. The HSJ Collaborative is the Obesity Prevention arm of the OCDP Task Force. The HSJ Collaborative members focus on working collectively to bring about individual, community, system and environmental changes that shape nutrition and physical activity behaviors. The HSJ Collaborative meets monthly and plays an integral role in the promotion and participation of LIAs and their CNAP partners in joint activities/events. The HTF is a collaborative of individuals and/or organizations whose members are working to end hunger and food insecurity in San Joaquin County. The HTF meets quarterly.

At the November 2015 meeting of the OCDP Task Force, SJ CNAP members selected Food Access as their priority for the next three years. As a result, the SJ CNAP will address food access as a major environmental factor related to improving the nutrition and physical activity behaviors of low-income youth and adults. LIAs plan to collaborate with the HTF to establish a Food Access Workgroup (previously referenced as Food Nutrition Policy Council). The purpose of the Food Access Workgroup will be to identify, prioritize and address the emergent needs of underserved communities. The focus of the Food Access Workgroup will align with the IWP and, as appropriate, receive support from the CNAP facilitator. CNAP Partners and their proposed work plan contributions are outlined in the table below.

CNAP Partner	Proposed Work Plan Contributions
Catholic Charities Diocese of Stockton	Local Implementing Agency (i.e., CCC) working to conduct nutrition and physical activity education as well as systems changes to promote healthier food options at their community food bank and other intervention sites. Provides CalFresh (SNAP) outreach and application assistance to individuals and families. Co-Chair of Hunger Task Force.
Community Partnership for Families (CUFF)	Trained as extenders to provide nutrition, physical activity, and food resource management education. They will assist with community engagement activities and promote countywide nutrition and physical activity education/events. Partner with local food banks to bring mobile farmers markets (fresh produce) to center once a month. Provide Summer Lunch Program.
Community Medical Centers, Inc. (CMC)—Health Education Department	Provides nutrition and/or physical activity education, food resource management, and will promote countywide nutrition and physical activity education/events. Refer patients to local mobile fruits/vegetables distribution locations.
Community Medical Centers, Inc. (CMC)—WIC (Women, Infants, & Children) Program	Provides nutrition and/or physical activity education, food resource management, and will promote countywide nutrition and physical activity education/events. Provides participants with vouchers for purchasing healthy foods at local retail stores and Farmers Markets.
Dairy Council of California	Provides nutrition education curriculum to K-12 teachers within the San Joaquin County school districts. Provide leadership and support for Smarter Lunchroom Movement (SLM) in San Joaquin County. Assists with community engagement activities to promote countywide nutrition and physical activity education/events (e.g., AgVenture).
Dameron Hospital	Provides nutrition and/or physical activity education and healthy food options at classes. May assist with referrals to countywide nutrition and/or physical activity classes, trainings, and/or events.
Delta Healthcare WIC	Provides classes and counseling on nutrition and physical activity for infants, children, and women and promotes and supports breastfeeding for optimum health of infants and mothers. Provides participants with vouchers for purchasing healthy foods at local retail stores and Farmers Markets. Conducts food demonstrations. May assist with promoting countywide nutrition and physical activity education/events.

CNAP Partner	Proposed Work Plan Contributions
Emergency Food Bank	Distributes fruits and vegetables through Mobile Farmers Market program, the Main Pantry's food distribution line, and pantry partners/satellite sites. Provides weekly cooking demonstrations, food resource management lessons, and nutrition education at the Main Pantry and at Mobile Farmers Market sites.
Family Resource and Referral Center	Provides nutrition education to children and families using SNAP-Ed approved curricula, Rethink Your Drink Campaign materials, and First 5 quarterly messaging. They may assist with youth data collection activities promoting countywide nutrition and physical activity education/events.
First 5 San Joaquin	Provides health related services and nutrition education to families with children ages 0-5 via home visitation, parent/community workshops, preschool classrooms, child care centers and family child care provider homes. Provides information and referrals to families for WIC and CalFresh as well as training to funded programs and other community partners on various community resources that promote nutrition education and access to healthy food. Will assist with promoting countywide nutrition and physical activity messages/education/events.
Give Every Child a Chance (GECAC)	Collaborates with organizations on nutrition and physical activity programs and conducts nutrition education in afterschool programs. Will assist with promoting countywide nutrition and physical activity education/events.
Gospel Center Rescue Mission, Inc. (GCRM)	Provides nutrition and physical activity education in afterschool programs, including healthy food demonstrations. Promotes healthy eating and active living to parents and children.
Health Plan of San Joaquin	Provides nutrition and health education workshops and sponsors local health events. Will assist with promoting countywide nutrition and physical activity messages/education/events. Part of the Food 4 Thought program that provides fresh produce for students and their families.
Health Net of California, Inc.	Provides health education to members and non-members that focus on heart health, nutrition, physical activity, and diabetes. Provides resources during classes for food banks and other food programs.
Hill Physicians Medical Group	Provides free online tools for nutrition and physical activity, and provides member discounts on the Farm Fresh to You fruits and veggies delivery program. May assist with referrals to countywide nutrition and physical activity classes.

CNAP Partner	Proposed Work Plan Contributions
Leah's Pantry (eatfresh.org)	Provide free online healthy resources with integrated nutrition education curricula. Provides resource management skill tools.
Lodi Unified School District (LUSD)	Makes presentations at AgVenture including Rethink Your Drink and School's Farmers Market. May assist with promoting countywide nutrition and physical activity messages/events. Collaborates with LIAs on implementing the Smarter Lunchroom Movement.
Manteca Seventh-day Adventist Church	Participates in AgVenture and In-Step for Life Events (physical activity event), and provides community vegetable boxes year round. Will assist with promoting countywide nutrition and physical activity messages/education/events.
Manteca Unified School District (MUSD)	Provides Harvest of the Month activities. Also partners with Lathrop Manteca and Stockton Parks and Recreation Departments to publish information regarding summer meal locations, and makes presentations at AgVenture including Rethink Your Drink and a School's Farmers Market. May assist with promoting countywide nutrition and physical activity messages/events. May implement the Smarter Lunchroom Movement.
Open Door House of Prayer Church	Health Ministry shares health education information with congregation and community. May assist with promoting countywide nutrition and physical activity messages/events.
Racial and Ethnic Approaches to Health "Within Our Reach"	Provides training and education on nutrition and physical activities for African American faith-based community. Facilitates/provides leadership for development of healthy foods/physical activity policies with faith-based participants. Will assist with community engagement activities and promoting countywide nutrition education/events.
Safe Moves	Will partner to implement Safe Routes to School (SRTS) programs and provide SRTS training and/or technical assistance.
Safe Routes to School (SRTS)	Provides education promoting safety and physical activity in participating Stockton Unified School District schools.
SJC Behavioral Health Services	Partners with Local Health Department for training on nutrition and physical activity. This organization also created Food Policy Guidelines and Consumer Health Empowerment Initiative. May assist with promoting countywide nutrition and physical activity messages/events.

CNAP Partner	Proposed Work Plan Contributions
SJC Human Services Agency	Local Implementing Agency (i.e., CWD) conducts nutrition and physical activity education as well as developed food distribution policy. Their 8 community centers serve as a conduit for access to food (e.g., brown bag, congregate meal program, drought food box program, etc.). Facilitates the Emergency Food Bank's Mobile Farmers Market monthly visits at the community centers in order to increase access to fruits and vegetables. Distributes donated produce items as they are available at county community centers.
SJC Office of Education	Provides SNAP-Ed referrals, works to provide nutrition and physical activity education, supports and promotes a healthy food and beverage policy for select afterschool collaboratives. They will assist with promoting countywide nutrition and physical activity education/events. Promotes edible gardens.
SJC Public Health Services—Child Health and Disability Prevention (CHDP)	CHDP conducts training and technical assistance for community partners on nutrition and physical activity education and resources (e.g., utilizing the Healthy Living Resource guide). Will assist with promoting countywide nutrition and physical activity referrals/education/events.
SJC Public Health Services—WIC Program	Provides client referrals to CalFresh, food banks, and SNAP-Ed programs. Also provides WIC orientation for HSA eligibility workers to promote use of WIC services. Will assist with promoting countywide nutrition and physical activity education/events.
SJC Public Health Services—Nutrition Education Obesity Prevention (NEOP) Program	Local Implementing Agency (i.e., LHD) providing nutrition and physical activity education, training, and technical assistance. Provides training and technical assistance on safe routes to school, school and community gardens, and the Healthy Retail Recognition Project. Will establish a Food Access Workgroup.
SJC Public Health Services—Smoking and Tobacco Outreach Prevention Program (STOPP)	Will assist with CX3 data collection, as appropriate, as well as promote nutrition and physical activity education/events.
San Joaquin Medical Society	Offers downloadable resources pertaining to healthy eating and active living through their website HealthHubsj.com. Will assist with promoting countywide nutrition and physical activity education/events.

CNAP Partner	Proposed Work Plan Contributions
SCAN	Provide services and food access to Seniors. Offers downloadable resources on wellness topics, including nutrition and physical activity. Participates in collaborative groups focused on nutrition, physical activity, food access, and healthy environments.
Second Harvest Food Bank San Joaquin/Stanislaus Counties	Distributes fruits and vegetables through Mobile Market program, the Main Pantry's food distribution line, and pantry partners/satellite sites. Provides brown bag program to Human Services Agency. Will assist with promoting countywide nutrition and physical activity education/events.
St. Joseph's Medical Center Community Health Department	Promotes healthy nutrition education classes especially for adults and youth diagnosed with diabetes. May assist with promoting nutrition and physical activity. May provide referrals and participate in education/events.
Stockton Unified School District (SUSD) Health Services	Promotes gardening programs and encourages healthy choices at schools. Will assist with promoting countywide nutrition and physical activity messages/education/events
Sutter Tracy Community Hospital	Promotes USDA MyPlate, provide referrals to food assistance programs, and work with school districts to provide healthy snacks and water.
Taft Community Center	One of the 8 SJC HSA community centers. Distribution site for emergency foods. Congregate meal site. Partners with Central Valley Neighborhood Harvest to distribute locally grown fruits and vegetables. Will assist with promoting countywide nutrition and physical activity messages/education/events.

CNAP Partner	Proposed Work Plan Contributions
University of California Cooperative Extension (UCCE)	Local Implementing Agency (i.e., UCCE) who provides nutrition, food resource management, food safety and physical activity education targeting CalFresh-eligible adults, youth and seniors through UC CalFresh. The Expanded Food Nutrition Education Program (EFNEP) provides nutrition, food resource management, food safety, and physical activity education targeting low-income families with children. UC CalFresh and EFNEP provide train-the-trainer workshops and ongoing support for nutrition education programs in schools, afterschool programs, preschools, and community-based organizations/partners. UC CalFresh also develops and supports school and community garden programs. UCCE also is home to the Master Gardener Program and 4-H Youth Development Program, who collaborate with LIAs and CNAP partners on various activities. UC CalFresh provides technical assistance to schools for the implementation of SLM.
US Department of Health and Human Services Office of the Assistant Secretary for Health/Office of the Regional Health Administrator	Public Health Advisor participates in and supports proposed activities of the OCDP Task Force, HSJ Collaborative, and HTF. Will assist with promoting countywide nutrition, physical activity, and food access events/initiatives.
YMCA of San Joaquin County	Provides nutrition and physical activity education for youth. Will assist with promoting countywide nutrition and physical activity messages/education/events.

In addition, the following organizations (not currently CNAP Task Force members) will be utilized to assist in the efforts to achieve SJC SNAP-Ed community goals and objectives:

Community Partner	Proposed Work Plan Contributions
Hunger Task Force for San Joaquin County	Partnering to establish and support the food access workgroup.
Interfaith Food Bank	May partner to implement and/or support healthy food distribution policy.
Lodi Salvation Army	May partner to implement and/or support healthy food distribution policy. Will also promote nutrition and physical activity education/events.
PUENTES	May provide training and/or technical assistance for school/community gardens.
San Joaquin Sustainable Communities Coalition	May assist with advocacy or support necessary to establish school/community gardens.

Community Partner	Proposed Work Plan Contributions
UC ANR Nutrition Policy Institute	May work LIAs and community partners to help them develop policies focused on the nutrition quality of the foods they distribute and promote healthy food access.
UCCE Master Gardeners	Will assist with and provide training and technical assistance for school/community gardens.
UCCE 4-H Youth Development Program	May partner to promote healthy eating and physical activity through youth-focused nutrition, physical activity and/or garden-based education at eligible afterschool sites. Will assist with promoting countywide nutrition and physical activity events.

Collective Impact Zone: To determine the impact of our collective efforts, LIAs have designated an underserved region of the county (East Stockton) as our Collective Impact Zone. This region of the county spans 5.91 square miles and includes 6,725 households, of which more than 50 percent are SNAP-Ed eligible. This unincorporated area of the city was selected due to limited services and environmental factors that are barriers to healthy behaviors among the SNAP-Ed eligible population. Barriers include, but are not limited to:

- Safety of the neighborhoods (loose dogs, crime)
- Poor walkability due to the lack of sidewalks
- Limited access to healthy food choices
- Limited/underutilized community assets (libraries, sports facilities, health clinics)

As part of the IWP, LIAs will purposefully target this region with the intent to coordinate nutrition and physical activity messages and education, as well as hosting a joint event (e.g., Fruit and Veggie Fest, Activate Your Summer) to reinforce community change goals addressing increased consumption of healthy foods and beverages, increased physical activity, and improved food security. LIAs have identified key policy, system, and environmental (PSE) change strategies (Healthy Retail, Wellness Policies and Procedures, Smarter Lunchroom, Structured Physical Activity, Active Transportation, Edible Gardens, and Healthy Food Distribution Policy) based on the community's needs. LIAs will use existing data and/or conduct assessments with key stakeholders and community members to select the most appropriate PSE strategies. The CNAP facilitator will assist with the coordination of strategies and activities within the Collective Impact Zone. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as those listed as CNAP partners above.

7. Key Messages

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other:Food Resource Management
X	Fats and Oils	X	Food Shopping/ Preparation		Other:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, California SNAP-Ed integrated Curricula List, and/or FFY 2017-19 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. Intervention and Evaluation Plan Narrative Summary

The local implementing agencies (LIAs) in San Joaquin County—UCCE, LHD, CWD and CCC—will collaborate to provide education and policy, system, and environmental support to multigenerational SNAP-Ed eligible participants. Due to CDSS funding ending for CWD in 2017, the reach numbers may impacted in years two and three. The LIAs will also collaborate with non-SNAP-Ed funded partners to influence positive change in their sectors. The three-year objectives outlined are based upon a variety of sources, such as the county's 2013 and 2015 Community Health Needs Assessment (CHNA); 2015 California Food Policy Advocates Nutrition and Food Insecurity Profile for San Joaquin County; Communities of Excellence in Obesity, Nutrition, and Physical Activity (CX3); California Health Interview Survey; and SJC Nutrition and Food Security Profile) in addition to having discussions with CNAP partners, including the Human Service Agency's CalFresh office.

The needs identified in the aforementioned resources indicate that San Joaquin County, compared to California, have higher incidences of the following: food insecurity; lack of access to fruits and vegetables in neighborhoods; overweight/obesity; diabetes and other chronic diseases; poverty; unsafe neighborhoods; sedentary behaviors; and lack of physical activity opportunities. In order to address these issues and bring about change, LIAs have identified key PSE efforts and

strategies and will work with partners and community stakeholders to implement these changes in targeted sites and/or communities throughout San Joaquin County.

All five state level goals are supported throughout the three years by the LIA goals identified in the Community Change Goals listed above. The first LIA goal will support State Goals 1, 2, and 5:

- Increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages
- Increase physical activity
- Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations

The second LIA goal will support State Goals 3 and 4:

- Improve food resource management
- Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop

LIAs will utilize comprehensive approaches to address multiple levels of the Social Ecological Model (SEM) to serve the SNAP-Ed eligible population in a variety of locations throughout San Joaquin County. Research-tested, practice-tested, and emerging strategies will be used as referenced in the "SNAP-Ed Strategies and Interventions: An Obesity Prevention Toolkit for States." Strategies will also align with the Live, Learn, and Shop portfolio settings and use methods that are culturally-relevant and motivational to encourage healthy behavior changes. Integrated work plan activities were selected based upon the unmet needs identified in community needs assessments, census data, SNAP-Ed county profile data, and HSA CalFresh Community Centers surveys.
The LIAs will use mixed activities with various intervention categories to support PSE strategies:

- Nutrition and physical activity education components targeting multi-generational (youth, families, seniors) audiences with series-based and single-session based nutrition and physical activity classes. These **direct education activities** include food demonstrations and sample-sized taste-tests. Lessons, activities, and taste-tests will utilize USDA-approved curriculum and will be provided at venues such as preschools, schools, faith-based organizations, community-based organizations, and other community venues. Select education reinforcement items may be used during the sessions so that participants will be motivated to transfer their new skills and knowledge to behavior changes for themselves and their families.
- LIAs will also conduct **indirect education activities** throughout the County at health fairs and community events. By increasing knowledge and changing attitudes, participants are able to make informed decisions that lead to increased consumption of healthy foods and beverages; improved resource management; and increased levels of physical activity. Utilizing the knowledge gained through the education efforts of the LIAs, participants can be engaged and empowered to improve their community environment that reinforces and supports their healthy choices and behavior changes.

- CNAP Coordinator will promote frequent **communication and coordination** through multiple channels utilizing coalition and collaborative efforts/meetings of SNAP-Ed funded and non-funded partners to focus on addressing community change goals previously discussed. Coordinated messages through regular communication channels (e.g., UC CalFresh Weekly Updates, social media, meetings, electronic mailing lists, and websites).
- LIAs will provide **training and technical assistance** to community stakeholders who have frequent contact with SNAP-Ed eligible populations and interact on a regular basis with their community's various environments (e.g., church leaders, teachers, educators, health leaders, retailers, community center administrators/staff, emergency food distribution directors/staff, parents/caregivers, and other community stakeholders). These stakeholders have the ability to make, facilitate, and sustain policy, system, and environmental changes that can influence healthy behaviors of the SNAP-Ed population.

In order to improve the nutritional and physical environments of a large segment of the population, the LIAs have identified settings and strategies that are community-focused, population-based and aimed at preventing obesity and related chronic diseases. To show **progression** over the 3 years of the IWP, LIAs have designed the IWP in a way that not only increases the number of sites where PSEs are being implemented (e.g., the number of gardens established at preschool sites, the number of community centers that adopt and implement the food distribution policy, the number of stores that are enhanced to sell fresh produce in a target neighborhood), but also the variety of PSEs being implemented at those same sites. This will allow LIAs to progressively engage individuals across different SNAP-Ed target audiences through PSE partnerships and related activities.

Additionally, LIAs will encourage participating partners to implement multiple PSEs over the course of the 3 years in order to maximize the opportunities for healthy choices. LIAs selected portfolio settings to reach a greater number of SNAP-Ed eligible participants across the lifespan of CalFresh eligible adults and youth. The first portfolio setting is LEARN; addressing children under age 5 and youth ages 5 to 17.

Objective #1: LEARN—Early Child Care (ages 0-4) PSE Strategies: Structured Physical Activity, Edible Gardens, and Wellness Policies/Procedures

The first intervention setting is working within early child care environments to select approaches that will integrate healthy food and beverage consumption, increased physical activity, and appeal of heathy dietary choices into participating child care systems. According to CHIS 2014, 61% of children under the age of five are reported to have eaten fast food in the past week. Only 29% of children report doing at least an hour of physical activity every day which is consistent with 2008 Physical Activity Guidelines for Americans. Thus, evidence-based, multi-level approaches have been selected that include individual level education, PSEs and sector level collaborations shown to improve the food and physical activity behaviors of children under 5 years of age and their families.

Approach 1: LIAs will deliver USDA Nutrition and Physical Activity Education to preschoolers, parents, child care providers, parent educators, and preschool teachers/staff. LIA and LIA trained partners will conduct direct nutrition and physical activity education and apply health promotion strategies using a variety of activities to deliver and/or reinforce knowledge and healthy behavioral changes at the individual and interpersonal level. LIA trained partners include extenders who may be experienced educators funded through external agencies/organizations and bring a variety of experiences, education, and cultural/linguistic backgrounds, which enhance program activities. LIAs will train extenders and coordinate PSEs with partners such as First 5 San Joaquin, Creative Child Care, Stockton Unified School District, Head Start/ Early Head Start, Child and Adult Care Food Program, Family Resource and Referral Center, and San Joaquin County Office of Education.

Approach 2: After engaging new preschool/child care sites on their interest and commitment to PSE change, LIAs will work with the staff, parents, and community members to assess their specific needs and identify appropriate PSE strategies. LIAs will provide training, technical assistance, and/or support materials to assist in the implementation and maintenance of selected PSE strategies. In all cases, LIAs will consult with local and statewide content experts as needed.

Building on LIA experience and current staff capacity, LIAs have identified three local primary PSEs strategies that align with the needs of existing partner agencies/organizations serving children under 5 years of age and their families. The first primary PSE strategy is Structured Physical Activity. Structured Physical Activity includes the integration of structured physical activity into the preschool environment to increase children's levels of physical activity. LIAs will work with child care center staff, directors and/or administration to identify appropriate physical activity curriculum that may complement the center/school's lesson plans. LIAs will provide training, technical assistance, and curriculum/support materials to aid in the implementation and sustainability of the structure physical activities. The second PSE strategy is Edible Gardens. LIAs will provide training and technical assistance to preschools who are interested in developing and/or maintaining a school garden to encourage the consumption of healthy foods as well as increasing access and appeal of healthy dietary choices. LIAs will support gardening efforts with SNAP-Ed approved garden-enhanced nutrition education, gardening tools, seeds, soil, and/or other gardening support materials. The third PSE strategy is Wellness Policies/Procedures. LIAs will facilitate the development of early child care center policies and/or procedures that promote healthy eating and/or being physically active. Policies and/or procedures will be reviewed and approved by child care center directors and/or administration. LIAs will also work with technical experts in the selected policy/procedure area to refer and/or provide related training, technical assistance, and/or materials.

Approach 3: Throughout the process discussed above, LIAs will conduct community-wide activities at the sector level to reinforce education and/or PSE strategies promoting healthy food and beverage consumption, increased physical activity as well as the desire for healthy choices. LIA staff will participate in at least one quarterly local or regional collaborative/coalition/CNAP meeting (e.g., First 5 Advisory Committee, Council for Quality Education and Care of Children, etc.) to engage members in LIA activity, promote or share information, and gather resources to share with others.

Objective #2: LEARN—Youth (age 5-17) PSE Strategies: Smarter Lunchroom Movement (SLM), Edible Gardens, and Active Transportation

The second intervention setting is working within schools and after school programs to increase healthy food and beverage consumption, physical activity, and appeal of healthy dietary choices of SNAP-Ed eligible school-aged children and their families. According to CHIS data, some 40% of San Joaquin County children are overweight or obese. CDC Pediatric Nutrition Surveillance System (PedNSS) and the Pregnancy Surveillance System (PNSS) data indicate that 40% of children in grades 5, 7, and 9 are overweight or obese, and 15% of children under the age of 6 are overweight. Forty two percent of youth (ages 2-11) reported being physically active at least one hour every day. Furthermore, nearly 76% of the County's youth reported consuming fast food at least once in the past week and 30% reported consuming one or more sugar-sweetened beverage in the last 24 hours. This may be due to limited healthy food options, limited recreational facilities, and perceived safety issues that discourage being physically active in the community. LIAs will deliver education and PSE strategies to address these needs.

Approach 1: LIAs will deliver USDA Nutrition and Physical Activity Education to school-aged youth, teachers/staff, and parent educators. LIA and LIA trained partners will conduct direct nutrition and physical activity education and apply health promotion strategies to promote and/or reinforce knowledge and healthy behaviors at the individual and interpersonal level. LIA trained partners include extenders who may be experienced educators funded through external agencies/organizations and bring a variety of experiences, education, and cultural/linguistic backgrounds, which enhance program activities. LIAs will collaborate with local school districts.

Approach 2: LIAs will utilize similar methods described in the school and afterschool settings, to build upon LIAs' efforts/experience and current staff capacity to provide training and technical assistance in three local primary PSE strategy areas. The first is the Smarter Lunchroom Movement. The Smarter Lunchroom Movement focuses on working with schools to highlight and promote cafeteria's healthier food options through marketing and placement. LIAs will work in partnership with school teachers, food service staff, administration, students and parents to make the healthy choice, the easy choice for students. Through the Smarter Lunchroom Movement, schools will use psychology and behavioral theory to encourage students to consume healthy food and/or beverage options through improved access to and/or appeal for healthy dietary choices. LIAs will receive training and technical assistance from the California Department of Education, Dairy Council and UC CalFresh. LIAs will also coordinate with Lodi Unified School District's Food Service and other interested local school districts to identify sites and provide school food service staff with training and technical assistance.

The second PSE strategy is Edible Gardens. LIAs will provide garden-enhanced nutrition education, training, technical assistance, and gardening tools/material support (e.g., seeds, soil, and/or other gardening materials). LIAs will partner with the UCCE Master Gardeners Program and other local gardening consultants to assist with training and technical assistance, as needed.

The third PSE is Active Transportation. Active Transportation (e.g., Safe Routes to School) involves promoting physical activity (e.g., walking and biking) through education, encouragement, engineering and enforcement (involving sector level activities), and evaluation. LIAs will work with school staff, students, parents, and community members to increase opportunities for daily physical activity through Active Transportation/SRTS activities. LIAs will support and promote walk and/or bike to school activities and/or events through a countywide SRTS network and complementary training or technical assistance. They will also coordinate with Safe Moves, a nonprofit organization contracted by the City of Stockton, to conduct SRTS program activities in 16 elementary schools, to provide their schools with PSE training and/or technical assistance based on the interest of their schools.

Approach 3: Again, LIAs will conduct community wide activities at the sector level throughout the plan to reinforce education and/or PSE strategies promoting healthy food and beverage consumption, increased physical activity as well as access to and/or appeal for healthy dietary choices. LIA staff will coordinate, train, and deliver presentations on nutrition education to promote consumption of healthy foods (MyPlate) and healthy beverages (Rethink Your Drink) to third grade students at San Joaquin County AgVenture events. LIA staff will also participate in at least one local and regional, collaboratives/coalitions/CNAP meeting (e.g., School Wellness Committee, City of Stockton SRTS meetings, City of Stockton Bicycle Plan meetings, etc.) to promote or share information, and gather resources to share with others.

Objective #3: LIVE—Adults (age 18+) PSE Strategies: Edible Gardens and Wellness Policies/Procedures

The third intervention setting is working with staff from community-based organizations, faith-based organizations, community centers/senior centers, job training facilities, public housing, and food banks/pantries to increase healthy food and beverage consumption, and access to and/or appeal of healthy dietary choices. Research indicates that many of the SJC's low-income adults struggle with poverty (20% of adults), food insecurity (46%) and unemployment (8.8%). At the same time, physical inactivity and unhealthy eating contribute to high rates of obesity and chronic diseases such as heart disease and diabetes.

Approach 1: LIAs and LIA trained extenders will deliver USDA-approved nutrition and physical activity direct education to adults and seniors using a mix of resources and activities to increase knowledge and motivate or reinforce healthy behaviors at the individual and interpersonal level. LIA trained partners include extenders who may be experienced educators funded through external agencies/organizations and bring a variety of experiences, education, and cultural/linguistic backgrounds, which enhance program activities.

Approach 2: Once participants complete direct education training, LIAs will work with partner organizations to select PSE strategies that focus on increasing consumption of healthy foods and/or beverages. Staff will work with partner organizations and/or community members to assess their needs and identify appropriate PSE strategies. LIAs will work with site decision makers and/or community members to implement selected PSE strategies. Additionally, LIAs will focus on two local priority PSE areas to provide training and technical assistance based on expressed interest or need and staff capacity. LIAs have selected Edible Gardens and Faith/Community-based Organizational Wellness Policies as primary PSE strategies. All PSE activities will focus on engaging participants to advocate for their own health and the health of their community by pursuing positive nutrition systems, environmental changes, and policy changes. Again, LIAs will collaborate with UCCE Master Gardeners Program and other community-based organizations to provide expertise. LIAs will also partner with St. Joseph's Community Health Connectors Program, which trains local community members as promotoras. These individuals will serve as community champions to assist in the promotion of LIA activities.

Approach 3: LIAs will conduct quarterly sector level activities at SNAP-Ed eligible sites to support PSE change priorities. Activities include, but are not limited to, promoting healthy eating and active living in classrooms, cafeterias, and clinics; participating in qualifying health and/or resource fairs, family activity nights, etc.; and disseminating related information via newsletters, e-blasts, social media postings, etc. Yet again, community champions will also be used to communicate key nutrition and physical activity messages. Key messages will be based on the 2015 Dietary Guidelines and SNAP-Ed approved curricula/materials.

Objective #4: SHOP—PSE Strategies: Healthy Food and Beverage Standards, Healthy Retail/Recognition, and Food Security/Food Access

The fourth and final intervention setting is working within retail sites and emergency food distribution sites to improve access to and/or appeal of healthy dietary choices. As previously referenced, there are nearly 148,500 CalFresh-eligible individuals, adults and children, at or below 125% of Federal Poverty Level (FPL). Forty-six percent of SJC low-income households are food insecure. In 2013, only a third of SJC students who participated in the free and reduced lunch school program, also participated in the 2013 summer meals programs. Finally, 2012 Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) findings indicated only two out of 34 small markets, grocery, and convenience stores in the low-income areas of South Stockton met standards

for accessibility, quality, and promotion of fresh produce. Based on this information, LIAs have selected strategies to address access to and/or appeal of healthy dietary choices. Individual level activities have been addressed in the previous LIVE and LEARN settings, thus individual activities in this complementary setting will mainly be indirect education.

Approach 1: LIAs will conduct indirect education through community-wide events such as Fruit and Veggie Fest. Information and resources will be disseminated that promote increased consumption of and appeal for healthy food and beverages available in local retail venues. Additionally, LIAs will implement a Healthy Shopper Program, which focuses on educating shoppers about the benefits, uses and purchase of healthy dietary choices. Events will be hosted at participating retail sites featuring nutrition education and low-cost healthy cooking demonstrations. Support materials (e.g., healthy recipes, Harvest of the Month handouts, etc.) will also be disseminated to reinforce and promote consumption of healthy foods and beverages.

Approach 2: LIAs have selected the following activities to improve food access and appeal of healthy dietary options. First, LIAs will continue efforts to implement a Food Distribution Policy change at the SJC Commodity Program Warehouse. The Warehouse distributes commodity foods and beverages to the eight SJC community centers as well as other volunteer sites. The Food Distribution Policy addresses the following areas: 1) at least 50% of food distributed to be fruits and vegetables; 2) limit the number of sugar-sweetened beverages distributed; and/or 3) encourage donors to donate healthy foodstuffs to food banks. Additionally, training and technical assistance will be provided to other local food banks to encourage their adoption of these policies. LIAs interviewed food banks that have implemented food procurement and/or distribution policies about best practices and possible challenges in developing healthy food policies. Through the Food Access Workgroup, LIAs will encourage local food banks to adopt and implement healthy food distribution policies. LIAs will also work with smaller pantries that rely on larger food banks, in developing and implementing healthy food policies. CCC will receive PSE support from Catholic Charities' Environmental Justice Program and CWD will receive training and technical assistance support for implementation of the food distribution policy from San Joaquin County Public Health Services (SJCPHS) Lifetime of Wellness (LOW) Project staff.

LIAs will also continue working with local retailers on the Healthy Retail Project to increase access and/or appeal of healthy dietary choices. LIA staff will convene a Healthy Retail Advisory Committee (including participants from San Joaquin County Public Health Services' Tobacco Control Program (STOPP), Lifetime of Wellness Project and other community stakeholders) to monitor and select retail sites to participate in the Healthy Retail Recognition Project. LIAs will provide training and technical assistance to two new retailers each year to improve the availability, pricing, placement and promotion of healthier foods and/or beverages. Qualifying retail sites may also be referred to partner with the San Joaquin County Public Health Services' Lifetime of Wellness: Communities in Action Program to support small-scale store improvements, increasing the availability, pricing, placement and promotion of healthier foods. Program partners may also provide marketing consultation as needed. LIAs will partner with retail owners and managers to identify healthy retail strategies/recommendations as well as to assist with improvements, as needed. Promotional events and/or store tours will also be conducted to educate customers on the benefits and uses of healthy foods. Retailers that have made improvements to increase opportunities for healthy food options will recognized on an annual basis.

Approach 3: The coordination and collaboration of activities are integral to LIA sector level activities. LIAs will convene and co-coordinate bi-monthly Obesity and Chronic Disease Prevention Task Force meetings and Healthy San Joaquin Collaborative meetings to promote CNAP related activities. LIAs will regularly communicate with CNAP organizations and agencies on CNAP/SNAP-Ed program activities. Staff will also provide quarterly communications (e.g., e-mail, social

medial, etc.) to inform partner serving SNAP-Ed eligible participants about the availability of resources such as supplemental food programs, local emergency food outlets, and farmers markets and healthy retailers. Finally, LIAs will develop and convene a Food Access Workgroup as a component of the Hunger Task Force for San Joaquin County to address food access issues. Food Access Workgroup updates will also be provided during CNAP meetings, given CNAP's focus on Food Access.

The key to the success of the integrated work plan will be collaboration/coordination with partner schools, agencies, and organizations serving the SNAP-Ed eligible population. Media, public relations, and social media will help the LIAs promote SNAP-Ed related resources, relevant research findings, and snapshots of SNAP-Ed accomplishments across the state. To support a consistent delivery of behavior-focused nutrition messages, the LIAs have developed strong partnerships between themselves, SNAP-Ed funded subcontractors, and other non-SNAP-Ed funded local programs. These collaborations have and will continue to strengthen LIAs ability to implement intervention activities reflective of the Social Ecological Model. LIAs are actively involved in coalitions/collaboratives as coordinators, leaders, and/or members. These groups include the Obesity and Chronic Disease Prevention Task Force (OCDPT), Healthy San Joaquin Collaborative (HSJ), Hunger Task Force (HTF) for San Joaquin, and other various local collaboratives. LIAs will also utilize the CNAP Facilitator to engage a broader range of traditional and nontraditional community partners and coordinate nutrition and physical activity messages, activities and joint event/meetings.

In an effort to evaluate the successes of key strategies and collaboration efforts, the following evaluation activities will be utilized:

LHD	UCCE	CWD	CCC
Activity Tracking Form	UC CalFresh Workbook	Activity Tracking Form	
Intent to Change	Intent to Change	Intent to Change	Intent to Change
Food Behavior Checklist pre/post	Food Behavior Checklist pre/post	Food Behavior Checklist pre/post	
Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM)	Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM)	Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM)	Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM)
Creating Healthy Opportunities in Child Care Environments (CHOICE) Self-Assessment pre/post	Creating Healthy Opportunities in Child Care Environments (CHOICE) Self-Assessment pre/post		
Impact Outcome Evaluation (IOE)	Curriculum specific pre/post surveys (e.g., EatFit)		
	Parent Survey pre/posts		

LHD	UCCE	CWD	CCC
	Retrospective Assessments (e.g., MEDC)		
	Teacher Observation Tools (TOT)		
	Teacher Tasting Tool (TTT)		
	Smarter Lunchroom Movement's Self-assessment Scorecard		
	Shaping Healthy Choices Evaluations Tools		

The LIA evaluation plan will include formative, process and outcome evaluation. The information gathered from the plan will be used to identify areas of strengths and ways to improve services and intervention strategies. LIAs will continue to use the SNAP-Ed Activity Tracking Form (ATF) and Reporting Tools Workbook (RTW) to track IWP progress; which informs the Education and Administration Reporting System (EARS) as well as quarterly and annual reporting. In addition to inputting LIA activities into the ATF and RTW, reporting also includes activities conducted by trained extenders and subcontractors. LIAs will continue to use approved direct education evaluation tools to assess knowledge and behavioral changes. Participants will be asked to complete evaluation surveys that address indicators from the Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes such as: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3) and Fruit and Vegetables (LT2) Physical Activity Recommended Levels (LT7) and Entertainment Screen Time (LT8). An IOE Plan and Report will be submitted annually by LHD. Specific to UCCE, evaluation will be conducted with at least a third of adult direct participants and a quarter of youth participants in order to meet the UC CalFresh State Office evaluation goals/target. The State Office target was set as a simple guideline to encourage evaluation be conducted with a sizable percent of participants. It does not specifically account for attrition rates. However, for series-based lessons, our intent to evaluate outcomes with a third of participants who enrolled in "four or more hours" does to some degree account for attrition and the fact that some participants only attend 1-2 lessons in the series.

LIA's will use the RE-AIM model to assess PSE activities. At the environmental level, LIAs will report as appropriate on the following SNAP-Ed Evaluation Framework priority indicators – Identification of Opportunities (ST4), Partnerships (ST6), Nutrition Supports Adopted (MT4) and Physical Activity Supports Adopted (MT5). All LIAs projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). This information will be used to monitor and assess progress within select PSEs.

LIAs will also be assessing the impact of their education and PSE activities within the Collective Impact Zone. This will be done by taking a sample of each LIAs adult education evaluations and RE-AIM results to assess the effectiveness of strategies that target the SNAP-Ed population's knowledge, attitudes, and/or behaviors. This information will be used to help inform strategies for future integrated work plan activities.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	50%		0 to 4 years old (Preschool):	32,854
Female	50%		5 to 17 years old (School Age):	62,207
			18 to 59 years old (Adult):	142,347

SECTION C: INTERVENTION PLAN for Youth 0-4 years of age (preschool) (LEARN)

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, up to **3,500 youth 0-4 years of age and 2,058 of their parents** will receive **direct nutrition (NE) and physical activity (PA) education annually**. Additionally, by the end of 2019, a minimum of **35 Early Child Care sites will** make healthy site changes designed to improve their NE, PA, and screen time environments for children 0-4 years of age.

SNAP-Ed State Goals

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
Environmental changes that will be explored with partnering Early Child Care sites include:

- Structured Physical Activity
- Edible Gardens
- Wellness Policies and/or Procedures

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):** By September 30, 2017, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **Policy/System/Environmental (PSE)** changes (i.e., Structured Physical Activity, Edible Gardens, and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in a **minimum of 15 Early Child Care sites total**.
2. **FFY 2018 (Year 2) Objective(s):** By September 30, 2018, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **PSE** changes (i.e., Structured Physical Activity, Edible Gardens, and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in an additional **ten Early Child Care sites (for a minimum of 25 sites total)**.
3. **FFY 2019 (Year 3) Objective(s):** By September 30, 2019, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **PSE** changes (i.e., Structured Physical Activity, Edible Gardens, and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in an additional **ten Early Child Care sites (for a minimum of 35 sites total)**.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Joaquin County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, at least 3,500 youth 0-4 years of age and 2,058 of their parents will receive direct nutrition (NE) and physical activity (PA) education annually. Additionally, by the end of 2019, a minimum of 35 Early Child Care sites will make healthy site changes designed to improve their NE, PA, and screen time environments for children 0-4 years of age.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	**Approach 1—Education/Training (Individual Level):** LIA staff will provide initial/update trainings **each year for 133 teachers, parent educators, child care providers, and/or volunteers** funded through partner agencies / organizations to conduct educational lessons designed to promote increased consumption of healthy foods and beverages, improved food resource management skills, increased physical activity, and/or garden-enhanced nutrition education using SNAP-Ed approved curricula/materials. LIA staff and trained extenders will **educate 3,500 SNAP-Ed eligible children 0 to 4 years of age and 2,058 of their parents annually** through home visitation, subsidized child care provider homes, preschool classrooms, and other community sites serving this age group. 	preschool classrooms participating in PSE activities for environmental improvements. Used in Activity 1.3, 1.4, 1.5, 1.6 and 1.7. * The reason the 33% of adult participants and 25% of youth participants are specified is to meet the UC CalFresh State Office target to conduct evaluation with at least a third of adult direct participants and a quarter of youth participants. The State Office target was set as a simple guideline to encourage evaluation be conducted with a sizable percent of participants. It does not specifically account for attrition rates. However, for series-based lessons, our intent to evaluate outcomes with a third of participants who enrolled in "four or more hours" does to some degree account for attrition and the fact that some participants only attend 1-2 lessons in the series. SECTION C: INTERVENTION PLAN for Youth 5-17 years of age (LEARN)

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019, up to **4,230 youth 5-17 years of age** will receive **direct nutrition (NE) and physical activity (PA) education annually**. Additionally, by the end of 2019, a minimum of **46 SNAP-Ed eligible sites** serving these youth will make healthy site changes designed to improve their NE and PA environments.

SNAP-Ed State Goals

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
Environmental Changes that will be explored with partnering school sites include:

- Smarter Lunchrooms
- Edible Gardens
- Active Transportation
- Structured Physical Activity

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):** By September 30, 2017, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **Policy/System/Environmental (PSE)** changes (i.e., Smarter Lunchroom, Edible Gardens, and/or Active Transportation) as well as provide training and/or technical assistance in a minimum of 27 school/community sites.
2. **FFY 2018 (Year 2) Objective(s):** By September 30, 2018, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of PSE changes (i.e., Edible Gardens, Smarter Lunchroom, and/or Active Transportation) as well as provide training and/or technical assistance in an additional 13 new school/community sites for a total of 36 sites.
3. **FFY 2019 (Year 3) Objective(s):** By September 30, 2019, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of PSE changes (i.e., Edible Gardens, Smarter Lunchroom, and/or Active Transportation) as well as provide training and/or technical assistance in an additional 16 new school/community sites for a total of 46 sites.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):
By September 30, 2019, 4,230 youth 5-17 years of age will receive direct nutrition (NE) and physical activity (PA) education annually. Additionally, by the end of 2019 a minimum of 46 SNAP-Ed eligible sites serving these youth will make healthy site changes designed to improve their NE and PA environments.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	**Approach 1—Education/Training (Individual Level):** LIA staff will provide initial/update trainings each year for 63 teachers, staff and/or volunteers funded through partner agencies / organizations to conduct educational lessons designed to promote increased consumption of healthy foods and beverages, improved food resource management skills, increased physical activity, and/or garden-enhanced nutrition education using SNAP-Ed approved curricula/materials. LIA staff and trained extenders will educate 4,230 SNAP-Ed eligible children 5-17 years of age annually through elementary schools, middle schools, high schools and/or community-based agency/organizations serving this age group. SECTION C: INTERVENTION PLAN for Adults 18 years of age and older (LIVE)

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, **3,645 adults 18 years of age and older in year one and 1,930 in years two and three** will receive **direct nutrition (NE) and physical activity (PA) education annually**.* Additionally, a minimum of **14 sites** serving these adults will make healthy site changes designed to support their improved nutrition and physical activity behaviors.
**Due to CDSS funding ending for CWD in 2017, direct education numbers are reduced in years two and three.*

SNAP-Ed State Goals

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
Environmental changes that will be supported by Objective #3 activities include PSEs such as:
- **Wellness Policies/Procedures**
- **Edible Gardens**

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**
1. **FFY 2017 (Year 1) Objective(s):** By September 30, 2017, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **Policy/System/Environmental (PSE)** changes (e.g., Community Gardens and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in a **minimum of 6 community/neighborhood sites**.
2. **FFY 2018 (Year 2) Objective(s):** By September 30, 2018, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **PSE** changes (e.g., Community Gardens and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in a **minimum of 10 community/neighborhood sites**.
3. **FFY 2019 (Year 3) Objective(s):** By September 30, 2019, San Joaquin County SNAP-Ed LIA will support the development and/or implementation of **PSE** changes (e.g., Community Gardens and/or Wellness Policies/Procedures) as well as provide training and/or technical assistance in a **minimum of 14 community/neighborhood sites**.

SECTION C: INTERVENTION PLAN for Food Access/Food Security (SHOP)

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**
By September 30, 2019, San Joaquin County LIAs will collaborate with SNAP-Ed funded and non-SNAP-Ed funded partners to adopt and/or implement healthy food access/food security PSE changes and activities at **9 sites** serving SNAP-Ed eligible youth and adults in community and retail settings.

SNAP-Ed State Goals

	Goal 1: Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
Environmental changes that will be supported by Objective #4 activities include PSEs such as:
- Healthy Food and Beverage Standards at Food Distribution Sites
- Food Security/Food Access
- Healthy Retail/Recognition

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, San Joaquin County LIAs will promote Food Security/Food Access by engaging **8 new partners** in meetings and/or activities of local food security/food access collaborative groups such as the Obesity and Chronic Disease Prevention Task Force, the Healthy San Joaquin Collaborative, the Hunger Task Force for San Joaquin County, and Food Access Workgroup.
    b. By September 30, 2017, San Joaquin County LIAs will increase access to and appeal of healthy fruits, vegetables, and beverages in SNAP-Ed qualifying neighborhoods by providing technical assistance to at least 5 community sites (**2 retail sites**, **2 community centers and 1 church)** through adopted and implemented policy and/or physical site changes.
2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, San Joaquin County LIAs will promote Food Security/Food Access by engaging **10 new partners** in meetings and/or activities of local food security/food access collaborative groups such as the Obesity and Chronic Disease Prevention Task Force, the Healthy San Joaquin Collaborative, the Hunger Task Force for San Joaquin County, and Food Access Workgroup.

b. By September 30, 2018, San Joaquin County LIAs will increase access to and appeal of healthy fruits, vegetables, and beverages in SNAP-Ed qualifying neighborhoods by providing technical assistance to at least **4 retail sites** (2 new) and **1 church partner (same partner as year one)** through adopted and implemented policy and/or physical site changes.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, San Joaquin County LIAs will promote Food Security/Food Access by engaging **12 new partners** in meetings and/or activities of local food security/food access collaborative groups such as the Obesity and Chronic Disease Prevention Task Force, the Healthy San Joaquin Collaborative, the Hunger Task Force for San Joaquin County, and Food Access Workgroup.
   b. By September 30, 2019, San Joaquin County LIAs will increase access to and appeal of healthy fruits, vegetables, and beverages in SNAP-Ed qualifying neighborhoods by providing technical assistance to at least **6 retail sites** (2 new) and **1 church partner (same partner as year one)**through adopted and implemented policy and/or physical site changes.

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):
By September 30, 2019, San Joaquin County LIAs will collaborate with SNAP-Ed funded and non-SNAP-Ed funded partners to adopt and/or implement healthy food access/food security PSE changes and activities at 9 sites serving SNAP-Ed eligible youth and adults in community and retail settings.

FFY 2018 SNAP-Ed Budget

Organization Name:	Catholic Charities of California
County/Jurisdiction:	Stanislaus County and San Joaquin County
FFY 2018 Total Budget:	**$140,000.00**
Budget Adjustment Request #:	

	Expenses*	FFY 2017 Carry-In Budget****	FFY 2017 Budget	FFY 2018 Budget	% Difference
1	Salaries/Benefits	$14,661	$101,728	$99,809	-1.89%
2	Non-Capital Equipment/Supplies	$0	$1,904	$1,809	-4.99%
3	Materials	$0	$4,290	$2,900	-32.40%
4	Travel	$0	$3,549	$3,919	10.43%
5	Building/Space	$0	$4,329	$7,560	74.64%
6	Maintenance	$0	$5,339	$5,066	-5.11%
7	Equipment and Other Capital Expenditures	$0	$0	$0	
8	Contracts/Sub-Grants/ Agreements**	$95	$600	$676	12.67%
	Total Direct Costs:	**$14,756**	**$121,739**	**$121,739**	0.00%
9	Indirect Costs*** Indirect Cost Rate= 15 %	$0	$18,261	$18,261	0.00%
	Total Federal Funds	**$14,756**	**$140,000**	**$140,000**	0.00%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	
2	Non-Capital Equipment/Supplies	
3	Materials	Materials budgeted in 2017 were purchased and will not need to be replaced in FY2018. 2018 budget includes only new items or those that need be replenished that will be needed to carry out services.
4	Travel	Slight increase includes additional trips in San Joaquin County to cover addition of new locations.
5	Building/Space	Increase due to rate increase in both counties as well as added storage space. Storage space is used to store all program materials, which no longer fit in program staff work space.
6	Maintenance	Slight decrease in IT/HR support and insurance costs from that of the prior year.
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	Increase due to annual audit cost, which is expected to increase annually
9	Indirect Costs	

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Gardening and Garden-Enhanced Education	The potential reach is 5000 students in up to 25 schools. Items include, but not limited to, posters, gardening curriculum, and supplies for Farm to Fork for up to 25 schools. Gardening tools, including but not limited to rakes, shovels, and wheelbarrows; soil, seeds, plants, garden boxes or materials to build garden boxes at all participating school sites. Garden protection materials to construct structures that are approximately 8 feet high and 10x10 square feet, as well as hoop houses, to protect the garden beds from weather and other hazards, similar to what was experienced this past year in the county with heavy rains and strong winds and a rodent/gopher infestation. These particular structures were originally approved for FFY17 as inexpensive coverings that were priced at $98 per unit, using materials similar to hoop houses. The purpose of these items are to protect the garden beds during the winter months; they are not intended as permanent fixed structures. They are similar to hoop houses because they are lightweight, potable, and use similar materials, but they are rectangular in shape as opposed to cylindrical. Cost per school is dependent on the available space and types of gardens established, and costs are relative to the size of the garden produced. As advised by UCCE Master Gardner Program staff, total cost per school should not exceed $1500 for up to 2 large in-ground plots. This line item includes the costs of all gardening materials and supplies.	$5,000.00	1	$5,000	
							Total Materials:	$5,000

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

"Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries. The projected FY17/18 composite benefit rate is .4264 for group A, and .6438 for group C; The FY 18/19 composite benefit rates are .4477 for Group A and .6759 for group C. The average rate listed on the budget is for calculation purposes only and is an estimate of the combined rates."

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Luis Obispo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

County Name: San Luis Obispo County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names: San Luis Obispo County Public Health, UC CalFresh Nutrition Education Program**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	**University of California: UC CalFresh UCCE: UC CalFresh Nutrition Education Program in San Luis Obispo & Santa Barbara Counties**
X	**California Department of Public Health: CDPH: San Luis Obispo County Public Health**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

San Luis Obispo (SLO) County is a coastal, rural region with a population of approximately 279,000 (2014 Census). The county includes 7 incorporated cities and 20 unincorporated areas. According to the 2015 SNAP-Ed County Profile from the California Department of Public Health, overall 29.1% of the population is SNAP-Ed eligible and over 20% of children face food insecurity. Approximately 32% of low-income (<185% FPL) county residents are Hispanic and 60% are white, non-Hispanic. According to 2014 US Census Data, approximately 18 percent of the county population is under 18 years old and 17.5% are 65 and over. According to a report conducted by the SLO County Food Systems Coalition, there are 44,000 county residents who struggle with hunger. Of those residents, 40% are children and 20% are seniors. The two primary languages spoken in SLO County are English and Spanish.

Poverty is not concentrated in one area of SLO County. There are 53 census tracts in the county and only four of them (7.6%) qualify for SNAP-Ed services based on American Community Services data for all races (2010-2014). All of the four qualifying census tracts are questionable as to whether they actually represent SNAP-Ed eligible service areas. Three are centrally located in the city of San Luis Obispo near the public university where there is a high concentration of unemployed students and one is surrounding the state hospital. However, pockets of poverty exist throughout the county and do not always show up in larger data sets. For example, of the 86 schools in SLO County, 35 (40.7%) qualify for SNAP-Ed services because greater than 50% of the students qualify for the free or reduced meal program. Further, 15% of children in the county live in poverty and 23% of low-income households are food insecure (California Food Policy Advocates (CFPA)). Exacerbating the problem of food insecurity is the relatively low Cal-Fresh participation rates. According to the Nutrition and Food Insecurity Profile (CFPA), SLO County ranks 51 of 58 counties on the Cal-Fresh Program Access Index meaning that 50 counties have higher Cal-Fresh participation rates based on an estimate of eligible population.

The USDA Economic Research Service Food Access measures provide an overview of food access indicators for supermarket accessibility. The Food Access Research Atlas shows the city of Atascadero as low income and low food access at 1 and 10 miles; the City of Paso Robles, Oceano and a part of San Luis Obispo City as low income and low food access at ½ and 10 miles; and most of the northern region of San Luis Obispo County, including Templeton and San Miguel, part of the City of San Luis Obispo and Grover Beach are measured with low vehicle access to food. There are 19 weekly Farmer's Markets spread throughout the county and five of them currently accept EBT. In addition, the Food Bank Coalition distributes over 6 million pounds of food each year through community and agency partners at over 100 sites countywide. The Food Bank has a strong nutrition policy governing what can be purchased with Food Bank funds and distributed to clients. In 2014 49% of food distributed was fresh produce and they continue to expand on their GleanSLO program that saves hundreds of thousands of pounds of produce from being wasted in the county.

In SLO County, more than half (55.2%) of adults are overweight or obese, almost 10% of young children 2-11 years old are overweight and 16.7% of adolescents are overweight or obese. According to the 2014-15 Physical Fitness Test Report for San Luis Obispo County 36.1% of 5th, 32.8% of 7th and 28.2% of 9th graders are in the Needs Improvement or Needs Improvement / Health Risk category for body composition compared to 40.3%, 38.5% and 36% respectively for California. In addition, a 2012 study (Jankovitz, et. al.) found that 34.8% of preschool children in SLO County were overweight or obese.

San Luis Obispo County ranks 9th out of 57 rated counties on the Robert Wood Johnson Foundation County Health Rankings for 2015. The county is 5th for health behaviors and 4th for quality of life overall. While data show that many SLO County residents live in an ideal setting for health, according to the SNAP-Ed Profile, 14% of adults report no leisure time physical activity and only 15.7% of teens report being physically active for at least one-hour every day. According to California Health Interview Survey Child and Teen 2011-2012 Health Profiles, data released in October 2013 showed a 25% improvement in the number of children eating 5 or more fruits and vegetables per day from the 2009 data. There was a slight decline in the number of youth eating fast food by 8%. However, while most of the counties across the state saw declines in the percentage of youth drinking one or more sugar-sweetened beverages per day from 2009 to 2011-12, San Luis Obispo County saw a 25% increase. The number of overweight or obese youth, ages 12-17, increased by 7%.

In the county there are several other nutrition education and physical activity related programs serving low-income residents including: the Women Infants & Children (WIC) program, County Department of Social Services (DSS) Cal-Fresh, UC 4-H Youth Development Program, Food Bank Coalition of SLO County (food distribution, afterschool meals, breakfast pilot program, nutrition educator), National School Lunch Program, the Area Agency on Aging and the Senior Nutrition Program which serve the older adult population, and Dignity Health Community Education. In addition, there are several community-based coalitions, organizations and groups that work on nutrition, physical activity and food security issues including: Department of Social Services Outreach work group, The SLO County Bike Coalition, and the SLO County Regional Rideshare and Safe Routes to School program.

4. **Community Assessment**

The Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) mapping reassessment will be completed in spring of FFY16. The data from this survey process will be used to determine the need for intervention strategies aimed at walkability and improving access to healthy foods and beverages in eligible communities, with focus on where people shop for food. As the FFY16 CX3 survey is not completed at this time, this work plan is informed by the FFY13 CX3 mapping assessments, which identified three low-income communities; Paso Robles, San Miguel and Oceano. CX 3 surveys focused on markets and fast food establishments in these areas. Through this mapping process and feedback from nutrition education intervention participants, this work plan has identified nutrition and physical activity education activities prioritized for these three communities.

There has been outreach to the Area Agency for Agency (AAA) to become involved in CNAP and to collaborate on assessing the needs of the seniors in the county. The AAA considered a SNAP-Ed grant in previous funding cycles, however, they determined that there were too few senior sites that qualified for services and the administrative requirements of SNAP-Ed funding was prohibitive. CNAP partners continue to invite senior stakeholders to the table, however, so far these offers have been turned down and the response was that the seniors benefit from a large number of resources and they did not see the direct connection between the work of CNAP and their organization. Food Bank Coalition of San Luis Obispo County, does provide nutrition education at their food distribution sites, which includes senior centers and senior living facilities. The seniors appreciate access to healthy foods through the distribution sites and CNAP partners will work to continue to reach out to AAA and other senior stakeholders to include them in SNAP-Ed planning wherever possible.

Further, because there are few eligible census tracts in SLO County, much of the work in this plan is focused on eligible school sites and food bank distribution sites as hubs for conducting comprehensive nutrition education and physical activity related interventions that can reach the broader community. Both the LHD and UCCE implementing agencies have a history of conducting successful interventions in the school and community settings and they will use participant feedback to continually inform program planning and scaling.

Ongoing nutrition education evaluation data as well as work with community members and partners informed the scope and priorities of this three-year work plan. In FFY 2016, UC CalFresh partnered with the San Luis Obispo County Office of Education and the Farm to School work group to conduct a countywide needs assessment of environmental literacy, including access to and need for school gardens, nutrition education, and farm to school strategies. The results from that report are still pending; however, we will use the assessment data to prioritize school garden and garden enhanced nutrition education efforts outlined in this work plan. In addition, meetings with school principals and parents in San Luis Obispo county have informed the development of the UC School Garden Sustainability project, which focuses on enhancing community capacity to develop, support and sustain school gardens at SNAP-Ed qualifying schools, as part of overall food system literacy, awareness and improvement in healthy eating and physical activity.

In FFY15, the County Nutrition Action Plan (CNAP) work group developed the CNAP Assessment Spreadsheet to identify underserved areas in SLO County and partner agency expertise with the purpose of using our scarce resources more effectively. This was utilized by the HEAL SLO committee membership at the beginning of 2016 and results are pending at this time. Our CNAP partners have identified Atascadero as an underserved community and Paso Robles, Oceano, and San Miguel as communities where coordinated efforts could be effectively leveraged to make a broader impact. The CNAP collaborative has informed the development of several coordinated and collaborative intervention activities such as development of a volunteer educator extender program, coordinated work and community events in high priority areas, and expansion of interventions where possible into the underserved areas of the county. Further, because local statistics show that residents are not fully participating in CalFresh and other food programs within the county, through CNAP we will continue to partner with CalFresh outreach workers to attend nutrition education events and provide consumer information about availability of food programs within the county, and work with Department of Social Services (DSS) to disseminate information.

5. **Community Change Goals**

The long-term community change goal of the Local Implementing Agency (LIA) partners in SLO County is to work collaboratively to reduce the prevalence of obesity and onset of related chronic disease among the SNAP-Ed eligible population in SLO County. LIA partners will achieve this through providing education and support for policy, systems and environmental changes, especially through qualifying schools, supplemental food program sites, and retail grocery and convenience stores to increase consumption of healthy foods and beverages, reduce consumption of less healthy foods and beverages, increase physical activity and improve food resource management skills.

Working with CNAP partners, community participants, and building off the work of broader nutrition and food security coalitions, the areas of highest need in the community were identified. Consistent with the goals of the larger community partnership Healthy Eating Active Living SLO (HEAL-SLO) and the nutrition-related goals established by the local Food Systems Coalition, the following two objectives were identified as priorities for SNAP-Ed funded partners:

1. By September 30, 2019, 10 low-income pre-K-12 schools will make changes to school policies, physical environment, and systems to support improved nutrition and physical activity behaviors among students, parents, and teachers.
2. By September 30, 2019, will increase access to and demand for healthy foods and beverages at 5 qualifying sites where SNAP-Ed eligible people shop, such as farmers markets, food banks, retail grocery and convenience stores through education and implemented physical site changes.

LIAs will focus on qualifying schools sites, food bank distributions and qualifying retail sites to provide comprehensive nutrition education and obesity prevention services. LIAs will expand reach and efficacy of programming through focusing on Policy, Systems and Environmental changes at these sites that are sustainable and support nutrition and physical activity education strategies. The primary PSE activities in schools include: Smarter Lunchroom Movement interventions, School Wellness policy technical assistance and promotion, Maintenance and enhancement of school gardens, Training of community members and volunteers on garden enhanced nutrition education. Other PSE activities will include: Retail interventions and Farmer's Market EBT acceptance.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

There are two active coalitions working on SNAP-Ed related projects in San Luis Obispo County: Healthy Eating Active Living SLO (HEAL-SLO) and the SLO County Food Systems Coalition (FSC). HEAL-SLO is a community coalition convened quarterly by the LHD with partner agencies working together to create healthy environments that help individuals and families make healthy choices where they live, learn, work and play. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, Community Action Partnership, WIC, Cal Poly STRIDE, Dairy Council, YMCA, Bike Coalition, Food Bank, One Cool Earth, First 5, Dignity Health, CAPSLO and various other concerned individuals, agencies and organizations. The FSC is a community group that meets quarterly and works to create a sustainable food system that is equitable, profitable, resilient, and health-promoting. UC CalFresh convenes the Farm to School work group of the FSC. The mission of the work group is to bring together a diverse set of stakeholders to strategically promote and support farm to school activity, through school gardens, procurement, and agriculture and nutrition education integrated into academic standards.

There are many other partners that do not attend coalition meetings but are crucial to the reach and efficacy of the integrated work plan. Both UCCE and LHD coordinate and partner with district food services of qualifying school sites, school administrators, teachers, students and parents to create synergy in messaging and to maximize nutrition education reach and PSE strategies. In addition, LHD works closely with the recently developed Latino Health Coalition to provide nutrition education services at events reaching the low-income Latino populations. Lastly, UC CalFresh partners extensively with the UCCE Master Gardener and Master Food Preserver programs and the UC 4-H Youth Development program, utilizing their experience and expertise in their subject matter to increase the efficiency, quality and reach of services provided to SNAP-Ed eligible communities.

7. **Key Messages**

X	Food Safety	X	Physical Activity	x	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		
X	Lean Meat & Beans				
	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

LIAs will use curricula, materials and resources from the approved USDA SNAP-Ed Connection website, and/or **FFY 2017-19** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California SNAP-Ed Integrated Curricula list. All curricula and materials will be appropriate for the target audience.

UCCE and LHD will use grade and age-level appropriate and USDA approved curricula for school-based nutrition education and garden enhanced nutrition education (see curriculum and materials list). UCCE uses an educator extender model, wherein classroom or afterschool educators are trained to deliver nutrition education curricula. UCCE/LHD staff support curricula implementation through quarterly classroom visits that include delivery of lesson materials, classroom food demonstrations, and modeling of food safety and nutrition concepts through lesson delivery. In addition, materials from Smarter Lunchrooms Movement, CATCH and Harvest of the Month will be used to implement school wide interventions, trainings and food tastings. The UCCE garden nutrition extender trainings will provide support for implementing garden based curricula including: Eating Healthy from Farm to Fork, USDA's DigIn!, Teams with Intergenerational Support (TWIGS), and the Learn, Grow, Eat, Go program depending on age-level and setting for extender implementation.

9. **Intervention and Evaluation Plan Narrative Summary**

The three-year SNAP-Ed objectives described above in Section 5 Community Change Goals were developed based on the unique needs of low-income residents in San Luis Obispo County. As detailed in the Jurisdiction Description and Community Assessment, while there are few qualifying census tracts, close to half of SLO County schools qualify for SNAP-Ed services. In addition, Cal-Fresh participation rates are low compared to other counties in California. Based on this assessment data, the local interventions detailed in this plan primarily focus on eligible schools and food bank distribution sites within communities where a high percentage of potentially eligible SNAP-Ed population live, learn, work and play.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Luis Obispo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

UCCE will provide comprehensive nutrition education and obesity prevention services through engaging youth and communities in low-income settings throughout all phases of program implementation. UCCE plans to develop collaboration with the UC 4-H program in San Luis Obispo County with the goal of engaging more youth in assessing, prioritizing and implementing healthy site changes. In addition, UCCE will continuously engage school garden stakeholders and community members from low-income schools in the development and implementation of garden enhanced nutrition education services and support.

The LHD will provide comprehensive nutrition education/physical activity promotion and obesity prevention services, at SNAP-Ed eligible sites, reaching a portion of the SNAP-Ed eligible population through engaging youth, retail and communities in low-income settings throughout all phases of program implementation. These services will be assisted by a subcontractor and extenders who will support these efforts. The LHD plans to provide direct and indirect education focused on nutrition education and physical activity, staff training with education providers, food service providers, and other staff in multiple settings. Garden-based education will continue to be provided in low-income schools in the Paso Robles Unified School District, as well as Dana School special needs class. This process will build upon relationships with elementary schools already in existence in the county to continue indirect and direct education on nutrition education and physical activity.

The LIAs will train and support teachers as extenders who will then provide education in classrooms and in after school programs. Nutrition education that focuses on shopping behaviors and choices to improve health, such as indicated in MyPlate and Dietary Guidelines, and will also be provided to SNAP-Ed eligible adults and seniors. Training will include label reading, menu planning, food budgeting, healthy food and beverage selection, MyPlate recommendations to provide exposure and encourage acceptance of healthy foods.

Comprehensive Evidence based School-based interventions:

LIAs will coordinate school-based nutrition education efforts through HEAL-SLO and FSC to ensure the broadest and most efficient use of resources in support of State Level Goals 1-3.

UCCE

UCCE will work to build relationships and support for comprehensive nutrition education programming at identified school sites. Comprehensive programming will include interventions at several levels of the Social Ecological Model. These interventions include providing direct nutrition education services in the garden, classroom and afterschool program to students and their families (Individual & Interpersonal). UCCE will also work to develop a student nutrition club in collaboration with the 4-H program that supports school wellness, school garden sustainability and Smarter Lunchroom interventions; and provide training and technical support for educator extenders and school food service staff at the school site on delivering USDA approved nutrition and garden curricula and/or implementing Smarter Lunchroom Movement interventions (Environmental Supports, Sectors of Influence).

In addition to comprehensive school site level interventions, a major focus for UCCE over the course of this 3-year work plan will be to develop support for broader school wellness initiatives and school gardens.

LHD

The LHD plans to provide direct and indirect education focused on nutrition education and physical activity, staff training with education providers, food service providers, and other staff in multiple settings. This process will build upon current relationships with elementary schools and after school programs in the county to continue indirect and direct education on nutrition education and physical activity. Indirect nutrition and physical activity materials and information will be provided at Walk to School Day, Children's Day in the Plaza, and various health fairs at approved locations. The LIA will train and support teachers as extenders who will then provide education in classrooms and in after school programs. Nutrition education that focuses on shopping behaviors and choices to improve health, such as indicated in MyPlate and Dietary Guidelines, will also be provided to SNAP-Ed eligible parents of the children receiving comprehensive school-based interventions. Training will include label reading, menu planning, food budgeting, healthy food and beverage selection, and MyPlate recommendations to provide exposure and encourage acceptance of healthy foods.

Policy, Systems and Environmental Interventions:

The intervention plan includes policy, systems and environmental (PSE) work at multiple levels of the Social Ecological Model (SEM) that includes implementing school wellness policies that foster access to healthy foods, beverages and physical activity. Healthy nutrition and physical activity policies will be implemented in elementary school settings and may include standards for all foods and beverages offered on site, physical activity opportunities, quality nutrition education, garden-based and physical education, and marketing guidelines for materials in support of State Level Goals 4 and 5. These materials will then be shared on the school sites. Smarter Lunchrooms Movement (SLM) principles and retail store environments will focus on product placement strategies, healthy check-out lines, healthy grab and go, healthy items in store locations with removal of child oriented advertising and less healthy foods and beverages at eye level with children. Collaboration between the LHD and community partners will look to implement farmer's market booths at bus stops near low income housing. Community partners will be educated on Smarter Lunchrooms Movement (SLM) principles that improve the lunchrooms at schools.

School Wellness:

UCCE will work on school wellness policy promotion and implementation in the San Luis Coastal and Atascadero Unified School Districts. In addition UCCE will work with partners to begin to build support for school wellness in the Lucia Mar school district in the south county. The LHD will work in the Cambria Union, San Luis Coastal Unified, Paso Robles Unified Elementary School District and San Miguel Joint Union Elementary School District, focusing on schools that qualify for SNAP-Ed services in those districts. School wellness work will include participating on school wellness committees, disseminating information to eligible schools regarding wellness policy goals, monitoring and supporting site level implementation, training staff in Smarter Lunchroom Movement strategies and/or working to advocate for establishing school wellness committees where one currently does not exist.

School Gardens:

UCCE will focus on establishing, reinvigorating and/or maintaining school gardens in low-income schools through a School Garden Sustainability Project. The School Garden Sustainability Project will work with site-level staff and volunteers at eligible schools to install new gardens, revamp abandoned and/or untended school gardens, train extenders in garden enhanced nutrition education and create a UC volunteer program to train educator extenders. UCCE volunteer extenders will be trained to work throughout the county to provide extensive technical assistance to school garden committees on teaching nutrition in the garden, working with food service to use food from the school garden in the meal program, implementing food demonstrations from the garden and creating plans for sustaining school garden programs. The LHD will provide technical support and assist in reinvigorating and/or maintaining established school gardens in low-income schools in the Lucia Mar and Paso Robles Union Elementary School Districts.

Progression:

Over the course of the three year work plan, LIAs intend to demonstrate increased efficacy and efficiency in program implementation. For UCCE, progression will be demonstrated through 1) an increase in the number of trained educator extenders supporting school gardens in low-income schools, 2) an increase in awareness and implementation of school wellness policies in each school district, and 3) an increase in school staff, afterschool staff, extenders and student leader participation in comprehensive nutrition education strategies at school sites. For the LHD, progression will include assessment, planning, development, implementation and reassessment of outcomes and will be demonstrated through program policy implementation, environmental and system changes related to nutrition, healthy food access and physical activity.

Healthy Retail Settings:

The LHD will increase access of and demand for healthy foods and beverages by qualifying sites where SNAP-Ed eligible people shop, such as farmers markets, food banks, retail grocery and convenience stores through education and implemented physical site changes.

Nutrition education lessons and materials that focus on shopping behaviors and choices to improve health, such indicated in MyPlate and Dietary Guidelines, will also be provided to SNAP-Ed eligible adults and seniors at SNAP-Ed approved food bank distribution, retail and community sites. Healthy food and beverage materials will be provided at community events such as at quarterly Latino Health events. Training will include label reading, menu planning, food budgeting, healthy food and beverage selection, MyPlate recommendations to provide exposure and encourage acceptance of healthy foods. The LHD will provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy foods and beverages and provide support and technical assistance in retail stores and food bank distribution sites.

The LHD will demonstrate progression over the course of the three year work plan by building relationships, engaging retail partners, identifying intervention options to increase knowledge of and demand for healthy foods and beverages, as well as implementation of these interventions.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Luis Obispo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

Evaluation Plan Summary

The LIAs will conduct evaluation at multiple levels of the Social Ecological Model in order to 1) ensure continuous program improvement and 2) CX3 in FFY19 will provide a monitor of progress toward the long term community change goal of decreasing the prevalence of obesity and onset of related chronic disease among the SNAP-Ed eligible population in SLO County. Consistent with the SNAP-Ed Evaluation Framework (the Framework), evaluations will be conducted each year related to changes at the individual, environmental and sectors of influence levels. In addition, both LIAs will conduct ongoing process evaluation documenting activities implemented, sites, number and demographics of participants reached.

Individual level - Framework question: *To what extent does SNAP-Ed programming improve participants' diet, physical activity, and health?*

The LIAs will assess individual knowledge, attitudes, skills (Short Term indicators) and behaviors (medium and long-term indicators) related to nutrition and physical activity. Assessment tools will include:

- Pre and post assessments of class participants to measure behavior changes related to nutrition, food resource management and food security
- Teacher Observation Tool to assess the teacher's perception of students behavior change and their own classroom practices (UCCE)
- Teacher Tasting Tool to assess student's exposure to various foods and willingness to try or ask for again (UCCE)
- Participant satisfaction & evaluation tools to assess participants' readiness to deliver nutrition and garden education to low-income clients and to improve on program delivery on an ongoing basis.
- SNAP-Ed Activity Tracking Form (ATF) and Education and Administration Reporting System (EARS) results will be generated quarterly by the RTW and the Semi-Annual Activity Report will be submitted as directed. (LHD)

Environmental level - Framework question: *To what extent does SNAP-Ed programming facilitate access and create appeal for improved dietary and physical activity choices in the settings where nutrition education is provided?*

LIAs will assess environmental changes including the number and types of places where there has been a change in access to or enhanced appeal for nutritious food or physical activity. Assessment will include:

- Smarter Lunchroom Movement Self-Assessment Scorecard (ST4) at pre and post intervention,
- UCCE will document the number and type of local champions and volunteer extenders willing to promote increased access to school gardens and/or physical activity (ST5),
- the number of SNAP-Ed eligible schools and number of changes made at each of these schools in writing or practice to improve access or appeal for healthy foods, beverages or physical activity including creation or reinvigoration of school gardens (MT4,5)

- The LHD will also annually report on all PSE projects utilizing the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance.
- UCCE will continue to monitor the efficacy of the School Garden Sustainability project through conducting annual evaluation using the RE-AIM framework.

Sectors of influence level - Framework question: *To what extent is the SNAP-Ed grant program integrated into comprehensive strategies that collectively impact lifelong healthy eating and active living in low-income communities?*

UCCE will track impact at this level through documenting the number of individuals in school and afterschool settings that are trained in approaches that promote healthy foods, beverages or physical activity. Documentation will include:

- Number of teachers, afterschool staff and other educator extenders trained and implementing nutrition and physical activity education
- Number of food service directors and site staff trained to improve lunchroom environments
- Number of students engaged in projects to assess, identify and advocate for healthy site changes through youth engagement projects

The LHD will track the number of collaborating agency, schools and retail site policy and procedure changes were developed that promote healthy foods, beverages or physical activity. Documentation will include:

- Tracking the number of collaborating agencies with policy changes that promote healthy foods, beverages or physical activity
- Program policy changes will be tracked on the CNAP Assessment form
- Healthy Retail interventions will be assessed pre and post Healthy Retail intervention using UC CalFresh Workbook, Food Behavior Checklist and/or UC Intent to Change.

Overall Progress

Overall progress toward meeting work plan goals and objectives will be assessed annually through the UCCE's Annual Report and the LHD Annual Review and Success Stories.

San Luis Obispo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	45		0 to 4 years old (Preschool):	168
Female	55		5 to 17 years old (School Age):	13,170
			18 to 59 years old (Adult):	2,363
			60 years old and over (Senior):	752
Total:	100			16,453

3. Ethnicity/Race

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, 22 low-income pre-K-12 schools will make changes to school policies, physical environment, and/or systems to support improved nutrition and physical activity behaviors among students, parents, and teachers.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

School Environment Changes:

- Physical Activity
  - Murals/Stencils
  - Safe Routes to School
- Healthy Eating
  - Smarter Lunchrooms Movement (SLM)
  - Edible Gardens
  - Farm to School
- School Wellness Policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, UC CalFresh will have trained 10 Garden Enhanced Nutrition Education Extenders to provide evidence-based curricula, sustainability planning and hands-on support for gardens at a minimum of 3 low-income schools.
   b. By September 30, 2017, LIA educators and/or extenders will reach 1400 students with direct education at 8 SNAP-Ed eligible K-12 school sites and 10 after school sites; 60 parents with direct education, and 2900 students and parents with indirect education; and will provide nutrition education and physical activity training and TA for educators at the 8 eligible K-12 school and 10 ECE sites.
   c. By September 30, 2017, will work with partners including school wellness committees in 4 school districts to review School Wellness Policies.
   d. By September 30, 2017, the LIA will provide training, technical assistance and support to educator extenders and teachers to increase participation in physical activity opportunities by informing SNAP-Ed eligible sites, including 2 Early Childhood Education centers (ECE).
   e. By September 30, 2017, the LIA will increase participation in physical activity opportunities in 3 K-5 schools and 1 youth parks & recreation sites with information of playground mural; and/or stencil availability.
   f. By September 30, 207, the LIA will increase physical activity participation opportunities by assessing safe routes to school walkability in 4 eligible neighborhoods.
   g. By September 30, 2017, the LIA will increase physical activity opportunities by providing training to High School and Community Partner Extenders in the CATCH physical activity program, reaching a minimum of 50 K-6th youth in year 1.
   h. By September 30, 2017, the LIAs will provide training and support to reinvigorate or maintain existing school gardens in at least 2 school sites, reaching at least 1200 students.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, UC CalFresh will have graduated at least 10 additional Garden Enhanced Nutrition Education Extenders providing evidence-based curricula, sustainability planning and hands-on support for gardens at a minimum of 2 additional low-income schools.
   b. By September 30, 2018, LIA educators and/or extenders will reach an additional 200 for a total of 1600 students at an additional 2 SNAP-Ed eligible K-12 school sites with direct education; 50 additional parents with direct education, and reach an additional 300, for a total of 3200, K-12 students and parents with indirect education; and will provide nutrition education and physical activity training and TA for Pre-K-12 educators at 2 additional eligible K-12 schools for a total of 10 and all 10 after school sites.

c. By September 30, 2018, the LIAs will work with partners including school wellness committees in 4 school districts to identify priorities related to School Wellness Policies.
d. By September 30, 2018, the LIAs will provide training, technical assistance and support to educator extenders and teachers to increase participation in physical activity opportunities by providing information to SNAP-Ed eligible partners of the availability of stencil and/or murals and supporting implementation in 3 ECE, 5 schools and 2 youth parks & recreation sites.
e. By September 30, 2018, the LIA will increase participation in physical activity opportunities by planning and working on safe routes to school in 4 eligible neighborhoods.
f. By September 30, 2018, UC CalFresh will increase in physical activity opportunities by providing training to High School and Community Partner Extenders in the CATCH physical activity program, reaching a minimum of 100 K-6th youth in year 2.
g. By September 30, 2018, the LIA will provide training and support to reinvigorate or maintain existing school gardens in at least 3 school sites, reaching at least an additional 200 students for a total reach of 1400 students.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, UC CalFresh will have graduated at least 10 additional Garden Enhanced Nutrition Education Extenders providing evidence-based curricula, sustainability planning and hands-on support for gardens at a minimum of 8 low-income schools.
b. By September 30, 2019, LIA educators and/or extenders will reach an additional 200 for a total reach of 1800 K-12 students with direct education, 50 additional parents with direct education and an additional 300 for a total reach of 3500 students and parents with indirect education; and will provide nutrition education and physical activity training and TA for educators at the 2 additional eligible Pre-K-12 school and all 10 after school sites.
c. By September 30, 2019, LIA staff will work with partners including school wellness committees in 4 school districts to support implementation of School Wellness Policies and making at least one new healthy site change per site to improve the nutrition, physical activity reaching 9,211 students in SNAP-Ed qualifying schools.
d. By September 30, 2019, the LIA will continue to provide training and support to maintain existing school gardens in 3 eligible school sites, that reach at least 1400 students as needed for school champion and staffing turnover and sustainability.
e. By September 30, 2019, the LIA will provide training, technical assistance and support to educator extenders and teachers to increase participation in physical activity opportunities by providing information and supporting implementation of playground stencils and/or murals at SNAP-Ed eligible sites, including 5 ECE, 10 schools and 4 youth parks & recreation sites.
f. By September 30, 2019, the LIA will support implementation of safe routes to school walkability in 4 eligible neighborhoods.
g. By September 30, 2019, UC CalFresh will provide training to High School and Community Partner Extenders in the CATCH physical activity program, reaching a minimum of 100 K-6th youth in year 3.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Luis Obispo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, 10 low-income pre-K-12 schools will make changes to school policies, physical environment, and/or systems to support improved nutrition and physical activity behaviors among students, parents, and teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Annually, provide ongoing training, continuing education credit, support and technical assistance for the UC CalFresh Garden Enhanced Nutrition Education Extenders to work in school gardens in low-income settings around the county. The number and reach of the educator extenders will grow annually as more extenders complete the training program to reach a minimum of three low-income school gardens in year 1, five school gardens in year 2, and eight school gardens by year 3.	x CED CEI MPR x C&C x TTA	CWD LHD AAA x UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4	Training agendas Sign-in sheets Nutrition Activity Reporting Forms (NARFs)
1.2	Quarterly, convene the Farm to School work group of the Food Systems Coalition to build on partnering agency capacity and expertise in support of farm to school efforts (year 1) plan for and host the Growing Edible Education symposium for the Central Coast region (year 2) and implement countywide assessment and monitoring of farm to school efforts (years 1-3). SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2(FFY 2017–FFY 2019):**

By September 30, 2019, will increase access to and demand for healthy foods and beverages at 5 qualifying sites where SNAP-Ed eligible people shop, such as farmers markets, food banks, retail grocery and convenience stores through education and implemented physical site changes.

SNAP-Ed State Goal:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy in-store marketing and promotions
- Healthy food and beverage stocking standards

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, the LHD will conduct an assessment of a minimum of 4 retail stores, in 2 CX3 neighborhoods, for interest and need of retail interventions to increase access to healthy foods and beverages.
    b. By September 30, 2017, the LHD will work collaboratively with 2 qualifying neighborhood retail stores to determine 3 retail intervention options, per store, shown to increase access to and demand for food and beverages opportunities.
    c. By September 30, 2017, the LHD will provide single adult education sessions that provide food resource management education and connects shopping behaviors and choices to better health outcomes per MyPlate and Dietary Guidelines, focusing on healthy foods and beverages, at 6 food bank Distribution sites and 2 SNAP-Ed qualifying community sites, reaching a minimum of 300 adults.
    d. By September 30, 2017, the LHD will provide SNAP-Ed approved healthy food and beverage merchandising and nutrition educational materials, recipes and resources at 13 eligible sites where SNAP-Ed participants can be reached, such as retail sites, public housing facilities, food bank distribution sites, farmers markets and Department of Social Services, reaching 2000 SNAP-Ed eligible participants; conduct quarterly taste testing of healthy foods and beverages in 3 selected retail stores and 10 food bank distribution sites reaching 150 SNAP-Ed eligible participants.

e. By September 30, 2017, the LHD will establish partnerships with at least one agency to investigate a non-SNAP-Ed funded bus stop farmer's market program in low-resource areas with poor access to healthy foods in a qualifying neighborhood including locations near public housing facilities.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, the LHD will provide support, technical assistance and training to 2 qualifying neighborhood retail stores on how to utilize the 3 healthy retail intervention options shown to increase access to and demand for healthy foods and beverages.
   b. By September 30, 2018, the LHD will provide single adult education sessions that provides food resource management education and connects shopping behaviors and choices to better health outcomes per MyPlate and Dietary Guidelines, focusing on healthy foods and beverages, at an additional 6 food bank distribution sites and additional 3 SNAP-Ed community qualifying sites reaching a minimum of 300 additional adults.
   c. By September 30, 2018, the LHD will provide SNAP-Ed approved healthy food and beverage merchandising and nutrition educational materials, recipes and resources at an additional 13 sites where SNAP-Ed eligible participants can be reached, such as retail sites, public housing facilities, food bank distribution sites, farmers markets and Department of Social Services, reaching an additional 2000 SNAP-Ed eligible participants; conduct quarterly taste testing of healthy foods and beverages in 2 selected retail stores and 10 food bank distribution sites reaching 150 SNAP-Ed eligible patrons.
   d. By September 30, 2018, the LHD will develop a bus stop farmers market program pilot to increase access of healthy foods in a qualifying neighborhood, such as near a public housing facility.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, the LHD will work with 2 qualified neighborhood retail stores to implement 3 or more of the retail intervention options shown to increase access to and demand for healthy food and beverage.
   b. By September 30, 2019, the LHD will provide SNAP-Ed approved healthy food and beverage merchandising and nutrition education materials, recipes and resources at 13 sites SNAP-Ed eligible participants can be reached, such as retail sites, public housing facilities, food bank distribution sites, farmers markets and Department of Social Services, reaching 2000 SNAP-Ed eligible participants; conduct quarterly taste testing of healthy foods and beverages in 3 selected retail stores and 10 food bank distribution sites reaching 150 or more SNAP-Ed eligible participants.
   c. By September 30, 2019, the LHD will provide single adult education sessions that provides food resource management education and connects shopping behaviors and choices to better health outcomes per MyPlate and Dietary Guidelines, focusing on healthy foods and

beverages, at an additional 6 food bank distribution sites and an additional 3 SNAP-Ed qualifying community sites, reaching a minimum of an additional 300 adults.

d. By September 30, 2019 the LHD will provide approved SNAP-Ed nutrition education materials and resources to 10 community sites where SNAP-Ed eligible participants can be reached such as retail sites, public housing facilities, food bank distribution sites, farmers markets, and Department of Social Service reaching 1000 SNAP-Ed eligible participants.

e. By September 30, 2019, the LHD will conduct post-intervention retail assessments at the 3 retail grocery and/or convenience stores to assess any changes in access to healthy foods and beverages.

f. By September 30, 2019, the LHD will implement at least one non-SNAP-Ed funded bus stop farmers market program in a low-resource area with poor access to healthy foods, reaching at least 150 SNAP-Ed eligible participants.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, will increase access of and demand for healthy foods and beverages by 5 qualifying sites where SNAP-Ed eligible people shop, such as farmers markets, food banks, retail grocery and convenience stores through education and implemented physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Review FFY16 CX3 assessments and summarize findings. Connect with retail partners within the qualifying neighborhoods to determine interest in retail interventions to increase access to healthy foods and beverages. Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Mateo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

County Name: San Mateo

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
x	**University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)**
x	**California Department of Public Health: CDPH: (Local Health Department: LHD) San Mateo Health System**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
x	**Catholic Charities of California: CCC: Catholic Charities of San Francisco, Marin and San Mateo CYO**

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

San Mateo County (SMC) residents are ethnically and linguistically diverse with over 80 languages spoken. As outlined in our county profile (SNAP-Ed county profiles 2015) the county SNAP-Ed eligible population is 25.9% White, 48.3% Hispanic/Latino, 16.3% Asian, and 4.7% Black and 4.8% other. Although the county grew by just 1.6% between 2000 and 2010, the Latino population grew by 18% and now makes up a quarter of the county's residents. The Asian population grew even faster and accounts for another quarter of the population. Latinos have the lowest rates of health care coverage in the county as compared to other racial/ethnic groups. A high percentage of foreign-born residents (34% of the population) live in Daly City and East Palo Alto. These include many low-income immigrants from Mexico, Central and South America.

4. **Community Assessment**

Information used for developing this work plan comes in part from the SNAP-Ed County Profiles prepared by California Department of Health (CDPH) and data from the Department of Finance, U.S Census Bureau, National Low Income Housing Coalition, and California Department of Education. This data was gathered to help identify areas of need and achieve program goals.

According to the Department of Finance, 2014 State and County Population Projections by Race/Ethnicity, the population of San Mateo County is 752,751 as of 2015 and from 2010 to 2060, the population of San Mateo County is expected to increase by 30%. Over the next several decades, the White population is expected to decrease considerably (by 13% between 2010 and 2060), while Hispanic and Pacific Islander populations are expected to increase dramatically (52% and 69% respectively in the same time frame).

More pressing, a total of 18.5% of San Mateo County adults live below the Federal Poverty Level (FPL) of 185%. In addition, California Food Policy Advocates 2015 Food Insecurity Profile for San Mateo County ranked 52 out of 58 counties in the State for participation in the Supplemental Nutrition Assistance Program (SNAP). This correlates to only 46% of income-eligible San Mateo County residents actually receiving SNAP benefits. Characteristics of the SNAP-Ed population in San Mateo County are:

- Number of residents participating in CalFresh as of 2015: 31,180
- Number of income eligible for SNAP benefits as of 2013: 74,106
- Number of income eligible, non-participants as of 2013: 45,092

Residents who live below the federal poverty line have to make their limited food dollars stretch further. Unique to San Mateo County is the rental and housing market. According to the U.S Census Bureau's 2009-2013 American Community Survey, the median rent for a two-bedroom apartment is $2,702, an increase of 46% from 2011. The National Low Income Housing Coalition's 2014 Report indicated that in order to afford a 2-bedroom unit at fair market rate in San Mateo County, a renter would need to earn an hourly wage of $36.76 (equivalent to annual income of $78,240 or 4.7 full-time jobs at minimum wage). In the East Palo Alto neighborhood, 79% of households are housing cost burdened, meaning they pay more than 30% of their income on housing, the highest in the county. With housing and rent costs at these levels, many San Mateo County residents are forced to choose between rent and food.

With those statistics in mind, San Mateo Local Health Department (LHD), University of California Cooperative Extension (UCCE), and Catholic Charities of California (CCC) will be coordinating efforts to reach SNAP-Ed residents through multiple strategies and interventions. Our work plan activities will address food access, nutrition education, and provisions of community resources in order to bring action around food insecurity and improved health outcomes.

We understand that nutrition and garden education will be more impactful when the food environment shifts in their communities to make the nutritious choice the easier choice. There is evidence that what people eat-and their likelihood of being obese-is influenced by the food environment in which they live. This is evident by looking at the Retail Food Environment Index (RFEI). RFEI is derived by dividing the total number of fast-food restaurants and convenience stores by the total number of supermarkets and produce vendors (produce stores and farmers markets) in the area. San Mateo County has an RFEI of 4.5, with almost 5 times as many fast-food restaurants and convenience stores nearby as grocery stores and produce vendors. A sample of RFEI ratios include:

1. In San Mateo, there are 4 times as many unhealthy food outlets for every healthy food outlet.
2. In Daly City, there are 5 times as many unhealthy food outlets for every healthy food outlet.
3. In Redwood City, there are 7 times as many unhealthy food outlets for every healthy outlet. Further, the Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) gives us a clear view of the retail stores conditions as well as accessibility to healthy foods. Of the 19 stores surveyed in Redwood City, 13 scored less than the quality standard. Also important to note, only 5 of the 19 stores accept WIC vouchers.

CX3 and retail efforts were identified based on the Retail Food Environment Index (RFEI) and CX3 assessment data from 2013. Our CX3 reassessment will take place in four census tracts throughout Redwood City, East Palo Alto, and Menlo Park. In these neighborhoods fresh produce is often of poorer quality, which diminishes the appeal of these items to buyers. Therefore, local intervention strategies in the work plan are included to focus on increasing the quality of fruits and vegetables. Additionally, small market and corner stores are typically oversaturated with advertisements of sugar-sweetened beverages. A priority for the LHD will be to reduce the number of advertisements of unhealthy food items in retail stores participating in the CX3 project.

There is great evidence linking healthcare access and nutrition to the development of non-communicable diseases, and the SNAP-Ed eligible population is at great risk. According to the Healthy San Mateo 2010 report, heart disease continues to be a leading cause of death, accounting for one in every four. High blood pressure prevalence among adults living below the 200% FPL threshold is 32.9%. Prevalence for Blacks is at 38.9% compared to Whites at 31.4%. Furthermore, of the San Mateo County's adult population, 30.4% have been diagnosed with high blood cholesterol. Alarmingly, Type 2 Diabetes is increasing among: children and

adolescents, Blacks, Latinos, American Indians, Native Hawaiians and other Pacific Islanders. Clearly, there is a correlation between health status and ethnicity, and those ethnic groups making up the majority of the SNAP-Ed population in this county (2013 Community Assessment: Health and quality of life in San Mateo County). In addition, San Mateo County SNAP-Ed profile indicates that 47% of children and teens ages 2-17 are living with overweight/borderline obesity, and only 29.7% of children (2-11) are physically active at least 1 hour every day.

Healthy Fitness Zone (HFZ) data is an indication of body composition, aerobic condition, strength and flexibility of students participating in statewide Physical Education tests in San Mateo County. In lower income school districts, there is a greater discrepancy in 5th and 7th grade students who meet the body composition and aerobic capacity in comparison to the San Mateo County average.

2014-2015,CDE	San Mateo County		Ravenswood School District		Redwood City School District	
	5th grade % not in healthy fitness zone	7th grade % not in healthy fitness zone	5th grade % not in healthy fitness zone	7th grade % not in healthy fitness zone	5th grade % not in healthy fitness zone	7th grade % not in healthy fitness zone
Aerobic Capacity	24.8%	25.8%	41.4%	54.3%	36.2%	43.3%
Body Composition	35.8%	31.6%	62.8%	61.1%	44.8%	43.8%

As noted on the above table, almost twice as many 5th and 7th grade students in Ravenswood School District and Redwood City School District did not meet the healthy fitness zone for aerobic and body composition in comparison to the San Mateo County average. For this reason, UCCE, and CCC, along with the LHD, will strategize to focus their interventions and nutrition education to incorporate physical activity and healthy eating in these identified school districts. We expect our focus to help improve access to and/or increase appeal of physical activity opportunities.

5. **Community Change Goals**

Get Healthy San Mateo County lead by the County Health System updated their strategic plan in the summer of 2015. Get Healthy San Mateo will focus on the following four priorities:

1. Healthy Housing
2. Healthy Neighborhoods
3. Healthy Schools
4. Healthy Economy.

In reviewing the 4 priorities, our efforts will be placed in Healthy Neighborhoods and Healthy Schools. These priorities are in alignment with State Level Goals to **1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages 2: Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.**

There are many cross sectors with the work in our plan in both these priorities.

1. Healthy Schools: Through the activities in this work plan, we will accomplish this work by supporting robust implementation of School Wellness policies such as Preschool Shaping Healthy Impressions through Nutrition and Exercise (SHINE). These policies foster health and wellness both during and after school. In addition, we will work collaboratively with school districts that serve the SNAP-Ed population to advance wellness and educational attainment. LHD, UCCE, and CCC will cultivate a holistic physical and nutrition based education model amongst the San Mateo County community. It is proven that the sooner a person implements a healthy lifestyle, the more likely they are to carry those habits through adulthood, and the less likely they are to become overweight or obese. Based on the needs identified in the Community Needs Assessment, we will combine our nutrition education activities with physical education to aim to reduce the risk of obesity, Type 2 Diabetes, depression and self-esteem issues, which can impact lifelong health.

2. Healthy Neighborhoods: Where you live influences your health. A well-rounded neighborhood promotes health by creating physical activity opportunities, access to nutritious foods, investment in the local economy, and supports social connections. Neighborhoods with safe parks and space for walking and biking increases physical activity which can strengthen social connections and help prevent chronic disease. Our work plan activities will undertake efforts to help increase physical activity, access to community gardens, and improve the retail environment in qualifying census tracts.

Though there are a percentage of seniors within San Mateo our primary focus is with students and youth. Our activities through retail, community gardens (Friendship Park), indirect education at food pantry sites, and partnerships through our CNAP group work to reach Seniors. In addition, our efforts to implement SHINE (Shaping Healthy Impressions through Nutrition and Exercise), WIC education, and Color Me Healthy curriculum reach the 0-5 target group.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

Our San Mateo County CNAP group includes Food and Nutrition Service (FNS), as well as funded and unfunded partners serving the SNAP-Ed eligible population in the areas of food programs, nutrition education and physical activity promotion. The group goal is to coordinate food program interventions to increase food security in the target population. The strategic plan includes initiatives to identify gaps in food security, water consumption, and consistent nutrition and physical activity messaging across programs. The CNAP group meets bi-monthly. Our CNAP Partners include:

a) San Mateo County Family Health Services/Public Health Nutrition WIC and NEOP Programs. Our NEOP team is the lead partner for the CNAP.
b) San Mateo County Family Health Services/Chronic Disease and Prevention Unit provides tobacco education, physical activity initiatives for the county and supports general nutrition messaging for county wide dissemination beyond our target populations.
c) San Mateo County Human Services Agency (CalFresh) is responsible for CalFresh outreach and enrollment. They also have a separately funded dietitian to assist in their outreach efforts to CalFresh-eligible communities.
d) San Mateo County Aging and Adult Services provide oversight for the Congregate Senior Nutrition Program and Meals on Wheels for San Mateo County.
e) San Mateo County Health Policy and Planning Unit leads the Get Healthy San Mateo initiative. They support policy development in the areas of healthy eating, sustainable communities and school wellness.
f) Institute of Human and Social Development is the lead agency for Head Start. They are an important partner for NEOP, UCCE, and WIC in disseminating nutrition/healthy eating messages to eligible families.
g) First 5 of San Mateo County is the lead agency in the county promoting initiatives targeting young children. It is important that they participate to have a pulse on efforts that impact the population they represent.
h) Second Harvest Food Bank of Santa Clara and San Mateo Counties provide healthy foods and nutrition messaging with their programs. They also provide CalFresh enrollment at many WIC sites.
i) Sequoia Healthcare District provides funding for community initiatives impacting one of our largest target populations in the North Fair Oaks neighborhood of Redwood City. They also fund a couple of Wellness Coordinators for two of our target school districts – Redwood City School and Sequoia School Districts.
j) San Mateo County Department of Agriculture, Weights and Measures has oversight of the county Farm Bureau and promotes the Fresh as It Gets initiative to encourage businesses and institutions to source foods from local farmers and ranchers.

k) UC Cooperative Extension is our NEOP Work Plan partner. Our LHD meets regularly with UCCE to compare work, make sure we do not overlap, and provide support to each other in our NEOP/UC CalFresh/Catholic Charities efforts.

l) Dairy Council of California has great educational resources and brings a wealth of information on what other jurisdictions are working on in the area of healthy eating and nutrition.

m) Catholic Charities is our NEOP Work Plan partner. Our LHD will meet regularly with Catholic Charities to compare work, make sure we do not overlap, and provide support to each other in our NEOP/UC CalFresh/Catholic Charities efforts.

7. **Key Messages**

	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
	Lean Meat & Beans				
	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of San Francisco or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

All three local implementing agencies in San Mateo County, the Local Health Department (LHD), UCCE CalFresh (UCCE) and Catholic Charities of California (CCC) will collaborate to produce needs based interventions across the five categories consisting of:

Goal 1: Food and Beverages (Behavioral)
Goal 2: Physical Activity (Behavioral)
Goal 3: Food Resource Management (Behavioral)
Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

Using measurable strategies to support those efforts, each Local Implementing Agency will identify target sites from the Site Spreadsheet to determine interest, needs, scope, implementation and impact that align with identified strategies which encompass the framework of the Social Ecological Model. The frame work consist of individual factors, environmental settings, sectors of influence, social/cultural norms and values. The following strategies were selected by LHD, UCCE, and CCC to aide in environmental supports: **1.** Direct and indirect education (All LIA) **2.** Structured physical activity (All LIA) **3.** Safe Routes to School (LHD) **4.** Smarter Lunchrooms Movement (SLM)(UCCE) **5.** Edible gardens (All LIA) **6.** Farm to School (LHD/UCCE) **7.** Wellness policies (LHD/UCCE) **8.** Participation in fairs and events (LHD/UCCE**)** **9.** Staff trainings (LHD/UCCE) **10.** Media and the assessment and implementation of CX3 (LHD). While each LIA will conduct direct and indirect education, we have agreed to work synergistically to avoid duplication of services at the same site. Each LIA will implement their area of expertise at a given site and will allow for a different strategy if there is a need from a different LIA.

While we do have overlap in expertise amongst the three LIA's, each entity has established where they will conduct most of their work through coordination. UCCE will train teachers and youth in qualifying schools throughout San Mateo County, including the rural communities on the coast of Half Moon Bay and Pescadero. They will also provide SLM with schools in Daly City, South San Francisco, and Redwood City. The LHD will work during the school day to provide nutrition education, and CCC will work in summer youth programs settings in East Palo Alto. Furthermore, the LHD will work in areas where CX3 interventions will occur, namely in East Palo Alto and Redwood City. The LHD will also work to improve the implementation of wellness policies by providing technical assistance to qualifying schools and preschools. Technical assistance provided by UCCE and LHD in School and Early Child Care Sites will include the following:

1. Assisting staff in creating guidelines for mealtime environment which would include: family-style meals during meal/snack times, tasting new foods, building motor skills, staff modeling healthy behaviors, and division of responsibilities.
2. Holding curriculum training for staff in order to be able to provide healthy nutrition/garden experiences for children regularly (2-4 times per month).
3. Assisting in the development of written physical activity policies that offer a variety of gross motor activities during structured and unstructured play.
4. Assisting in the development or revision of wellness policies that will include policies related to meal quality, mealtime environment, nutrition/garden education, physical activity, and professional development.
5. Providing technical assistance for schools implementing the SmarterLunch Room Movement.
6. Assist in the development and implementation of wellness policies that will include policies related to meal quality, mealtime environment, nutrition/garden education, physical activity, and professional development.

The curriculum chosen for direct education consists of Practice, Research tested or Emerging and were chosen after feedback from implementing staff, teachers, and PRE/POST results from evaluations from the previous years' evaluation. In addition, implementing agencies will continue to follow guidance from the SNAP-Ed Interventions: A Toolkit for States to assure that all interventions are evidence based

Targeted interventions are the result of coordinated efforts to build and establish relationships in SNAP-Ed eligible communities and settings. Interventions are often conducted through partnerships with our subcontractors, other county departments, and the CNAP group which meets on a bi-monthly basis. Media highlights will be shared with relevant partners and the SNAP-Ed community by partnering with the public relations department for the county to post on the San Mateo County WIC website, and our subcontractors to post NEOP messages when they become available. The latter details the work of each entity and it's relation to the state level objectives.

School Wellness (State objectives 1-5)

School Wellness is a large focus for both the LHD and UCCE. Both agencies will provide direct education in a classroom setting and will provide further opportunities for students to correlate nutrition with health by offering garden based nutrition education, SLM, training to teachers, training and technical assistance to after school providers, and physical education opportunities in preschools.

The LHD, UCCE, and CCC will provide nutrition education to SNAP-Ed eligible schools, afterschool, and summer programs through education, environmental supports and staff wellness.

In collaboration with the Sequoia Health Care District, the LHD and UCCE will combine efforts to assist in hosting "Make Time for Fitness". This annual event brings 4th graders from schools which meet the 50% free and reduced meal guideline to one location to address the importance of fitness and nutritious eating in a day of education and play.

In addition, we will continue to celebrate the month of March, National Nutrition Month, by expanding our outreach to further emphasize the importance of nutritious eating to the SNAP-Ed eligible population.

Farm to School (State objectives 1, 3, and 4)

Both UCCE and the LHD will continue participating in the Farm to Institution subcommittee of the San Mateo County Food System Alliance in order to promote Farm to School efforts in SNAP-Ed eligible schools. Efforts will include providing linkages to nutrition education and promoting consumption of locally procured, healthy foods. Food tasting and cafeteria promotions will include locally grown produce items.

Garden Education (State objective 3)

CCC will revitalize and maintain a garden during the summer months. During other times of the year, the garden will continue to be maintained by the site staff which will allow for larger community engagement. Education regarding the food growing process will increase the knowledge of food systems. The *Learn, Grow, Eat, & Go* curriculum will help instill an appreciation for local produce. Students will harvest seasonal produce such as tomatoes, cucumbers, and bell peppers.

UCCE will continue its collaboration with UCCE 4-H San Mateo County and the Healthy Living Ambassador (HLA) program to establish/reinvigorate/maintain edible school and community gardens. They will also implement garden-based nutrition education lessons reaching the students in SNAP-Ed eligible afterschool programs across the county. Local teens will be recruited from both qualifying UC CalFresh nutrition education sites and the larger community of San Mateo County to participate in a weekend long intensive training to be held at UC Elkus Ranch. Following the weekend training, they will lead a ten-week series of *Learn Grow, Eat & Go!*

Additionally, UCCE will support the delivery of other garden-based nutrition education curriculum in classrooms and preschool classrooms across the county resulting in additional site improvements associated to the garden. UCCE adult workshops at school and preschool sites will utilize items grown in the garden to implement lessons from the *Fresh From the Garden* curriculum which is designed to increase knowledge of healthful eating habits, while emphasizing the health benefits associated with a vegetable-rich diet. UCCE will continue to be supported by UCCE Master Gardeners who provide technical assistance regarding topics such as: companion planting, microclimate concerns, and planting schedules.

The LHD will continue to build on established garden education by partnering with both elementary and preschools to start, improve, and maintain garden beds at eligible sites. Program staff will expand their efforts to reach a broader range of students at current garden locations and will continue to use curriculum such

as *Dig In*, and *The Great Garden Detective*. Furthermore, the LHD will encourage participating SHINE sites to extend their work to encompass garden education as an additional site improvement. The LHD will work with program staff at school sites to train and provide ongoing technical assistance.

CX3 (State Level objectives 1,2,3, and 4)

The CX3 measuring survey tools will continue to be a key assessment in determining the connection between neighborhood factors (such as walkability, the interior/ exterior appearance of stores (including advertisement), to health outcomes. The LHD will carry out a reassessment of large supermarket chains, large grocery stores, small markets and convenient corner stores within four census tracts that continue to qualify under the Geographic Information system (GIS) data tool. Data will yield results inclusive but not limited to the quality and variety of fruits and vegetables, the selection of items at the checkout/ counter lane, health promotion items around fruit and vegetable displays, and cost to name a few. The LHD will train and provide technical assistance to a local youth group to carry out the CX3 assessment tool and provide feedback to the LHD. The assessment will be carried out in ten stores in Redwood City, eight stores in East Palo Alto, and two in Menlo Park. Findings will be shared with community organizations, residents and county departments for potential collaboration to address needs.

Healthy Retail (State Level objectives 1,3 and 4)

The Healthy Retail component will occur as a result of CX3 findings that will indicate where we can make improvements in the retail stores. Based on findings from 2013 data, only 25% of stores surveyed met the quality standard, and only 1/3 sold quality produce. Our multi-year strategies and interventions for the next three years include utilizing the Social Ecological Framework (SEM) to address nutrition decisions made in retail establishments by **1**. Reducing advertisements of sugar sweetened commodity food and beverages on the exterior of stores (year one and two) **2.** Improving the number of stores that meet the quality standard by 5% **3.** Securing partnerships that can allow for smaller more frequent delivery of food (year two and three) for fresher produce.

Champions (State level objectives 1,2,4, and 5)

Completion of state deliverables would not be possible without the involvement of local community Champions who assist the LHD to identify both site and intervention needs. The LHD will expand their current efforts with Champions to align with state's Champions for Change initiative to recruit and train additional church leaders, youth advocates, teachers, and school administration so that it encompasses the framework of SEM. Champions will serve as the cornerstone of our work by being the point of contact for SNAP-Ed eligible sites. They will also participate in relevant Champion trainings that encourage implementation of PSE and expand efforts to include other pertinent strategies.

Access to and/or appeal of physical activity opportunities (State level objective 5)

Catholic Charities will incorporate a physical activity component to give the participants a comprehensive approach to health. The curriculum *CATCH* will be followed when implementing lesson plans. *CATCH* will also be utilized during lessons taught by a physical education instructor. Program goals include: reducing risk factors associated with diabetes, depression, and obesity amongst youth in East Palo Alto, and sharing opportunities to be involved in physical activity since many of them do not have access to a safe space. The physical activity component will be monitored by survey to evaluate the progress of the participants. Students are also surveyed to track their progress outside of the site.

Additionally, UCCE San Mateo County has identified one nutrition educator who will serve as the physical activity lead for the county. The physical activity lead received extensive training on the *CATCH* curriculum and will guide efforts to train community partners on this curriculum and generally support physical activity promotion in SNAP-Ed eligible sites. UCCE will also partner with the 4-H Healthy Living Ambassadors and other local teens to lead physical activity lessons in both afterschool programs and preschool settings.

Evaluation Narrative Summary:

LHD

The LHD will participate in several strategies to foster behavior change among SNAP-Ed eligible residents, and will document such strategies by providing evaluation outcomes. Policy, Systems and Environmental (PSE) changes that have occurred as a result of focused efforts to promote health access and close health disparities will be captured through the Re-AIM framework. The RE-AIM framework and semiannual report will highlight the number of indirect participants reached, the scope of impact and address the sustainability of the PSE.

The LHD will also track and document all direct (unduplicated) and indirect (duplicated) education through the USDA Education and Administrative Reporting System (EARS). Direct and indirect education will occur in diverse community settings where SNAP-Ed eligible residents live, learn, and shop. EARS will capture the number of participants, give a description of the lesson taught, provide the length of the lesson and also indicate relevant SNAP-Ed materials and curriculum that were used. In addition, EARS will capture the number of lessons and classes taught to fulfill the Income and Outcome evaluation. Grades 3-8 will use the Youth Nutrition and Physical Activity Survey.

UCCE

UC CalFresh utilizes research-based age specific curricula in the classroom with youth participants. The Teacher Observation Tool (TOT) and the Teacher Tasting Tool (TTT) are the two most commonly used tools in the UC CalFresh youth program. The TTT surveys the student's ability to assess whether the students have ever tasted the food offered in a taste test before as well as their willingness to try the food again. The TOT surveys teachers to assess their perception of students' behavior change concerning healthy foods and physical activity as well as their own change in behavior in regards to encouraging students to consume

healthy foods and participate in physical activity. At schools where the Smarter Lunchrooms Movement techniques are implemented, a pre & post scorecard will be used to document the changes.

UC CalFresh's adult evaluations include pre and post-tests specific to adult research-based curricula in series-based lessons such as *Plan, Shop, Save and Cook*. These assessments measure knowledge gain and behavior change. For single session workshops, UC CalFresh utilizes intent to change (ITC) surveys to measure the participants' readiness to change behavior. Single session workshops also collect qualitative success stories. For process evaluation, UC CalFresh submits quarterly reporting tools youth and adult workbooks with number of participants and site details. UCCE will be working with UC CalFresh state office to align evaluation tools to the Western Region's SNAP-Ed evaluation framework.

CCC

Catholic Charities will implement the Cooking Matters and *Learn Grow, Eat Go!* at Youth Club of St. Francis of the Assisi in East Palo Alto. The Youth Survey will be administered as a pre and post tool to evaluate effectiveness and behavior changes. In addition, The CCC will track and document all direct (unduplicated) and indirect (duplicated) education through the USDA Education and Administrative Reporting System (EARS).

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	50.8%		0 to 4 years old (Preschool):	13,044

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, 14 K-12 SNAP-Ed eligible schools and afterschool programs will make changes to the site environment and systems to support improved nutrition and physical activity behaviors among students, parents, and staff.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Structured Physical Activity
- Murals/Stencils
- Safe Routes to School
- Smarter Lunchrooms Movement (SLM)
- Edible Gardens
- Farm to School
- Wellness Policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**
1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, identify 10 K-12 SNAP-Ed eligible schools with the capacity for making improvements to the site environment and systems to support improved nutrition and physical activity behaviors among students, parents, and staff.
    b. By September 30, 2017, provide direct education to 3,470 SNAP-Ed eligible students and parents in K-12 settings and indirect education to 3,420 SNAP-Ed eligible students and parents in K-12 settings.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, make/support the maintenance of at least one new healthy environment or system change such as implementing SLM or improving/establishing a school garden at each of the 12 K-12 sites.
    b. By September 30, 2018, provide direct education to 3,270 SNAP-Ed eligible students and parents in K-12 setting and indirect education to 3,320 SNAP-Ed eligible students and parents in K-12 settings.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, make/support the maintenance of at least one new healthy environment or system change such as implementing SLM or improving/establishing a school garden at each of the 14 K-12 sites.
    b. By September 30, 2019, provide direct education to 3,270 SNAP-Ed eligible students and parents in K-12 settings and indirect education to 3,320 SNAP-Ed eligible students and parent in K-12 settings.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Mateo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, 14 K-12 SNAP-Ed eligible schools and afterschool programs will make changes to the site environment and systems to support improved nutrition and physical activity behaviors among students, parents, and staff.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Annually establish and/or strengthen the relationships with 14 SNAP-Ed eligible sites and build interest in site improvements by providing or supporting direct education to SNAP-Ed eligible students, parents, and caregivers. Year 1: Provide Direct Education to 3,470 SNAP-Ed eligible students, parents, and caregivers Year 2: Provide Direction Education to 3,270 SNAP-Ed eligible students, parents, and caregivers Year 3: Provide Direct Education to 3,270 SNAP-Ed eligible students, parents, and caregivers	x CED CEI MPR x C&C x TTA	CWD x LHD AAA x UCCE x CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	ATF Reporting Tools Workbook

1.2	Provide indirect education through interactive booths, exhibits, displays, or dissemination of nutrition education and physical activity promotion materials reaching SNAP-Ed eligible participants. Includes the promotion of EatFresh.org to increase participation in online platform. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, 8 SNAP-Ed eligible early care and education (ECE) sites will make changes to the site environment and systems to support improved nutrition, physical activity, and screen time behaviors among students, parents, and staff.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Structured Physical Activity
- Wellness Policies
- Farm to School
- Edible Gardens
- Murals/Stencils
- SHINE
- Smarter Lunchrooms Movement

Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2018, make/support the maintenance of at least one new healthy environment or system change such as implementing SLM, SHINE, or improving/establishing/maintaining a school garden at 4 ECE sites.
    b. By September 30, 2017, provide direct education to 1,770 SNAP-Ed eligible students and parents and indirect education to 1,770 SNAP-Ed eligible students and parents at ECE sites.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, make/support the maintenance of at least one new healthy environment or system change such as implementing SLM, SHINE, or improving/establishing/maintaining a school garden at 6 ECE sites.
    b. By September 30, 2018, provide direct education to 1,770 SNAP-Ed eligible students and parents and indirect education to 1,770 SNAP-Ed eligible students and parents at ECE sites

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, make/support the maintenance of at least one new healthy environment or system change such as implementing SLM, SHINE or improving/establishing/maintaining a school garden at 8 ECE sites.
    b. By September 30, 2019, provide direct education to 1,770 SNAP-Ed eligible students and parents and indirect education to 1,770 SNAP-Ed eligible students and parents at ECE sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Mateo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, 8 SNAP-Ed eligible early care and education (ECE) sites will make changes to the site environment and systems to support improved nutrition, physical activity, and screen time behaviors among students, parents, and staff.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Annually establish and strengthen the relationships with SNAP-Ed ECE eligible sites and build interest in site improvements by providing or supporting direct education to SNAP-Ed eligible students, parents, and caregivers. Year 1: Provide Direct Education to 1,770 SNAP-Ed eligible students, parents, and caregivers Year 2: Provide Direction Education to 1,770 SNAP-Ed eligible students, parents, and caregivers Year 3: Provide Direct Education to 1,770 SNAP-Ed eligible students, parents, and caregivers	x CED CEI MPR x C&C x TTA	CWD x LHD AAA x UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 x x x X Year 2 Q1 Q2 Q3 Q4 x x x X Year 3 Q1 Q2 Q3 Q4 x x x X	ATF Reporting Tools Workbook

2.2	Provide indirect education through interactive booths, exhibits, displays, or dissemination of nutrition education and physical activity promotion materials reaching SNAP-Ed eligible participants. Includes the promotion of EatFresh.org to increase participation in online platform. Year 1: Provide Indirection Education to 1,770 SNAP-Ed eligible participants Year 2: Provide Indirect Education to 1,770 SNAP-Ed eligible participants Year 3 : Provide Indirect Education to 1,770 -SNAP-Ed eligible participants	( ) CED (x) CEI ( ) MPR (x) C&C ( ) TTA	( ) CWD (x) LHD ( ) AAA (x) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 X Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF Reporting Tools Workbook

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and consumption of healthy food, and beverages at or through 8 SNAP-Ed eligible sites such as retail stores, community based organizations, and public housing through policy implementation and site improvements.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy In-Store Marketing and Promotions
- Local Procurement
- Healthy Food and Beverage Policies/Stocking Standards
- Wellness Policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, conduct assessment of the 20 retail sites in up to 4 qualifying census tracts.
    b. By September 30, 2017, at 2 qualifying stores or sites will provide either: 1. Healthy food and beverage merchandising materials 2. Conduct quarterly taste test of healthy food/beverage recipes 3. Provider staff education opportunities
    c. By September 30, 2017, provide indirect education to 400 SNAP-Ed eligible participants.
    d. By September 30, 2017, identify 2 SNAP-Ed eligible sites with the interest and capacity for site improvements.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, develop a plan for healthy retail recognition program.
    b. By September 30, 2018, at 4 qualifying stores or sites will provide either: 1. Healthy food and beverage merchandising materials 2. Conduct quarterly taste test of healthy food/beverage recipes 3. Provider staff education opportunities
    c. By September 30, 2018, provide indirect education to 400 SNAP-Ed eligible participants.
    d. By September 30, 2018, make at least one new healthy environment or system change (such as establishing a wellness policy, setting vending machine standards or improving/establishing a community garden) or improve retail environment at 6 SNAP-Ed eligible sites.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, implement a plan for a healthy retail recognition program.
    b. By September 30, 2019, at 6 qualifying stores or sites will provide either: 1. Healthy food and beverage merchandising materials 2. Conduct quarterly taste test of healthy food/beverage recipes 3. Provider staff education opportunities
    c. By September 30, 2019, provide indirect education to 400 SNAP-Ed eligible participants.
    d. By September 30, 2019, make at least one new healthy environment or system change (such as establishing a wellness policy, setting vending machine standards, improving/establishing a community garden) or improve retail environment at 8 SNAP-Ed eligible sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

San Mateo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and consumption of healthy food, and beverages at or through 8 SNAP-Ed eligible sites such as retail stores, community based organizations, and public housing through policy implementation and site improvements.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Establish and strengthen the relationships with SNAP-Ed eligible sites and build interest in site improvements by providing or supporting direct education reaching 660 SNAP-Ed participants at 7 sites such as retails stores, community based organizations, farmers' markets and public housing.	x CED CEI MPR x C&C x TTA	CWD x LHD AAA x UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF Reporting Tools Workbook

3.2	Provide indirect education through interactive booths, exhibits, displays, or dissemination of nutrition education and physical activity promotion materials reaching 300 SNAP-Ed eligible participants. Includes the promotion of EatFresh.org to increase participation in online platform**.**	☐ CED ☒ CEI ☐ MPR ☒ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x Year 3 Q1 x, Q2 x, Q3 x, Q4 x	ATF Reporting Tools Workbook
3.3	Based on need, provide curriculum training and support to 3 personnel who work with the SNAP-Ed eligible population at community based organizations, peer educators, or other SNAP-Ed eligible sites.	☒ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☐ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 x, Q2 x, Q3 x, Q4 X Year 2 Q1 x, Q2 x, Q3 x, Q4 X Year 3 Q1 x, Q2 x, Q3 x, Q4 X	ATF Reporting Tools Workbook

3.4	Regular review of site contact list to identify SNAP-Ed eligible sites with potential for site improvements including retail establishing/maintaining an edible community garden, setting healthy vending machine standards, and establishing/improving wellness policies/standards. Establish or maintain regular communication with key contacts at all SNAP-Ed eligible sites to identify additional opportunities for nutrition education and site improvements. Year 1: Complete assessment of nutrition and physical activity support and/or Community of Excellence in Nutrition, Physical Activity, and Obesity Prevention (Cx3) at 20 SNAP-Ed sites to identify areas where improvements are needed. Implement at least one site improvement at 2 sites. Year 2: Implement at least one site improvement at 3 additional sites. Assist in the development of a sustainability plan. Year 3: Implement at least one new site improvement at either 3 new SNAP-Ed eligible sites or sites making improvements in Year 2. Assist in the development of a sustainability plan.	<table><tr><td></td><td>CED</td></tr><tr><td></td><td>CEI</td></tr><tr><td></td><td>MPR</td></tr><tr><td>x</td><td>C&C</td></tr><tr><td>x</td><td>TTA</td></tr></table>	<table><tr><td></td><td>CWD</td></tr><tr><td>X</td><td>LHD</td></tr><tr><td></td><td>AAA</td></tr><tr><td>x</td><td>UCCE</td></tr><tr><td></td><td>CCC</td></tr></table>	CWD: LHD: AAA: UCCE: CCC:	Year 1 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>x</td><td>x</td><td>x</td><td>x</td></tr></table> Year 2 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>x</td><td>x</td><td>x</td><td>x</td></tr></table> Year 3 <table><tr><td>Q1</td><td>Q2</td><td>Q3</td><td>Q4</td></tr><tr><td>x</td><td>x</td><td>x</td><td>x</td></tr></table>	Site Lists ATF PSE RE-Aim Report Reporting Tool Workbook

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	Changes in salaries/benefits reflect 1) reduced staffing by 1 FTE 2) Negotiated union agreement to provide COLA increases
2	Non-Capital Equipment/Supplies	Changes reflect incurred cost of PC replacement to meet warranty agreement
3	Materials	
4	Travel	Increase in travel for training, meeting, and mileage.
5	Building/Space	Reduced cost of building/space are in alignment with reduction in staffing
6	Maintenance	N/A
7	Equipment and Other Capital Expenditures	N/A
8	Contracts/Sub-Grants/ Agreements**	Due to SNAP-Ed reduction funds, the LHD will assume partial work of sub-grantee
9	Indirect Costs	Changes reflect overall increase in SNAP-Ed funds. Costs were redistributed in order to accommodate other program cost.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Photocopy	Copy of Education Materials (Color Me Healthy Tool kits , Posters, or Photocpies for Nutrition Edu)	$0.05	20000	$1,000	
2			Food and Supplies for Food	Food Demonstration and supplies and food for education -100 Sessions/30 persons *$2.50=$7,500	$2.50	3000	$7,500	
3			Supplies for Rethink Your Drink	RYD Campaign training workshop supplies and materials-4 sessions/30 persons each	$2.00	120	$240	
4			Garden Suuplies	Garden Supplies for classes/workshops in 11 qualifying schools, community centers, Friendship Park, and/or senior center. About $360/per site for workshops and supplies for students to elarn garden based nutrition education. Supplies include but not limited too soil, dirt, compost, seeds, shovel, watering cans, pitch fork, small garden tools, and other garden tools for maintenance and repair of garden beds	$360.00	11	$3,960	
5			Garden Beds	Supplies include lumber, nails, wood for wood frames, and weed barriers to make new beds qualifying sites (2 sites beds each site) $200 per bed and $528 for repair of beds at Friendship Park and School Gardens	$928.00	1	$928	
6			Garden Based Nutrition Education	Jars, popsicles, sticks, cups, plates, germination kits 85 classes/30 students each *.22/per student	$0.22	2550	$561	
7			Harvest of the month	Calendars - Printing $1/piece	$1.00	15000	$15,000	
8			Advertising	Bus ads to promote Champion for Change, HOTM, Farmers' Markets and Harvest of the Month campaign. Advertising to help promote Champion for Change, HOTM and Farmers' Market in SNAP-Ed eligible locations and eligible census tracts. Cost will cover paying for graphic designer and printing and wrapping of vehicles. Direct program expense for the partial wrapping of a vehicle with SNAP-ED/CDPH approved messaging. Pricing is dependent upon size of vehicle. Advertising can generate millions of visual impressions, studies show that 97% respondents remember ads on vehicles and respondents have positive reaction to them. Studies also have shown that wraps cost cents on the dollar compared to TV, radio and print ads. County is large geographically, but has almost no billboards for placing SNAP-Ed messaging, so wrapping a vehicle would be an excellent way to keep health top of mind in the SNAP-Ed population, particularly since the vehicle would be traveling to areas where we have established SNAP-Ed audiences and which have SNAP-Ed-qualifying census tracts:	$1.00	27,861	$27,861	
						Total Materials:	**$57,050**

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Barbara County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

County Name: **Santa Barbara County**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	**University of California: UC CalFresh UCCE: UC CalFresh Nutrition Education Program in San Luis Obispo & Santa Barbara Counties**
X	**California Department of Public Health: CDPH: Santa Barbara County Public Health Department, Nutrition Education and Obesity Prevention Program**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Santa Barbara County

Santa Barbara County is on the central coast of California and has a population of 440,668 residents (US Census Bureau Population Estimates 2014). With a natural setting that includes the scenic California coastline, moderate weather, agricultural valleys, and coastal mountains, Santa Barbara is a diverse community to live, work, or play. Santa Barbara County is comprised of 8 cities, governed by mayors and city councils, the unincorporated area governed by the Santa Barbara County Board of Supervisors, (California Association of Counties), and 20 K-12 school districts governed by their school boards (Santa Barbara County Education Office).

According to the SNAP-Ed County Profile (2015), 34.5% of the population is SNAP-Ed eligible. Of those eligible, 62.1% are adults, 18.5% are children 6-17 years, 11.1% are children 5 years of age and younger, and 8.3% are seniors aged 65 and older. SNAP-Ed eligible community members are 61.1% Hispanic, 30.8% White, 4.1% Asian, 1.6% Multi Racial and 1.4% African American. The primary languages spoken in the county are English and Spanish. There are 89 census tracts in Santa Barbara County and 16 (18%) qualify for SNAP-Ed services based on the most recent American Community Services (ACS) data for all races. Of the 117 schools in the county, 66 (56.5%) are SNAP-Ed eligible which represents 40,880 students. A number of means tested sites are eligible for Snap-Ed services including food distribution sites (including healthy school pantries), Women Infants and Children's (WIC) offices, Head Start centers, low-income housing complexes, etc.

Of the Snap-Ed eligible population, 12.1% are food insecure overall and 21.9% of children are considered food insecure. The Santa Barbara County Food Bank distributes 9.7 million pounds of food each year to our most vulnerable populations. One-half of the food distributed is fresh produce. Santa Maria represents the city with the highest number of Food Bank clients (57,036; 39%) and Santa Barbara is second (49,122; 34%). Rounding out the top five highest need cities are Lompoc (17,319; 12%), Goleta (5,013; 3%) and Guadalupe (2,971; 2%). Key findings from the Santa Barbara County Food Bank client surveys in 2015 found 49% of food bank client households have at least one member with high blood pressure, 47% of households do not have any form of health insurance, 21% of households have at least one member with diabetes, and 60% of households must choose between paying for medical care or food.

According to the California Health Interview Survey, 56.5% of Santa Barbara County adults reported they were overweight or obese. This is compared to 59.8% of state residents. The prevalence of SNAP-Ed adults overweight or obesity in Santa Barbara County is 53.3%. Abbey, Holstein, & Goldstein (2013) indicated that approximately 34% of children ages 2-17 drank one or more sugar-sweetened beverages each day. Thirty-six percent (36.1%) of Snap-Ed eligible adults consume sugar sweetened beverages one or more times per week. Moreover, 67.4% of the SNAP-Ed eligible adults in Santa Barbara County reported consuming fast food at least once in the past week, while 39.6 % indicate they can always find affordable fruits and vegetables in their neighborhood.

Research indicates that many adults and youth in the county do not get enough physical activity. Fourteen percent of adults reported no leisure time physical activity and only 17.4% of children and teens reported daily physical activity of one hour or more. According to the California Department of Education (2014), the majority of Santa Barbara county youth in grades 5, 7, and 9 did not meet all fitness standards, with only 23.4% of 5th graders, 32.6% of 7th graders, and 39.6% of 9th graders passing all fitness standards. In addition, UCCE conducted a brief physical activity pilot study using activity monitors with students in two classrooms in Santa Maria in 2015. The physical activity data was consistent with the above research, showing that students do not meet recommendations for physical activity. The average number of active minutes, defined as 100 steps per minute, ranged between 5.7 and 6.63 minutes per day. The average number of steps per student per day ranged between 6,939 and 9,635.

Although Santa Barbara County only has two SNAP-Ed funded programs providing nutrition education and obesity prevention services, we collaborate with several non-SNAP-Ed funded agencies and organizations that have similar goals. The most prominent agency is the Santa Barbara County Food Bank. The Food Bank's mission is to end hunger and transform the health of Santa Barbara County through good nutrition. Their focus is increasing the health literacy of Santa Barbara County residents by focusing on healthy food, education and empowerment. Last year, the Foodbank of Santa Barbara County distributed more than 9.7 million pounds of food from two warehouse locations in Santa Barbara and Santa Maria. Their food is utilized by 1 in 4 people in our county and with an emphasis on health; one half of the food distributed is fresh produce.

Other nutrition-related programs in the county include: The Area Agency on Aging, the Department of Social Services CalFresh program; Women, Infants, Children (WIC) program; Summer Food Program which is operated through many different partnering agencies including the Food Bank, local cities, school districts, boys and girls clubs, and Community Action Commission; Project Teen Health; Healthy School Pantry and Santa Maria THRIVE, Healthy Lompoc Coalition and many others.

Santa Barbara County has two major regions (Northern & Southern) approximately 90 miles apart. Each region is distinct in its geographic characteristics, resident demographics, and community needs and assets. The northern region politics tend to be more conservative, pro-agriculture and oil industry. The southern region politics tend to be more liberal, pro health and the environment. Geographical distance and political differences between regions also presents unique challenges to build countywide coalitions and serve the diverse needs of all Santa Barbara County residents.

Southern Santa Barbara County

The southern region of the county includes the county seat -the city of Santa Barbara- with a population of approximately 91,196 (2010 census). Also in the southern region are the cities of Goleta and Carpinteria and the University of California Santa Barbara, which is in the unincorporated area of Isla Vista. In the city of Santa Barbara, 38% of residents identify as Hispanic or Latino, 54% identify as white only and 39% speak a language other than English in their homes.

Northern Santa Barbara County

The northern region includes the cities of Santa Maria, Lompoc, Guadalupe, Buellton, and Solvang. This region is also home to Vandenberg Air Force Base, which lies in the unincorporated area on the outskirts of the City of Lompoc. The city of Santa Maria is the most populous city in the county at 103,400 people (2010 census). According to 2010 Census data, approximately 70% of Santa Maria residents identify as Hispanic or Latino, 22% identify as white only and 64% report a language other than English is spoken at home. In 2013, approximately 21% of Santa Maria residents were below the poverty level compared to 14% of Santa Barbara City residents.

In Santa Maria in 2015, residents saw an increase in violent crime mostly related to gang activity (according to police data). In the first month of 2016, six homicides were committed, five of them gang related. Based on the Federal Bureau of Investigations the rate of violent crime in Santa Maria fluctuates between slightly lower than and somewhat higher than the California average. In 2014 Santa Maria had a violent crime rate of 4.27 per 1,000 persons (https://www.fbi.gov/about-us/cjis/ucr/crime-in-the-u.s/2013/crime-in-the-u.s.-2013/tables/table-8/table-8-state-cuts/table_8_offenses_known_to_law_enforcement_california_by_city_2013.xls). In 2012, the rate was 6.8 per 1000. The average rate of violent crime in California between 2006-2010 was 4.36 per 1000 (CDPH data). While the crime rate is not as high as several urban centers in California, the nature of the crimes and their occurrence among youth has contributed to a perception of urgency within the community to address issues related to youth violence and safety. To address this complex issue within the community a coalition has started meeting to develop plans to address youth violence.

4. **Community Assessment**

The Santa Barbara County SNAP-ED Local Implementing Agencies (LIAs) utilized a comprehensive set of assessment measures to inform the development of this integrated work plan. These include the SNAP-Ed County profile prepared by CDPH which includes county level data from a variety of sources including the American Communities Survey (ACS) five year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey (CHIS), Feeding America's Map the Food Gap, and Food Insecurity in Your County. Interviews with SNAP-Ed participants as part of ongoing community engagement and direct nutrition education work; Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3); various assessment information collected during FFY15 and FFY16 activities (RE-AIM, ATF, and IOE), the Santa Barbara County Community Health Assessment (2015), and the Santa Barbara County Food Bank's Food Action Plan (2015) were also utilized. This comprehensive approach enabled the LIAs to identify the populations and areas of highest need and to develop a coordinated approach that addresses all levels of the Social-Ecological Model (SEM) and provides long term sustainability.

The majority of LIA efforts during FFY17-19 will concentrate in the communities of Santa Maria, Guadalupe, Lompoc, and Isla Vista. The LIAs have selected to focus resources in these communities due to the high likelihood of reaching SNAP-Ed eligible residents, high prevalence of schools with at least 50% free and reduced meal rates, and historical partnerships and trust built between LIAs, school districts, and community agencies, within these communities that will ensure effective and efficient use of resources. In addition, the selected communities are concerned about issues related to SNAP-Ed work.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Barbara County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

In the 2013 County Health Rankings produced by the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute, Santa Barbara County ranked 14th on Health Outcomes and Health Factors out of the 57 counties reporting in California. The County ranked 18th on Mortality or length of life, 12th on the Health Behaviors of area residents, 10th in terms of the Physical Environment, 19th on Social and Economic conditions, and 16th for Clinical Care. Santa Barbara County residents were healthier than the state average on several specific behaviors, including adult obesity (20% vs. 24%) and physical inactivity (16% vs. 18%).). Santa Barbara also had higher diabetes screening levels (87% vs. 81%). California Health Interview Survey 2011-2012 found 25.3% of county children were physically active for at least an hour every day in the previous week. The state percentage was 32.6%. Teens in the county, were slightly more active with 26.2% putting in at least an hour of activity every day in a typical week and faired considerably better than teens statewide (only 16.1%).

CX3

CX3 is a formative evaluation that the LHD utilizes in determining our community intervention efforts. The data collected via the CX3 assessment enables community mobilization and engagement around advocating for PSE changes in the built environment. Our most recent assessment occurred in 2012. LHD staff and community member will be embarking on Tier 1 of the CX3 process again during the summer of 2016. This will consist of mapping and assessing 6 neighborhoods in qualifying census tracts (Santa Maria, Guadalupe, Lompoc, and Isla Vista), as well as providing training to external community partners to assess neighborhoods that do not qualify for SNAP-Ed interventions, as a way to broaden the impact of CX3 and provide community-wide assessment results. CX3 data from the 6 SNAP-Ed approved neighborhoods will include both Tier 1 mapping results regarding community resources, and Tier 2 assessment data to provide neighborhood characteristics for community mobilization and engagement. Based on our 2012 CX3 assessment results and community interventions, there continues to be ongoing challenges with access to healthy foods as well as safe places to recreate, especially in the underserved areas in north county. In addition to CX3, our healthy retail related PSE work in FFY15 and FFY16 was evaluated via RE-AIM to assess the impact of our healthy retail interventions. Information gathered also shows promise in our CX3 communities with regards to a number of community based agencies that are mobilizing to advocate for and implement PSE related changes in the built environment in Santa Maria (focus on HEAL resolution adoption, healthy retail, neighborhood safety, and physical activity) , Guadalupe (focus on creating a multi-purpose trail for PA access), Lompoc (focus on mobile-vending around schools, healthy retail & farmers markets), and Isla Vista (focused on neighborhood safety and community trail development). Coordinated efforts, largely shaped by policy, systems, and environmental change strategies that will be initiated or continued through FFY19 will address these issues.

Schools

Of the 66 SNAP-Ed qualifying schools in Santa Barbara County, 39 (59%) are in the northern region of the county. Although there are qualifying schools in the southern region, the LIAs have chosen to focus efforts in the following four north county school districts: Santa Maria-Bonita School District (20 schools; 16,026 students), Guadalupe Union School District (2 schools; 1,170 students), Lompoc Unified School District (16 schools; 9,300 students), Orcutt Union School District

(10 schools; 5,020 students), and one south county school district--Goleta Union School District (9 schools; 3700 students). These districts represent an enormous need and also do not have as much financial support directed to health and wellness initiatives as do some south county school districts. For instance, Santa Barbara Unified School District has one of the longest operating and functioning district wellness committees. At least one representative from each school attends a quarterly wellness committee meeting that is held at the district office. They have support from the district which allocated Local Control Accountability Program (LCAP) funds. One of their districts priorities is for their students to be physically fit and live healthy lives. With this seen as a priority, the district allocated an annual stipend of several thousand dollars to the teacher who coordinates the district wellness committee meetings and also allocated $54,000 for school garden education. Along with district LCAP financial support, Santa Barbara Unified has adopted health and wellness related policy, systems, and environmental changes at both district and school site levels that make this a model district in our county for creating schools as the heart of health and wellness.

5. **Community Change Goals**

In Santa Barbara County, the high rates of overweight and obesity demonstrate the impact of chronic disease conditions associated with poor nutrition and lack of physical activity. In response, the Santa Barbara County LIAs in partnership with Live Well Santa Barbara County coalition members, local city and county government officials, healthcare organizations, community based organizations, and school districts are seeking broad community change in the following areas:

1) Promote safe environments that support and encourage healthy eating and active living.

1. **Increase consumption of and access to fruits and vegetables**
    a. Increase healthy retail options and marketing in CX3 neighborhood stores
    b. Encourage and/or promote farmers markets that accept EBT, WIC, and/or market match
    c. Maintain/sustain school gardens
    d. Promote Cal Fresh & WIC
    e. Provide nutrition education in community and school locations
    f. Support Smarter Lunchroom Movement Interventions
    g. Support farm to school opportunities
    h. Support school gardens and salad bars
    i. Increase local procurement of fruits and vegetables at schools
    j. Encourage student participation in school meals

2. **Increase consumption of water and decrease consumption of sugary beverages**
    a. Support hydration stations in schools and parks
    b. Provide healthy beverage information in community and school locations
    c. Promote water at school and community events
    d. Provide spa water tastings at nutrition education events
    e. Collaborate with policymakers to implement Healthy Eating Active Living (HEAL) policies that support healthy vending at park and recreation sites
    f. Work with retailers to prominently display water

3. **Increase access to safe places for physical activity**
    a. Support the development of local trails
    b. Support safe routes to schools
    c. Advocate for joint use policies at school campuses
    d. Promote free PA interventions in the community (Zumba, walking groups, etc.)

This goal will be achieved by increasing the number of communities and school districts that adopt and implement policy, system, and environmental changes that improve healthy lifestyles. Currently, two cities (Lompoc and Santa Barbara), and the county of Santa Barbara have adopted Healthy Eating Active Living (HEAL) resolutions. LIAs are collaborating in these efforts to raise awareness and provide technical assistance to implement HEAL changes in SNAP-Ed approved communities. LIAs will increase engagement with local policy makers, community-based organizations and community members to improve access to and demand for healthy food and beverage options as well as safe places to recreate. LIAs will collaborate with local school districts to promote PSE changes that increase consumption of fruits, vegetables, and water while reducing consumption of sugary beverages, along with increased access to daily PA opportunities. Policy, systems, and environmental change interventions including, school wellness policies, healthy retail, farmers markets, mobile-vending, structured PA , school gardens, active transportation, etc., will be implemented in SNAP-Ed eligible schools and census tracts to assure our PSE efforts are targeting the low-income and underserved communities in Santa Barbara County.

2) Improve county-wide capacity to help low-income community members understand health information and empower them to make healthy decisions and advocate for healthy eating and active living.

1. Collaborate with Live Well Santa Barbara County coalition members to coordinate efforts
2. Deliver/coordinate consistent messages via a social marketing campaign (3-4-50 or 5-4-3-2-1 Go!)
3. Support healthy marketing and messages via various communication channels

4. Provide community advocacy trainings
5. Provide youth engagement training
6. Increase community engagement and involvement
7. Provide training on evidence-based nutrition education curricula

This goal will be achieved by meeting 6 times a year with the Live Well Santa Barbara County Coalition to collaborate and coordinate shared goals with SNAP-Ed funded and un-funded partner agencies and through comprehensive school based interventions. Through the LHDs collaboration with CX3 community members and school parents we will provide advocacy trainings regarding neighborhood and school health issues. UCCE will work with youth and staff at eligible schools to increase student and teacher representation on school wellness committees and the capacity to advocate for health in school environments and policies.

With these larger community change goals in mind the LIAs have developed the following three-year objectives in order to meet the needs identified above in the community assessment and jurisdiction description. By focusing collaborative and comprehensive efforts in the areas of highest need in the northern region of the county, LIAs will work at different sites to build comprehensive nutrition education programming, synergistic messaging and PSE advocacy.

LIAs' three-year objectives:

1. By September 30, 2019, with a focus on community and youth engagement strategies, work with applicable stakeholders and sectors to increase availability and accessibility of healthy foods, beverages and physical activity and decrease availability of less healthy foods and beverages in a minimum of three eligible communities.
2. By September 30, 2019 increase access to and consumption of fresh fruits and vegetables and physical activity for at least 40,000 SNAP-ED eligible students and staff in 5 Santa Barbara County School Districts through collaboration, training, and technical assistance on advancing policy, systems, and environmental changes in school districts.

Because LIAs have limited resources and are facing flat and/or decreasing funding over the course of this three-year work plan, there are many needs in the county that will remain unmet. By focusing on broader PSE goals, increasing community capacity and sustainability through training and technical assistance and leveraging the resources of our community partners, LIAs will work to reach the broadest audience possible with evidence-based and sustainable interventions. Still, a majority of the qualifying schools in the county will not be receiving comprehensive nutrition education services throughout the three-year implementation period. As the work of LIAs and the Live Well SBC progresses, the larger community change goals are supportive of SNAP-Ed State level Objectives 4 and 5: To increase access to or appeal of healthy dietary choices and physical activity.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The Santa Barbara County SNAP-Ed LIA partnership includes the Santa Barbara County Public Health Department (SBCPHD) and the UC CalFresh Nutrition Education Program of San Luis Obispo and Santa Barbara counties (UCCE). Both partners are funded through USDA SNAP-Ed, and work together to create the integrated work plan and assess the food and physical activity needs of the Santa Barbara SNAP-Ed communities. In addition, the two LIAs are committed to working collaboratively for the most efficient use of scarce resources in Santa Barbara County. LIA staff have provided cross-training and opportunities to share resources and expertise. This collaboration has allowed both agencies to gain a deeper understanding of each agency's area of focus and expertise and allowed meaningful referrals of clientele and partnerships to flourish.

Much of the collaborative work related to healthy eating and active living in the county is coordinated through the SBCPHD-led county-wide community coalition, Live Well Santa Barbara County (formerly CNAP and Partners for Fit Youth) which meets six times per year. The mission of Live Well Santa Barbara County (LWSBC) is to provide health education and advocacy for health in all policies and programs. The coalition includes representation from organizations, agencies, and government officials with an interest in nutrition, physical activity, public health, the environment and health care. LIA's rely on this coalition to promote SNAP-Ed services and activities by connecting with other agencies involved in our coalition, such as County Welfare Departments, WIC, the Food Bank, etc. UC CalFresh staff are represented at LWSBC meetings and the program supervisor sits on the Steering Committee to provide collaborative support and contribute to the direction and decision-making of the collaborative. The coalition meets in person six times per year at a mid-county location. During Federal Fiscal Year (FFY) 2016, LWSBC underwent a revision to operating guidelines, a name change, and developed an online presence (website and social media) in order to create more name recognition and appeal to a broader range of sectors and potential community collaborators. Current coalition partners include: Santa Barbara County Food Bank, local school districts, local health organizations, WIC, Santa Barbara County Association of Government, CenCal Health (Medi-Cal provider), the UC 4-H Youth Development Program, Healthy Lompoc Coalition, Dignity Health Marion Regional Medical Center, Community Action Partnership, and the Santa Barbara County Department of Social Services, Cottage Health Care Systems, Santa Maria Recreation and Parks Department, and others.

A LWSBC strategic plan was developed in FFY15 and specific areas of focus were identified. These include: 1) coordinating SNAP-Ed interventions with SNAP outreach based on the collective impact framework and 2) promoting health in all policies with a focus on PSE changes to support our obesity prevention goals. For FFY 17-19, LIA partners will look to expand coalition membership to BUILT community partners as well as stakeholders suited to meet the community safety needs identified by the community in Santa Maria, especially for interventions outside of the scope of SNAP-Ed allowable work.

In FFY16, a collaborative pilot project was initiated to align the UC 4-H Youth Development Program (UC 4-H YDP) with UC CalFresh youth engagement initiatives at SNAP-Ed eligible schools. Through this partnership, UCCE has been able to work more intensively with youth leaders to identify health eating active living priorities, train students in providing nutrition and physical activity education and encouragement to their peers, and connect underserved youth with the UC 4-

H YDP. Youth have identified access to physical activity and promotion of fruits and vegetables as two of their priority projects. For this work plan, UCCE will work closely with UC 4-H YDP to enhance the capacity of both programs and school and community partners to engage youth as agents of change and leaders in their communities. UCCE identifies this strategy as a component in the broader youth violence prevention efforts taking place in the community.

In Santa Barbara County, there are a number of other nutrition-related programs that serve low-income communities including the Food Bank of Santa Barbara County and its numerous partners, local school districts, Sansum Diabetes Research Center, Dignity Health, local churches, The United Way, Boys & Girls Club, Girls Inc., Santa Barbara Bike, City Recreation and Park Departments, and a variety of other local non-profits and government agencies.

Besides the Live Well Santa Barbara County Coalition, LIAs actively participate in 5 district school wellness committees, a countywide School Wellness Council, and well established community collations such as Healthy Lompoc Coalition, Dignity Health's Healthy Communities Collaboration, Santa Maria-Bonita School districts THRIVE meetings, and the Isla Vista Community meetings.

In addition, Santa Maria has a newly formed coalition led by Santa Maria High School administrators to address the issue of youth violence. LIA partners will work closely with this newly formed coalition to provide partnership and support for youth violence prevention initiatives that are allowable under USDA guidelines. Some ways the UCCE will seek to support the coalition is through youth engagement and youth development work and in promoting and encouraging safe spaces for youth and community members to engage in physical activity, access healthy foods and engage in active transportation to school.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources

	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources and curriculum will be approved through the USDA SNAP-Ed Connection website and/or the California SNAP-Ed integrated curricula list. LIAs in Santa Barbara County have selected curricula and materials that best meet the needs and culture of the priority SNAP-Ed population.

UCCE will use grade and age-level appropriate and USDA approved curricula for school-based nutrition education and garden enhanced nutrition education (see curriculum and materials list below). UCCE uses an Educator Extender model. Classroom or afterschool educators are trained to deliver nutrition education curricula. UCCE staff support curricula implementation through quarterly classroom visits that include delivery of lesson materials, classroom food demonstrations, and modeling of food safety and nutrition concepts. In FFY17 UCCE will pilot an educator extender model with the Shaping Healthy Choices program in classrooms where educators have received extensive training on curriculum fidelity during FFY16. For new educators, UCCE will model all Shaping Healthy Choices lessons. In addition, UCCE uses materials from Smarter Lunchrooms Movement, CATCH and Harvest of the Month to implement school wide interventions, trainings and food tastings.

LHD reviewed the approved curricula list and chose the best option for our target population. We utilize My Plate, Harvest of the Month, Rethink Your Drink, Eat Healthy Be Active, and the Community Toolbox for Educators in adult education classes, and we predominantly use the Great Garden Detective, Dig In, and Harvest of the Month for school garden based interventions with youth. In retail settings, we utilize Cooking Matters at the Store, My Plate, Rethink your Drink, and the Latino Campaign with the Toolbox for Community Educators. These curricula are age and culturally appropriate for our target audiences.

9. **Intervention and Evaluation Plan Narrative Summary** The mission of the LIAs in Santa Barbara County is to improve quality of life and reduce chronic disease related to nutrition and physical inactivity through providing health education and advocating for health in all policies, systems and environments. The LIAs will collaborate to provide education and support to encourage consumption of fruits, vegetables, and water, decrease consumption of sugary beverages, and increase access to safe places to be physically active in the SNAP-Ed qualified sites by September 2019 in support of State Level Goals 1-5. This will be accomplished through evidence-based, comprehensive and behavior focused strategies and interventions which include nutrition education and physical activity promotion (State Level Goals 1, 2, 3) with environmental supports, training and technical assistance (State Level Goals 4, 5), while collaborating with partners to provide direct and indirect education and multi-media messages. The LIAs will promote the current Dietary Guidelines for Americans and SNAP-Ed Intervention strategies that have been shown to change behavior. In addition, the LIAs will work with selected communities and school districts to implement a variety of policy, systems, and environmental change projects designed to improve organizational policies and practices to support healthy lifestyles (State Level Goals 4, 5).

The LIAs are committed to youth and community engagement values and will work to identify and bring out the existing knowledge, wisdom and energy that exists within our communities as the main driver of policy, systems and environmental changes in both school and community settings. Acknowledging that sustainable policy, system and environmental changes takes time and trusting relationships, the LIAs are focusing on four priority communities in Santa Barbara County (Santa Maria, Guadalupe, Lompoc, and lsla Vista) where there is the highest percentage of low-income residents and where LIAs have put in many hours of work building relationships and laying the foundations for broader school and community changes.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Barbara County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

UCCE

Over the 2017-2019 federal fiscal years, UCCE will implement comprehensive school-based nutrition education interventions based on the Social Ecological Model for nutrition and physical activity behavior change. A majority of these comprehensive efforts will take place in Santa Maria. Santa Maria-Bonita (SMBSD) is the primary K-6 school district in the city of Santa Maria. The district includes 20 schools with over 16,000 students and an average free and reduced price meal qualifying rate of 86.5% compared to the California average of 58.6%. All schools in the SMBSD qualify for SNAP-Ed services (lowest percentage of qualifying students is 71.4%). 10,494 students in the district are English Language Learners with a majority speaking Spanish (88.1%) or Mixteco (9.9%) at home.

In order to stay relevant to and address the youth violence concerns of community residents, UCCE has chosen to increase work around youth engagement and foster positive youth and adult partnerships. The benefit of authentic youth-adult partnerships has been documented in the literature[1] as improving individual health and well-being and important to the individuals, communities and societies they live in as a whole. This youth engagement work will focus on allowable SNAP-Ed activities, with a focus on policy, systems or environmental changes led by youth. UCCE will partner with the UC 4-H YDP to increase both programs' capacity and reach in a traditionally underserved community and to promote career pathways whenever possible.

For the purpose of UCCE efforts, comprehensive school programming includes: grade level and evidence-based nutrition and physical activity education curricula through UC staff and educator extenders; parent education and involvement in nutrition education programming; creating support and sustainability for school gardens; connecting with the cafeteria through implementing Smarter Lunchroom Movement strategies, school wide tastings of produce and other menu items, and incorporation of garden and local produce in the school meal program; collaborating with community partners to promote school wide events and health fairs; working with student leaders on youth engagement projects; and participation in School Wellness Policy initiatives and activities.

In addition to UCCE's work focused at school sites, staff will continue to provide trainings with community partners and agencies that serve low-income residents in order to expand reach and sustainability. UCCE currently has staff with expertise in CATCH physical activity programming, UC adult and youth curricula, garden enhanced nutrition education and Smarter Lunchrooms Movement strategies. UCCE will provide trainings and support to teachers and school food service staff, afterschool programs, Promotores, summer meals sites, high school students and community partners in order to expand our reach and encourage sustainability.

PSE strategies:

Santa Maria

- School Wellness: UCCE will work on School Wellness Policy strategies in Santa Maria. UCCE staff participate in the Santa Maria-Bonita School District Wellness Committee. UCCE will focus on site level interventions and implementation including increasing school site representation at District Committee meetings, monitoring and implementing site level changes, and advocating and promoting changes identified through youth engagement projects.
- School Gardens: UCCE will continue to work on school garden interventions as part of comprehensive school services provided at a minimum of 4 school sites. Interventions will focus on providing training, technical assistance, and sustainability planning including collaborating with school staff, students and parents to sustain the school garden. UCCE will work to connect school gardens with the UC Master Gardener programs and other community resources including businesses and funding agencies.
- Youth Engagement: UCCE will work on youth engagement projects at a minimum of 4 elementary school sites over the three-year implementation period in the Santa Maria-Bonita school district in collaboration with the UC 4-H program. Projects will focus on enhancing youth capacity to assess, identify and advocate for healthy site changes.

Guadalupe

- School Wellness: There are two public schools in Guadalupe, with over 1260 students, 87% qualify for the free/reduced meal program. UCCE will focus School Wellness efforts on the Junior High and implementing Smarter Lunchroom strategies there.
- Youth Engagement: UCCE will work with Jr. High youth to identify and advocate for healthy site changes consistent with Smarter Lunchroom Movement strategies.

LHD

The LHDs 2017-2019 work is focused on supporting schools as the heart of health and wellness and working with partners and community members on CX3 PSE interventions, thus the LHDs work can be classified into two areas of focus: Schools and Community.

Schools: By September 30, 2019 increase access to fresh fruits and vegetables and physical activity for at least 40,000 SNAP-ED eligible students and staff in 5 Santa Barbara County School Districts through collaboration, training, and technical assistance on advancing policy, systems, and environmental changes in school districts.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Barbara County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

LHD staff will provide support to administration and staff in the following 5 school districts: Santa Maria-Bonita, Guadalupe, Lompoc, Orcutt, and Goleta to reach approximately 35,000 students via PSE interventions. The LHDs work will focus on providing various health and wellness related trainings to school personnel and participating in school wellness committee meetings to provide TA for school wellness policy revision, adoption, and implementation. In FFY16 the LHD hired a Program Assistant (Kirsten Criswell) whose previous employment experience included providing support to Santa Barbara County School Districts via the Orfalea Foundations School Food Initiative. When the Orfalea Foundation closed in December of 2015, school administrators and community agencies vowed to continue the PSE work initiated and funded by the Orfalea Foundation with a goal to make schools the heart of health and wellness. The Program Assistant will continue to work closely with district officials and staff via her participation in the school wellness committee meetings and in her role as the Live Well Santa Barbara County coalition coordinator.

LHD staff and subcontractors provide direct and indirect education to parents in each of the 5 school districts via collaboration with school administrators. These interventions include the Eat Healthy Be Active Community Workshop series, Rethink your Drink, My Plate, and Harvest of the Month. The LHD subcontracts with three school garden educators in Guadalupe and Lompoc who provide direct garden-based nutrition education lessons, collaborate with school food service staff to provide Harvest of the Month tastings to the entire school, harvest school garden-grown produce to be used in salad bars, tastings, and daily menus, and participate in the school wellness committee meetings. During FFY16 the garden educators provided weekly Great Garden Detective lessons to 3rd and 4th graders in 5 SNAP-ED approved schools reaching 1,200 students.

To support these educational interventions, schools will work to create PSE changes that enhance nutrition education efforts, as well as increase access to and availability of fruits, vegetables, water, and physical activity on school campuses. The LHD will provide trainings on school wellness policy implementation and enforcement, physical activity interventions, Harvest of the Month, My Plate, and Rethink Your Drink, etc., for school staff in order to create program and/or intervention sustainability.

The intervention plan begins with activities that provide comprehensive nutrition and physical activity education for school students, staff, and parents. Direct and indirect educational activities will be provided on school campuses and community sites that serve the low-income school parents WIC, Food Pantries, retail sites, Head Starts, etc.), along with health and wellness related trainings to teachers, school food service staff, and administrators by focusing on the individual and interpersonal levels of the Social-Ecological Model (SEM). In years two and three, the plan progresses to interventions at the organizational level of the SEM which focus on policy, system, and environmental changes at the school district and individual school campuses. The PSE changes will be a product of updating, implementing, and evaluating the local school wellness policies, and will be specific to the needs of the district. This may include promoting access to healthy food, water, and physical activity on school campuses, implementing Smarter Lunchroom Interventions, supporting school-garden based interventions, and ultimately seeing districts and/or school campuses invest money into sustaining the PSEs like school garden education. These organizational PSEs will be supported via the Community level of the SEM which includes Live Well Santa Barbara County coalition members, other school/community partnerships, and local municipalities with HEAL resolution language that includes schools.

Community: By September 30, 2019, with a focus on community and youth engagement strategies, work with applicable stakeholders and sectors to increase availability and accessibility of healthy foods, beverages and physical activity and decrease availability of less healthy foods and beverages in a minimum of three communities.

The LHDs community goal is focused around PSE intervention in the CX3 communities. Since we are in the process of Tier 1 interventions, we cannot clearly state what the community PSE interventions will be--this will be determined once the assessment results are analyzed and shared with community members during year 1 of this integrated work plan. We will survey six CX3 neighborhoods in Santa Maria, Guadalupe, Lompoc, and Isla Vista. Current CX3 projects center around healthy retail interventions in Santa Maria and Lompoc and we plan to continue these efforts in 17-19.

Along with healthy retail interventions in Lompoc, we are planning to assess mobile vending because the Director of Nutrition at the school district is concerned about food trucks and mobile food vendors who are parking in front of the high school and competing directly with the school food program (which is healthier and less expensive).

In Guadalupe and Isla Vista, community agencies and residents are actively pursuing ideas to establish new multi-purpose trails to support physical activity. The LHD will collaborate in these 2 communities to assist these efforts as well as others that are derived from the CX3 results.

The LHD will also collaborate with the Food Bank and other community based organizations to advocate EBT acceptance and market match programs at several qualified Farmer's markets in Santa Barbara County.

Direct and indirect nutrition and/or physical activity education will be provided to support all of the CX3/PSE goals, as well as collaborating with non-SNAP-Ed funded partners to achieve goals. Community engagement is the backbone of our CX3 PSE interventions and we will continue to work with the two community advocacy groups in Santa Maria and plan to create similar groups in the other PSE assessed neighborhoods.

Evaluation Plan

LIAs will evaluate interventions using a mix of formative, process and outcome evaluations.

UCCE

In order to ensure program messages and interventions are relevant to the information needs of the community, UCCE will use formative evaluations (F) including: Pre/Post assessments for specific curricula, the Teacher Observation Tool, the Teacher Tasting Tool, and participant feedback surveys. Several of these tools are also used for Outcome Evaluation (O). Pre and post assessments will be used with 6th grade youth to measure changes in knowledge, behavior and BMI

through collaboration with the Center for Nutrition in Schools and the Shaping Healthy Choices Program (F, O). Pre and post assessments will also be conducted with adults that complete series classes in order to assess current knowledge and behaviors and measure changes before and after interventions (F,O). The Teacher Observation Tool (F,O) will be distributed during the third quarter to assess the teacher's perception of changes in student's behaviors (F,O). Data from the Teacher Observation Tool will be used to identify when specific curriculum is not meeting the needs of the student population and to assist in measuring overall lesson efficacy. The Teacher Tasting Tool (F,O) will be used to assess the students' baseline exposure to various foods and willingness to try new foods again or ask for them at home or at school. Data from the Teacher Tasting Tool are used to make decisions regarding which recipes to demonstrate in the future (F). Participant feedback surveys include qualitative data from participants about the impact of nutrition and physical activity lessons (O) and overall satisfaction with lessons or trainings (F). These surveys are used to improve interventions and trainings (F) and to assess qualitative changes in participant knowledge or behavior as a result of UCCE programming (O). All participant and partner data collected will be used to inform continuous program improvements.

Environmental level evaluations will be used to identify priorities (F) and track changes over the period of implementation (O). Tools used will include the Smarter Lunchroom Self-Assessment Scorecard and the Shaping Healthy Choices Self-Health Check.

In addition to formative and outcome evaluation, UCCE will conduct required process evaluations including recording activities implemented, sites, number and demographics of participants reached through the Reporting Tools Workbook. UCCE will track staff hours conducting direct nutrition education, trainings, indirect education and other obesity prevention services. UCCE will also track educator extender hours through the quarterly Nutrition Activity Reporting Forms.

Data will be used to prepare a RE-AIM report on comprehensive school-based interventions in order to understand the resources required and the outcomes attained through these interventions. UCCE will report on these evaluation findings in the Annual Report. In addition success stories will be shared with the CalFresh State Office, local partners and through other UC channels including the UCANR Food Blog and UC Delivers.

LHD

Formative Evaluation

Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessments will be collected in 6 communities where NEOP funded interventions in school and retail sites are planned. The assessment data will be analyzed by the LHD and data will be shared with community members, retail owners, and community partners to identify and support CX3/PSE goals.

Process & Outcome Evaluation

Process evaluation will capture reach of SNAP-Ed interventions and progress towards achieving activities and goals via the Activity Tracking Form, EARS and SAAR reports. Information attained from these evaluation activities will be used to identify successes and challenges which will be utilized to inform program

implementation. PSE efforts will be monitored using the RE-AIM framework to asses reach, effectiveness, adoption, implementation, and maintenance of all school and CX3 PSE changes.

Impact & Outcome Evaluation

Impact Outcome Evaluation (IOE) of nutrition education series with adults and/or youth will be conducted using the Food Behavior Checklist, Rapid Assessment of Physical Activity (RAPA) or Youth Nutrition and Physical Activity Survey. A matched pre-post evaluation design will be used to collect data from individual participants. These evaluation tools include several USDA indicators from the WRO Evaluation Framework such as knowledge/attitude of eating healthy foods and drinking healthy beverages, as well as shopping, physical activity and consumption behaviors.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	40%		0 to 4 years old (Preschool):	
Female	60%		5 to 17 years old (School Age):	35,000
			18 to 59 years old (Adult):	5,000
			60 years old and over (Senior):	500

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, with a focus on community) and youth engagement strategies, work with applicable stakeholders and sectors to increase availability and accessibility of healthy foods, beverages and physical activity and decrease availability of less healthy foods and beverages in a minimum of three eligible communities.

SNAP-Ed State Goals :

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Improve access to physical activity through safe routes to school, school wellness policies, stenciling or other environmental changes
- Improve access to and/or desire for fruits and vegetables through healthy food marketing and smarter lunchrooms movement work
- Healthy Retail, Farmers Markets, Mobile Vending, Active Transportation

III. ***Annual Objectives to support the*** **Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, work with a minimum of 12 youth at two eligible pilot school sites to assess, identify and advocate for at least one change in their school or community that promotes increased access to physical activity and/or healthy foods or beverages.
    b. By September 30, 2017, LHD will analyze CX3 data in 4-6 communities and share results with key stakeholders.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, work with youth at three school sites to assess, identify and advocate for at least one change in their school or community that promotes increased access to physical activity and/or healthy foods or beverages.

    b. By September 30, 2018, LHD will collaborate with stakeholders to identify CX3 community goals in 4-6 communities and develop a plan of action to reach goals.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, work with youth at three school sites to assess, identify and advocate for at least one change in their school or community that promotes increased access to physical activity and/or healthy foods or beverages.

b. By September 30, 2019, at least three eligible CX3 community sites will have adopted and implemented at least one PSE change.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Barbara County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, with a focus on community and youth engagement strategies, work with applicable stakeholders and sectors to increase availability and accessibility of healthy foods, beverages and physical activity and decrease availability of less healthy foods and beverages in a minimum of three eligible communities.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Collaborate with partners such as: Public Health Institute, afterschool programs and UC 4-H Youth Development Program to recruit a minimum of 12 youth leaders to participate in a year-long youth engagement project (using materials from PowerPlay, Smarter Lunchrooms Movement and Public Health Institute) at two schools in year 1, and three schools in years 2 and 3. Provide weekly training, support and technical assistance to youth leaders to assess, prioritize and advocate for healthy site changes in their school or community. By year 3, youth from 3 pilot schools will have presented their findings and promote proposed or implemented solutions to policymakers and/or decision-makers. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019 increase access to and consumption of fresh fruits and vegetables and physical activity for at least 40,000 SNAP-ED eligible students and staff in 5 Santa Barbara County School Districts through collaboration, training, and technical assistance on advancing policy, systems, and environmental changes in school districts.

SNAP-Ed State Goals :

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above: School wellness policies, Smarter Lunchroom Movement interventions, outdoor environmental learning centers (School Gardens), structured physical activity, safe routes to school, playground stencils and nutrition education murals.**

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By Sept 30, 2017 participate in five school wellness policy committees to update the school wellness policies and present to the school boards for adoption.
    b. By Sept 30, 2017 provide direct and indirect nutrition education to students and parents in 5 school districts to reach at least 1,000 eligible participants
    c. By Sept 30, 2017 collaborate with partners to provide at least 3 school wellness related trainings (CATCH, School Wellness Policy, Rethink your Drink, Harvest of the Month, Parents in Action, etc.) to reach at least 300 school district staff.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, provide direct and indirect education to students and parents in 5 school districts to reach at least 4,000 eligible participants.
   b. By September, 30, 2018, at least 4 school districts will assess their school wellness policies and choose 1-3 wellness related goals to achieve.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, provide direct and indirect education to students and parents in 5 school districts to reach 5,000 eligible participants.
   b. By September 19, 2019, 5 school districts will have adopted at least one nutrition or physical activity related PSE change at their school campuses.
   c. By September 19, 2019, at least 2 school districts will allocate LCAP funds to district wellness initiatives in order to sustain efforts on advancing nutrition and PA related policy, systems, and environmental changes in school districts

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):
By September 30, 2019 increase access to fresh fruits and vegetables and physical activity for over 40,000 SNAP-ED eligible students and staff in 5 Santa Barbara County School Districts through collaboration, training, and technical assistance on advancing policy, systems, and environmental changes in school districts.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Attend at least 4 school wellness committee meetings per year in each of the 5 qualified school districts to support school wellness policy development, adoption, implementation, and evaluation. Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

County Name: Santa Clara County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	California Department of Public Health: CDPH: (Santa Clara County Public Health Department: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
X	Catholic Charities of California: CCC: (Catholic Charities Santa Clara County)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Santa Clara County is located in the San Francisco Bay Area and has a population of 1,788,393, with 22% being SNAP-Ed eligible (income ≤185% FPL). Of the 389,118 SNAP-Ed eligible individuals living in Santa Clara County, 49.1% are Hispanic, 23.7% Asian, 21.5% White, 3.2% African American, 0.5% Native Hawaiian/Other Pacific Islander, 0.3% American Indian/Alaska Native, and 1.8% multi-racial or another race. Over 100 languages are spoken by Santa Clara County residents, with the primary languages being English, Spanish, Vietnamese and Chinese. According to the US English Foundation, Santa Clara County has the sixth largest Spanish-speaking population (275,440 speakers), second largest Vietnamese-speaking population (89,175 speakers), and third largest Chinese- speaking population (64,805 speakers) in California.

Of the 372 eligible census tracts in Santa Clara County, 23 (6.2%) are SNAP-Ed eligible (≥50% incomes ≤185% FPL) based on all races data for 2007-2011 and 2008-2012. Of the 436 schools in Santa Clara County, 175 (40%) are SNAP-Ed eligible (≥50% FRPM Enrollment, 2015).

Santa Clara County has a food insecurity rate of 13.4% overall, and 19.5% among children. As of January 2015, 111,985 individuals, 6.3% of Santa Clara County's total population participated in CalFresh. According to Feeding America, the average cost of a meal in Santa Clara County is $3.04, which is higher than both the California ($2.80) and National ($2.74) averages.

In Santa Clara County, the prevalence of overweight or obesity in adults is 56.4% overall, and 65.2% for SNAP-Ed eligible adults. Among low-income children, 33.9% of 2-4 year olds and 41.8% of 5-19 year olds are overweight or obese. Among teens, 31% ate five or more servings of fruits and vegetables per day. Only 9% of children ages 2-11 and 9% of adults ate 2 or more servings of fruit and 3 or more servings of vegetables per day in the past 30 days. Among SNAP-Ed eligible residents, 52.9% of adults and 56.7% of children and teens (ages 2-17) ate fast food one or more times in the past week.

Almost one third (30%) of adults overall, and half of Hispanic adults (49%), consumed one or more sugar-sweetened beverages on the previous day. Among children and teens ages 2-17, 33% consumed one or more sugar-sweetened beverages per day. Access to healthy foods and beverages and physical activity opportunities is difficult for many SNAP-Ed eligible adults. The majority (71%) of adults with an annual household income of less than $20,000 per year report difficulty accessing fruits and vegetables at their workplace. Only 15% of adults reported healthy foods available in their worksite vending machines. Approximately half of Santa Clara County residents reported access to indoor and outdoor facilities that make it easier to be physically active during the work hours; however, fewer Latinos (20%) reported such access.

Santa Clara County is taking part in the Healthy Stores for a Healthy Community campaign, which is a collaboration between tobacco use prevention, nutrition, and alcohol prevention partners. In 2013, surveys of 134 stores in Santa Clara County that sell tobacco products were assessed to look at product marketing and the availability of healthy and unhealthy options. More than half (56%) of the stores surveyed sell sugary drinks at the check-out. This is even

higher (65.3%) for stores located near schools. Over three-quarters (77.6%) of stores had candy placed on or next to the checkout area. Only 37.3% of stores surveyed had any fresh fruit or vegetables available. Outside advertisements were also much more prevalent for sugary drinks (40.3% of stores) compared to the promotion of healthy beverages (14.2% of stores) and fruit or vegetables (2.2% of stores). Only 38.1% of the stores surveyed accept CalFresh or WIC. In FFY 15, LHD staff conducted CX3 surveys of 20 retail stores serving the SNAP-Ed eligible population. Of those 20 stores, only 45% had a quality score of 75 or above.

Many Santa Clara County residents are not getting the recommended amounts of physical activity. Only about half (58%) of adults in Santa Clara County met the Centers for Disease Control and Prevention (CDC) recommendations of at least 150 minutes of moderate intensity, or 75 minutes of vigorous intensity, aerobic activity per day. Less than one quarter (17.3%) of children ages 5-11 in Santa Clara County, compared with 32.6% in California, meet the recommendations of being physically active for at least one hour every day. During the 2014-15 school year, only 27%, 35%, and 41% of fifth, seventh, and ninth grade students, respectively, met the physical fitness standards for students in California. The percentage of Latino youth meeting the standards was even lower, with 18%, 22%, and 30% of fifth, seventh, and ninth grade students, respectively, meeting State standards.

Other nutrition-related programs serving low-income residents in Santa Clara County include the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), Head Start Program, National School Lunch and School Breakfast Programs, Child and Adult Care Food Program, the Summer Food Service Program, Senior Nutrition Program, and Expanded Food and Nutrition Assistance Program (EFNEP).

4. **Community Assessment**

Much of the community assessment data used in the jurisdiction description comes from the SNAP-Ed County Profiles prepared by CDPH, which includes County-level data from a variety of sources including the American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends Data, and the California Health Interview Survey (CHIS). The 2014 Obesity and Physical Activity Report prepared by the Santa Clara County Public Health Department (SCCPHD), which contains data from sources such as the California Dietary Practices Survey and California Department of Education FITNESSGRAM, was also used as a source of local data. Additional data sources include the Santa Clara County 2013-14 Behavioral Risk Factor Surveillance System, Feeding America's Map the Meal Gap 2012, the US English Foundation Research, CDPH Healthy Stores for a Healthy Community Campaign, and CDPH CX3 data.

Based on local data, low fruit and vegetable consumption among all age groups helped to inform the decision to select a Harvest of the Month produce item as part of the CNAP monthly themes to help reinforce the key MyPlate message, "make half your plate fruits and vegetables." In addition to the poor fruit and vegetable consumption data, sugar-sweetened beverage consumption data also helped in the decision to focus messaging on both healthy food and beverages.

Data on food and beverage consumption in children also helped with selecting PSE strategies related to school/community gardens, school wellness policies, and participation in the Smarter Lunchrooms Movement. With the low rates of physical activity among Santa Clara County residents, physical activity promotion will be incorporated into many of the interventions. The data indicating the high average cost of a meal in Santa Clara County illustrates the increased importance of including a food security and food resource management component in interventions targeted towards low-income individuals, and was taken into account during the development of objectives and activities.

Interventions conducted and materials utilized will be reflective of the primary languages spoken throughout Santa Clara County. Bilingual/bicultural staff from UCCE, CCC, and LHD will conduct activities in sites across the County to best meet the needs of the SNAP-Ed eligible communities.

Data indicating difficulty accessing healthy foods and beverages and physical activity opportunities in the workplace indicate the need for the PSE strategies to support the development and implementation of healthy food and beverage standards and procurement policies as well as supporting structured physical activity in SNAP-Ed eligible sites. The 2013 Healthy Stores for a Healthy Community Campaign and CX3 data both indicate the need for interventions in the retail environment, and help to indicate areas in which to focus. Partnerships with other programs within Santa Clara County will help to further the reach and impact of the retail interventions being conducted locally.

5. **Community Change Goals**

There are several health-related guiding documents currently in use in Santa Clara County. They all support community change goals that align with the California SNAP-Ed's overall goal of improving SNAP-Ed-eligible families' healthy food and physical activity choices. These documents include the Santa Clara County's General Plan, the Santa Clara County Public Health Department Strategic Plan 2015-2018, and the Community Health Improvement Plan (CHIP).

Santa Clara County's General Plan contains a Health Element section. It emphasizes collaborative, comprehensive approaches to planning for community health which was based on several County needs assessments and input from key stakeholders. Santa Clara County recognizes that the environments where people eat, live, learn, work play and shop strongly influence personal health behaviors. The community change goals reflect this, as they aim to make the environment in Santa Clara County more conducive to making healthy choices the easy choices. Strategies from the Healthy Eating, Food Access, and Sustainable Food Systems and Recreation and Physical Activity sections of the Health Element to the General Plan were selected based on the community assessment data and relevance to SNAP-Ed work in Santa Clara County.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

The community change goals that have been identified for Santa Clara County are:

1. Promote urban agriculture

a. Support the expansion of various forms of urban agriculture, including community gardens
b. Encourage the development of new urban agriculture sites in low-income and underserved neighborhoods and combine programs on urban agriculture with food production safety, food literacy and nutrition education
c. Collaborate with school districts to expand opportunities for agriculture, curriculum integration, and allow community gardens on school property

2. Support a variety of healthy food outlets within neighborhoods and communities

a. Promote healthy food access throughout the County, particularly in underserved neighborhoods
b. Promote improved access to healthy food options through healthy food retail establishments
c. Support and collaborate with organizations to implement practices, education, and policies to increases access to healthy food and beverages
d. Support and promote the availability and accessibility of clean drinking water and water bottle-filling stations in public facilities, businesses and schools

3. Reduce food insecurity and hunger

a. Support expanded participation in federal food assistance programs
b. Promote farmers markets, community-supported agriculture, and healthy food retail outlets that accept payment mechanisms for food assistance programs
c. Support efforts to meet the nutritional needs of older adults

4. Promote healthy eating and food literacy

a. Promote healthy food and beverage standards and procurement policies
b. Support and promote healthy food options, nutrition education, and food literacy
c. Support improved nutrition standards and healthy food offerings in school food services
d. Encourage and assist businesses in creating breastfeeding friendly workplaces

5. Enhance programs in cities, school districts, the County, other agencies, and workplaces that promote physical activity and wellness at all ages and physical abilities

a. Promote and support the development of programs that encourage underserved communities and people with health issues to use parks and recreational facilities
b. Encourage school district activities and related programs that support physical activity and wellness
c. Promote awareness and access to programs and activities

Santa Clara County Public Health Department *Strategic Plan 2015-2018* identifies priorities as well as a roadmap for how to address these priorities. It is not a comprehensive listing of services and activities, but rather a plan of where the Department wants to affect change and allocate resources. Priorities and goals include:

1. Engage partners and communities to improve community health;
2. Advance racial and health equity to eliminate health disparities;
3. Strengthen prevention and response to current and emerging infectious diseases;
4. Strengthen organizational capacity for accountability and transparency;
5. Successfully communicate the value of the Public Health Department and public health; and
6. Promote a robust prevention-oriented countywide health system.

Facilitated by the Santa Clara County Public Health Department, the *Community Health Improvement Plan* (CHIP) is an action-oriented plan for addressing the most salient issues identified by the Community Health Assessment (CHA) to improve the health and well-being of Santa Clara County residents. Collaboration and partnership with a broad base of community partners resulted in the identification of the top health priority: Chronic Disease/Healthy Eating & Active Living.

Focus Area: Access to Healthy Food and Beverages

Goal 1: Increase consumption of healthy food and beverages and decrease consumption of unhealthy options through education, policy, systems and environmental change.

Objective 1: Increase consumption of the daily recommended servings of fruits and vegetables daily by 5% from baseline for children, adolescents, and adults by 2020.

Objective 2: Reduce consumption of sugar-sweetened beverages by 15% from baseline for children, adolescents, and adults by 2020.
Objective 3: Reduce consumption of unhealthy foods by 5% from baseline for children, adolescents, and adults by 2020.

Goal 2: All residents will have a community conducive to safe physical activity, mobility, and social connectedness.
Objective 1: Increase the proportion of children, adolescents, and adults who meet daily physical activity recommendations by 5% from baseline by 2020.
Objective 2: Increase the percent of youth and adults using safe active transportation to school and work by 5% from baseline by 2020.
Objective 3: Increase the percent of respondents who spend hours per week outside of the home in a social environment by 2020.

Goal 3: Prevent and manage chronic disease by improving the continuum of care across health care and community settings.
Objective 1: Decrease overweight and obesity by 5% from baseline for patient populations by 2020.
Objective 2: Decrease the prevalence of diabetes by 5% from baseline in Santa Clara County by 2020.

All three organizational and community documents support and align with one another. All community change goals are multi-year goals that require the support of external partners and funding streams. The Santa Clara County LIA's work plan supports these larger community change goals. The three local objectives for FFY 2017-2019 that the LIAs have selected are:

1) By September 30, 2019, 46 SNAP-Ed eligible sites will strengthen or improve implementation of existing wellness policies and/or practice and standards to support improved physical activity behavior and increased consumption of healthy food and beverages for SNAP-Ed eligible participants, their families, and site employees who impact the environment.

2) By September 30, 2019, coordinate and collaborate with at least 7 partner agencies in the community to coordinate consistent nutrition and physical activity messaging and improve environments to increase opportunities for healthy eating and physical activity for SNAP-Ed eligible participants.

3) By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 10 SNAP-Ed qualifying neighborhood retail stores.

While the majority of the community change goals relate to the entire population within the County, the LIAs will focus their efforts on serving the SNAP-Ed eligible population. Additional partners and funding streams within Santa Clara County will also contribute to both the community change goals and local objectives identified by the Santa Clara County LIAs.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Project (CNAP) Partners or comparable]**

The Santa Clara County LIA Partnership includes Santa Clara County Public Health Department, University of California Cooperative Extension, and Catholic Charities of Santa Clara County. The LIA partners coordinate and collaborate on serving the SNAP-Ed eligible population in Santa Clara County by working together to create the integrated work plan and complete its activities. For the past four months, the LIA's have met in person once a week to work together in the design of this Integrated Work Plan.

One of the key partnerships related to nutrition education and obesity prevention efforts within Santa Clara County is the CNAP. In addition to the LIA partners, the CNAP group consists of additional Food and Nutrition (FNS) funded and unfunded partners, including Expanded Food and Nutrition Education Program (EFNEP), Women Infant Children (WIC) Program, The Health Trust (THT), Santa Clara County Social Services Agency - Senior Nutrition Program, FIRST 5 of Santa Clara County, Community Alliance with Family Farmers (CAFF), Second Harvest Food Bank of Santa Clara & San Mateo Counties, California Dairy Council, the American Heart Association, and Healthier Kids Foundation.

The goals of the CNAP group are to coordinate interventions and efforts among the partners to utilize consistent nutrition and physical activity messaging, improve access to healthy and affordable food and beverages, and disseminate information on access and availability of food and nutrition assistance programs to the SNAP-Ed eligible population. The CNAP group will meet at least four times and collaborate on at least 3 joint activities during the year. In addition, training to increase CNAP member skills and staff capacity to support improved physical activity behavior and increased consumption of healthy food and beverages will be provided.

In order to promote consistent messaging and avoid duplication of services, the Santa Clara County CNAP partners compiled a calendar of monthly themes that launched in FFY15, which includes: 1) MyPlate 10 tips sheets, 2) HOTM produce items, and 3) physical activity components, that each of funded partners promotes in a variety of ways to complement their other interventions. In order to further the reach of the consistent messaging, the Santa Clara County CNAP group encourages unfunded partner organizations in the community to also promote and utilize the monthly themes. Biannual trainings are held to train providers on simple ways they can implement the monthly themes within their respective organization. The monthly themes initiative has gained a great deal of interest both countywide and state-wide, and numerous partnerships have been formed as a result. In FFY15, for example, the CNAP partnered with Eatfresh.org on the monthly themes in ways such as Eatfresh.org providing monthly recipe cards with a recipe featuring the HOTM produce item selected to coincide with the selected HOTM items. Also in FFY15, the HOTM produce calendar was redone in collaboration with CAFF and with the Second Harvest Food Bank. This collaboration ensured that the HOTM item was being grown locally by farmers in the area, was being sold in local stores, and was being distributed by Second Harvest Food Bank. To further the consistent messaging, school districts' food services were also made aware of the selected HOTM items so that the identified monthly produce item could be served in the cafeterias at the same time that the produce item was being taste tested in school

classrooms in conjunction with the nutrition education classes. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as county welfare departments.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2016** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The three local LIAs in Santa Clara County – UCCE, CCC, and LHD – will coordinate and collaborate on multi-level interventions that aim to increase consumption of healthy food and beverages and decrease the consumption of unhealthy food and beverages (State Level Goal 1); increase physical activity (State Level Goal 2); improve food resource management (State Level Goal 3); increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop (State Level Goal 4); and increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations (State Level Goal 5).

Intervention strategies will meet evidence-based standards for research-tested, practice-tested or emerging programs. The interventions conducted and materials utilized will be reflective of the primary languages spoken throughout Santa Clara County, and each of the LIAs, have bilingual/bicultural staff. The LIAs will utilize

Community/Nutrition Education Direct (CED), Community/Nutrition Education Indirect (CEI), Media, Social Media, Public Relations and Messaging (MPR), Coordination and Collaboration (C&C), and Training and Technical Assistance (TTA) intervention strategies. Each of the local objectives has multiple PSE strategies that support it, such as healthy food and beverage standards, structured physical activity policies, school wellness policies, smarter lunchrooms, healthy retail, and school/community gardens. Local objectives and activities included in the work plan were selected based on needs assessment data, countywide goals identified in planning documents such as the Health Element to the General Plan, and information from the FFY16 integrated work plan.

Local Objective 1 supports State Level Goals 1- 5 by providing education on healthy food and beverages, physical activity and food resource management to the SNAP-Ed eligible population in Santa Clara County. CED and CEI will be provided to youth and adults by all three LIAs using evidence-based interventions and approved materials at SNAP-Ed eligible sites throughout the County. TTA will be used by all three LIAs to providers working with the SNAP-Ed eligible population. UCCE places a strong emphasis on training extenders in their youth programs. Extenders in the youth programs include: elementary school teachers, preschool teachers, after school leaders, and Playworks coaches. UCCE educators will continue to provide support to teachers and extenders throughout the year and will provide food tastings and cooking demonstrations in addition to modeling lessons. LHD will also train staff from a variety of organizations serving the SNAP-Ed eligible population, such as parks and recreation centers, schools/afterschool programs, community-based organizations and health clinics, on nutrition and physical activity.

The healthy food and beverage standards PSE strategy supports Local Objective 1 because it helps to make it easier for participants to make the healthy choices which is emphasized during the nutrition education sessions provided at the SNAP-Ed eligible sites where the LIAs are working. The school wellness policies, smarter lunchrooms, and school/community gardens PSE strategies support activities that are tied to the youth-focused nutrition education classes and activities conducted on the school campuses as appropriate by all three agencies. Activities such as store tours, food demonstrations, and educational materials in retail environments are supported by the healthy retail PSE strategy.

In support of State Level Goal 2, all three agencies will support PSE strategies that promote structured physical activity. For example, CCSC will provide participants with PA opportunities and classes, as an example ZUMBA. UCCE and LHD will provide direct PA education, support, and training for structured physical activity, as an example, CATCH and SPARK.

The types of organizations will depend on the existing relationships established between the LIAs and their approved sites. Sites were distributed based on geographies and sectors that are best suited to each LIA partners' capacities and staff expertise. Based on the work that is being done in the area of organizational wellness (food, beverage, and physical activity standards or policies) by the Santa Clara County Department of Public Health [supported by a Centers for Disease Control & Prevention (CDC) Partnerships to Improve Community Health (PICH) grant, County General Funds, and Kaiser Permanente Northern California Region grant funding], the LHD is coordinating with other Public Health Department staff (and grant subcontractors) to identify who will work with which organizations to avoid duplication and maximize overall County reach. LHD will be working with organizations to ensure that SNAP-Ed eligible clients, patients, students, families have access

to healthy environments (healthy food, healthy beverages, and opportunities for physical activity]. UCCE is working primarily with their school partners and CCC is working with their parent organization and afterschool sites.

Local Objective 2 focuses on coordination and collaboration and primarily supports State Level Goals 1-5. All three LIAs participate in the CNAP group. UCCE and LHD also participate in additional collaboratives and work groups. Coordination and collaboration related to consistent nutrition and physical activity messaging is described in Section 7: Partnerships and Collaborative Efforts. The healthy food and beverage standards; structured physical activity; school wellness; and healthy retail PSE strategies help to support this local objective as the LIAs coordinate and collaborate not only with each other on these PSE strategies, but also with other non-SNAP-Ed funded programs within Santa Clara County through activities such as participating in collaboratives and work groups. The CNAP partners will work jointly on trainings related to nutrition, physical activity, food resource management, and/or food security, such as the biannual Santa Clara County Nutrition and Physical Activity Monthly Themes Trainings and the annual Food Assistance Training. These trainings allow CNAP partners and other partners throughout Santa Clara County to link and leverage their efforts, avoid duplication and maximize reach, and bring their organizations' specific focus, expertise, and resources to the providers attending the trainings.

In order to avoid duplication of services, the LIAs have worked together to develop a comprehensive list that outlines which agency is serving which approved sites. The list takes into account expertise and language capacity, so that each organization is matched with the LIA that can best serve the sites' needs. When a LIA identifies a new site that they would like to work with, they email the CNAP coordinator (LHD staff) the name and address of the site, as well as the types of services they plan to provide (i.e. direct education, indirect education). The CNAP coordinator then emails the information to the rest of the LIA's who have one week to respond on whether or not they agree to having the requesting agency work with the new site. Once the LIA's have agreed who may work with the new site, the requesting agency seeks approval from their SIA and once approval is received, the LIA begins working with the new site. If a LIA is approached by a site that they feel would be better served by another LIA, they refer the site to the appropriate agency. When two or more agencies are interested in working at the same site, they work together to ensure that duplication of services does not take place and that the most appropriate LIA is selected.

Local Objective 3 addresses State Level Goals 1, 3, and 4 and focuses on increasing opportunities for healthy eating and physical activity for the SNAP-Ed eligible population in Santa Clara County. All three LIAs will provide technical assistance to SNAP-Ed eligible sites in the development and implementation of healthy food and beverage, physical activity and/or school wellness policies. LHD will work to improve the retail environment and increase CX3 scores of SNAP-Ed eligible retailers by providing support to retailers in a variety of areas including: selling a variety of good quality fruits and vegetables; displaying materials promoting healthy food and beverages; displaying fruits, vegetables and healthy options outdoors; removing advertisements for unhealthy food and beverages; removing high fat/high sugar food items from checkout areas; and/or accepting and promoting acceptance of CalFresh and WIC Checks. Staff from both UCCE and LHD have been trained on the Smarter Lunchrooms Movement and are working to identify opportunities in preschools, schools, and afterschool programs where they can implement some of the Movement's best practices. Plans are being made to begin this work with simpler, but very effective practices such as encouraging students to choose and eat more vegetables by naming the vegetables with catchy names. In some cases, this work will be done directly with the preschool teachers and in the preschool classrooms,

as the students are eating there and not in cafeterias. All three agencies will also promote school and community gardens in low-income neighborhoods that are integrated with nutrition education.

In FFY17, LHD will conduct community assessments using Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX3) tools. CX3 Assessments will be conducted in at least 7 neighborhoods. The identified neighborhoods include:

- Alum Rock, San Jose
- Brookwood Terrace, San Jose
- Gilroy
- Sunnyvale
- Tully, San Jose
- University, San Jose
- Washington – Guadalupe, San Jose

These 7 neighborhoods were selected based on local data, community need, and community readiness, and are where LHD plans to focus the majority of their intervention activities during FFY17-19. Throughout the CX3 process, community members will be engaged. A post-intervention CX3 reassessment is planned in FFY19.

All LIAs will conduct a process evaluation to document activities implemented, sites, number and demographic characteristics of participants reached for the SNAP Education and Administrative Reporting System (EARS).

LHD will conduct an impact outcome evaluation (IOE) for a series of nutrition and physical activity classes to SNAP-Ed eligible afterschool programs. LHD will use the Youth Nutrition and Physical Activity Survey, which addresses indicators from the Western Region's SNAP-Ed evaluation framework, such as MyPlate Behaviors (MT1) and Physical Activity Behaviors (MT3). The RE-AIM framework will be used by LHD to evaluate the healthy food and beverage standards, structured physical activity, school wellness and healthy retail PSE strategies, and will address indicators such as Partnerships (ST6), Nutrition Supports Adopted (MT4) and Physical Activity Supports Adopted (MT5).

CCSC will use the 2014 Network Youth Survey with students in grades 3rd to 8th in the nutrition education intervention. The Youth Survey measures change in fruit and vegetable consumption, change in unhealthy food consumption, consumption of sugar sweetened drinks, and physical activity.

UC CalFresh (UCCE) utilizes research-based age specific curricula in the classroom with youth participants. The Teacher Observation Tool (TOT) and the Teacher Tasting Tool (TTT) are the two most commonly used tools in the UC CalFresh youth program. The TTT surveys the student's to assess whether the students have ever

tasted the food offered in a taste test before as well as their willingness to try the food again. The TOT surveys is used by the teachers to assess their perception of students' behavior change concerning healthy foods and physical activity as well as to their own change in behavior in regard to encouraging their students to consume healthy food items and participate in physical activity. At schools where the Smarter Lunchrooms Movement techniques are implemented, a pre & post scorecard will be used to document the changes.

UC CalFresh's (UCCE) adult evaluations include pre & posttests specific to adult research-based curricula in series-based lessons such as Plan, Shop, Save and Cook. These assessments measure knowledge gain and behavior change. For single session workshops, UC CalFresh utilizes intent to change (ITC) surveys to measure the participants' readiness to change behavior. Single session workshops also include qualitative success stories. For process evaluation, UC CalFresh submits quarterly reporting tools - youth and adult workbooks with number of participants and site details. UCCE will be working with UC CalFresh State office to align, as appropriate, evaluation tools and results to the Western Region's SNAP-Ed Evaluation Framework.

Evaluation results will be used to improve services for all local objectives and interventions strategies. Evaluations measuring participants reached, knowledge gain, participant behavior change or intent to change, and site improvements will provide important feedback on the plan's outcome and effectiveness. This information will be used in program planning, management, and decision making, including curriculum selection and the identification of potential areas of improvement. Examples for how specific UCCE evaluation results are used include the following: direct education evaluation results are compared to curriculum-specific SMART outcome objective to assess program effectiveness, information about participants' current behaviors from the ITCs are used to select future workshop topics, results from the taste test tools helps in the selection of future foods to feature and SLM Self-Assessment Scorecard results are used to identify promising new cafeteria changes that support the direct education delivered in the classroom. Examples of how LHD will use evaluation results include: sharing information with the teachers, schools, and school districts that nutrition education is delivered. LHD staff will also use the evaluation results for success stories to be shared not only with their SIA but with the schools and school districts that these success stories occur.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, 46 SNAP-Ed eligible sites will adopt, strengthen or improve implementation of existing wellness policies and/or practices and standards to support improved physical activity behavior and increased consumption of healthy food and beverages for SNAP-Ed eligible participants, their families, and site employees who impact the environment.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness
- Structured Physical Activity
- Worksite Wellness
- Healthy Food and Beverage Policies
- Smarter Lunchroom Movement
- Gardening
- Safe Routes to School
- Farm to School

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, identify 15 sites that are being provided nutrition education that have the capacity to improve upon current wellness policy implementation as it relates to physical activity and to consumption of healthy food and beverages.

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, identify an additional 15 sites that are being provided nutrition education that have the capacity to improve upon current wellness policy implementation as it relates to physical activity and to consumption of healthy food and beverages.

    b. By September 30, 2018, 23 SNAP-Ed eligible sites develop an implementation plan and build site capacity to strengthen or improve adherence to existing wellness policies in order to support improved physical activity behavior and/or improved consumption of healthy food and beverages.

3. **FFY 2019 (Year 3) Objective(s):**

    a. By September 30, 2019, identify an additional 16 sites that are being provided nutrition education that have the capacity to improve upon current wellness policy implementation as it relates to physical activity and to consumption of healthy food and beverages.

    b. By September 30, 2019, 23 SNAP-Ed eligible sites develop an implementation plan and build site capacity to strengthen or improve adherence to existing wellness policies in order to support improved physical activity behavior and/or improved consumption of healthy food and beverages.

    c. By September 30, 2019, staff and participants at 46 SNAP-Ed eligible sites will have greater awareness of wellness policies and are knowledgeable of strategies for implementing them, resulting in greater adherence and increased physical activity and increased consumption of healthy food and beverages.

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, 46 SNAP-Ed eligible sites will strengthen or improve implementation of existing wellness policies and/or practice and standards to support improved physical activity behavior and increased consumption of healthy food and beverages for SNAP-Ed eligible participants, their families, and site employees who impact the environment.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Year 1 Assess 15 sites Year 2 Assess 15 sites; Implement 23 sites Year 3 Assess 16 sites; Implement 23 sites Year 1: Identify and assess existing wellness policies and its current implementation as it relates to healthy food and beverage standards and physical activity at 15 SNAP-Ed eligible sites. Years 2 and 3 Reassess target list from Year 1 to ensure that all sites are working toward improvement and add additional sites as needed. Years 2 and 3: Implement site environment assessments as it pertains to physical activity and healthy food and beverage standards; including the development of an action plan to address identified areas in which changes are needed. Action plans may include the development and/or engagement of site wellness committees and/or parent advisory groups and to provide coordinated school health training and environmental changes that includes PA and/or environmental changes that will increase consumption of healthy food and beverages.	x CED x CEI MPR x C&C x TTA	CWD X LHD AAA X UCCE X CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 X, Q2 X, Q3 X, Q4 X Year 2 Q1 X, Q2 X, Q3 X, Q4 X Year 3 Q1 X, Q2 X, Q3 X, Q4 X	-Activity Tracking Form (ATF) -Policy, Systems, Environment Change (PSE) report -Smarter Lunchroom Movement (SLM) Score Cards -Reporting Tool Workbook (RTW) -Additional evaluation tools utilized

	Year 2: Work with school and district level wellness committee to utilize existing nutrition and PA info sheets, and best practices.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, coordinate and collaborate with at least 7 partner agencies in the community to coordinate consistent nutrition and physical activity messaging and improve environments to increase opportunities for healthy eating and physical activity for SNAP-Ed eligible participants.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness
- Structured Physical Activity
- Worksite Wellness
- Healthy Food and Beverage Policies
- Smarter Lunchroom Movement
- Gardening
- Safe Routes to School
- Farm to School

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, provide 1 training that will increase CNAP member skills and staff capacity to support improved physical activity behavior and increased consumption of healthy food and beverages.
    b. By September 30, 2017, engage 50 staff members at partner agencies including regional partners beyond Santa Clara County to coordinate nutrition and physical activity interventions such as the Santa Clara County Monthly Themes Toolkit.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, provide 2 trainings that will increase CNAP member skills and staff capacity to support improved physical activity behavior and increased consumption of healthy food and beverages.
    b. By September 30, 2018, engage 50 staff members at partner agencies including regional partners beyond Santa Clara County to coordinate nutrition and physical activity interventions such as the Santa Clara County Monthly Themes Toolkit.

2. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, provide 3 trainings that will increase CNAP member skills and staff capacity to support improved physical activity behavior and increased consumption of healthy food and beverages.
    b. By September 30, 2019, engage 50 staff members at partner agencies including regional partners beyond Santa Clara County to coordinate nutrition and physical activity interventions such as the Santa Clara County Monthly Themes Toolkit.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, coordinate and collaborate with at least 7 partner agencies in the community to coordinate consistent nutrition and physical activity messaging and improve environments to increase opportunities for healthy eating and physical activity for SNAP-Ed eligible participants.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Attend and/or convene CNAP group at least four (4) times per year to coordinate nutrition and physical activity interventions. Includes close collaboration with CAFF to align nutrition education and food tastings with regional farm to school efforts.	CED: ; CEI: ; MPR: ; C&C: x; TTA:	CWD: ; LHD: X; AAA: ; UCCE: X; CCC: X	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	-ATF -Meeting agendas -Meeting minutes
2.2	Collaborate with CNAP partners on at least two (2) joint activities per year promoting core nutrition and physical activity messages.	CED: ; CEI: x; MPR: ; C&C: x; TTA: x	CWD: ; LHD: X; AAA: ; UCCE: X; CCC: X	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	-ATF -RTW -Meeting agendas

2.3	Collaborate with partners to distribute MyPlate 10 Tips Nutrition Education Series handouts, Harvest of the Month materials (HOTM), and other nutrition/physical activity handouts/materials/newsletters based on monthly themes calendar to coordinate consistent nutrition and physical activity messaging across County.	CED: ; CEI: x; MPR: ; C&C: x; TTA: x	CWD: ; LHD: X; AAA: ; UCCE: X; CCC: X	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	-ATF -RTW
2.4	Actively participate on community based collaboratives in Santa Clara County and the Bay Area Region, such as the Santa Clara County Afterschool Collaborative, Sunnyvale Collaborative, South County Collaborative, South County United for Health Leadership Team, Healthy Retail Workgroup, BANPAC, Safety Net Committee, and the California Farm to School Network.	CED: ; CEI: ; MPR: ; C&C: x; TTA:	CWD: ; LHD: X; AAA: ; UCCE: X; CCC: X	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	-ATF -Meeting agendas
2.5	Actively participate in the integrated work groups and collaborative efforts with other programs/funding sources within SCCPHD. The SNAP-Ed LIAs bring nutrition and physical activity content expertise, models, and resources; collaboratively work to identify and implement integrated obesity prevention strategies for the local SNAP-Ed eligible populations; fill gaps; help to link and leverage existing resources to avoid redundancies and maximize reach and outcomes. LIAs choose the collaboratives based on the following: 1) historical and/or successful partnerships; 2)	CED: ; CEI: ; MPR: ; C&C: x; TTA:	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	-ATF -Meeting agendas

	emerging partnerships that support the needs of Santa Clara County (SCC) residents including the SNAP-Ed eligible population; 3) collaboratives that are geographically-focused from identified neighborhoods and communities (e.g. South County and Sunnyvale Collaboratives); 4) collaboratives that support work by specific sectors (e.g. SCC After School Collaborative, Coordinated School Health Councils, School Food Service Directors); and 5) have common purpose and goals with the LIAs that help to expand reach and coordinate messaging, activities, and initiatives.					
2.6	Coordinate at least one (1) local training and/or outreach activity with the CNAP collaborative related to food resource management and food security (e.g. Food Assistance Training). SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages in at least 10 SNAP-Ed qualifying sites in our identified CX3 neighborhoods.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Market/retail store conversions
- Healthy food and beverage policies/stocking standards (based on customer feedback surveys)
- Healthy in-store marketing and promotions
- Store exterior improvements.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Clara County

Three-Year
Integrated Work Plan
FFY 2017–2019

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, conduct baseline assessments using the CX3 Food Availability and Marketing Survey of the retail environment in up to 7 selected SNAP-Ed qualifying neighborhoods to produce scorecards to evaluate the need for healthy retail improvement.

   b. By September 30, 2017, increase awareness of healthy fruits and vegetables to the community by 1) providing healthy food and beverage merchandising materials, 2) conducting at least 5 taste testing of healthy food/beverage recipes, 3) providing twice yearly owner/retail staff education opportunities to at least 4 retail stores, 4) providing support for one Fruit and Veggie Fest marketing event in at least one qualifying location, and 5) conducting indirect education at EBT-linked Certified Farmers' Markets at 3 sites in qualifying census tracts.

   c. By September 30, 2017, will support at least 4 retail stores in SNAP-Ed qualifying areas to increase access and/or promotion of healthy foods and beverages.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, increase awareness of healthy fruits and vegetables to the community by 1) providing healthy food and beverage merchandising materials, 2) conducting at least 5 taste testing of healthy food/beverage recipes, 3)providing twice yearly owner/retail staff education opportunities to at least 10 retail stores, 4)providing support for one Fruit and Veggie Fest marketing event in at least one qualifying location, and 5) conducting indirect education at EBT- linked and Certified Farmers' Markets at 3 sites in qualifying census tracts.

   b. By September 30, 2018, will support 6 additional retail stores in SNAP-Ed qualifying areas on increasing access and/or promotion of healthy foods and beverages.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019,Increase awareness of healthy fruits and vegetables to the community by 1) providing healthy food and beverage merchandising materials, 2) conducting at least 5 taste testing of healthy food/beverage recipes, 3) providing twice yearly owner/retail staff education to at least 10 retail stores, 4) providing support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location, and 5) conducting indirect education at EBT-linked and Certified Farmers' Markets at 3 sites in qualifying census tracts.

b. By September 30, 2019, conduct a reassessment of the retail environment in up to 7 identified SNAP-Ed qualifying CX3 neighborhoods to evaluate the impact of the interventions with the improvement of higher than baseline retail scores.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages in at least 10 SNAP-Ed qualifying sites in our identified CX3 neighborhoods.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Year 1, 2, 3: Join and participate in already existing County Healthy Retail Work Group which includes LHD Healthy Stores Retail Partners and Tobacco Prevention partners. 	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	An increase in the FTEs from 11.3 to 14.5 results in a higher budget.
2	Non-Capital Equipment/Supplies	Due to an increase in the number of FTEs, we see more expenses for office supplies.
3	Materials	We streamlined the budget items to better reflect our needs while still meeting the IWP requirements.
4	Travel	There are more FTEs in the budget who will need reimbursement for mileage.
5	Building/Space	
6	Maintenance	
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	
9	Indirect Costs	Increase corresponds to increase in salaries/benefits.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Cruz County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

***County Name*: Santa Cruz**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	**California Department of Public Health: CDPH: (Local Health Department: LHD) Santa Cruz County Health Services Agency**
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
X	**Catholic Charities of California: CCC: (Catholic Charities of California: CCC) Catholic Charities Diocese of Monterey**

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Santa Cruz is a mid-sized population county, ranking 24th among California's 57 counties in 2010. Based on the 2010 Census, Santa Cruz County has a total population of 262,382 residents (Census estimates for 2015 are 271,804). There are nearly equal numbers of males and females that reside in Santa Cruz County, with more females than males in the oldest age groups. Based on the CDPH community profile 2015, the number of SNAP Ed eligible

(income ≤ 185%FPL) is 76,138 with 50.2% identifying themselves as Hispanic, 42.6% White (non-Hispanic), 2.9% Asian and 1.2% African American, 2.7% multiracial and 0.4% unknown. The primary languages spoken are English and Spanish. As of 2015, there are 26,274 CalFresh participants representing 10.3% of Santa Cruz County's total population. Feeding America estimates that the rate of food insecurity for children to be 21.6% and 13.4% for adults in Santa Cruz County

Of the 52 census tracts, four (7.7%) are SNAP-Ed eligible (≥ 50% incomes ≤185%FPL) based on all races ACS data for 2010-2014. Of the 82 schools in Santa Cruz County, 34 (41.5%) are SNAP Ed eligible (≥50% FRPM Enrollment, 2014-2015). The adult overweight prevalence in Santa Cruz County is 56.3% overall and 57.9% among SNAP-Ed eligible adults. The adult obesity prevalence is 28.0%. The best information about childhood weight in Santa Cruz County comes from the California Department of Education's (CDE) annual Physical Fitness Testing Report. Each year, most children in 5th, 7th, and 9th grades are evaluated on a variety of fitness characteristics, including measurements of Body Mass Index (BMI). During the 2013-2014 school year, the percentages of children in Santa Cruz County whose BMI fell outside the "Healthy Fitness Zone" were 39%, 37%, and 37% in grades 5th, 7th, and 9th grades respectively. The overweight and obesity prevalence in low-income children is 45% for ages 5 – 19 years (2010 pediatrics survey).

According to the 2015 Santa Cruz County profile provided by the California Department of Public Health, 64% of SNAP-Ed eligible adults ate fast food in the last week. Fast food restaurants total 42.4% of all restaurants in Santa Cruz County. Given this data, the county would benefit from a healthy restaurant program.

Three qualifying neighborhoods were surveyed through the Community of Excellence in Obesity Prevention, Nutrition and Physical Activity (CX^3) process in 2012. Of the 15 grocery stores surveyed in these census tracts, only three met standards in quantity and quality of fresh fruits and vegetables, healthy food options and advertising. In the Downtown Watsonville census tract, no stores met standards. It is also the census tract with the highest number of SNAP-Ed eligible residents (65.3%).

Santa Cruz County has many agencies that recognize nutrition education and obesity prevention as a priority. In an effort to prevent diabetes, Salud Para La Gente Health Clinic and the YMCA of the Central both conduct nutrition education classes. The University of California, Santa Cruz (UCSC) recently received funding to promote food security among UCSC students and also use interns to promote nutrition education in schools. The California Alliance of Family Farmers helps schools in food procurement, making more fresh fruits and vegetables from local farmers available. The CruzMed Foundation offers nutrition classes in schools to promote 52-10+(5 or more fruits and vegetables a day, no more the 2 hours recreational screen time, 1 hour of physical activity and 0 sugary drinks). The 52-10+ programs focuses mostly on schools that just miss the SNAP-Ed qualification of having 50% or more of students enrolled in school lunch. All these agencies participate in the County Nutrition Action Plan (CNAP) meetings to help achieve collective impact in the fight against obesity.

4. **Community Assessment**

Based on the 2015 Community Assessment Project (CAP) Report, since 2007, there has been 8.7% increase in overweight and obesity in Santa Cruz County. The California Health Interview Survey (CHIS) from 2011-2012, shows a striking disparity by ethnicity: only 20.7% of White adults were obese, compared to 34.4% of Latino adults. This was a greater disparity than was found statewide (21.9% of White adults obese, compared to 32.6% of Latinos).

Less than 56% of respondents of the CAP survey reported eating five or more fruits and vegetables for five or more days in the past week. Fruit and vegetable consumption was notably higher among Latino respondents. A survey conducted by the Santa Cruz County Health Services Agency in 2012 showed that residents in downtown Watsonville have no larger grocery stores within a half mile however there are five fast food outlets. Since the survey more fast food outlets have been approved by City Council.

Santa Cruz County has a high concentration of open space including 29 miles of beaches and six state parks and six state beaches. The State of California owns and maintains 42,334 acres of parks in the coastal and mountainous areas of Santa Cruz County. The County maintains an additional 850 acres of parks, and numerous parks are also found within the cities. Although parks are available, only 48.2% of CAP respondents reported engaging in 30 minutes or more of physical activity five or more days a week. Safety issues, cost and adequate transportation may contribute to the residents in low-income areas not getting the recommended amount of physical activity. The 2015 CAP Report states that only 48.7% of adults in Pajaro Valley feel very safe in their neighborhood.

The information in the jurisdiction description comes in part from the SNAP-Ed County Profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey (CHIS), Feeding American's Map the Food Gap and Food Insecurity in Santa Cruz County. Using these data sources, nutrition education interventions primarily focus on families in the school, Head Start and family resource center settings. CHIS data shows that in 2011-2012, 30% of children ages 2-17 drank one or more sugary beverages a day showing a need for easier access to water. This data also informed the need to conduct interactive Rethink Your Drink (RYD) activities at community fairs and forums. In addition, Policy, System and Environmental (PSE) strategies need to be employed to increased access to fresh water in qualifying middle and high schools.

Starting in 2012, the CX³ project assessed neighborhoods where 50% or more of the residences are at or below 185% federal poverty level, in relation to a variety of healthy nutrition and physical activity benchmarks. The project's goal is to empower communities to work together to improve their neighborhoods to become healthier places to live, work and play. The assessment included the number of schools, parks and playgrounds, supermarkets, farmer's markets, small markets, convenience stores and fast-food outlets located in these neighborhoods. The areas assessed are key neighborhoods where SNAP-Ed activities are to be provided. The residents in these neighborhoods are low-income and likely eligible for or currently receiving CalFresh benefits. Also utilized was the United Way of Santa Cruz County Community Assessment Project data, which shows 59% of adults in the Santa Cruz County were overweight or obese in 2014. This data demonstrates a need for direct nutrition education of the SNAP-Ed eligible population. Reach is determined through populations of qualifying census tracts, means tested programs, and census of qualifying schools.

5. **Community Change Goals**

The County LHD has been a key participant in the local Go for Health (GFH) Collaborative. GFH has existed since 2004 with the mission of reducing childhood obesity. In 2014, the collaborative decided to broaden its obesity prevention mission to the larger community. The group participated in a 2015-2020 strategic planning process to identify specific goals and actions to take to reduce obesity by 10% by 2020. The major strategies emerging include:

1. Policy and environmental prevention
    - Pursue implementation of existing healthy eating, active living policies and strategies (e.g. Healthy Restaurant Ordinance, Healthy Corner Markets Project, HEAL Cities Proclamations).
    - Align with the statewide HEAL Cities Campaign to access technical assistance in order to prioritize, pass and implement local policy that will address identified needs above (e.g. Joint Use Agreements, Safe Routes to Schools, Complete Streets, Healthy Food Access, etc.).
    - Enlist champions (elected officials, community leaders, school administrators, businesses) to help pass healthy eating, active living policies in SNAP-Ed eligible areas.
    - Strengthen school wellness policies.
2. Education
    - Provide education on increasing fruits and vegetable consumption and physical activity, reducing screen time, and limiting sugary beverages.
    - Increase the nutrition education students receive in the school environment.
    - Work with healthcare clinics/medical offices to promote healthy messages.
3. Youth Leadership
    - Grow youth leaders countywide as advocates and leaders for healthy communities through Jovenes SANOS and partnerships with other youth leadership organizations.
    - Support youth leaders in advocating for healthy choices at restaurants, markets and schools.
    - Support youth initiatives through the policy and education campaigns.

The Santa Cruz County LIA partnership has determined based on the larger community change goals, to set three, three-year SMART local objectives for FFY17 - 19 around the following areas:

1. By September 30, 2019, partner with a minimum of two qualifying school districts (and schools) in Santa Cruz County to promote school wellness policies and create environmental changes to increase consumption of healthy foods and beverages and increase physical activity among the student population and their broader family and community networks.

2. By September 30, 2019, increase youth and adult access to healthy foods, beverages and physical activities in qualifying neighborhoods through adopted and implemented policies and or physical sites changes in settings such as food pantries, parks, faith-based organizations, community organizations and community gardens.
3. By September 30, 2019, increase availability and consumption of healthy food and beverages by making sustainable environmental changes in at least three corner markets and three restaurants serving SNAP-Ed eligible adults and/or children in qualifying neighborhoods.

6. **Partnerships and Collaborative Efforts**

The goal of the Santa Cruz County CNAP is to improve the nutritional well-being of Santa Cruz County residents eligible for federal nutrition assistance programs by increasing fruit and vegetable consumption and physical activity. LIAs will promote SNAP-Ed services and activities by connecting with other agencies. Partners include Second Harvest Food Bank, WIC, Santa Cruz City School District, United Way, Parajo Valley Health Trust, Salud Para La Gente, Santa Cruz County Human Services Department, community resource centers, Catholic Charities, Pajaro Valley School District, Community Alliance of Family Farmers (CAFF), University of California, Santa Cruz Global Food Initiative and Head Start

The target objectives are:

- Maintain collaboration and communication among agencies dedicated to improving nutrition, food security, and physical activity levels among low income residents.
- Increase awareness of current nutrition education and physical activity programs aimed at achieving and maintaining a healthy lifestyle.
- Provide nutrition and physical activity education opportunities and resources to target populations.
- Maximize availability and utilization of all food and nutrition programs including but not limited to CalFresh, WIC, food banks, pantries and school meal programs.

The CNAP will meet quarterly, develop a joint vision and an action plan which focuses on an issue that addresses a policy, system and environmental change. In addition to regular meetings, key members/steering committee will communicate regularly through meetings and email to move the action plan forward.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan		Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify):* Reading Food Labels
	Fats and Oils	X	Food Shopping/ Preparation	X	Other *(specify)*: Rethink Your Drink
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All education materials, resources, and curriculum used will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health (CDPH) Nutrition Education Obesity Prevention Branch (NEOPB) Approved Integrated Curriculum and Nutrition Education Materials lists. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies (LHD and CCC) in Santa Cruz County will collaborate to provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing public relations and coordination/collaboration with partners throughout the county. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change.

The intervention plan activities are based on the Social-Ecological Model (SEM) to provide targeted and complementary interventions to facilitate behavior change in increasing fresh fruit and vegetable consumption and physical activity while decreasing consumption of sugary beverages. The Individual and Interpersonal levels are addressed through direct education and indirect education. Direct nutrition and physical activity education will be provided to SNAP-Ed eligible participants using evidence based curriculum and lessons. Topics will include selecting healthy food and beverages; increasing food label reading skills; menu planning and food budgeting; increasing knowledge of MyPlate recommendations and exposure to and acceptance of healthy foods. Santa Cruz County's SNAP-Ed population consists of both English and Spanish speakers. Nutrition presentations conducted

in school and afterschool programs will be predominately conducted in English with some Spanish translation as needed. Classes in which Spanish language is used is documented as such in the ATF. School staff trainings will be predominately in English. Classes conducted in the community to adults will be primarily in Spanish. Indirect education will be provided in many settings including community events, National Public Health Week, Fruit and Veggie Fest, farmer's markets and other SNAP-Ed eligible venues as needed. In both direct and indirect education, culturally appropriate materials will be used.

The first three-year objective in the plan focuses on the Institution and Organization level of the SEM by facilitating changes within the school setting to increase healthy foods and beverages and increase physical activity among the student population and the broader family and community networks. Many strategies will be employed including the Smarter Lunch Room Movement (SLM) principles which utilize environmental marketing and placement strategies, healthy grab and go, and placement of healthy items in a prominent location at the student's eye level. California Thursdays is another organizational change that will be implemented where all food served will be locally procured and feature seasonal foods once a week in the cafeteria. Nutrition and physical activity promoting school wellness policies will be implemented in the elementary, middle and high school setting and will include standards for all foods and beverages offered on site, opportunities for daily physical activity, limits on screen time, garden-based and physical activity education and marketing guidelines for materials posted and shared on site.

Progressing to the Community level of the SEM, LIA's will collaborate with established groups such as the Go for Health Collaborative, which focuses on reducing obesity for county residents, the Healthy Start Committee coordinated by the Pajaro Valley Unified School District and emerging and or multi-sector coalitions such as agencies working in the Active Transportation Program. Partnering with community agencies will help the LIA's leverage SNAP-Ed funds resulting in collective impact. In addition, the chosen objectives will include community engagement strategies for all SNAP-Ed eligible populations in Santa Cruz County. Community Engagement activities include youth engagement activities (with specific attention paid to high school students and the use of the Youth Participatory Action Research (YPAR) model), and increased opportunities for physical activity and affordable healthy food access to support positive behavior change. There are opportunities for youth, adult, family, and senior engagement throughout the work plan activities. The LIAs will use *CX3* data collected in FFY16 to engage the community and allow residents to be a part of the change in their community, and hopefully encourage and create a new generation of community health champions and leaders.

The final level of the SEM of Structures, Policies and Systems are addressed with each three-year objective. As mentioned above, system changes and school wellness policies will be addressed in objective one. The second three-year objective is to increase access to healthy foods and beverages and physical activity through a variety of activities including conducting audit of existing healthy policy in qualifying neighborhoods and work with local stakeholders and community members to implement new healthy policies in healthy food access, land use, environmental changes to increase physical activity and active transportation. The third three-year objective focuses on changing the retail food environment in both corner markets and restaurants. By making these retail environmental changes, SNAP-Ed eligible residents will be able to take what they have learned through direct and indirect education and apply it when shopping for themselves or their families.

Evaluation processes will be used to improve services for all local objectives. The LIA partners will use Formative, Process (RE-AIM) and/or curriculum-specific evaluations to determine effectiveness. The RE-AIM framework: **R**each, **E**ffectiveness, **A**doption, **I**mplementation, and **M**aintenance will be used for LHD's Policy, Systems and Environment change evaluation and reporting. The RE-AIM framework is useful for planning new interventions, adapting existing interventions, and designing evaluations that assess the potential public health impact of interventions. Community of Excellence in Nutrition Education, Obesity Prevention and Physical Activity surveys will be used to determine the improved food environment in retail and fast food. Curriculum specific evaluations such as the Cooking Matters, Store Tour curriculum, participants will complete a pre and post survey that addresses MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3) and Fruit and Vegetables (LT2) Physical Activity Recommended Labels (LT7) and Entertainment Screen Time (LT8) indicators included in the Western Region's SNAP-Ed Evaluation Framework. The Smarter Lunchrooms Movement activities for three-year Objective #1 will provide evaluation data for reporting on Identification of Opportunities (ST4), Partnerships (ST6) and Nutrition Supports Adopted (MT4). In addition, local objective # 1 will also provide measures of change in physical activity (MT3) in both youth and adults.

SECTION B: Target Audience Description

1. Gender	%
Male	47.3%
Female	52.7%
Total:	100%

2. Age	#
0 to 4 years old (Preschool):	1054
5 to 17 years old (School Age):	24148
18 to 59 years old (Adult):	20368
60 years old and over (Senior):	1055
	46625

3. Ethnicity/Race

Ethnicity

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity
50.01%	49.99%	100%

RACE	**Hispanic/Latino**	**Not Hispanic/Latino**

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, partner with a minimum of two qualifying school districts (and schools) in Santa Cruz County to promote school wellness policies and create environmental changes to increase consumption of healthy foods and beverages and increase physical activity among the student population and their broader family and community networks.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Assess School Wellness Policy (SWP) objectives and environmental supports related to nutrition and physical activity. Promote successes with SWP implementation and reassessment.
- Support Farm to School initiatives including California Thursdays.
- Promote development and maintenance of school garden programs.
- Increase opportunities for structured physical activity for students and their families.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, work with key stakeholders at 2-3 school sites to assess district wellness policy implementation and school site nutrition and physical activity supports.

    b. By September 30, 2017, work with partners at 2-3 intervention sites to assess and develop plans for expanding current school site policy and environmental supports that promote fruit and vegetable consumption including school gardens, farm to school initiatives, structured physical activity, and/or Smarter Lunchroom Movement (SLM) strategies.

c. By September 30, 2017, increase student access and motivation to consume fresh fruits and vegetables by promoting the purchase, preparation, and promotion of local foods at 1-2 school sites.

d. By September 30, 2017, increase students participating in direct nutrition education and physical activity promotion reaching a minimum of 1,680 students at participating school sites, and reach 1,200 parents and community members with complementary indirect nutrition and physical activity promotion.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, work with school partners (i.e. teachers, school wellness committees) to promote implementation of existing school wellness policy and develop new environmental or policy changes to support healthy eating and physical activity at 2-3 school sites.

b. By September 30, 2018, work with partners at 2-3 school sites to improve school environments by establishing or enhancing school gardens, enhancing farm to school initiatives, and/or adopting or expanding SLM strategies.

c. By September 30, 2018, increase student access and motivation to consume fresh fruits and vegetables by promoting the purchase, preparation, and promotion of local foods by partnering with one additional school.

d. By September 30, 2018, increase students participating in direct nutrition education and physical activity promotion reaching a minimum of 1,125 students at participating school sites, and reaching 1,200 parents and community members with complementary indirect nutrition and physical activity promotion (with an additional cohort of approximately 300-400 students and families)

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, work with key stakeholders at 2-3 school sites to reassess district wellness policy implementation and school site environmental supports for nutrition and physical activity and promote/present positive changes to broader school community related to school gardens, farm to school initiatives, and SLM initiatives.

b. By September 30, 2019, increase student access and motivation to consume fresh fruits and vegetables by promoting the purchase, preparation, and promotion of local foods by partnering with one additional school (4-5 sites total).

c. By September 30, 2019, reach a minimum of 1,125 students with direct nutrition education and physical activity promotion, and reach 1,200 parents and community members with complementary indirect nutrition and physical activity promotion (with an additional cohort of approximately 300-400 students and families).

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, partner with a minimum of two qualifying school districts (and schools) in Santa Cruz County to promote school wellness policies and create environmental changes to increase consumption of healthy foods and beverages and increase physical activity among the student population and their broader family and community networks.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Meet with school nutrition staff, afterschool program staff, and administrators from at least two school sites and afterschool programs sites to assess needs or goals regarding wellness policy development and implementation. Assist representatives at school and afterschool sites with implementing assessment of nutrition and physical activity supports and promote future development of an action plan or written recommendations to address areas in need of improvement (Year 1).	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC: X	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	EARS/ATF, meeting agendas, assessment tools
1.2	After identifying areas for environment and policy improvement reaching at least two participating school and afterschool sites (Activity 1.1), provide technical assistance as requested to promote school or afterschool wellness policy. Assist key stakeholders (i.e. from site wellness committees) with developing School Wellness Policy (SWP) action plans as warranted (Year 2). 1.4	Conduct or attend at least two meetings annually with key stakeholders from schools and/or community based groups focused on farm to school efforts to coordinate and assess efforts (Year 1), share successes and challenges (Years 2-3), and assess/present outcomes (Year 3).	CED: ; CEI: ; MPR: X; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 Q2 Q3 Q4 X X X X Year 2: Q1 Q2 Q3 Q4 X X X X Year 3: Q1 Q2 Q3 Q4 X X X X	EARS/ATF, meeting agendas, presentations
1.5	Assist with promotion and media for Farm to School efforts at least two times annually including California Thursday events: increasing community awareness and reinforcing the farm to school messages. Help facilitate connections between Farm to School initiatives and broader educational activities in the school, home, and community (Years 1-3). For example by including signage and visuals linking seasonal produce from school gardens featured in California Thursday meals or daily salad bar offerings.	CED: ; CEI: X; MPR: X; C&C: X; TTA:	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 Q2 Q3 Q4 X X X X Year 2: Q1 Q2 Q3 Q4 X X X X Year 3: Q1 Q2 Q3 Q4 X X X X	EARS/ATF, flyers, presentations, displays, recipes

	Facilitate school-based taste test event once per year with featured California Thursday/ Farm to School item or recipe (Years 1-3).					
1.6	Coordinate a presentation to staff and/or parent groups regarding resources and technical assistance available to support school garden and farm to school efforts (i.e. California Thursdays resources, local Master Gardeners, garden-based nutrition education resources) (Years 1-2). Develop school garden and farm to school community resource list and/or best practices and sustainability plan (Year 3).	☐ CED ☒ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	EARS/ATF, sign-in sheet, presentations, sustainability plan
1.7	Identify school site interest and capacity for the establishment or enhancement of school gardens (Year 1). Meet with school team to establish a plan for building, maintaining, and/or promoting the school garden. Assist in the creation, development and sustained operation of school gardens at qualified schools (Years 2-3).	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	EARS/ATF, meeting agenda, copy of garden development/ maintenance plan
1.	Meet at least two times during the school year with teachers to coordinate implementation and integration of garden-based nutrition education curriculum and assess progress with school garden programming and garden to cafeteria initiatives (Years 1-3).	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	EARS/ATF, meeting agenda

****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, increase youth and adult access to and demand for healthy foods, beverages and physical activities in at least two qualifying neighborhoods
through adopted and implemented policies and or physical sites changes in settings such as food pantries, parks, faith-based organizations, community organizations and community gardens.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Promote access/appeal, or policy changes to support physical activity or exercise.
- Mobilize community partnerships around healthy eating and active living.
- Active transport/improve access to safe streets.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017 assess current city and/or county health policies in two qualifying neighborhoods as they relate to access to healthy food, physical activity, land use and active transportation.
    b. By September 30, 2017 meet with city/county elected officials in two qualifying neighborhoods to discuss assessment and strategies to increase access and consumption of healthy food and beverages and physical activity through policy, systems and environmental (PSE) changes.

c. By September 30, 2017 gather SNAP-Ed eligible community input on what healthy eating, active living policy, system and environmental changes they would like in two qualifying neighborhoods.
d. By September 30, 2017, conduct four CNAP meetings and attend at least four Go for Health meetings to identify community partners with the resources and ability to help implement PSE strategies identified by elected officials and community members.
e. By September 30, 2017 increase demand for healthy food and active living PSE changes using USDA approved curricula and materials to reach at least 1,475 direct education participants and 1,500 participants through indirect education.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, identify two policies and/or physical sites strategies to be implemented in at least one qualifying neighborhood.
   b. By September 30, 2018, work with community partners to implement two policies and/or physical sites strategies to be implemented in at least one qualifying neighborhood.
   c. By September 30, 2018 increase demand for healthy food and active living PSE changes using USDA approved curricula and materials to reach an additional 200 direct education participants and 1,000 participants through indirect education.
   d. By September 30, 2018 recruit and train at least three community Champions for Change to increase demand for nutrition and physical activity PSE changes and promote SNAP-Ed messaging.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, develop an action plan to reassess changes in policy and or physical site changes and report successes.
   b. By September 30, 2019 increase demand for healthy food and active living PSE changes using USDA approved curricula and materials to reach an additional 200 direct education participants and 1,000 participants through indirect education.
   c. By September 30, 2019 support at least three community Champions for Change to increase demand for nutrition and physical activity PSE changes and promote SNAP-Ed messaging.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Cruz County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, increase youth and adult access to healthy foods, beverages and physical activities in qualifying neighborhoods through adopted and implemented policies and or physical sites changes in settings such as food pantries, parks, faith-based organizations, community organizations and community gardens.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Conduct reviews of current healthy policy in four qualifying neighborhoods such as access to healthy food, physical activity, land use and active transportation.	CED CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	Copy of policies
2.2	Provide a minimum of three trainings and/or technical assistance to community organizations, city/county officials and/or neighborhood residents on strategies to increase access and consumption of healthy foods and beverages and physical activity opportunities using PSE interventions strategies.	CED X CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	On File: Copy of meeting agendas ATF training materials

2.3	Present CX3 findings to a minimum of three community organizations, city/county officials and/or neighborhood residents in community forums. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):** By September 30, 2019, increase availability and consumption of healthy food and beverages by making sustainable environmental changes in at least three corner markets and three restaurants serving SNAP-Ed eligible adults and/or children in a qualifying neighborhood.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Corner market store conversions
- Healthy food and beverage policies
- Healthy in-store and exterior marketing and promotions

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, working in collaboration with community partners, use CX3 data to identify one corner market in a qualifying neighborhood and provide technical assistance to increase access to and consumption of fresh fruits and vegetables and healthy beverages.
   b. By September 30, 2017, conduct complementary activities to support the purchase of healthier items in the retail and restaurant setting using USDA approved curricula and materials to reach at least 300 direct education participants and 750 participants through indirect education.
   c. By September 30, 2017, using established criteria, increase the availability and consumption of healthy food and beverages at one restaurant in a qualifying neighborhood.

2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, use CX3 data to identify one additional corner market in a qualifying neighborhood and provide technical assistance to increase access to and consumption of fresh fruits and vegetables and healthy beverages.
    b. By September 30, 2018, conduct complementary activities to support the purchase of healthier items in the retail and restaurant setting using USDA approved curricula and materials to reach at least 300 direct education participants and 750 participants through indirect education.
    c. By September 30, 2018, using established criteria, increase the availability and consumption of healthy food and beverages at one additional restaurant in a qualifying neighborhood.

3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, use CX3 data to identify one additional corner market in a qualifying neighborhood and provide technical assistance to increase access to and consumption of fresh fruits and vegetables and healthy beverages.
    b. By September 30, 2019, conduct complementary activities to support the purchase of healthier items in the retail and restaurant setting using USDA approved curricula and materials to reach at least 300 direct education participants and 750 participants through indirect education.
    c. By September 30, 2019, using established criteria, increase the availability and consumption of healthy food and beverages at one restaurant in a qualifying neighborhood.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Santa Cruz County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, increase availability and consumption of healthy food and beverages by making sustainable environmental changes in at least three corner markets and three restaurants serving SNAP-Ed eligible adults and/or children in a qualifying neighborhood.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Establish Healthy Eating Project Advisory Committee. Recruit up to 10 members, including CNAP, Go for Health Collaborative partners, residents and retail representatives from two qualifying neighborhoods.	[ ] CED [X] CEI [ ] MPR [X] C&C [ ] TTA	[ ] CWD [X] LHD [ ] AAA [ ] UCCE [ ] CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3, Q4 Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	ATF On file: copy of meeting agenda and minutes Membership Roster
3.2	Using the CX3 store data, meet with Healthy Eating Project members to identify stores and restaurants in qualifying census tracts to approach. 2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Shasta County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.

- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Located in the heart of Northern California, Shasta County covers 3,775 square miles and is bordered by the counties of Tehama (south), Siskiyou (north), Trinity (west), and Lassen (east).

There are 177,966 people living in Shasta County with a fairly normal distribution across gender and age. The county has almost a 50/50 split between females and males. Approximately 2 out of 10 people are under the age of 18 (5.7% ≤ 5 years old; 16.1% 5– 17 years old), 6 out of 10 people are between the ages of 18 and 64 years old (inclusive; 60.1%), and approximately 2 out of 10 people are age 65 years or older (18.1%) (American Community Survey - 2009-2013).

Shasta County has a relatively homogenous ethnic distribution. The American Community Survey (2009-2014) shows eighty-two percent of the residents are White (non-Latino), 8.7% Latino, 2.4% Asian, 3.7% two or more races, 2.1% Indian/Alaska Native, 0.9% African American, and 0.2% Native Hawaiian/Pacific Islander (matches Section B Ethnicity/Race profile). According to the 2015 SNAP-Ed County Profiles, 37.5% of the population is SNAP-Ed eligible. SNAP-Ed eligible participants are 78.2% White, 9.4% Hispanic, 4.7% Multiracial, 3.2% American Indian/Alaska Native, 2.8% Asian, 1.4% African-American, and 0.4% are unknown. The primary spoken language is English. Children below the age of 6 comprise the largest percentage of SNAP-Ed eligible participants at 54%, followed by school age children (44.6%), adults (36.2%) and older adults (28.7%).

In December 2015, the unemployment rate in Shasta County was 7.5%, slightly lower than state rate of 8.5%. (State of California Employment and Statistics Maps.) Fewer than 1 in 5 people are below the Federal Poverty Level (17.5%), yet over 35% are less than 185% of the Federal Poverty Level and therefore eligible for SNAP-Ed services (SNAP-Ed County Profiles 2015). Demographic differences exist between those eligible for SNAP-Ed services and the general population.

About 10% of SNAP-Ed eligible people are young children (<6 years), 18% are between the ages of 6 and 17, 60% are ages 18 to 64, and the remaining 13% are over age 65. Only 68% of students that are eligible for free and reduced price meals (FRPM) participate in the National School Lunch Program and only 35% participate in the School Breakfast Program. Even fewer students (7% of students receiving FRPM) utilize the summer meal program. When comparing the general population to the SNAP-Ed population, there are more ethnic minorities who are eligible for SNAP-Ed than white.

Obesity continues to be a problem locally, nationally and internationally. According to the California Health Interview Survey, 29.0% of Shasta adults are obese (BMI>30) and 59.9% are obese or overweight. These numbers are lower for the SNAP-Ed eligible population: 26.9% and 47.5% respectively. The data for low income children is also concerning: 12.3% of children aged 2-11 years are overweight and older children aged 12-17 years are 16.2% overweight and 20.8% obese respectively.

Physical activity promotion efforts are a priority for the local health department. There are a variety of outdoor recreational activities and physical activity resources available to residents in locations throughout the county at no cost. Only 19% of adults over the age of 20 report no leisure time physical activity, 48% of children ages 2–11 years have been physically active at least one hour every day and 13% of teens report having at least 1 hour of physical activity per day (SNAP-Ed County Profiles 2015). The high prevalence of childhood obesity can be attributed to a variety of individual, social, and environmental factors including convenient availability and consumption of fast foods. According to the 2015 SNAP-Ed County Profiles, 47.4% of Shasta County adults report consuming fast food at least once in the past week.

Among adults and seniors in Shasta County, over 8.1% have been diagnosed with Type II Diabetes, 17.5% have asthma and 15.6% of adults report being in fair to poor health. The county also has 6,000 individuals who are currently insured diagnosed with heart disease. (CHIS, 2014)

An estimated 18,000 adults in Shasta County could not afford to put adequate food on the table during the recent recession according to a policy brief by the UCLA Center for Health Policy Research. Food insecurity is associated with poorer physical and mental health, including an increased risk of depression, diabetes, and hypertension. Nearly one out of five (18.7%) of individuals living in Shasta County are food insecure with the rates among children being the highest at 28.7%.

All SNAP-Ed funded LIAs are working collaboratively via the Integrated Work Plan (IWP) as an LIA workgroup to create an integral and comprehensive food and nutrition education program that incorporates physical activity promotion, using the socio-ecological model, which contributes to the prevention of obesity and other related preventable health problems in Shasta County. We will meet at least 4 times per year

to track metrics and outcomes. During these meetings, we will discuss collaboration opportunities, upcoming community events and other items of group interest.

4. **Community Assessment**

Shasta County SNAP-Ed LIAs include the following agencies:

- University of California: UC CalFresh UCCE: UC Davis Cooperative Extension;
- California Department of Public Health: CDPH: Shasta County Health and Human Services Agency (HHSA) - Public Health (PH);
- California Department of Aging: CDA: via their subcontractor Center for Healthy Communities (CHC) at CSU- Chico;
- California Department of Social Services: CDSS: Shasta County Health & Human Services Agency, Regional Services Branch (Get Fresh Grant Allocation) (CWD)
- Catholic Charities of California: CCC: Northern Valley Catholic Social Service (NVCSS).

The assessment data utilized to identify intervention strategies includes the following bulleted sources to provide information on demographics, health, and community and environmental settings. By utilizing this set of assessment measures to inform the development of the work plan, Shasta County SNAP-Ed LIA partnership (as defined above) have identified the populations and areas of highest need to design an integrated work plan with interventions which address all levels of the socio-ecological model and provide long term benefit to the SNAP-Ed eligible population in Shasta County.

Based on existing data sets, the following are examples of the assessment data used in Federal Fiscal Year 2016 (FFY16). These data sets and new community needs assessment data from Maternal Child Adolescent Health (MCAH) have been used to inform the work for the FFY17-19 work plan:

- SNAP-Ed County Profiles (2014, 2015) (provided by CDPH)
- US Census Bureau (2014)
- American Community Survey (2009-2013) and (2010-2014)
- Shasta County MCAH Needs Assessment (2014)
- California Economic Development Department
- UCLA Center for Health Policy Research
- CA Food Policy Advocates
- California Health Information Survey (2014)PHH

- Far Northern Regional Center
- California Department of Developmental Services
- UCCE/UC CalFresh Needs Assessment (2015)

The community change goals and objectives have been, in part, developed using the following data, collected from the *2015 County Health Rankings* and the *California Health Interview Survey 2011–2012,* which compares County data to statewide data:

Description	Shasta	CA
Percentage of population with adequate access to locations for physical activity	79%	93%
Percentage of adults aged 20 and over reporting no leisure-time physical activity	19%	17%
Index of factors that contribute to a healthy food environment, 0 (worst) to 10 (best)	6.4	7.5
Percentage of adults that report a BMI of 30 or more	27%	23%
Years of potential life lost before age 75 per 100,000 population (age-adjusted) (Premature Death Rate)	8990	5295
Percentage of children under age 18 in poverty	28%	24%
Percentage of population who lack adequate access to food	18%	16%
Percentage of population who are low-income and do not live close to a grocery store	7%	3%
Median Household Income	$41,236	$60,185
Children eat less than five or more serving of fruits & vegetables	57.9%	47.4%
Teen overweight (85th up to 95th percentile)	19.6%	16.6%
Children and Adults with developmental delay or disability	23.06%	10.5%
Seniors aged 60 years or over (American Community Survey, 2014)	25.2%	17.3%

Additional data was collected from the 2014 and *2015 SNAP-Ed County Profiles.* Data was also analyzed in consideration of Shasta County community change goals and objectives:

	Description
	12.3% of 2-11 year olds are overweight
	16.2% of 12-17 year olds are overweight and 20.8% them are obese
	34.8% of low-income 2-4 year olds and 36.3% of low-income 5-19 year olds are overweight/obese (2014)
	17.5% of county population below the FPL
	28.7% of county children are food insecure
	18.7% of the county population is food insecure
	7.5% of low income population has limited access to healthy food
	47.5% of county SNAP-Ed adults are overweight/obese and 26.9% are obese
	48% of county zip codes have grocery stores, produce stands or farmers markets (2014)
	50.8% of county restaurants are fast food (2014)
	39.1% of SNAP-Ed adults consumed fast food 1 or more times per week (all adults 47.4%; children/teens (age 2-17) 60.9%]

In addition to the resources and data provided above, SNAP-Ed LIAs have contributed additional assessments and data collected within their respective organizations and/or individual programs. This data includes, but is not limited to the Shasta County Market Match Program, the Smarter Lunchroom Movement, and Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3). Individual program assessment data are as follows:

Shasta County LHD:

The Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX3) assessment is conducted every three years in Shasta County low-income neighborhoods. The assessment serves to inform the community of the current condition of lower income populations that are often disproportionately affected by environmental conditions that do not support healthy eating and physical activity. The CX3 assessment uses indicators to determine how accessible healthy foods and physical activity opportunities are to low-income neighborhoods. The CX3 assessment forms the basis for Objective 4 of this integrated work plan (IWP), in which work with retail outlets will occur to improve access to healthy foods and/or beverages. Another phase of the CX3 assessment will occur in late spring of

2016, which will provide additional information to direct the work of this IWP. The upcoming data collection will reassess the restaurants in the Downtown neighborhood, expand the Enterprise neighborhood, and add allowable neighborhoods in the communities of Anderson, Shasta Lake City, and Burney. The Riverside neighborhood will not be reassessed due to the closure of the primary market in the region and a lack of community involvement in that area.

As of 2011, there were 16,254 residents living in the three previously identified CX3 neighborhoods (Downtown, Enterprise, Riverside). They share 11 schools and 12 parks. None of the neighborhoods have convenient public transportation available. (This is measured by how easily residents can get to convenient public transportation within 1 block, without needing a connecting bus every 30 minutes.)

The CX3 data showed that of 11 food outlets located in the 3 neighborhoods, only 2 outlets (18%) qualify as 'healthy' food access points and/or meet quality standards as determined by the California Department of Public Health. Neighborhoods identified by CX3 census data, when assessed using the CX3 assessments, also show that Shasta County residents have easier access to fast food establishments, compared to grocery stores, at a rate of 1:245 in the Downtown neighborhood and 1:756 in the Enterprise neighborhood. According to Community Commons, the ratio of fast food for all Shasta County residents is 1:1363, indicating disproportionate access to unhealthy retail in low-income neighborhoods. There are as many as 11 fast food restaurants within ½ mile of one school in Downtown Redding and 9 within a ½ mile of an Enterprise school. Data also showed a saturation of 8 unhealthy food outlets and 0 healthy food outlets surrounding Shasta High School. Likewise, parks are often surrounded by fast food restaurants. All 6 Downtown parks have fast food restaurants within ½ mile, and at least 1 park is within ½ mile of 17 fast food restaurants. Sixty percent (60%) of Enterprise parks also have fast food restaurants within ½ mile, but the only park in West Enterprise did not have a fast food restaurant within ½ mile.

On the positive side, many fast food outlets do not offer toys or other child incentives and have offered healthy sides/beverages. However, many still advertise unhealthy foods and do not advertise healthy options on their exteriors. Furthermore, very few have healthy options or provide nutritional information useful for making healthy decisions.

	Downtown	Enterprise	Riverside
Fast food outlets with exteriors that provide healthy marketing practices	48%	38%	17%
Fast food outlets with limited child oriented marketing practices	86%	69%	83%
Fast food outlets with interiors that provide healthy food options and healthy marketing practices	10%	8%	0%
Percentage of Fast Food Outlets meeting standards	14%	8%	0%

None of the retail establishments around the four Enterprise schools had advertising (good or bad) or mobile vendors (healthy or unhealthy). The fast food environment around Rother Elementary and Parsons Middle ranked as inadequate, while Mistletoe and Enterprise High did not have any fast food within ½ mile of the schools. Only 1 fast food restaurant near Parsons Middle or Rother meet standards for offering and promoting healthy foods. There were no markets within a ½ mile of Rother (therefore it received a score of excellent). The store surveyed near Mistletoe met standards for walkability safety, exterior marketing, and selling a range of quality fruits which brought the "stores around schools" score for Mistletoe up to "Marginal". However, only 16.7% and 20% of the markets around Parsons Middle and Enterprise High, respectively, met standards for selling a range of quality fruits. Each of these school neighborhoods received scores of inadequate for stores.

CX3 data were presented to residents in community forums to share findings and identify areas for future action. Area residents and community partners have expressed interest in working with SNAP-Ed partners to establish and support community gardens and community farmers' markets. Furthermore, community members and LHD tobacco control and AOD (alcohol & other drug) staff are working to develop strategies to create healthier retail environments as part of the Healthy Stores for a Healthy Community Campaign and to increase access to healthy foods.

In order to provide a comprehensive neighborhood approach to increasing access to healthy food and physical activity, neighborhood churches can be good partners to support community improvement. Churches provide a forum to connect with the community in the neighborhood to provide education and gather support for policy, systems, and/or environmental changes in their organization and the surrounding neighborhood. Churches are not being currently served and a variety of income eligible SNAP participants are among the congregants attending our County's faith based institutions. It is our intent to increase group awareness around nutrition in relation to body and soul. We will use the approved SNAP Ed curriculum to facilitate these interventions.

UCCE: UC CalFresh has identified the need to improve schools, organizations and household food system, environments and nutrition and wellness policies to better support the goals of the direct education. As described in the SNAP-Ed toolkit, the Smarter Lunchroom Movement is an initiative to equip school lunchrooms with evidence-based tools that improve child eating behaviors and improve the health of children. CATCH (Coordinated Approach to Child Health) is also an evidence-based Coordinated School Health Program designed to promote physical activity and healthy food choices, and prevent tobacco use in elementary school-aged children. The CATCH Program has proven that establishing healthy habits in childhood can promote behavior changes that can last a lifetime. Playground Stencil; access to water; school, household and institutional gardens; garden to cafeteria and the farm to fork programs are also shown to be important PSE intervention that will be incorporated into the UC CalFresh FFY 17−19 plan.

Behavior change toward a healthier life for the targeted population is the most important goal of the Shasta UC CalFresh Nutrition Education Program. It is also recognized that the increase in knowledge and skills combined with the necessary environmental changes at different levels of the community can facilitate the expected change in behavior for a healthy lifestyle. The UC CalFresh evaluation data showed the significant value of the UC CalFresh direct education, reinforced with food tasting, food demonstrations and improved lunchroom environments through the Smarter Lunchroom Movement as a comprehensive approach to change knowledge and behavior. Children who received UC CalFresh food and nutrition education, reinforced with a food tasting, cafeteria lunchroom improvements and family education, on average, improved behaviors as demonstrated by:

- 59.0% of the children increased acceptability of fruits, vegetables and other healthy foods
- 88.0% of the teachers agreed/strongly agreed that this year children chose more fruits and vegetables, are willing to try new foods, can identify healthy choices, wash hands more often and bring more fruits and vegetables as snacks.
- 85.0% of the teachers agreed/strongly agreed that this year teachers now make healthier choices, encourage the students to be physically active, remind more families to bring healthy snacks, and offered healthy choices to the students.

Adults and families who received UC CalFresh food nutrition education reinforced with food demonstration and family education, on average, improved behaviors as demonstrated by:

- 34.0% improved food resource management, nutrition and food safety practices
- 83.0% increase acceptability of fruit and vegetable and other healthy food choices.
- 81.0% are willing to serve the new fruit and vegetable and other healthy choice at home to their families

UC CalFresh approved food resource management curriculum such as PSSC, Hunger Attack and Making Every Dollar County (MEDC) empowered individuals to plan and shop for greater food security. Analysis of the FFY15 Shasta County UC CalFresh food resource management evaluation data showed that the participants improved an average of 28.0% in six of the behaviors that were evaluated. The use of “Nutrition Facts” labels was the behavior with the highest positive change (46%), followed by thinking about healthy choices (30%), the frequency in "planning meals" (28%), shopping with lists (36%), and comparing prices (23%). The data also showed that 19% of the Shasta participants who received the PSSC 4-series lessons were no longer running out of food before the end of the month. These findings show that the UC CalFresh food resources management four-lesson series are a very important educational tool that contributed to make a difference improving food security by helping stretch limited food dollars in the lives of low-income community members of our targeted population. Based on the food insecurity rates in Shasta County, there continues to be a need for food resource management education.

To address the limited access to food and particularly healthy foods, the Shasta UCCE UC CalFresh program partners also with Healthy Shasta and the Growing Local Coalition to increase fruit and vegetable consumption in children and adults. The Healthy Shasta Fruits and Vegetables Workgroup project supports the Growing Local coalition awareness and education component, promotes fruits and vegetable consumption, supports and promotes the Shasta County farmers' markets, and develops and implements the Healthy Shasta FARM (Fun at Redding Market) Club connecting kids to fresh produce. The main goal is to connect Shasta kids with fresh, local farmer's market produce and promote the consumption of fruits and vegetables.

FARM Kids Club tokens with a parent informational letter, were distributed in two targeted low-income UC CalFresh schools. Participating students received $2 wooden tokens to spend at the Redding Farmers' Market and won $2 in tokens on each subsequent visit to the Market. Tokens were used to purchase only fruit, vegetables, and/or food plants. All vendors selling produce at the market participated in the project. During the FFY13 and FFY14, 1,134 kids from around 70 schools enrolled in the Farmers Market FARM Club and increased their knowledge about Farmers Markets, local and healthy food choices, and consumption of fruits and vegetables. Based on the evaluation data, 80% of the total distributed tokens have been collected from participating vendors and $6,181 of additional revenue was collected by local farmers due to the FARM Club. The pilot study data showed the FARM Club as a successful strategy to engage children and families in healthier behavior, as it showed 84% of the participating children returned to the Farmers Markets to receive the free tokens to buy fruits, vegetables, and food plants. The results of this study will support future funding to expand the project at other farmers markets and plan similar projects in surrounding counties.

Get Fresh/CWD: As reported in the CDSS Get Fresh annual report for FFY 2015, the following results were shared to contribute to this community assessment:

1. There is a heightened awareness that breastfeeding is normal nutrition for infants via anecdotal report from moms visiting the Breastfeeding Walk-In Clinic and from interaction with area medical providers. In FFY 2015, 98% of the moms who visited the Walk-In Clinic were able to demonstrate and/or verbalize knowledge gained as a result of the one to one education provided during their visit as well as the breastfeeding promotion and support conducted by our sister WIC program. This is an increase from 94% in FFY 2014. During post intervention telephone contact, 50% of moms confirmed that they are still breastfeeding, up from 43% in FFY 2014. Of moms who are currently breastfeeding, 77% report a breastfeeding goal of fully or partially breastfeeding for 7 to 12 months or longer. This is attributable to the interventions in the Breastfeeding Walk-In Clinic where 91% of moms reported being extremely or very confident regarding their breastfeeding success.

2. We have observed increased capacity of knowledge and skills among our CalWORKs clients with their participation in the STEPs classes as evidenced by 96% of participants stating that they were confident in their ability to understand nutrition information on food labels, 75% stating that half their plate should consist of vegetables and fruits, 72% stating that 1% or non-fat milk is the healthiest for adults and children over the age of 2 and 71% stating that they are willing to try increasing physical activity right away. We have observed an increased capacity of knowledge and skills among our CalFresh clients with the indirect education we provide in CalFresh reception areas and lobbies, at Employment and Eligibility appointments, via IVR contact messages and with information posted to the eatfresh.org website.

    a. CalFresh reception areas and lobbies contacts as evidenced by 67,702 indirect education contacts in FFY 15.
    b. Employment and Eligibility contact as evidenced by 23,100 indirect education contacts in FFY 15. Additionally, 10,224 CalFresh recipients received a nutrition message flyer with their semi-annual report.
    c. Technology indirect education contacts as evidenced by:
        - 103,652 nutrition education messages received via IVR contacts in FFY 15
        - 135,759 eatfresh.org site visits in FFY 15
        - 58,230 views from a local television station news story about Project Healthy Community which featured our SNAP-Ed booth

3. In the MCAH Needs Assessment, 6.4% of 6 month postpartum women reported that they had experienced food insecurity during pregnancy. Our sister Shasta County WIC Program reports that referrals to food assistance continues to be the #1 referral for the WIC program. Food insecurity data from the county profile indicates integrated SNAP-Ed programs will help individuals to plan and shop to allow for greater food security.

4. Shasta County Farmers Market Match program is a program designed to increase the food access and security of CalFresh EBT recipients and is conducted as part of Shasta County HHSA- Regional Services activities. The goal of the project is to encourage CalFresh (SNAP/EBT) recipients to stretch their food dollars and keep their families healthy. These “bonus” tokens are used for the purchase of fresh local fruits and vegetables from certified growers. The Market Match is viewed as a beneficial program for low income shoppers, certified growers and for the local economy. CWD Get Fresh grant supports direct nutrition education of those participating in the Market Match Program through an interactive booth where participants will be able to spend 15 minutes or more in fun, hands-on activities. Afterwards they will receive a home garden container kit and recipe cards which cross market the eatfresh.org web site. The County’s reach for this program is indicated below:

a. 2,629 clients utilized the project up from 2,160 clients in the prior year
b. $25,148 redemption of Market Match tokens with Farmers' Market vendors up from $20,165 in the prior year:
    - 80% spent on fruits and vegetables
    - 14% spent of prepared food
    - 6% spent on whole foods

The Center/functioning as AAA: Shasta County has 28.7% low-income (<185% FPL) older adults age 65 and older in California (SNAP-Ed County Profile, 2015). Additionally, according to the California Department of Aging, 14% of the population 60 years of age and older live in poverty (≤ 125% FPL). It is recognized that residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. According the California Department of Food and Agriculture (CDFA), Shasta County had a Senior Farmers' Market Coupon redemption rate of 65.6 % for 2015.

The aging of the population is particularly noticeable in PSA 2, where the senior population is already a significant element of the overall population and is continuing to grow. It is projected the retiring "Baby-Boomers" will choose to retire within the PSA 2 AAA area at twice the percentage anticipated for California as a whole. In 2013, PSA 2 found that more than 27% of seniors surveyed had issues acquiring at least 2 meals per day as reported in the PSA 2 Area Plan. Furthermore, 55.25% of the seniors surveyed in Shasta County are at nutrition risk. In addition, almost 32% of seniors age 60 and older in Shasta County are consider overweight and 36% are considered obese. As a result of these findings, local intervention strategies for the income eligible senior population will include efforts aimed at improving access to healthy foods and beverages.

Catholic Charities of California (NVCSS): According to statistical data collected by Far Northern Regional Center in Redding, CA, 23.06% of adults and children in Shasta County suffer from a developmental delay or disability as of December 2015. This is double the state rate (10.5%), warranting increased attention and targeting efforts to reach SNAP-Ed eligible with developmental delays and/or disabilities.

NVCSS primarily serves adult and youth populations in low income housing (Section 8), family resource centers and community based organizations. Based on the populations we serve within our low income communities, there is a potential opportunity to develop a means tested assessment with a sub-population of individuals who have developmental delay and disabilities. Currently, our program provides nutrition education such as the Rethink Your Drink campaign and physical activity classes such as dance and yoga to this population. This programming has proven to provide an overall beneficial impact to this community. Based on verbal information we have received from property managers who oversee this population, these individuals have begun to substantially decrease their level of sugary beverage consumption, some even working on eliminating their sugary beverage consumption all together. With this type of impact, NVCSS can show that there is an ever present need to provide SNAP-Ed services to this demographic.

5. **Community Change Goals**

Based on results of the Community Assessments, existing and new data were incorporated into our LIA assessment pool to help determine local needs of the SNAP-Ed eligible population and inform our decision for Shasta County community change goals. These goals include:

- increase consumption of and access to healthy foods and beverages for all residents;
- increase access to and promotion of physical activity for all residents;
- establish policy, system and environmental changes that support the sustainability of healthy behaviors for all residents;
- support promotion and education of the benefits of breastfeeding;
- promote food and nutrition education and physical activity opportunities using technology and social media.

We have determined that the following 5 community goals are essential to increasing the overall health of Shasta County SNAP-Ed income eligible residents.

1. **Increase consumption of and access to healthy foods and beverages for all residents**

To increase consumption of healthy foods and beverages requires appropriate levels of knowledge, skills and practices along with sustainable changes in the environment to support easy access to healthy foods and beverages. For CalFresh participants, the "triple-A" challenges of access, affordability and awareness are particularly pronounced. Diets with insufficient fruit, vegetables, and other healthy foods can lead to increased incidence of preventable illnesses such as diabetes and obesity. Those illnesses further increase the burdens of citizens living in poverty. Such burdens fall not only on poor individuals and their families but also on society at-large in the form of Medicare and Medi-Cal costs. The health benefits of eating a well-balanced diet as well as maintaining a healthy body weight are well established. The goal of promoting healthy diets and moderated weight encompasses decreasing food insecurity for families while eliminating hunger.

2. **Increase access to and promotion of physical activity for all residents**

Access to and promotion of physical activity for all residents requires information to create or increase awareness, education to increase knowledge, skills and practices as well as sustainable changes in policies, systems and environments that ensure the easy and safe access to physical activity for individual, family, institutional and other levels of the community. Physical activity, education at different levels of the community, wellness policies in schools and institutions, bike-ability and walkability, safe routes to schools as well as safe and easy access

to parks, community centers and other recreation facilities are key factors to optimize school performance and academic achievement among students and ensure a healthy lifestyle for everyone in the Shasta community.

3. **Establish policy, system and environmental (PSE) changes that support the sustainability of healthy behaviors for all residents**
For residents to adopt ongoing healthier eating, physical activity behaviors and improved food resource management skills, the community needs to have policies, systems, and environments in place that support making healthy lifestyle choices. There is a need for policy changes which support sustainable access to healthy foods and beverages and physical activity for everyone in the community. The food system, including retail outlets, is an essential part of the individual and community environment. The prevention of obesity requires a community food system in which sustainable food production, processing, distribution, marketing and consumption are integrated to enhance the environmental, economic, social, and nutritional health of the Shasta County residents. Residents, in particular low-income residents, need convenient and affordable access to healthy foods, beverages, and places to be active.

Breastfeeding families have long been supported and championed by Shasta County advocates and medical providers. The CWD Get Fresh Project supports breastfeeding families with the project's Breastfeeding Success Walk In Clinic component. Fundamentally, breastfeeding is proven to protect mothers and infants from chronic health problems such as infections, diabetes and cancer. This protection is strongest when breastfeeding is exclusive. The American Academy of Pediatrics recommends breastfeeding for the first six months and continuing, with the addition of age-appropriate foods, up to one year. For a CalFresh family on a limited food budget, breastfeeding reduces or eliminates the need for infant formula which leaves more CalFresh food dollars available to support the mother's nutritional need thus increasing their food security and food resource management.

Recent calls to support breastfeeding from the Surgeon General, the Institute of Medicine, and the National Prevention Council highlight breastfeeding as a key strategy for stemming the epidemic of childhood obesity. Exclusive breastfeeding protects infants from excessive weight gain and thus prevents the early onset of childhood obesity. More recently, breastfeeding has been found to play a foundational role in preventing childhood overweight and the development of later obesity. The CDC estimates 15% to 20% of obesity in this country could be prevented through breastfeeding. Childhood obesity is fast becoming one of our nation's biggest problems, second only to the overall incidence of obesity that is plaguing our nation. Childhood obesity is more prevalent among low income families and highest in locations known as food deserts in the United States.

Breastfeeding protection, promotion and support relies on the identification and use of teachable moments to increase mothers' intention to achieve exclusive breastfeeding. Improvement of in-hospital support for first time mothers has the added benefit of promoting exclusive breastfeeding in their subsequent children. Past practice at Shasta County hospitals has shown that a large

proportion of newly delivered mothers stop exclusive breastfeeding in the first week following birth; this is also supported by a review of evidence based literature. These local past practices at area hospitals include distribution of formula, lack of breastfeeding trained nursing staff in the evening hours, limited access to breastfeeding trained professional staff, C-section practices and lack of skin to skin contact. We are beginning to see changes in many of these historical practices at our area hospitals. We have found that our currently funded CDSS Get Fresh Breastfeeding Walk-In Clinic and in-hospital visits have made strides in helping to turn the tide and improve breastfeeding rates among CalFresh mothers and their infants.

4. **Promote food and nutrition education and physical activity opportunities using technology and social media**

As we strive to meet CalFresh participants where they "live" in our technological age and as based on adult learning theory research, the LIA partners will provide consistent messaging in a wide variety of venues. The LIA partners will use existing and developing technology - including webpages, social media, radio, and interactive platforms - to reach a large number of CalFresh recipients with nutrition and physical activity promotion messages, activities, and event announcements. Messages will provide information to increase participant knowledge about healthy eating habits, benefits of walking and exercise, and breastfeeding benefits. Many messages will encourage participants to learn more at eatfresh.org.

We recognize that these community change goals are multi-year strategies and that they will certainly require the support of external partners and additional funding streams. The Shasta County SNAP-Ed LIAs are committed to contributing to aspects of these identified larger community goals (based on agency expertise and SNAP-Ed allowed funding parameters).

SNAP-Ed funding will be used to fund activities designed to support CalFresh eligible participants in the neighborhoods and community organizations where they live and work, in the schools and childcare centers where their children attend, in Regional offices where they obtain their benefits, and in other venues where they gather. The five LIAs funded to provide services in Shasta County will work collaboratively on the local objectives as identified in Section C – each working within its population reach and area of expertise. The Shasta County LIA workgroup is uniquely positioned to support these larger community change goals with work in nutrition education, media and technology, coalition building, collective impact and training/technical assistance.

Much of the larger community change goal work will require additional funding to support capacity building, infrastructure development and policy advocacy. It is noted and understood by all partners that the SNAP-Ed contribution will remain exclusive to SNAP-Ed eligible populations and allowed activities. It is acknowledged that direct education is integral to SNAP-Ed. Each LIA provides nutrition education as well as physical activity promotion and education to eligible participants. Some of the Shasta County LIA partners are better equipped to provide policy, systems

and environmental changes with resulting outcomes and evaluation. Additionally, other partners are better placed to provide media and public relations with assistance from their State oversight agencies.

Specifically, Shasta County SNAP-Ed LIAs will achieve the following three-year objectives:

- By September 30, 2019, LIA partners will assist 29 (UC CalFresh 22; LHD 2; NVCSS 5) youth-focused programs and/or local organizations to implement at least 3 PSE changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, training, and/or technical assistance efforts.
- By September 30, 2019, LIA partners will assist 63 (CWD 12; UC CalFresh 28; LHD 13; CHC 5; NVCSS 5) adult and/or family programs and/or local organizations to implement at least 4 policy, system, and/or environmental (PSE) changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, training, and technical assistance efforts.
- By September 30, 2019, promote access to and consumption of healthy foods and beverages as well as increased physical activity through at least 173 (CWD 88; UC CalFresh 15; LHD 30; NVCSS 40) instances of using approved media, technology, publications, and public relations avenues to reach CalFresh eligible individuals.
- By September 30, 2019, at least two retail outlets will have implemented PSE changes to increase access to or marketing of healthy foods or beverages or to decrease access to or marketing of unhealthy foods or beverages.

6. **Partnerships and Collaborative Efforts**

The LIA workgroup will collaborate on education activities, events, and media communications to support key messages on a broad scale to help ensure that the CalFresh eligible population is reached in all parts of the county. This integrated approach, based on the Social-Ecological Model, will provide opportunities for SNAP-Ed funded staff to connect the messages conveyed in media interventions to the target audience attending these classes, events, and fairs.

The Shasta County LIA workgroup includes SNAP-Ed funded partners serving the CalFresh eligible population in the areas of food programs, nutrition education and physical activity promotion. Partners include: UC Cal Fresh (UCCE-LIA), Get Fresh (CWD-LIA), Shasta County HHSA - Public Health (LHD-LIA), Northern Valley Catholic Social Service (CCC-LIA), as well as the Center for Healthy Communities (CHC, “the Center”), located at CSU-Chico and functioning on behalf of PSA2 (AAA-LIA). LIA’s will promote SNAP-Ed services and activities by connecting with other County-based agencies and community-based organizations. The group goal is to coordinate SNAP-Ed interventions and efforts to increase access to healthy foods and beverages, increase food security and physical activity promotion using all key messages.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify):* Food Labels
X	Fats and Oils	X	Food Shopping/ Preparation	X	Other *(specify)*: Healthy Snacks
X	Lean Meat & Beans			X	Other *(specify)*: Healthy Breakfast
X	Sodium & Potassium			X	Other *(specify)*: Nutrition and Gardens
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or FFY 2017-19 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Resources List, and/or the California SNAP-Ed Integrated Curriculum List. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies in Shasta County – CWD- Get Fresh is solely funded for FFY 17, UCCE, LHD, CCC and AAA – are committed to partnering, collaborating and coordinating efforts to provide both an integrated as well as comprehensive multi-level behavior-focused nutrition education/physical activity promotion and community event presence while providing training and technical assistance as appropriate. Agency staff has expertise and experience working within different levels of the Social-Ecological Model, with distinct age groups and cultures, and within various geographic areas in the county. Thus, the Shasta County SNAP-Ed LIAs are uniquely suited to provide interventions in a way that eliminates duplication of service provision. Media and public relations efforts will also be employed to disseminate approved messages. Due to

the limited time frame funding of CWD Get Fresh, it is anticipated that there will be an impact on the reach of interventions in FFY 18 and FFY 19.

Coordination and collaboration with other to be identified local non SNAP-Ed funded organizations will be used strategically to support policy, system and environment changes to encourage the SNAP-Ed population to make sustainable healthier eating and lifestyle behavioral changes to prevent obesity. These community partners will be invited and engaged to coordinate/collaborate efforts to achieve maximum impact.

The Shasta County SNAP-Ed LIAs will promote the Dietary Guidelines for Americans and SNAP-Ed intervention strategies proven to change behavior. We are committed to meet quarterly or more frequently to share outcomes, discuss partnership collaborative opportunities and identify joint events where multiple messages can be provided for the SNAP-Ed eligible population.

Community level interventions aimed at achieving policy, systems, and environmental changes will be pursued. PSE strategies will be used to enhance household practices, institutional policies, and access to healthy foods, beverages, and physical activity. The LIA partners will work with various locations, including retail outlets, wellness programs, gardens, schools, and Farmers' Markets to implement PSE changes. Some well-known PSE models will be utilized including Smarter Lunchrooms and Farm to School.

Evaluation Activity Description:

As part of the required evaluation activities, each of the five LIAs will conduct the required process, impact and outcome, and formative evaluations. The process evaluations will document the SNAP-Ed services, audiences, and locations of activities provided throughout Shasta County. Actual activities and numbers will be compared against the planned activities and target numbers; regular and periodic monitoring will help local partners take action to meet goals. Successful activities and sites will be examined for expansion. Activities to change policies, systems, and environments will be monitored and documented.

The impact and outcome evaluation will follow the strategy of pre and post surveys that bookend direct education strategies over a series of planned interactions. Changes in individual behaviors and practices will be analyzed. Effective programs will continue, ineffective programs will be modified and improved. Further evaluation will provide information as to whether the improvements make a difference. The goal of the LIA partners is to focus energy on effective programs with demonstrated impact on the target population. Therefore, if improvements resulting from an impact evaluation do not yield desired results, replacement activities will be considered.

The PSE change reporting pertaining to "access to healthy foods and beverages" in retail environments will provide evidence of the environmental level indicators included in the SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to

provide the core RE-AIM indicators for that strategy. If necessary, the PSE strategy will be adjusted to address challenges and/or implement potential enhancements for greater impact.

Shasta County UC CalFresh will conduct formative, process and impact and outcome evaluations of the FFY17-19 integrated county work plan. The formative evaluation uses the required UC CalFresh Evaluation tools, such us intent to change, pre and post assessment, teacher observation and teacher tasting, to provide information that is used during the development of the intervention. The program will conduct a process evaluation using quarterly Workbook reports on an ongoing basis, to record SNAP-Ed activities, sites, participants reached, and other required elements for USDA's SNAP-Ed Education and Administrative Reporting System (EARS). Sites that showed high performance in terms of reach and multi-intervention strategies will also be identified and replicated. The Outcome Evaluation will document achievement of the type of individual level behaviors and dietary practices using the required UC CalFresh evaluation tools in at least 25% of children and 33% of adult participants that receive direct nutrition education. Evaluation instruments include the Intent to Change, Adult Taste Testing, Retrospective Assessment, Teacher Tasting and Pre and Post Assessment tools. The analysis of the evaluation data and the PSE changes will be used for the formulation of the next annual program plan and will be documented in the UC CalFresh annual report.

The delivery method of each LIA is specifically indicated below:

Get Fresh (CWD-LIA) supports and assists SNAP-Ed eligible adults and families via the following Nutrition and Physical Activity strategies only in FFY 17 due to limited funding and will therefore have limited activities:

- Promote participation in federal food and nutrition assistance programs (WIC and CalFresh)
- Encourage use of farmers' market with CalFresh EBT, Market Match and WIC Farmers' Market Nutrition Program access at key community outlets
- Encourage participation in community, home gardens via container gardens, and raised bed mini farms at two designated locations
- Develop and disseminate family-friendly educational materials that encourage family meals and cooking at home via contributions to the eatfresh.org website
- Develop and disseminate breastfeeding education and promotion topics that encourage the practice of breastfeeding to improve food security and reduce childhood/maternal obesity via provision of subject matter expert information provided to the eatfresh.org website
- Promote and provide appropriate nutrition education and access to breastfeeding friendly Walk-In Clinic using practices supportive of breastfeeding in HHSA Regional Centers.
- Provide nutrition education and physical activity promotion classes to adults participating in CalWORKS/Welfare to Work programs to encourage the adoption of healthy eating, smart shopping, and wellness lifestyle behaviors

- Provide education for key County level stakeholder staff
- Promote the increase in physical activity and decrease in overweight/obesity using educational materials and Nutrition Education Reinforcement Items (NERIs) and Physical Activity Reinforcement Items (PARI's)

The Shasta UC Cooperative Extension – UC CalFresh nutrition education program aims to educate CalFresh eligible and CalFresh recipients on how to improve their health and well-being through individual, group or community education focused on dietary quality, physical activity and food security. The program approach aligns with the Social Ecological Model (SEM) as illustrated by programmatic delivery and multi-level engagement in partnerships throughout Shasta County and promote and support PSE changes that facilitate and sustain healthy behaviors.

The UC Cooperative Extension – UC CalFresh provides multi-level knowledge, skills and behavior-focused food and nutrition, food resource management, food safety, garden and physical activity education and promotion using direct and indirect education, media, social media and public relations, community events, Farmers Markets, coordination and collaboration, training and technical assistance reaching the different levels of the social-ecological framework.

To facilitate and sustain healthy change in behaviors, the program promotes and supports school, family and community policy, systems and environmental (PSE) changes such as: farm to school and farm to fork programs; school, household and community gardens; access to drinking water and physical activity, Smarter Lunchrooms Movement; CATCH, institutional wellness policy/ programs and household lifestyle polices.

The UC Cooperative Extension – UC CalFresh delivers services to the target population using approved UC CalFresh educational resources and evaluation tools and the following intervention strategies:

Schools

- Improve student, teacher and staff nutrition knowledge and behavior through classroom education using the appropriate approved UC CalFresh Youth curricula, food tasting, schools menu and cafeteria through Smarter Lunchroom programs.
- Promote physical activity and nutrition in schools using appropriate approved UC CalFresh curricula in the classroom setting and indirect education, the CATCH program, physical activity challenges, nutrition games and educational displays.
- Develop, implement and evaluate school gardens as a novel approach to learn about foods, healthy eating and increase physical activity using approved UC CalFresh Youth curricula.
- Integrate school gardens, classroom and cafeteria education in a comprehensive food and nutrition education program based on the Dietary Guidelines for Americans for a healthier behavioral change.

- Start and expand Farm to School programs by linking local farmers and gardens to school meal service for the procurement of fresh local produce that contribute to healthier school meals.
- Promote access to healthy drinking water in child care centers and schools, by a partnership with local institutions and organizations to support the necessary changes in school environments that increase access to drinking water and facilitate a healthy change in behavior.
- Promote and support the Smarter Lunch Movement, cafeteria, classroom and School environmental changes that support healthy behaviors.
- Support the development of school wellness program and health councils, including student members to promote and support policy and environmental changes for healthier eating and lifestyle.
- Improve youth, school staff and parents' access to nutrition information through monthly teacher and family food and nutrition newsletters, educational booths and food tasting and demonstrations at the cafeteria, staff meetings and in school events, creating awareness for healthy eating and lifestyle.

Community based youth, adult, family and senior organizations

- Provide classroom, indirect education, and cooking demonstrations using single lesson, workshops, and/or 4-lessons series modalities to teens, adults, families and seniors organizations for the development and adoption of healthy eating of foods and beverages, using appropriate and approved curricula and approved supplemental educational materials and evaluation tools.
- Provide food resources management education to teens, adults, families and seniors to increase knowledge and skills for the access and consumption of healthy and nutritious foods on a limited budget, using appropriate approved 4-series lessons UC CalFresh curricula, supplemental educational materials and evaluation tools.
- Promote nutrition policies, gardens, and other environmental changes at food banks/food pantries and other food assistance programs as well as other qualified organizations and public housing sites, as a novel approach to support healthy eating and increase physical activity, using appropriate and approved UC CalFresh resources and tools.
- Promote and support other PSE changes that support and sustain healthy behaviors.
- Promote healthy beverage and access to drinking water in non-profit teen, adult and senior organizations.

Communities

- Improve community access to nutrition and physical activity information through educational booths, nutrition games, and food demonstrations using appropriate and approved UC CalFresh educational materials, creating awareness for healthy eating and lifestyle.

- Promote access to healthy drinking water in the community in partnership with other local agencies in events and other community and media promotion.
- Promote community gardens as a novel approach to increase knowledge and access to healthy foods as well as increase physical activity.
- Promote consumption of healthy foods at Farmers Markets and other community events using approved educational messages and food demonstrations.
- Use the media, social media, and public relations for the delivery of community, institutional, and household food system, and healthy eating and lifestyle education as a novel approach for obesity prevention.

Helping Families

- Increase parents' and family knowledge and skills for healthy eating and lifestyle, through family education and behavior change programs using approved UC CalFresh Family-Centered Curricula and supplemental educational materials and evaluation tools.
- Increase food resource management skills and support family-friendly cooking demonstrations and taste testing, as a novel strategy to increase knowledge and skills for the access and consumption of healthy and nutritious foods on a limited budget, using appropriate approved 4-series lessons UC CalFresh curricula and supplemental educational materials and evaluation tools.
- Encourage the development and adoption of healthy eating and active living in household practices that support healthier family and children feeding practices and lifestyle.
- Promote home gardens as a novel approach to learn about foods, extend the budget, healthier eating and increase physical activity.

Shasta County HHSA - Public Health (LHD-LIA) plans to work primarily from the CDPH NEOPB-developed portfolios of "Shop" and "Live" to reach the CalFresh eligible population. Some work in complementary settings, such as "Eat", may occur. The intent is to work primarily within the neighborhoods where CX3 and retail work is concentrated. In the Spring of 2016, CX3 assessments will occur in four eligible neighborhoods in Shasta County and the results will be used to fine-tune the intervention strategies. The LHD will utilize the following intervention strategies over the three-year period:

- Adults: series-based and/or one-time classes such as Rethink your Drink, MyPlate, food safety, healthy cooking, nutrition and gardening, nutrition and physical activity; community and special events; nutrition display boards; and food tasting and demonstrations.
- Youth: direct and indirect education lessons such as Harvest of the Month, Rethink your Drink, MyPlate, food safety, healthy cooking, nutrition and gardening, nutrition and physical activity; community garden activities; youth engagement projects; nutrition display boards; and community and organizational events.

- Community: participate in health fair events, community forums, nutrition workshops, and physical activity promotion events; promote availability of healthy retail outlets, healthy restaurants, and healthy food vendors; provide education and collaborate with key community outlets and stakeholders; promote community gardens; increase access to healthy food retail outlets such as corner and grocery stores, Farmers' Markets, and restaurants; promote family-friendly cooking demonstrations and taste testing; and promote nutrition and physical activity education through faith-based and other community organizations, ideally located in the identified CX3 neighborhoods.
- Media: work with media sponsorships to promote nutrition and physical activity events through radio, print, newsletters, and local agency websites.
- CX3: utilizing CX3 assessment findings identify community and/or faith-based organizations with which to partner. Provide training and technical assistance to youth, adults, community and organizational leaders, and retail outlet owners/managers to encourage and implement PSE changes in the neighborhoods.
- Policy, Systems, and Environmental (PSE): encourage and implement best practices in PSE changes to increase access to healthy foods and beverages and opportunities for physical activity. Engage local businesses, government, civic organizations, community groups, faith-based organizations, and citizens.
- Collaboration: collaborate with the LIA workgroup, Shasta Coalition for Activity and Nutrition (SCAN), and/or Healthy Shasta to integrate efforts among local organizations and institutions to deliver nutrition and physical activity education at community sites and other events and to increase access to healthy foods, beverages, and physical activity.

The Center for Healthy Communities (CHC, AAA PSA2-LIA) aims to educate low-income seniors and intermediaries such as staff and volunteer instructors on ways to improve and promote healthy eating and regular physical activity. CHC will utilize the following approved interventions:

- Partner with non-funded organizations (Fun with Fitness Senior Program) to deliver SNAP-Ed approved messaging to low-income seniors participating in free recreation programs throughout the county.
- Provide ongoing training and technical assistance regarding nutrition, physical activity, gardening and/or food resource management as they relate to the SNAP-Ed senior population. The training will be offered to Fun with Fitness Senior Program staff and volunteer instructors to build their capacity to integrate SNAP-Ed messaging. This partnership will leverage existing, reputable programs to extend key messages and encourage participation amongst low income seniors.
- Provide direct education via single session classes with tastings at two (2) approved congregate and/or Fun with Fitness Senior Program sites. Single session education will focus on Rethink Your Drink, Harvest of the Month, food resource management and/or MyPlate messaging (process evaluation; no impact/outcomes).

- Indirect education will be offered via displays and resources at approved sites in conjunction with messaging utilized by other LIAs for community events and/or media to extend relevant and consistent messages to seniors.
- Provide environmental supports for increased consumption of healthy foods, beverages and physical activity among seniors at existing recreation facilities and scheduled classes.
- Coordinate and collaborate with local SNAP-Ed LIAs, other PSA 2 programs, Shasta County WIC, congregate senior meal sites, farmers' market and other partners to provide support in increasing the redemption rate of Senior Farmers' Market Program in Shasta County.
- Coordinate with local SNAP-Ed LIAs to refine and implement the county work plan and identify strategies for enhanced collective impact across multiple organizations and sectors.

Northern Valley Catholic Social Service (NVCSS, CCC-LIA) will promote the SNAP-Ed vision of quality nutrition education, changing physical activity behaviors and addressing the nutrition concerns associated with food budget constraints faced by those eligible for CalFresh, low income individuals and other means -tested Federal assistance programs through the use of multilevel approaches.

NVCSS identified activities are in line with the guiding principles of SNAP-Ed in that they include a combination of educational strategies, accompanied by environmental supports, designed to facilitate voluntary adoption of food and physical activity choices and other nutrition - related behaviors conducive to the health and wellbeing of CalFresh participants.

- Community Based Organizations, Means-Tested Housing Projects, Soup Kitchens, Schools, Churches, Family Resource Centers and Food Banks: Conduct series based classes and one time classes, food demonstrations, workshops, or 4 lesson series to teens, adults, families and seniors. Goals for activities are to:

    a. Develop patterns for consumption of healthy foods and beverages

    b. Educate about the importance of access to and the consumption of healthy and nutritious foods for CalFresh recipients when fiscal resources are limited as well as encourage full use of CalFresh EBT benefits

    c. Encouraging physical activity using appropriate and approved curricula to enhance overall physical and emotional health for greater behavior change

    d. Conduct cooking demonstrations

e. Provide numerous physical fitness classes and create recreational environments using equipment provided by NVCSS to promote and increase the rate of physical activity among children and teens ages 5−17.

NVCSS will work in conjunction with Shasta County Parks and Recreation Department to implement PSE changes by providing a safe place to engage in physical activity near/around housing complexes where CalFresh participants reside. A *Safe Place to be Active* is a program designed by Northern Valley Catholic Social Service SNAP-Ed Department and the City of Redding, Parks and Recreation District to encourage the youth to participate in physical activity in a safe and welcoming environment. With the assistance of our Shasta County Nutrition Educator, NVCSS SNAP-Ed will provide active games and workout classes designed to increase social interaction and provide a structured learning environment.

At each of these events, there will be elements of nutrition education to offer as well. The nutrition education is used from approved educational curriculum provided by the United States Department of Agriculture. Youth and families are taught the importance of physical activity and eating healthy at these events. Nutritional snacks and/or beverages may also be available at these events depending on the topic for that day. Parents, families, relatives, and friends are encouraged to participate with one another to reinforce the concept of living a healthy and more active lifestyle. Fitness classes will also be held for adults along with healthy recipe cards and nutrition tips to take home. The project, A *Safe Place to be Active* will begin the spring of 2016 and will be working with the local city officials of the Martin Luther King Memorial Center Day Program in providing structured physical activities to the children of the program while integrating nutrition education to both the participating children and their parents. A Safe Place to be Active will begin June of 2016 and will continue to be implemented over the course of three years, as each year passes we will progress and work towards improving our activities and expanding our project to other facilities.

NVCSS will explore working with local youth sport groups to increase the access to healthy nutritious snacks in snack bars during youth sporting events for adults and youth attending sporting events.

NVCSS will continue to coordinate and collaborate activities with local SNAP-Ed LIAs to finalize and implement the County Annual SNAP-Ed Plan.

NVCSS will work to foster existing and new community partnerships where the SNAP-Ed framework can be further promoted and mutually supported to address the nutrition and obesity needs of the County.

NVCSS uses approved educational resources, supplemental materials and evaluation tools.

SECTION B: Target Audience Description

1. Gender 2. Age

Gender	%		Age	Population #	SNAP Ed Eligible Demographics
Male	49.1%		0 to 4 years old (Preschool):	12,102 (6.8%)	6413

SECTION C: INTERVENTION PLAN

- **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
  By September 30, 2019, LIA partners will assist 29 (UC CalFresh 22; LHD 2; NVCSS 5) youth-focused programs and/or local organizations to implement at least 3 PSE changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, and training, and/or technical assistance efforts.

  SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Access to Healthy Foods and Beverages
- Healthy Food and Beverage Standards
- Access to Physical Activity
- Gardens
- Wellness Policy

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, UC CalFresh will promote healthy lifestyle by providing training and technical assistance to teachers and extenders and reaching children and parents in at least 16 school sites with direct and indirect food, nutrition, physical activity and gardening education.

   b. By September 30, 2017, UC CalFresh will provide training and technical assistance in the formulation and/or implementation of PSE site changes that support the development, adoption, and/or implementation and monitoring of the site wellness policies and procedures in at least 2 of the 16 school sites.

c. By September 30, 2017, the LHD will provide direct and indirect nutrition and physical activity education and technical assistance to at least one youth program associated within a faith community or community organization located within or close to a neighborhood where work toward retail outlet improvements (see Three-Year SNAP-ED Local Objective #4) have been identified.

d. By September 30, 2017, NVCSS will provide training and technical assistance in nutrition and physical education to promote healthy eating / active living and reducing sugar consumption among youth in schools and/or afterschool programs.. NVCSS will use approved educational curriculum to host a variety of activities including: planned cooking demonstrations, structured physical education classes and nutrition education to at least 3 school sites.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, UC CalFresh will promote healthy lifestyle by providing training and technical assistant to teachers and extenders and reaching children and parents in at least 18 school sites with direct and indirect food, nutrition, physical activity and gardening education.

b. By September 30, 2018, UC CalFresh will provide training and technical assistance in the formulation and/or implementation of PSE site changes that support the development, adoption, and/or implementation and monitoring of the site wellness policies and procedures in at least 2 additional of the 18 school sites.

c. By September 30, 2018, the LHD will provide direct and indirect nutrition and physical activity education, technical assistance, and training to one to two (1-2) youth programs associated within a faith community or community organization located within or close to a neighborhood where work toward retail outlet improvements have been identified.

d. By September 30, 2018, NVCSS will provide training and technical assistance in nutrition and physical education to promote healthy eating / active living and reducing sugar consumption among youth in schools and/or afterschool programs. NVCSS will use approved educational curriculum to host a variety of activities including: planned cooking demonstrations, structured physical education classes and nutrition education to at least 4 school sites

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, UC CalFresh will promote healthy lifestyle by providing training and technical assistant to teachers and extenders and reaching children and parents in at least 20 school sites with direct and indirect food, nutrition, physical activity and gardening education.
   b. By September 30, 2019, UC CalFresh will provide training and technical assistance in the formulation and/or implementation of PSE site changes that support the development, adoption, and/or implementation and monitoring of the site wellness policies and procedures in at least 2 additional of the 20 school sites.
   c. By September 30, 2019, the LHD will continue to work with one to two (1-2) youth programs identified in years one and two to implement at least one PSE change to improve access to healthy foods, beverages, or physical activity within the youth program, organization, or surrounding neighborhood.
   d. By September 30, 2019, NVCSS will provide training and technical assistance in nutrition and physical education to promote healthy eating / active living and reducing sugar consumption among youth in schools and/or afterschool programs. NVCSS will use approved educational curriculum to host a variety of activities including: planned cooking demonstrations, structured physical education classes and nutrition education to at least 5 school sites.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019, LIA partners will assist 29 youth-focused programs and/or local organizations to implement at least 3 PSE changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, and training, and/or technical assistance efforts.

****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019, LIA partners will assist 63 (CWD 12; UC CalFresh 28; LHD 13; AAA 5; NVCSS 5) adult and/or family programs and/or local organizations to implement at least 4 policy, system, and/or environmental (PSE) changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, training, and technical assistance efforts.

One- Year SNAP-Ed Local Objective #2 (FFY 2017): By September 2017, CWD will impact at least 1100 unduplicated and/or duplicated one on one direct nutrition education contacts facilitated by professional and para professional lactation education staff who will use the practices supportive of breastfeeding at one breastfeeding friendly walk-in clinic and three HHSA Regional Centers/CalFresh offices with delivered SNAP-Ed eligible mothers and their infants.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Access to Healthy Foods and Beverages
- Healthy Food and Beverage Standards
- Access to Physical Activity
- Gardens
- Nutrition Policy
- Food Security

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, LIA partners will impact at least 96,800 (CWD 90,000; UC CalFresh 6,000; LHD 550; AAA 100; NVCSS 150) CalFresh eligible individuals in 26 sites (CWD 9; LHD 10, AAA 2, NVCSS 5) through newsletters, bulletin boards, poster displays, brochure stands, and interview booth nutrition education brochures.
   b. By September 30, 2017, LIA partners will provide nutrition, physical activity, food safety, gardening and/or food resource management education via direct education in 32 (CWD 6; UC CalFresh 22; LHD 2; AAA 2) sites and indirect education in at least 24 (UC CalFresh 20; LHD 2; AAA 2) community events.
   c. By September 30, 2017, LIA partners will provide training and technical assistance to at least 9 (CWD 2; UC CalFresh 2; LHD 3; AAA 2) SNAP-Ed eligible community sites to encourage PSE changes.
   d. By September 30, 2017, CWD Get Fresh will impact at least 150 CalWORKs Welfare to Work participants with direct class education instruction to inspire class participants to make healthy lifestyle changes.
   e. By September 2017, CWD will impact at least 1100 unduplicated and/or duplicated 1:1 direct nutrition education contacts for CalFresh eligible breastfeeding women and their infants to positively impact the food resource management capability of these women.`

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, LIA partners will impact at least 6,900 (UC CalFresh 6,000; LHD 650; AAA 100; NVCSS 150 CalFresh eligible individuals in 40 (UC CalFresh 22; LHD 11; AAA 2; NVCSS 5) sites through newsletters, bulletin boards, poster displays, and brochure stands.
   b. By September 30, 2018, LIA partners will provide nutrition, physical activity, food safety, gardening and/or food resource management education via direct education in 26 (UC CalFresh 22; LHD 2; AAA 2) sites and indirect education in at least 24 (UC CalFresh 20; LHD 2; AAA 2) community events.
   c. By September 30, 2018, LIA partners will provide training and technical assistance to at least 7 (UC CalFresh 2; LHD 3; AAA 2) SNAP-Ed eligible community sites to encourage and implement PSE changes.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, LIA partners will impact at least 6,900 (UC CalFresh 6,000; LHD 650; AAA 100; NVCSS 150) eligible individuals in 40 (UC CalFresh 22; LHD 11; AAA 2; NVCSS 5) sites through newsletters, bulletin boards, poster displays, and brochure stands.
   b. By September 30, 2019, LIA partners will provide nutrition, physical activity, food safety, gardening and/or food resource management education via direct education in 26 (UC CalFresh 22; LHD 2; AAA 2) sites and indirect education in at least 24 (UC CalFresh 20; LHD 2; AAA 2) community events.
   c. By September 30, 2019, LIA partners will provide training and technical assistance to at least 10 (UC CalFresh 2; LHD 3; AAA 2; NVCSS 3) SNAP-Ed eligible community sites to encourage, implement and/or sustain PSE changes.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partners will assist 63 (UC CalFresh 2; LHD 3; CHC 2; NVCSS 3) adult and/or family programs and/or local organizations to implement at least 4 policy, system, and/or environmental (PSE) changes to increase access to and consumption of healthy foods, beverages, and/or physical activity that resulted from direct education, indirect education, training, and technical assistance efforts.

One- Year SNAP-Ed Local Objective #2 (FFY 2017): By September 2017, CWD will impact at least 1100 unduplicated and/or duplicated one on one direct nutrition education contacts facilitated by professional and para professional lactation education staff who will use the practices supportive of breastfeeding at one breastfeeding friendly walk-in clinic and three HHSA Regional Centers/CalFresh with delivered SNAP-Ed eligible mothers and their infants.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Promote the access to and consumption of healthy local foods by delivering nutrition, physical activity, food safety, gardening and/or food resource management education in at least 3 local events using interactive booth, displays and food demonstrations using local produce in partnership with other LIAs, coalitions,	( ) CED (x) CEI ( ) MPR ( ) C&C ( ) TTA	(X) CWD ( ) LHD ( ) AAA (x) UCCE (x) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 x, Q2 x, Q3 x, Q4 x Year 2 Q1 x, Q2 x, Q3 x, Q4 x	-Annual Education Program Plan -Indirect Activity Form -Informational Flyers/Material

	movements or community organizations.				Year 3 Q1 Q2 Q3 Q4 x x x x	-Quarterly Workbook Reports
2.2	Provide nutrition, physical activity, food safety, gardening and/or food resource management education to teens, adults, families and extenders using approved LIAs curriculum and supplemental educational materials, using a single 45 minutes lesson, workshop and/or four lesson series and Learn at Home materials. Food tasting/demonstration will be provided to reinforce the educational message to facilitate behavioral change in at least 34 qualified sites .	x CED x CEI x MPR C&C x TTA	CWD LHD AAA x UCCE x CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 x x x x Year 2 Q1 Q2 Q3 Q4 x x x x Year 3 Q1 Q2 Q3 Q4 x x x x	-Annual Education Program Plan -Approved UC CalFresh Curricula and evaluation tools. -Quarterly Workbook Reports -Sign in Sheets
2.3	Promote the access to and consumption of safe and healthy foods by delivering monthly Nutrition Newsletters to teachers, extenders, administrators, teens, adults, parents and families during direct and indirect education. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, promote changes in community culture values that support healthy lifestyles through at least 173 (CWD 88; UC CalFresh 15; LHD 30; NVCSS 40) instances of using approved media, technology, publications, and public relations avenues to reach CalFresh eligible individuals.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy Choices
- Food Access
- Food Security
- Physical Activity

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Shasta County **Three-Year** **Rev. 5/23/2017**

Integrated Work Plan
FFY 2017–2019

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, CWD Get Fresh will impact at least 90,000 CalFresh eligible individuals via nutrition education messages on the county CalFresh call center Interactive Voice Response system, county SNAP-Ed webpage, C-IV SAR 7 mail enclosures, and social media contacts (representing a total of 88 instances).
    b. By September 30, 2017, NVCSS will provide, on an annual basis, at least 15 nutrition and physical activity based promotions using multiple media and social media platforms such as: Facebook, Instagram, Google, NVCSS Website and Twitter. NVCSS will also utilize local county media sources to promote SNAP-Ed messages of healthy eating and active lifestyles.
    c. By September 30, 2017, UC CalFresh will use at least 2 online/print publication to promote food, nutrition and physical activity and provide at least 5 foods, nutrition, physical activity and food security cultural appropriate tips, and educational information directed to the hard to reach Spanish speaking population using *Radio Noticias CDs* to Spanish language radio stations and news releases and video in the ANR News and Information website, Facebook, YouTube, and Twitter.
    d. By September 30, 2017, the LHD will use at least 10 press releases, websites, videos, social media, and/or other media to promote nutrition and physical activity education events, data, and other information to increase access to and consumption of healthy foods and beverages and/or access to physical activity. (The LHD will use a variety of media formats to promote nutrition and physical activity education opportunities, including press releases, community calendars, local publications, county and partner websites, and social media, as appropriate for the event or promotion. As funding for the LHD is anticipated to decrease by about one-third from FFY 17 to FFY 18, we do not foresee an ability to increase the number of media and technology outlets over the three years. We will be pleased to remain at 10 instances per year. The intent is that the 10 media promotions, including press releases and social media, will coincide with the promotion of the 10 retail food demonstrations or tasting events listed in Objective 4.)

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, NVCSS will provide, on an annual basis, at least 17 nutrition and physical activity based promotions using multiple media and social media platforms such as: Facebook, Instagram, Google, NVCSS Website and Twitter. NVCSS will also utilize local county media sources to promote SNAP-Ed messages of healthy eating and active lifestyles.
    b. By September 30, 2018, UC CalFresh will use at least 2 online/print publication to promote food, nutrition and physical activity and provide at least an additional 5 new foods, nutrition, physical activity and food security cultural appropriated tips, and educational information directed to the hard to reach Spanish speakers population using *Radio Noticias CDs* to Spanish language radio stations and news releases and videos post in the ANR News and Information website, Facebook, YouTube, and Twitter.

c. By September 30, 2018, the LHD will use at least 10 press releases, websites, videos, social media, and/or other media to promote nutrition and physical activity education events, data, and other information to increase access to and consumption of healthy foods and beverages and/or access to physical activity. (The LHD will use a variety of media formats to promote nutrition and physical activity education opportunities, including press releases, community calendars, local publications, county and partner websites, and social media, as appropriate for the event or promotion. As funding for the LHD is anticipated to decrease by about one-third from FFY17 to FFY18, we do not foresee an ability to increase the number of media and technology outlets over the three years. We will be pleased to remain at 10 instances per year. The intent is that the 10 media promotions, including press releases and social media, will coincide with the promotion of the 10 retail food demonstrations or tasting events listed in Objective 4.)

3. **FFY 2019 (Year 3) Objective(s):**

By September 30, 2019, NVCSS will provide, on an annual basis, at least 18 nutrition and physical activity based promotions using multiple media and social media platforms such as: Facebook, Instagram, Google, NVCSS Website and Twitter. NVCSS will also utilize local county media sources to promote SNAP-Ed messages of healthy eating and active lifestyles.

a. By September 30, 2019, UC CalFresh will use at least 2 online/print publication to promote food, nutrition and physical activity and provide at least an additional 5 new foods, nutrition, physical activity and food security cultural appropriated tips, and educational information directed to the hard to reach Spanish speakers population using *Radio Noticias CDs* to Spanish language radio stations and news releases and videos post in the ANR News and Information website, Facebook, YouTube, and Twitter.
b. By September 30, 2019, the LHD will use at least 10 press releases, websites, videos, social media, and/or other media to promote nutrition and physical activity education events, data, and other information to increase access to and consumption of healthy foods and beverages and/or access to physical activity. (The LHD will use a variety of media formats to promote nutrition and physical activity education opportunities, including press releases, community calendars, local publications, county and partner websites, and social media, as appropriate for the event or promotion. As funding for the LHD is anticipated to decrease by about one-third from FFY17 to FFY18, we do not foresee an ability to increase the number of media and technology outlets over the three years. We will be pleased to remain at 10 instances per year. The intent is that the 10 media promotions, including press releases and social media, will coincide with the promotion of the 10 retail food demonstrations or tasting events listed in Objective 4.)

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Shasta County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

By September 30, 2019, promote access to and consumption of healthy foods and beverages as well as increased physical activity through at least 173 instances of using approved media, technology, publications, and public relations avenues to reach CalFresh eligible individuals.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, at least two retail outlets will have implemented PSE changes to increase access to or marketing of healthy foods or beverages or to decrease access to or marketing of unhealthy foods or beverages.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Product Placement
- Marketing in-store and on exterior
- Healthy retail policies and practices
- Healthy Choices
- Healthy Foods and Beverages Access
- Food Security

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, the LHD will build relationships with and provide a total of 10 food demonstrations and/or food tasting events at 2-3 allowable retail outlets in Shasta County.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, the LHD will build relationships with and provide a total of 10 food demonstrations and/or food tasting events at 3-4 allowable retail outlets in Shasta County.
   b. By September 30, 2018, the LHD will work with at least one retail outlet to develop a plan for implementing a PSE change.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, the LHD will build relationships with and provide a total of 10 food demonstrations and/or food tasting events at 3-4 allowable retail outlets in Shasta County.
   b. By September 30, 2019, two retail outlets will implement or make progress towards implementing PSE changes to increase access to or marketing of healthy foods or beverages or to decrease access to or marketing of unhealthy foods or beverages
   c. By September 30, 2019, the LHD will build relationships with an additional two retail outlets by building upon and sharing local retail PSE stories.

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):
By September 30, 2019, at least two retail outlets will have implemented PSE changes to increase access to or marketing of healthy foods or beverages or to decrease access to or marketing of unhealthy foods or beverages.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	As part of the CX3 work, improve access to and/or marketing of healthy foods and beverages in up to four SNAP-Ed allowable neighborhoods. Partner and collaborate, as appropriate, with the local Healthy Stores for a Healthy Community (HSHC) campaign. Recruit community members to participate in CX3 and HSHC campaign activities in each neighborhood. Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

County Name: Siskiyou

SECTION A: OVERVIEW

1. SNAP-Ed Implementing Agency (counterpart local agency) Names

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC Cal Fresh UCCE: (UC Cooperative Extension: UCCE)
X	California Department of Public Health: CDPH: Siskiyou County Health and Human Services-Public Health Division
X	California Department of Aging: CDA: CSU Chico Research Foundation for PSA2 Area Agency on Aging via The Center for Healthy Communities (CHC, AAA PSA2-LIA)
X	Catholic Charities of California: CCC: Northern Valley Catholic Social Services (NVCSS)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

Siskiyou County is located in the far northern region of California bordering Oregon on the north and eastern borders. It has a population of 43,628 with 18,176 (41.4%) SNAP-Ed eligible residents (less than 185% federal poverty level). The SNAP-Ed population identifies themselves as 76.1% White (non-Hispanic), 12.9% Hispanic, 4.4% American Indians/Alaska Native, 4.2% Multi-Racial, 1.7% Asian, and 0.7% Unknown. Siskiyou County data indicates 58.2% of the SNAP-Ed population is children under 6 years of age and 43.5% of children 6-17 years of age. In addition, 2015 statewide data from the University of Wisconsin's Population Health Institute indicates that Siskiyou County's overall health outcomes ranking is 55 out of the 57 counties evaluated. The worst county is ranked 57. This same data source also indicates that Siskiyou County residents are 60% more likely to die prematurely in comparison to the State. Siskiyou County encompasses 6,281 square miles and is the 5th largest geographical County in California. With its extremely diverse geographical areas, its many temperatures and moisture variations ranging from 12 to over 100 inches per year in the higher alpine forest areas make delivery of SNAP-Ed services quite challenging.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

Of the 14 census tracks in Siskiyou County 4 or 28.6% of the population considering all races are SNAP-Ed eligible. The primary language spoken in Siskiyou County is English. According to the SNAP-Ed County Profiles 2015, Siskiyou County has 3,504 students eligible for the Free/Reduced Price Meals. Of the 48 schools in Siskiyou County, 41 or 85.5% are SNAP-Ed eligible schools. The overweight/obese prevalence for children ages 2-4 years old is 24.3% and for obesity is 9.7%. The overweight/obese prevalence for children ages 5-19 years of age is 36.6% and for obesity is 18.1%. 31.6% of children less than 19 years of age are identified as food insecure with an overall 20.5% rate for all ages. The adult overweight or obesity prevalence in Siskiyou County is 68.7% overall with 66.4% that are SNAP-Ed eligible. This is almost 10% higher than the State prevalence of 59.8% for adults. The data reflects that only 31.6% of adults consumed three or more fruits and vegetables yesterday. The data for the percentage of children consuming five or more servings of fruits and vegetables is unstable because it combines Siskiyou County with six other rural California counties. The data for the percentage of children (2-17) eating 2 or more servings of fruit per day is an unstable estimate because it combines Siskiyou County with six other rural California counties. In Siskiyou County, 35.4% of seniors age 65 and older are living in poverty (185% FPL).

Siskiyou County data reflects that there are 8.9 recreational facilities per 100,000 residents (or 4 facilities per 43,628 residents). Unfortunately, the available data for the percent of children and teens that have a park or open spaces within walking distance is too unstable because it combines Siskiyou County with six other rural California counties. Siskiyou County data indicates that 35.3% adults participate in regular walking in the past week and 20.2% report not exercising in the past month. The data regarding children's physical activity levels has been combined with six other rural counties; therefore, it is not reliable. Data also reflects that 8.5% of Siskiyou County's low income population have had limited access to healthy foods. In addition, 62% of the County's zip codes have grocery stores, produce stands, or farmer's markets available. Local data reflects 8.5% of Siskiyou County residents have limited access to healthy foods. This is significantly higher compared to the State at 3.1%. Siskiyou County data indicates that 44.3% of adults, 36.1% of SNAP-Ed adults and 51.9% of SNAP-Ed eligible children ages 2-17 consumed one or more items from fast food restaurants in the past week. Given the data that is available, Siskiyou County could benefit from SNAP-Ed nutrition education in conjunction with physical activity related interventions.

Some of the available nutrition programs in Siskiyou County include: WIC; National School Lunch Program; School Breakfast Program; Summer Nutrition Program; Child, Adult Care Food Program; Senior Nutrition Programs; USDA Commodities and the CalFresh program. In addition, Siskiyou County ranks number 10, with one being the best, for the number of individuals receiving CalFresh support. Overall, Siskiyou County data supports partnerships with WIC, MCAH, Tobacco Control, First 5 Siskiyou, preschools, schools, YMCA, Family Resource Centers, PSA 2, Northern Valley Catholic Social Services, Great Northern Corporation Commodities Food Program, Social Services CalFresh outreach and local food producers to target populations that are in the most need of SNAP-Ed services.

4. Community Assessment

The information in the jurisdiction description and community assessment sections provided data from the following sources: SNAP-Ed County 2015 Profiles prepared by the California Department of Public Health which includes county-level data from numerous resources such as the U. S. Census Bureau/American Community Surveys, Community Health Needs Assessment, Feeding America, Map the Meal Gap, Food Insecurity in Siskiyou County, California Department of Social Services, California Department of Finance, California Department of Education, California Health Interview Survey, Pediatric Nutrition Surveillance System, Robert Wood Johnson Foundation/County Health Rankings and Road Maps, 2014 Community Health Needs Assessment/Mercy Medical Center Mt. Shasta, California Food Policy Advocates, Healthy Stores for a Healthy Community, UCLA Center for Healthy Policy Research, 2015 California Child Care Portfolio and the 2013 Prevention Status Report.

Siskiyou County used these data resources to develop their work plan focusing nutrition education interventions with the largest percentage of SNAP-Ed target populations. In addition to the large geographical distance that the SNAP-Ed program must reach, this data also indicates the need for the work plan to include the 10 family resource centers strategically located in the jurisdiction hubs, along with the Siskiyou County afterschool programs. These partnerships will assist in expending SNAP-Ed efforts in all of Siskiyou County. Community events, such as community fairs, will be planned to provide opportunities for SNAP-Ed staff to connect the healthy nutrition/physical activity messages to the target SNAP-Ed eligible audience. The data reflected in the numerous available resources helped to identify the partners with which SNAP-Ed staff will collaborate to promote healthy nutrition and physical intervention activities.

This work plan was also based on data received from Mercy Medical Center in Mt. Shasta's 2014 needs assessment identifying issues of greatest concern so that SNAP-Ed staff can seek resources and plan appropriate interventions for the largest impact on the identified issues. Nearly 89.1% of Siskiyou County residents self-reported consuming less than the recommended daily amounts of fruits and vegetables needed to maintain a healthy lifestyle. In regards to physical activity, 65.29% self-reported that they don't meet the CDC guideline of 150 minutes of moderate-intensity aerobic in the week prior to the survey. The SNAP-Ed County profiles 2015 also identified that 38.4% of Siskiyou County adults consumed sugar-sweetened beverages one or more times per week. Compared to the State at 24% of adults who consume one or two sodas each day, Siskiyou County adults are consuming nearly twice the amount of soda. According to the Center for Public Health Advocacy, soda drinkers are 27 more times likely to become obese or develop diabetes. Chronic diseases that can be related to an individual's nutritional status are elevated blood pressure, heart disease and diabetes. In addition, this assessment identified that premature death is Siskiyou County rank 51 out of 57 with 57 being the worst.

After reviewing the data specific to Siskiyou County, it was identified that 85.5% of the schools in Siskiyou County are SNAP-Ed eligible and 31.6 % of children are food insecure, it was decided that Siskiyou County schools were a priority. In addition, with a local hospital needs assessment indicating that almost 90% of Siskiyou County residents are not consuming the recommended daily amounts of fruits and vegetables, Harvest of the Month (HOTM) and Rethink Your Drink (RYD) activities were chosen to enhance the nutrition education intervention. In addition to nutrition education and physical activity in the schools, Siskiyou's LHD will collaborate with schools to create and/or enhance wellness policies and wellness committees to improve the school environment along with encouraging and supporting healthy food and beverage choices and daily physical activity.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

The 2015 California Child Care Portfolio has identified that 44% of the children aged 0-5 in Siskiyou county are living in poverty, which is significantly higher than California's state average of 23%. Siskiyou County SNAP-Ed LIA partners will focus on nutrition and physical activity education in addition to PSE efforts in preschools, early childcare centers and providers, along with other community based organizations. Creating strong relationships with Siskiyou County Women Infants and Children (WIC), Siskiyou County Human Services, First 5 Siskiyou, Siskiyou Childcare Council and other organizations that provide services to young children and their families will be a priority.

Another area of priority is access to healthy food. Siskiyou's SNAP-Ed 2015 County profile indicates that 8.5 % of our residents have limited access to food. Siskiyou's LHD plans on continuing their collaboration with the health department's Tobacco Education Program and their Healthy Stores for a Healthy Community campaign to improve availability and marketing of healthy foods. Siskiyou County SNAP-Ed partners plan to be collaborating with several local farmer's markets and producers in Siskiyou County, along with school and community gardens to aid in improving access and encouraging consumption of local foods. Local food producers, Farmer's Market and community gardens coordinators will be encouraged to take active roles in Siskiyou's Community Nutrition Advisory Council (CNAC). Building relationships with these groups, as well as others, will be a strong priority. Taking into consideration all of the chronic disease data as well as the needs assessments, Siskiyou County's work plan was developed to include local intervention strategies that would provide maximum benefit to the SNAP-Ed eligible population.

The work plan was developed taking into consideration the PSA 2 Area Plan 2012-2016. According to the California Department of Aging, 14% of the 60+ year old population is living in poverty (≤ 125% FPL). It is recognized that residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. The aging of the population is particularly noticeable in PSA 2, where the senior population is already a significant element of the overall population and is continuing to grow. It is projected that the retiring "Baby-Boomers" will choose to retire within the PSA 2 Area Agency on Aging (AAA) area at twice the percentage anticipated for California as a whole. In 2013, PSA 2 found that more than 27% of seniors surveyed had issues around acquiring at least 2 meals per day as reported in the PSA 2 Area Plan. Furthermore, 75.7% of the seniors surveyed in Siskiyou County are at nutrition risk.

Also, the recently released UCLA's Center for Health Policy Research report entitled "Majority of California Adults Have Pre-Diabetes or Diabetes, A Third of Young Adults are Pre-Diabetic" was taken into account with creating Siskiyou's Integrated Work Plan. This reports highlights that 59% of all adults in Siskiyou County have pre-diabetes, diabetes, and undiagnosed diabetes. Ten percent of all Siskiyou County adults have diabetes. Sixty three percent of adults over the age of 70 have pre-diabetes or undiagnosed diabetes. It is well documented that a diagnosis of diabetes can decrease one's life expectancy by 8.5 years and in California, total health care and related costs for the treatment of diabetes is about $24.5 billion each year. Healthy lifestyles are crucial for preventing and treating pre-diabetes and diabetes. Siskiyou County SNAP-Ed partners are committed to improving demand and access to healthy foods and will collaborate with partners to promote healthy lifestyles for all ages in Siskiyou County.

As reported by the California Food Policy Advocates "Lost Dollars, Empty Plates" 2015 report, CalFresh benefits support households by increasing their ability to purchase adequate amounts of nutritious food. But CalFresh benefits are not just a safety net for individual Californians. USDA has shown that every dollar in SNAP expenditures generates $1.79 in economic activity. Besides helping households meet their nutritional needs, CalFresh benefits exert a multiplier effect that stimulates the economy at large. The table below shows Siskiyou County's utilization of Cal Fresh. If CalFresh reached all potentially eligible individuals, Siskiyou residents would receive an additional $3,540,000 in federally funded benefits each year. Those benefits would result in $6,330,000 of additional state and local economic activity. Our partnership with the local CalFresh office and the promotion of CalFresh is crucial to help increase CalFresh enrollment and EBT use.

CalFresh Utilization	Siskiyou
Rank out of California's 58 counties in Utilization of CalFresh	20th
Participation in the CalFresh Program	
Estimated number of income-eligible individuals	9,896
Average monthly CalFresh participants	6,532
Percentage of participation	66%
Estimated number of income-eligible non-participants	3,365
Percentage of income-eligible non participants	34%

5. Community Change Goals

Siskiyou County's SNAP-Ed funded LIAs will focus their efforts on the SNAP-Ed eligible portion of the county's population and on SNAP-Ed allowable interventions and activities which align with the United States Department of Agriculture-Western Regional Office Evaluation Framework. We have identified the following community change goals:

Increase access and consumption of healthy foods and beverages

- Increase knowledge and skills for healthy eating in Siskiyou County
- Promote and support interventions to increase access and consumption of healthy foods and beverages
- Support school and community gardens
- Support farmer’s markets and local producers
- Support community and school wellness policies
- Increase food security in Siskiyou county residents
- Increase capacity of our CNAC group to aid in strengthening our local food systems in low income areas

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

Increase access to opportunities for physical activity and healthy lifestyle choices

- Promote and support interventions to increase access to physical activity opportunities and healthy lifestyle choices among the Siskiyou County residents including after-school programs, early childhood centers, congregate meal sites, community based organizations, sports organizations and/or emergency food assistance at SNAP-Ed eligible sites within Siskiyou County.
- We recognize and embrace that these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. The Siskiyou County SNAP-Ed LIA partnership has committed to contribute with specific objectives under these larger community goals, based on agency expertise and as stated in the SNAP-Ed Goals and Objectives.

Specifically, Siskiyou County SNAP-Ed LIAs will achieve the following three-year objectives:

1. By September 30, 2019, at least 4 schools within one qualifying school district and at least three early childhood centers (ECE) will update, develop and/or implement policies and procedures, including making healthy site changes to improve the nutrition and/or physical activity for participating children.
2. By September 30, 2019, will reach at least 2000 Siskiyou County SNAP-Ed eligible residents across the life span through SNAP-Ed funded education opportunities, and create healthier communities within Siskiyou County by increasing healthier food and beverages options and promoting physical activity at a minimum of 5 SNAP-Ed qualifying sites by adopting and implementing polices and/or physical site changes.
3. By September 30, 2019, increase demand and access to healthy fruits and vegetables to all SNAP-Ed eligible Siskiyou County residents by partnering with three local farmer's markets and/or local producers and three community/school gardens and provide a minimum of 15 afterschool programs annually with direct and indirect education through HOTM, nutrition PA education and gardening activities and materials.

These objectives allow us to focus on our larger community change goals with the framework of the SNAP-Ed funds. We will focus on the following PSE strategies in the following settings:

- Early Childhood Education Settings
- Farmer's Markets
- School Settings
- Healthy Retail Environment
- Community and School Gardens
- Farmer's Markets

The PSE strategies are detailed with each three-year objective and provide details to the connection to our community change goals.

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

Siskiyou County's Community Nutrition Advisory Council (CNAC) includes FNS funded and unfunded community partners serving the county in a variety of food programs, nutrition education and physical activity promotion. One goal is to coordinate USDA food program interventions and efforts to increase food security and availability of locally grown fresh produce within the community at large as well as the target population. A strategic plan will be enhanced with target objectives to provide access to healthy foods, beverages and physical activity. The CNAC group will meet at least twice a year.

The CNAC members represent the following agencies and CBOs: Siskiyou Co. Department of Social Services; Public Health; WIC; local food growers involved in farmer's markets and community gardens; Siskiyou Co. Office of Education; Siskiyou Co. Cooperative Extension; Siskiyou Family YMCA; Great Northern Services (food commodities); PSA 2 AAA; Siskiyou Co. Economic Development Council; Siskiyou First 5; Faith-Based Nursing; Fairchild Medical Center; and Northern Valley Catholic Social Service (NVCSS).

Siskiyou CNAC recognizes the value of the SNAP-Ed funding within the county and works diligently to include USDA FNS SNAP-Ed funded partners as well as unfunded community partners to ensure a well-informed and balanced approach for increased access to healthy foods and beverages, fruit and vegetable consumption, food security, physical activities and healthy lifestyle choices in our target population.

Local Implementing SNAP-ED funded Agencies (LIA) include Siskiyou County Public Health (LHD), North Valley Catholic Social Services (CCC), and Center for Healthy Communities - PSA2 (AAA) will meet quarterly or more often as needed. Meetings will ensure SNAP-Ed activity collaboration between LIAs, and that the county is being represented in all areas of need and eliminates any confusion or site duplication. Other County partners include our tobacco education program colleagues and we will be working closely with them on our combined healthy retail strategies. Siskiyou County SNAP-Ed services and activities are also promoted through connections with other agencies, such as the County Welfare Department, etc.

7. Key Messages

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, Nutrition Education Obesity Prevention (NEOP) Branch Approved Resources List, California Department of Aging, Catholic Charities of California and/or CA SNAP-Ed Integrated Curricula List. All materials, resources, and curriculum have also been identified for each objective proposed in this work plan under Section C.

9. Intervention and Evaluation Plan Narrative Summary

The implementing agencies in Siskiyou County (LHD, AAA and CCC) will collaborate to provide comprehensive multi-level behavior-focused nutrition education/physical activity promotion and advocate for increased consumption of locally grown healthy foods; participate in community events, training and technical assistance, while utilizing media and public relations and coordinating/collaborating with community-based partners. The agencies will promote the 2015 Dietary Guidelines and SNAP-Ed intervention strategies proven to change behavior as noted in the updated January 2016 SNAP-Ed Interventions: A Toolkit for States.

All three LIAs will conduct activities at the individual, interpersonal and environmental levels of the Social Ecological Model. All three LIAs will share duties regarding training and technical assistance, community/nutrition direct and indirect education, as well as media, social media, public relations, messaging and coordination and collaboration. All three LIAs collaborated to create the Integrated Work Plan to ensure success in the completion of its goals and objectives.

Siskiyou County Health and Human Services – Public Health Division (LHD) Intervention Strategies will provide a variety of nutrition education/physical activity promotional opportunities to the following SNAP-Ed eligible populations by utilizing the identified approved interventions:

Community Setting—Nutrition Strategies

- Adults: contact through the retail market environment, HOTM newsletters, and parent/family group activities at Family Resource Centers (FRCs)
- Community: provide nutrition and PA educational materials, displays and tastings at annual county fairs, health fairs, farmer's markets, USDA commodities food sites, emergency food assistance programs, and farmer's markets
- Media: public relation efforts related to identified campaigns
- Training: agencies will provide training to community partners to provide consistent, appropriate intervention strategies
- PSE: Collaboration with Tobacco Education program to improve retail environments, farmer's market, emergency food assistance programs and/or community based organizations.

Community Setting—Physical Activity Strategies

- Build capacity**:** to implement active living policies at the community level and by community organizations
- Coordinate campaigns**:** to promote healthy eating/drinking and physical activities including Walk-to-School-Day and Bike-to-School-Day.

School Setting—Nutrition Strategies

- Early childhood: provide direct and indirect education through HOTM, nutrition, PA education, and gardening activities and materials
- Youth: implementation of HOTM, MyPlate, RYD, PA and gardening activities in schools, and other community-based settings along with physical activity promotional events.
- PSE activities: encouraged through developing and updating wellness policies at schools

School Setting—Physical Activity Strategies

- Establish strong school wellness educational programs and policies
- Support student access and participation in physical education and recess
- Partner with eligible after school sites, preschools, child care settings to promote additional physical activity opportunities.

CNAP (all LIAs)

- Strategic plans will be enhanced to coordinate USDA food program interventions and efforts to increase the consumption/availability of fresh fruits and vegetables and improve food security in the community.

The Center for Healthy Communities ("CHC," AAA PSA2-LIA) aims to educate low-income seniors and congregate meal site staff and volunteers in an effort to improve their health and well-being. CHC will provide the full spectrum of services to low-income seniors at one congregate meal site. CHC will focus indirect education and PSE work, primarily the collaboration with all LIAs, other PSA 2 programs, Siskiyou County WIC, congregate senior meal sites, and farmer's markets to increase senior farmer's market program coupon redemption rate in Siskiyou County.

CHC Narrative Intervention Strategies

CHC will utilize the following approved interventions:

- Provide congregate meal site staff and volunteers ongoing training and technical assistance regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to the SNAP-Ed senior population.
- Provide direct education via single session classes at one approved congregate site. Single session education will focus on Rethink Your Drink, HOTM, MyPlate messaging and food safety (process evaluation; no impact/outcomes).
- Provide indirect education via displays, posters and flyers.
- HOTM materials will be utilized with all direct and indirect education for uniform messaging across ages/populations in the county. The LHD will utilize the same produce cycle and educational resources in activities delivered at other sites throughout the county.
- Provide environmental supports for increased consumption of healthy foods and beverages, food safety and increased physical activity among seniors at congregate meal sites via healthy food and beverage standard exploration and development. Currently, we have been reviewing food safety policies and practices at one of the congregate meal sites.
- Coordinate and collaborate with LIAs, other PSA 2 programs, Siskiyou County WIC, congregate senior meal sites, farmer's market and TCAN members to provide support in increasing the redemption rate of the Senior Farmer's Market Program in Siskiyou County.
- Coordinate with local SNAP-Ed LIAs to create a comprehensive county work plan and leverage resources for consistent messaging throughout Siskiyou County. All LIAs will be working on a concerted effort to increase fruit and vegetable access and consumption.

CHC Evaluation Plan Strategies

CHC will use a series of process evaluation protocols and fidelity measures to assess the trainings. Effectiveness of training on nutrition and physical activity will be measured by pre and post surveys. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings and identify possible environmental change efforts.

CHC will collaborate with PSA 2 and the California Department of Food and Agriculture (CDFA) in identifying yearly redemption rates of Senior Farmer's Market Coupons in Siskiyou County.

Evaluation of environmental supports will focus on changes in at least one senior congregate meal site where nutrition education is provided. The environmental changes resulting from the development/adoption of a healthy food and beverage policy will be measured using RE-AIM, as indicated in the Western Regional SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcome.

Northern Valley Catholic Social Service (NVCSS) will promote the SNAP-Ed vision of quality nutrition education, changing physical activity behaviors and addressing the nutrition concerns associated with: food security, reduced sugar consumption, consumption of healthy foods and beverages and promotion of SNAP-Ed message using media and social media outlets using Facebook, Instagram, Google and Twitter.

The activities NVCSS have identified are in line with the guiding principles of SNAP-Ed in that they include a combination of educational strategies, media and social media strategies, accompanied by environmental supports, designed to facilitate voluntary adoption of food and physical activity choices and are nutrition-related behaviors conducive to the health and well-being of SNAP-Ed eligible participants. It will also encompass the spread of social awareness of SNAP-Ed using SNAP-Ed approved educational curriculum to promote behavioral changes, community events, nutrition tips and facts, and physical activity.

School Based Strategies

- Provide direct education related to nutrition that promote healthy site changes including promoting the consumption of eating healthy foods and beverages.
- Implement playground stencil projects at early childhood educations sites.
- Assist with the coordination of Walk to school and/or Bike to School Day, along with additional health related promotional events.
- Implement direct education related to physical education and a reduction of sugary beverage consumption by promoting the importance of staying hydrated during physical activity.

Community Based / Low Income Housing Organizations

- Work with local youth sport leagues to increase consumption of healthy foods and beverages at youth sporting and community events.
- Provide nutrition education to means tested low income housing units and community resource centers to promote a healthy active lifestyle and a reduction of sugary beverage consumption.
- Utilize media and social media to promote SNAP-Ed nutritional messages and events such as Facebook, Instagram, Google, and Twitter.

Evaluation Strategies

Evaluation processes will be used to improve services for all local objectives. The LIA partners will use Formative, Process, Impact Outcome (IOE) and/or curriculum-specific evaluations to determine program effectiveness. SNAP-Ed Activity Tracking Form (ATF) will be updated quarterly. Education and Administration Reporting Systems (EARS) will be generated from the online ATF. All LHD PSE projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). The LHD will also assist Tobacco Education Program in re-assessing some

eligible retail stores to determine improvement in fresh produce availability. The LIAs will use a series of process evaluation protocols and fidelity measures will be used to assess the technical training and assistance. Effectiveness of training of nutrition and physical activity will be measured. The implementation of a pre-survey along with a post survey will be used in every training and nutrition and physical activity conducted with the SNAP-Ed population as is appropriate to do so, with the evaluation results used to revise and improve future activities.

SECTION B: Target Audience Description

1. Gender

Gender	%
Male	40%
Female	60%
Total:	**100%**

2. Age

Age	#
0 to 4 years old (Preschool):	500
5 to 17 years old (School Age):	1,000

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, at least 4 schools within one qualifying school district and at least 3 early childhood centers (ECE) will update, develop and/or implement policies and procedures, including making healthy site changes to improve the nutrition and/or physical activity for participating children.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Wellness Policies
- Promote physical activity and opportunities for active play.
- Healthy Food and Beverage Standards
- Promote the consumption of healthy foods and vegetables.

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, the LHD activities will reach 800 students and parents of school age children with direct and indirect education; and will provide training and TA, when requested; as well as support the development and/or implementation of a site wellness policy and assist in making changes in the school environment to promote physical activity in one school district.

b. By September 30, 2017, the LHD will reach 200 children aged 0-5 and parents with direct and indirect education and will provide training and TA related to nutrition and physical activity; as well as support healthy sites changes that promote physical activity and active free play in at least 1 ECE site.

c. By September 30, 2017, LIA will reach 50 children aged 0-5 / 5-17 and parents with direct education related to nutrition and physical education; and support healthy site changes that promote physical activity in at least 1 ECE site.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, the LHD activities will reach 800 students and parents of school age children with direct and indirect education; and will provide training and TA, when requested; as well as engaging in ongoing discussions with one school district in updating and expanding current wellness policy efforts and assist in making changes in the school environment to promote physical activity.

b. By September 30, 2018, the LHD will reach 225 children aged 0-5 and parents with direct and indirect education; and will provide training and TA related to nutrition and physical activity; and support healthy sites changes that promote physical activity in at least 2 ECE site.

c. By September 30, 2018, LIA will reach 52 children aged 0-5 / 5-17 and parents with direct education related to nutrition and physical education; and support healthy site changes that promote physical activity in at least 2 ECE site.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, the LHD activities will reach 800 students and parents of school age children with direct and indirect education; and will provide training and TA, when requested; as well as engaging in ongoing discussions with one school district in updating and expanding current wellness policy efforts and assist in making changes in the school environment to promote physical activity.

b. By September 30, 2019, the LHD will reach 250 children aged 0-5 and parents with direct and indirect education; and will provide training and TA related to nutrition and physical activity; as well as support healthy sites changes that promote physical activity in at least 3 ECE site.

c. By September 30, 2019, LIA will reach 55 children aged 0-5 / 5-17 and parents with direct education related to nutrition and physical education; and support healthy site changes that promote physical activity in at least 3 ECE site.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, at least 4 schools within one qualifying school district and at least 3 early childhood centers (ECE) will update, develop and/or implement policies and procedures, including making healthy site changes to improve the nutrition and/or physical activity for participating children.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Collaborate with school administrators, teachers and parents in at least one eligible school district to develop and/or implement (year 1) and engage in ongoing discussions with one school district in updating and expanding current wellness policy efforts and assist in making changes in the school environment to promote physical activity (year 2 & 3). • Meet with school district superintendent, school principals and food service director twice yearly to develop annual plans for school wellness efforts. • Provide ongoing technical assistance and training, as requested on nutrition and physical activity for school staff and parents. • Provide update to school boards members at least annually. • Attend parent teacher organization (PTO) meetings annually.	CED: ; CEI: ; MPR: ; C&C: X ; TTA: X	CWD: ; LHD: X ; AAA: ; UCCE: ; CCC: X	CWD: LHD: CSU, Chico Research Foundation AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Submit: ATF On File: Agendas Policy drafts Quarterly Reports Training materials and evaluations

1.2	Attend and/or facilitate six district level school wellness committee meetings annually at the targeted school district. • Work with a minimum of three school sites to become aware of their districts' SWP and to fully implement the SWP at their school. • Assist school sites to conduct environment and policy assessments to identify areas for improvement (year one) and create and implement action plan for improvement (year 2 & 3). • Identify opportunities for strengthening school wellness policy language. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, will reach at least 2000 Siskiyou County SNAP-Ed eligible residents across the life span through SNAP-Ed funded education opportunities and create healthier communities within Siskiyou County by increasing healthier food and beverages options and promoting physical activity at a minimum of 5 SNAP-Ed qualifying sites by adopting and implementing polices and/or physical site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Food and beverage policies/stocking standards
- Purchased/donated food policies
- Local Distribution Small Store Rural Problems
- Healthy in-store marketing and promotions
- Increase healthier food and beverage options

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017 Siskiyou County will participate and collaborate with the Tobacco Education Program at the LHD to identify qualifying retail sites which are part of the statewide healthy retail campaign assessing tobacco, alcohol and nutrition and provide healthy food and beverage merchandising materials, conduct taste testing of healthy food/beverage recipes to at least one eligible retailer identified in the healthy retail campaign.

b. By September 30, 2017, Siskiyou County LHD educational opportunities will be provided to reach at least 850 residents annually across the life span by promoting the consumption of healthy foods, beverages and encouraging an increase in physical activity at qualifying retail and/or farmer's markets, health fairs, county fairs, food commodities sites and/or emergency food assistance.

c. By September 30, 2017, Siskiyou County LHD will create a partnership and plan with at least one SNAP-Ed eligible site to promote healthy foods and/or increased physical activity.

d. By September 30, 2017, AAA/CHC activities will reach a minimum of 45 seniors annually by providing direct education, indirect education, training and technical assistance to staff and volunteers and assisting in healthier site changes at a minimum of one congregate meal site.

e. By September 30, 2017, CCC/NVCSS will coordinate and collaborate with at least 1 local sport organization to identify focus areas and develop an implementation plan to support healthy environment changes including the implementation of nutrition and physical education.

f. By September 30, 2017, CCC/NVCSS will provide single and series based nutrition education sessions that will focus on the technical training and assistance in meal preparation and food preservation through cooking and food demonstrations as well as promote the importance of a healthy active lifestyle through group physical activities like gardening to at least 1 low income housing site or community based organization.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, Siskiyou County SNAP-Ed Program will create an implementation plan for a healthy retail recognition program and provide healthy food and beverage merchandising materials, conduct taste testing of healthy food/beverage recipes to one retail stores in qualifying areas.

b. By September 30, 2018, Siskiyou County LHD educational opportunities will be provided to reach at least 900 residents annually across the life span by promoting the consumption of healthy foods, beverages and encouraging an increase in physical activity at qualifying retail and/or farmer's markets, health fairs, county fairs, food commodities sites and/or emergency food assistance sites.

c. By September 30, 2018, Siskiyou County LHD will continue in ongoing discussions with at least one identified SNAP-Ed eligible site in updating and expanding current wellness policy efforts and assist in making changes in the environment to promote healthy eating and physical activity.

d. September 30, 2018, AAA/CHC will reach a minimum of 50 annually by providing direct education, indirect education, training and technical assistance to staff and volunteers and assisting in creating a plan for healthy site changes at a minimum of one congregate meal site.

e. By September 30, 2018, CCC/NVCSS will coordinate and collaborate with at least 1 local sport organization to identify focus areas and develop an implementation plan to support a healthy sport environment changes including the implementation of nutrition and physical education.

f. By September 30, 2018, CCC/NVCSS will provide single and series based nutrition education sessions that will focus on the technical training and assistance in meal preparation and food preservation through cooking and food demonstrations as well as promote the importance of a healthy active lifestyle through group physical activities like gardening to at least 2 low income housing unit or community based organization.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019 Siskiyou County will implement a healthy retailer recognition program for qualifying stores and provide healthy food and beverage merchandising materials, conduct taste testing of healthy food/beverage recipes to 2 retail stores in qualifying areas.

b. By September 30, 2019, Siskiyou County LHD educational opportunities will be provided to reach at least 900 annually across the life span by promoting the consumption of healthy foods, beverages and encouraging an increase in physical activity at qualifying retail and/or farmer's markets, health fairs, county fairs, food commodities sites and/or emergency food assistance sites.

c. By September 30, 2019 Siskiyou County LHD will continue in ongoing discussions with at least one identified SNAP-Ed eligible site in updating and expanding current wellness policy efforts and assist in making changes in the environment to promote healthy eating and physical activity.

d. September 30, 2019 AAA/CHC will reach a minimum of 50 seniors annually by providing direct education, indirect education, training and technical assistance to staff and volunteers and assisting implementing healthy site changes at a minimum of one congregate meal site.

e. By September 30, 2019, CCC/NVCSS will coordinate and collaborate with at least 1 local sport organization to identify focus areas and develop an implementation plan to support healthy sport environment changes including the implementation of nutrition and physical education.

f. By September 30, 2019, CCC/NVCSS will provide single and series based nutrition education sessions that will focus on the technical training and assistance in meal preparation and food preservation through cooking and food demonstrations as well as promote the importance of a healthy active lifestyle through group physical activities like gardening to at least 1 low income housing unit or community based organization.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Siskiyou County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, will reach at least 2000 Siskiyou County SNAP-Ed eligible residents across the life span through SNAP-Ed funded education opportunities and create healthier communities within Siskiyou County by increasing healthier food and beverages options and promoting physical activity at a minimum of 5 SNAP-Ed qualifying sites by adopting and implementing polices and/or physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Collaborate and participate with the Tobacco Education Program at the LHD in the Healthy Retail Survey. Identify qualifying retail sites which are part of the statewide survey assessing tobacco, alcohol and nutrition.	( ) CED ( ) CEI ( ) MPR (X) C&C ( ) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: CSU, Chico Research Foundation AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	Submit: ATF Quarterly Reporting Surveys
2.2	Provide healthy marketing materials, which may include NEOPB Retail and Harvest of the Month signage, posters, newsletters and NEOPB recipe cards to qualifying sites and a minimum of one retailer and/or food bank/pantries/emergency food assistance sites annually	( ) CED (X) CEI ( ) MPR (X) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: CSU, Chico Research Foundation AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Submit: Before and After Photos Quarterly Reports

2.3	Conduct 1 Fruit and Veggie Fest celebration (year 1 & 2), conduct 2 Fruit and Veggie Fest celebrations (year 3) at qualifying retail and/or farmer's market site annually. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, increase demand and access to healthy fruits and vegetables to all SNAP-Ed eligible Siskiyou County residents by partnering with three local farmer's markets and/or local producers and three community/school gardens and provide a minimum of 15 afterschool programs annually with direct and indirect education through HOTM, nutrition PA education and gardening activities and materials.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- **Farmer's markets**
- **Community/School Gardens**
- **Increase farmers market awareness and implement gardening coordination**

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**
1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, the LHD activities will reach 15 afterschool programs providing direct and indirect nutrition education and gardening activities and supplies.

    b. By September 30, 2017, local SNAP-Ed funded and non-funded partners and local producers will collaborate with a minimum of one farmer's market to increase access to local fruits and vegetables.

    c. By September 30, 2017, AAA/PSA 2 will collaborate with other PSA 2 programs, one congregate meal site, and partners to identify barriers and create a plan for seniors to increase participation and Senior Farmer's Market Nutrition Coupons redemption rate at one local farmer's market.

2. **FFY 2018 (Year 2) Objective(s)**
    a. By September 30, 2018, the LHD activities will reach 20 afterschool programs providing direct and indirect nutrition education and gardening activities and supplies.
    b. By September 30, 2018, local SNAP-Ed funded and non-funder partners will collaborate and create a plan to increase access to local fruits and vegetables with a minimum of one farmer's market.
    c. By September 30, 2018, AAA/PSA 2 will collaborate with other PSA 2 programs, one congregate meal site, and additional partners to implement a plan to improve redemption rates of Senior Farmer's Market Nutrition Coupons in Siskiyou County.
3. **FFY 2019 (Year 3) Objective(s):**
    a. By September 30, 2019, the LHD activities will reach 20 afterschool programs providing direct and indirect nutrition education and gardening activities and supplies.
    b. By September 30, 2019, local SNAP-Ed funded and non-funder partners will collaborate, create and implement a plan to increase access to local fruits and vegetables with a minimum of one farmer's market.
    c. By September 30, 2019, AAA/PSA 2 will collaborate with other PSA 2 programs, one congregate meal site, and additional partners will update the plan on improving redemption rates of Senior Farmer's Market Nutrition Coupons in Siskiyou County.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Solano County

Three-Year
Integrated Work Plan
FFY 2017–2019

County Name: Solano

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	California Department of Public Health: CDPH: (Solano County Public Health: LHD)
X	California Department of Aging: CDA: (Area Agency on Aging – Serving Napa and Solano: AAA)
X	Catholic Charities of California: CCC: (Catholic Charities of Solano: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Solano County

Three-Year
Integrated Work Plan
FFY 2017–2019

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

Solano County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. **Jurisdiction Description**

Solano County is considered a large rural county located in the Bay Area region of California. It has a population of 431,131 with 25.9% SNAP-Ed eligible (income </= 185% FPL), including five qualifying census tracts in Vallejo and three in Fairfield. The majority of Solano County's SNAP-Ed programming is conducted in these cities. SNAP-Ed eligible people living in Solano county include 34.8% identifying themselves as Hispanic, 28.3% White (non-Hispanic), 20.3% African American (non-Hispanic), 9.6% Asian (non-Hispanic), 4.5% Multiracial, 1% Native Hawaiian/Other Pacific Islander, and 0.6% American Indian/Alaskan Native, and 0.9% another race. The primary language spoken in Solano county is English (70.7% speak only English) followed by Spanish at 16.4%, according to the 2014 American Community Survey. By age group, children under six were most likely to be SNAP-Ed eligible at 40.4%. Children 6-17 were next with 31.3%, adults age 18-64 at 23.6% then seniors age 65 and older and 20.7%. The 43,830 CalFresh participants represent 10.9% of Solano County's population.

Of the 96 census tracts in Solano County, 9 (9.4%) are SNAP-Ed eligible (>/= 50% incomes </= 185% FPL) based on all races data for 2007-2011. Of the 106 schools in Solano County, 59 (55.7%) are SNAP-Ed eligible. The adult overweight or obese prevalence in Solano County is 71.2% and 28.1% obese (compared to state rates of 62.5% and 27%, respectively). For children ages 2-11 years, the prevalence is 8.3% overweight (with no information on obesity rates) compared to 11.8% for the state. In children ages 12-17 years, the prevalence is 15% overweight with 42.5% obese (compared to state rates of 17.2% and 15.5%, respectively). Solano County has an overall food insecurity rate of 15.2% and a child food insecurity rate of 22.6%.

Solano County has a much higher daily intake of one or more sugar-sweetened beverages by adults of 48.7% compared to the state at 38.6%. Solano County does have a lower percent of fast-food restaurant intake by adults than the state 55.1% compared to 62.7%. Limited access to healthy foods affects 4.1% of Solano county's residents, compared to 3.2% for the state. Of adult residents, 20% report no leisure-time physical activity, compared to 17% for the state. For children and teens ages 2-17, 16.4% were physically active at least one hour every day. In children ages 2-11, that percentage is higher at 44.5%. For the state, children 2-17 years were 15.5% and 2-11 years were 31.7% for being physically active at least one hour per day. Given this data, Solano County SNAP-Ed eligible residents would stand to benefit from nutrition education paired with education focused on reduction of sugar-sweetened beverage intake as well as physical activity promotion.

4. **Community Assessment**

According to the 2015 annual county health rankings, compiled by the Robert Wood Johnson Foundation and the University of South Carolina Population Health Institutes, Solano County ranks 32nd among California's 57 counties. We learned that Solano is amongst the highest in diabetes rates (11%) with higher than state average adult obesity and physical inactivity rates, as described in the jurisdiction description above. The assessment data utilized to identify intervention strategies includes the following: information on demographics, health and community and environmental settings. We determined an area of unmet need in our county is a lack of coordinated approach to preventing diabetes and obesity. By utilizing a comprehensive set of assessment measures to inform the development of the work plan, Solano County SNAP-Ed local implementing agency partnership has identified the populations and areas of highest need and designed a strategy to implement a coordinated set of interventions that address all levels of the socio-ecological model and provide long term benefit to the SNAP-Ed eligible population.

Based on existing data sets, the following are examples of the assessment data used in Federal Fiscal Year (FFY) 2016 to complete the work plan which has been carried over into the FFY 17-19 work plan:

SNAP-Ed County profiles prepared by CDPH which includes county-level data from a variety of sources such as American Communities Survey (ACS) five year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey and Feeding American's Map the Meal Gap.

County Health Rankings and Roadmaps provided by the Robert Wood Johnson Foundation program, which provides county and state health rankings, with a variety of health measures.

Using our experience and working within SNAP-Ed eligible parameters, we worked with our county partners to choose our sites to maximize our impact through multiple interventions reaching the target audiences in a variety of settings.

5. **Community Change Goals**

Based on the community assessments, existing and new data were incorporated into our LIA assessment to help determine local need. We worked through our partnerships to determine our community change goals (that relate to this SNAP-Ed work plan). They include increasing consumption of and access to healthy food/beverages, increasing physical activity rates and focus on food/beverage policies or standards for qualifying organizations.

Through our community partnerships, we have determined that three areas of need are essential to increasing the overall health of Solano County.

1. Increasing consumption of healthy food especially fruits and vegetables and healthy beverages

· Improved food resource management strategies and education so SNAP-Ed eligible residents' funds are available to purchase healthy foods and beverages

· More community and school gardens

· Incorporate evidence based nutrition education into qualifying programs

· Increase food security throughout the county

2. Increasing physical activity rates for SNAP-Ed eligible residents.

· Support of Safe Routes to School activities

· Update Local School Wellness policies

· Integrate physical activity promotion into qualifying programs

· Partner with county and Bay Area wide physical activity promotion initiatives

3. Food and beverage policies

· Update Local School Wellness policies

· Implement food and beverage policies or standards with qualifying programs

· Support policies for donation standards for food pantries

· Support the Smarter Lunchroom Movement activities relating to school environment changes

· Conduct administrator, teacher, parent and student education

· Conduct youth and parent engagement

We recognize that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. The Solano County LIA partnerships has determined based on the larger community change goals, to set the two SMART objectives for FFY 17-19 around the following areas:

Local Objective 1: By September 30, 2019, LIA Partnership will assist up to three qualifying school districts (and their schools) in Solano County through Policy, Systems and Environmental changes to support healthy eating and physical activity in conjunction with nutrition education and physical activity promotion efforts at the schools and in their communities.

Local Objective 2: By September 30, 2019, LIA Partnership will assist up to nine qualifying organizations that serve the SNAP-Ed population by implementing healthy food/beverage and/or physical activity promotion policies or standards to support healthy eating and active living environments in conjunction with nutrition education and physical activity promotion efforts.

SNAP-Ed funding will work to support local SNAP-Ed eligible schools, neighborhoods and organizations. The three LIAs in Solano County and County Nutrition Action Plan (CNAP) will work together on the two local objectives listed above – each working within its population reach and area of expertise. The Solano County LIA Partnership is uniquely positioned to support these larger community change goals with work in nutrition education, media and public relations, coalition building, and training support and technical assistance. Much of the larger community change goal work will require additional funding to support capital improvements and policy advocacy, but the SNAP-Ed contribution will remain exclusive to SNAP-Ed eligible populations and allowable activities. Direct education is the foundation of SNAP-Ed. LIAs all provide nutrition and physical activity education, as well as support for policy, systems and environmental changes.

Local Objective 1 will focus on Policy, Systems and Environmental changes to support healthy eating and increase physical activity in eligible Solano County schools. This objective supports State Level Objective 1-5. LIA activities are listed below, and subcontractors will aid in providing services and working on policies

with Vallejo City Unified School District, Youth Engagement work and to continue school garden work, incorporate smarter lunchroom principles, encourage water promotion and support Safe Routes to School efforts in the Vallejo City Unified, Fairfield/Suisun Unified, and Vacaville Unified school districts. The non-SNAP-Ed partnership is also provided through the support of the Food Service Directors as well as Wellness Coordinators within the districts, and participation in the Food Agriculture and Nutrition Network of Solano County (FANNS) CNAP and the Solano School Health Collaborative.

The LIAs will work together to achieve Local Objective 2, which will focus on assisting with implementation of healthy food/beverage and/or physical activity promotion policies in organizations that serve SNAP-Ed eligible populations in Solano County. This supports State Level Objective 1-5. LIA activities are listed below, with each LIA working within its population reach and area of expertise. Community partners will support the effort through collaboration with FANNS (CNAP). To support this goal, community education direct and community education indirect will also be provided by implementing SIA Integrated Curriculum. We will work through multiple levels of the socio-ecological model before the highest level of policy change. Working through education and encouragement of knowledge and understanding helps to ensure more support of these changes. Working on organizational and community levels will allow us to identify champions, build and maintain community relationships, and work towards collective impact to help open the door for more successful policy, systems, and environmental change.

Both Local Objectives support and provide education and technical assistance for improved nutrition, and support opportunities to incorporate physical activity in daily lives. Both focus on a variety of activities using multiple levels of the socio-ecological model.

6. **Partnerships and Collaborative Efforts**

The Solano County SNAP-Ed LIA Partnership includes the Solano County Department of Public Health, Catholic Charities of Solano, and Solano/Napa Agency on Aging. All three partners are funded through the USDA SNAP-Ed funding, and work together to create the annual work plan and complete its activities. The partnership is led by the Work Plan Coordinator (WPC), housed at the Public Health Department. The WPC coordinates regularly via email and phone calls and quarterly in-person or phone meetings to assess work plan progress. The Solano County SNAP-Ed LIA partnership also participates as a part of the FANNS collaborative which is the CNAP. FANNS is a larger community health partnership that includes Food and Nutrition Service (FNS) funded and non-funded interested partners serving Solano County in the areas of food programs, agriculture, nutrition education and physical activity promotion. The group goal is to actively promote healthy eating and active living to low-income Solano County residents through promotion, environmental change, collaboration and resource sharing and education. A strategic plan has been developed to target objectives to provide access to healthy foods, beverages and/or physical activity. The group meets six times per year. Partners include Woman Infants and Children (WIC) Program, Nutrition Education and Obesity Prevention Program (NEOP), CalFresh, Food Bank of Contra Costa and Solano, Vallejo City Unified School District, Vacaville Unified School District, Fairfield Suisun Unified School District, Kaiser Permanente Community Benefits Program, Dairy Council, Solano Fit magazine staff, Head Start, Solano Coalition for Better Health, City of Fairfield, Catholic Charities of Solano, Area Agency on Aging, First 5 and Solano, Healthy Cooking with Kids, Child Start Inc, Vallejo Grown Garden Collaborative and Solano Public Health's Tobacco Control and Health Promotion and Community Wellness programs. FANNS (CNAP) recognizes the value of the SNAP-Ed funding within the county. The collaborative plans to include more unfunded partners from outside the traditional health community to ensure goals are met. Partners meet to

share assessment data, and develop community health goals (see Section 5 – Community Change Goals for more information). The Solano County SNAP-Ed LIA partnership is working to ensure its activities and objectives are aligned with the larger Collaborative, and will work with the larger Collaborative to achieve greater health outcomes for the county through integrated and mutually beneficial activities (both in the FFY 17-19 Work Plan and the larger community plan). LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as county welfare departments.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources and curriculum will be from the SIA Integrated Curriculum list. Solano County reviewed the approved integrated curriculum to determine the best curriculums for our target populations. Curriculum, materials and resources were chosen to best reflect the needs of the population as well as our chosen SNAP-Ed three-year and annual objectives. Most of the chosen curriculum is geared towards school-based settings, children and their families, and seniors to best meet our objectives as well as provide integration with our county SNAP-Ed partners.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies in Solano County will conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites. They will be assisted by subcontractors and extenders who will support these efforts. The intervention plan includes activities that provide comprehensive education on proper nutrition and physical activity; approaches, which when used in combination provide high strength intervention strategies, with implementation of nutrition education and physical activity (PA) focused direct delivery, staff training and coordinated implementation strategies for direct care and education providers, food service providers, and other staff that interface with and impact children in the multiple settings. Building upon relationships with schools and early childhood education already existing within the county, LIAs will continue to provide direct nutrition education and support physical activity education. LIAs will also provide train the trainer to support teachers, parents or other extenders to provide direct education in the classroom and in after school programs (as well as in the community

settings described below). Additionally, nutrition education will be provided to the adult and older adult SNAP-Ed population that connects food choice behaviors to better health outcomes as per MyPlate and Dietary Guidelines. Focus will be placed on selecting target foods and beverages; increasing the skills for label reading, menu planning and food budgeting; increasing knowledge of MyPlate recommendations and exposure to and acceptance of new healthy foods. Physical activity education support will also be provided, with focus on budget friendly and sustainable activities.

The intervention plan progresses to interventions at the environmental level of the Social Ecological Model (SEM) via the inclusion of policy, systems and environmental (PSE) change efforts that include gardens, Smarter Lunchroom, water promotion/healthy food and beverage standards and Safe Routes to School support for sites that support children. Healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries) will be implemented to support education efforts to improve nutrition and food resource management. Area Agencies will work with their congregate meal sites to adopt healthy food and beverage policies at mealtimes and encourage healthier choices.

Progressing to the sector level of the SEM, CNAP will continue to convene and LIAs will work to identify strategic partners to expand the reach of the group to improve nutrition and physical activity in Solano County by prioritizing, selecting and adapting the approach to the unique needs of our county. Also note the above mentioned nutrition standards also meet a sector-level approach.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process and outcome evaluation activities using State and locally developed surveys. The locally developed Report of Activity Form (RAF) will continue to be used to collect needed supporting documentation and verify SNAP-Ed Activity Tracking Form (ATF) and Reporting Tools Workbook (RTW) entries. Education and Administration Reporting System (EARS) and Semi Annual Activity Report results will be generated from the online ATF and quarterly RTW. Separate tracking of direct education taught by LIA staff and site staff trained by LIAs, will continue in an effort to better monitor effectiveness. Impact Outcome Evaluation (IOE) and UC CalFresh approved direct education evaluation tools and SMART objectives, designed to measure change in dietary and physical activity behaviors, food resource management and the factors that influence these behaviors will be completed by the LIAs. Participants will be requested to complete evaluation surveys that address, but are not limited to, the following indicators from the Western Region SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3) and Fruit and Vegetables (LT2) Physical Activity Recommended Labels (LT7) and Entertainment Screen Time (LT8). At the environmental level, LIAs will also report as appropriate on the following SNAP-Ed Evaluation Framework priority indicators – Identification of Opportunities (ST4), Partnerships (ST6), Nutrition Supports Adopted (MT4) and Physical Activity Supports Adopted (MT5). An IOE Plan and Report will be submitted annually by LHDs and other LIAs will also collect, report and use evaluation data as well. All LHD PSE projects will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). Other interested LIAs may also utilize the RE-AIM reporting as appropriate. The locally developed PSE tracking forms have made it consistently easier to monitor PSE site efforts and complete the RE-AIM Access database. Reports generated from the database will be used to track, inform and improve continued PSE program efforts in Solano County as well.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, LIA Partnership will assist up to three qualifying school districts (and their schools) in Solano County through Policy, Systems and Environmental changes to support healthy eating and physical activity in conjunction with nutrition education and physical activity promotion efforts at the schools and in their communities.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy Food and Beverage
  - Smarter Lunchroom Movement (SLM)
  - Gardens
  - Water Stations/water promotion
- Physical Activity
  - Safe Routes to School

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, SNAP-Ed funded partner activities will reach 3350 students and their family members through direct education and 4000 through indirect education; and will provide training and TA, as well as support garden efforts, Smarter Lunchroom strategies, water promotion and other healthy food and beverage strategies and/or physical activity with identification and adoption in 2 of these school sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Solano County

Three-Year
Integrated Work Plan
FFY 2017–2019

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, SNAP-Ed funded partner activities will reach 3350 students and their family members through direct education and 4000 through indirect education; and will provide training and TA, as well as support garden efforts, Smarter Lunchroom strategies, water promotion and other healthy food and beverage strategies and/or physical activity in 4 of these school sites to include implementation work at the two schools identified in 2017 plus identification and adoption at two additional schools.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, SNAP-Ed funded partner activities will reach 3350 students and their family members through direct education and 4000 through indirect education; and will provide training and TA, as well as support garden efforts, Smarter Lunchroom strategies, water promotion and other healthy food and beverage strategies and/or physical activity in of these 6 school sites to include implementation work at the four schools identified in 2017-2018 plus identification and adoption at two additional schools

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Convene FANNS (CNAP) group at a minimum of five times per year to implement the plan of action to provide nutrition education and physical activity promotion and improve access and availability of healthy foods and beverages and opportunities to be physically active to implement change to school environments (Also under Local Objective 2, Activity 2.6). Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, LIA Partnership will assist up to nine qualifying organizations that serve the SNAP-Ed population by implementing healthy food/beverage and/or physical activity promotion policies or standards to support healthy eating and active living environments in conjunction with nutrition education and physical activity promotion efforts.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Healthy food and beverage policies
- Purchased/donated food policies

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, SNAP-Ed funded partner activities will reach 700 community residents through direct education and 4000 through indirect education.

    b. By September 30, 2017, identify food pantry and partners for improvement in standards to support healthier food options (food pantry plus five partners).

    c. By September 30, 2017, establish policy to support healthy food, beverage, and or physical activity at one senior congregate meal site.

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, SNAP-Ed funded partner activities will reach 750 community residents through direct education and 4000 through indirect education.

    b. By September 30, 2018, draft purchased/donated food policy at previously identified pantry and partner locations and identify further partners (two additional pantries and four additional partners).

    c. By September 30, 2018, establish policy to support healthy food, beverage, and or physical activity at two additional senior congregate meal sites and continue to support and expand work at FFY17 site.

2. **FFY 2019 (Year 3) Objective(s):**

    a. By September 30, 2019, SNAP-Ed funded partner activities will reach 790 community residents through direct education and 4000 through indirect education.

    b. By September 30, 2019, implement purchased/donated food policy at two pantry sites and with two partners.
    c. By September 30, 2017, establish policy to support healthy food, beverage, and or physical activity at two senior congregate meal sites and continue to support and expand work at previous three sites (FFY 17-18).

X	Catholic Charities of California: CCC: (Catholic Charities of California, Catholic Charities of the Diocese of Santa Rosa: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Demographics

Located approximately 50 miles north of San Francisco, Sonoma County is a largely rural region with a population of 487,469. Eight of its nine cities are home to populations of fewer than 60,000, while Santa Rosa, the county's largest city, has a total population of 174,782.[1] Of this population, 27 percent (128,129) are SNAP-Ed eligible (income ≤185%FPL), with 41 percent of these residents identifying themselves as Hispanic/Latino, 50 percent White, four percent Asian, and five percent as multiracial or another race. Approximately 60 percent of Sonoma County's population is between 19 and 64 years old. Approximately 26 percent of Sonoma County residents speak a language other than English while at home.[2] In public schools, 23 percent of students are English Learners. Of these students, 93 percent speak Spanish and seven percent other non-English languages.[3]

Geography and Food Environment

Of the 99 census tracts in Sonoma County, three are SNAP-Ed eligible (≥50% of all races have incomes that are ≤185% FPL) and 44 are eligible by various ethnic group (≥50% have incomes ≤100% FPL).[4] A food environment assessment conducted in 2012 showed that in three of these census tracts there are three to 10 times unhealthy food sources (i.e., convenience stores, fast food restaurants) as there are healthy food sources (i.e., farmers' markets, supermarkets).[5] In addition, only 42 percent of SNAP-Ed eligible adults in Sonoma County report that they can always find affordable fruits and vegetables in their neighborhood.[6] Additionally, Robert Wood Johnson Foundation's County Health Rankings and Road Maps (2010) showed that nearly four percent of Sonoma County's low-income population has limited access to healthy food, which is slightly higher than the state (three percent).

Poverty and Food Insecurity

According to 2009-2013 census data, 12 percent of Sonoma County residents live at or below the Federal Poverty Level (FPL). Poverty rates vary significantly by ethnicity. Significant disparities exist, especially for Sonoma County Hispanics/Latinos, who experience a higher rate of poverty (20 percent) than Whites or Asians (nine percent and 12 percent, respectively). Additionally, 25 percent of Hispanic/Latino children in Sonoma County are living in poverty. Other data sources show that while CalFresh participants represent approximately eight percent of Sonoma County's total population, the number of income eligible individuals may be as high at 15 percent.[7] The county has an overall food insecurity rate of 13 percent and a child food insecurity rate of 21 percent. However, given the high cost of living in Sonoma County, it is generally accepted that an annual income under 200% of FPL

[7] Sonoma County Nutrition & Food Security Profile, California Food Policy Advocates, Updated 8/26/15, http://cfpa.net/county-profiles.

($21,660 for an individual) is inadequate to meet basic needs for food, clothing, shelter, transportation, health care and other necessities. With nearly 30 percent of Sonoma County residents live at or below 200% of FPL, a significant portion of the County likely has trouble making ends meet.

Schools, Youth Obesity Rates, and Nutrition and Physical Activity Behaviors

Of the 111 elementary schools in Sonoma County, 57 (51 percent) are SNAP-Ed eligible [AT1] (≥50% FRPM Enrollment, 2014). According to the California Department of Education FITNESSGRAM 2014-2015 report, in Sonoma County 39 percent of 5th graders were overweight or obese. The problem is even greater among Hispanic/Latino children and children from low-income households, with the same data showing that 50 percent of Hispanics and 49 percent of socioeconomically disadvantaged 5th graders are overweight or obese. FITNESSGRAM data also showed that 73 percent of Sonoma County 5th graders did not meet 6 out of 6 physical fitness standard areas. The problem is even greater among Hispanic/Latino children and children from low-income households, with the same data showing 81 percent of Hispanics/Latinos and 81 percent of socioeconomically disadvantaged students not meeting the requirement. Data also show that while 71 percent of children (2-11 years) ate five or more servings of fruits and vegetables yesterday, school specific data in the SNAP-Ed target neighborhoods shows lower rates of fruit and vegetable consumption, as outlined in Section 4. Finally, while county level data only shows soda consumption for children and teens (27 percent), it is important to note that Sonoma County has one of the highest rates of soda consumption in the state.

Adult Obesity Rates and Nutrition Behaviors

Among Sonoma County adults, overweight or obesity prevalence is 63 percent overall and 70 percent among SNAP-Ed eligible adults. Approximately a third of adults (34 percent) are eating the recommended five or more servings of fruits and vegetables a day, however 68 percent of Sonoma County SNAP-Ed eligible adults report having consumed fast food one or more times in the past week. In addition, a recent survey of 1,637 adults attending SNAP-Ed nutrition education lessons between July 2015 and June 2016 showed that participants drank 1.76 servings of sweetened drinks on average the previous day, with men (2.26 servings), non-Hispanics (1.82 servings), and those reached at the County CalFresh office (1.82 servings) and family shelters (2.85 servings) reporting the highest frequency of sweetened drink consumption.

Breastfeeding

In Sonoma County, approximately 40 percent of the babies receiveing WIC benefits are being exclusively formula fed from birth to 12 months and 20 percent are being both breast and formula fed during this same period (WIC Management Information System, 2016). Additionally, the Maternal and Infant Health Assessment Survey (2013-14) shows that the rate of any breastfeeding drops 9.9 percentage points between 1 month and 3 months after delivery and the rate of exclusive breastfeeding drops 13.9 percentage points during the same period. As community clinics are a main point of care for many low-income post-partum mothers after they leave the birthing hospital, partnering with clinics to improve breastfeeding rates is an important strategy.

Senior and Homeless Populations

The number of seniors age 85 and older is projected to triple between 2010 and 2050. According to the American Community Survey published November 16, 2015, there are 118,951 individuals age 60 and older in Sonoma County, comprising 24 percent of the county's total population (one-year estimate). The number of seniors in Sonoma County represents a growth of six percent since 2012 and 25 percent since 2008. Women age 60 and older (55 percent) significantly outnumber men. Sonoma County ethnic groups other than whites (Latino and all other ethnicities/races combined) age 60 and over comprise 14 percent of the population, an increase of 12 percent over 2012 and 24 percent over 2008. Specifically, this non-white population includes eight percent Latino and six percent other ethnicities/races. Like the rest of California, Sonoma County is becoming more diverse, though at a slower rate than many counties. According to California Department of Finance projections, by 2020 individuals other than white non-Latinos will represent 21 percent of the total senior population in Sonoma County, of which Latinos will continue to be the largest group at 12 percent of the total senior population.

At risk seniors include those with disabilities (with 29 percent having a disability compared to 12 percent of the total population); low incomes seniors (24 percent of seniors age 60 and older live in poverty and for seniors 75 and older, the figure is 32.5 percent); seniors age 85 and older (of which Sonoma County is home to 12,434); and seniors who are geographically isolated (36 percent of the total senior population live in unincorporated towns and rural areas, 50 percent of whom are considered “geographically isolated” based on the definition in the Older Americans Act).

Another significant population of Sonoma County is the homeless population. Each year, homeless service agencies in the area lead a point-in-time count to gather information about the number and needs of homeless individuals living in Sonoma County. The most recent count conducted in January of 2015 found 3,107 homeless persons in Sonoma County, 67 percent (2,070) of whom were unsheltered. In Santa Rosa, 1,856 homeless persons were found, 65 percent (1,204) of whom were unsheltered. Eighty-five percent of these individuals were residents of Sonoma County before they became homeless. Data compiled by the National Health Care for the Homeless Council indicates that homeless individuals regularly experience nutritional compromise including those who are shelter fed and particularly those who live in motels. Many services are available to homeless adults and children in Sonoma County, including emergency shelter, drop-in centers, emergency food resources, and daily congregate meal sites. However, based on the mobile nature of their lifestyle, nearly all individuals experiencing homelessness also experience food insecurity.

Other Nutrition-Related Programs

Throughout Sonoma County, collaborative efforts are under way to address the health and behavioral disparities related to obesity prevention. These efforts includes

- **Sonoma County Department of Health Services:** *South Santa Rosa Healthy Eating, Active Living (HEAL) Initiative*; *Countywide Safe Routes to School Program*; Women, Infants, and Children (WIC); and the Sonoma County Breastfeeding Coalition.
- **Sonoma County Human Services, Area Agency on Aging**: Coordinates and provides senior services, including nutrition education, congregate meal sites, home-delivered meals and injury prevention services throughout Sonoma County.
- **Catholic Charities of the Diocese of Santa Rosa:** Runs food distribution sites and CalFresh outreach and enrollment, in addition to nutrition education targeted to homeless, veterans and immigrant populations.
- **Kaiser Permanente:** *Thriving Schools*; *Educational Theatre Program*; *Helping Homeless Families Thrive;* and various Community Benefit Grantees addressing healthy eating and physical activity.
- **Santa Rosa Memorial Hospital:** Healthy eating and active living priorities, including *Healthy for Life* school-centered obesity prevention program, *Promotores de Salud* health promotion program, and *Agents of Change Training in Our Neighborhood (ACTION)* leadership training for residents in low-income neighborhoods.
- **Redwood Empire Food Bank:** Emergency food distribution sites, such as food pantries, throughout the County. Provides fresh fruits and vegetables and other healthy options to clients.
- **Northern California Center for Well-Being:** Healthy eating, physical activities, diabetes and heart disease prevention programs, including Promotores de Salud Program, Worksites Wellness, Active Recess, managing pre-diabetes courses, and a post-surgery wellness course for cardiac patients.
- **Redwood Community Health Coalition**: A network of 17 community health centers focusing on CalFresh outreach and enrollment.
- **Farmers' Market Life Coalition**: Collaborative of 12 local farmer's market managers that meet to discuss promotion and usage of EBT in farmer's markets throughout Sonoma County.
- **Council on Aging:** Provides meals to seniors through the *Meals on Wheels* program and congregate meal sites.
- **WIC:** All three WIC agencies in Sonoma County give breastfeeding support and education to all pregnant and post-partum women. In addition, if a pregnant mother wants additional breastfeeding support she can also enroll in the Breastfeeding Peer Counseling Program, which provides more extensive breastfeeding support and education to WIC participants during pregnancy and continuing throughout the first six months of baby's life.
- **Sonoma County Breastfeeding Coalition:** Overees the development of a breastfeeding resource guide, which includes a directory of breastfeeding support groups and professiontal breastfeeding help.

4. **Community Assessment**

In 2013, the County Nutrition Action Plan (CNAP) Workgroup developed a list of criteria that assisted in the prioritization and selection of SNAP-Ed-eligible communities in order to reach the most disparate and underserved populations. The criteria selected by the group for prioritizing neighborhoods includes the following: 1) census tract/block group is SNAP-Ed qualifying, 2) SNAP-Ed census tract/block group aligns with Portrait of Sonoma census tracts with the lowest Human Development (HD) Index scores, 3) includes a SNAP-Ed qualifying school located in or whose catchment intersections with a qualifying census tract/block group, 4) means-tested program sites are located inside the qualifying census tract/block group or qualifying school catchment, and 5) non-means tested sites, including retail food outlets, are located inside a qualifying census tract/block group. In addition to this criteria, DHS added an additional layer to neighborhood prioritization which includes a population equal to and/or greater than 1,000 people in each qualifying census tract in an effort to reach a relatively significant population of low-income residents. Based on this criteria, DHS staff prioritized the following target neighborhoods for FFY 2017 – 2019: Fetters Hot Springs/Agua Caliente West (Sonoma Valley), Rohnert Park's A-Section, and the southwest Santa Rosa neighborhoods of Roseland and West End.

Improve Food Environments at SNAP-Ed Eligible Sites

Each of the neighborhoods listed above face considerable barriers to the consumption of and access to healthy food and beverages by the residents who live there.

Boyes Hot Springs

- Boyes Hot Springs has a total population of 5,282 and has a HD Index score of 3.41 of 10 and placing the census tract 96 out of 99 for communities with the most unmet need.
- There is one SNAP-Ed qualifying elementary school in the Boyes Hot Springs neighborhood, with 64 percent of the student population eligible for free and reduced priced meals.
- There are three times more less healthy food sources (i.e. convenience stores, fast food restaurants) than there are healthier food sources (i.e. farmer’s markets, full service grocery stores, community gardens, etc.).
- In Boyes Hot Springs, at least 4 small markets have lost their SNAP and WIC licenses, decreasing the number of retail sites available for low-income residents to use their CalFresh benefits.
- The Springs Community Alliance and the Sonoma Valley Health Roundtable, two neighborhood groups in Boyes Hot Springs, have expressed interest in developing a culturally appropriate farmer’s market that accepts EBT in the Boyes Hot Springs neighborhood.
- There is one community clinic serving low-income residents living in the Boys Hot Springs neighborhood: Sonoma Valley Community Health Center.

Rohnert Park – B-Section

- Rohnert Park's B-Section neighborhood has a total population of 4,587 and a HD Index score 3.75 of 10 and placing the census tract 92 out of 99 for communities with the most unmet need.
- There is one SNAP-Ed qualifying elementary school in this neighborhood, with nearly 80 percent of the student population eligible for free and reduced priced meals.
- There is limited access to healthy foods and beverages in this neighborhood; there is one small market and two convenience stores. There are no farmer's markets, community garden or other alternative food sites in the neighborhood.
- There is a food distribution program that is run through the elementary school that sends one bag of food home with each student every week throughout the school year. In addition, the Boys and Girls Club runs a summer meal program on-site during the summer months.
- There is an incubator farm in a nearby SNAP-Ed qualifying neighborhood that could potentially serve as a food distribution and nutrition education site.
- The Rohnert Park-Cotati Health Action Chapter, a newly formed community group, has made access to healthy foods a priority area in their Charter. This group has expressed interest in developing a culturally appropriate farmer's market, an emergency meal site, and additional food access sites in low-income neighborhood in Rohnert Park and Cotati, including the B-Section neighborhood.
- There is one community clinic serving low-income residents living in the Roseland neighborhood: Petaluma Health Center in Rohnert Park.

Roseland

- Roseland has a total population of 4,046 and a HD Index score of 2.95 of 10 and placing the census tract 98 out of 99 for communities with the most unmet need.
- Neighboring census tracts of Roseland Creek (HD score of 99) and Sheppard (HD score of 97) have a combined population of 10,458, bringing the total population of all three census tracts to 14,504.
- There is one SNAP-Ed qualifying elementary school in this neighborhood, with 91 percent of the student population eligible for free and reduced priced meals.
- There are two additional SNAP-Ed qualifying elementary schools within a half-mile of the qualifying census tract, with 92 percent and 85 percent of the student bodies at each school eligible for free and reduced priced meals.
- There are seven times more less healthy food sources (i.e. convenience stores, fast food restaurants) than there are healthier food sources (i.e. farmer's markets, full service grocery stores, community gardens, etc.).
- There is interest among community members in the Roseland neighborhood to develop additional alternative food sites, such as a farmers' market and community garden.
- There are two community clinics serving low-income residents living in the Roseland neighborhood: Roseland Pediatrics and Southwest Community Clinic.

West End

- The West End neighborhood has a total population of 6,827 and a HD Index score of 3.51 of 10 and placing the census tract 94 out of 99 for communities with the most unmet need.
- There are two SNAP-Ed qualifying elementary schools in the West End neighborhood, with 95 percent and 89 percent of the student bodies at each school eligible for free and reduced priced meals.
- There are no full service grocery stores in the neighborhood.
- There are a few convenience stores in the neighborhood that tend to highlight and promote less healthy foods and beverages, and other products such as tobacco and alcohol.
- There are potential sites for alternative food sources in this neighborhood, including a farmers' market that accepts EBT and a small community garden on school grounds.
- There are two community clinics serving low-income residents living in the West End neighborhood: Roseland Pediatrics and Southwest Community Clinic.

Efforts in FFY 2017 – 2019 will focus on policy, systems, and environmental (PSE) change strategies in these target neighborhoods in order to increase access to healthier foods and beverages. These neighborhood PSE efforts will support what children and adults are learning via nutrition education at schools and other community sites (see information below).

Increase consumption of fruits and vegetables and increase physical activity among the SNAP-Ed eligible population

Healthy eating and physical fitness have been identified as top priorities in Sonoma County, particularly for low-income Latino adults and children based on the following health disparities:

- Higher rates of overweight and obesity among low-income Latino children (50 percent) in elementary schools compared to countywide rates (39 percent).
- Higher rates of overweight and obesity among SNAP-Ed eligible adults (70 percent) compared to all adults in Sonoma County (63 percent).
- Higher rates of overweight and obesity among Latino adults (82 percent) compared to White adults (60 percent).
- Among 5th grade students in the Sonoma Valley Unified School District, 18 percent report eating fruit two times in the past 24 hours, 10 percent report eating vegetables five or more times in the past 24 hours, 68 percent report having a sugary drink at least once in the past 24 hours, and 25 percent report getting at least 20 minutes of physical activity for five or more days in the past week. There is no current school level data for healthy eating and physical activity.[8]

[8] California Healthy Kids Survey results for 5th graders, 2013-14 school year.

- Among 5th grade students in the Cotati-Rohnert Park Unified School District, 24 percent report eating fruit two times in the past 24 hours, 10 percent report eating vegetables five or more times in the past 24 hours, 75 percent report having a sugary drink at least once in the past 24 hours, and 26 percent report getting at least 20 minutes of physical activity for five or more days in the past week. There is no current school level data for healthy eating and physical activity.
- Among 5th grade students at Roseland, Roseland Creek and Sheppard elementary schools, 41 percent report eating four or more servings of fruits and vegetables (yesterday)and engaging in 30 minutes or more of vigorous physical activity in and out of school, and 77 percent having a sugary drink at least once in the past 24 hours.
- Among 5th grade students in the Santa Rosa City School District, 24 percent report eating fruit two times in the past 24 hours, 12 percent report eating vegetables five or more times in the past 24 hours, 68 percent report having a sugary drink at least once in the past 24 hours, and 29 percent report getting at least 20 minutes of physical activity for five or more days in the past week. There is no current school level data for healthy eating and physical activity.
- In school physical fitness testing, only 19 percent of Latino 5th grade students in Sonoma County met 6 out of 6 criteria, compared to 36 percent of White children.

Efforts in FFY 2017 – 2019 will therefore also focus on providing best-practice nutrition education to children (ages 5-11) and their families (adults ages 18-64) in school and community based settings. In addition, best-practice physical activity lessons may also be provided to children in targeted SNAP-Ed schools. Each SNAP-Ed school setting will also focus on PSE changes to support the sustainability of these educational efforts.

5. **Community Change Goals**

Long-Term Goals: Sonoma County has a vision of being the healthiest county in California by 2020; a place where people thrive and achieve their life potential. To accomplish this, DHS, along with numerous other community partners, created a framework for community engagement to get residents involved in creating a healthier Sonoma County. The framework, called Health Action, has 10 goals to achieve the vision which includes all residents eating healthy food, being physically active, and being connected to their communities and participating in daily life. To help prioritize efforts built around the goals, DHS commissioned the Portrait of Sonoma (Portrait), which outlined neighborhoods with the most unmet need and an *Agenda for Action* that includes population-based and place-based intervention recommendations, including "improving neighborhood conditions to facilitate healthy behaviors." Additionally, the Healthy Communities Section of DHS recently drafted a strategic plan that outline the following goals: Sonoma County residents have equitable access to healthy, affordable, safe, and culturally appropriate food and beverage choices; Sonoma County residents recognize and make healthy food and beverage choices; Sonoma County promotes a sustainable food system that supports healthy communities and a healthy environment; and Sonoma County residents are physically active. The Portrait is used to better understand the disparities and gaps in opportunities that exist in Sonoma County and it, along with the Health Action goals, provides a framework for which unmet needs can be addressed. Finally, the Sonoma County Food Systems Alliance developed a Food Action Plan in 2012 to address areas of improvements needed for the local food system. This action plan includes goals related to increasing access to healthy, locally grown food and improving social equity across the food system in

Sonoma County. These community change goals were used in conjunction with SNAP-Ed guidelines as the framework from which decisions around the SNAP-Ed FFY 2017-2019 work plan were made.

SNAP-Ed Objectives & Policy, Systems, and Environmental Changes Strategies (PSEs): Efforts of Local Implementing Agencies (LIAs) (DHS, CCC, and AAA) will target four Portrait/SNAP-Ed census tracts listed in Section 4. The LIAs have developed two-3 year SNAP-Ed local objectives that help to support the broader community change goals:

1. By September 30, 2019, at least 4 low resourced schools and, contingent upon carry-in funding, 3 community clinics will develop and implement policies and programs to support improved nutrition and physical activity behaviors among children, parents, and, if selected by schools, teachers.

   This first objective helps to support the following community change goals: residents eat healthy food; residents are physical active; and residents recognize and make healthy food and beverage choices.

2. By September 30, 2019, increase access to and promotion of healthy fruits, vegetables and beverages in at least 14 SNAP-Ed qualifying neighborhood retail stores, at least 2 alternative food sites, at least 2 senior centers/public housing facilities, and at least 5 emergency food sites through adopted and implemented policy and physical site changes.

The second objective helps to support the following community change goals: residents eat healthy food; residents recognize and make healthy food and beverage choices; residents are connected to their communities and participating in daily life; residents have equitable access to healthy affordable, safe, and culturally appropriate food and beverage choices; and Sonoma County promotes a sustainable food system that supports healthy communities and a healthy environment.

These three-year local objectives help to support the community change goals by focusing on improving physical activity and healthy eating among infants (ages 0-12 months) through breastfeeding support, youth (ages 5-11) through direct education efforts in at least four elementary schools, and various churches, family resource centers, and low-income housing/temporary housing sites. Systems and/or policy change activities will take place in each setting to support the sustainability of education efforts and create environments where healthy eating is the norm. In an effort to support what youth are learning, adult education and improvements to the neighborhood food environment will take place. Direct nutrition education will be provided for the families of children at each school site and direct and indirect education will be provided to adults in the community so that families and neighbors can support what children are learning. This includes engaging vulnerable populations, such as seniors, homeless, and migrants. PSE strategies will be implemented in the community to improve food access and support what youth and adults are learning. These include, but are not limited to: the creation of at least two alternative food sites; adoption of donated food policies at food distribution sites; and establishing a retail recognition program at new retail sites as well as supporting continuing retail sites to make additional healthier in-store changes.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

For almost two decades, DHS has taken a collaborative approach to prevention in a variety of focus areas, including nutrition and physical activity, and has worked with various community partners to establish collaborations and partnerships to address obesity in Sonoma County. One such collaborative body is the Community Activity and Nutrition Coalition (CAN-C) of Sonoma County. CAN-C is a community-based coalition that was formed in 1998 with the mission to promote optimal nutritional and physical health for Sonoma County residents with an emphasis on children. The County Nutrition Action Plan (CNAP) Workgroup and the Healthy Students Initiative (HSI) Subcommittee are two subgroups of CAN-C, both working in the areas of nutrition education, healthy eating promotion, food access, and food service programs.

County Nutrition Action Plan Workgroup

The County Nutrition Action Plan (CNAP) Workgroup is a subcommittee of CAN-C and includes both Food and Nutrition (FNS) funded and unfunded partners serving SNAP-Ed eligible populations. The workgroup is coordinated by DHS staff and is chaired by SNAP-Ed funded partners. In FFY 2015, the CNAP Workgroup selected Healthy Retail as its priority strategy through FFY 2016. The CNAP Workgroup is currently working on moving the SNAP-Ed healthy retail strategy forward by focusing on the following areas: healthy retail recognition programming, healthy retail policy, and healthy retail community education and promotion. Over the next few months, the CNAP Workgroup will work with DHS staff to identify healthy retail standards and model policies which will be used later this year in the development of a countywide healthy retail policy. In addition to the primary healthy retail strategy, the CNAP workgroup continues to discuss promotion of and use of EBT at retail sites, including stores, farmer's markets, farm stands, and CSAs. In FFY 2017 – 2019, upon completion of full CX^3 Neighborhood Food Environment Assessments in each target neighborhood, the CNAP Workgroup will assist DHS in annually updating the CX^3 Food Access Implementation Plan. This group and its workgroups meet monthly to move strategic plan activities forward.

Healthy Students Initiative Subcommittee

The HSI subcommittee supports the adoption of policies and practices that support healthy eating and active living in schools, afterschool, and early care and education settings. The subcommittee is staffed by DHS and is chaired by one SNAP-Ed funded partner and one non-SNAP-Ed funded partner. This group meets monthly and includes representatives from several school districts and community partners actively working in schools in various capacities. In FFY 2015, the subcommittee chose to focus on school wellness policies in Sonoma County to drive the work towards supporting nutrition education, physical activity, and other wellness initiatives in Sonoma County.

In addition to CAN-C and its subcommittees, there are two other collaborative groups in Sonoma County whose goals align with SNAP-Ed goals and objectives. These groups include the Sonoma County Hunger Index Collaborative and the Farmers Market Life Coalition.

Hunger Index Collaborative

The Hunger Index Collaborative investigates the causes of hunger in Sonoma County and explores ways the network of service organizations can work to reduce the gap between the meals people in poverty need and what they are getting by on. The service organizations that participate include Sonoma County Department of Human Services, Redwood Empire Food Bank, and many other churches and alternative food sites within Sonoma County. The

Hunger Index Collaborative meets monthly. Within the Hunger Index Collaborative is the CalFresh Collaborative Workgroup, coordinated by Catholic Charities of the Diocese of Santa Rosa. The workgroup is comprised of CalFresh contractors working together to improve CalFresh usage in Sonoma County and meets monthly.

Farmers Market L.I.F.E. Coalition

The Farmers Market L.I.F.E. (Local Incentive for Food and Economy) Coalition is a group of farmer's market managers that meet monthly to improve the health of Sonoma County residents and enhance the financial viability of farmers by expanding access to affordable, locally grown food for CalFresh users.

Sonoma County Breastfeeding Coalition

The Breastfeeding Coalition has been actively working to promote and support breastfeeding in Sonoma County for the last 20 years. The Coalition has well-attended monthly meetings with representatives from local hospitals, clinics, WIC agencies, La Leche League, and Medi-Cal. The Coalition coordinates numerous breastfeeding related activities throughout the year, including a yearly breastfeeding conference.

WIC Agency Collaboration

Since 2012, the three Sonoma County WIC agencies, the Breastfeeding Coalition, and the five delivery hospitals in Sonoma County have been meeting to coordinate the Hospital Pump Loan Program. The purpose of this program is to ensure that WIC participants who need a hospital grade electric breast pump have access to one upon discharge. They then exchange the pump at WIC within a week after discharge for a WIC hospital grade pump.

LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as county welfare departments.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify):* Exclusive or partial breastfeeding through 12 months
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2017-2019** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document. Curricula and materials will be identified by schools and nutrition education contractor once contractors are awarded. Nutrition Education Contractor will select curricula and materials based nutrition education needs assessment conducted annually. Schools will select curricula based on each site's Healthy Schools Assessment, capacity, and individual school needs.

9. **Intervention and Evaluation Plan Narrative Summary**

The LIAs in Sonoma County – DHS, CCC and AAA – will collaborate to provide a **coordinated** and comprehensive, multi-level, behavior-focused nutrition education/activity promotion classes, community events, and training and technical assistance. This approach includes promotion of sites that accept EBT during direct and indirect nutrition education sessions and events conducted by all LIAs and/or subcontractors, and the use of consistent nutrition education messages (e.g. Harvest of the Month, MyPlate, etc.) in all SNAP-Ed nutrition education and PSE activities. The implementing agencies will also collaborate with partners throughout the county to accomplish these activities.

In addition, each LIA will be participating in the CX^3 program by implementing **complementary** activities in order to address needs identified in each neighborhood food environment assessment. In the past, DHS was the only LIA in Sonoma County involved in implementing CX^3 Neighborhood Food Environment Assessment and associated projects, and due to limited funding, was only able to address improvements in a few select areas: healthy

retail and alternative food sites. Over the next three years, however, all Sonoma County LIAs will be working in a variety of areas that will improve the overall neighborhood food environment assessments and address several of the modules available within the CX^3 program: retail stores, alternative food sites, and emergency food outlets. In order to avoid duplication of nutrition education events and PSE work at sites throughout the target neighborhood and other parts of the county, LIAs will continue to use the site selection process of reaching consensus on site additions and will streamline any changes to the targeting summary through the Work Plan Coordinator.

Finally, LIAs will work **collaboratively** with each other and with local partners in order to increase community engagement across different SNAP-Ed target audiences. These engagement strategies include, but are not limited to: the recruitment and training of Promotores de Salud (health promoters) and Health Trainers from target audiences and target neighborhoods to implement nutrition education via a peer-to-peer engagement model; engagement of neighborhood groups in target areas in order to plan, implement and evaluate PSE projects; and the promotion of SNAP-Ed education events at CalFresh offices, WIC offices, senior housing sites, homeless shelters, and other target audience sites, and via newsletters, community fliers, and at retail sites.

Objectives and activities will focus on school wellness efforts and increasing access to healthier foods and beverages in the target neighborhoods (Section 4) and are directly linked the identified community change goals (Section 5). Activities will be delivered in multiple venues that focus on the target audiences, are comprehensive in scope, and focus on multiple levels of the socio-ecological model: focus on the individual level (youth, SNAP-Ed eligible adults and seniors); focus on the interpersonal level (parents to support youth, adults to support their families); focus on the organizational level (schools, school districts, community clinics, retail and other food sites support the parents, families and seniors); and focus on the community level (CNAP and Healthy Students subcommittees support the schools, school districts, retail and other food sites). Delivery methods include:

School Wellness

- Implementing Agency: Local Health Department
- State Objectives: Three state objectives (increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages, increase physical activity, and increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of dietary choices where people eat, live, learn, work, play, or shop) will be supported throughout the three years through the implementation of nutrition and physical activity education, development of plans to sustain education through trainings and fidelity checks, individual school wellness improvements, and policy adoption.
- SEM Area(s): Individual (youth), interpersonal (parents to support the youth), organizational (schools and school districts to support the parents and families), community (Healthy Students Subcommittee to support the schools and school districts).
- Youth Direct Education: At the elementary school level, direct nutrition education (which includes lessons aimed at increasing fruit and vegetable consumption and decreasing sugary drink consumption) will be taught to 3rd - 4th grade students in FFY 2017 in at least 4 SNAP-Ed approved elementary schools and 3rd – 4th grade students in FFY 2018 and to 3rd - 5th grade students in FFY 2019 in at least 5 SNAP-Ed approved elementary schools.

- Adult Direct Education: Direct nutrition education will be provided to families of children at each elementary school site so that families can support what children are learning. Attendees will be provided with information about how to make healthier food and beverage choices. Attendees will also be provided with information on neighborhood retail and farmers' markets where they can use EBT and food distribution sites as well as information on how to sign up for food nutrition programs, such as Summer Lunch Program and the Federal Free and Reduced Price Meal Program. Promotoras, recruited from SNAP-Ed eligible neighborhoods will conduct the direct nutrition education for adults.
- Media, Social Media, Public Relations, and Messaging: Schools will distribute information on federal food programs to families of children at each elementary school sites receiving nutrition education.
- Training & Technical Assistance: Elementary school teachers will be trained on how to implement the curricula with fidelity. In addition, each school will receive training and on how to conduct Healthy Schools Assessment and technical assistance when implementing their chosen strategies.
- PSE (School Wellness): At least 4 elementary schools will use results from the Healthy Schools Assessment to identify and implement school wellness policy, systems, or environmental projects and/or physical activity programs activities during the 2016-17, 2017-18, and 2018-19 school years and support the sustainability of education efforts.
- Coordination and Collaboration: Elementary school staff will be asked to participate in two countywide collaboratives whose strategies are focused on school wellness and healthy retail. School staff will be asked to provide insight on improved coordination with schools in order to advance strategic efforts of each collaborative.
- Evaluation: (Process) Youth and adult nutrition education lessons will be monitored using tracking spreadsheets and participant data cards. (Outcome) The Healthy Schools Program Assessment will be used to evaluate change in programs and policies at each school. (Impact) Primary school multi-session lessons will be evaluated using the Impact Outcome Evaluation. A cohort of students will be followed during the 2017-2019 school years, starting in 3rd grade, and compared to a control group.
    - Improvement of Services: Information gathered through the school wellness evaluation will be used to not only improve and modify existing activities being implemented, but will serve as a model for school-based nutrition education and wellness programming that could be expanded to other areas of the County through other sources of funding.
    - SNAP-Ed Evaluation Framework: The evaluation plan for school wellness activities align with SNAP-Ed Evaluation Framework by using a mix of individual, environmental, influential, and norms and values indicators that will measure individual knowledge and skills among students and their parents; the school food and wellness environment; collaborative efforts between LIAs, community partners, and school decision-makers; and changes to school wellness policies to support and sustain activities implemented. Evaluation of PSE strategies will be based on the indicator summary sheets from the customized PSE/RE-AIM evaluation plans.
    - Evidence-Based Standards: All interventions will utilize approved curriculum and resources that are either research or practice-tested, and may include, but not limited to: the Alliance for a Healthier Generation's Healthy Schools Program, Coordinated Approach to Child Health (CATCH), Farm to School, Smarter Lunchrooms Movement, Harvest of the Month, and Rethink Your Drink.

Healthy Retail

- Implementing Agency: Local Health Department, Catholic Charities, and Area Agency on Aging
- State Objectives: Three state objectives (increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages; improve food resource management; and increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of dietary choices where people eat, live, learn, work, play, or shop) will be supported throughout the three years through the implementation of nutrition education to promote retail stores accepting EBT and increasing access to healthier food through environmental and systems changes within SNAP-Ed-eligible food retail stores.
- SEM Area(s): individual, interpersonal, organizational
- Direct Education: Direct education (single and multi-sessions) will be provided to adults at SNAP-Ed approved sites throughout Sonoma County, with a primary focus on the four neighborhoods outlined in Section 4, in an effort to promote retail stores accepting EBT. Attendees will be provided with information about how to make healthier food and beverage choices. Attendees will also be provided with information on neighborhood retail and farmers' markets where they can use EBT and food distribution sites as well as information on how to sign up for food nutrition programs, such as CalFesh and WIC. Promotoras, recruited from SNAP-Ed eligible neighborhoods will conduct the direct nutrition education for adults.
- Indirect Education: Food demonstrations and store tours will be provided to customers and community members in at least 14 retail stores in SNAP-Ed eligible census tracts. Some education activities will be conducted by Promotoras recruited from SNAP-Ed eligible neighborhoods.
- Training & Technical Assistance: Retail Business Liaisons (subgrantee(s) and/or resident) will be trained to provide technical assistance to store staff related to improving scores on the CX^3 Food Availability and Marketing Survey and Individual Store Quality Scorecard.
- Media, Social Media, Public Relations, and Messaging: Each retail site will receive marketing materials (e.g., Harvest of the Month signage, healthy snack and beverage signs, and recipe cards) and will receive assistance from Business Liaisons on how to effectively display materials in store.
- PSE (Healthy Retail): The subgrantee(s) and community partners will support retail stores in meeting retail recognition standards of the Sonoma County Healthy Retail Project in order to increase availability of healthier foods and beverages offered, increase marketing and promotion of healthier items, and to promote the acceptance of CalFresh and WIC at each store (where applicable).
- Collaboration & Coordination: Subgrantee(s) will be asked to participate on County Nutrition Action Plan (CNAP) Workgroup, a countywide collaborative focused on improving the retail environment. Subgrantee(s) will be asked to work with other partners to advance healthy retail work countywide and the integration food, alcohol and tobacco into the healthy retail program. The CNAP Workgroup will continue working on implementing the work plan for healthy retail, created in FFY 2015.
- Evaluation: (Process) Direct and indirect adult nutrition education lessons will be monitored using tracking spreadsheets and participant data cards. (Outcome) In-store changes will be monitored annually through manager interviews and food environment assessment.
    - Improvement of Services: Evaluation of healthy retail activities will be used to not only make adjustments to programmatic efforts with each individual store, but also to help build a more robust healthy retail program that can be implemented on a broader countywide scale. DHS SNAP-Ed staff will work with other DHS partners from alcohol and tobacco programs to develop healthy retailer certification standards that will be introduced to various decision-making bodies and implemented with non-SNAP-Ed funding.

- SNAP-Ed Evaluation Framework: The evaluation plan for healthy retail activities align with SNAP-Ed Evaluation Framework by using a mix of individual, environmental, influential, and norms and values indicators that will measure individual knowledge and skills among SNAP-Ed eligible adults; changes to the retail food environment; and collaborative efforts between LIAs, community partners, and retail stores. Evaluation of PSE strategies will be based on the indicator summary sheets from the customized PSE/RE-AIM evaluation plans.
- Evidence-Based Standards: All interventions will utilize approved curriculum and resources that are either research or practice-tested, including, but not limited to: the Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX^3); Cooking Matters in the Store; Harvest of the Month; Champions for Change; NEOPB Retail Program; and Rethink Your Drink.

Alternative Food Sites

- Implementing Agency: Local Health Department, Catholic Charities, and Area Agency on Aging
- State Objectives: Three state objectives (increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages, improve food resource management, and increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of dietary choices where people eat, live, learn, work, play, or shop) will be supported throughout the three years through the implementation of nutrition education to promote alternative food sites (e.g., farmer's markets, CSAs, and farm stands) that accept EBT and increasing access to healthier foods through the planning and implementation of alternative food sites in at least 2 of the 5 target neighborhoods.
- SEM Area(s): individual, interpersonal, organizational
- Direct Education: Direct education (single and multi-sessions) will be provided to adults at SNAP-Ed approved sites throughout Sonoma County, with a primary focus on the four neighborhoods outlined in Section 4, in an effort to promote farmer's markets, farm stands, and community supported agriculture (CSAs) that accept EBT. Attendees will be provided with information about how to make healthier food and beverage choices. Attendees will also be provided with information on neighborhood retail and farmers' markets where they can use EBT and food distribution sites as well as information on how to sign up for food nutrition programs, such as CalFesh and WIC. Promotoras, recruited from SNAP-Ed eligible neighborhoods, will conduct the direct nutrition education for adults.
- Media, Social Media, Public Relations, and Messaging: DHS will provide marketing materials to each alternative food site (e.g., Harvest of the Month signage, recipe cards) to promote fresh produce to shoppers.
- Training and Technical Assistance: DHS will provide training and technical assistance to at least 2 neighborhood groups in order to develop plans for alternative food sites in at least 2 of the 4 priortity neighborhoods. DHS will also provide technical assistance to each neighborhood group as they implement their plans.
- PSE (Alternative Food Sites): Alternative food sites (e.g., farmer's markets, farm stands, community gardens) will be created in at least 2 target neighborhoods.
- Coordination & Collaboration: Subgrantee(s) will be asked to participate in one countywide collaborative focused on improving access to healthier foods and beverages, such as the CNAP Workgroup. Contractor(s) will be asked to work with other partners to create alternative food sources in SNAP-Ed eligible census tracts. CNAP Workgroup will assist DHS in annually updating the CX^3 Food Access Implementation Plan.

- Evaluation: (Process) DHS will track each neighborhood groups' progress on implementing alternative food sites in a mentoring/technical assistance log. (Outcome) Changes in neighborhood alternative food sites will be assessed using the supplemental CX^3 Alternative Food Sources evaluation in FFY 2019.
    - Improvement of Services: Information collected from the evaluation of alternative food sites will be used to help inform the process for future alternative food site work in the county, particularly when working with neighborhood groups and other community members to develop such projects.
    - SNAP-Ed Evaluation Framework: The evaluation plan for healthy alternative food site activities align with SNAP-Ed Evaluation Framework by using a mix of individual, environmental, influential, and norms and values indicators that will measure individual knowledge and skills among SNAP-Ed eligible adults; changes to the neighborhood food environment; and collaborative efforts between LIAs, community partners, and neighborhood groups. Evaluation of PSE strategies will be based on the indicator summary sheets from the customized PSE/RE-AIM evaluation plans
    - Evidence-Based Standards: All interventions will utilize approved curriculum and resources that are either research or practice-tested, including, but not limited to: the Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX^3); Cooking Matters in the Store; Harvest of the Month; Champions for Change; NEOPB Retail Program; and Rethink Your Drink.

Food Distribution Sites

- Implementing Agency: Catholic Charities, Department of Health Services (evaluation only)
- State Objectives: Three state objectives (increase consumption of healthy foods and beverages and decrease consumption of unhealthy foods and beverages, improve food resource management, and increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of dietary choices where people eat, live, learn, work, play, or shop) will be supported throughout the year through
- SEM Area(s): individual, interpersonal, organizational
- Education: Direct nutrition education will be provided to families at each Food Distribution site so that families are knowledgeable about how to make healthy food and beverage choices. Attendees will be provided with information on how to sign up for food nutrition programs, such as CalFresh and food distributions at other local food banks. Staff and Trainers, will conduct the direct nutrition education for adults.
- Media, Social Media, Public Relations, and Messaging: CCC and DHS will provide marketing materials to each Food Distribution Site (e.g., Harvest of the Month signage, recipe cards) to promote fresh produce to shoppers.
- Training and Technical Assistance: CCC will provide training and technical assistance to at least 1 Food Distribution Site in order to create and implement Healthy Food donation and procurement policies.
- PSE (Alternative Food Sites): Healthy food and beverage donation and procurement policies will be adopted by at least 2 food distribution sites. At least one parish will make physical site and policy changes related to healthy beverages.
- Coordination & Collaboration: Representatives from the food distribution site will meet with local LIA partners and other community partners with the focus of providing healthier foods and beverages at emergency food distribution sites. A health ministry will be formed to work on physical site and policy changes at one local parish.

- Evaluation: (Outcome) Changes in emergency food outlets will be conducted by DHS in FFY 2019 using the CX^3 Food Bank and Emergency Food Outlet assessment tool. An assessment will be conducted at one additional emergency food distribution site to evaluate physical site changes and food and beverage policy changes. Pre/post tests will be collected from seniors, adults, and children participating in multi-session nutrition education classes to assess behavior change. (Process) The Healthy Ministry Team's group process will be evaluated.
    - Improvement of Services: Information collected from the evaluation of emergency food distribution sites and parishes will be used to help inform the process for future PSE work at other emergency food sites and parishes in the county, particularly when working with Healthy Ministry Teams and other community groups to develop such projects.
    - SNAP-Ed Evaluation Framework: The evaluation plan for Food Distribution sites align with SNAP-Ed Evaluation Framework by using a number of indicators that will measure changes to the Food Distibution site environment; and collaborative efforts between LIAs, community partners, food distribution sites, and retail stores. Evaluation of PSE strategies will be based on reports based on customized PSE/RE-AIM evaluation plans.
    - Evidence-Based Standards: All interventions will utilize approved curriculum and resources that are either research or practice-tested.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	49%		0 to 4 years old (Preschool):	588
Female	51%		5 to 17 years old (School Age):	6,207
			18 to 59 years old (Adult):	23,233
			60 years old and over (Senior):	3,439
Total:	100%			33,467

3. Ethnicity/Race

Ethnicity

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity
55%	45%	100%

RACE	**Hispanic/Latino**	**Not Hispanic/Latino**
Black or African American	0%	1%
Asian	0%	2.7%
American Indian/Alaskan Native	0%	0.5%
Native Hawaiian/Other Pacific Islander	0%	0.6%

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, at least 4 low resourced schools and, contingent upon carry-in funding, 3 community clinics will develop and implement policies and programs to support improved nutrition and physical activity behaviors among children, parents, and, if selected by schools, teachers.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness Policies
- Farm to Fork
- School Gardens
- Worksite wellness
- Structured PA
- Safe Routes to School
- Healthy Food and Beverage Standards
- Smarter Lunchrooms

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at least 4 schools will complete the Healthy Schools Program assessment and each will develop an action plan by identifying at least 2 school wellness policy, systems, or environmental projects and/ or physical activity programs.
    b. By September 30, 2017, at least 4 schools will choose curricula, develop a strategy for obtaining buy-in for ongoing nutrition education, and implement direct nutrition education in all 3rd and 4th grade classrooms, at minimum, the second half of the 2016-17 school year.
    c. By September 30, 2017, at least 5 schools will provide at least 2 direct single nutrition education sessions to parents.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at least 4 schools will each implement at least 2 school wellness policies/programs.
   b. By September 30, 2018, at least 4 schools will deliver direct nutrition education in all 3rd and 4th grade classrooms, at minimum, during the 2017-18 school year.
   c. By September 30, 2018, at least 5 schools will provide at least 3 direct single nutrition education sessions to parents.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at least 4 schools will each adopt a written plan (e.g., policy, guidelines, agreement) to sustain school wellness policies/programs implemented in Year 2.
   b. By September 30, 2019, at least 4 schools will deliver direct nutrition education in all 3rd, 4th, and 5th grade classrooms, at minimum, during the 2018-19 school year, and develop and adopt a plan to sustain in-class nutrition education.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019, at least 5 low resourced schools will develop and implement school wellness policies and programs to support improved nutrition and physical activity behaviors among students, parents, and, if selected by schools, teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	**(1.a) Training and Technical Assistance** Provide at least 1 trainings to at least 1 champion teachers/ staff from at least 5 schools on the Healthy Schools Program assessment	( ) CED ( ) CEI ( ) MPR ( ) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: Roseland School District AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 Year 2: Q1, Q2, Q3, Q4 Year 3: Q1, Q2, Q3, Q4	Training agenda & sign-in ATF

1.2	**(1.a) Coordination & Collaboration** Complete Healthy Schools Assessment for at least 4 schools with each school identifying at least 2 school wellness policy, systems, or environmental projects (PSE) and/ or physical activity programs.	CED CEI MPR X C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: TBD School District AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 Year 3 Q1 Q2 Q3 Q4	Completed assessment
1.3	**(1.a) Coordination & Collaboration** At least 4 schools will each develop action plans for the 2 school wellness policy, systems, or environmental projects (PSE) and/ or physical activity programs identified.	CED CEI MPR X C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: TBD School District AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 Year 3 Q1 Q2 Q3 Q4	PSE action plans
1.4	**(1.b) Youth Education:** Provide direct multi-session nutrition education in all 3rd and 4th grade classrooms, at minimum, in at least 4 schools during the second half of the 2016-17 school year, reaching at least 475 students. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019, increase access to and promotion of healthy fruits, vegetables and beverages in at least 14 SNAP-Ed qualifying neighborhood retail stores, at least 2 alternative food sites, at least 2 senior centers/public housing facilities, and at least 5 emergency food sites through adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Healthy Retail Recognition Program
- Local procurement
- EBT acceptance at farmer's markets
- Healthy Food and Beverage Standards
- Purchased/donated food policies
- Creation of alternative food sites (e.g. farmer's markets, farm stands, or community gardens)

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, based on results from most recent CX^3 Neighborhood Food Environment Assessment, work with at least 14 retailers in at least four (4) SNAP-Ed qualifying neighborhoods to develop a plan for meeting Sonoma County Healthy Retail Project standards.
   b. By September 30, 2017, work with neighborhood groups in at least two (2) of the four (4) priority SNAP-Ed qualifying neighborhoods to identify and develop plans for creating at least one (1) alternative food site in each neighborhood.
   c. By September 30, 2017, conduct a policy and environmental assessment in at least two (2) food distribution sites and develop a plan for increasing access and supports to choosing healthier foods and beverages at each site.

d. By September 30, 2017, identify at least two (2) senior centers/public housing facilities to promote all farmer's markets that accept CalFresh benefits.
e. By September 30, 2017 at least one (1) parish will provide opportunities for at least 4 direct education sessions for parishioners

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018 at least 50% retail stores in SNAP-Ed eligible census tracts/block groups meet Sonoma County Healthy Retail Project minimum standards for recognition.
   b. By September 30, 2018, work with neighborhood groups in at least two (2) of the four (4) priority SNAP-Ed qualifying neighborhoods to implement plans to create at least one (1) alternative food site in each neighborhood.
   c. By September 30, 2018, food donation or procurement policies will be created and adopted for at least two (2) food distribution sites.
   d. By September 30, 2018, promote all farmer's markets accepting CalFresh benefits in a least two (2) senior center sites/public housing facilities.
   e. By September 30, 2018, at least one (1) parish will establish a Wellness Ministry and provide at least 4 direct education sessions

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at least 75% retail stores in SNAP-Ed eligible census tracts/block groups meet Sonoma County Healthy Retail Project minimum standards for recognition.
   b. By September 30, 2019, use of alternative food sites by CalFresh recipients will increase by 25 percentage points.
   c. By September 30, 2019, food donation or procurement policies for at least two (2) food distribution sites will be implemented in order to increase access and /or promotion of healthy foods and beverages.
   d. By September 30, 2019, CalFresh redemptions for all farmer's markets that accept Electronic Benefits Transfer (EBT) will increase by 5% over baseline based on aggregate EBT usage data.
   e. By September 30, 2019, at least one (1) parish Wellness Ministry team will conduct a healthy beverage environment assessment.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sonoma County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 6/9/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and promotion of healthy fruits, vegetables and beverages in at least 11 SNAP-Ed qualifying neighborhood retail stores, at least 2 alternative food sites, at least 2 senior centers/public housing facilities, and at least 5 emergency food sites through adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	**(1a-1b) Coordination & Collaboration** Annually, LIAs will collaborate with the County Nutrition Action Plan (CNAP) Workgroup to update the CNAP Work Plan. If additional SNAP-Ed funding becomes available, implement additional food access projects.	CED CEI MPR X C&C TTA	CWD X LHD X AAA UCCE X CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X Year 2: Q1 X Year 3: Q1 X	Implementation plan(s)
2.2	**(1a) Training and Technical Assistance** Annually, provide at least 1 Sonoma County Healthy Retail Project Business Liaison Training to Catholic Charities staff and Healthy Retail Business Liaison (some of which may be ~~to at least 4~~ Promotores). Training will include, but not be limited to, the following: • How to Work With Retail Stores • Conducting In-Store Shopper Surveys • Produce Handling and Storage • Marketing and Promotion • Food Assistance Programs • In-Store Promotions (i.e. food demonstrations and store tours)	CED CEI MPR C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: Northern California Center for Well-Being AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X Year 2: Q1 X Year 3: Q1 X	Business Liaison Training Manual Sign-in Sheets Training Agendas ATF

2.3	**(1a) Coordination & Collaboration** Obtain Sonoma County Healthy Retail Project *Agreement to Participate* from at least 3 new retail stores. Sonoma County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 6/9/2017**

Evaluation Activities (FFY 2017 - FFY 2019)

Activity Number	Evaluation Activity Description	Formative	Process	Outcome or Impact	Responsible SNAP-Ed Agency(ies)	Time Frame: Year & Quarter**	Tool/Documentation
E.2.1	**Retail** Conduct baseline manager interviews at new retail stores to assess owner/manager plans for participation in the Healthy Retail Project, and to learn about procurement strategies and vendors used, staffing levels, and perception of sales of healthier foods and beverages prior to implementing the Healthy Retail Project.			X	[ ] CWD [X] LHD [ ] AAA [ ] UCCE [ ] CCC	**Year 1** Q1: X, Q2: X, Q3: X, Q4: X **Year 2** Q1: , Q2: , Q3: , Q4: **Year 3** Q1: , Q2: , Q3: , Q4:	[ ] EARS/ATF [X] PSE RE-AIM Report [ ] UC CalFresh Workbook [ ] Food Behavior Checklist [ ] UC Intent to Change List other:
E.2.2	**Retail** Conduct food environment assessment at at least 14 stores to assess in-store changes. Data from Year 1 and 2 will be used by stores to adjust the focus on their store plans.			X	[ ] CWD [X] LHD [ ] AAA [ ] UCCE [ ] CCC	**Year 1** Q1: , Q2: , Q3: , Q4: X **Year 2** Q1: , Q2: , Q3: , Q4: X **Year 3** Q1: , Q2: , Q3: , Q4: X	[ ] EARS/ATF [X] PSE RE-AIM Report [ ] UC CalFresh Workbook [ ] Food Behavior Checklist [ ] UC Intent to Change List other: Completed food environment surveys Copy of individual store scorecards

E.2.3	**Retail** Conduct CX[3] "retail" evaluations in at least 5 SNAP-Ed eligible census tracts to evaluate changes in neighborhood food environments.		X	X	CWD X LHD AAA UCCE CCC	Year 1: Q1 Q2 Q3 Q4 [ ] [ ] [ ] [ ] Year 2: Q1 Q2 Q3 Q4 [ ] [ ] [ ] [ ] Year 3: Q1 Q2 Q3 Q4 [ ] X X X	EARS/ATF X PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:
E.2.4	**Alternative Food Sites** Conduct supplemental CX[3] Alternative Food Sources evaluation in at least 2 SNAP-Ed qualifying neighborhoods. Data will be used to show change in the food environment over baseline collected in the fall of 2016.			X	CWD X LHD AAA UCCE CCC	Year 1: Q1 Q2 Q3 Q4 [ ] [ ] [ ] [ ] Year 2: Q1 Q2 Q3 Q4 [ ] [ ] [ ] [ ] Year 3: Q1 Q2 Q3 Q4 [ ] X X X	EARS/ATF X PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:
E.2.5	**Food Distribution Sites** Train CCC staff on how to use CX[3] Food Bank and Emergency Food Outlet assessment tool. LHD and CCC will collaborate to conduct supplemental CX[3] Food Bank and Emergency Food Outlet assessment in at least 5 SNAP-Ed eligible census tracts. Data will be used to show change in the food environment over baseline collected in the fall of 2017.			X	CWD X LHD AAA UCCE X CCC	Year 1: Q1 Q2 Q3 Q4 X [ ] [ ] [ ] Year 2: Q1 Q2 Q3 Q4 [ ] [ ] [ ] [ ] Year 3: Q1 Q2 Q3 Q4 [ ] X X X	EARS/ATF X PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:

E.2.6	**Retail** Conduct follow-up manager interviews with at least 14 retail stores to assess owner/manager perception of sales, changes in demand for healthier food and beverages, and successes and challenges of project implementation.		X	X	CWD X LHD AAA UCCE CCC	**Year 1**: Q1 Q2 Q3 Q4 | | | | | **Year 2**: Q1 Q2 Q3 Q4 | | | | | **Year 3**: Q1 Q2 Q3 Q4 | | X | X	EARS/ATF X PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:
E.2.7	**Alternative Food Sites** Evaluate each neighborhood groups' process for creating alternative food sites in their neighborhoods.		X		CWD X LHD AAA UCCE CCC	**Year 1**: Q1 Q2 Q3 Q4 | X | X | X | **Year 2**: Q1 Q2 Q3 Q4 | X | X | X | X | **Year 3**: Q1 Q2 Q3 Q4 | X | X | X | X |	EARS/ATF X PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:
E.2.8	**Retail & Alternative Food Sites** Collect participant data cards at each direct nutrition education session.		X		CWD X LHD AAA UCCE CCC	**Year 1**: Q1 Q2 Q3 Q4 | X | X | X | X | **Year 2**: Q1 Q2 Q3 Q4 | X | X | X | X | **Year 3**: Q1 Q2 Q3 Q4 | X | X | X | X |	X EARS/ATF PSE RE-AIM Report UC CalFresh Workbook Food Behavior Checklist UC Intent to Change List other:

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	Reduction in funds due to FFY 2018 budget being smaller than FFY 2017 budget. The percent difference is less than other expense categories due to an increase in staff salaries.
2	Non-Capital Equipment/Supplies	Reduction in funds due to FFY 2018 budget being smaller than FFY 2017 budget.
3	Materials	Reduction in materials expenses due to a smaller number of direct nutrition education contacts needing to be reached during FFY 2018 compared to FFY 2017.
4	Travel	Reduction in travel costs due to fewer FTE needing to travel for workshops, meetings, and trainings. Also, the Childhood Obesity Conference will not take place in FFY 2018.
5	Building/Space	N/A
6	Maintenance	Reduction in funds due to fewer FTE for FFY 2018 (2.77FTE) compared to FFY 2017 (3.7316 FTE)
7	Equipment and Other Capital Expenditures	N/A
8	Contracts/Sub-Grants/ Agreements**	Reduction in funds due to FFY 2018 budget being smaller than FFY 2017 budget.
9	Indirect Costs	Reduction in funds due to a decrease in staff salaries and benefits.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries.

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Public Health
County/Jurisdiction: County of Sonoma

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Postage	Mailing of SNAP-Ed materials (e.g., surveys, marketing materials) to subgrantees, community partners, and/or SNAP-Ed-eligible residents. Because postage will be used exclusively to implement IWP activities, proration is not necessary. (25 pieces of mail x 12 months x $0.44)	1	$0.44	300	$132	
2			Office Supplies	Supplies (e.g., pens, pencils, postage, notepads, paper) for IWP administrative and program activities. Because supplies will be used exclusively for IWP activities, proration is not necessary. (approx. $5 per item x 15 items per month x 12 months)	1	$5.00	180	$900	
3			CCLHDN Membership	Department of Health Services California Conference of Local Health Department Nutritionists (CCLHDN) membership to be used by all Department.	1	$150.00	1	$150	
4			Ergonomic Supplies	Ergonomic office equipment (e.g., keyboard, mouse, document stand) for current Contract Manager, Administrative Coordinator, 2 Project Coordinators, Research Specialist, and Program Assistant, prorated by FTE. [(2.77 SNAP-Ed FTE /8 Full-Time Staff = 0.35) x $100 per item x 4 equipment items = $140]	0.35	$100.00	4	$140	
				Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1			None					$0	
							Total Non-Capital Equipment/Supplies:	**$1,322**	

3. Materials:

	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Educational Materials	Cost of purchasing approved SNAP-Ed nutrition and physical activity education materials for all subgrantees to conduct direct nutrition education sessions [(650 students+525 adults) x $3 = $3,525), indirect nutrition education events at food outlets and farmers markets (680 x $2 =$1,890), and distribute point-of-purchase merchandising materials and "hardware" (e.g., sign holders) to retail food outlets (100 indirect contacts x 14 food outlets x $2 = $2800). Total = $8,215 - $12 in-kind = $8,203	$2.52	3255	$8,203	
2			Display Models	Cost of purchasing visual aids (e.g., fake food displays/models, RYD display boards) for nutrition education and school subgrantees to use during direct and indirect nutrition education lessons. ($25 per display model x 4 subgrantees x 2 display models = $200)	$25.00	8	$200	
3			Photocopies	Large-scale duplication jobs, production, printing, and lamination of NEOP approved education materials for retail promotional events (680 indirect contacts @ 14 retail and 3 farmers' markets x $0.20/color copy = $136), direct nutrition education lessons (525 direct contacts x $0.20/color copy = $105), and distribution of monthly materials to families through schools (650 HOTM Mailings @ 5 schools x 9 months x $0.20/color copy = $1,170) = $1,411	$0.20	7055	$1,411	
4			Food Demonstration Materials	Cost for materials such as food demonstration supplies (e.g., hot plates, small appliances, bowls, mixers, utensils, tables/stands), storage containers, transportation carts, and cooking carts) for nutrition education and school subgrantees. ($25 per supplies set (average) x 4 subgrantees x 20 items per site = $2,000).	$25.00	80	$2,000	
5			CATCH Equipment	Cost of replacing existing and/or securing new CATCH equipment so that schools can continue to tie CATCH into in-class nutrition education lesson. (3 schools x $250 per school)	$250.00	3	$750	
						Total Materials:	**$12,564**

			Contracts/Sub-Grants/Agreements that are $25,000 or more			
A			Northern California Center for Well-Being	Funds will be used to 1) recruit, train and mentor Promotoras to conduct direct and indirect nutrition education sessions; 2) conduct an assessment in target neighborhoods to assess nutrition education needs of SNAP-Ed eligible adults; 3) conduct direct, single session nutrition education and Rethink Your Drink lessons to parents at participating schools and in the community; 4) conduct direct, multi-session nutrition education lessons to SNAP-Ed eligible adults, inclusive of a store tour and farmers' market tour; 5) provide participating food outlets training and technical assistance on developing and implementing a plan for meeting Sonoma County Healthy Retail Project standards; 6) conduct indirect food demonstrations at select food outlets and farmers' markets; 7) collect evaluation data (e.g., participant data cards, TA logs, nutrition education fidelity scans); and 8) attend relevant coalition and program meetings, trainings, and workshops.	$88,022	
B			Roseland School District	Funds will be used to implement IWP activities at Roseland, Roseland Creek and Sheppard Elementary Schools. Activities include, but are not limited to, the following: in-kind teachers attend training(s) on how to implement and report direct, multi-session nutrition education with fidelity; teacher champions attend training(s) on how to complete a Healthy Schools assessment, engage school team (admin, teachers, students) on program/policy improvement decisions, and implement select school wellness program(s)/policy(ies); and Project Coordinator and Food Service Worker to coordinate program implementation and evaluation as well as attend program meetings and trainings.	$45,000	

FFY 2018 SNAP-Ed Budget

Organization Name: California Department of Public Health
County/Jurisdiction: County of Sonoma

				Contracts/Sub-Grants/Agreements that are less than $25,000		
1			Mark West Union School District	Funds will be used to implement IWP activities at Mark West Elementary, including: training Champion Teacher(s) on how to complete a Healthy Schools assessment, engage school team (admin, teachers, students) to select PSE strategy, and implement and evaluate PSE strategy as well as attend program meetings and trainings.	$7,000	
2			Occidental Arts & Ecology	Funds will be used to implement IWP activities at Mark West Elementary School. Activities include, but are not limited to, the following: 1) providing and reporting direct, multi-session nutrition education to students, with fidelity; 2) implementing and evaluating a PSE plan to sustain school nutrition education activities, which includes the creation of a garden stand at Mark West Elementary School to sell non-SNAP-Ed funded garden produce to parents; 3) providing indirect education to parents purchasing farm stand produce; and 4) coordinating program implementation and evaluation as well as attending program meetings and trainings. (Use of funds for farm stand are contingent upon NEOPB approval of contract modification.)	$8,000	
3			WestEd	Funds will be used to secure California Healthy Kids Survey (CHKS) data (inclusive of nutrition and physical activity (NPA) module data) collected in the fall of 2017 for all SNAP-Ed-eligible schools. Data will provide a self-reported snapshot of eating and physical activity behaviors of 5th, 7th, 9th and 11th grade students. As per E.1.4, LHD will use data to create school profiles and schools participating in the SNAP-Ed program during the FFY 2017-19 cycle will use profiles in conjunction with Healthy Students Assessment to select and prioritize school wellness programs/policies. In FFY 2018, school profiles for the remaining schools will 1) be developed and distributed to schools as a tool to help schools drive planning in order to meet the USDA's Final Rule related to the Local School Wellness Policy Implementation Under the Healthy, Hunger -Free Kids Act of 2010 and 2) be used by the LHD for the upcoming 3-year IWP planning process in order to identify and engage schools and districts with the greatest unmet need.	$500	
4			Northern California Center for Well-Being	Funds will be used for Registered Dietician services for the SNAP-Ed project, assisting with nutrition education curricula selection, fidelity observations of nutrition education lessons, and proving technical assistance on nutrition-relased issues. This position, while less than 0.5 FTE, meets NEOPB's Registered Dietician staffing requirement.	$7,591	
5			Community Project Contractor (Vacant)	Funds will be used for a contractor to help implement up to two resident-selected community food access projects. (IWP Activity 2.9)	$16,000	
6			Translation Contractor (Vacant)	Funds will be used to conduct simultaneous translation during trainings (i.e., Healthy Retail Business Liaison Trainings), collaborative meetings (i.e., CNAP meetings), and community meetings (i.e., CX3 community meetings associated with the selection and implementation of alternative food site projects and development of action plans). (IWP Activities 1.13, 2.2 & 2.8)	$2,500	
					Total Contracts/Sub-Grants/Agreements:	**$174,613**

Total Direct Costs:	**$545,426**

9. Indirect Costs:

County Name: Stanislaus County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
x	**University of California: UC CalFresh UCCE: University of California, Cooperative Extension, Stanislaus County**
x	**California Department of Public Health: CDPH: Stanislaus County Health Services Agency**
x	**California Department of Aging: CDA: Stanislaus County Aging and Veterans Services**
x	**Catholic Charities of California: CCC: Catholic Charities of California, Diocese of Stockton**

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Stanislaus County is a mid-sized county located in the San Joaquin Valley, bordered to the north by San Joaquin County, to the south by Merced County, to the west by Santa Clara County, and to the east by the counties of Calaveras and Tuolumne. The county's total area, measuring approximately 1,494 square miles, is mainly rural, with urban population centers along the CA-99 Route that runs through the center of the county. According to ACS 2010-2014 data, the total population in 2014 was approximately 531,997 with 198,845 (39.1%) being SNAP-Ed eligible (incomes ≤185% FPL). According to 2014 ACS data estimates, the population of Stanislaus County is mainly comprised of Hispanic and White populations, making up 43.0% and 45.4% of the total ethnic populations, respectively. Additionally, 24.1% of the population identify themselves as Asian (5.3%), African-American (2.8%), Native American (0.8%), Native Hawaiian/Native Pacific Islander (0.7%), or multiracial (14.5%). Similarly, roughly 95% of the county speaks either English, Spanish or both, according to California Health Interview Survey (CHIS) data. 51.9% of the population speaks only English, 9.4% of the population speaks only Spanish, 26.7% of the population speaks both Spanish and English, 6.7% speaks English and another language, and the remaining 5.3% of the population speaks Chinese or one or more other languages. As of May 2015, only 92,727, or roughly 74.3%, of the eligible population participated in CalFresh according to California Food Policy Advocates.

Of the 93 census tracts in Stanislaus County, 30 (32.3%) are SNAP-Ed eligible (≥50% of households have incomes ≤185% FPL) based on all races data from the 2009-2013 census. The vast majority (25 of 30) fall within one of the three largest cities in the county: Modesto, Ceres and Turlock. Of the 184 schools, 129 (75.5%) are SNAP-Ed eligible (≥50% FRPM Enrollment, 2012-2013). Unlike census tracts however, many of the schools are spread throughout the entire county and are not focused in only low-income census tracts, suggesting that poverty may be more spread throughout the county than indicated by SNAP-Ed eligible census tracts. Obesity rates in the county have been steady over the last decade, but have not been decreasing. 62.8% of SNAP-Ed eligible adults in the county reported being overweight or obese in the 2014 California Health Interview Survey (CHIS), slightly lower than the total county adult rate of 71.3%.

Although only 9% of zip codes do not have a grocery store, Farmer's Market, or farm stand, Stanislaus County has a high proportion of unhealthy food in relation to healthy food, as suggested by the Center for Public Health Advocacy Retail Food Environment Index (RFEI) score of 4.79 (the number of unhealthy food outlets divided by the number healthy food outlets). This means that for every one healthy food outlet (supermarket, Farmer's Market or produce vendor) there are 4.79 unhealthy food outlets (convenience/corner store, fast food, pizza shop). The *Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX^3)* Index also indicates that 54.3% of all restaurants in the county are fast-food. In 2007 there were 5.3 fast food outlets per every 10,000 residents, or roughly 270 fast food outlets throughout the county. According to the USDA Food Access Research Atlas, 74 census tracts in the county are identified as having low access to healthy foods (0.5 mile radius for urban areas, 10 mile radius for rural areas), 43 of which are also low-income (not necessarily all races) and have been classified as food deserts. Research also indicates that, especially for low-income (SNAP-Ed eligible) populations, geographical access is likely not the only barrier to healthy food consumption.

A similar situation is reflected in access to physical activity opportunities. Stanislaus County children and teens (1-17 years of age) actually have greater access to parks or open spaces within walking distance of their homes than most Californian teens, 88.5% versus 84.7%, respectively, and there are 7.6 recreational facilities per 100,000 residents. However, during local forums, communities have indicated that other barriers, such as safety, discourage use of these

amenities. This has led to the discussion of how to greater incorporate physical activity opportunities into alternative activities and programs, including Safe Routes to School programs, Complete Streets programs, and Parks and Recreations partnerships for greater physical activity promotion.

4. **Community Assessment**

According to the annual health rankings, compiled by the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institutes, Stanislaus County "health factors" ranked 50th among California's 57 counties. This FFY 17-19 Integrated Work Plan was developed using information listed in the jurisdiction description, CX^3 community assessment results, various reports, input from community partners and experience gained from the Local Implementing Agencies (LIAs) providing SNAP-Ed nutrition interventions over the last several years.

This data has helped to identify priority populations, specifically children 0-17 years of age, who represent 35.8% of the county's SNAP-Ed eligible population and have a 30.8% rate of food insecurity in Stanislaus County. A large focus across SNAP-Ed implementing programs in Stanislaus County is being placed on the nutrition education and physical activity promotion of student populations and their parents. This data also outlined a need to support behavior change through Policy, Systems or Environmental (PSE) change by increasing access, availability, and marketing of healthy foods and physical activity opportunities for these low-income families. Demographics data was cross-referenced and supported by Stanislaus County Health Services Agency's 2013 Community Health Assessment.

The Nutrition Education Obesity Prevention Branch (NEOPB) Geographic Information System (GIS) provided location-specific demographics to indicate low-income census tracts and census blocks, and helped to identify underserved or previously non-targeted locations and populations. This, in coordination with the USDA's Food Desert Locator, has led to the identification of priority neighborhoods where place-based coordinated interventions, at multiple levels of the socio-ecological model, have been conducted through FFY 2015 and 2016. Many of these neighborhoods continue to be priorities for FFY 2017-2019, but we further narrowed the targets of our work to ensure all of our SNAP-Ed objectives were occurring with the same populations, and did our best to select sites where the same families would receive multiple interventions in different settings.

According to California Department of Aging estimates, the senior (ages 60 or older) population of Stanislaus County is approximately 87,200, making up roughly 16.7% of the county's total population. The Elder Index estimates that 50% of all seniors 65 or older in Stanislaus County have incomes less than is needed to meet basic needs. In addition, Stanislaus County Aging and Veterans Services PSA 30 performed participant queries at local congregate meal sites to determine need and eligibility of local SNAP-Ed eligible seniors. Individual sites identified SNAP-Ed eligibility up to as high as 100% of participants surveyed, indicating a need for SNAP-Ed interventions. As a result, an increased focus on local intervention strategies targeting senior populations at eligible local Congregate Meal and Public Housing sites are being coordinated with other community-based SNAP-Ed strategies.

Over the course of the last three years, neighborhood forums and canvasing have narrowed the focus of the original CX^3 projects to two PSE change efforts: (1) Working with Farmer's Markets to increase acceptance of SNAP, WIC and Senior Farmer's Market Vouchers to promote increased access, availability and affordability of fresh produce, and (2) working with schools and parent residents to bridge communication and strengthen Local School Wellness Policies, specifically regarding improved nutritional standards and physical activity opportunities. Although these projects were initiated in two census tracts specific to

the respective communities' needs, assessment of other qualifying areas, over the past year of implementation has indicated that projects modeled after these original efforts could be effective at engaging residents in other communities. Along with building sustainability in current intervention sites, this data has helped to propel interventions into other communities for FFY 17-19.

Food assistance redemption, including redemption of SNAP, WIC, Senior Vouchers, etc., has been a priority target among Stanislaus County nutrition partners over the past few years. Redemption rates from retail outlets and Farmer's Markets have been utilized to determine programmatic focal areas, including the decision to collaboratively work towards increasing redemption of all food assistance programs at Farmer's Markets. Redemption of WIC Farmer's Market Vouchers has remained in the 40%-45% range, according to local data, and many local markets do not currently accept SNAP/EBT. And although many retail outlets in the county do accept EBT, a lack of healthy food availability, marketing, and stigma provide barriers to increasing healthy food purchases with low-income residents. Baseline data from CDPH's Healthy Stores Healthy Communities Campaign (Proposition 99-funded data collection) will be cross-referenced with CX^3 and other data to determine retail sites that may be well suited for maximum impact in local communities, resulting in a synergistic effect from a combination of public health interventions conducted by tobacco control, alcohol and drug, and SNAP-Ed programs to create healthier retail environments.

5. **Community Change Goals**

Nutrition, obesity, and a lack of healthy affordable foods have been determined to be priority concerns for residents in Stanislaus County. However, efforts to address these issues must be multi-faceted to be effective and sustainable. Based on the results of community assessments, and the progression of FFY 2016 projects, including sustained community engagement interest, Stanislaus County SNAP-Ed LIAs have identified the following target priorities: Increasing consumption of and access to healthy food; increasing physical activity rates for all SNAP-Ed eligible residents; and, focusing on school-based wellness strategies. These allow for the coordination of activities across these sites as a means of enhancing and reinforcing comprehensive change across population groups, with diverse demographics, and throughout the socio-ecological model. Stanislaus County's SNAP-Ed funded LIAs will focus their efforts on providing SNAP-Ed allowable interventions targeted to the SNAP-Ed eligible portion of the county's population. Identified strategically-coordinated interventions include:

1. Increasing access to and consumption of fruits and vegetables
    - Increased healthy retail options, including increased healthy promotion in retail outlets, healthy corner store options, Farmer's Markets with increased access to EBT services, increased availability of farm stands
    - More community and school gardens
    - Increased transit, bicycle and pedestrian access to food retail sites
    - Increased food security throughout the county
2. Increasing physical activity rates for all SNAP-Ed eligible residents
    - Increased utilization of community space for physical activity and recreation (i.e. Parks, walking trails, Community Centers, etc.)
    - Complete streets programs that allow for increased opportunities for active transportation
    - Safe Routes to School programs

3. School-based wellness strategies and environmental changes to, from, and within schools
   - Wellness policies and strong resident engagement in the decision process for changes
   - Increasing access to healthy foods in schools
   - Farm-to-School opportunities, such as school gardens, school farm stands, and local food procurement strategies
   - Smarter Lunchrooms Movement activities
   - Physical activity programs for students, including structured physical activity such as SPARK, CATCH, and Instant Recess, and extracurricular physical activity such as intramural sports leagues.

We recognize that many of these goals will require multi-year strategies, and require the support and collaboration of external partners. The Stanislaus County SNAP-Ed LIA Partnership is committed to contributing to these larger change goals – based on agency expertise and allowable SNAP-Ed activities – to promote the health of the low income SNAP-Ed eligible community of Stanislaus County.

Coordination of SNAP-Ed efforts during FFY 15 and FFY 16 has led to the prioritization of coordinated place-based interventions, in contrast to independent site-based interventions, to maximize the impact towards target populations. These areas of focus chosen include: school-based strategies to impact children of all ages through the complete school progression; retail strategies to promote access and consumption of fresh produce; and, community-based coordination of education, promotion and messaging. It is essential that we are able to conduct complementary activities that build comprehensive cross-agency programs to effectively reach the target population at four of the five levels of the socio-ecological model: the individual level, the interpersonal level, the organizational level, the societal level. It is also important that messages are unified to increase target population exposure to healthy messages, which supplements other activities and enhances efforts towards achieving overall change goals.

Based on the aforementioned community change goals, and efforts to coordinate comprehensive programming to encompass the target population throughout the entire community, the Stanislaus County SNAP-Ed LIA Partnership has set three SMART local objectives for FFY 17-19:

1. By September 30, 2019, LIA partnership will improve access to and consumption of fruits and vegetables at six qualifying community gardens, eight qualifying retail outlets, two senior food distribution sites, and two-thirds of all qualifying farmer's markets in Stanislaus County through healthy marketing, promotion events, and physical site changes.
2. By September 30, 2019, a minimum of 20 qualifying schools (i.e. pre-school, elementary school, middle school, high school) in Stanislaus County will make changes to school policies, physical environments, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.
3. By September 30, 2019, LIA partnership will assist eight qualifying areas (qualifying sites and/or census tracts) in Stanislaus County in improving environmental support for physical activity and promoting utilization of physical activity resources.

These objectives allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus PSE strategies in the following settings:

- Early Childhood Education settings
- School settings
- Healthy Retail Environment
- Community settings

The PSE strategies are detailed within each three-year objective, and speak to the connection to our community change goals.

6. Partnerships and Collaborative Efforts

The Stanislaus County SNAP-Ed LIA Partnership includes the Stanislaus County Health Services Agency (LHD), the UCCE of Stanislaus County, the Stanislaus County Aging and Veterans Services (AAA), and Catholic Charities Diocese of Stockton. All four partner agencies are funded through the USDA SNAP-Ed program, and work together to create the annual work plan and complete its activities. The partnership is led by the Work Plan Coordinator (WPC), who is housed at the LHD. The WPC facilitates quarterly in-person meetings to assess work plan progress and leads a continuous discussion about maximizing and enhancing coordinated efforts of all LIAs.

Efforts from each of the four SNAP-Ed funded agencies are coordinated to utilize each agency's expertise and to promote the most effective and efficient comprehensive SNAP-Ed programming. To do this, community change goals are cross-referenced with needs assessments and GIS data, which identifies priority geographical locations and the most appropriate activities in those qualifying locations. Each agency will utilize their respective expertise and leverage existing relationships to build a comprehensive network of partners that will impact the target population in these priority locations. All four agencies are contributing to each of the Local Objectives through at least one educational or environmental component. SNAP-Ed funded agencies will coordinate programs so as to not overlap sites, but conduct complementary activities. Examples of this may be utilizing the same nutrition education curriculum in two closely located school districts, or providing nutrition education at a school where another SNAP-Ed funded agency is promoting school gardens. Catholic Charities SNAP-Ed-funded staff will also partner with its CalFresh Outreach-funded staff, who provide CalFresh application assistance throughout the county, to increase CalFresh participation rates and improve food security of SNAP-Ed eligible households.

The Stanislaus County SNAP-Ed LIA partnership is also represented at the Stanislaus County Food and Nutrition Network collaborative through all four agencies. This collaborative works to promote local food system improvements through Farm-to-Fork and Farm-to-School efforts in the county through coordination of SNAP-Ed funded and unfunded partners, both public and private, who have a vested interest in the promotion of healthy children and families and the ability to affect the nutrition environment within educational facilities. Partners include HSA, UCCE, Aging and Veterans Services, Supplemental Nutrition Program for Women, Infants, and Children (WIC), Office of Education, school district food service directors, United Way, food pantries, local Community Based Organizations

(CBOs), farmers, private business, agriculture science organizations, etc. This provides an opportunity to share the integrated work plan and community changes goals with the group of partners and stakeholders who, along with the funded agencies, collaborate to enhance efforts by establishment, growth and expansion of activities, reach and successes in the community. This collaborative has been successful in leveraging combined resources and contacts to develop a broad approach and network of partners who can collectively impact environmental, system, and policy changes in a multitude of qualifying locations throughout the county. We rely on these partnerships to focus on other aspects of our collective goals to comprehensively achieve our community change.

Other County partners include our tobacco and alcohol prevention colleagues. We will be working with them on our combined healthy retail strategies.

Partnerships and Collaborative Efforts: LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as, but not limited to, county Welfare Departments, schools, planning departments, parks and recreation departments, etc. In addition, each agency will work with cross-sector partners to strengthen PSE efforts and ensure sustainability of implemented projects.

7. Key Messages

	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/)), and/or FFY 2017-2019 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health – Nutrition Education and Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Stanislaus County reviewed the approved integrated curriculum list provided by the state agencies to determine the best options for our target populations. Curriculum, materials and resources were chosen to best reflect the needs of the populations, as well as our chosen SNAP-Ed three-year and annual objectives. Most of our chosen curriculum is geared towards ECE or school-based settings, as this reflects the majority of the direct education indicated in the work plan.

Chosen materials will additionally support community-based Policy, Systems, and Environmental change strategies and interventions that will complement interventions conducted in ECE and school settings.

9. **Intervention and Evaluation Plan Narrative Summary**

The four Local Implementing Agencies (LIAs) in Stanislaus County will utilize their independent expertise and reach to coordinate efforts in achieving the three local objectives listed above. Through nutrition and physical activity education, as well as training and technical assistance supporting PSE change efforts, the Stanislaus County LIAs are uniquely positioned to support the larger community change goals. The LIAs in Stanislaus County will conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites, reaching a large portion of the SNAP-Ed eligible population, and will be assisted by subcontractors and extenders who will support these efforts. The intervention plan is broken into two main focal areas: (1) community-based strategies, and (2) school-based strategies.

Through strategic planning, the LIAs have concluded that to have the greatest impact on Stanislaus County SNAP-Ed eligible residents, it is essential to focus on collaborative, complementary programming. Specific communities have been identified as uniquely suited, on account of resources and partnership opportunities. In using a comprehensive place based approach, the LIAs will be synchronizing strategies within these particular communities to maximize expertise without overlapping efforts. Each LIA identified existing relationships in these communities that can contribute to extend programming identified in this work plan and capitalize on current infrastructure. These partners will assist in achieving the SNAP-Ed objectives and ultimately realizing the five year change goals established by the LIAs.

Community-focused objectives (Local Objectives #1 & #3) in the intervention plan include activities that provide comprehensive nutrition and physical activity education in combination with high strength intervention strategies, focused on training and technical assistance to stakeholders in primary and complementary settings. Intervention strategies are coordinated for building improved nutrition and physical activity promotion capacity in community locations such as: community gardens, retail outlets (including alternative outlets such as farmer's markets, farm stands, emergency food distribution sites, etc.), community centers, public housing facilities, senior facilities (i.e. congregate meal and senior center sites), and faith-based facilities. LIAs will outreach to relevant partner organizations to assess opportunities and interest for pilot and expansion programs to increase awareness, education and access to fruits, vegetables, and physical activity. Working with current retail partners, healthy retail marketing strategies will be expanded to additional outlets in coordination with the expansion of school-based programming, so that the same families are being reached in both community and school settings with unified messages.

LIAs will support efforts to improve healthy retail settings, including farmer's markets and alternative food outlets, and the connection of farm-to-fork through retail outlets and community gardens. Harvest of the Month material will be utilized to highlight and promote low-cost fruit and vegetable choices, in coordination with product placement strategies to improve physical access and awareness of produce in retail settings. Efforts will be made to expand retail partnerships to improve fruit and vegetable access in additional retail food outlets that serve SNAP-Ed eligible residents.

LIAs will use farmer's market promotion events to increase awareness of markets and increase utilization of supplemental food assistance at the markets. Non-SNAP-Ed funded partners are reviewing opportunities for establishing additional farmer's markets or farm stands, in qualifying low-income accessible areas that coordinate with the work of SNAP-Ed funded agencies. These markets will likely operate at sites where other SNAP-Ed interventions are running to coordinate efforts, promote healthy opportunities and reinforce behavior with the target population. Additionally, healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries) will be addressed to support education efforts to improve nutrition and food resource management. Area Agencies will implement systems changes by establishing relationships with food banks to secure new food distribution sites to support Stanislaus County older adults.

To support sustained healthy behavior, comprehensive nutrition education for all ages will be coordinated with community-based policy, systems and environmental change strategies. This includes garden education for adults and older adults in community garden settings, budgeting and shopping strategies for families who are exposed to SNAP-Ed interventions in retail settings, and MyPlate healthy eating strategies for food assistance sites (congregate meals, emergency food distribution, etc.). Education extenders will be trained, as appropriate, to increase sustainability of education programming and increase reach within the eligible communities. In addition, nutrition education and physical activity promotion messages and curricula will be coordinated between community sites and school-based sites, to reinforce knowledge and behavior in populations that overlap between these settings.

Stanislaus County SNAP-Ed LIAs recognize that physical activity is an integral part of the healthy eating and active living lifestyle, and that accessibility of appropriate environments for physical activity is necessary for residents to be physically active. LIAs will also focus efforts on increasing the availability and community access to physical activity resources, including identified and designated walking zones. These activities will complement other work plan interventions' target populations and sites, through the integration of physical activity promotion with schools through Safe Routes to Schools programs, and working with senior facilities to connect gardening and physical activity programs.

LIAs will identify and work with non-SNAP-Ed funded partners to promote comprehensive approaches to increase access to and utilization of both healthy food sources (e.g. community gardens, retail outlets, alternative outlets, etc.) and physical activity resources (e.g. parks, community centers, afterschool programs, etc.) by SNAP-Ed eligible residents. This includes developing a Healthy Retail Advisory Committee comprised of SNAP-Ed, WIC, Tobacco and Alcohol prevention, and other stakeholders, to identify and implement comprehensive community changes that will benefit SNAP-Ed eligible residents. It also includes engaging city and county officials to identify opportunities for improving physical activity resources available to SNAP-Ed eligible populations. Working at the sector level of the SEM allows us to build additional support for community changes and enhance the reach of interventions to broader levels of the community. As many Stanislaus County cities are undergoing revisions, amendments or updates to general plans, non-SNAP-Ed funded partners will be reviewing opportunities in the built environment, particularly around zoning options and land use, for reinforcing healthy environments.

The School-based objective (Local Objective #2) of the intervention plan includes activities that provide comprehensive nutrition and physical activity education in combination with high strength intervention strategies, focused on training and technical assistance to stakeholders in school and complementary settings. The aim is making school environment changes that sustain and support healthy eating and physical activity opportunities, particularly in eligible pre-school and

elementary school sites, and identifying and implementing sustainability measures through means such as capacity building or Local School Wellness Policies. Intervention strategies are coordinated for building improved nutrition and physical activity promotion capacity in direct care and education providers, food service providers, and other staff that interface with and impact children in the multiple settings.

Building upon relationships with elementary schools already existing within the county, LIAs will continue to provide direct nutrition education and begin to provide physical activity education. LIAs will also train and support teachers as extenders to provide direct education in the classroom and in after school programs. Additionally, nutrition education will be provided to the adult and older adult SNAP-Ed populations in these settings (i.e. parents, grandparents, guardians) that connect shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines. Focus for these adult populations will be placed on selecting target foods and beverages; increasing the skills for label reading, menu planning and food budgeting, increasing knowledge of MyPlate recommendations and exposure to and acceptance of new healthy foods, particularly through Harvest of the Month promotion within school sites and in complementary qualifying sites throughout the county (e.g. retail outlets, farmer's markets, congregate meal sites, public housing facilities, etc.).

At these sites, the intervention plan progresses to interventions at the environmental level of the Social Ecological Model (SEM) via the inclusion of policy, systems and environmental (PSE) change efforts that include implementing school wellness policies that promote access to healthy foods and physical activity. Healthy nutrition and physical activity policies and procedures will be implemented in early care and education settings and elementary schools, which will include (but are not limited to) standards for all foods and beverages offered on site, opportunities for daily physical activity, and the provision of quality nutrition education, garden-based and physical activity education and marketing guidelines for materials posted and shared on site. PSE efforts will also be focused on improving the school lunchroom utilizing the Smarter Lunchrooms Movement (SLM) principles for product placement strategies, signage, painting of murals in eating and play areas, healthy check-out lanes, and healthy items in prominent school lunchrooms.

To ensure that eligible SNAP-Ed populations are being effectively reached, the LHD and UCCE maintain a constant dialogue for coordination of school based efforts. This ensures cross training of staff so that the SNAP-Ed eligible populations are able to receive the most appropriate and effective programming. These programming efforts will occur in multiple targeted sites throughout eligible communities to reinforce changes to residents' diet and activity related access and behavior. Based upon established and growing partnerships, the LIAs determined which agency would be most able to effectively provide services. Through an existing partnership with the Stanislaus County Office of Education (SCOE), the LHD is providing preschool programming to the county in most districts. UCCE has maintained relationships with several elementary schools in many districts. Additionally, UCCE and LHD decided it would be most appropriate to divide efforts for certain school districts based upon school locations in relationship to other community programming. An example of this is Modesto City Schools (MCS), the largest school district in Stanislaus County with 36 schools, which was split due to its size. In an effort to further collaborate, UCCE and the LHD are strengthening efforts to reinforce nutrition and physical activity related behavior change, across the progression of school range ages from preschool thru high school.

At the sector level of the SEM, all four LIAs will continue to meet with Food and Nutrition Network partners to identify best practices and opportunities for implementing school-based nutrition programming. Community partners will be educated about policy changes that may improve the school environment and

support efforts in establishing cross-sector linkages for sustaining change. Some non-SNAP-Ed funded community partners will support these efforts (through additional funding) by providing support for resident engagement in Wellness Policy updates. Other partners will provide additional help to coordinate efforts with school food service in changing cafeteria environments that complement other Work Plan activities, particularly Harvest of the Month and the Smarter Lunchroom Movement. Schools have the potential to reach a multitude of qualifying residents, including both children and adults. Because Wellness Policies have a broad reach through schools, and even entire districts, these activities help to both initiate and sustain change, at multiple socio-ecological levels, across a large population. Changes in Wellness Policies will be oriented around the coordination and sustainability of larger change goals, including increased food access, increased healthy food consumption, and increased physical activity.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process and outcome evaluation activities using State and locally developed surveys. Past evaluation efforts have been exceedingly helpful in informing the program. Reach Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM) evaluations will be used to assess progress and reach of policy, systems and environmental change efforts. They will also help to define the success of sustainability measures. Local data will be collected and entered in SNAP-Ed Activity Tracking Forms (ATF) and Reporting Tools Workbook (RTW), and in coordination with additional observational and survey data, will be used to inform PSE RE-AIM evaluations. Education and Administration Reporting System (EARS) and Semi Annual Activity Report results will be generated from the online ATF and RTW. Impact Outcome Evaluation (IOW) and UC CalFresh approved direct education evaluation tools will be used to measure change, or intent to change, amongst education participants. An IOE plan and report will be submitted annually by the LHD and other LIAs will also collect, report and use evaluation data to inform further program strategies. Participants and stakeholders involved in PSE efforts will be requested to complete evaluation surveys that address, but are not limited to, the following indicators from the Western Region SNAP-Ed Evaluation Framework: MyPlate behaviors (Individual-MT1), shopping behaviors (Individual -MT2), physical activity behaviors (Individual -MT3), fruits & vegetables consumption (Individual-LT2), physical activity levels (Individual-LT7). This data will be used to support efforts that address the following indicators from the Western Region SNAP-Ed Evaluation Framework that advance long-term community benefits: identification of opportunities (Environmental-ST4), partnerships (Environmental-ST6, Sector-ST8), nutrition supports (Environmental-MT4, LT9), physical activity supports (Environmental—MT5, LT10), a focus on community changes with local government (Sector-MT8), agriculture (Sector-MT9), education (Sector-MT10), and community design and safety (Sector-MT11).

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, LIA partnership will improve access to and consumption of fruits and vegetables at 6 qualifying community gardens, 8 qualifying retail outlets, 2 senior food distribution sites, and two-thirds of all qualifying farmer's markets in Stanislaus County through healthy marketing, promotion events, and physical site changes.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Promote the development and utilization of community gardens to increase access to healthy produce.
- Implement Healthy Retail environment changes that support and promote consumption of fruits and vegetables.
- Expand the utilization of food assistance resources at alternative outlets, including farmer's markets, farm stands, etc.
- Support the development of healthy food and beverage policies in community settings.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, LIA partners will reach 1,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.
   b. By September 30, 2017, work with community partners to identify and instill sustainability measures for continuing community gardens; assess a minimum of three additional qualifying community sites to evaluate the feasibility of community gardens, and establish partnerships to support the development and sustainability of gardens.
   c. By September 30, 2017, work with four qualifying retail outlets to identify sustainability measures for long-term continuation of healthy retail marketing; assess the feasibility for healthy retail environmental changes in a minimum of four additional outlets.
   d. By September 30, 2017, host a minimum of one healthy food promotion event in partnership with a qualifying retail outlet.

e. By September 30, 2017, assess the interest and feasibility of two SNAP-Ed eligible sites for fresh fruit and vegetable distribution projects, and engage local food bank to initiate a pilot at a minimum of one qualifying site.

f. By September 30, 2017, engage farmer's market managers in a minimum of three cities to assess and identify opportunities for SNAP-Ed events promoting utilization of food assistance.

g. By September 30, 2017, engage a minimum of one qualifying faith-based community to assess the feasibility for implementing a faith-based wellness policy (e.g. healthy food and beverage standard policy and/or physical activity programs policy).

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, LIA partners will reach 1,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.

b. By September 30, 2018, initiate the development of three community gardens in qualifying sites identified in FFY 2017; assess a minimum of three additional qualifying community sites to evaluate the feasibility of community gardens.

c. By September 30, 2018, work with four qualifying retail outlets to instill sustainability measures for healthy retail site changes; work with a minimum of four previously assessed qualifying retail outlets to initiate healthy retail environmental site changes.

d. By September 30, 2018, host a minimum of one healthy food promotion event in partnership with a qualifying retail outlet.

e. By September 30, 2018, initiate a fresh fruit and vegetable distribution project with the Healthy Aging Association (HAA) at one additional qualifying site.

f. By September 30, 2018, increase utilization of USDA food assistance programs at farmer's markets by hosting promotion events at a minimum of 33% of local qualifying farmer's markets.

g. By September 30, 2018, assist the faith-based community identified in FFY 2017 in developing and implementing a faith-based wellness policy at a minimum of one qualifying site; engage a minimum of one additional qualifying faith-based community site to assess the feasibility for implementing a faith-based wellness policy (e.g. healthy food and beverage standard policy and/or physical activity programs policy).

h. By September 30, 2018, Stanislaus County will establish a Healthy Retail Advisory Committee that may include members from SNAP-Ed, Tobacco Control, WIC, Alcohol Prevention, Cultiva la Salud, etc.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, LIA partners will reach 1,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.
   b. By September 30, 2019, initiate the development of three additional community gardens in qualifying sites identified in FFY 2018; work with community partners to identify and instill sustainability measures for community gardens initiated in FFY 2017.
   c. By September 30, 2019, work with four qualifying retail outlets to instill sustainability measures for long-term continuation of healthy retail marketing and healthy retail site changes.
   d. By September 30, 2019, host a minimum of one healthy food promotion event in partnership with a qualifying retail outlet.
   e. By September 30, 2019, initiate a fresh fruit and vegetable distribution project at one additional qualifying site; instill measures for long-term sustainability in the project site identified in FFY 2018.
   f. By September 30, 2019, increase utilization of USDA food assistance programs at farmer's markets by hosting promotion events at a minimum of 66% of local qualifying farmer's markets.
   g. By September 30, 2019, assist the faith-based community identified FFY 2018 in developing and implementing a faith-based wellness policy at a minimum of one qualifying site.
   h. By September 30, 2019, Stanislaus County Healthy Retail Advisory Committee will develop an implementation plan for a healthy retail recognition program.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Stanislaus County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 1/30/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partnership will improve access to and consumption of fruits and vegetables at 6 qualifying community gardens, 8 qualifying retail outlets, 2 senior food distribution sites, and two-thirds of all qualifying farmer's markets in Stanislaus County through healthy marketing, promotion events, and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Attend and/or convene a LIA partnership group at least four times per year to coordinate USDA food program messaging, interventions and efforts to increase access to and consumption of healthy foods in the SNAP-Ed eligible population.	CED CEI MPR X C&C TTA	CWD X LHD X AAA X UCCE X CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF Agenda & Minutes
1.2	Establish a Healthy Retail Advisory Committee. Recruit a minimum of six members, including partners from CNAP or other coalition partners, Tobacco Education, and Alcohol Prevention. Attend and/or convene the Healthy Retail Advisory Committee at least once per quarter to provide guidance and coordinate retail efforts. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019, a minimum of 20 qualifying schools (i.e. pre-school, elementary school, middle school, high school) in Stanislaus County will make changes to school policies, physical environments, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Support the development and/or enhancement of school/pre-school wellness policies
- Smarter Lunchroom Movement (SLM)
- Implement edible school-site gardens that support nutrition and garden education for students in all grade levels, and increase access to healthy produce.
- Build local school capacity to implement approved physical activity promotion programs (i.e. SPARK, CATCH, etc.) for students in all grade levels.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, LIA partners will reach 5,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.
   b. By September 30, 2017, engage school and pre-school stakeholders to identify sustainability measures for a minimum of six garden sites.
   c. By September 30, 2017, establish partnerships with school and pre-school stakeholders at a minimum of six qualifying sites to evaluate the feasibility of school gardens.
   d. By September 30, 2017, establish partnerships with pre-school stakeholders at a minimum of four qualifying sites to evaluate the feasibility of pre-school stencil projects.

e. By September 30, 2018, establish pre-school stencil projects and a minimum of one of the sites identified in FFY 2017

f. By September 30, 2017, establish partnerships with school stakeholders to identify, engage, assess for feasibility and initiate Smarter Lunchroom Movement strategies at a minimum of two qualifying sites.

g. By September 30, 2017, engage school stakeholders to initiate SPARK or CATCH physical activity programs at a minimum of two sites.

h. By September 30, 2017, provide technical assistance to school administrators and stakeholders on strategies for integrating healthier foods into school meal products

i. By September 30, 2017, assist school stakeholders at a minimum of one school district for continued engagement efforts of their Local Wellness Policy; assist a minimum of one additional school district in identifying and employing factors to strengthen the language and improve implementation of their Local School Wellness Policy; establish partnerships with a minimum of two additional districts to engage their school wellness policy committees.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, LIA partners will reach 5,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.

b. By September 30, 2018, establish gardens at qualifying school and/or pre-school sites identified in FFY 2017, and establish partnerships with stakeholders at a minimum of six additional qualifying school and/or preschool sites to evaluate the feasibility of school gardens.

c. By September 30, 2018, establish partnerships with pre-school stakeholders at a minimum of three additional qualifying sites to evaluate the feasibility of pre-school stencil projects.

d. By September 30, 2018, establish pre-school stencil projects and a minimum of three sites, identified in FFY 2017.

e. By September 30, 2018, establish partnerships with school stakeholders to identify, engage, assess for feasibility and initiate Smarter Lunchroom Movement strategies at a minimum of two additional qualifying sites.

f. By September 30, 2018, engage and support school stakeholders to conduct SPARK or CATCH physical activity programs at a minimum of six sites (inclusive of the two sites from FFY 2017).

g. By September 30, 2018, assist a minimum of one additional school district to identify and employ factors to strengthen the language and improve implementation of their Local School Wellness Policy; establish partnerships with a minimum of one additional district to engage their school wellness policy committees.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, LIA partners will reach 5,000 eligible children, adults, and seniors with direct education and 60000 with indirect education; and will provide training and TA to support the development of education extenders.

   b. By September 30, 2019, establish gardens at qualifying school and/or preschool sites identified in FFY 2018, and engage stakeholders to initiate sustainability measures for all twelve garden sites.

   c. By September 30, 2019, establish pre-school stencil projects and a minimum of three additional sites, identified in FFY 2018.

   d. By September 30, 2019, establish partnerships with school stakeholders to identify, engage, assess for feasibility and initiate Smarter Lunchroom Movement strategies at a minimum of two additional qualifying sites.

   e. By September 30, 2019, engage and support school stakeholders to conduct SPARK or CATCH physical activity programs at a minimum of ten sites (inclusive of the six sites from FFY 2018).

   f. By September 30, 2019, assist a minimum of one additional school district in identifying and employing factors to strengthen the language and improve implementation of their Local School Wellness Policy.

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):
By September 30, 2019, a minimum of 20 qualifying schools (i.e. pre-school, elementary school, middle school, high school) in Stanislaus County will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Attend a minimum of four district/school wellness councils to remain current with ongoing Local School Wellness Policies (LSWP) implementations. Engage and provide technical assistance to School Wellness Coordinators in updating LSWPs to conform to new Healthy, Hungry-Free Kids Act (HHFKA) standards.	CED: ; CEI: ; MPR: ; C&C: X ; TTA: X	CWD: ; LHD: X ; AAA: ; UCCE: X ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X	ATF Agenda PSE RE-AIM Log of TA Provided UC CalFresh Reporting Tools Workbook

					Year 3 Q1 Q2 Q3 Q4 X X X X	
2.2	Engage and provide technical assistance to community leaders (i.e. PTA members, parents, students, community residents, principals, teachers, etc.) to identify priority areas regarding LSWPS, and establish methods for improving implementation. As appropriate, present and provide technical assistance on strategies for promoting and sustaining Farm-to-School efforts through linkages to the LSWP(s). Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, LIA partnership will assist eight qualifying areas (qualifying sites and/or census tracts) in Stanislaus County in improving environmental support for physical activity and promoting utilization of physical activity resources.

SNAP-Ed State Goals:

	Goal 1: Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Physical Activity Environments:
  - Safe Routes to School
  - Walking Clubs
  - Faith-Based PA
- Engage parks and recreation departments to increase target population participation in physical activity programs

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, engage school stakeholders and initiate Safe Routes to School program(s) for eligible students at a minimum of one qualifying school.
   b. By September 30, 2017, assess the feasibility for walking clubs in SNAP-Ed qualifying census tracts and/or sites, and identify a minimum of three sites to map potential routes.
   c. By September 30, 2017, assess the interest at a minimum of one qualifying faith-based facilities for the initiation of physical activity programs for eligible SNAP-Ed residents.
   d. By September 30, 2017, engage city and county department officials from a minimum of one city to identify opportunities for environmental changes that increase access to physical activity resources.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, identify sustainability measures for Safe Routes to School programs started in FFY 2017, and initiate additional programs for eligible students at a minimum of one additional qualifying school site.
   b. By September 30, 2018, pilot a minimum of one walking club for eligible SNAP-Ed residents.
   c. By September 30, 2018, pilot a physical activity program in a minimum of one qualifying faith-based facility, and identify measures for long-term sustainability; assess the interest at a minimum of one additional qualifying faith-based facilities for the initiation of physical activity programs for eligible SNAP-Ed residents.
   d. By September 30, 2018, engage city and county department officials from a minimum of two additional cities (total of three) to identify opportunities for environmental changes that increase access to physical activity resources.
3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, identify sustainability measures for Safe Routes to School programs started in FFY 2018, and initiate programs for eligible students at one additional qualifying school sites.
   b. By September 30, 2019, initiate two additional walking clubs for eligible SNAP-Ed residents.
   c. By September 30, 2019, implement sustainability measures to maintain the faith-based physical activity program initiated in FFY 2018; initiate physical activity program(s) in a minimum of one additional qualifying faith-based facility.
   d. By September 30, 2019, engage city and county department officials from a minimum of two additional cities (total of five) to identify opportunities for environmental changes that increase access to physical activity resources.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partnership will assist eight qualifying areas (qualifying sites and/or census tracts) in Stanislaus County in improving environmental support for physical activity and promoting utilization of physical activity resources.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Attend at least one Safe Routes to School meeting at a minimum of four schools and/or school districts, to assess needs and opportunities for technical assistance. Engage community and school stakeholders to initiate Safe Routes to School programs at a minimum of one	CED CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: TBD AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	ATF Agenda Partner List RE-AIM

	qualifying school in year 1, one additional qualifying school in year 2, and one additional qualifying school in year 3.				Year 3 Q1 Q2 Q3 Q4 X X X X	
3.2	Assist a minimum of three qualifying sites and/or census tracts in conducting physical activity environment assessments and develop an action plan including, but not limited to, mapping walking paths and engaging additional SNAP-Ed eligible residents for resident advisory/wellness committees. Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

"Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries. The projected FY17/18 composite benefit rate is .4264 for group A, and .6438 for group C; The FY 18/19 composite benefit rates are .4477 for Group A and .6759 for group C. The average rate listed on the budget is for calculation purposes only and is an estimate of the combined rates."

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

County Name: Sutter

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names:**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	California Department of Public Health: CDPH: (Local Health Department: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

a. Demographics of Sutter County:

Sutter County has an estimated population of 95,847 of which 77.4% resides in its two cities, Yuba City and Live Oak[1]. 89% of Sutter County residents reside within the Census County Division of both cities[2]. In 2014, 6.7% of Sutter County residents were children under 5 years of age, and 19.7% were children between 5 and 17 years of age.59.1% of Sutter County residents were adults 18 to 65 years of age, and 14.5% were 65 years and older[1]. 49.7% of Sutter County residents are male, and 50.3% female[1]. 78.4% of Sutter County residents, aged 25 or older, have a high school diploma and only 18.5% possess a bachelor's degree or higher education.

Based on the 2010-2014 U.S. Census Bureau the median household income in Sutter County is $51,527[1], and the December 2015 unemployment rate for Sutter County (11.4%) is almost twice the rate for California (6.2%)[3]. 16.7%[6] of the Sutter County population has an income below the Federal Poverty Level (FPL). 18.2% of families with 1-2 related children, 23.0% of families with 3-4 children, and 32.9% of families with 5 or more children are in poverty, compared to 6.6% of families without related children[7]. In 2013, 26.1% of all Sutter County children were living in poverty[9]; this includes 33.9% of children under 6 years old, and 39.2% of children 6-11.

b. Racial and Ethnic Composition of Sutter County:

The racial and ethnic distribution of this population reflects Sutter County's diversity with 74.0% identifying as Whites, 16.5% as Asians, 10.5% as Asian Indians (i.e. Predominantly Punjabi- as the Punjabi community in Sutter County is one of the largest outside the Punjab state of India), and 9.5% as Blacks and all other races. Hispanics form 29.9% of the population and non-Hispanics form 70.1%. Of children under the age of 18, 38.2% are non-Hispanic whites, 40.6% Hispanic or Latino, 13.1% Asian, 5.3% two or more races/ethnicities and 2.8% Black and other races[9]. Approximately 22.9% of Sutter County residents were born outside of the United States[15]. Of these, 6.2% are under 18 years of age, and 14.6% are age 65 and older. Of those born outside the United States, 46.7% are Hispanic and 40.9% are Asian, predominantly Punjabi.

c. Primary Languages Spoken in Sutter County:

Of the total Sutter County population 5 years of age and over, 62.7% speak English only[4]. Of the 37.3% that speak languages other than English, 21.4% speak Spanish[4] and about 10.0% speak Punjabi. . 47.8% of children in Sutter County do not speak English at home[9]. 16.6% of children enrolled in Sutter County schools are English learners; of these, 70.9% speak Spanish, 22.5% speak Punjabi, 1.3% speak Hmong, 1.2% Farsi, 0.9% Russian and 3.3% one of 21 other languages. In 2012-2013, 38% of Sutter County 5th Graders, 42% of 8th Graders, and 62% of 11th Graders scored at the basic or below on California Standardized Testing English proficiency[9].

d. Utilization of SNAP and Other Nutrition-Related Programs in Sutter County:

40.1% (37,491) of the population are SNAP-Ed eligible (income ≤ 185% FPL) [6]. Of these, 56.0% (4,698) include children under the age of 6 years and 48.1% (8,142) of children between the ages of 6-17 years. 36.8% (20,643) of adults 18 years of age and older and 33.1% (4,008) of adults aged 65 and older are also (income ≤ 185% FPL) [6]. Of the 21 census tracts in Sutter County, 28.6% (6) are SNAP-Ed eligible[6]. These census tracts are mainly located in the eastern and northeastern part of the county. 76% (32 of 43) of schools in Sutter County are SNAP-Ed eligible. 8.3% of Sutter County households received Food Stamp/SNAP benefits in 2014. Of those, 76.3% had children under the age of 18 years and 26.5% identified themselves as Hispanic or Latino origin [8].

61.8% (13,261) of students in the county are eligible for Free/Reduced Price Meals. [6]. 14.1% of the total population of Sutter County participates in the CalFresh program[6]; in 2013, 21.3% of all households with children under the age 18 years received CalFresh[9].

e. Nutrition Behaviors of Sutter County Residents:

Although 75% of the zip codes in the county have grocery stores, produce stands, or farmers markets, few people (adults) consume enough fruits and vegetables. 57.1% of children age 2-11 years[14] and approximately 30% of children age 12-17 years[9] consumed 5 or more servings of fruits and vegetables. When asked how many times they consumed fruits and vegetables per day prior to a 5 series nutrition education class only 27.4% of adults reported that they consumed fruits and vegetables more than three times per day[14]. At the same time, 72% of all Sutter County adults and 65.7% of those SNAP-Ed eligible reported consuming fast food one or more times a week[6]. Among children, 60.5%[14] consumed fast food at least once and 30.5%[16] at least twice in the previous week; of children on SNAP, 52.9%[14] consumed fast food at least once in the previous week. 43.4% of adults[6] and 42% percent of children 2-17 years of age[14] consumed one or more sugar-sweetened beverages every day. 31.1% of Sutter County adults engage in binge drinking (4-5 more drinks in one occasion) in the past year[10], and approximately 14% of children under the age 18 years reported binge drinking in the last month[9].

f. Food Access, Food Insecurity and Underserved Geographic Areas in Sutter County:

18.3% of all Sutter County residents, and 29.7% of children, have food insecurity. Sutter County has five identified food deserts, defined as a low-income census-tract where 33% or more of the population does not have a supermarket or grocery store within 1 (urban areas) or 10 (rural) miles of their residence (L1 and 10): three are located in Yuba City, one in Live Oak and the northwestern part of Sutter County, and one in Meridian/Robbins and the western portion of Sutter County[12]. If the L1/2 and 10 metric is used instead, Yuba City has five food deserts[12]. There are 0.23 grocery stores per 1,000 residents, and 52.9% of all 102 restaurants in Sutter County in 2012 are fast food restaurants[13]. 10.5% of residents in Sutter County have limited access to healthy food; only 67.5% of SNAP-Ed adults can always find fresh food and vegetables, and only 48.5% can always find *affordable* fresh fruits and vegetables[6].

g. Recreational Access and Physical Activity in Sutter County:

There are only 0.11 recreational facilities per 1,000 residents[13], and only 67% of Sutter County residents have a park within a half-mile, or other recreational facilities within one (urban) or three (rural) miles of their residence[14]. 77.5% of children and teens have a park or open space within walking distance[14]. Only

27.8% of Sutter County residents engaged in regular walking in the past week[10], and 22% of Sutter County adults report no leisure-time physical activity[6]. While 54.6% of children age 2-11 are physically active for at least one hour per day, only 18.4% of those under 18 are[6].

h. Obesity prevalence:

Adult and child obesity prevalence is high in Sutter County. 30.4% of the adult population is overweight, and 32.7% are obese[6]. Of SNAP-Ed eligible adults, 18.9% are overweight and 39.9% are obese[6]. Among children, 10.7% of those between the ages of 2-11 years and 19.9% of those between the ages of 12-17 years were overweight and 15.0% were obese[6]; among low income children, 29.9% of those between the ages of 2-4 years and 40.2% of those between the ages of 5-9 years were overweight or obese[14]. In 2015, 42.1% of all 5th graders, 38.1% of all 7th graders, and 34.8% of all 9th graders in Sutter County were overweight or obese[11]. In addition, data from the California Health Interview Survey shows that the percentages of obese Sutter County adults went up from 17.6% in 2003 to 30.5% in 2012-2013 which is a 73% increase in obesity rates over 10 years. This increase was higher than the state increase of 20.4% to 24.4% which is a 20% increase over 10 years[10].

4. **Community Assessment**

The information in the jurisdiction description comes in part from the 2015 SNAP-Ed County Profiles prepared by the California Department of Public Health (CDPH) which includes county-level data from a variety of sources such as Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, Feeding American's Map the Food Gap, Food Insecurity in Your County. By utilizing a comprehensive set of assessment measures to inform the development of the work plan, Sutter County SNAP-Ed local implementing agency partnership (LIA partnership) has identified the population and areas of highest need and designed a strategy to implement a coordinated set of interventions that address all levels of the socio-ecological model and provide long term benefit to the SNAP-Ed participants/eligible populations.

In 2013 a Community Health Needs Assessment was conducted by Sutter Health which identified chronic diseases (diabetes, heart disease, hypertension, and stroke), as the primary health issue in the Yuba-Sutter community especially among the low-income and Hispanic populations[1]. 29.2% of Sutter County adults have one, 10.0% have two, and 5.5% have three to five chronic conditions. The proportion of residents with two or three to five chronic conditions is higher in Sutter County than either the Northern and Sierra counties (8.4% and 2.0%) and California as a whole (9.2% and 2.2%)[6].

32.9% of Sutter County residents in 2010 were estimated to have cardiovascular disease or diabetes, with an annual estimated health care cost of $125,866,332.00[5]. In 2015, Sutter County ranked 27th for overall health outcomes, and 37th for health factors, among California's 58 counties[2]. The 2015 County Health Status Profiles for all 58 California counties (2011-2013 average) ranked Sutter County as 46th out of 58 (at 117.5 per 100,000 residents) for age-adjusted death rate for coronary heart disease[2]. Sutter County fared worse than the state rate of 103.8 and the Healthy People 2020 objective of 100.8 per 100,000 populations.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County **Three-Year** **Rev. 5/24/2017**

Integrated Work Plan

FFY 2017–2019

Sutter County has been reported to be among the five counties in California with the highest rates for diabetes. In 2012-2013, diabetes prevalence among Sutter County adults was 13.9%, greater than the California-wide prevalence of 8.5%[3]. Sutter County was 41st for diabetes deaths (21.3 per 100,000 residents); California-wide diabetes mortality was 20.8 per 100,000 residents[4]. Sutter County was also 43rd for cerebrovascular disease deaths (40.4 per 100,000 residents), higher than the California-wide cerebrovascular mortality of 35.9 per 100,000 residents[2]. In 2012-2013, 40.1%, of Sutter County residents had ever diagnosed with high blood pressure, greater than the California-wide prevalence of 27.4%[4].

In March 2013 Sutter County LHD SNAP-Ed staff conducted Communities of Excellence in Nutrition, Physical Activity and Obesity (CX3) in three qualifying neighborhoods in Sutter County. Downtown Yuba City, Central Garden Highway and Live Oak were assessed using GIS, walkability surveys and store observational surveys in order to identify areas for improvements in nutrition and physical activity. A summary of the data collected include:
Downtown Yuba City – 93% of the food sources in this neighborhood were identified as unhealthy. There are 11 fast food outlets with a ratio of 1: 660 residents in this neighborhood. There are two supermarkets and neither are near public transportation, over 50% of the population live more than ½ a mile from the supermarkets.

Central Garden Highway -100% of the food sources in this neighborhood were identified as unhealthy. There are no supermarkets in this neighborhood and 50% of the residents have to travel at least 2 miles to reach the nearest supermarket.

Live Oak – 94% of the food sources in this neighborhood were identified as unhealthy. At the time of CX3 there were no supermarkets in Live Oak and residents had to travel 12 miles to the nearest supermarket. In 2014 a supermarket opened in this community. In all three neighborhoods, convenience stores were identified as the primary food source.

There is only one food bank that serves the residents of Sutter County, and it did not meet healthy food standards as defined by CX3. At the time of the CX3 survey there was one Farmer's Market in Sutter County. This market was established over 20 years ago and is within ½ mile of two of the CX3 neighborhoods but does accept EBT.

In of 2013 Sutter County Tobacco Control joined a statewide effort to collect data on the retail environment. Eighty-eight stores were surveyed in the county and only 23% of stores that EBT "had a good selection of good quality of fresh fruits and vegetables."

In 2012 the Sutter County Public Health Tobacco Control Program created a DVD presentation, "Looking at Chronic Disease in Sutter County", in order to educate the community about the high rates of chronic disease locally and to identify contributing factors including both personal behavior and environmental influences. Local chronic disease data, such as tobacco use rates, heart disease rates, and soda consumption rates, were collected. Environmental challenges to health including poor walkability and a low number of healthy food outlets were highlighted.

Data was collected from a wide variety of sources including: the California Health Interview Survey (CHIS) conducted by UCLA; the California Cancer Registry; California's County and Statewide Archive of Tobacco Statistics (C-STATS); the American Lung Association; the American Heart Association; the Pediatric Nutrition Surveillance System (PEDNSS); the National Health and Nutrition Examination Survey (NHANES), and others.

Since its completion in the summer of 2012, the DVD has been played for nearly 700 people at a variety of venues, including an audience of 100 local elected officials and policy makers at the April 2013 community forum, "Taking Action for a Healthier Community". Another 200 copies have been distributed, including to elected officials at the city, county, state and national levels. In 2013 "Looking at Chronic Disease in Sutter County" earned a Silver Medal Award for Excellence from the National Public Health Information Coalition (NPHIC).

No local change can occur until members of the community decide that there is a problem with the status quo. Thanks to the broad distribution and viewing of "Looking at Chronic Disease in Sutter County", more members of the community are becoming aware of the challenges in the community beyond the level of the individual.

Private and public partners have come together to continue to explore ways to address the chronic disease challenge and develop strategies to "Create a Healthier Sutter – Eat Better, Move More, and Stay Away from Tobacco".

Based on the multi-sector, multi-level community needs assessments conducted in recent years, the SNAP-Ed program has developed a three-year integrated work plan to address the health inequities in Sutter County by focusing development, promotion and implementation of school and community wellness policies. Due to the lack of quality fresh fruits and vegetables in retail outlets, the integrated work plan will also focus on promoting access and appeal of healthy foods in retail settings.

5. **Community Change Goals**

Nutrition and obesity issues have been determined to be priority areas of focus for Sutter County. The Sutter County LIA partnership has determined that three areas of need are essential to increasing the overall health of Sutter County. Sutter County SNAP-Ed funded LIA's will focus their efforts on the SNAP-Ed eligible portion of the county's population and on SNAP-Ed allowable interventions and activities which align with the United States Department of Agriculture (USDA)-Western Regional Office (WRO) Evaluation Framework.

While Sutter County had multiple data sources to use when assessing community needs, because of the focus on nutrition and obesity issues we focused on data that supported that work. The data pointed towards efforts pertaining to increasing appeal and access of fruits and vegetables and appeal and access to physical activities, and focusing on school-based wellness strategies.

LIAs will support long term community change goals in the county by working with community partners to identify strategic partners and convene community-wide, multi-sector coalitions to improve nutrition and physical activity; support an environment that makes healthy food and beverage options the "norm"; improve accessibility and create demand for healthy foods and beverages;

1. Increasing appeal and access to nutrient dense foods and beverages
    - Improve food resource management strategies and increase food security for SNAP-Ed participants/eligible
    - Incorporate evidence based nutrition education at approved census tract sites
    - Conduct required CX3 assessment in all approved census tracts
    - Support and/or expand community and school gardens
    - Wellness policies (community organization and schools)
    - Increase appeal and access to healthy dietary choices at neighborhood retail stores
    - Conduct administrator, teacher, parent and student education

2. Increasing of and access to physical activity opportunities for SNAP eligible residents
    - Support the development and implementation of Local School Wellness policies
    - Integrate physical activity promotion into qualifying programs

3. Food and beverage policies
    - Provide technical assistance in the development, implementing and evaluating of Local School Wellness policies
    - Support the Smarter Lunchrooms Movement activities relating to school environment changes

Specifically, Sutter County SNAP-Ed LIAs will achieve the following three year objectives by 2019:

1. By September 30, 2019, increase appeal and/or access of healthy dietary choices at 3 SNAP-Ed qualifying neighborhood retail stores by supporting point of purchase and marketing/signage that will reach a minimum of 6,000 SNAP participants.
2. By September 30, 2019, LIA partnership will assist 5 qualifying sites (i.e. community event organizers, collaborations, public housing, schools, faith based and local parks) in developing, updating and/or implementing site wellness policies and procedures including making healthy site changes to improve nutrition and increase participation in physical activities by enhancing the physical environment; 20 individuals within SNAP-Ed qualifying sites will be trained as trainers/extenders to provide direct and indirect education to support sustainability efforts.

6. Partnerships and Collaborative Efforts

Sutter County's CNAP Team, "Sutter CNAP" was established in 2012 and is made up of approximately 17 core collaborative partners. Partners include Sutter-Yuba Mental Health, Sutter County Probation, Sutter County Peach Tree Clinic, Sutter County Children and Families Commission, Sutter One Stop, Yuba-Sutter Food Bank, SNAP-Ed Program, Buddy's House, Richland Public Housing, Sutter County Public Library, Tax Preparers in Sutter County, Sutter-Yuba Homeless Continuum of Care, WIC, Mahal Plaza Public Housing, Faith based organizations, Yuba Community College and UCCE. The SutterCNAP team meets monthly to coordinate efforts to implement the nutrition education and obesity prevention goals as set forth by the U.S. Department of Agriculture (USDA). Community events and SNAP-Ed funded events are shared at CNAP meetings which are then entered into a shared calendar to avoid duplication of services.

In the initial stages, SutterCNAP partners focused efforts on promoting the 2010 Dietary Guidelines for Americans with emphasis on Rethink Your Drink and Make Half Your Plate Fruits and Vegetables. The team designed a poster which promoted local no-cost places to be physically active, and MyPlate messages. These tips along with local and online resources were included on a "take away" card affixed to the posters. Partners worked together to saturate the community distributing over 200 posters to local schools, childcare facilities and health clinics, community based organizations and faith based agencies. SutterCNAP partners also collaborated to provide "Train-the-Trainer" activities regarding how to promote low-cost physical activity strategies and methods to encourage reduction of consumption of unhealthy foods and beverages.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/24/2017**

In early 2014, SutterCNAP established a mission statement and primary goals. The mission statement reads as follows: *Sutter County Nutrition Action Plan (SutterCNAP) Team will work to improve the health of the community by reducing food insecurity and supporting education, policies, and environments that promote physical activity, nutrition, and access to healthy foods.* Additionally, the group worked over the next few months to finalize and solidify a local work plan. The work plan was developed as part of a collaborative effort from all CNAP partners and included strategic goals objectives and activities which addressed issues identified by local community assessments including CX3 (conducted in 2013) The Healthy Stores for a Healthy Community campaign as well as input from the 2014 local Healthcare agencies Community Health Needs Assessment findings. In fall of 2015, *Creating a Healthier Sutter Collaborative* (CHS Collaborative) was established by the Sutter County Health Department in order to serve as a backbone for other local coalitions and workgroups who also work to address health disparities in Sutter County such as the Yuba-Sutter Tri-counties Breast feeding Alliance, The Healthy & Safe Neighborhoods Coalition and the Student Advocates for Sutter County. CHS Collaborative meets quarterly. SutterCNAP will continue their efforts to execute their work plan goals and objectives under the umbrella of the CHS Collaborative. Both LIA's will collaborate to facilitate quarterly SutterCNAP meetings and update SutterCNAP work plan annually to reflect community needs identified by the CHS collaborative.

Representatives from both LIA's will attend all quarterly CHS collaborative meetings in order to gain support and recruit traditional and non-traditional partners to assist with SNAP-Ed program goals and objectives. On a quarterly basis LIA's will report to the CHS collaborative on health disparities as they relate to the SNAP-Ed population regarding local CX3 findings, obesity, food insecurity and physical inactivity. Both LIA's will work together to maintain collaborative partnerships and increase participation to address identified food insecurity, access to unhealthy foods and beverages, and neighborhoods with minimal physical activity opportunities among SNAP participants/eligible as outlined in the SNAP-Ed program goals and objectives. Finally, LIA's will support and promote CHS collaborative and SutterCNAP efforts to sustain local policy, systems and environmental strategies as they relate to the SNAP-Ed population. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc.

Non SNAP-Ed funded, UC Expanded Food and Nutrition Education Program (EFNEP) is in 5 sites and assists limited-resource families with children, through series based, behaviorally focused nutrition education. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and to be physically active. EFNEP also contributes to participants' personal development and the improvement of their total family's diets and nutritional welfare. EFNEP is supported by USDA's National Institute of Food and Agriculture (NIFA) Smith-Lever funds. EFNEP adult program is eight lessons and provides education through the Promotora Model. The effectiveness of nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist and 24-hour food recalls) filled out by the participants EFNEP partners with community based organizations. Methods for program delivery include direct teaching in groups.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
x	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify): Reading Food Labels*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All Curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2017** USDA approved UC CalFresh, California Department of Aging, and California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies (LHD and UC CalFresh) in Sutter County will collaborate to provide comprehensive strategies and interventions which include nutrition/garden education and physical activity promotion; community events; training and technical assistance; nutrition and physical activity messaging via social media; and working with retail partners to increase retail-based environmental supports that encourage purchase and consumption of healthy foods and beverages. Partnerships and collaborations will be developed through ongoing CNAP meetings to help achieve our community change goals for the SNAP-Ed eligible population. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change. The LHD has bi-lingual (English/Spanish and English/Punjabi) nutrition educators to reach the Hispanic/Latino and East Indian communities. The LHD and UC CalFresh incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venues. UC CalFresh and the LHD will address training and technical assistance of personnel in the community and share

training opportunities across agencies when possible. Both direct and indirect education at the community level is provided by the LIAs, as are publicity (e.g. news stories) and event promotions to increase nutrition- and PA-related messaging to the targeted SNAP-Ed population. Coordination and collaboration is addressed by both LIAs collaboratively and within their respective service populations. Both LIAs will employ research-based interventions to address the objectives in the work plan, which were derived from results obtained from FFY 15 data and each agency's community assessments.

UC CalFresh and Sutter Health Department

UC CalFresh and LHD will focus on School Wellness Policies and will collaborate with the local school wellness policy committees to encourage school policy, system, and environmental improvements to encourage increased consumption of healthy foods and beverages and increased physical activity among the students and staff. LIA's will strengthen school wellness policies to support integration of the Smarter Lunchrooms Movement, playground stencils, and school gardens in targeted school sites. LHD will work with retail partners to increase appeal and/or access of healthy dietary choices by supporting point of purchase and marketing/signage. Both UC CalFresh and LHD will engage in the following activities in each of their target areas throughout the grant cycle:

Nutrition/Garden Education - Adult

The LIA's will be providing nutrition education, including food resource management, and physical activity promotion to low income individuals and families in Sutter County. The LIA's will be working together to influence individual and family behavior.

Adult target population delivery methods include:

- Series based workshops
- One- Time stand-alone workshops
- Parent Teacher Groups (PTG's)
- School based events
- Workshops with existing Health and Human Service's Agency groups (HHSA)
- Community events

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/24/2017**

Nutrition/Garden Education – Youth

We will utilize the following strategies for our youth population:

- Classroom lessons, including Harvest of the Month and other approved curriculum
- Series based lessons
- Special School Events

Nutrition/Garden Education – Family Centered

Whenever possible we will provide focused activities to engage parent and child in the learning process. We will frequently use cooking activities and nutrition, garden, and/or cooking activities and physical activity games at community and school events that encourage all members of the family to get involved.

Media, Social Media and Public Relations

Both UC CalFresh and LHD will utilize their respective Facebook pages and websites to communicate approved nutrition and PA messages and announce special events to the SNAP-Ed eligible target audience. We will collaborate with other partners to focus on key messages and to use consistent nutrition messaging across the county.

Community Events

Community events often present a perfect learning arena for family-centered education. Health fairs, Children's Fair, and other events provide the opportunity to promote Rethink Your Drink information, offer taste testings of approved recipes, garden enhanced nutrition education, and provide simple PA information. These events allow SNAP-Ed messaging to reach a wide audience in a fun and interactive way that helps to reinforce learning objectives. Being an active participant in these events also allows us to become part of the planning process and introduce healthy foods and beverage policies.

Coordination and Collaboration

UC CalFresh is the bridge from the university to local communities, providing research-based information to individuals and community agencies. Both UC CalFresh and the LHD will continue to be active partners and play a leadership role in the County Nutrition Action Plan (CNAP), and work with other partners toward developing and implementing goals and objectives for Sutter County's CNAP. All LIA's will meet regularly to discuss the key messages and direction of the CNAP group and continue to invite new partners to table to help develop a well-rounded group. We will continue to work together to establish a cycle for messages to ensure maximum reach is made through our partners.

Training and Technical Assistance

UC CalFresh will provide training and technical assistance to all enrolled extenders participating in the UC CalFresh Nutrition Ed program. Extenders include but are not limited to teachers, classroom aids, youth, parents, program specialist, and agency partners All necessary materials to deliver the lessons will be provided. In addition, UC CalFresh will continue to recruit and train extenders to deliver approved curriculum in the classrooms or at after school programs. Teachers and extenders will be trained throughout the year. In addition, LHD will provide training to community based organization staff who will serve as nutrition educators for the program. LHD will continue and expand the Train-the-Trainer program that began in FFY16 by continuing to recruit and train community champions to deliver SNAP-Ed lessons with minimal efforts within the community organization that they are associated with. LHD will continue to support and provide technical assistance to local partners to adopt policies, systems and environmental changes at their respective sites.

Policy, System and Environmental Change

LIA's will be working with parents, teachers, administrators and community partners in Sutter County to review current policies and identify areas for improvement of site wellness policies. In addition, they will assist with the promotion and implementation of new policies. UC CalFresh will utilize the Smarter Lunchrooms Movement to implement food service best practices and strategies to increase healthy food access and consumption. Additionally, UC CalFresh will continue to use the Shaping Healthy Choices Program as a framework to support/reinvigorate school gardens and stenciling projects at targeted school sites. LHD will work with local retail sites to increase appeal and access of healthy dietary choices by supporting point of purchase marketing and signage.

Key educational messages will emphasize the 2015 Dietary Guidelines for Americans (using MyPlate and promoting increased fruit/vegetable consumption), access to healthy foods and beverages, increasing physical activity and decreasing the consumption of sugar sweetened beverages via education and environmental support.

The LIA's will use innovative and evidence-based practices that effectively engage rural low-income families. With this multi-level approach, the following interventions will be implemented:

State Level Objective 1, centered on Increasing Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages, will be addressed in all the local objectives. Specifically, Local Objective 1 is focused on increasing appeal and access of healthy dietary choices in retail stores. Local Objective 2 will encompass developing, updating and/or implementing site wellness policies to improve nutrition.

State Level Objective 2, Increasing Physical Activity, will be addressed in Local Objective 2. While this local objective is not directly related to physical activity, it has a component of physical activity promotion through school wellness policies and site wellness policies which will support increasing and improving physical activity opportunities.

State Level Objective 3, Improving Food Resource Management, will be addressed in Local Objective 1and 2. Local Objective 1 will work with local retail stores to increase food access in underserved neighborhoods by increasing the number of fruits and vegetables available. Local Objective 2 while not directly related to food resource management, the direct education classes conducted for adults will include food resource management information.

State Level Objective 4, Increase access and/or appeal of dietary choices and decrease access to and/or appeal of unhealthy dietary choices will be addressed through local objective 1 by working with at least 3 local retail stores to support point-of-purchase marketing and signage and provide training and support to the retail store owners/managers.

State Level Objective 5, Increasing access to and/or appeal of physical activity opportunities will be addressed through Local Objective 2. Local objective two will inform, promote and provide assistance and support to approved sites on the playground stenciling and murals project.

Evaluation

Process evaluation reporting will document the range of SNAP-Ed services provided in Sutter County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct/indirect education will be documented in the ATF/EARS, Reporting Tools Workbook, and compared to original reach targets. The actual number of SNAP-Ed eligible individuals reached by PSE change activities will also be compared to targets and sites that showed high performance in terms of reach and multi-intervention strategies will be identified and considered for replication.

The PSE changes, including promoting school wellness policies, CX3, and school/community sites including edible gardens and retail will be reported using the Western Region SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, Sutter County will adjust PSE strategies to address challenges.

Evaluation processes will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process, and impact/outcome evaluation activities using NEOPB approved surveys. Intervention strategies that have been to be successful in previous years will continue to be implemented in Sutter County. Education and Administration Reporting System (EARS) and Semi Annual Activity Report results will be generated from the online ATF and semi-annually from the Report of Activity Form (RAF). Impact/Outcome (Food Behavior Checklist) results will be used to monitor the effectiveness of the direct education efforts. The Teacher Tasting Tool (TTT) and the Adult Tasting Tool (A/TTT) evaluation will be used to gather data on food-tasting behaviors. The Teacher Observation Tool (TOT) evaluation tool will be used to gather data from teachers regarding behavior change in regards to nutrition and physical activity within the classroom.* Teachers will report both qualitative and quantitative data including narratives about observed behavior change amongst students. UC CalFresh will utilize SLM score card to evaluate PSE changes in school cafeterias The locally PSE tracking forms have made it consistently easier to monitor PSE site efforts and to complete the RE-AIM access database. Reports generated from the database will be used to track, inform, and improve continued PSE efforts in Sutter County.

*The Teacher Tasting Tool (TTT), an evaluation tool, gathers data on food-tasting behaviors. It will be used in the classroom during nutrition education lessons when students receive their tastings. The tool will evaluate students' previous exposure to the target food and their willingness to try the food again. Similarly, the Adult Tasting Tool (A/TTT), an evaluation tool, is the used to evaluate adults' previous exposure to the target food and willingness to try the food again. The results can be used to assist in the selection of future foods to feature and to ensure the program is exposing participants to new foods. The Teacher Observation Tool (TOT), collects information at the end of the school year on teachers' perceptions and observations related to the changes in knowledge and behavior among students as well as changes in their own nutrition related practices after delivering UC developed nutrition curricula. The results are compared to SMART objectives. The effectiveness of UC CalFresh adult nutrition education lessons is evaluated by the changes in the baseline questionnaires and post intervention questionnaires (a Food Behavior Checklist, Plan Shop Save pre/post, Making Every Dollar Count retrospective) also, compared to curriculum specific SMART objectives.

** Sutter County has implemented a strong marketing campaign using non-traditional tools such as looping videos played in the lobbies of three CalFresh offices, banners displayed banners, and posters displayed at all approved sites. Furthermore, our partnership with our local Tobacco team and their youth coalition allows for participation in large community events such as Cinco de Mayo and three city wide strolls (City of Yuba City, Summer and Christmas Strolls, City of Live Oak Christmas Strolls) all in approved census tracks have thousands of participants. The banners displaying USDA messages are seen by hundreds on a daily basis as they are played in very prominent location due to our partnerships with the high schools, libraries and various retail sites.

SECTION B: Target Audience Description

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, increase appeal and/or access of healthy dietary choices at 3 SNAP-Ed qualifying neighborhood retail stores by supporting point of purchase and marketing/signage that will reach minimum of 6,000 SNAP participants.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

Healthy Retail

- Support point-of-purchase marketing/signage at food retailers
- Increase Access and/or appeal of healthy dietary choices at point of purchase
- Provide training and/or technical assistance to retail staff on obesity prevention

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

FFY 2017 (Year 1) Objective(s):

a. By September 30 2017, conduct CX3 assessment of the retail environment in up to 3 identified SNAP qualifying neighborhoods where SNAP-Ed funded activities are being conducted.

b. By September 30, 2017, conduct healthy food and beverage merchandising material, conduct quarterly taste testing healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least 1 retail store.

c. By September 30, 2017, conduct food resource management education classes to adults and children at 2 qualifying sites near the qualifying retail store and promote the retail opportunities to access healthy fruits, vegetables and beverages to class participants.

FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, provide healthy food and beverage merchandising material, conduct quarterly taste testing healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least 2 qualifying retail stores.

b. By September 30, 2018, provide food resource management classes to adults at 3 qualifying sites within 3 miles of the qualifying retail store and promote the retail opportunities to access healthy fruits, vegetables and beverages to class participants.

c. By September 30, 2018, the Healthy and Safe Neighborhoods Coalition will implement a plan for a healthy retail recognition program.

FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, provide healthy food and beverage merchandising material, conduct quarterly taste testing of healthy food/beverage recipes, and provide NEOPB approved educational opportunities twice yearly to owner/retail staff at a minimum of 2 qualifying sites.

b. By September 30, 2019, provide food resource management education to adults at 4 qualifying sites in order to increase consumption of healthy fruits, vegetables and decrease consumption of sugar-sweetened beverages to class participants.

c. By September 30, 2019, implement a healthy retail recognition and incentive program in up to 1 selected SNAP-Ed qualifying neighborhood.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partnership will assist 5 qualifying sites (i.e. community event organizers, collaborations, public housing, schools, faith based and local parks) in developing, updating and/or implementing site wellness policies and procedures including making healthy site changes to improve nutrition and increase participation in physical activities by enhancing the physical environment; 20 individuals within SNAP-Ed qualifying sites will be trained as trainers/extenders to provide direct and indirect education to support sustainability efforts.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

IV. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Develop and/or implement written site wellness policy and procedures to improve the nutrition and physical activity environment (i.e. community events organizers, collaborations, public housing, faith based, schools and local parks.
- Provide training and or technical assistance to community partners and health professional on obesity prevention.
- Strengthen School Wellness Policies to support the implementation of the Smarter Lunchrooms Movement (SLM).
- Support/ expand community and school gardens in order to create sustainable green spaces for gardening, food production, gathering, and education.
- Promote and increase access/appeal to support physical activity

FFY 2017 (Year 1) Objective(s):

- By September 30, 2017, SNAP-Ed funded activities will reach 320 SNAP-Ed participants/eligibles with direct education and 3000 SNAP-Ed participants/eligibles with indirect education; and will provide training and technical assistance as well as support the development and implementation of site wellness policies and procedures in 8 sites.
- By September 30, 2017, LIA partnership will promote and implement Smarter Lunchrooms Movement strategies to 1-2 schools within qualifying districts.

FFY 2018 (Year 2) Objective(s):

- By September 30, 2018, SNAP-Ed funded activities will reach 420 SNAP-Ed participants/eligibles with direct education and 4000 SNAP-Ed participants/eligibles with indirect education; and will provide training and technical assistance to individuals from 7 SNAP-Ed qualifying sites as train the trainer/extenders; support the development and implementation of site wellness policies and procedures in 1-2 SNAP-Ed qualifying sites to implement 1 new healthy site change to improve the nutrition and/or physical activity environment for SNAP-Ed participants/eligibles.

- By September 30, 2018, LIA partnership will promote and implement Smarter Lunchrooms Movement strategies to 1-2 new schools within qualifying districts.

FFY 2019 (Year 3) Objective(s):

- By September 30, 2019, SNAP-Ed funded activities will reach 520 SNAP-Ed participants/eligibles with direct education and 5000 SNAP-Ed participants/eligibles with indirect education; and will provide training and technical assistance as well as support the development and implementation of site wellness policies and procedures in 5 new sites; 1-2 SNAP-Ed qualifying sites will implement 1 new healthy site change to improve the nutrition and/or physical activity environment for SNAP-Ed participants/eligible

- By September 30, 2019, LIA partnership will promote and implement Smarter Lunchrooms Movement strategies to 1-2 new schools within qualifying districts.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Sutter County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partnership will assist 5 SNAP-Ed qualifying sites (i.e. community events organizers, collaborations, public housing, schools, faith based and local parks) will develop, update and/or implement site wellness policies and procedures including making healthy site changes to improve the nutrition and increase participation in safe and appropriate physical activities by enhancing the physical environment; 20 individuals within SNAP-Ed qualifying sites will be trained as trainers/extenders to provide direct and indirect education to support sustainability efforts.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Establish and maintain regular communication and conduct at least three informative 10 to 30 minute trainings with key contacts. (The sites chosen by Sutter County LIA's were strategically selected to target SNAP-Ed eligibles/participants and their families from newborn to 65+. The nutrition and physical activities such as back to school nights, open house, health fairs and food distributions target all members of the family. Some of the sites that ensure that the SNAP-Ed program will reach the elderly are Public Housing Sites, Faith based-St. Isadore's Church & Gurdwara Sahib Temple in the City of Live Oak (retired groups meet on a weekly basis), Yuba Sutter Food Bank is located next to a senior center and they walk over to the Food Bank.) County Name: Tehama County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

X	California Department of Social Services: CDSS: Tehama County Department of Social Services: CWD
X	University of California: UC CalFresh UCCE: Tehama UC Cooperative Extension: UCCE
X	California Department of Public Health: CDPH: Tehama County Health Services Agency: LHD
X	California Department of Aging: CDA: CSU, Chico Research Foundation (PSA3): AAA
X	Catholic Charities of California: CCC: Northern Valley Catholic Social Service: CCC

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Tehama County is located in the Sacramento Valley in far northern California. It is a rural area covering vast open spaces with a 2014 estimated population of 63,308 (US Census Bureau, 2015). The land area is 2,949 square miles. There is an average of 21.5 individuals per square mile. When the total Tehama County population is stratified by age, 6.2% are under 5 years old, 17.8% are 5 - 18 yrs., 58.2% are 19-64 years old and 17.8% are 65 years old and over. Females make up 50.2% of the population and 49.8% are male. According to the U.S Census Bureau an average of 69.4% of the Tehama County population identifies as white, 24.1% Hispanic origin, 1.4% Asian, 1.0% Black, 3.4% American Indian and Alaska Native, 0.2% Native Hawaiian and Pacific islander, 0.5% two or more races. The primary language is English and the secondary language is Spanish.

When, the Tehama County SNAP-Ed population is characterized 41.9% of the total Tehama County population is SNAP-Ed Eligible with less than 185% Federal Poverty Levels. When it is stratified by age, the majority of Tehama children under five (61.1%), and those 6-17 yrs. old (51.1%) are SNAP-Ed eligible. Around 39% of the adults and 33.5% of the Tehama seniors are also SNAP-Ed eligible (Tehama County 2015 SNAP-Ed Profile). The distribution of Race/Ethnicity among the SNAP-Ed eligible shows 62.7% white, 30.8% Hispanic, 3.0% multiracial, 1.8% American Indian Alaska Native 1.1% Asian and 0.6% unknown. The Tehama SNAP-Ed Hispanic eligible population (30.8%) is equivalent to the majority (52.7%) of the Countywide Hispanic population.

Recent studies suggest that food insecurity may play a role in the onset of obesity among some low-income groups and it appears more dramatically in segments of the communities that are living in poverty. Tehama County communities face higher rates of poverty 19.7% than California (15.9%), where 29.0% of the children are living in poverty (Tehama County 2015 SNAP-Ed Profile) Tehama County also shows higher percentages of unemployment rates (7.1%) compared to the respective rates for California (6.3%) as April 2016.

Studies also showed low coverage of CalFresh eligible residents. According to the California Food Policy Advocates (CFPA, 2013) 15,303 individuals in Tehama County were income eligible for CalFresh. Only 64% of the income-eligible individuals participate in the CalFresh program. A full participation will result in an additional economic activity of $6,910,000 for Tehama County. Kidsdata.org reports that in 2014 69.9% of students in Tehama County were eligible to receive free or reduced price meals (FRPM) and 49.9% of those who were eligible were enrolled. Fifty-one percent of the free or reduced price lunch participants also participated in the breakfast program, however, only 8% of these youth are served through a summer meals program.

4. **Community Assessment**

Today, addressing the obesity crisis and its underlying food insecurity issues requires both individual and community-level intervention supported by institutional practices and policies that emphasize healthier eating and participation in physical activities. This has to occur in all settings, including homes, schools, neighborhoods, worksites, and through healthcare and media support. Obesity, especially among children, is a growing epidemic with profound human costs. It is documented that 50% of obese adolescents are likely to remain obese as adults. Scientific literature recognizes obesity because of individual behavior influenced by social and environmental factors.

According to the SNAP-Ed County Profiles (2015), there is a prevalence of overweight and obese individuals in Tehama County. Below is a table comparing overweight and obesity rates stratified by age in Tehama County to the State of California.

Obesity Prevalence in Tehama County and California stratified by age (% Overweight and/or Obese)

Age	**Tehama County***	**California**	**Difference**
4 years old and younger (Overweight for Age)	11.9%	11.8%	.1%
5 - 11 years old (Overweight for Age)	11.9%	11.8%	.1`%
12 - 17 years old (Overweight/Obese)	11.6%	17.2%	-5.6%
Adults (Overweight/Obese)	60.7%	62.5%	-1.8%
Adults (Obese)	34.2%	27.0%	7.2%

*Tehama County is from the Tehama, Glenn, Colusa geographical area. SNAP-Ed County Profiles does not have data available for Tehama County specifically.

Among the Tehama County adult and senior population, 15% have been diagnosed with diabetes resulting in an estimated 7,000 adults with Type II Diabetes. In 2009, Tehama County data also showed that 10.9% of the population had heart disease, and 11.9% of the population had some kind of cancer. These percentages are higher than that for the State of California (6.9% and 8.3%)(CHIS, 2009).

When diet is analyzed, 5.9% of children 0 - 4 years had three servings of fast food per week and drink one or fewer glasses of sugar sweetened beverages per day. Among children 5 - 11 years, 14.1% had at least two servings of fast food per week and drank one or

fewer glasses of sugar-sweetened beverages per day. Twenty-nine point two percent of adolescents between 12 - 14 years old and 27.4% of adolescents between 15 - 17 years old drank two or more glasses of sugar-sweetened beverages per day. Thirty-three point seven percent of those adolescents between 12 - 14 years old and 46.8% of those 15 - 17 years old had at least two servings of fast food per week. According to the California Health Interview Survey, 45.2% of the children 5 - 11 years and 53.4% of adults ate fewer than five servings of fruits and vegetables daily (CHIS, 2009).

Data has shown that children and adolescents are more likely to eat at least five servings of fruits and vegetables if their parents do. Children whose parents and relatives drink more sugar-sweetened beverages also drink more sugar-sweetened beverages themselves. This illustrates the importance of helping parents improve their eating behavior as a way to improve their health, and a way of influencing their children's dietary habits positively by serving as role models (CHIS, 2009).

The high prevalence of childhood obesity is the result of a variety of individual, social, and environmental factors including: increased availability and consumption of sugar-sweetened beverages and high-fat, high-calorie foods; increasing time spent in sedentary activities including television viewing; inadequate school physical education programs; and limited access in many neighborhoods to healthy foods and safe places to be physically active.

These problems go beyond factors under the control of children and their parents to include conditions in schools and communities that encourage children to eat and drink unhealthy foods and sugar-sweetened beverages and that limit their physical activity

Tehama County and the surrounding region have experienced a disjointed local food system. Consumers buy processed and packaged foods in supermarkets and neighborhood corner stores unaware of the unhealthy impact this food has upon their lives. Due to this lack of awareness, they do not have the knowledge base as to where their food comes from, how it is grown, and in many cases even how to cook fresh, healthy foods. Local consumers receive little information about, and have limited access to, local healthy food, while being highly exposed to ubiquitous marketing and availability of fast food chains, making their unhealthy eating choices seem easy and inexpensive.

Tehama County is in need of greater access to fresh food. In the Tehama County Community Action Agency (TCCAA) Tehama County Food Survey Assessment (2012), 72% of people surveyed, as potential food bank recipients, stated they received emergency food 7 - 8 times in the past 12 months. More than 50% of those surveyed indicated they go without food in order to feed their children. Access to food is also limited with 26% traveling between 11 and 40+ miles to access food. Data collected shows that more than 80% of likely emergency food recipients know how to create a meal plan with healthy foods, but are 2% less likely to prepare a weekly meal plan than

those likely to donate to an emergency food bank. More than 85% of likely recipients get food from a traditional supermarket, and nearly 33% get food from farmers' markets. Very few eat fresh produce grown from a home or community garden.

Healthy Tehama implementing agencies have determined from past success in SNAP-Ed and nutrition education delivery that the greatest behavioral change and effectiveness has occurred at schools, pre- and after-school programs, location-based community gathering sites such as community centers, family resource centers, nutritional meal sites, apartment complexes, and job readiness program sites including those, which serve bilingual or mono-lingual Spanish speaking customers. Our local needs assessments indicate an emerging willingness to move into longer range food security planning, including access to locally grown food and gardening.

Although farmers' markets are successful resources for Tehama County residents, many areas of the county do not have access to these markets. Tehama County has been classified as a United States Department of Agriculture (USDA) Food Desert with low access to markets selling fresh items. Community centers have shown to be vital areas of the targeted population. Among those previously served, nearly one-quarter were Hispanic. Further survey data show significant impacts on behavioral change as a result of the innovative nutrition education programs at community-based centers such as the family resource centers in Tehama County.

The third identified target audience consists of our elderly and disabled citizens. The Tehama County Senior Nutrition Program feeds elderly and disabled individuals throughout the county at congregate sites in Red Bluff and Corning, with delivery to homebound adults across the entire county. Clients accessing Tehama County Senior Nutrition services have been documented to meet the poverty requirements for SNAP-Ed (185% Federal Poverty Level) and may be eligible for CalFresh benefits. Information about gardening as a physical activity, as well as, age appropriate physical activity information will be provided. Adequate nutrition education and safe physical activity information are shown to help clients remain safely in their homes.

Multiple needs assessments have been conducted and data gathered in Tehama County for the purpose of understanding health, eating, and physical activity issues. This document combines interviews, focus groups, public hearings, survey data (specifically for hunger and nutrition) and partner surveys, including:

- According to the California Department of Aging, there are 9,152 seniors in PSA 3 (60+) that are living in poverty. Residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. The aging of the population is particularly noticeable in PSA 3, where the senior population is already a significant portion of the total population and is continuously growing.

- Needs Assessment, which was conducted in FFY14, identify the needs and opportunities necessary to enhance nutrition education, physical activity, and food security for CalFresh-participating and/or eligible seniors at congregate meals sites? Gaps in services provided to the seniors in the counties assessed were also determined. In Tehama County, focus will be on developing a system to provide constant nutrition and physical activity information to seniors, to encourage them to eat healthy and live actively. This is essential, as 2015 Tehama County Congregate Meal site nutrition assessment showed that 59.5% of the senior populations are considered to be in the high nutritional risk group and 26.2% are in moderate nutrition risk group. The assessment also showed that 71.3% eat fewer than two servings of fruits or vegetable per day.
- CX3 community assessments were collected by Tehama County Health Services Agency in 2013. Our CX3 results indicated that our retail environment is lacking consistent and affordable fresh fruits and vegetables for our SNAP-Ed population. Most SNAP-Ed residents have the greatest access to small corner stores which are less likely to have a healthy food environment. Specifically, the CX3 results directed us to work in 3 specific stores within each neighborhood that was assessed.

Additional Surveys:
http://www.communityactioncna.org/tool/ReportCard/Default.aspx

The following data are based on individuals who completed a preliminary and post survey through the Tehama County Frugal, Fresh, and Fit program:

- 38% of the individuals increased their knowledge of how many healthy meals they know how to prepare. Fresh fruits, fresh vegetables and whole wheat carbohydrates were used for healthy recipe demonstrations in the education classes.
- 15% of the individuals increased the amount of fresh or locally grown foods in their cooking. Gardening classes took place, and participants were able to try recipes with fruits, vegetables, and locally grown herbs.
- 40% of the individuals stated that they access services from a food bank or soup kitchen. Throughout the duration of this program 14% of those individuals decreased the frequency in which they access a food bank or soup kitchen's services.
- 28% of the participants increased their awareness of how to garden and its related health benefits.
- 64% of the individuals who hadn't started or expanded a home garden or accessed more garden produce did so by the end of the six week class.
- 11% of the individuals reported an increase in their awareness of how physical activity is related to health. 100% of the individuals indicated on their pre survey that they already have at least some knowledge of how physical activity is related to health.
- 53% of individuals reported that they increased the amount of time they spend exercising.

In addition, individuals self-declared that this program had an impact on them. The following are some of the participant comments that are documented on the pre and post surveys:

- "Have been reminded of how important vegetables and grains are to my diet. Need to emphasis these more in my diet."
- "Good garden class. Increased gardening through containers."
- "I came to this class because I was curious but I enjoyed it. I liked the "spices" class best."
- "Good class. We made applesauce in the microwave. Good!"
- "I learned to make small changes for health. We made oatmeal chocolate chip cookies with less fat, lots of oatmeal, yogurt and whole wheat flour."

As reported in the UCCE Tehama UC CalFresh annual report for FFY 2015, the following results were shared to contribute to this community assessment:

Among children who received the UC CalFresh food and nutrition education, reinforced with food tasting, cafeteria food demonstrations and family education, on average:

- 56.4% of the children are willing to taste the new fruit, vegetable or other healthy options at school again.
- 54.0% of the children are willing to ask at home for the new fruit, vegetable or other healthy option tasted at school.
- 82.2% of the teachers agreed/strongly agreed that this year children chose more fruits and vegetables, are willing to try new foods, can identify healthy choices, wash hands more often and bring more fruits and vegetables as snacks.
- 65.6% of the teachers agreed/strongly agreed that this year teachers now make healthier choices, encourage the students to be physically active, remind more families to bring healthy snacks, and offered healthy choices to the students.

Among adults and families who received, the UC CalFresh food nutrition education reinforced with food demonstration and family education, on average:

- 91.0% are willing to try the new fruit, vegetable and other healthy food choice again.
- 81.0% are willing to serve the new fruit and vegetable and other healthy choice at home to their families

These results show the significant value of the direct education, re-enforced with food tasting, food demonstration and family education as a comprehensive approach to change knowledge, intentions, and behavior.

The food resource management approved UC CalFresh curriculum evaluation data showed that the participants improved an average of 60.0% in six of the behaviors that were evaluated. Compare prices before shopping and variety of foods in meals were the behaviors with the highest positive change (80.0%), followed by the frequency in planning meals (60.0%), shopping with a list (50.0%) and thinking about healthy choices (50.0%).

Food insecurity data from the county profile indicates programs such as Plan, Shop, Save, Cook (PSSC) or Making Every Dollar County (MEDC) will help individuals to plan and shop to allow for greater food security. Evaluation data showed that 20.0% of the Tehama participants who received the UC CalFresh Food Resource Management Education were no longer running out of food before the end of the month after receiving the education. The finding shows that the food resource management 4-lesson series education is a very important educational tool that has made a difference in the life of the low-income community members of our targeted population.

Behavior change toward a healthier life for the targeted population is the most important goal of the Tehama UC CalFresh Nutrition Education Program. It is also recognized that the increase in knowledge combined with the necessary environmental changes at different levels of the community can facilitate the expected change in behavior for a healthy lifestyle.

UCCE has completed a needs assessment that indicates there is a need to improve school, organizations and household food system, environments and policies to better support the goals of the direct education. The school wellness policy and improvement to school, non-profit organization and household practices and environments is an important component of the FFY17-19 three years Integrated Work Plan (IWP).

Tehama County Public Health contracts with the Center for Healthy Communities. Through this partnership the following data are based on response of the youth that participated in the Youth Engagement Project led by the Center for Healthy Communities during FFY 2015 through a Survey Monkey.

It is clear from the student responses that they learned about nutrition and health through their participation in the Youth Engagement training. They liked a variety of the activities including planting vegetables, the healthy food tastings, and the interactive activities. Suggestions for improving the lessons include more hands-on activities and more interactive activities. Ninety-four percent of the students reported that they were either very satisfied or satisfied with the lessons.

A total of 14 of the 15 students responding to the question reported that they have made changes in their daily food choices as a result of the lessons. These changes include: cutting back on the amount of soda or eliminating soda; eating less junk food; avoiding foods with empty calories; and choosing healthier foods.

Some of the students helped with the Kids' Farmers Market. They served food and provided information to the students. Those who participated liked seeing the elementary school students getting excited about healthy food and going home with smiles on their faces. Suggestions for a future Kids' Farmers Market include providing shade for the booths and having more food options. A total of 76% of the students responding to the question rated the Kids' Farmers Market as being very successful or successful.

A survey was also conducted at Los Molinos High School by the Los Molinos Future Farmers of America (FFA) High School students. They surveyed students during the lunch period and in some of their classes. A total of 60 surveys were completed. The students completing the survey realize the importance of eating healthy and report that there are healthy foods and a variety of fruits and vegetables available at the local markets and convenience stores. The results are as follows:

- 93% of the students completing the survey report that it is very important or somewhat important to them to eat healthy.
- 79% of the students reported that it was easy or fairly easy for them to buy healthy foods at the local markets or convenience stores.
- 85% of the students responded that the local markets or convenience stores sell fresh fruit. They listed a variety of fruits. When asked what fruits they would like to buy from local markets, students listed most of the same fruits that they had reported were already available in the markets.
- 78% of the students responded that the local markets sell fresh vegetables. The list of available vegetables and those that they would like to buy were almost identical. Several students reported that they did not like vegetables.

In response to the question of what other healthy foods or beverages would they like to be able to buy in local markets, the majority of the students focused on beverages. They are interested in being able to purchase flavored water, vitamin water, fruit juices, and smoothies.

5. **Community Change Goals**

Based on the results of the Community Assessments, existing and new data were incorporated into our LIA assessment pool to help determine local needs. These community change goals include:

- **Increase consumption and access to healthy food and beverages in Tehama County,**
- **Increase the promotion of and access to physical activity for all members of the Community.**

- **Collaboratively achieve systems, environmental and policy changes that will increase and maintain access to healthy foods and beverages and physical activity in Tehama County.**

To increase consumption of healthy foods and beverages requires appropriated levels of knowledge, skills and practices across all the community levels and through all the components of the local food community systems.

Access to and promotion of physical activity, for all Tehama residents, requires information to create or increase awareness and education to increase knowledge, skills and practices. Physical activity, education at different levels of the community, wellness policies in schools and institutions, bike ability and walk-ability, as well as safe and easy access to parks, community centers and other recreation facilities are key factors, to ensure a healthy lifestyle for everyone in the Tehama community.

Educating and encouraging communities to change their behavior for healthier eating and lifestyles are strongly influenced by their policies, systems and environments. There is a need for Policy changes that support sustainable access to healthy foods and beverages for everyone in the community as well as to ensure easy and safe access to physical activity for individual, family, institutional and other levels of the community. The food system is an essential part of the individual and community environment. Therefore, the prevention of obesity requires a community food system in which sustainable food production, processing, distribution, marketing and consumption are integrated to enhance the environmental, economic, social, and nutritional health of the Tehama County.

We recognize that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. The Tehama County Nutrition Action Plan has taken on these larger goals, and the Tehama County SNAP-Ed LIA partnership has committed to contributing to pieces of these larger community goals – based on agency expertise and SNAP-Ed guidelines.

Specifically, Tehama County SNAP-Ed LIA's will achieve the following three-year objectives:

1. By September 30, 2019, LIA partnership will assist approximately 21 school programs in Tehama County to promote and/or update their school wellness policies while improving the school environment to better support consumption of healthy food and beverage and promote physical activity through SLM, Smarter Lunchroom Movement (SLM), Harvest of The Month HOTM, social marketing, and other relevant strategies in the classroom and school cafeterias.
2. By September 30, 2019, collaborate with LIAs and other community partners to increase awareness of and access to healthy fruits, vegetables and other healthy options, beverages and physical activity resources and promote PSE changes in at least 15 qualified sites.

3. By September 30, 2019, use approved media and public relations to promote change in community culture values that support healthy lifestyles to at least 55% of the SNAP-Ed eligible individuals through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

A Workgroup has come together as a collaborative for the development of a County Nutrition Action Plan (CNAP), and to act as a steering committee that will result in the countywide implementation of nutrition activities. LIAs will promote SNAP-Ed services and activities by connecting with other agencies. This Workgroup has been meeting at least once a month to coordinate the County Nutrition Action Plan (CNAP) and will bring together the following groups to conduct the work of implementing the CNAP.

Under a charter, the **Healthy Tehama Coalition** is functioning as the County Nutrition Action Plan (CNAP). It is made up of the CNAP authors, and consists of Tehama County Health Services Agency - Public Health Division, Tehama County Department of Social Services, the University of California (UC) Cooperative Extension - Cal Fresh, the AAA- PSA 3 and the Catholic Charities of California. The vision statement for this group is "within three years, Healthy Tehama, a community coalition, will provide education and support for the consumption of healthy foods and beverages, growing produce, and engaging in physical activity for 'eligible' CalFresh populations." This group is responsible for coordinating SNAP-Ed related activities within Tehama County, and collaborating to ensure non-duplication of service sites.

The Tehama Community Food Alliance is an organization that serves Tehama County as a support network for the Healthy Tehama Coalition. It was established in 2012 by the 501(c) (3) agency, Tehama Together, to address food issues in Tehama County. Their mission is "to support and facilitate the coordination of a healthy food system within the county." The group meets on a monthly basis, to address issues of food access, food awareness, and food advocacy in Tehama County, coordinate activities among all those agencies (both funded and non-funded), educate members through informational presentations, and collaborate on group projects. The three focus areas are: 1)"Community Food Access" which includes community supported agriculture, tourism and farm stands, community/collaborative gardens, food pantries/food banks, farmers' markets, gleaning/you pick, and CalFresh enrollment. 2) "Community Food Awareness" includes chronic disease education, Let's Move! Smart shopping, cooking education, nutrition education, food safety, food culture, and food preservation and 3) "Community Food Advocacy" includes recycling, school food policies, cottage food businesses, transportation issues, land use issues, food waste/composting, and food marketing.

SNAP-Ed funded agency members include the Tehama County Health Services Agency - Public Health Division, UC Cooperative Extension - CalFresh, and the Tehama County Department of Social Services, Tehama County Community Action Agency, Northern Valley Catholic Social Services, Area 3 Agency on Aging, and the California State University Chico - Center for Healthy Communities.

Non SNAP-Ed funded agency members include: Tehama Together, St. Elizabeth Community Hospital, Sacramento River Discovery Center, Food for the Hungry, Tehama County Gleaners, Growing Local - Tehama, farmers' markets, Slow Food, Food from the Heart, Butte County Community Action Agency - North State Food Bank, Tehama County Department of Agriculture - Weights and Measures, Tehama County Landfill Management - Recycling Center, Tehama County Department of Social Services Eligibility Division - Cal Fresh Outreach, CSU Chico - Center for Healthy Communities, Connecting Ag, Schools, and Home, UCCE - Nutrition, Family, and Consumer Science, Community Action Agency - Community Services Block Grant, and Tehama County Food Share Coalition.

The Tehama County Food Share Coalition is a secondary partner to the Healthy Tehama Coalition and the Tehama County Food Alliance. This collaborative coalition was founded in 2011 for the purpose of activating small groups and charities with a mission of ending hunger in Tehama County. This group kicked off efforts with funding from Catholic Charities Foundation and Wal-Mart. As a grass roots coalition, this group meets bi-monthly to collaborate on countywide food drives and fundraisers as well as coordinating distribution of surplus or food bank products throughout the County.

The membership for this group is made up of the Calvary Chapel, Corning Christian Assistance, Corning Family Resource Center, Channel of Love Gerber Ministry, Church Without Walls, CSU Chico - Center for Healthy Communities, First Baptist Church, Food for the Hungry, Tehama County Gleaners, Gold Exchange, Hands of Hope, Harvest Christian Center, Job Training Center, the Lord's Table, Northern CA Child Development, Inc. - Head Start, New Hope Foursquare Church, North State Food Bank - Butte County Community Action Agency, Tehama County Community Action Agency, Open Vistas Awareness Center, Poor and The Homeless, Rancho Tehama Community Foundation, Sacramento River Discovery Center, Spirit of Love, Tehama Together, The Salvation Army, UC Cooperative Extension - CalFresh, Vineyard Church, Alternatives to Violence, Tehama County Health Services Agency - Public Health, and Northern Valley Catholic Social Services.

The Healthy Tehama Coalition (SNAP-Ed Local Implementing Agencies), Tehama Community Food Alliance, and Tehama County Food Share work together to ensure there is coordination and communication around the nutrition and food needs in Tehama County. The objectives include improving access to adequate healthy food in Tehama County in the three census tracts exhibiting high food insecurity, increasing utilization of all available food programs through coordination, education, and addressing transportation issues, cultivating capacity for locally grown healthy foods, improving healthy food choices in local retail outlets, supporting the establishment

of community gardens, developing a plan for promoting school and community based nutrition education and exercise programs, collaborating with local agriculture and recycling groups, facilitating the use of locally grown produce and meat in local restaurants, providing educational experiences at food banks and food giveaways, and providing cooking and tasting experiences as well as distributing recipes using foods that are being given out.

Collaborations with schools, public agencies, governing bodies and SNAP-Ed LIAs continue to grow. Tehama UC Cooperative Extension – UC-CalFresh, Tehama Social Services, Tehama Public Health, the AAA and the Catholic Charities of California work together to ensure a more comprehensive and effective delivery of the education as well as ensuring duplication of services does not take place. As a community of nutrition educators, this group meets and collaborates monthly to maintain the mission and to ensure that the community is receiving nutrition education to reinforce the messages taught. This collaboration has been a key component for providing working relationships and increasing productivity.

7. **Key Messages**

x	Food Safety	x	Physical Activity	x	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	x	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources)
x	Fruits & Vegetables	x	Limit Added Sugars or Caloric Sweeteners	x	Other *(specify): Healthy Breakfast*
x	Fats and Oils	x	Food Shopping/ Preparation	x	Other *(specify)*: Healthy Snacks
x	Lean Meat & Beans	x	Other *(specify)*: Food Budgeting	x	Other *(specify)*: Food Resource Management
x	Sodium & Potassium	x	Other *(specify)*: Gardening	x	Other *(specify)*: Food Labels
x	Promote Healthy Weight	x	Other *(specify)*: Reduce Cost of Purchasing Food		Other *(specify)*:

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2016** USDA approved UC CalFresh, California Department of Aging, and California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies in Tehama County – CWD, LHD, UCCE, CCC and AAA – are committed to collaborating to provide comprehensive multi-level behavior-focused nutrition education/physical activity promotion, a community event presence, and training and technical assistance. Agency staff has expertise and experience working within different levels of the Social-Ecological Model, with distinct age groups and cultures, and within various geographic areas in the county. The agencies are uniquely suited to provide the interventions in a way that eliminates duplication of service provision. Media and public relations efforts will also be employed to disseminate messages. Community partners not receiving SNAP-Ed funding will be invited and engaged to coordinate/collaborate efforts to achieve maximum impact. Finally, community level interventions aimed at achieving policy, systems, and environmental changes will be pursued. The agencies will promote the 2010 Dietary Guidelines and SNAP-Ed intervention strategies proven to change behavior. Delivery methods have been specifically identified by implementing SNAP-Ed funded partners as indicated below:

The Tehama County Health Services Agency - Public Health Division, Tehama County Department of Social Services, the University of California (UC) Cooperative Extension - Cal Fresh, the Area Agency on Aging - PSA 3 and the Catholic Charities of California will all use evidence based curriculum and materials for each of the defined intervention. The CWD is funded only through FFY 2017 which may impact reaching the estimated figures for FFY2018 and FFY2019.

Tehama County Department of Social Services

The Tehama County Department of Social Services (TCDSS) will deliver services in locations based in part on a comprehensive needs analysis provided by collaborative agencies in Tehama County through the Tehama County Community Action Agency (2014-2015 Community Action Plan/CAP). This SNAP-Ed proposal will deliver services to locations reaching concentrations of CalFresh eligible participants in areas that are underserved per the review of needs. High need locations were identified as being located in the geographical townships of Gerber/Roberta, Dairyville, Rancho Tehama Reserve and Cottonwood and in the cities of Red Bluff and

Corning. Our services will be provided at community events and activities, where people apply for low-income services, where people live, and at schools or educational facilities and service reporting centers.

TCDSS will provide nutrition education in the form of interactive workshops as direct services and will focus on gardening as a supplemental healthy physical activity (plowing, weeding, and shoveling). TCDSS will collaborate with the Tehama County Community Action Agency in delivery of services with a multi-agency coalition that is working to create a community garden. These services include collaboration with Tehama County Landfill Management, Tehama County Community Action Agency, Tehama Community Food Alliance, the County Probation Office, and Tehama Food Share.

Direct education activities will include single topic workshops using authorized SNAP-Ed approved curriculum such as “My Plate” and “Eat Healthy, Be Active.” The workshops will focus on topics related to gardening and eating local, fresh-grown produce. We will provide information on allowable expenses like seeds to grow their own food, how to cook food that they can purchase or grow using CalFresh benefits, but also the importance of physical activity. This focus also addresses the stated objectives of increasing purchasing of foods with high dietary quality and consumption of fresh fruits and vegetables. Activities may also include appropriate, low cost physical activities, learning to plant seed starters, growing seasons for home gardeners, making garden boxes from recycled materials, and canning or freezing homegrown produce. Pre-and-post surveys will show the trend in behavioral change among participants. Expected behavioral changes may include the expansion of the types of healthy foods purchased and grown in personal gardens, participation in community gardens, increased exercise through gardening or other low cost physical activities, and use of healthy foods as a substitution in recipes to make meals more nutritious and less costly.

TCDSS Intervention Strategies

The Tehama County Department of Social Services provides individual classes, demonstrations, tastings, special events, gardening workshops, and other SNAP-Ed activities to increase knowledge, skills and behavior-focused food and nutrition education and physical activity promotion. The targeted population is reached using following intervention strategies:

Communities

- Promote, develop, and evaluate the use of community gardens through workshops and demonstrations throughout the community
- Provide education and collaborate with key community outlets and stakeholders, including, but not limited to the other Local Implementing Agencies (LIA) and subcontractors to ensure coordination and compliance

- Enhance access to places for physical activity combined with informational outreach activities to increase the amount of time spent conducting physical activities
- Engage local businesses, government, civic organizations, community groups, and citizens in active living through a community wide effort to promote physical activities
- Promote the use of local trails, hikes, parks, camps, and other physical activities throughout the community as low fee or free ways to get active
- Use media, social media and public relations for the delivery of information related to nutrition education and physical activities including promotion of workshops, classes, and demonstrations

Helping Families

- Encourage participation in, and creation of, community and home gardens to increase the amount of healthy foods consumed throughout the county as well as increase physical activity close to home including gardening
- Encourage, promote, and assess the use of farmers' markets and cooperative gardening and access to healthy foods to increase consumption of healthy foods
- Provide nutrition education and physical activity workshops and demonstrations leading to knowledge and behavior modification in increasing the number of healthy meals that eligible CalFresh recipients know how to prepare using a variety of nutritious, CalFresh-eligible foods, fresh foods, and locally-produced foods including those employing ingredient substitutions
- Support family-friendly physical activity opportunities throughout the year, throughout the community to increase the amount of time families spent together in healthy activities
- Promote participation in and use of area physical activity resources, including partnerships with parks and trails organizations
- Provide gardening workshops to promote the use of mobile gardens to increase participant physical activity, increase awareness of gardening, growing a home or community garden and its health benefits (both for nutrition and obesity prevention/exercise and activity)
- Promote physical activities for the elderly community to increase understanding of healthy and safe exercises for this population with a focus on gardening

Tehama County Department of Social Services: Evaluation Narrative

Tehama County Department of Social Services (TCDSS) will conduct process and outcome evaluations in the FFY2017 Get Fresh Plan. Our process evaluations will be conducted at intervals for segments of the programs provided to determine whether the methodologies of service provision are meeting the needs of the participants, whether changes to surveys or forms, or streamlined processes may result in improved impact or behavior change, or whether services need to be eliminated or replaced.

Our outcome evaluations will occur in services where behavior change is expected included at our workshops focused on gardening and physical activity topics. In this plan, our agency proposes to evaluate outcomes related to increases in physical activity and consumption of fresh fruits and vegetables. The questions for the surveys will be based on the goals and objectives outlined in this plan. This information will be reported to CDSS as required. In addition to the pre and post surveys, the participants at the workshops will also be asked to complete a direct activity form to aid use of the ATF system and in completion of EARs.

UC Cooperative Extension, UCCE - UC-CalFresh:

The Tehama UCCE – UC-CalFresh nutrition education program aims to educate SNAP eligible and recipients on how to improve their health and well-being through individual, group or community education. The program provides multi-level knowledge, skills and behavior-focused food and nutrition, food resource management, food safety, garden and physical activity's education and promotion using direct and indirect education, media, social media and public relations, community events, Farmers Markets, coordination and collaboration, training and technical assistance reaching the different levels of the social-ecological framework. To facilitate and sustain the healthy change in behaviors, the program promotes and supports school, family and community policy, systems and environmental, PSE, changes using different intervention strategies.

UC Cooperative Extension, UCCE-UC-CalFresh Intervention Strategies

The UCCE–UC-CalFresh delivers the service to the targeted population using approved UC CalFresh educational resources and evaluation tools and the following intervention strategies.

Schools

- Improve student, teacher and staff nutrition knowledge and behavior through classroom education, food tasting, school and classroom nutrition corners, schools menu, cafeteria and the Smarter Lunchroom programs.
- Promote physical activity and nutrition using PE classroom break, the Preschool playgrounds for movement (Stencils), the Coordination Approach to Child Health, CATCH program, physical activity challenges, nutrition games and educational displays.
- Develop, implement and evaluate school gardens as a novel approach to learn about foods, healthy eating and increase physical activity. Integrate the school gardens, classroom and cafeteria education in a comprehensive nutrition education program based on the Dietary Guidelines for Americans.
- Start and expand Farm to School programs by linking local farmers and gardens to school meal service for the procurement of fresh local produce that contribute to healthier school meals.
- Promote access to healthy drinking water by a partnership with local organizations to support the necessary changes in the school environments that increase access to drinking water and facilities the healthier change in behavior.
- Support the development of school wellness program and health councils, including student members to promote and support PSE changes for healthier eating and lifestyle.
- Improve youth, school staff and parent's access to nutrition information through monthly teacher and family food and nutrition newsletters, educational workshops and booths and food demonstrations at the cafeteria, staff meetings and in school events, creating awareness for healthy eating and lifestyle.

Community based youth, adults and senior organizations

- Provide nutrition, physical activity, food safety and gardening classroom education and cooking demonstrations using single lesson, workshops and/or 4-lessons series modalities, to teens, adults and seniors organizations, for the development and adoption of healthy lifestyle, using appropriate and approved curricula, supplemental educational materials and evaluation tools.
- Provide food resources management education to teens, adults, and seniors to increase knowledge and skills for the access and consumption of healthy and nutritious foods on a limited budget, using appropriate approved 4-series lessons and evaluation tools.
- Promote access to water and gardens as a novel approach to learn about foods, healthy eating and increase physical activity.

- Promote and provide training and technical assistance to support the development, adoption, implementation and monitoring of site wellness/nutrition policies and other PSE changes that facilitate and sustain the healthy change in behaviors among the target population.

Communities

- Improve community access to nutrition and physical activity information through educational booths, nutrition games and food demonstrations, creating awareness for healthy eating and lifestyle.
- Promote access to healthy drinking water in the community in events and other community and media promotion
- Promote community gardens to increase knowledge and access to healthy foods as well as increase physical activity.
- Promote consumption of healthy foods at Farmers Markets and other community events using approved educational messages and food demonstrations.
- Use the media, social media and public relations for the delivery of community, institutional and household food system, healthy eating and lifestyle education for the obesity prevention.

Helping Families

- Increase parents and family nutrition, food safety and food resource management knowledge and skills for the access and consumption of healthy foods on a limited budget.
- Encourage the development and adoption of healthy eating and active living in household practices that support healthy family and children feeding practices and lifestyle.
- Promote home gardens as a novel approach to learn about foods, extend the budget, healthier eating and increase physical activity.

Coordination and Collaboration

- Coordination and collaboration among the local SNAP-Ed LIAs for the formulation and implementation of the County SNAP-Ed Plan
- Coordination and collaboration among other local non SNAP-Ed organizations to promote and support PSE changes that support the SNAP-Ed population's ability to implement sustainable healthier eating and lifestyle behavioral changes to prevent obesity.

UC Cooperative Extension, UCCE - CalFresh: Evaluation Narrative

Tehama County UCCE - CalFresh will conduct formative, process and impact/outcomes evaluation of the FFY17-19 plan. The formative evaluation uses the required UCCE- CalFresh Evaluation tools, such as Intent to change, pre and post assessment, teacher observation and teacher tasting, to provide information that is used during the development of the intervention. The program will conduct a process

evaluation using quarterly Workbook reports on an ongoing basis, to record SNAP-Ed activities, sites participants reached, and other required elements for USDA's SNAP-Ed Education and Administrative Reporting System (EARS). Sites that showed high performance in terms of reach and multi-intervention strategies will also be identified and replicated. The Outcome Evaluation will document achievement of the type of individual level behaviors and dietary practices using the required UC CalFresh evaluation tools in at least 25% of children and 33% of adult participants that receive direct nutrition education. Evaluation instruments include the Intent to Change, Adult Taste Testing, Retrospective Assessment, Teacher Tasting and Pre/Post Assessment tools. Policy Systems and Environment (PSE) Change and the level of community and/or institutional support for the change will be documented using the approved FFY17-19 UC CalFresh PSE changes evaluation tools on measures of reach, effectiveness, adoption, implementation and maintenance that align with the SNAP-Ed Evaluation Framework.

Tehama County Health Services Agency: Public Health Division

Tehama County Public Health provides nutrition education classes, demonstrations, tastings, special events, and other SNAP-Ed activities to increase knowledge, skills and promote systems and behavior change to ensure the health of all SNAP-Ed eligible families. Tehama County Public Health will deliver these activities at SNAP-Ed approved census tract sites and we will work in collaboration with our partnering Lead Implementing Agencies (LIA's) to ensure non-duplicated services. Additionally, Tehama County Public Health is committed to promoting physical activity. We provide community presentations and demonstrations to actively increase physical activity. Tehama County Public Health will utilize SNAP-Ed approved curriculum educational resources and evaluation tools to reach the target populations and we will deliver the following intervention strategies:

Public Health Division Intervention Strategies

Communities

Nutrition Strategies:

- In collaboration with retail food outlet owners, provide education, information and nutritional promotions to increase the availability and accessibility of healthy food options at corner markets, country grocery stores and other food vendor locations throughout the county via the Healthy Retail Campaign.
- Provide educational and informational presentations to key community outlets and stakeholders in order to establish and develop community relationships that will assist with increasing access to healthy food and healthy beverage options.

- Provide nutrition education and physical activity integration through the Latino Outreach Campaign, Faith Based organizations and at events such as Cinco de Mayo and the Multi-Cultural Fair.
- Promote consumption of healthy beverages at community events and youth sports leagues by promoting the Re-Think Your Drink Campaign.
- Each year, provide a minimum of one series of at least four lessons at senior housing sites.

Physical Activity Strategies:

- Assess current access to no-cost or low-cost recreation opportunities for physical activity and use results to promote increased access.
- Work with local agencies and organizations to promote access and use of multi-modal transportation systems.
- Promote physical activity messages through local businesses and other community organizations that are located in or near means tested sites.

Helping Families

Nutrition Strategies

- Increase the use of farmers' markets by promoting access to fresh fruits and vegetables for SNAP and WIC eligible families at informational booths, through signage and posters provided to key community outlets throughout the county.
- Provide education and information to promote family prepared meals and kids' cooking utilizing approved curriculum such as "My Plate" and "Eat Healthy, Be Active".
- Actively encourage family behavior change to adopt healthy food and healthy beverage options as standard household policies and improve child-feeding practices by providing direct nutrition education and indirect nutrition education offered at family attended venues.
- Promote the increase of healthy food options by providing family-friendly cooking demonstrations and taste testing's throughout the community at events or offered at the After School programs.

Physical Activity Strategies

- Increase family-friendly physical activity opportunities that include the promotion of low to no cost resources through demonstrations, presentations and promotions throughout the year at family attended events.
- In collaboration with parks and trails organizations, promote use of local area physical activity resources.

School

Nutrition Strategies:

- Assist school sites with conducting environment and policy assessments to identify areas for improvement in the school environment.

Tehama County Public Health: Evaluation Narrative

Tehama County Public Health will conduct process and outcome/impact evaluation for the FFY17-19 plan. The program will utilize USDA's SNAP-Ed Education and Administrative Reporting Systems (EARS) to track overall implementation of the program, including activities conducted and participants reached. This will be done throughout the grant period on a quarterly basis by utilizing the progress report template. This template allows us to identify areas of implementation needing improvement and develop strategies to address implementation challenges.

Our impact/outcome evaluation will be focused on evaluating the activities where behavior change is expected. We will use the Quick Nutrition and Physical Activity Quiz approved by SNAP-Ed to measure behavior change among adult participants who attend our nutrition education series classes. We will measure nutrition and physical activity behavior change among children by using the SERRF student survey. Finally we will utilize the CX3 survey instruments to assess overall improvement in access and marketing of healthy foods among our retailers. This would be demonstrated by an overall increase in each retailer score card.

PSA3-AAA: Intervention and Evaluation

The AAA implementing agency in Tehama County is the Center for Healthy Communities at CSU, Chico Research Foundation ("CHC," AAA PSA3-LIA). When compared to previous years, the intervention plan progresses at the environmental level of the Social Ecological Model (SEM) through the inclusion of policy, systems, and environmental (PSE) change efforts. Utilizing site assessment data collected in FFY 2015 and 2016, it was determined that environmental changes to the physical dining space at the three eligible congregate meal sites would be a desirable strategy. Thus, a Nutrition and Physical Activity Center (NPAC) toolkit will be developed and displayed as an environmental support to SNAP-Ed eligible congregate meal participants in an effort to increase: consumption of healthy foods and beverages; awareness of food safety practices; and physical activity opportunities among seniors at eligible congregate meal sites. The NPAC toolkit will feature the four lessons of Eat Smart, Live Strong on display, rotating one per quarter along with additional SNAP-Ed approved resources and messages.

Though each site will have the NPAC on display, just one site will receive supporting direct education. Surveys will be collected at each site to determine the most effective, comprehensive strategy. One site will showcase the NPAC only. Another site will receive at least two independent direct education lessons, one at the beginning of the intervention and another at the end, using SNAP-Ed approved lesson plans and resources. These lessons will bookend the NPAC intervention and will also provide the opportunity to gather pre- and post- surveys. Survey results will be compared to FFY 2016 results of implementing four consecutive lessons utilizing the Eat Smart, Live Strong curriculum without the NPAC. The survey tools will remain the same as FFY 2016, the Food Behavior Checklist (FBC) and the Rapid Assessment of Physical Activity (RAPA), to facilitate this comparison.

The congregate site staff will be given the NPAC toolkit elements and supported with additional training and ongoing technical assistance related to the curriculum and to the use the NPAC toolkit. In addition to the NPAC support, the congregate site staff will receive training regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to SNAP-Ed seniors. Training the staff will leverage resources, build program sustainability, and enhance the program's overall capacity to encourage and support healthful behaviors among the senior population.

The evaluation results will be used to improve services for all local objectives and intervention strategies. The evaluation plan includes formative, process, and outcome evaluation activities using state and locally developed surveys. The number of SNAP-Ed eligible individuals reached through direct education and indirect education will be documented in the ATF.

Northern Valley Catholic Social Service (CCC) Intervention and Evaluation Narrative:

Northern Valley Catholic Social Service (CCC) will conduct formative, process and outcome/ impact evaluation of the FFY17-19. The formative evaluation uses tools provided by Catholic Charities of California. NVCSS will conduct nutrition and physical education including cooking demonstrations, food tasting demonstrations, food resource management classes, and physical activities to low income housing units, community resource centers, schools, churches and family resource centers. These classes will be single and series based sessions that will focus on behavioral changes in reducing sugar consumption and increasing fruit and vegetable consumption. NVCSS will provide on an ongoing basis the distribution of monthly newsletters and advertisements that promote the consumption of healthy foods and beverages, tips on food resource management and recipes provided by the USDA. NVCSS will use an Activity Tracking Form (ATF) provided by Catholic Charities of California to report and track all progress made for Direct and Indirect Educational activities. NVCSS's focus will be to lead and expand involvement of marketing and media related advertising using resources such as Facebook, Instagram, Google and other media sources to expand the overall presence and social awareness of the SNAP-ED program. The goal of this project is to increase the consumption of healthy fruits and vegetables as well as familiarizing the communities of Tehama County of

the benefits of SNAP-ED using internet resources. A summary of activities will be monitored and will be reported on an annual and biannual basis to track the success of all activities conducted by the NVCSS SNAP-Ed Department.

Northern Valley Catholic Social Service will work in expanding an existing PSE project that is currently being integrated into Butte County by working with a local food bank, church and non-profit organization that provides food and or nutritional services to the homeless populations of Tehama County by conducting a project titled "Train the Trainer." Our goal is to educate the core staff and workers of the community / faith based organization on basic nutrition as well as the principles demonstrated in the Smarter Lunchroom Movement. Our hope is that the community members receiving these services will begin to eat healthier meals as NVCSS will assist the community / faith based organization in providing the tools and technical training to implement small changes in their policies and procedures in regards to their food preparation and distribution.

Communities

Nutrition Strategies:

- Increase our presence in media, marketing and social awareness of the SNAP-Ed program by posting weekly blogs, activities and providing web based tools to the SNAP-ED eligible population.
- Promote food resource management by hosting classes at family and community resource centers on a biweekly basis in order to provide members of the community with better tips and tools on food preservation.
- Promote the consumption of healthy foods and beverages along with reducing sugar consumption using Food Smarts and the Rethink Your Drink program at interactive booths at community events such as the Cinco De Mayo Fair, Multi - Cultural Fair and other community events.
- Provide nutrition education, community gardening, and food resource management at least 2 low income housing communities and family resource centers each year and increase targeted sites by one each FFY.

Helping Families

Nutrition Strategies:

- Provide nutrition education at educational booths at community events that promote healthy eating and an active lifestyle by providing interactive guides to help individuals learn the importance of monitoring their diet and fitness level.
- Provide a variety of single and series based family friendly nutrition education workshops using curriculum such as the Rethink Your Drink, Eat Healthy Be Active Series and Food Smarts Curriculum.

- A minimum of 3 community and faith based centers will be provided with nutrition education classes using approved curriculum including Food Smarts and Rethink Your Drink.
- Post weekly updates and messages on approved social media websites such as Facebook and Instagram discussing SNAP-ED activities and events.
- Using the Eat Healthy Be Active Series, NVCSS will provide nutrition education and promote the importance of a healthy and active lifestyle to seniors in low income housing sites and community resource centers.

Coordination and Collaboration

Healthy Tehama Collaboration Strategies:

- Work with members of the Healthy Tehama Coalition in planning and executing marketing and media strategies that support SNAP-ED messages and spreads social awareness of the SNAP-Ed program and the benefits it offers.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	49.8%		0 to 5 years old (Preschool):	3,306

SECTION C: INTERVENTION PLAN

1. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019, LIA partnership will assist approximately 21 school programs in Tehama County to promote and/or update their school wellness policies while improving the school environment to better support consumption of healthy food and beverage and promote physical activity through SLM, Smarter Lunchroom Movement (SLM), Harvest of The Month HOTM, social marketing, and other relevant strategies in the classroom and school cafeterias.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

2. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- School Wellness policy
- Healthy Food and Beverage Standards
- Farm to Fork
- Structured physical activity program, such as Coordinated Approach To Child Health, (CATCH)
- Smarter Lunchrooms Movement, (SLM)
- School Garden
- Painting Preschool Playgrounds for Movement (Stencils)
- Access to Drinking Water

3. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**
    1. **FFY 2017 (Year 1) Objective(s):**
        a. By September 30, 2017, NEOP activities will reach 4337 school age children in direct education and 3100 school age children and parents of school age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of school wellness policies and procedures in a minimum of 7 schools.
        b. By September 30, 2017, UC CalFresh activities will reach 30 State PK, schools and SERRF after school children and parents with direct and indirect education; and will provide training and TA in the formulation and/or implementation of PSE site changes that support the development of the site wellness policies and procedures in 5 preschools/ schools and/or afterschool sites.
    2. **FFY 2018 (Year 2) Objective(s):**
        a. By September 30, 2018, NEOP activities will reach 4387 school age children in direct education and 3700 school age children and parents of school age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of school wellness policies and procedures in 7 schools.
        b. By September 30, 2018, UC CalFresh activities will reach 30 State PK, schools and SERRF after school age children and parents with direct and indirect education; and will provide training and TA in the formulation and/or implementation of PSE site changes that support the development or adoption of the site wellness policies and procedures in 5 preschools/ schools and/or afterschool sites.
    3. **FFY 2019 (Year 3) Objective(s):**
        a. By September 30, 2019, NEOP activities will reach 4400 school age children in direct education and 3800 school age children and parents of school age children with indirect education; and will provide training and TA, as well as support the development and/or implementation of school wellness policies and procedures in 7 schools.
        b. By September 30, 2019, UC CalFresh activities will reach 30 State PK, schools and SERRF after school age children and parents with direct and indirect education; and will provide training and TA in the formulation and/or implementation of

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, collaborate with LIAs and other community partners to increase awareness of and access to healthy fruits, vegetables and other healthy options, beverages and physical activity resources and promote PSE changes in at least 15 qualified sites.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Access to Healthy Foods
- Healthy Food and Beverage Standards
- Access to Physical Activity
- Community Garden
- Nutrition Policy

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, AAA will provide direct education to a minimum of 30 elderly SNAP-Ed eligible participants, indirect education to a minimum of 200 SNAP-Ed eligible seniors and PSE intervention to increase awareness of healthy fruits, vegetables, beverages and physical activity resources.
    b. By September 30, 2017, LHD will promote nutrition education, physical activity, and food resource management through direct and indirect education to at least two SNAP-Ed eligible community sites such as churches, libraries and public housing.

c. By September 30, 2017, CCC will promote the access and consumption of healthy local foods by delivering nutrition, physical activity, food safety, gardening and food resource management education at a minimum of 3 local farmers markets and low income community housing areas/family resource centers reaching 60 SNAP-Ed eligible participants.

d. By September 30, 2017, CWD will provide direct education with a focus on gardening and physical activity, to 300 individuals between ages of 18-59, and enhance awareness of healthy behaviors of at least 2,700 SNAP-Ed eligible individuals at community sites such as farmers markets, food pantries, apartment complexes and community based organizations.

e. By September 30, 2017, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management through teens, adults and families direct and indirect education, and promote PSE changes to at least two SNAP-Ed eligible community sites like food pantries/ food banks, Head Start, low-income apartments and community-based organizations.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, AAA will provide direct education to a minimum of 35 elderly SNAP-Ed eligible participants, 300 indirect education to a minimum of 300 SNAP-Ed eligible seniors and PSE intervention to increase awareness of healthy fruits, vegetables, beverages and physical activity resources.

b. By September 30, 2018, LHD will promote nutrition education, physical activity, and food resource management through direct and indirect education to at least two additional SNAP-Ed eligible community sites such as churches, libraries and public housing.

c. By September 30, 2018, CCC will promote the access and consumption of healthy local foods by delivering nutrition, physical activity, food safety, gardening and food resource management education at a minimum of 3 local farmers markets and low income community housing areas/ family resource centers reaching 65 SNAP-Ed eligible participants.

d. By September 30, 2018, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management education through teens, adults and families direct and indirect education, and provide training and technical assistance to support the development and adoption of site Wellness/nutrition policy or other PSE changes in at least one food pantries/food banks or other qualified sites.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, AAA will provide direct education to a minimum of 40 elderly SNAP-Ed eligible participants, indirect education to a minimum of 400 SNAP-Ed eligible seniors and PSE intervention to increase awareness of healthy fruits, vegetables, beverages and physical activity resources.

b. By September 30, 2019, LHD will promote nutrition education, physical activity, and food resource management through direct and indirect education to at least two additional SNAP-Ed eligible community sites such as churches, libraries and public housing.

c. By September 30, 2019, CCC will promote the access and consumption of healthy local foods by delivering nutrition, physical activity, food safety, gardening and food resource management education at a minimum of 3 local farmers markets and low income community housing areas / family resource centers reaching 70 SNAP-Ed eligible participants.

d. By September 30, 2019, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management through teens, adult and families direct and indirect education, and provide training and technical assistance to support the development, adoption, implementation and monitoring of site Wellness/nutrition policy or other PSE changes in at least 2 food pantries/food banks or other qualified sites.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Tehama County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Single topic nutrition education workshops with focus on gardening and fresh produce that may include hands on learning and cooking activities at farmers markets, food pantries, apartment complexes and community based organizations. Topics include gardening and physical activities, health benefits of gardening, showing individuals how to garden, and will use outside supports to provide individuals with the tools to access mobile gardening boxes and plant in cooperative gardens, as well as increased consumption of high dietary quality at low cost, dietary restrictions, budgeting, garden options for picky children, purchasing local and fresh foods, and couponing. Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019); Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, use approved media and public relations to promote change in community culture values that support healthy lifestyles to at least 55% of the SNAP-Ed eligible individuals through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Access to Healthy Foods
- Healthy Food and Beverage Standards
- Access to Physical Activity

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, use approved media and public relation to promote access to and consumption of healthy foods and beverages and increased physical activity to at least 50% SNAP-Ed eligible individuals through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30, 2018, use approved media and public relation to promote access to and consumption of healthy foods and beverages and increased physical activity to at least 52% SNAP-Ed eligible individuals through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30, 2019, use approved media and public relation to promote access to and consumption of healthy foods and beverages and increased physical activity to at least 55% SNAP-Ed eligible individuals through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

FFY 2018 SNAP-Ed Budget

Organization Name:	California Department of Public Health
County/Jurisdiction:	Tehama County Health Services Agency (LHD)
FFY 2018 Total Budget:	**$276,000.00**
Budget Adjustment Request #:	

	Expenses*	FFY 2017 Carry-In Budget****	FFY 2017 Budget	FFY 2018 Budget	FFY 2017 Carry-In and FFY 2018 Budget	% Difference
1	Salaries/Benefits	$0	$121,357	$122,172	$122,172	0.67%
2	Non-Capital Equipment/Supplies	$0	$100	$751	$751	651.00%
3	Materials	$6,000	$5,857	$4,145	$10,145	73.21%
4	Travel	$0	$6,248	$4,915	$4,915	-21.33%
5	Building/Space	$0	$0	$404	$404	
6	Maintenance	$0	$2,551	$144	$144	-94.36%
7	Equipment and Other Capital Expenditures	$0	$0	$0	$0	
8	Contracts/Sub-Grants/ Agreements**	$30,000	$73,548	$76,926	$106,926	45.38%
	Total Direct Costs:	**$36,000**	**$209,661**	**$209,457**	**$245,457**	17.07%
9	Indirect Costs*** Indirect Cost Rate= 25 %	$0	$30,339	$30,543	$30,543	0.67%
	Total Federal Funds	**$36,000**	**$240,000**	**$240,000**	**$276,000**	15.00%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	
2	Non-Capital Equipment/Supplies	The difference is due to the addition of a new office supplies line.
3	Materials	The difference is due to the integration of 2017 carry-in funds to allow us to procure new stencil kits and cooking supplies.
4	Travel	The reduction is due to less anticipated travel because the Childhood Obesity Conference will not occur in 2018.
5	Building/Space	
6	Maintenance	The reduction resulted because we used past expense experience to more accurately predict expenses.
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	The difference is due to the integration of 2017 carry-in funds into the 2018 budget to allow the contractor to expand their scope of work to reach more target audience in remote areas of the county.
9	Indirect Costs	

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

TRINITY COUNTY:

SECTION A: OVERVIEW

1. SNAP-Ed Implementing Agency (counterpart local agency) Names

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: Trinity County UC Cooperative Extension (UCCE)
X	California Department of Public Health: CDPH: Trinity County Health and Human Services (HHS) Public Health (LHD)
X	California Department of Aging: CDA: (Area Agency on Aging): CSU Chico Research Foundation for PSA2 Area Agency on Aging via The Center for Healthy Communities (CHC, AAA PSA2-LIA)
X	Catholic Charities of California: CCC: (Catholic Charities of California: CCC) North Valley Catholic Social Services (NVCSS)

2. State Level Goals and Objectives

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. Jurisdiction Description

Trinity County is a rural county with about 13,069 (US Census Bureau 2015) and approximately 4.3 persons per square mile, where 4.9% of the County population is under 5 years old, 12.0% are 5-17 years old, 59.1% are 18-59 years old and 24.0% are 65+ years old. 49% of the population are female. The median household income is $36,862, with about 19.9% of the Trinity County residents living below poverty level (U.S. Census Bureau, 2015). This is 5.1% higher than the California average of 14.8%. When the total Trinity population is stratified by race, 83.1% are White (non-Latino), 7.1%—Latino, 2.8%—American-Indian /Alaska-native (non-Latino), 0.5%—Native Hawaiian/Pacific Islander, 1.1%—Asian, 0.8%—African-American (non-Latino) and 4.6%—Other/Unknown (2010-2014 American Community Survey Data). The primary language spoken in Trinity County is English.

According to the SNAP-Ed Trinity County Profile 2015, the age breakdown of the County population living under the 185% Federal Poverty Level are as follows: 40.2%—children under 6 years, 54.5%—youth 6-17 years, 38.6%—adults, and 35.1%—seniors (65 years and older). When the SNAP-Ed eligible population is stratified by race/ethnicity, 80.6% are white (not Hispanic), 4.5%—Hispanic, 11.1%—multiracial and 3.7%—unknown.

Although, Trinity County is situated in the beauty of Shasta-Trinity National Forest and the Trinity Alps, the magnitude of land mass, coupled with higher-than-average poverty levels, can complicate service delivery and healthy living. Those residents who live in the more rural areas of Trinity County live over 2 hours by car from services, making it difficult to provide integrated services. Trinity County residents have limited access to affordable nutritious food, with very few options for grocery shopping, with many residents depending on mini-marts to purchase groceries. Also due to the rural, mountainous nature of Trinity County the walkability is limited, as well as access to public spaces, like parks and walking trails. While Trinity County residents have access to primary care physicians, there is no access to medical specialists, with many traveling over an hour to the nearest specialty office, and sometimes over four hours, depending on medical needs. When age distribution and ethnicity data is compared between below and above 200% FPL, the population below 200% FPL showed 7.5% more Trinity children under 11 years old than the population above 200% FPL. When ethnicity distribution is compared between the two socioeconomic groups, the population below 200% FPL showed a 7.7% higher concentration of minorities.

The Table below summarizes selected health indicators of Trinity residents stratified by below 200% FPL vs. above 200% FPL:

Health Indicator	Trinity		
	Below 200%	**Above 200%**	**Difference**
Not Currently Insured	11.0	6.6	**4.4**
Poor Health Status	9.5	2.5	**7.0**
Diagnosed with Diabetes	8.0	4.6	**3.4**
Current Smoker	27.6	14.8	**12.8**
Unable to afford Enough Food	27.1	0.0	**27.1**

When data are analyzed for families with children age 5 years and younger, 15.1% in Trinity are single with children. Among children age 5 years and younger, 2.9% in Trinity are not currently insured. Compared with the State level (16.8%), 25.2% in Trinity do not have dental insurance. It is also shown that 46.3% of children 3 and 4 years of age in Trinity do not attend preschool, nursery school, or a Head Start program.

Compared to other California counties, the well-being of children in Trinity County is getting worse on 6 indicators over time: women who receive prenatal care (-32%); students who are "ready" or "conditionally ready" for college-level math courses (-15%); high school science classes that are taught by a "highly qualified teacher"(-22%); expulsions that are limited to serious offenses, not "willful defiance" (-10%); and eligible students who eat free or reduced-price breakfast during the school year (-6%) and meals during the summer (-83%) (2012-13 Children Now).

Food Insecurity and Access to Healthy Food

Recent studies suggest that food insecurity may play a role in the onset of obesity among some low-income groups and appear more dramatic in segments of our communities living in poverty. Trinity county communities face higher rates of poverty and higher percentages of children in families with single female head of households that are living in poverty. They also showed low coverage of eligible residents for the CalFresh program as well as higher percentages of unemployment than the respective percentages for California. More than 19.2% of Trinity County residents live in poverty, including 32.4% of the Trinity County children who are food insecure.

Food insecurity is associated with poorer physical and mental health, including an increased risk of depression, diabetes and hypertension [California Food Policy Advocates (CFPA), July 2012]. An estimated 2,574 adults in Trinity County (19.7% of total population) could not afford to put adequate food on the table during the recent recession. According to the Bureau of Labor Statistics on April 2015, Trinity County shows an unemployment rate of 8.8%. This rate is higher than that for the State of California (6.3%)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Access to healthy foods for low-income families is far below the state average for Trinity County, with only 17.2% of stores with-in the county accepting CalFresh or WIC. Out of those who accept WIC or CalFresh benefits, 25% had a good selection of quality fresh fruits and vegetables. Yet, over 90% of stores within the county sold alcohol and 48% had unhealthy exterior advertising (Healthy Stores for a Healthy Community, CDPH-Tobacco Education 2013).

CalFresh Participants

The table below summarizes the utilization of the CalFresh and other food assistance programs in Trinity County and its impact on the local economy. (2013 Lost Dollars, Empty Plates, CFPA 2013)

-CalFresh Utilization-	**Trinity**
Rank out of California's 58 counties in Utilization of CalFresh	36th
-Participation in the CalFresh Program-	
Estimated number of income-eligible Individuals	2,396
Average monthly CalFresh participants	1,453
Percentage of participation	60.6%
Estimated number income-eligible non-participants	943
Percentage of income-eligible non participants	39.4%
-Impact of CalFresh Underutilization on local economies-	
Estimated annual loss of federal (CalFresh) benefits	$1.340.000
Estimated annual loss of resulting economic activity	$2.410.000
-National School Program-	
Low-income students participating in the National School Program	74.0%
-Federal School Breakfast-	
Low-income students participating in the Federal School Breakfast	46.0%
Number of low-income students that miss out on School Breakfast	552
Untapped Federal meal reimbursements for the County due to low School Breakfast participation	$87,000
-Summer Meal -	
Summer Meal Participation Rate Among 58th Counties	5th lowest
Percent of Children served during the academic year and Summer	0%

If Trinity County CalFresh program reached the entire eligible low-income individuals, local residents would receive a total of $1,340,000 million in additional federally funded nutrition benefits each year. Those benefits would result in $2,410,000 million in additional economic activity

According to the data, only 60.6% in Trinity of the total eligible populations are participating in CalFresh.

Analysis of the Trinity Free and Reduced Price Meals (FRPM) school program data showed that, 74% of Trinity students eligible for FRPM are enrolled in the School lunch programs. These figures reached critical values when data from the School Breakfast and Summer Food Programs were analyzed. Only 46.0% of the Trinity eligible students are enrolled in the School breakfast programs. In addition, none of Trinity students eligible for FRPM is enrolled in the Summer Nutrition Program.

Nutrition-Related Behavioral and Lifestyle Characteristics of CalFresh Program Eligible in Trinity County

Today, addressing the obesity crisis and its underlying food insecurity issues requires both individual and community-level intervention supported by institutional practices and policies that emphasize healthier eating and activity. This has to occur in all settings, including homes, schools, neighborhoods, worksites, and through healthcare and media support.

Obesity, especially among children, is a growing epidemic with profound human costs. It is documented that 50% of obese adolescents are likely to remain obese as adults. Scientific literature recognizes that obesity is a result of individual behavior influenced by social and environmental factors.

According to the 2011-12 California Health Interview Survey, 31.4% of Trinity adults are obese (BMI >30) and 68.7% are obese or overweight, which is higher than that for California (24.8 and 59.8%). Around 14.6% of children age 5 years and younger are overweight in Trinity County. Around 10.3% of children in Trinity are overweight for their age. Among adolescents, 12.5% of adolescents 15-17 years are overweight or obese. This percentage increases 5 times in adults 18 to 24 (61.7%), reaching the highest prevalence in adults 25 to 64 years old with a little decline in seniors 65-79 years old. These data show a continuing increase in obesity prevalence with age. (California Department of Health Services)

The prevalence of diabetes among the Trinity adult and senior population is 7% with 1,026 individuals with Type II Diabetes. The prevalence of heart disease is 8.9%, cancer 18.4%, and 4.2% of the women have been diagnosed with breast cancer (CHIS, 2009)

When we analyze the diet, 15.5% of Trinity children 0-4 years old had 2 servings of fast food per week and drink one or less glass of sugary drinks per day. Among Trinity County, children age 5 to 11 years, 19.1% drink two or more glasses of soda or other sugary drinks per day and 21.5% had at least two servings of fast food per week. Over a quarter (26.5%) of adolescents (12-14 years) and two-thirds (68.0%) of adolescents (15-17

years) drink two or more glasses of soda or other sugary drinks per day. One-third (34.6%) of the adolescents (12-14 years) and two in five (44.6%) adolescents (15-17 years) had at least 2 servings of fast food per week. According to the California Health Interview Survey, 57.1% of the children 5-11 years old and 52.7% of adults eat less than 5 servings of fruit/vegetables daily (CHIS, 2009).

Data has shown that children and adolescents are more likely to eat at least five servings of fruits and vegetables if their parents do. Children whose parents and relatives drink more soda also drink more soda themselves. This illustrates the importance of helping parents to improve their eating behavior as a way to improve their health, as well as influencing their children's dietary habits positively by serving as role models through the food environment at home (CHIS, 2009).

Trinity County and the surrounding region also experience a disjointed local food system. Consumers buy processed and packaged foods at the supermarket and neighborhood corner stores unaware of the unhealthy impact this food has upon their lives. Due to this lack of awareness, the local communities loses the knowledge of where their food comes from, how it is grown, and in many cases even how to cook fresh, healthy foods. Local consumers obtain little information about and have limited access to local healthy food, while being highly exposed to ubiquitous marketing and availability of fast food chains, making unhealthy eating choices seem easy and inexpensive.

The high prevalence of childhood obesity is the result of a variety of individual, social and environmental factors, including increased availability and consumption of soft drinks and high-fat, high-calorie foods; increasing amounts of time spent in sedentary activities including television viewing; inadequate school physical education programs and limited access in many neighborhoods to healthy foods and safe places to be physically active. These problems go beyond factors under the control of children and their parents to include conditions in schools and communities that encourage children to eat and drink unhealthy foods and beverages and that limit their physical activity.

Additionally, according to the California Department of Aging, 14% of the population 60 years of age and older live in poverty (≤ 125% FPL). It is recognized that residents of low-income communities have less access to healthy foods and an abundance of unhealthy foods compared to their higher income counterparts. Only 13% of residents age 60 and over in Trinity and an additional 6 surrounding counties, are only sometimes able to find fruits and vegetables in their neighborhood (CHIS, 2014). Furthermore, in that same county region, 36.6% of seniors reported themselves as not able to afford enough food. According to the California Department of Food and Agriculture (CDFA), Trinity County had a Senior Farmer's Market Coupon redemption rate of 65.25% for 2015.

The aging of the population is particularly noticeable in PSA 2, where the senior population is already a significant element of the overall population and is continuing to grow. It is projected the retiring "Baby-Boomers" will choose to retire within the PSA 2 AAA area at twice the

percentage anticipated for California as a whole. In 2013, PSA 2 found that more than 27% of seniors surveyed had issues acquiring at least two meals per day as reported in the PSA 2 Area Plan. Furthermore, 80% of the seniors surveyed in Trinity County are at nutrition risk. Because of these findings, local intervention strategies include efforts aimed at improving demand and access to healthy foods, especially fruits and vegetables, and beverages.

Using the data provided by CDPH, CDSS and local statistics generated from Trinity County Department of Health and Human Services; data show Trinity County ranks poorly in chronic disease health conditions that are associated with obesity rates.

Other Nutrition-Related Programs Serving Low-Income Community in Trinity County.

Trinity low-income communities receive nutrition education from federal or state funded programs as well as those operated by local non-profit agencies or charitable organizations. Trinity County UC CalFresh, Trinity County Public Health, North Valley Catholic Social Service and the Area Agency on Aging (PSA-2 via Center for Healthy Communities), collaborates and coordinates efforts with local partners that deliver Food, Nutrition and Physical Activity education and are serving the SNAP-Ed eligible population.

Trinity County Public Health SNAP-Ed is located within the Health and Human Services (HHS) Building. HHS is located in one building to improve accessibility and convenience for participants; services include:

FINANCIAL ASSISTANCE: TANF, CalFresh (Food stamps), General Assistance, Cash Assistance Program for immigrants, Refugee Assistance, diversion, homeless assistance, Employment and Training Services (CalWORKs), SSI application assistance, Cal-learn, Work Experience Placement, General assistance work placement, Job Club/Job Search (ACHIEVE), Vocational Training, Basic Work Readiness Ed, County Medical Services Program, Medi-Cal, Indigent Burial

CHILD PROTECTIVE SERVICES (CPS): Emergency Response, Court and Voluntary Reunification, Court and Voluntary Maintenance, Permanent Placement, Adoption Referrals, Foster licensing, Independent Living Program, Foster Care Program

SENIOR AND DISABLED SERVICES: In Home Supportive Services, Public Guardian probate and LPS Conservatorships, Representative payee program, Adult Protective Services, Information and referral, Public Authority

HEALTH PROGRAMS: Immunizations, Communicable Disease Surveillance and support, Annual Flu Shot Clinics, MMC, HIV testing, Pregnancy testing and referral, TB testing, Perinatal Services (MCAH), Application assistance for Medi-Cal and A.I.M., Child Health and Disability Prevention referrals, Women, Infants and Children (WIC), California Children's Services, Tobacco Education Program, SIDS, Foster Care Nursing.

Trinity County Public Health saw a need to conduct a targeted community assessment to determine the potential needs and barriers for Trinity County's low-to-moderate income children. Through the Child Health and Disability Prevention (CHDP) program, staff regularly track demographic and health information from CHDP visits to local providers. Program data are inferred from this data, but there was a need to consciously tabulate key points within the data to recognize trends. The initial step was to organize data surrounding gender, birthdates, height and weight, so that BMI (Body Mass Index) percentiles could be tabulated. The findings were more significant than had been anticipated, showing that there is a higher rate of obesity among Trinity County's low-income high schoolers (ages 13-17). Those children, ages 13 to 17 residing in Trinity County, who received a CHDP exam, showed an overweight rate of 22.64 percent and an obesity rate of 26.42 percent; these are higher than the 2013 national average of 16.6 and 13.7 percent (Centers for Disease Control and Prevention, n.d.). On the surface, this is a significant difference, but the population surveyed is specific to low-income and studies have indicated that low-income children are more likely to be identified as overweight or obese; 44.8 percent of low-to-moderate income children were overweight or obese, "compared to 22.2 percent of children living in households with incomes above 400 percent of poverty (Bethell, et al., 2010, para. 19). However, the local data indicates that Trinity County high schoolers are 5% over this data point. The BMI percentiles for preschoolers closely follows that of the nation and California, and remains steady throughout school age children. It is not until high school that Trinity County children exceed the national and state percentiles.

The CHDP participants included in this targeted assessment are children, ages 2 through 17.9 years old, and are children from families that are below 266 percent the federal poverty level (FPL), with most being below 138 percent of the FPL (for a family of 4, this would be an annual income of $33,465 or less), as most participants are Medi-Cal eligible. The participants are residents of Trinity County, living in one of the following cities: Burnt Ranch, Mad River, Salyer, Zenia, Douglas City, Hayfork, Hyampom, Junction City, Lewiston, Trinity Center and Weaverville, with a few participants residing on the border of Humboldt and Trinity Counties.

Public Health staff received health and demographic information from 419 CHDP patients from 2015 to 2016, and identified 258 participants who were 2-years-old and over and had accurate height and weight data. Of these 258, data (gender, height, weight, age) was inputted into the Centers for Disease Control and Prevention BMI tools to determine BMI percentiles. These percentiles were then charted by weight status, age group and location. This is a sample size of 11% of Trinity County children under the age of 18 and it was determined that these CHDP participants closely resembled Trinity County's Medi-Cal eligibility case count for 2015-2016, conducting 234 eligibility visits.

4. Community Assessment

The assessment data utilized to identify intervention strategies includes the following bulleted sources to provide information on demographics, health, and community and environmental settings. By utilizing this set of assessment measures to inform the development of the work plan, Trinity County SNAP-Ed local implementing agencies (LIA's) collaborative has identified the populations and areas of highest need, to design an integrated work plan with interventions at all levels of the socio-ecological model and provide long term benefit to the SNAP-Ed eligible population in Trinity County.

Obesity is a problem related to individual knowledge, skills and practices as well as policy, systems and environmental factors that are key to the sustainability of healthy behaviors. Community based nutrition education is an important component that is possible through a variety of settings, including child care centers, schools, community worksites, health care centers and other community venues. The goal is to build essential knowledge and skills that will lead to healthy lifestyles.

During FFY15, UC CalFresh approved evaluation tools were used to assess the increase in knowledge, skills and practices of the participants, who received the UC CalFresh nutrition education program. In summary:

For children who received the food and nutrition education, reinforced with food tasting, cafeteria food demonstrations and family education, on average:

- 73.0% of the children Increased acceptability of fruits, vegetables and other healthy foods
- 69.0% of the children are willing to ask for the new healthy choice at home.
- 80.0% of the teachers agreed/strongly agreed that, this year, children chose more fruits and vegetables, are willing to try new foods, can identify healthy choices, wash hands more often and bring more fruits and vegetables as snacks.
- 60.0% of the teachers agreed/strongly agreed that this year teachers now make healthier choices, encourage the students to be physically active, remind more families to bring healthy snacks, and offered healthy choices to the students.

For adults and families who received the UC CalFresh food nutrition education reinforced with food demonstration and family education, on average:

- 68.0% improved food resource management, nutrition and food safety practices
- 80.0% increase acceptability of fruit and vegetable and other healthy food choice.
- 77.0% are willing to serve the new fruit and vegetable and other healthy choice at home to their families

These results show the significant value of the direct education, reinforced with food tasting, food demonstration and family education as a comprehensive approach to change knowledge, skills and behavior.

The food resource management approved UC CalFresh curriculum evaluation data showed that the participants improved an average of 32.0% in six of the behaviors that were evaluated. The use of a shopping list and the use of a variety of foods at meals were the behavior with the highest positive change (39%), followed by use nutrition facts labels (33%), think about healthy choices and compare prices (28%), and the frequency of planning meals (22%).

Food insecurity data from the county profile indicates programs such as Plan, Shop, Save, Cook (PSSC) or Making Every Dollar Count (MEC) will help individuals to plan and shop to allow for greater food security. Evaluation data showed that 28% of the Trinity participants who received

the UC CalFresh Food Resource Management Education were no longer running out of food before the end of the month after receiving the PSSC education. The finding shows that the 4-lesson series is a very important educational tool that has made a difference by improving food security in the lives of the low-income community members of our targeted population.

Behavior change toward a healthier life for the targeted population is the most important goal of the Trinity UC CalFresh Nutrition Education Program. It is also recognized that the increase in knowledge combined with the necessary environmental changes at different levels of the community can facilitate the expected change in behavior for a healthy lifestyle.

UCCE has completed a needs assessment that indicates there is a need to improve school, organizations and household food system, environments and policies to better support the goals of the direct education. The school wellness policy and improvement to school, non-profit organization and household environments is a new addition to the FFY16 Integrated Work Plan (IWP). As described in the SNAP-Ed toolkit, the Smarter Lunchroom Movement is an initiative to equip school lunchrooms with evidence-based tools that improve child-eating behaviors and improve the health of children. It is anticipated that at least one qualifying school district will be receptive to updating their Wellness plans, at least 2 Trinity schools will implement Smarter Lunchroom practices and one non-profit organization will change the environment.

Using these data sources, the food, nutrition and physical activity education interventions at sites with higher SNAP-Ed participants along with media related and community event interventions will help ensure that the SNAP-Ed eligible population is reached and educated in all of Trinity County. The data also contribute to the identification and development of coordination and collaboration among Local Implementing Agencies (LIAs) and other local partners to identify and implement comprehensive intervention activities as well as to create opportunities for policy, system and environmental changes that will facilitate the expected behavioral changes in the targeted population.

5. Community Change Goals

Based on the data reported in the jurisdiction description and the results of the Community Assessments, we identified the following community change goals:

1. Increase access and consumption of healthy foods and drinks

- Increase knowledge and skills for healthy eating in Trinity County
- Promote and support interventions to increase access and consumption of healthy foods and drinks
- Use the Tobacco Use Prevention education Model and the Healthy Retail Program
- Support community, school and home based garden interventions
- Promote and support local Farm to Fork Programs

2. Increase safe and easy access to physical activity and healthy lifestyle

- Promote and support interventions to increase access to physical activity and healthy lifestyle among the Trinity County residents

3. Define and implement policy, system and environmental changes that support the sustainability of healthy behavior

- To increase consumption of healthy foods and beverages requires appropriate levels of knowledge, skills and practices along with sustainable changes in the environment that support the easy access to healthy foods and beverages.
- Access to and promotion of physical activity for all residents requires information to create or increase awareness, education to increase knowledge, skills and practices as well as sustainable changes in policies, systems and environments that ensure the easy and safe access to physical activity for individual, family, institutional and other levels of the community. Physical activity, education at different levels of the community, wellness policies in schools and institutions, bike-ability and walk-ability, safe routes to schools, as well as safe and easy access to parks, community centers and other recreation facilities are key factors to ensure a healthy lifestyle for everyone in the Trinity community.

- Educating and encouraging communities to change their behavior for healthier eating and lifestyles are strongly influenced by their policies, systems and environments. There is a need for policy changes that support sustainable access to healthy foods and beverages and physical activity for everyone in the community. The food system is an essential part of the individual and community environment. Therefore, the prevention of obesity requires a community food system in which sustainable food production, processing, distribution, marketing and consumption are integrated to enhance the environmental, economic, social, and nutritional health of the Trinity County.

We recognize that many of these community change goals are multi-year strategies, and require the support of external partners and additional funding streams. The Trinity County SNAP-Ed LIA partnership has committed to contribute on the FFY17-19 to specific objectives under this larger community goals–based on agency expertise and SNAP-Ed guidelines as follow:

1. By September 30, 2019, LIA partnership will assist up to 14 low-income school programs and 4 school based, community based organizations and other areas that reach CalFresh recipients in Trinity County in promoting and/or updating their school wellness policies and gardening programs, while improving the school environment to better support consumption of healthy food and beverage and promote physical activity.

2. By September 30, 2019, collaborate with LIAs and other community partners to increase awareness of and access to healthy fruits, vegetables and other healthy options, beverages and physical activity resources and promote PSE changes to at least six adult, senior, family, public assistance, emergency food assistance and community sites.

3. By September 30, 2019, in an effort to extend the education to the hard to reach Trinity County SNAP-Ed eligible population, the Trinity County SNAP-Ed LIAs will collaborate in the delivery of the education and the use of approved media and public relations to promote at least four changes in community culture values that support healthy lifestyles through public service announcements, community events, newsletters and dissemination of pertinent information and resources.

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

Trinity Coalition for Activity and Nutrition (TCAN) includes Trinity County Health and Human Service (TC H&HS) Programs [Public Health SNAP-Education, Women, Infants and Children (WIC), Maternal, Child Adolescent Health (MCAH)], University of California Cooperative Extension CalFresh Program; California Health and Disability Prevention (CHDP), Trinity Growers Association (Certified Farmers Markets in Hayfork and Weaverville and Fresh Bag Services), Areas on Aging (PSA 2 via the Center for Healthy Communities), Northern Valley Catholic Social Service (NVCSS), Human Response Network (Children's Food Network, CalFresh Outreach, Tobacco Education, Life Skills classes through Trinity County Juvenile Hall); Trinity Head Start; Trinity County First Five Commission; Trinity County Office of Education (School Readiness Program, Tobacco Use Prevention Education); Northwest CA RC&D – Children's Garden Program; Trinity County Chamber of Commerce; Resource Conservation District and the Young Family Ranch Community Trust. Retaining current partner including Trinity County H&HS social service public health division health education specialist and public health nurse, Mountain Community Health Care Foundation, Trinity County Department of Transportation, Trinity County Department of Solid Waste (agriculture), and Trinity County Behavioral Health Department. Although the coalition has been in existence since the late 1990's, led by the Trinity County Health and Human Service and the University of California Cooperative Extension, the participation and collaborative success increased exponentially since the new SNAP-Ed LIA's have joined the coalition. The coalition recognizes the value of the SNAP-Ed funding within the county and works diligently to include USDA FNS SNAP-Ed funded partners as well as unfunded partners to ensure a well-informed evidence based approach to community support for increased access to healthy foods and beverages, fruit and vegetable consumption, physical activities and healthy lifestyle choices. TCAN is in the developing stage of building a comprehensive county nutrition action partnership (CNAP) for Trinity County. Trinity County SNAP-Ed LIA's are working hard to ensure their activities and objectives are aligned with TCAN's set community goals and needs to achieve greater success through a collective approach in order to help combat chronic diseases that are brought on by unhealthy lifestyle choices.

Local Implementing Agencies (LIA) funded by SNAP-Ed include Trinity County Public Health (LHD), UC CalFresh (UCCE), North Valley Catholic Social Services (CCC), and Center for Healthy Communities - PSA2 (AAA). Project Coordinators/Directors and nutrition educators meet quarterly or more often as needed. The meeting agenda includes discussion and strategies on successes and barriers to LIA's scope of work and the current IWP. These meetings ensure that the county is being represented in all areas of need and eliminates any confusion or site duplication. We continue to deliver comprehensive activities in scope with multiple approaches at more than one level of the SEM through our CNAP efforts. Trinity County SNAP-Ed services and activities are also promoted through connections with other agencies, such as the County Welfare Department, etc.

Other non-SNAP-Ed funded county partners include our tobacco and alcohol prevention colleagues. We will be working with them on our combined healthy retail strategies.

8. Educational Materials, Resources and Curriculum

All curriculum and materials used will be from the FFY 2017-19 USDA approved UC CalFresh, California Department of Aging, and California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document. All materials, resources, and curriculum have also been identified for each objective proposed in this integrated work plan under Section C.

9. Intervention and Evaluation Plan Narrative Summary

The implementing agencies in Trinity County—University of California Cooperative Extension/UC CalFresh, Trinity County Public Health, Trinity County, North Valley Catholic Social Service and Area Agency on Aging (AAA) (PSA2 via Center for Healthy Communities) — will collaborate to provide education and support to increase consumption of healthy food and beverages and increase physical activity among the SNAP-Ed eligible population. This will be accomplished through providing comprehensive participant centered/ behavior- focused nutrition education, food resource management, gardening and physical activity promotion with environmental supports and community events. The Trinity County SNAP-Ed LIAs will promote the Dietary Guidelines for Americans and SNAP-Ed Intervention Strategies proven to change behavior.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

UC Cooperative Extension, UCCE - CalFresh

The Trinity UC Cooperative Extension – UC-CalFresh nutrition education program aims to educate SNAP eligible and SNAP recipients on how to improve their health and well-being through individual, group or community education focus on dietary quality, physical activity and food security. The program approach aligns with the Social Ecological Model (SEM) as illustrated by programmatic delivery and multi-level engagement in partnerships throughout the Trinity County

The UC Cooperative Extension – UC-CalFresh provides multi-level knowledge, skills and behavior-focused food and nutrition, food resource management, food safety, garden and physical-activity education and promotion using direct and indirect education, media, social media and public relations, community events, Farmers Markets, coordination and collaboration, training and technical assistance reaching the different levels of the social-ecological framework.

To facilitate and sustain the healthy change in behaviors, the program promotes and supports school, family and community policy, systems and environmental changes such as, farm to school and farm to fork programs; school, household and community gardens; access to drinking water and physical activity, Smarter Lunchrooms movement; institutional wellness programs and household lifestyle policies.

UCCE-UC CalFresh Intervention Strategies

The UC Cooperative Extension – UC-CalFresh delivers the service to the targeted population using approved UC CalFresh educational resources and evaluation tools and the following intervention strategies:

Schools

- Improve student, teacher and staff nutrition knowledge and behavior through classroom education, food tasting, school and classroom nutrition corners, schools menu and cafeteria and the Smarter Lunchroom programs.
- Promote physical activity and nutrition in the in the classroom setting and indirect education, the Preschool playgrounds for movement (Stencils), the Coordination Approach to Child Health (CATCH) program, physical activity challenges, nutrition games and educational displays.

- Develop, implement and evaluate school gardens as a novel approach to learn about foods, healthy eating and increase physical activity. Integrate the school gardens, classroom and cafeteria education in a comprehensive nutrition education program based on the Dietary Guidelines for Americans for healthier behavior.
- Start and expand Farm to School programs by linking local farmers and gardens to school meal service for the procurement of fresh local produce that contribute to healthier school meals.
- Promote access to drinking water in childcare centers and schools, by a partnership with local institutions and organizations to support the necessary changes in the school environments that increase access to drinking water and facilities that facilitate healthy changes in behavior.
- Support the development of school wellness program and health councils, including student members to promote and support policy and environmental changes for healthier eating and lifestyle.
- Improve youth, school staff and parent's access to nutrition information through monthly teacher and family food and nutrition newsletters, educational workshops and booths and food demonstrations at the cafeteria, staff meetings and in school events, creating awareness for a healthy diet and lifestyle.

<u>Community based youth, adults and senior organizations</u>

- Provide nutrition, physical activity, food safety and gardening direct education classes, indirect education and cooking demonstrations using single lesson, workshops and/or 4-lessons series modalities, to teens, adults and seniors organizations, for the development and adoption of healthy eating of foods and beverages, using appropriate and approved curricula, approved supplemental educational materials and evaluation tools.
- Provide food resources management education to teens, adults, families and seniors to increase knowledge and skills for the access and consumption of healthy and nutritious foods on a limited budget, using appropriate approved 4-series lessons and evaluation tools.
- Promote adults and senior organizations' sites, gardens as a novel approach to learn about foods, healthy eating and increase physical activity. Promote healthy beverage and access to drinking water in non-profit teens, adults and senior organizations.

- Promote and provide training and technical assistance to support the development, adoption, implementation and monitoring of site wellness/nutrition policies and other PSE changes that facilitate and sustain the healthy change in behaviors among the target population.

Communities

- Improve community access to nutrition and physical activity information through educational booths, nutrition games and food demonstrations, creating awareness for healthy eating and lifestyle.
- Promote access to healthy drinking water in the community in partnership with other local agencies in events and other community and media promotions.
- Promote community gardens as a novel approach to increase knowledge and access to healthy foods as well as increase physical activity.
- Promote consumption of healthy foods at Farmers Markets and other community events using approved educational messages and food demonstrations.
- Use the media, social media and public relations for the delivery of community, institutional and household food system, and healthy eating and lifestyle education as a novel approach for obesity prevention.

Helping Families

- Increase parents' and family knowledge and skills for a healthy diet and lifestyle, through family education and behavior change programs.
- Increase food resource management skills and support family-friendly cooking demonstrations and taste testing, as a novel strategy to increase knowledge and skills for the access and consumption of healthy and nutritious foods on a limited budget.
- Encourage the development and adoption of healthy eating and active living in household policies and practices that support healthier family and children feeding practices and lifestyle.
- Promote home gardens as a novel approach to learn about foods, extend the budget, healthier eating and increase physical activity.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

Coordination and Collaboration

- Coordination and collaboration among the local SNAP-Ed LIAs for the formulation and implementation of the County SNAP-Ed Plan.
- Coordination and collaboration among other local non SNAP-Ed organizations to promote and support policy and environmental changes that support the SNAP-Ed population's ability to implement sustainable healthier eating and lifestyle behavioral changes to prevent obesity.

UC Cooperative Extension, UCCE - CalFresh: Evaluation Narrative:

Trinity County UC Cooperative Extension, UCCE - CalFresh will conduct formative, process and impact/outcomes evaluation of the FFY17-19 plan. The formative evaluation uses the required UC Cooperative Extension - CalFresh Evaluation tools, such as Intent to change, pre and post assessment, teacher observation and teacher tasting, to provide information that is used during the development of the intervention. The program will conduct a process evaluation using quarterly Workbook reports on an ongoing basis, to record SNAP-Ed activities, sites participants reached, and other required elements for USDA's SNAP-Ed Education and Administrative Reporting System (EARS). Sites that showed high performance in terms of reach and multi-intervention strategies will also be identified and replicated. The Outcome Evaluation will document achievement of the type of individual level behaviors and dietary practices using the required UC CalFresh evaluation tools in at least 25% of children and 33% of adult participants that receive direct nutrition education. Evaluation documentations include the Intent to Change, Adult Taste Testing, Retrospective Assessment, Teacher Tasting and Pre/Post Assessment tools. Policy Systems and Environment (PSE) Change and the level of community and/or institutional support for the change will be documented using the approved FFY17-19 UC CalFresh PSE changes evaluation tools on measures of reach, effectiveness, adoption, implementation and maintenance that align with the SNAP-Ed Evaluation Framework.

Trinity County Health and Human Services, Public Health (LHD)

Trinity County Health and Human Services, Public Health Division (LHD) SNAP-Education will support long term community change goals and create a collective impact in the county by collaborating with community partners to identify, convene and or participate in community-wide, multi-sector coalitions and community events to improve nutrition and physical activity; create an environment that makes healthy food and beverage options the routine, easy choice; improve availability, accessibility and demand for healthy foods and beverages; ensure opportunities

for physical activity and enhance the physical and built environment around the targeted institutions where the SNAP-Ed population can be found.

Trinity County Health and Human Services, Public Health Division delivers behavior-focused nutrition education to the Trinity County CalFresh eligible population and utilizes the following approved intervention strategies:

Health and Human Services CalFresh Office (SNAP office)

- Promote nutrition and physical activity to CalFresh recipients by providing newsletters to Health and Human Services programs using appropriate and approved curriculum.
- Assess need, implement and evaluate direct nutrition and physical activity education through the Health and Human Services Department.

Coordination and Collaboration with Community Organizations

- Coordination and collaboration among the local SNAP-Ed LIAs for the formulation and implementation of the County SNAP-Ed Integrated Work Plan.
- Coordinate and collaborate with other county stakeholders to promote policy and environmental changes that support community needs and goals that will increase the sustainability of healthier eating and lifestyle choices among the SNAP-Ed eligible population through the CNAP (Trinity Coalition for Activity and Nutrition).
- Promote access and increase consumption to healthy drinking water in the community in partnership with other local agencies in events and other community and media promotion.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

Trinity County Health and Human Services, Public Health: Evaluation Narrative

The Trinity County Health and Human Services, Public Health will monitor reach, effectiveness, adoptions, implementation, and/or maintenance (RE-AIM) of changes in the environment and the level of the institutional support for the change will be documented through ATF and Progress reports methods. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, adjust PSE strategy to address challenges and potential enhancements for greater impact.

Northern Valley Catholic Social Service (NVCSS), CCC utilizes the following approved intervention strategies:

NVCSS will provide nutrition and physical activity education to promote the consumption of healthy foods and beverages and active lifestyles to family resource centers, community centers, churches, schools and low income housing. NVCSS will develop marketing strategies and PR methods to increase social awareness of the SNAP-ED program using various media and social media resources. Examples include using Facebook, Instagram, Google and local media sources such as the Trinity Journal to conduct PSA's, advertise community events and post SNAP-Ed nutritional messages using approved curriculum that revolves around the importance of living a healthy active lifestyle. NVCSS will work with the local food banks and soup kitchens such as the Trinity County Food Bank and the Douglas City Soup Kitchen in adopting SNAP-Ed policies and practices using the "Train the Trainer" method focusing around the new 2015 USDA Dietary Guidelines. Finally, NVCSS will develop, implement and evaluate household and community gardens as a novel approach to learn about foods, healthy eating and increasing physical activity.

Schools:

- Promote intersections between gardening and classroom curriculum and develop classes revolving around the importance of the consumption of healthy fruits and vegetables through gardening based activities.
- Promote a healthy active lifestyle by conducting weekly social media posts using Facebook and Instagram to discuss the importance of gardening and how to prep, cook and store garden produce, and provide links to local community resources.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Helping Families:

- Conduct single based family and parent workshops at local community centers and churches that encourage physical activity and provide intersections between gardening efforts at school and in the home.
- Promote and support environmental changes within at least one Farmers Market to encourage participation in healthy nutrition and physical activities by hosting a game and/or providing a nutritious snack.

Communities:

- Increase farmers market participation and encourage families and community members to live a healthier active lifestyle using an interactive booth during community events that discusses the reduced consumption of sugary beverages using the Rethink Your Drink curriculum.
- Support and conduct social media campaigns that focus on spreading social awareness of the SNAP-Ed program using Facebook, Instagram and other media sources that are popular among the Trinity County Community.
- Create and develop strategies using the "Train the Trainer" model to provide technical training and assistance with local food banks and soup kitchens that educate on the 2015 USDA Dietary Guidelines. NVCSS will provide these organizations with tips, tools and training on creating healthier meals using approved educational curriculum including tips on food resource management and food preparation.

Coordination and Collaboration:

- Coordination and collaboration among local SNAP-Ed LIA's for the formulation and implementation of the County SNAP-Ed Plan.
- Coordination and collaboration with local non SNAP-Ed organizations that facilitate systems and environmental changes that support the SNAP-Ed populations and increase their ability to achieve healthy eating and drinking behavioral changes that promote the prevention of obesity in Trinity County.

Northern Valley Catholic Social Service (NVCSS) CCC: Evaluation Narrative

The Northern Valley Catholic Social Service (NVCSS) will conduct a process and PSE evaluation of the identified interventions in the FFY17-19 annual plan. On an ongoing basis, NVCSS will record SNAP-Ed activities, sites, participants reached and other required elements for USDA's SNAP-Ed Activity Tracking Form. PSE changes will be documented using annual reporting on measures of reach, effectiveness, adoption, implementation and maintenance of the intervention.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Trinity County **Three-Year Integrated Work Plan FFY 2017–2019** **Rev. 5/23/2017**

The Center for Healthy Communities ("CHC," AAA PSA2-LIA) will collaborate with UC CalFresh and other unfunded partners to provide comprehensive multi-level behavior-focused strategies and intervention, which include nutrition education, physical activity, and training and technical assistance to SNAP-eligible seniors and senior congregate meal sites to improve their health and well-being. Trinity County UCCE UC CalFresh will provide an evidenced-based direct nutrition/ physical activity education to the approved senior sites. AAA PSA 2 will focus on indirect education and PSE work, primarily the collaboration with all LIAs and TCAN members to increase Senior Farmer's Market Program Coupon redemption rate in Trinity County.

AAA PSA 2 will address the following approved interventions:

- Provide ongoing training and technical assistance for staff and volunteers regarding nutrition, physical activity, gardening, food safety, and/or food resource management as they relate to the SNAP-Ed senior population. Training topics for staff will compliment Trinity County UC CalFresh direct education topics in an effort to increase senior's consumption of fruits and vegetables.
- Training and technical assistance topics will be in collaboration with Trinity County UCCE UC CalFresh direct education activities and topics and/or increase consumption of fruits and vegetables.
- Provide environmental supports and promote healthy site changes for increased consumption of healthy foods and beverages, food safety and increased physical activity among seniors at congregate meal sites.
- Coordinate and collaborate with local SNAP-Ed LIAs, other PSA 2 programs, Trinity County WIC, congregate senior meal sites, farmer's market and TCAN members to provide support for increasing the redemption rate of Senior Farmer's Market Program in Trinity County. TCAN members and farmer's market organizers have made senior farmer's market outreach a priority for this upcoming year.
- Coordinate with Trinity County SNAP-Ed LIAs to create a complete and a comprehensive county work plan.

The Center for Healthy Communities ("CHC," AAA PSA2-LIA): Evaluation Narrative

The Center for Healthy Communities ("CHC," AAA PSA2-LIA) will use a series of process evaluation protocols and fidelity measures to assess the trainings. Effectiveness of training on nutrition and physical activity will be measured by post surveys. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings and identify possible environmental change efforts.

AAA PSA 2 will collaborate with other PSA 2 programs and the California Department of Food and Agriculture (CDFA) to identify yearly coupon redemption rates of the Senior Farmer's Market Program in Trinity County.

Evaluation of environmental supports will focus on changes in at least one senior congregate meal site where nutrition education is provided. Direct nutrition education activities are to be provided by Trinity County UCCE UC CalFresh. In collaboration with Trinity County UCCE and other unfunded partners, the environmental changes resulting from the development/adoption of a healthy food and beverage policy will be measured using RE-AIM, as indicated in the SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Indicators. UCCE will be working with UC CalFresh Nutrition Education Program State Office to align, as appropriate, evaluation tools and results with the SNAP-Ed Evaluation Framework.

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, LIA partnership will assist up to 14 low-income school programs and 4 school based, community based organizations and other areas that reach CalFresh recipients in Trinity County in promoting and/or updating their school wellness policies and gardening programs, while improving the school environment to better support consumption of healthy food and beverage and promote physical activity.

SNAP-Ed State Goals

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- School Wellness policy
- Access to Healthy Foods and beverages
- Access to Physical Activity
- Access to Drinking Water

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, UC CalFresh activities will reach children and parents in at least 12 schools low-income schools with direct and indirect education; and will provide training and TA in the formulation and/or implementation of PSE site changes that support the development, and/or adoption, the site wellness policies and procedures in up to 3 Preschools/Schools and/or Afterschool sites.

b. By September 30, 2017, CCC/Northern Valley Catholic Social Service will reach the target audience at 2 schools by implementing direct education revolving around gardening based activities. Including the implementation and the continuation of PSE community gardening.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, UC CalFresh activities will reach children and parents in at least 12 schools low-income schools with direct and indirect education; and will provide training and TA in the formulation and/or implementation of PSE site changes that support the development, adoption, and/or implementation of the site wellness policies and procedures in up to 3 sites.

b. By September 30, 2018, CCC/Northern Valley Catholic Social Service will reach the target audience at 3 schools by implementing direct education revolving around gardening based activities. Including implementation and the continuation of PSE community gardening.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, UC CalFresh activities will reach children and parents in at least 12 schools low-income schools with direct and indirect education; and will provide training and TA in the formulation and/or implementation of PSE site changes that support the adoption, implementation, and/or monitoring of the site wellness policies and procedures in up to 3 sites.

b. By September 30, 2019, CCC/Northern Valley Catholic Social Service will reach the target audience at 4 schools implementing direct education revolving around gardening based activities. Including the implementation and the continuation of PSE community gardening.

****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, collaborate with LIAs and other community partners to increase awareness of and access to healthy fruits, vegetables and other healthy options, beverages and physical activity resources and promote PSE changes to at least six adult, senior, family, public assistance, emergency food assistance and community sites.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Access to Healthy Foods and Beverages
- Access to Physical Activity
- Food Security
- Nutrition Policy

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management through direct and indirect education and promote PSE changes in up to two SNAP-Ed eligible community sites like food pantries/ food banks, Head Start, low-income apartments and community-based organizations.

b. By September 30, 2017, PSA 2 AAA will collaborate with SNAP-Ed LIAs other PSA 2 programs, one congregate senior meal site, and TCAN partners to identify barriers and create a plan for seniors in redeeming Senior Farmer's Market Nutrition Coupons at local farmer's market.

c. By September 30, 2017, PSA 2 AAA will provide a minimum of two staff trainings on nutrition, physical activity, food safety, and/or gardening training, promote PSE and/or healthy site changes, and ongoing TA at a minimum of one congregate senior meal site.

d. By September 30, 2017, Trinity County Health and Human Services, Public Health Division will collaborate with at least one Health and Human Service program that works directly with CalFresh Recipients to provide nutrition needs assessment and a minimum of one class with emphasis on nutrition, physical activity, food safety, gardening, and food resource management education."

e. By September 30, 2017, CCC/Northern Valley Catholic Social Service will provide nutrition and physical activity education to promote the consumption of healthy foods and beverages to at least 2 low income housing units and family resources centers.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management education through direct and indirect education to at least two SNAP-Ed eligible community sites and provide training and technical assistance to support the development and adoption of site Wellness/nutrition policy or other PSE changes in at least one food pantries/food banks or other qualified sites.

b. By September 30, 2018, PSA 2 AAA will collaborate with SNAP-Ed other PSA 2 programs, congregate meal sites, and TCAN partners to begin to implement a plan to increase redemption rates of Senior Farmer's Market Nutrition Coupons at local farmer's market.

c. By September 30, 2018, PSA 2 AAA will provide a minimum of two staff trainings on nutrition, physical activity, food safety, and/or gardening training, promote and/or implement PSE and/or healthy site changes, and ongoing TA at a minimum of one congregate senior meal site.

d. By September 30, 2018, Trinity County Health and Human Services, Public Health Division will collaborate with at least one Health and Human Service program that works directly with CalFresh Recipients to provide a minimum of three classes with emphasis on nutrition, physical activity, food safety, gardening, and food resource management education."

e. By September 30, 2018, CCC/Northern Valley Catholic Social Service will provide nutrition and physical activity education to promote the consumption of healthy foods and beverages to at least 2 low income housing units and family resources centers.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, UC CalFresh will promote nutrition, physical activity, food safety, gardening and food resource management education through direct and indirect education to at least two SNAP-Ed eligible community sites and provide training and technical assistance to support the development, adoption, implementation and monitoring of site Wellness/nutrition policy or other PSE changes in at least one food pantries/food banks or other qualified sites.

b. By September 30, 2019, PSA 2 AAA will collaborate with SNAP-Ed LIAs, other PSA 2 programs, congregate meal sites, and TCAN partners to continue to refine and execute the plan to increase redemption rates of Senior Farmer's Market Nutrition Coupons at local farmer's market.

c. By September 30, 2019, PSA AAA will provide a minimum of two staff trainings on nutrition, physical activity, food safety, and/or gardening training, implement and monitor PSE and/or healthy site changes, and ongoing TA at a minimum of one congregate senior meal site

d. By September 30, 2019, Trinity County Health and Human Services, Public Health Division will collaborate with at least one Health and Human Service program that works directly with CalFresh Recipients to provide a minimum of four classes with emphasis on nutrition, physical activity, food safety, gardening, and food resource management education."

e. By September 30, 2019, CCC/Northern Valley Catholic Social Service will provide nutrition and physical activity education to promote the consumption of healthy foods and beverages to at least 2 low income housing units and family resources centers.

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, in an effort to extend the education to the hard to reach Trinity County SNAP-Ed eligible population, the Trinity County SNAP-Ed LIAs will collaborate in the delivery of the education and the use of approved media and public relations to promote at least four changes in community culture values that support healthy lifestyles through public service announcements, community events, newsletters and dissemination of pertinent information and resources.

SNAP-Ed State Goals:

x	**Goal 1:** Food and Beverages (Behavioral)
x	**Goal 2:** Physical Activity (Behavioral)
x	**Goal 3:** Food Resource Management (Behavioral)
x	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
x	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Access to Healthy Foods and Beverages
- Community Food System
- Food Security
- Community Outreach and Engagement
- Access to Physical Activity
- Build/re-enforce Community Partnerships and Coalitions

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective:**
    a. By September 30, 2017, use approved media and public relations to promote at least one change in community culture values that supports healthy lifestyles in one selected community through public service announcements, community events, newsletters and dissemination of pertinent information and resources.

2. **FFY 2018 (Year 2) Objective:**
    a. By September 30, 2018, use approved media and public relation to promote at least one new change in community culture values that support healthy lifestyles in one selected community through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

3. **FFY 2019 (Year 3) Objective:**
    a. By September 30, 2019, use approved media and public relation to promote at least one new change in community culture values that support healthy lifestyles in one selected community through public service announcement, community events, newsletter and dissemination of pertinent information and resources.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019, in an effort to extend the education to the hard to reach Trinity County SNAP-Ed eligible population, the Trinity County SNAP-Ed LIAs will collaborate in the delivery of the education and the use of approved media and public relations to promote at least four changes in community culture values that support healthy lifestyles through public service announcements, community events, newsletters and dissemination of pertinent information and resources.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Monthly Newsletters are created to promote local activities related to food, nutrition and food resources management education and physical activities, and provide information about how to access food resources during direct and indirect activities. The monthly newsletters will be delivered in at least 10 targeted sites as well as at the community events as a novel strategy to extend the education to the parents and families in a comprehensive approach. 2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

Tulare County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. **Jurisdiction Description**

Serving as the approximate midpoint between Fresno and Bakersfield, Tulare County is located in the heart of California's fertile San Joaquin Valley, the state's vast multi-billion dollar agricultural hub. Tulare County plays a critical role in the success of the region's agricultural economy. Among its economic and production achievements, the County led the nation in dairy production in 2014 and was named the largest agricultural producing county that same year.

In stark contrast to the agricultural industry's massive economic prominence, poverty and poor health outcomes are longstanding and pervasive among many County residents. Of the County's 446,644 residents, over half (50.9 percent) for which poverty status has been determined are under 185 percent of the Federal Poverty Level ("FPL"), while 45 of 78 census tracts in the County have greater than 50 percent of residents earning under 185 percent of the FPL.

Individuals and households are eligible for SNAP and SNAP-Ed if annual income is less than 185 percent of the FPL; schools and other organizations qualify if more than 50 percent of the census tract population in which they are located meets that same income standard. Of the 131,642 County households, 28,197 (21.4 percent) enrolled in SNAP, accounting for approximately 104,000 or 30.1 percent of residents throughout the County. Children and non-white ethnic groups comprise a particularly large proportion of those receiving SNAP, as 81.7 percent of SNAP-enrolled households had children under 18 years old, while 81.5 percent of SNAP-enrolled households were non-white (75.5 percent Hispanic/Latino origin; 2.6 percent Asian; 1.4 percent African American; 0.7 percent American Indian; and 18.5 percent non-Hispanic White).

Juxtaposed with the immense production of fruits and vegetables throughout Tulare County, many County residents face many health- and nutrition-related challenges, including obesity and lack of physical activity. According to the 2014 California Health Interview Survey, over three quarters (76.3 percent) of adults and over half (50.6 percent) of children age 12-17 in Tulare County are overweight or obese. The burden of obesity is overwhelming in low income communities; 2014 figures reveal over 80 percent (82.2 percent) of SNAP-Ed eligible adults in the County are overweight or obese. Additionally, an alarming lack of consistent physical activity is widespread in Tulare County. A 2015 County profile reveals that 20 percent of adults over age 20 report zero leisure-time physical activity, and that only slightly over one in ten of children age 2-17 (12.9 percent) are physically active more than one hour a day.

Adding to these difficulties, many Tulare County residents lack reliable access to healthy foods. Overall, Tulare County ranks among the worst counties in the state for food security. 27.1 percent of County adults are classified as food insecure (i.e., without access to a reliable source of nutritious food), and over 60 percent (60.7 percent) of SNAP-Ed eligible adults are unable to consistently find affordable fruits and vegetables in their neighborhood. The Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention ("CX3") index of Unhealthy to Healthy Food Sources in low income neighborhoods found that several low income communities throughout the County, including Terra Bella, Traver, Porterville, North Visalia and Woodlake, were without any food retail sites meeting standardized nutritional quality requirements. Instead, the majority of the sites in these communities scored poorly for both variety and quality of available fresh fruits and vegetables. Statewide surveys reveal that merely 13.3 percent of stores throughout the County display healthy exterior advertising, compared to almost 70 percent that display unhealthy advertising. Similarly, only about a third of stores surveyed (33.8 percent) offer any fresh fruit or vegetable for sale, compared to nearly 60 percent (58.9 percent) that both offer sugary drinks at check-out and are located near schools.

Lacking reliable access to healthy foods while being exposed to food environments promoting unhealthy choices, many County residents and families have developed poor dietary habits. Over 60 percent (62.2 percent) of adults consume fast food at least once per week, and nearly half (46.1 percent) consume one or more sugar-sweetened beverages per week. Further, and despite the critical role of nutrition for children and teens in development and education, only approximately six out of ten (61.8 percent) consume two or more servings of fruits per day, but nearly three out of four (72.9 percent) consume fast food at least once weekly. Simply put, the environments in many low income communities make it exceedingly difficult for residents to maintain healthy diets, and many local planning decisions, such as the proposed addition of a major fast-food franchise in the low income community of Earlimart, do little to address these challenges.

Unfortunately for many low income communities throughout the County, current weather trends further threaten food and economic security. California is experiencing a drought that is among the most pervasive, severe, and damaging in the state's modern history. The three year period between 2011 and 2014 was the driest since recordkeeping began in the 19th century, with no major change projected in the near future. The potential effects of the drought on the agricultural industry and low income, rural farming communities - communities that comprise much of Tulare County and the SNAP-Ed eligible population – are disastrous. Drought causes a significant decrease in groundwater availability, usually leading to significant cuts in crop acreage. Acreage cuts often result in decreased availability of fruits and vegetables, increased prices, and loss of jobs for farm laborers, ultimately compromising the ability for many low income residents to access and afford healthy foods.

All these factors combine to create a formidable barrier to healthy lifestyles for many SNAP-Ed eligible households in Tulare County. Now more than ever, there is an urgent need for creative and sustainable solutions to help low income communities overcome these barriers. This work plan details a tailored response to this need through nutrition and physical activity education strategies and policy, systems, and environmental ("PSE") change.

4. **Community Assessment**

Comprehensive assessment of community conditions throughout Tulare County required a multi-phase, interagency effort. Assessment efforts were conducted through the use of many evaluation tools and strategies. Additionally, much of the community assessment was informed by the SNAP-Ed County Profiles prepared by California Department of Public Health ("CDPH"), which includes county-level data from sources including but not limited to: the American Communities Survey ("ACS") five-year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, and Feeding America's Map the Meal Gap. This work plan was also informed by data made available by Health Resources & Services Administration ("HRSA").

Although several informational tools were used during the community assessment, a small number were particularly helpful throughout the process. One invaluable tool was the California Health Interview Survey ("CHIS"). As mentioned above, the CHIS revealed the great extent obesity affects both children and adults in SNAP-Ed eligible communities, as well as widespread lack of physical activity. These findings made addressing core causes of obesity, including poor diet and lack of physical activity opportunities, an overarching priority in the work plan.

Another helpful tool for the community assessment was the CX3. Mentioned earlier, the CX3 revealed the great extent of unhealthy food environments affecting many SNAP-Ed eligible communities throughout the County. As a result, the work plan strongly accounts for the need to address food access and poor food environments in low income communities.

Finally, community forums were essential to assess community needs directly from community members. These forums revealed a strong desire within communities to increase access to healthy foods, as well as to improve food resource management skills. Consequently, these two concerns were

emphasized and provided for across all objectives. Additionally, the community forum revealed a deeply held aspiration for community members to have a voice in how their community is improved. Because this aspiration is foundational to furthering all primary local objectives, it is highlighted as this work plan's overarching community change goal, detailed below.

5. **Community Change Goals**

Based on our community assessment, previous work plans, and in-depth discussions with between local implementing agencies ("LIAs"), community organizations, and community residents, the Tulare County Nutrition Education & Obesity Prevention ("NEOP") program identified a primary community change goal for this work plan: lasting empowerment of low income communities in order to support, sustain, and further existing and planned nutrition, physical activity, and PSE interventions.

The work plan group acknowledged that even with specific local objectives in place to reduce obesity in low income communities, long-term change would only be possible through extensive community engagement and empowerment. Only with support of the community can activities and strategies intended to reduce obesity and improve nutrition be delivered with maximum efficiency and effectiveness.

With this community change goal in mind, the LIA team developed several activities specifically supporting community engagement and empowerment through the three year work plan, including:

· provide technical assistance/support to local decision makers for strengthening existing school wellness policies so that future wellness policies specifically optimize nutrition and physical activity opportunities

· identify bilingual adult community empowerment curricula/opportunities preparing community champions to strengthen efforts to reduce obesity and improve nutrition

· target stakeholders through media efforts to support the development of a food systems shift that makes healthy foods for schools affordable and accessible

· establish community forum(s) within target communities to give community members a voice in how to improve the health- and nutrition-related aspects of their communities

Because community engagement and empowerment is only part of the structure necessary to reduce obesity in low income communities, the LIA team developed four primary local objectives for the 2017-2019 Integrated Work Plan. These objectives, **to be completed by September 30, 2019**, specifically address the local needs that were revealed by the community assessment: reducing food insecurity, improving access to healthy foods and beverages, increasing opportunities for physical activity, and developing strong food resource management skills. The four primary local objectives are:

1. Provide technical support, assistance, and training in a minimum of three school districts to revise and strengthen existing school wellness policies to focus on: nutrition education, access to and/or appeal of healthy foods, beverages, and physical activity, and improved engagement opportunities for parents and community members.

2. Develop knowledge and skills for community engagement/spokesperson training and nutrition and physical activity education in at least one community to embed community champions that will participate in and support long-term community efforts relating to increased consumption of healthy foods, physical activity, and feasible food resource management.

3. Support the development and implementation of an institutional food buying cooperative pilot targeting at least six school districts in order to increase access to healthy foods.

4. Create healthier retail environments at 10 sites in 8 communities by closely working with small local food retailers to modify participating sites to: offer regular nutritional education, create environmental supports to increase access to healthy foods, and provide informational tools to support consumers to increase consumption of healthy food and beverages.

PSE Focus

Recognizing the importance of operating far up the social-ecological model, a strong commitment to establishing positive and lasting PSE change underlies each of the primary objectives:

· *For Objective #1*, it was acknowledged that school wellness policies have the potential to strongly impact the health and nutrition of County SNAP-Ed students, who are consistently documented as lacking access to healthy foods and adequate opportunities for physical activity. Targeting these issues at the policy level through this objective allows for widespread, institutional change affecting a population particularly vulnerable to nutrition-related issues.

· *For Objective #2*, it was determined that many of the low income communities in Tulare County that are most affected by nutrition-related issues are not lacking collective motivation to address these issues, but instead are missing the technical skills needed to most effectively champion for positive

community change. Through the community empowerment training this objective accounts for, these communities will now be supported by champions who have the skills and motivation to make lasting PSE changes (e.g. Farmer's Markets, community gardens, improved retail sites, etc.).

· *For Objective #3*, it became clear that school age children in the County often lack access to healthy foods, and that schools often lack the capacity to provide healthy meals to students. This objective represents a systems shift in the way schools view and make food purchasing decisions, providing for increased access to healthy foods.

· *For Objective #4*, and in response to the overwhelming lack of access to healthy retail environments in many low income communities, it was determined that direct environmental modification of retail sites should be prioritized. This objective provides for widespread environmental change of food retail environments throughout low income communities to support healthy purchasing decisions.

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

The Tulare County CNAP group includes Food and Nutrition Service ("FNS") funded partners as well as unfunded partners that specialize in food programs, nutrition education, and/or physical activity promotion throughout SNAP-Ed eligible communities. LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc.

The overall mission of the Tulare County CNAP group is to advance the goals of SNAP-Ed: improving nutrition, increasing opportunities for physical activity, and improving food security through nutrition education and PSE modifications in low income communities. Additionally, the CNAP group is responsible for furthering this work plan's community change goal of increasing community empowerment in low income communities, which reflects and supports all overarching SNAP-Ed goals. The CNAP group convenes a minimum of four times per year to develop a strategic plan enumerating target objectives. Additionally, as detailed below, a CNAP subcommittee will be formed to complete several activities in the work plan.

In addition to CNAP, partners are represented in many local organizations, including: University of California Cooperative Extension ("UCCE"), Tulare County Health & Human Services Agency, FoodLink for Tulare County ("FoodLink"), Family Health Care Network ("FHCN"), Healthy Retailer Committee, Kaweah Delta Health Care District ("KDHCD"), Kaweah Delta Foundation ("KDF"), ProYouth HEART, Tulare County Office of Education ("TCOE"), Special Supplemental Nutrition Program for Women Infant & Children ("WIC"), Network Leaders on the Move ("NLOM"), and Woodlake Unified School District ("WUSD").

7. **Key Messages.**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
X	Sodium & Potassium				
	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curricula and materials used will be pre-approved by a supervisory agency or LIA partner and taken from the California SNAP-Ed Integrated Curricula List. All delivered material will be audience appropriate. Examples of online sources of curriculum and materials may include but not be limited to: USDA SNAP-Ed Connection, SNAP-Ed Strategies & Interventions: An Obesity Prevention Toolkit for States, CDPH Nutrition Education Obesity & Prevention Branch ("NEOPB"), and UC CalFresh Nutrition Education Program.

9. **Intervention and Evaluation Plan Narrative Summary**

A. Intervention Plan

From 2017-19, the Tulare County LIA team will implement a multi-level intervention plan targeting several key underlying objectives. Key components of the intervention plan include: sustainable behavioral change through nutrition education and physical activity opportunities, coordination of community events that promote healthy lifestyles, making available ongoing training and technical assistance to partners and community members to enhance the opportunity for healthy lives, and comprehensive media, public relations, and communication strategies that facilitate work plan implementation. All intervention strategies will be evidence-based and/or practice-based in accordance with CDPH standards, and all partners will use a mix of strategies categorized as either Community/Nutrition Education and Physical Activity Direct ("CED"), Community/Nutrition Education and Physical Activity Indirect ("CEI"), Media, Social Media, Public Relations, and Messaging ("MPR"), Coordination and Collaboration ("C&C"), or Training and Technical Assistance ("TTA").

Tulare County

Three-Year
Integrated Work Plan
FFY 2017–2019

As a multi-level, multi-organizational effort, each member of the LIA team will take the lead on activities particularly suited to their expertise:

- UCCE: UCCE is an established leader in developing and providing quality nutrition and physical activity education to school-age children. Consequently, UCCE will take the lead in SNAP-Ed eligible schools to deliver nutrition-related curricula to parents and students, targeting the family as the unit for behavioral change. UCCE also has significant experience in promoting PSE change, and thus will take the lead on implementing "Smarter Lunchrooms Movement" ("SLM") in schools and the Shaping Healthy Choices Program (SHCP) in qualifying schools. SHCP is designed to improve children's health through a multi-component, school-based approach. (UCCE)
    - UCCE collaborates with TCOE to coordinate nutrition education in schools, as both organizations target students and parents. UCCE will provide both youth and adult education in schools and approved community settings in communities where it is the designated school agency. In those communities where TCOE is the lead school agency, UCCE will provide adult education (series and single session) at non-school sites, including churches, family resource centers and other SNAP-Ed eligible organizations.
- LHD: NEOP is committed to designing, implementing, and evaluating interventions to help low income County residents live healthy lives. To move toward this goal, LHD's education team will work directly with local businesses to create healthier retail environments in low income communities. The LHD administration team will take the lead on developing the work plan, as well as facilitating and coordinating the efforts of the LIA team.
- FoodLink: FoodLink, a nonprofit food bank, works to end hunger and food insecurity throughout the County. As a local leader in the development of food resource management strategies and food distribution related programs, FoodLink will take the lead in developing the foundation for the institutional food buying cooperative pilot.
- KDF: KDF works to instill healthy nutrition and physical activity habits in young children (i.e. age 0-5) and their families. Given this role, KDF will take the lead on delivering nutritional education to this population, as well as coordinating community efforts and events to promote healthy lifestyles.
- TCOE: As an educational provider, TCOE develops and delivers high-quality nutrition and physical activity education programs in school settings. For this work plan, TCOE will take the lead in nutrition education, physical activity opportunities, and coalition building for school age children and their families.
- FHCN: FHCN's focus areas include increased consumption of healthy foods, increased opportunities for physical activity, and improved food management skills. FHCN will be responsible for providing nutrition and physical activity education across all age groups, as well as PSE efforts supporting healthy choices in targeted SNAP-Ed eligible locations.

Collaborative Focus

In the work plan development process, all partners acknowledged the complexity of the issues facing the County require carefully coordinated efforts to best work toward goals. Consequently, all objectives were viewed through a lens of open collaboration and support, and designed to be shared among

several partners to optimize efficiency and effectiveness. The following highlights a sample of the activities to be implemented through close collaboration among partners:

Objective #1: Strengthening School Wellness Policies

- identify exemplar wellness policy content for use in wellness policy strengthening opportunities
- develop communication material for promoting exemplar wellness policy content or participation in wellness policy strengthening activities
- identify tool to assess strength of school wellness policies
- complete assessment of a minimum of three school wellness policies
- analyze data from assessment and complete a report from findings
- provide technical assistance/support to wellness policies committees for strengthening wellness policies

Objective #2: Developing Community Champions

- identify bilingual adult community empowerment curricula/opportunities
- recruit eligible community residents from nutrition and physical activity education opportunities and coordinated community events, including:
    - a minimum of 10-15 interactive booths, exhibits, informational displays at qualifying health fairs/community/school sites targeting youth and adults
    - at least one structured physical activity event to promote the consumption of healthy foods/beverages and physical activity opportunities for youth and adults

Objective #3: Supporting the Development of Institutional Food Buying Cooperative Pilot

- research and prepare report of best current practices on topics including logistics, economic, strategic planning, implementation, and potential distribution sites/vendors to inform plan for institutional food buying cooperative pilot
- support media efforts for the institutional food buying cooperative pilot
- implement institutional food buying cooperative, targeting at least six school districts
- collect and evaluate data on institutional food buying cooperative pilot

Objective #4: Creating Healthy Retail Environments

- promote community engagement through forum(s) within target communities to promote healthy food environments
- coordinate store tours for County students at select retail sites to promote healthy food choices

In addition, all objectives provide for the development of new and/or strengthening of existing partnerships between LIAs and residents, organizations, and leaders within communities. Throughout the work plan development process, LIAs made a consistent effort to ensure the primary objectives clearly reflected and advanced overall state level goals for SNAP-Ed.

A. Evaluation Plan

This work plan will be evaluated by collecting qualitative and quantitative program data, and using the following CDPH-approved strategies, tools, and methodologies:

- Reach, Effectiveness, Adoption, Implementation, Maintenance ("RE-AIM") framework;
- Surveys (pre and post, cross-sectional [i.e., baseline and/or post only], and pictorial assessment);
- Cost-benefit analysis (for relative costs for alternatives in objective #3);
- UC CalFresh Evaluation tools (for evaluating behavioral change in UCCE-led intervention activities);
- Plan, Shop, Save, & Cook ("PSSC") Pre and Post evaluation instrument (to measure behavioral change in meal planning and preparation, food safety, food security, label reading, and healthy food selection/choices);
- Making Every Dollar Count ("MEDC") retrospective instrument (to measure behavior change in food resource management, setting personal goals, and ability to identify community resources); and
- Teacher Observation Tool ("TOT") & Teacher Tasting Tool ("TTT") (to capture behavioral changes in school age children).
- SHCP School Health Checklist (UCCE)

Per SNAP-Ed guidelines, LHD must collect data regarding following activities:

1) Process evaluation or activity tracking through activity tracking forms ("ATFs"), which document data including number of the implemented activities, implementation sites, and number of eligible community members reached

2) Community assessment activities informing work plans and activities, such as the CX3

3) Impact outcome evaluation using approved surveys

4) Progress toward PSE change

The social-ecological model will serve as the framework through which the LIA team collects, evaluates, and interprets program data and outcomes. As mentioned earlier, the LIA team was mindful to ensure many levels of the social-ecological model were reached through work plan activities. Direct nutrition education activities, including single and series classes, directly operate on an individual level to improve nutrition and physical activity. Indirect nutrition activities, including physical activity events and food demos held at schools or in the community, function at the environmental level to modify the settings that targeted communities are frequently exposed to in order to improve nutrition. PSE changes, such as revised school wellness policies or a food purchasing system shift in schools, operate on the sector level to promote healthy behavioral change.

It is anticipated that evaluation reports from this work plan will inform future intervention strategies. Particular outcomes of interest include behavioral and institutional change, total numbers reached through interventions, and metrics detailing comprehension and retention of delivered nutrition and physical activity education.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, provide technical support, assistance, and training in a minimum of three school districts to revise and strengthen existing school wellness policies to focus on: nutrition education, access to and/or appeal of healthy foods, beverages, and physical activity, and improved engagement opportunities for parents and community members.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Strengthening school wellness policies to increase access to:
    a. opportunities for physical activity; and
    b. healthy foods and beverages
- Community garden
- Smarter Lunchrooms Movement
- School gardens, SLM, Physical Activity (UCCE)

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, SNAP-Ed funded partners will participate in at least three wellness policy trainings to support the development, evaluation, and/or awareness related to school wellness policies and procedures that emphasize increased access to healthy foods and beverages, increased opportunities for physical activity, and support and encourage open-communication between families and schools surrounding health-related issues.

b. By September 30, 2017, SNAP-Ed funded partners will collaborate through at least four CNAP subcommittee meetings to identify and/or create exemplar school wellness policy content related to increased access to and consumption of healthy foods and beverages, access to and/or appeal of physical activity opportunities, and sustained engagement opportunities for parents and community members.

2. **FFY 2018 (Year 2) Objective(s):**

a. By September 30, 2018, SNAP-Ed funded partners will collaboratively assess school wellness polices for a minimum of three school districts using identified assessment tool.

b. By September 30, 2018, SNAP-Ed funded partners will provide a report of their assessment results to a minimum of three school administration boards and/or wellness policy councils.

c. By September 30, 2018, SNAP-Ed funded partners will build awareness through SNAP-Ed funded activities for parent and community member participation on wellness policy committees in a minimum of three school districts.

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2019, SNAP-Ed funded partners will host one interactive workshop that will engage a group of a minimum of 10 individuals, potentially including parents, food services directors and school nurses, to review best practices of school nutrition policies, school gardens, farm to school opportunities, and structured recreation activities.

b. By September 30, 2019, SNAP-Ed funded partners will provide technical assistance to a minimum of three wellness policy councils for addressing findings from school wellness policy assessment, leading to at least one recommended policy change in one district.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Tulare County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019): **By September 30, 2019**, provide technical support, assistance, and training in a minimum of three school districts to revise and strengthen existing school wellness policies to focus on: nutrition education, access to and/or appeal of healthy foods, beverages, and physical activity, and improved engagement opportunities for parents and community members.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, SNAP-Ed partners will develop knowledge and skills for community engagement/spokesperson training and nutrition education in at least one community to embed community champions that will participate in and support long-term community efforts relating to increased consumption of healthy foods, physical activity, and feasible food resource management.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Supporting community empowerment for sustainable, long-term environmental change
- Farmers markets
- Increased access to EBT at farmers markets
- Support of school wellness policies
- Retail promotion of Harvest of the Month produce

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, SNAP-Ed funded partners will select at least one bilingual adult community empowerment training program.
    b. By September 30, 2017, SNAP-Ed funded partners will collaboratively recruit a pool of a minimum of 100 SNAP-Ed eligible community residents from nutrition and physical activity education opportunities for enrollment in selected program.
2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, SNAP-Ed funded partners will collaboratively facilitate the delivery of selected program to a minimum of 20 residents from recruited pool to become champions for community empowerment in a minimum of one identified community.

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019, SNAP-Ed partners will collaboratively support the development and implementation of an institutional food buying cooperative pilot targeting at least six school districts in order to increase access to healthy foods.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- "California Thursday" School Policy Adoption

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, SNAP-Ed funded partners collaboratively strengthen relationships with a minimum of six school districts to support development of an institutional food buying cooperative pilot.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, SNAP-Ed funded partners will develop institutional food buying cooperative plan of action tailored to schools that is based on sales data, existing relationships, current best practices, and helps increase access to healthy foods.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, SNAP-Ed funded partners will establish an institutional food buying cooperative pilot in at least one school district, providing opportunity to purchase lower cost select Harvest of the Month fruits and vegetables.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, SNAP-Ed partners will create healthier retail environments at 10 sites in 8 communities by closely working with small local food retailers to modify participating sites to: offer regular nutritional education, create environmental supports to increase access to healthy foods, and provide informational tools to support consumers to increase consumption of healthy food and beverages.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
	Goal 4: Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy checkout aisles
- Increasing of healthy and reduction of unhealthy advertising in retail locations
- Improved access to healthy foods and beverage

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
   a. By September 30, 2017, SNAP-Ed partners will collaborate to design and create healthy food and beverage advertising to be placed in a minimum of six target retail sites to increase demand for healthy foods and beverages.
   b. By September 30, 2017, SNAP-Ed partners will establish at least one new partnership with a retail site in one community.

Tulare County

Three-Year
Integrated Work Plan
FFY 2017–2019

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, SNAP-Ed partners will coordinate with retailers at a minimum of six sites to facilitate the display of healthy food and beverage advertising.
   b. By September 30, 2018, SNAP-Ed partners will collaboratively plan and develop the implementation of a healthy checkout aisle in a minimum of one targeted retail site.
   c. By September 30, 2018, SNAP-Ed partners will collaboratively identify targeted youth in a minimum of two schools for store tours to promote awareness of healthy foods and beverages within retail sites.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, SNAP-Ed partners will at least establish one additional healthy checkout aisle in target retail site.
   b. By September 30, 2019, SNAP-Ed partners will complete community re-assessment in targeted communities using CX3 methodology.
   c. By September 30, 2019, SNAP-Ed partners will collaborate to conduct a minimum of one forum to facilitate community engagement on food environments in a target community.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019, SNAP-Ed partners will create healthier retail environments at 10 sites in 8 communities by closely working with small local food retailers to modify participating sites to: offer regular nutritional education, create environmental supports to increase access to healthy foods, and provide informational tools to support consumers to increase consumption of healthy food and beverages.

	Total Direct Costs:	**$131,182**	**$1,115,970**	**$888,784**	**$1,019,966**	-8.60%
9	Indirect Costs*** Indirect Cost Rate= 15.31%	$10,263	$93,576	$54,180	$64,443	-31.13%
	Total Federal Funds	**$141,445**	**$1,209,546**	**$942,964**	**$1,084,409**	-10.35%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	Prime has subcontracted out more activities and less staff are needed.
2	Non-Capital Equipment/Supplies	Prime has subcontracted out more activities and less supplies are needed.
3	Materials	Prime has subcontracted out more activities and less materials are needed.
4	Travel	Travel & Per Diem was reduced since the number of FTEs was decreased.
5	Building/Space	
6	Maintenance	Maintenance is calculated by FTE, and since the number of FTEs was decreased, the cost decreased.
7	Equipment and Other Capital Expenditures	Computers were purchased in previous fiscal year, and there are no plans for additional equipment.
8	Contracts/Sub-Grants/ Agreements**	
9	Indirect Costs	State approved indirect cost rate decreased and this impacted the indirect costs line.

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

A			FoodLink	FoodLink will promote nutrition education and physical activity focus on SNAP – Ed eligible food-insecure adults and families. Food Links' goal is to promote the consumption of healthy foods and beverages, improvement in food resource management skills in an effort to attain its mission to end hunger and to leverage the power of food to build health, skills, and community through nutrition education. Subcontractor will reach approximately 200 SNAP-Ed eligible, food-insecure and food pantry adults through nutrition education and food resource management ("Cooking for Health Academy"). FoodLink will take the lead on developing the foundation for an institutional food buying cooperative in select schools. FoodLink will host Food Day event in the month of October, reaching 300 individuals.	$35,000	
B			Family HealthCare Network	Family HealthCare Network (FHCN) will focus on SNAP – Ed eligible adults and families to promote nutrition education and physical activity. FHCN's goal is to promote the consumption of healthy foods and beverages, improvement in food resource management skills and increases in physical activity to improve health related behaviors to the counties Cal Fresh eligible populations. Subcontractor will reach 100 adults through 10 four session nutrition education classes,400 adults through 40 single session nutrition education classes, and 25 youth through 10 two session classes in 2017. Subcontractor will conduct multiple community health fairs promoting nutrition education and obesity prevention, reaching 2,000 individuals. Subcontractor will participate and collaborate in 5 interactive booth(s) or display(s) at qualifying community events to promote the consumption of healthy foods and beverages, improvement in food resource management, and/or improved food security reaching 1,000 eligible SNAP-Ed adults and families. Subcontractor will coordinate the ReThink Your Drink Event promoting the consumption of healthy beverages, reaching 2,500 individuals.	$74,500	
C			Tulare County Superintendent of Schools	Subcontractor will lead nutrition education strategies targeting school age children and their families. Subcontractor will provide leadership through Sports Play and Active Recreation for Kids (SPARK) training for school and after school staff, reaching 15 individuals. Subcontractor will provide approved nutrition education curriculum training to 100 K-12 teachers. Subcontractor will provide direct education through single sessions to 2,860 individuals. Subcontractor will coordinate a pumpkin patch activity, promoting a mix of physical activity and nutrition education. Subcontractor will assist eligible schools in planning a Farm to School program, through which local fruits and vegetables are purchased and prepared in coordination with nutrition education based on Harvest of the Month ("Tasting Trios"), reaching over 2,000 students. Subcontractor will coordinate a physical activity promoting event ("MyPlate Color Run"), reaching 500 individuals. Subcontractor will hold five interactive booths, reaching 400 individuals. Subcontractor will coordinate a youth engagement project integrating nutrition education and leadership development, reaching 100 youth. Subcontractor will support the development of school gardens at selected sites, and deliver related nutrition education, reaching 500 students. Subcontractor will provide newsletters promoting healthy lifestyles to students, families, and school staff, reaching 7,000 individuals	$310,000

1			CMTY EDUC SUPV 2	Teresa Spicer	20.00%	80.00%	$51,495	0.8	$41,196.00	65.18%	$26,851.55	$13,609.60	$68,048	Average percentage of staff time on administrative duties vs. direct delivery is 11.25% and 88.75%, respectively. We receive administrative support from the county office support staff, which allows our educators to devote less of their time on administrative duties and more time towards direct program delivery. Support provided to us by our county support staff includes purchasing and procurement of approved SNAP-Ed supplies and materials; photocopying; and data entry. The county office support is provided to our program in-kind, thus making our overall administrative percentage relatively low.

Definition and basis for calculations of benefit rate(s):
Describe what is covered in the benefit rate for your agency.

Includes payroll taxes, medical/dental benefits, and retirement as a percentage of salaries. The projected FY17/18 composite benefit rate is .4264 for group A, and .6438 for group C; The FY 18/19 composite benefit rates are .4477 for Group A and .6759 for group C. The average rate listed on the budget is for calculation purposes only and is an estimate of the combined rates.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Tuolumne County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

County Name: Tuolumne County

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension-Central Sierra)
X	California Department of Public Health: CDPH: (Tuolumne County Public Health Department: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.

[2] Defined as not running out of food at the end of the month.

[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.

[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Tuolumne County is a sparsely populated, but geographically large, rural county in the Sierra foothills of California, approximately one hundred fifty (150) miles east of San Francisco. According to the 2010 US Census, Tuolumne County encompasses 2,220.88 square miles with a population density of 25 people per square mile. There are 18 towns and 13 unincorporated communities in the county, the U.S. Census Bureau estimates that the population was 53,831 in 2014. Yosemite National Park is within the eastern bounds of Tuolumne County—47.9 miles from Sonora, the county seat— providing residents with a variety of outdoor recreational opportunities, provided they have the ability and means to access the park. Tuolumne County is surrounded by six counties: Alpine to the north, Calaveras to the west, Stanislaus to the southwest, Merced and Mariposa to the south, and Mono County to the east.

The main transportation routes are California State Routes 49, 108, and 120. Tuolumne County Transit's public transportation system connects Sonora, Jamestown, Tuolumne, Columbia, Standard, Twain Harte, Mi Wuk Village, and Sierra Village. It should be noted that data indicates that the senior population in Tuolumne County is dissatisfied with the public transit service's current ability to meet its needs, citing these reasons: transportation not always available/difficult to obtain, more information is needed, and service, routes and frequency are poor.

Areas above the snow line, such as Dardanelle, Pinecrest, Strawberry, and Long Barn, in northern Tuolumne County, and the flatland areas of Chinese Camp, Moccasin, and Big Oak Flat in the southern area of Tuolumne County have the potential to be underserved, as they are not only rural, but remote and sparsely populated. According to Feeding America (feedingamerica.org), rural areas face challenges such as unemployment, underemployment, lower education levels, inaccessibility to public transportation, and less affordable child care. Because Tuolumne County is a rural county overall, these challenges have the potential to affect a large percentage of our population.

The county's median household income between 2010-14 was $48,493 compared to $61,094 for California, and 14.7% of Tuolumne's residents were living below the poverty level from 2010-14, slightly lower than 14.8% for California, but the highest rate compared to similar Sierra foothill counties, Amador and Calaveras. Of all the Sierra foothill counties, Tuolumne County had the highest child poverty rate of 19.5%. The unemployment rate for Tuolumne County is 7.2%, which is higher than California's rate of 6.3%, according to the Employment Development Department's March 2016 data. Further, there are a greater number of homeless individuals living in Tuolumne County than in other Sierra foothill counties.

The primary language spoken is English, and the majority of the county's residents are White (77.4%), with Hispanics and Latinos comprising the next largest racial demographic (17.4%), according to the U.S. Census data for 2010-2014. Statistics indicate that 6.9% of the Hispanic/Latino population in Tuolumne County speaks Spanish as their primary language, pointing to a potential need for SNAP-Ed programs to be delivered in Spanish.

The rate of high school graduation in Tuolumne County is 89.6% compared to 86.3% for the state, but just 19.8% of residents 25+ years of age have a Bachelors' degree or higher. According to the SNAP-Ed County Profiles 2015, 31.2% of Tuolumne County's residents are eligible for the SNAP-Ed program. Of the 15,872 eligible individuals, the vast majority are identified as White (81.8%), with the remaining eligible individuals identified as Hispanic (9.2%), Multiracial (3.3%), Unknown (2.7%), American Indian/Alaska Native (1.9%), Asian (0.6%), and African-American (0.5%). Data also indicate that 5,559 people (11%) in Tuolumne County participated in the CalFresh program and 2,845 (46.5%) students were eligible for Free/Reduced Price Meals. According to the

2013-14 California Food Policy Advocates' County Profiles, 1,846 low-income students (65%) were reached by free school lunches, and 835 (29%) were reached by free school breakfasts in the county. Free summer lunches were served to children at 5 facilities during summer 2015. A total of 3,156 free lunches were served to children, as well as a total of 2,522 free snacks. Tuolumne County has 23,000 low-income food-insecure households (54%) compared to (38%) in California. The percentage of children living in food-insecure households in Tuolumne County is 24.5%, according to 2012 kidsdata.org, a program of the Lucile Packard Foundation for Children's Health.

Of the 11 census tracts in Tuolumne County, only one is SNAP-Ed eligible (≥50% incomes ≤185% FPL); however, 63.4% of the county schools, or 19 of 30 total schools, are SNAP-Ed eligible (≥ 50% FRPM Enrollment, 2012). The prevalence of overweight/obesity for the adult population of Tuolumne County is 62% for the general population and 61.3% of the SNAP-Ed eligible population segment, compared to 62.5% (adults) and 67.3% (SNAP-Ed adults) in California. Of the low-income children in Tuolumne County between 2-11 years of age, 27.2% are overweight/obese. Of the low-income children aged 12-17 years, 16.7% are overweight/obese and 17.8% are obese. Although 30% of Tuolumne County children are overweight or obese, more Tuolumne County students are at a healthier weight than demographically similar counties and the state, according to the *2015 Tuolumne County Community Health Assessment*.

Figures related to the amount of fruits and vegetables being consumed by Tuolumne County's SNAP-Ed eligible population indicate that there is considerable opportunity to increase consumption of produce to achieve the recommended number of daily servings per person. According to the 2014 SNAP-Ed County Profiles, of the SNAP-Ed eligible adults polled, a mere 28.5% indicated that they had consumed three or more servings of fruits and vegetables the day prior to being polled. The 2015 SNAP-Ed County Profiles show that 78.9% of children (ages 2-11) consumed two or more servings of fruit per day, and 72.6% of children and teens (ages 2-17) did the same.

In 2014, nearly one-third (32%) of children and teens age 2-17 consumed one or more sugar-sweetened beverages each day (lower than the California state rate of 41% for this age group), according to 2014 SNAP-Ed County Profiles. The 2015 County Profiles report that adults who consume one or more sugar-sweetened beverage per week is24.2%. Almost half (48.2%) of Tuolumne County adults eat fast food one or more times per week, and 57.1% of children ages 2-17 eat fast food with the same frequency. California state statistics show that the incidence of adults eating fast food at least once per week is 62.7% with a slightly higher percentage of SNAP-Ed adults engaging in the same behavior (67.5%). Polling of children and teens (2-17 years) shows that 72.4% of them consumed fast food at least once per week.

For the past five years, 43% or fewer of Tuolumne County fifth, seventh, and ninth grade students met all fitness standards at their grade level, according to the 2013 Tuolumne County Community Health Assessment. Over the past five years, the percentage of students meeting the fitness standards has risen, which may be attributable to the *Fit for the Future Program* that focuses on physical fitness and healthy diet.

The County receives funding for up to 1,250 people to utilize WIC, the special supplemental nutrition program for Women, Infants, and Children. The program provides for supplemental foods, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, and for infants and children up to age five who are found to be at nutritional risk. Tuolumne County has often met and/or exceeded their allocation for services, but a recent trend shows fewer people utilizing WIC services by anywhere from 2-15%, depending upon the timeframe looked at.

There are many factors that may contribute to this: birth rate is declining; more clients are on food stamps, a program that is not as time consuming to utilize as WIC; some clients need to bring information monthly, which can be overwhelming.

The figures related to Tuolumne County residents' access to stores that sell good quality fresh fruits and vegetables indicate an opportunity for improvement in retail stores, particularly convenience stores. *According to Healthy Stores for a Healthy Community*, which, in 2013 polled stores in Tuolumne County that sell tobacco, 70% of these retailers sell any fresh fruit or vegetables but only 34.3% of them sell a good selection of good quality fresh fruits and vegetables. In low income areas, none of the stores sell a good selection of good quality fresh fruits and vegetables, but data still indicates that 65% of SNAP-Ed adults can always find fruits and vegetables in their neighborhood. Unfortunately, 80% of retailers sell sugary drinks at the check-out, and 71.4% of these stores are within 1,000 feet of a school. Within the county, 42% of stores accept CalFresh or WIC, and among the stores that accept CalFresh, only 41.2% sell a varied and ample selection of good quality fresh fruits and vegetables. There are, however, 10 full-service grocers that do carry a good selection of high quality produce, and only 8.7% of the county's residents have limited access to healthy foods. These stores are spread throughout the county and are accessible to the majority of residents except those living in the most remote areas. Tuolumne County also has five farmer's markets, and one of these accepts EBT.

There are 13 recreational facilities available to Tuolumne County's 53,831 residents. The percentage of children and teenagers (ages 1-17 years) with a park or open space within walking distance of their home is stated as 60.8%, which is significantly lower than 84.7% statewide. Since this statistic for the county has been created using data combined with the other foothill counties of Calaveras, Amador, Inyo, Mariposa, Mono, and Alpine, it is not necessarily accurate for the county of Tuolumne. There is a possibility that the actual percentage is lower than the amount stated, but according to the 2015 SNAP-Ed County Profiles, 83.3% of children/teens (2-17 years) visited a park, playground or open space the month prior to being polled so there is reason to be optimistic that the number is accurate. LIAs will continue to work with schools to adopt Wellness Policies that support opportunities for physical activity before, during, and after school to help offset any lack of recreational infrastructure in the community.

The rates of certain chronic diseases in the county are slightly lower than those seen on average in California. In 2013 these disease rates were found among Tuolumne County residents: diabetes (6%), compared to 9% for California; congestive heart failure (68%), compared to 69% for California; and hypertension (73%), compared to 74% for California. All of these diseases are influenced to some extent by a person's diet. Further, according to the American Cancer Society, recent studies show that with increased weight comes an increased risk of developing a range of cancers, such as breast, colorectal, uterine, kidney, and others. Tuolumne County faces a special burden of chronic diseases and disability, due to the larger elderly population, according to the 2013 Tuolumne County Community Health Assessment.

4. **Community Assessment**

According to the Robert Wood Johnson Foundation, Tuolumne County ranks 22 out of California's 57 counties for overall health outcomes, which measures how long people live and how healthy people feel. Further, Tuolumne County ranks 20 out of California's 57 counties for overall ranking of health factors, which measures health behaviors, clinical care, social and economic, and physical environment factors. The County has a better state average ranking for obesity: 18.7% body mass for Tuolumne County, compared to 24.8% for California. However, Tuolumne County lags slightly behind the state in physical activity, according to the 2013 Tuolumne County Community Health Assessment. For example, 72.5% of Tuolumne County residents reported walking for transportation, fun, or exercise, compared to 77.2% of people in the state. Only 13.5% of Tuolumne County residents reported engaging regularly in vigorous physical activity, compared to 16.5% of the state. Although Tuolumne County fares better than other counties or the state for certain markers of health, data referenced in this section and in the above Jurisdiction Description reveal important opportunities for the SNAP-Ed program to improve the health and wellness of Tuolumne County's SNAP-Ed eligible population.

In addition to sources already noted, the following data sources were used to determine the priorities outlined in the FFY17-19 IWP:

1. Fitnessgram data from the California Department of Education (CDE)
2. California Department of Public Health (CDPH) County Health Status Profiles 2015
3. CDSS data on CalFresh participation (Interactive web-based spreadsheet with County data)
4. Hunger in America – Map the Meal Gap 2015
5. California Department of Education/Nutrition Services Division
6. California Department of Education/Physical Fitness Test 2014-15
7. Children Now, California County Data Book Information
8. California Food Policy Advocates 2015
9. Feeding America – Rural Hunger Facts
10. Let's Get Healthy California Task Force Report
11. 2015 SNAP-Ed County Profile
12. US Census Bureau
13. 2013 Tuolumne County Health Assessment, prepared by Sonora Area Foundation in conjunction with the Sonora Regional Medical Center/Adventist Health System and the County of Tuolumne
14. Healthy Stores for a Healthy Community (HealthyStoresHealthyCommunity.com)

Preventing Childhood Obesity in Early Care and Education Programs, published by the American Academy of Pediatrics, American Public Health Association, and National Resource Center for Health and Safety in Child Care and Early Education was also reviewed to inform the FFY 2017 work plan, specifically to emphasize the importance of early childhood nutrition education.

The assessment data used to identify intervention strategies includes information on demographics, health, dietary and physical activity habits, food insecurity rates, community, and environmental settings. By utilizing a comprehensive set of assessment measures (including talking with community partners and drawing upon several years of combined experience in delivering SNAP-Ed interventions) to inform the development of the work plan, the Tuolumne County LIAs have identified target populations and areas of high need and designed a strategy to implement a coordinated set of interventions in mutually-supportive settings in order to provide long-term benefits to the SNAP-Ed eligible population.

The data reviewed from all cited sources indicates that the Tuolumne County's SNAP-Ed eligible population can benefit from support in the following areas:

- Nutrition and physical activity education to decrease the consumption of fast food, increase consumption of produce, and increase physical activity, with the goal of reducing the prevalence of obesity and related chronic diseases among SNAP-ED eligible adults and youth. With both adults and youth in the county consuming fast food and sugar-sweetened beverages more than once weekly, and a high percentage (77%) of children and teens (2-17 years) not engaging in physical activity at least one hour daily, both LIAs will focus a majority of their efforts working with youth at preschools (n=10), K-12 schools (n=13), and youth centers (n=4). The importance of targeting this age group is underscored by research which indicates that education and behavior modification in early childhood is effective in establishing lifelong healthy eating habits and participation in physical activity
- Education (both direct and indirect) for parents of preschool and school age children at complimentary sites that supports the LIAs work in schools and makes healthy choices likelier in the home settings
- Education about sugar-sweetened beverages, with the goal of reducing their consumption among all age ranges, and particularly among children and teens who consume one or more sugar-sweetened beverage daily (32% of children and teens, 24.2% of adults)
- Having access to schools that are engaged in wellness through formalized wellness plans, and that participate in the Smarter Lunchroom Program and school gardens
- Increased awareness of both indoor and outdoor recreation areas that are close to home, as well as having adequate opportunities for physical activity before, during and after school. The CATCH program and other structured activity resources will be used to facilitate indoor physical activity
- Increased awareness and access to a variety of low-cost or free resources in Tuolumne County: CalFresh benefits (only 34% of eligible residents currently participate); food safety net via the food bank/food pantries and community meals; free/low-cost physical activity programs; free/low-cost access to medical care, etc.
- Interventions at retailers (complimentary site) that encourage all age ranges of the SNAP-Ed population to prepare and consume more produce, such as taste testings of approved recipes and healthy beverages; distribution of approved cookbooks and recipe cards; and retail promotion partnerships that encourage produce purchases through point-of-purchase marketing items
- Increased awareness of local farmer's markets to encourage consumption of healthy foods over fast food, and an increase in the number of farmer's markets that accept EBT
- Increased awareness of free to low-cost indoor and outdoor physical activity programs available through Tuolumne County's Parks and Recreation Department and Youth Centers.

- Skill-building in best practices for healthy eating/cooking on a budget; how to prepare healthy foods (food bank partners indicate lack of skills in this area is a barrier to consumption); food resource management, and food storage
- Awareness of and access to public transportation options available help people reach healthy food retailers and recreation areas for physical activity, particularly for the senior community
- Coalitions and/or partnerships in the county that are working for the health and welfare of the SNAP-Ed community, and can influence change through mutual support

5. Community Change Goals

Based upon the results of the *Community Health Assessment*, and other data sources cited, Tuolumne County's SNAP-Ed Local Implementing Agencies (LHD and UCCE) have worked together to create Community Change Goals and Local Objectives aimed at addressing the findings revealed in the data, with the ultimate goal of helping low-income residents live healthier lives. Tuolumne County residents face many challenges that affect their quality of life, including limited access to health care; higher than average rates of mental and behavioral health issues; and a prevalence of substance use disorders including alcohol, tobacco (one of the highest rates in the state) and drugs. Although these issues are beyond the scope of SNAP-Ed LIAs, we hope that through collaborating with community partners who also provide services to the SNAP-Ed eligible population, that we can positively influence the outcomes of these challenges.

The Community Change Goals that relate to this SNAP-Ed work plan include increasing access to and consumption of healthy foods and beverages for all age ranges, increasing food security and building skills in food resource management, increasing physical activity rates for all residents, implementing school-based wellness strategies, and collaborating with county partners who can help us achieve these goals.

The Community Change goals that we have created within our LIA partnership for Tuolumne County are:

Increase consumption of and access to fruits and vegetables by all ages groups

- Increase nutrition education to individuals/families at qualified sites
- Teach food resource management strategies to increase food security
- Increase healthy food promotion through school and community events
- Promote healthy food and physical activity through social media campaigns
- Expand and strengthen partnerships with retailers to increase promotion of and access to produce
- Expand partnerships with community groups to increase promotion of produce
- Expand nutrition education to Head Start preschool-aged children, a key age group
- Expand School Wellness policies and school gardens, enhancing connections between lunchrooms and classroom garden-enhanced nutrition education

- Increase healthy retail options, including more Farmer's Markets with access to EBT services, healthy corner store options, and worksite wellness options
- Improve the retail landscape so that low-income residents have increased access to and consumption of a good selection of good quality produce
- School gardens

Decrease consumption of sugar-sweetened beverages

- Promote benefits of drinking water and reducing sugary beverages
- School Wellness policies
- Increase awareness of healthy beverage options by offering educational materials and taste testings of approved beverages, such as flavored water, low-fat milk, smoothies, and non-sweetened 100% fruit and vegetable juices

Increase physical activity (PA) rates for all age groups

- Conduct PA education activities for youth at schools
- Conduct PA education activities for adults at approved sites
- Conduct PA education at community events for all ages
- Promote physical activity in social media campaigns directed toward SNAP-Ed eligible
- School Wellness policies
- Support safe, walkable communities and "complete streets"
- Support and promote free to low-cost structured physical activity opportunities (e.g., instructor-led)
- Support and promote low-cost outdoor activities for families
- Support development of local community parks
- Support school-based wellness strategies and environmental changes within schools' Wellness Policies
- School Site Councils, Parent-Teacher Groups
- Promote youth engagement projects centered on healthy foods and/or increased physical activity
- Administrator, teacher, parent and student education
- Smarter Lunchroom Movement activities related to school environmental changes
- School gardens
- Increase access to healthy foods and physical activity in schools
- Provide playground stencils to pre-schools and elementary schools to encourage physical activity

We recognize that many of these community change goals are multi-year strategies that require the support of external partners and additional funding streams. We hope to achieve these goals through our local LIA partnership, our CNAP group, networking within our community and leveraging relationships and expertise from LIAs in other counties. Although UCCE has been effectively delivering SNAP/CalFresh education programs and working on PSE for quite some time, Tuolumne County's LHD SNAP-Ed program has gained most of its momentum during FFY 2015, due to staffing challenges during FFY 2014. Nonetheless, Tuolumne's LHD has excellent working relationships with two local retailers, has created school gardens, and coordinates a recently-formed CNAP group as we work as we work toward our community change goals in partnership with UCCE.

Tuolumne County's LIA partners have set the following three (3) SMART three-year objectives for FFY 17-19:

Objective 1: By September 30, 2019, LIAs will work with 20 low resource schools to provide nutrition and physical activity education, and support changes to school policies and the physical environment (e.g. school gardens and lunchrooms) that enhance nutrition and physical activity behaviors among students and their parents/caregivers.

Objective 2: By September 30, 2019, Tuolumne County SNAP-Ed programs will reach at least 2,000 SNAP-Ed eligible people from all age ranges with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

Objective 3: By September 30, 2019, SNAP-Ed LIAs will collaborate with and provide support to three (3) partner programs and/or committees/collaboratives for the advancement of healthy eating and physical activity initiatives that benefit SNAP-eligible residents.

These objectives will allow us to focus on our larger community change goals within the parameters of the SNAP-Ed funds. We will focus on PSE strategies that connect to our community change goals (as detailed within each three-year objective) in the following settings:

- Early Childhood Education Settings
- School Settings (K-12)
- Healthy Retail Environment (including Tuolumne County's main food bank and the county's farmers' markets)

6. Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]

LIAs will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, etc. Tuolumne County's CNAP group meets on a quarterly basis. The group is newly formed, having met just three times, but there is good synergy among the FNS-funded partners, who currently make up the group: LHD, UCCE, WIC, DSS/CalFresh eligibility, CCC, and the Tobacco Prevention Program, which has a nutrition component associated with it. The overarching goal of Tuolumne County's CNAP group is to coordinate intervention efforts of USDA-funded and non-USDA funded nutrition-related programs to maximize reach and effectiveness with our target populations. Over the next three years, the CNAP group will continue to meet at least quarterly to set goals for future priorities, provide updates on progress, identify new opportunities for collaboration, and coordinate messaging. Future additional partners may include, but are not limited to: ATCAA Food Bank, Head Start, Tuolumne Office of Education, Parks and Recreation Department, school district food service directors, Farmers Market managers, Ag Commissioner, and local Community Based Organizations (CBOs). The LHD's Health Officer, who will be working with other partners to update Tuolumne County's *Community Health Assessment* in 2016, will also join our CNAP meetings. We will-collaborate with our Tobacco Prevention Program's healthy retail program to map transit routes to healthy retailers in our county.

7. Key Messages

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
x	Whole Grains	x	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
x	Fruits & Vegetables	x	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify): Access to Water*
x	Fats and Oils	x	Food Shopping/ Preparation	X	Other *(specify)*: Limiting screen time
x	Lean Meat & Beans				
x	Sodium & Potassium				
x	Promote Healthy Weight				

8. Educational Materials, Resources and Curriculum

All educational materials, resources, and curriculum will be approved through the USDA SNAP-ED Connection website (https://snaped.fns.usda.gov/) and/or FFY 2017-2019 USDA-approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California, or the California Department of Public Health Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Tuolumne County LIAs thoroughly reviewed the approved integrated curriculum list provided by the state agencies to determine the best option for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population as well as our chosen SNAP-Ed three-year annual objectives. Most of our chosen curriculum is geared towards ECE or school-based settings, but we have also chosen curriculum geared toward an adult in various settings, including parents/caregivers of pre-school and school-age children and adults in the food safety net.

9. Intervention and Evaluation Plan Narrative Summary

The implementing agencies of Tuolumne County (UCCE and LHD) will conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites to reach a significant portion of the SNAP-Ed eligible population in multiple settings and in both English and Spanish languages. The intervention plan includes activities at the *individual level* of the Social Ecological Model (SEM) that provide comprehensive education on proper nutrition, food resource management, and physical activity in a variety of approved settings. Building upon existing relationships with pre-schools (Head Start) and K-12 schools, LIAs will continue to provide direct nutrition education to youth and their caregivers and expand physical activity education interventions. To complement SNAP-Ed interventions in the classroom, nutrition and PA interventions will be offered at youth centers to youth and parents. LIAs will also train and support teachers, parents, and other volunteers as extenders who will provide direct education in the classroom. Additionally, nutrition education will be provided to the adult and senior adult SNAP-Ed population that connects shopping behaviors and choices to better health outcomes as per MyPlate and Dietary Guidelines for Americans. Strong relationships with local retailers and the county's food bank provide LIAs with opportunities to deliver both direct and indirect education to their SNAP-Ed eligible clients. Interventions will include selecting, preparing and storing healthy foods and beverages; increasing skills in label reading, menu planning, and food budgeting; increasing knowledge of MyPlate recommendations; and exposure to and acceptance of new healthy foods.

The FFY 17-19 intervention plan includes approaches at the *organizational level* of the Social Ecological Model via the inclusion of policy, systems and environmental (PSE) change efforts that include implementing school wellness policies that promote access to healthy foods, beverages, and physical activity. LIAs will work with schools to encourage the adoption of healthy nutrition and physical activity policies and procedures in early childhood and K-12 education settings, which will include (but are not limited to): standards for all food and beverage offered on site; opportunities for daily physical activity including the use of SNAP-provided playground stencils to encourage movement; limits on screen time and the provision of quality nutrition and physical activity education. PSE efforts will also focus on improving the school lunchroom utilizing the Smarter Lunchrooms Movement. Although the availability of healthy foods in the county is quite good, and within proximity of most residents, retail partners will be encouraged to utilize SNAP-Ed

marketing tools (e.g. shelf talkers, wobblers) to promote healthy foods and beverages and encourage their consumption. Additionally, healthy food and beverage standards for purchased and donated foods that enter emergency food distribution sites (food banks/pantries) will be implemented to support education efforts to improve nutrition and food resource management. LIAs will collaborate with the county's Food Bank Coalition, and support the implementation of a nutrition education center with technical assistance, environmental supports, and by delivering nutrition education to food bank/pantry volunteers and clients who are newly entering the food safety net.

With regard to the *sector level* of the SEM, LIAs will identify strategic partners and convene community-wide, multi-sector coalitions to improve nutrition and physical activity outcomes in the county. Efforts will include collaborating with CNAP partners and connection with non-CNAP community partners to provide information on supplemental food programs, emergency food outlets, and information on low-cost medical care/coverage; housing; and employment directed at the SNAP-Ed eligible population. As part of our CNAP efforts, LIAs will collaborate with and support the work of the LHD county health officer who is conducting work similar to a *community health needs assessment.* In addition, LIAs will employ social marketing efforts via digital and print media to promote healthy eating and active living in Tuolumne County.

Both LIAs will employ research/evidence-based interventions to address the objectives in the work plan, which were derived from results obtained from multiple sources of the most current data available and community assessments. Interventions support not only our 3-year objectives, but the overall objectives of SNAP-Ed partners.

University of California Cooperative Extension (UCCE)

UCCE Central Sierra Multi-County Partnership (MCP) UC CalFresh has been providing Nutrition Education and Physical Activity Promotion to low income individuals and families for over 15 years in Tuolumne County. UCCE is very involved with agencies and projects working to influence individual and family behavior, the school environment, and community wide changes interrelated to the Social Ecological Model (SEM). They are delivering programs through a variety of methods.

Nutrition and Physical Education-Adult

UCCE's adult target population delivery methods include:

- Series based workshops: using evidenced based curricula in a series of four or more sessions.
- One-time stand-alone workshops: These cover a variety of nutrition and physical activity topics requested by the community and taste tests or cooking demos are included.
- Parent Teacher Groups (PTGs), School Staff and Administrators: UCCE will continue to work with school personnel and support groups at target schools to provide nutrition education that will facilitate policy changes in school meals, food items offered at schools and physical activity policy. UCCE will work in the areas of the Smarter Lunchrooms Movement and updating school wellness policies. UCCE and TCHD will be working at different schools in these areas, but will share resources and ideas to facilitate similar changes.

- School based events allow connection with parents directly and provide education and opportunities to discuss school policy related to nutrition and physical activity and provide nutrition education for the family. UCCE anticipates presenting at a variety of these throughout the school year.

Nutrition and Physical Education – Youth

The University of California Cooperative Extension formed partnerships with six (6) school districts in Tuolumne County: Summerville Elementary, Columbia Union, Curtis Creek Elementary, Belleview Elementary, Twain Harte-Long Barn Union Elementary and Jamestown Elementary to ensure nutrition education and physical activity education are provided in the classroom and at after school programs. (Beginning in 2017, Tuolumne County LHD will begin working with schools in the Jamestown Elementary school district.) Through these partnerships, UCCE will provide both direct and indirect nutrition and physical activity education to all Title I schools and after school programs serving low -income youth.

UCCE uses the following strategies for its youth population:

- Series based lessons – UCCE uses a variety of approved nutrition curricula to provide four to eight 30 – 45 minute classroom lessons.
- Garden Enhanced Nutrition Education (GENE) has become a priority in the Tuolumne County school districts. UCCE will collaborate with community partners, including UC Master Gardeners – Tuolumne County, to expand opportunities to create and sustain school gardens for educational purposes.
- Structured physical activity supports such as CATCH, stencils/murals.
- Special School Events – We participate in special assemblies and school events such as the Jog-a-Thon. These events offer opportunities for messaging such as Re-Think Your Drink, Vary your Veggies or Eat a Rainbow. We provide tasting and a parent newsletter for these type of events.
- Smarter Lunchrooms Movement – We work with district and school food service programs to “nudge” kids toward selecting and consuming a balance diet, while at the same time increasing meal sales. This program utilizes research-based Best Practices --- solution-based principles which focus on specific aspects of the school meal.

Tuolumne County Public Health Department (TCHD)

TCHD is much newer to SNAP-Ed than UCCE, and has been delivering programs since 2013. TCHD has had staffing challenges, however, since assuming the grant, and has only had a full staff of 100% SNAP-Ed-focused educators since April of 2015. Nonetheless, the TCHD has made progress in the following areas: produced the county's first Fruit and Veggie Fest in May 2015 at a partner retailer, has formed partnerships with 2 retailers and the ATCAA food bank to deliver indirect education to adults and families monthly, and will begin providing direct education to ATCAA food bank clients who are newly entering the food safety net. In addition, the LHD provides indirect nutrition and healthy beverage education weekly through its Public Health Clinic and will provide direct education to WIC clients on a quarterly basis, in a manner that does not duplicate efforts. The LHD has also begun making progress with a budding CNAP group that includes UCCE and other partners mentioned elsewhere in this document. These programs will continue to be evaluated and progress, as warranted, in FFY17-19.

To summarize, TCHD will offer the following services to the SNAP-Ed eligible population in FFY 17-19.

Nutrition and Physical Activity Education-Adult

- Indirect nutrition education will be offered to adult populations at retail partners, food banks/pantries, WIC and Public Health Clinic clients and to parents of preschool and K-12 children at school events and/or regularly scheduled parent meetings. School-based events allow connection with parents directly and provide education and opportunities to discuss school policy related to nutrition and physical activity.
- Direct nutrition education and food resource management skills will be offered at the food bank's nutrition education center to clients newly entering the food safety net.
- LHD will work with school administrators, teachers and parent groups at target schools to support School Wellness Policies (SWPs), improving school lunchrooms through Smarter Lunchrooms Movement principles, and by implementing school gardens and conducting garden-based nutrition education. UCCE and LHD will support one another's interventions at schools by sharing resources and ideas to facilitate similar changes.

Nutrition and Physical Activity Education-Youth

- Expand direct and indirect educational offerings to preschool children within the 10 Head Start preschools (2 are "home based" programs) in Tuolumne County in order to target a population seen as key for forming lifelong healthy behaviors
- Expand direct and indirect educational offerings to K-12 students in the Big Oak Flat-Groveland and Jamestown School Districts
- Offer direct and/or indirect education to all Tuolumne County Youth Centers (Jamestown, Groveland, Tuolumne) to complement interventions being offered at schools
- Implement and/or sustain school gardens to support garden-enhanced nutrition education in the two school districts mentioned above.
- Smarter Lunchrooms Movement –All TCHD nutrition educators will take a two-hour training on the Smarter Lunchroom Movement in order to begin working with the Big Oak Flat-Groveland School District food service programs to "nudge" kids toward selecting and consuming a balance diet, while at the same time increasing meal sales. This program utilizes research-based Best Practices -solution-based principles which focus on specific aspects of the school meal

University of California Cooperative Extension (UCCE) and Tuolumne County Health Department (LHD)
Both UCCE and TCHD will engage in the following activities in each of their target areas throughout FFY 17-19:

Media, Social Media and Public Relations
Both UCCE and TCHD will utilize their respective Facebook pages and websites to communicate approved nutrition and PA messages and announce special events to the SNAP-Ed eligible target audience. UCCE will also utilize their Instagram account, and the LHD will explore utilizing both Instagram and Pinterest as communication tools. UCCE also utilizes email blasts via the school district to provide parents with monthly messages and recipes related to nutrition and physical activity training provided to their student. Printed newsletters and other communication methods will be employed.

Community Events
Community events often present a perfect learning arena for family-centered education. Health fairs, Children's Fair, and other events provide the opportunity to promote "Rethink Your Drink" information, "Eat a Rainbow" offer taste testings of approved recipes, and provide simple PA information. These events allow SNAP-Ed messaging to reach a wide audience in a fun and interactive way that helps to reinforce learning objectives. Being an active participant in these events also allows LIAs to become part of the planning process and introduce healthy foods and beverage policies.

Coordination and Collaboration
UCCE is the bridge from the university to local communities, providing research-based information to individuals and community agencies. Both UCCE and the LHD will continue to be active partners and play a leadership role in the County Nutrition Action Plan (CNAP), creating goals and checking progress utilizing our Community Needs Assessment, and working with other partners toward developing and implementing these goals. In addition, both LIAs will work with the Food Bank Advisory Council to support healthy food procurement at the food bank and food pantries, and provide interventions through the upcoming nutrition education center at the Food Bank. The LHD and UCCE will provide monthly nutrition education (direct and indirect) to clients of the food bank/pantries and UCCE will offer annual nutrition education to food bank/food pantry volunteers who are responsible for selecting foods to be distributed at food pantries.

Training and Technical Assistance
UCCE and the LHD will provide training and technical assistance in both English and Spanish, as needed, to all teachers participating in the UC CalFresh/SNAP-Ed Nutrition Ed program to ensure that both English-speaking and Spanish-speaking classrooms are serviced. UCCE and LHD will provide training and technical assistance in both English and Spanish, as needed, to teachers participating in the UC CalFresh/SNAP-Ed Nutrition Ed program to ensure that both English-speaking and Spanish-speaking classrooms are serviced. We will ensure they are provided all the necessary materials to deliver the lessons with minimal effort. LHD and UCCE will work in different schools throughout the County. UCCE will continue to recruit and train extenders to deliver approved curriculum in the classrooms, at after school programs, at childcare centers, and at the food bank.

Policy, System and Environmental Change

UCCE has had significant success working with Parent Teacher Groups and school administration to establish or update strong School Wellness Policies. They work with parents, teachers, and administrators in targeted schools to review current policies and identify areas for improvement. In addition, they will assist with the promotion and implementation of new policies, and utilize the Smarter Lunchroom program to implement food service best practices and strategies to increase healthy food access and consumption. Structured physical activities (CATCH) and environmental strategies (murals, stencils) will also be incorporated. UCCE will meet with school administrators and staff, UCCE Master Gardeners and/or community leaders to assess and discuss the creation and/or support needs for the development of additional school gardens. Methods to utilize Garden Enhanced Nutrition Education in the classroom and garden in all of their targeted schools will be explored. UCCE utilizes the expertise of the UCCE Master Gardeners and other partners to ensure success.

In addition, UCCE is an active member of the Motherlode Regional Farm to School Network. Their Program Manager is Co-Chair of the Advisory Committee and ensures Title I schools are engaged in the coalition. Through this partnership we hope to increase the amount of fresh local produce served in our schools and utilize local agriculture to educate students about the food system and healthy eating choices.

The LHD has been successful in creating partnerships with two retailers in Tuolumne County, and offers store tours (twice annually) and monthly indirect nutrition education via taste testings. LHD will continue to nurture these partnerships and will encourage retailers to market healthy options using shelf talkers and other point-of-purchase marketing tools available through NEOPB. In addition, LHD will work to expand the number of farmers markets that accept EBT. Currently, only one of out the five farmers markets in the county accepts EBT.

EVALUATION

To evaluate and improve the SNAP-Ed services for all local objectives, LIA partners will use *formative*, *process*, *and/or curriculum-specific evaluations* to determine effectiveness. Both LIAs will utilize the RE-AIM method to report annually on *reach, effectiveness, adoption, implementation, and maintenance* of PSE change efforts. LIAs will provide ongoing documentation and quarterly reports for all SNAP-Ed interventions via the ATF reporting system and Reporting Tools Workbook. UCCE will use additional evaluation tools: Teacher Tasting and Teacher Observation Tools, Reporting Tools Workbooks and Intent to Change forms.

In addition, both LIAs will compare the number of SNAP-Ed eligible individuals reached through direct education (unduplicated), indirect education (duplicated) and PSE change activities to target numbers established in the integrated work plan and make evaluations in the final RE-AIM report. Nutrition activities that demonstrate high performance in terms of reach and effect will be identified and replicated, and community partners will be identified and acknowledged for their support in sustaining programs. Achievement related to individual level behaviors and dietary practices as highlighted in the USDA's Western Regional Offices SNAP-Ed Evaluation Framework will be documented.

Evaluations will be conducted with both child and adult learners who are recipients of nutrition and PA education activity (direct ed, and possibly indirect ed, if applicable) in school, community, and retail environments. Nutrition educators with the LHD will administer the evaluation tools to their target audiences and nutrition educators and extenders will administer the evaluation tools for UCCE's audiences.

Curriculum-based evaluation tools for both NE and PA will be utilized throughout FFY 17-19. LHD will occasionally conduct small group discussions and/or informal surveys (e.g. dot surveys). UCCE administers evaluations either as a pre-/post- for a series class or at the end of a single DE lesson, following protocols as directed by the UC CalFresh state evaluation program, which are specific to each curriculum.

Evaluation data will be used to make improvements to education programs where needed and to discover/address unmet needs and/or barriers related to healthy eating in the SNAP-Ed target population. The UCCE state office team analyzes results of evaluation data and provides results for each group of educators in the various counties. The LHD will report findings to CDPH using state-approved reporting tools.

Social and environmental change related to school wellness policy, school gardens, and merchandising changes in the retail environment will provide evidence of the environmental level indicators included in the SNAP-Ed evaluation framework. When necessary, we will adjust PSE strategies to address challenges and potential improvements for greater impact. Throughout the year, programs will be evaluated against RE-AIM indicators to address:

Reach - *How do we reach the targeted population with the intervention?*
Efficacy - *How do we know the intervention is effective?*
Adoption - *How do we develop organizational support to deliver the intervention?*
Implementation - *How do we ensure the intervention is delivered properly?*
Maintenance - *How do we incorporate the intervention so that it continues to be delivered over the long term?*

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	52.1%		0 to 4 years old (Preschool):	200
Female	47.9%		5 to 17 years old (School Age):	6000
			18 to 59 years old (Adult):	3600

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

Objective 1: By September 30, 2019, LIAs will work with a minimum of 20 low resource schools to provide nutrition and physical activity education, and support changes to school policies and the physical environment (e.g. school gardens and lunchrooms) that enhance nutrition and physical activity behaviors among students and their parents/caregivers.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Physical Activity: structured physical activity, murals/stencils, Safe Routes to School/walk to school programs
- Healthy Eating: Smarter Lunchrooms Movement (SLM), edible gardens
- Local Procurement: from farm and school gardens
- Access to Healthy Foods: garden-enhanced nutrition education
- Wellness Policies: district and school site

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at 12 (UCCE-7, LHD-5) low-resource K-12 school sites, UC CalFresh and LHD educators and 6 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 1250 (UCCE1000, LHD-250) students with direct education and 2900 (UCCE-2000, LHD-900) parents and family members with indirect education.
    b. By September 30, 2017, UC CalFresh and LHD staff will work with partners/committees to improve 5 of the 12 (UCCE-3 of 7, LHD-2 of the 5) school environments by establishing or reinvigorating school gardens, physical activity environmental supports such as stencils, and/or adopting SLM strategies.
    c. By September 30, 2017, a new structured PA program such as CATCH will be implemented by UC CalFresh, LHD educators and 4 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 8 (UCCE-4, LHD-4) low-resource (Head Start and K-12) school sites already receiving nutrition education.

d. By September 30, 2017, UC CalFresh and LHD staff will work with partners to assess School Wellness Committees and School Wellness Policies at two district (UCCE-1, LHD-1) and 3 (UCCE-2, LHD 1) school sites.
e. By September30, 2017, LHD staff will reach 100 parents and 50 children with direct education at Head Start schools or Head Start home-base sites in Tuolumne County.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at 12 (UCCE-7, LHD-5) low-resource school sites LHD /UC CalFresh educators and 8 trained extenders (classroom teachers, volunteers and afterschool staff) will reach 1250 (UCCE-1000, LHD-250) students with direct education and 2900 (UCCE-2000, LHD-900) parents and family members with indirect education.
   b. By September 20, 2018, UC CalFresh and LHD staff will work with partners to improve 9 of 12 (UCCE-5 of 7, LHD-4 of 5) school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
   c. By September 30, 2018, a new structured PA program will be implemented by UC CalFresh educators and 6 trained extenders, such as classroom teachers, afterschool staff, and PE specialists at 10 (UCCE-4, LHD-6) low-resource Head Start and/or K-12 school sites already receiving nutrition education.
   d. By September 30, 2018, UC CalFresh staff will work with partners and School Wellness Committees to update School Wellness Policies at 4 district and 10 school sites (UCCE-2 and 8, LHD-2 and 2).
   e. By September30, 2018, LHD staff will reach 150 parents, 75 children, and 5 staff (extenders) with direct education at Head Start schools or Head Start home-base sites in Tuolumne County.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at 12 (UCCE-7, LHD-5) low-resource school sites UC CalFresh and LHD educators and 10 trained extenders (classroom teachers, volunteers, and afterschool staff) will reach 1250 (UCCE-1000, LHD-250) students with direct education and 2900 (UCCE-2000, LHD-900) parents and family members with indirect education.
   b. By September 30, 2019, LIA staff will work with partners to improve all 12 (UCCE-7, LHD-5) of the school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies and school/district level wellness policy language that includes SLM.
   c. By September 30, 2019, a new structured PA program such as CATCH will be implemented by UC CalFresh and LHD educators and 25 trained extenders such as classroom teachers, afterschool staff, and PE specialists at 10 (UCCE-5, LHD-5) low-resource school sites already receiving nutrition education.
   d. By September 30, 2019, UC CalFresh and LHD staff will work with partners including School Wellness Committees to implement updated wellness policies and facilitate environmental or policy changes at 4 districts and 8 school sites (UCCE 2 districts and 5 schools, LHD: 2 districts and 3 schools).
   e. By September 30, 2019, LHD staff and partners will identify and recruit one youth group to explore a youth engagement project with to improve healthy living and access to healthy food and physical activity opportunities.

f. By September30, 2019, LHD staff will reach 200 parents, 100 children, and 10 staff (extenders) with direct education at Head Start school or home-base sites in Tuolumne County.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, LIAs will work with a minimum of 20 low resource schools to provide nutrition and physical activity education, and support changes to school policies and the physical environment (e.g. school gardens and lunchrooms) that enhance nutrition and physical activity behaviors among students and their parents/caregivers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Provide direct nutrition education using approved curricula, utilizing UCCE and LHD staff and extenders at 6-8 (UCCE), 6-10 (LHD) SNAP-Ed qualified schools each year. Approved garden-enhanced nutrition education curricula will be utilized at schools with school gardens. LIAs will collaborate with staff to determine which student grade levels to work with. In some cases, schools may be so small that all grade levels can be offered nutrition and PA education regularly. School gardens will be implemented to support PSE work. LHD's decline in DE numbers in school classrooms will be offset by work with garden-based DE to an after-school program and garden-based DE with two youth centers. Year 1: 12 schools – 300 students (LHD: 6/150; UCCE 6/150 Year 2: 15 schools – 400 students (LHD: 8/200; UCCE 7/200) Year 3: 18 schools – 500 students (LHD: 10/250; UCCE 8/250)	X CED CEI MPR C&C X TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Quarterly Reporting Tools Workbook; copies of evaluations; ATF; REAIM; Quarterly Report;

1.2	Provide training to extenders (teachers, parents, volunteers, UC Master Gardeners) on approved curricula. In addition, we will provide ongoing support, supplies and refresher training. • Years 1, 2 & 3-train extenders on learner-centered teaching methods and curriculum fidelity. • Years 1, 2 & 3-review extenders delivery with lesson observation tool and provide feedback. • Analyze program qualitative and quantitative data and plan for changes in training extenders, if necessary.	☐ CED ☐ CEI ☐ MPR ☐ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Quarterly Reporting Tools Workbook; copies of evaluations; sign-in sheets; informational fliers; ATF; REAIM; Quarterly Report; training outlines; lesson observation tools.
1.3	Provide indirect nutrition education annually at qualified schools for parents, students and family members through newsletters, take-home handouts, cafeteria tasting activities and school events. Provide indirect nutrition education annually to at least 13 (LHD: 6; UCCE: 7) qualified schools for 1600 (LHD: 600; UCCE: 1000) parents, students and family members through newsletters, take-home handouts, cafeteria tasting activities and school events.	☐ CED ☒ CEI ☐ MPR ☐ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Quarterly Reporting Tools Workbook; informational fliers; ATF; Quarterly Report; List of materials distributed
1.4	Establish or reinvigorate school gardens at qualified school sites where nutrition education is delivered, when feasible, in order to support PSE work. To qualify, a school would have to have a location and infrastructure for maintaining a garden, and LIA budgets and/or schedules would need to	☒ CED ☒ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	Meeting agendas and sign in sheets; meeting notes; Reporting Tools Workbook; PSE annual reporting; ATF; REAIM; Quarterly Report

	allow for supporting this endeavor. Each school site may begin at a different step, depending on the stage of development of the particular program: Step 1: Assess the interest and capacity for developing and utilizing school gardens for nutrition education. Step 2: Build partnerships and a coordinating committee at the school and assist in establishing a plan for building, maintaining, and promoting the school garden and program. Step 3: Identify the curricula to be utilized in the school garden and classroom in conjunction with UCCE Master Gardeners, garden committee and other partners. Step 4: Train teachers and other extenders and prepare materials for implementation of the program. Step 5: Make recommendations for a sustainability plan for the school garden program, e.g. funding opportunities, utilizing extenders as instructors, suggestions of volunteers (e.g. Master Gardeners, parent volunteers, scouts) for ongoing maintenance of gardens, particularly when school is not in session.				Year 3 Q1 X Q2 X Q3 X Q4 X	
1.5	Support schools in adopting Smarter Lunchroom Movement (SLM) strategies in school cafeterias at qualified school sites as part of PSE efforts; each school site may begin at a different step, depending on the progression of the SLM program at each site: **Step 1:** Assess and identify site interest and	CED X CEI MPR X C&C X TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 X Q2 X Q3 X Q4 X Year 2 Q1 X Q2 X Q3 X Q4 X	SLM scorecard assessment; training sign-in sheets; Reporting Tools Workbook; PSE annual reporting; ATF; REAIM; Quarterly Report; TA

	capacity to implement the SLM. **Step 2:** Conduct a SLM scorecard assessment with food service staff. **Step 3:** Provide SLM training to food service directors and staff. **Step 4:** Assess the capacity of the school site to establish a student committee to involve students in SLM activities, including artwork, adding signage, creating names for entrees, etc. **Step 5:** Establish student committees as identified; assist the group to delineate goals and projects. **Step 6:** Assess if the school cafeteria environment would be improved by adding a mural; if yes, be sure to include students in designing the mural for the cafeteria. **Step 7:** Provide ongoing technical assistance to identify which 4-6 SLM strategies to employ and assist in implementation. **Step 8:** Conduct another assessment after 6-8 months to identify changes in scores. **Step 9:** Adaptive Management – evaluate results and make necessary changes to begin the next implementation cycle. Year 1: LHD-1; UCCE-3 Year 2: LHD-2; UCCE-5 Year 3: LHD-2; UCCE-7				Year 3 Q1 Q2 Q3 Q4 X X X X	log; training outline; copy of mural design once approved.

<td>Work to implement structured physical activity programs at 11 school sites UCCE: 7 LHD: 4) = where nutrition is currently taught:
• Assess the need for structured physical activity (PA) sessions in class, during PE, or as part of after school program(s) (e.g. Boys & Girls Clubs, extended day programs, etc.). LIAs will work with school staff/administration to determine if PE curriculum can be modified to include PA.
• Provide direct PA education and training to extenders to implement new structured PA programs.
• Continue to provide support and technical assistance as the program is implemented.
• Help design a sustainability plan for the structured PA program at each site.
• Work with school and district level Wellness Committees to incorporate PA language in School Wellness Policies as part of PSE work.

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)
Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, Tuolumne County SNAP-Ed-funded LIAs will reach at least 2,000 SNAP-Ed eligible adults and/or youth in the community with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Eating: increase access to fresh fruits and vegetables, nutrition education, and food resource management education
- Physical Activity: increase active living education and awareness
- Communication Environment: link to online resources, eatfresh.org text messages, etc.
- Access to Healthy Foods: nutrition training for volunteers, implement written healthy procurement policies at food banks and food pantries

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. FFY 2017 (Year 1) Objective(s):

a. By September 30, 2017, Tuolumne County SNAP-Ed programs will reach at least 1,000 SNAP-Ed eligible adults and/or youth with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

2. FFY 2018 (Year 2) Objective(s):

a. By September 30, 2018, Tuolumne County SNAP-Ed programs will reach at least 1,500 SNAP-Ed eligible adults and/or youth with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

3. FFY 2019 (Year 3) Objective(s):

a. By September 30, 2019, Tuolumne County SNAP-Ed programs will reach at least 2,000 SNAP-Ed eligible adults and/or youth with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Tuolumne County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, Tuolumne County SNAP-Ed-funded LIAs will reach at least 2,000 SNAP-Ed eligible adults and/or youth in the community with education, technical assistance, and environmental supports to promote access to and participation in physical activity, promote best practices in food resource management, and/or increase the acquisition and consumption of fruits, vegetables and healthy beverages on a limited budget.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	UC CalFresh educators will conduct a minimum of 8-series based, and 40-single session nutrition, food resource management, and/or physical activity education sessions using approved curricula to reach 100 SNAP-Ed eligible adults over three years.	X CED CEI MPR C&C TTA	CWD LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	Agendas; sign in sheets
2.2	UC CalFresh and LHD staff will work with community partners to implement the new healthy food procurement policy at the food bank over a three-year period. Tuolumne's Food Bank has recently had a change in management, so this has been on hold so far for FFY 17.	X CED CEI MPR X C&C X TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Agendas; meeting notes; annual summary of progress; ATF

2.3	UC CalFresh and LHD educators will conduct approved indirect nutrition and/or food resource education to SNAP-Ed eligible adults and youth at food banks, food pantries, festivals, events (may include producing a Fruit & Veggie Fest) and other qualified sites. Year 1: 10% above FFY 2016 baseline Year 2: 10% above FFY 2017 baseline Year 3: 10% above FFY 2018 baseline	CED: ; CEI: X; MPR: ; C&C: ; TTA:	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF; Quarterly report; List of handouts; Track number reached and sites.
2.4	LHD and UC CalFresh educators will work with three (3) food banks/pantries to deliver direct education to 540 SNAP-Ed eligible food bank clients (LHD) and direct education to 45 food bank/pantry volunteers (UCCE) in Tuolumne County. • Year 1 DE: 120 clients; 15 volunteers • Year 2 DE: 180 clients; 15 volunteers • Year 3 DE: 240 clients; 15 volunteers	CED: X; CEI: X; MPR: ; C&C: ; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly report; ATF; RTWB
2.5	At least once per quarter, LHD educators will offer direct or indirect education at youth centers/family resource center (FRC) to SNAP-Ed eligible youth and/or their caregivers to complement our work in schools. Where feasible, this may include development of gardens and delivery of garden-based nutrition education programs at sites where gardens are established. Year 1: 1 youth center/FRC; at least 40	CED: X; CEI: X; MPR: ; C&C: ; TTA:	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Quarterly report, ATF; Copies of materials used

	people Year 2: 2 youth centers/FRC; at least40 people Year 3: 4 youth centers/FRC; at least 40 people					
2.6	LHD will promote and offer two store tours and/or "pop-up", classroom-based store tours utilizing the "Cooking Matters at the Store" program, annually at approved retail sites to low-income adults to teach SNAP-Ed eligible people how to get the most nutrition for their food dollars.	X CED CEI MPR C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X Year 2 Q1 Q2 Q3 Q4 X X Year 3 Q1 Q2 Q3 Q4 X X	Quarterly report, ATF; Copies of materials used
2.7	LHD will offer indirect nutrition education monthly at two approved retail partners to SNAP-Ed eligible adults and will work with these retailers to implement environmental supports, such as shelf talkers/wobblers, shopping cart ads, and posters that encourage the purchase of healthy foods and beverages.	CED X CEI X MPR C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	ATF Quarterly Report

2.8	LHD will offer direct or indirect nutrition and/or PA education to clients of one or more of the following Tuolumne County services (or similar, qualifying services): Child Welfare/Family Reunification, WIC, and the Public Health Clinic at least once quarterly. LHD will obtain/establish an MOU to partner with WIC, and will work with them to determine what offerings would best suit their clientele without duplicating efforts.	X CED X CEI MPR X C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF; Quarterly report; list of handouts; MOU with WIC
2.9	LHD will research what is required for farmer's markets to become eligible for EBT redemptions, and how SNAP can provide technical assistance to these markets, with the goal of increasing the number of Tuolumne County farmer's markets that accept EBT. Year 1: Research SNAP guidelines for EBT redemptions at Farmer's markets to evaluate feasibility and provide technical assistance to markets. Year 2: One (1) more market accepts EBT for a total of two markets in Tuolumne County Year 3: One (1) more farmer's market accepts EBT for a total of three markets in Tuolumne County	CED CEI MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1, Q2 X, Q3 X, Q4 Year 2: Q1, Q2 X, Q3 X, Q4 Year 3: Q1, Q2 X, Q3 X, Q4	ATF; Meeting agendas/notes from phone calls.

2.10	At least quarterly, coordinate at least one public relations effort that highlights local programs and/or communicates SNAP-Ed approved key message(s) through local media, email blasts, LIA websites, social media sites or approved marketing collateral.	☐ CED ☒ CEI ☒ MPR ☐ C&C ☐ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Press Releases; Newsletters; Flyers; Screen shots of online promotions; Copies of articles; ATF
2.11	UCCE, in cooperation with ICES, will annually train 10-15 home-based childcare providers to improve the healthy choices made by preschoolers and their parents. We will also offer training for caregivers on UCCE approved curriculum to extend to their charges.	☒ CED ☐ CEI ☐ MPR ☐ C&C ☒ TTA	☐ CWD ☐ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1, Q2, Q3, Q4 X Year 2: Q1, Q2, Q3, Q4 X Year 3: Q1, Q2, Q3, Q4 X	Quarterly Report Training sign-in sheets
2.12	LIAs will participate in at least 4 CNAP meetings per year to collaborate with both SNAP-Ed funded and non-SNAP-Ed funded partners to support healthy eating/active living initiatives for SNAP-Ed eligible residents in Tuolumne County. (n=6 CNAP partners in 2016)	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	Meeting agendas and notes; sign-in sheets; copies of handouts; ATF; Quarterly report

2.13	LIAs will participate in Tuolumne County's Food Bank Advisory Council four (4) times per year to support the new healthy food procurement policy, the development/promotion of an on-site nutrition education center at the food bank, and healthy eating/active living initiatives that will benefit SNAP-Ed eligible people utilizing the food safety net. Impact of efforts will be documented. Organization Name: California Department of Public Health
County/Jurisdiction: Tuolumne County

2. Non-Capital Equipment/Supplies:

	Budget Adjustment: Add Decrease	Budget Adjustment: Delete Increase	Last Amount Approved	Budget Item	Description/Justification	FTE	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1				Office Supplies	Direct program costs: special paper, printer ink & toners, binders, folders, filing & storage supply, ergonomic tools, & other office supplies specifically purchased for SNAP-ED,as well as proportionally shared costs for all general office supplies(pens, pencils, paper clips, note pads, labels, markers, tape, glue etc) based on a min of Qtrly FTE 1.8 (dedicated Snap-Ed staff) - cost vary per month but on average to obtain "unit cost" per month. # of Items = # of Months	1.8	$21.50	12	$464	
2				Photocopy/Printing	Direct program specific costs such as outsourced printing services and any printing costs that are identifiable by program and proportionately shared costs based on 1.8 FTE (dedicated Snap-Ed Staff) of copy machine usage and reproduction costs for project correspondence, progress reports, evaluation reports, invoices, mass mailings, and other materials in support of SOW activities, envelopes, letterhead, and business cards. Reproduction costs per copy vary based on paper costs, copier used, etc- averaged to obtain "unit cost" per month. # of Items = # of Months	1.8	$54.00	12	$1,166	
3				Postage	Direct program costs: postcards/stamps and registered mail specifically purchased for SNAP-ED,as well as proportionally shared costs for all shared costs for project mailings such as daily correspondence, progress reports, cost reports, mass mailings of educational information, based on programs quarterly FTE 2.00 - cost vary per month but on average to obtain "unit cost" per month. # of Items = # of Months	1.8	$10.00	12	$216	
					Theft-sensitive equipment/supplies that are less than $5,000 (Computers, printers, projectors, etc.)					
1				None					$0	
								Total Non-Capital Equipment/Supplies:	**$1,846**	

3. Materials:

	Budget Adjustment: Add Decrease	Budget Adjustment: Delete Increase	Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1				Supplies & Equipment for conducting Nutrition Education Events/Classes	Direct Program expense for food & supplies such as food to be prepared at classes/events, utensils, kitchenware, food containers, etc. - $.58 per participant x 4500 participants = $2610; recipe/print materials to support NE and PA lessons- $150/month X 12 mos. = $1800.	$4,410.00	1	$4,410	
2				Gardening Outreach/Nutrition Education Materials	$360 for each of our school/community gardens to make repairs and/or expand planter boxes. Purchasable items for this could include: planting soil, lumber, hardware, mesh for 8' x 4' raised beds; Irrigation supplies (drip lines, emitter, timers, faucets). $1000 allocated for new garden at Groveland Youth Center - in total 11 gardens averages out to $360 per garden	$360.00	11	$3,960	
3				Media	Direct program expense for Facebook Advertising - $50 annual for up to 10 boosted posts at minimum $5 each. Facebook posts can be "boosted" this pushes the post out to $1K+ people (people that like your page and their friends, or targeted demographics that one can choose based upon age, location, etc.). We would boost some of our posts 5-10 times/year. An example would be our Fruit and Veggie Fest announcements.	$5.00	10	$50	
4				Healthy and Homemade Calendars	Program-approved calendars from Iowa State University for 2019 (FFY 18). Calendar recipes and content are designed for audiences with low resources and are ideal for use with EFNEP, SNAP-Ed, WIC and other nutrition education programs. Each month's illustration shows a complete meal or snack consistent with MyPlate recommendations. 200 copies in English; 30 copies in Spanish.	$0.85	230	$196	
5				Media	Direct program expense for the partial wrapping of a vehicle with SNAP-ED/NEOP approved messaging. Pricing is dependent upon size of vehicle. We are proposing to wrap our Chevy Equinox, which is a primary vehicle used for local SNAP travel. Wrapping can generate millions of visual impressions, studies show that 97% respondents remember ads on vehicles and respondents have positive reaction to them. Studies alsohave shown that wraps cost cents on the dollar compared to TV, radio and print ads. Tuolumne County is large geographically, but has almost no billboards for placing SNAP-Ed messaging, so wrapping a vehicle would be an excellent way to keep health top of mind in the SNAP-Ed population, particularly since the vehicle would be traveling to areas where we have established SNAP-Ed audiences and which have SNAP-Ed-qualifying census tracts: Jamestown, Tuolumne, Sonora.	$1.00	2290	$2,290

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Ventura County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

County Name: **Ventura County**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
	University of California: UC CalFresh UCCE: (UC Cooperative Extension: UCCE)
X	California Department of Public Health: CDPH: (Ventura County Public Health Department: LHD)
X	California Department of Aging: CDA: (Ventura County Area Agency on Aging(Ventura County Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.

- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Ventura is a coastal county located north of Los Angeles and ranks 12th out of 58 counties in California in total population (823,328; 2010 census). The region is diverse, with geography ranging from agricultural fields to coastal plains to mountain communities. The county's plains and valleys, such as those found in the Oxnard region, provide some of the best farmland in the world. With over 6,800 acres designated as agricultural land, agriculture is still an important industry to this area. Ventura County's agriculture has a long and rich history. A variety of crops have been grown commercially in this region from over a century, since the mid-1800s, when farming and ranching were the single most important economic activity in the region. Agriculture's economic role has diminished in recent decades, but farming is still an important part of the County's landscape and culture to a degree that is unique to coastal Southern California. According to the Agricultural Commissioner's Report, the estimated gross value for Ventura County's agriculture in 2014 was $2,137,033,000, representing a 2.01% increase from 2013. Ventura County covers over 1,845 square miles including 43 miles of coastline. The Los Padres National Forest accounts for 46.7% of its land mass or 860 square miles in the northern portion of the County. Ventura County is home to the only deep-water port between Los Angeles and San Francisco, which is the shipping point for agriculture and is the largest refrigerated fruit terminal on the West Coast. The California Department of Finance estimates that the population of Ventura County was 842,967 in 2014, and according to the SNAP-Ed County Profiles, 25.1% of the population is SNAP-Ed eligible. SNAP-Ed eligible participants are 67.8% Hispanic, 25.2% White, 3.6% Asian, 1.6% African-American, 0.1% American Indian/Alaskan Native and 1.6% other race/ethnicities. Almost one quarter (23%) of the County's population is foreign-born, and 38% of the population speaks a language other than English at home, including Spanish. Adults comprise the largest percentage of SNAP-Ed eligible participants at 56.4%, followed by school age children (21.7%), 0-5 year old children (11.6%) and older adults (10.2%). An estimated 75, 528 residents participate in the CalFresh Program in Ventura County, according to the 2015 SNAP-Ed County Profiles data.

In Ventura County, the identified areas of greatest need, based on income, health status, and other socioeconomic indicators, include the Santa Clara Valley, Port Hueneme, and Oxnard. There are 174 census tracts in Ventura County, and 15 (8.6%) qualify for SNAP-Ed services, bases on the all races American Community Survey (ACS) 2010-2014 data. The county has 20 school districts with 225 public schools, of which nearly half (105) qualify for SNAP-Ed services base of the most recent Free and Reduced Price Meal (FRPM) data. Additionally, a number of means-tested sites are eligible for SNAP-Ed services including over 23 emergency food outlets, more than 30 public housing units, 8 Women, Infants and Children (WIC) clinics, 12 senior centers, 28 Head Start sites and 22 additional SNAP-Ed eligible Early Childcare and Education (ECE) centers. The City of Oxnard and surrounding communities has the largest number of SNAP-Ed eligible residents, and 100% of the schools in the Oxnard School District are eligible for SNAP-Ed services, based on the Free and Reduced Price Meal (FRPM) data. Two neighborhoods in Oxnard, La Colonia and South Oxnard, have been part of the Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention (CX^3) community assessment and improvement efforts in the past 8 years.

The obesity and overweight prevalence in the adult population in Ventura County is high, 60.8% of adults are overweight or obese and 63.3% of SNAP-Ed eligible adults, compared to 59.7% in California. Although the rate of overweight or obese among SNAP-Ed eligible adults shows a promising

improvement, decreasing from 71.2% in 2014 to 63.3% in 2015, according to the SNAP-Ed County Profiles, we recognize there is still much work to be done, as fast food consumption among adults continues to be high, with 70.7% of SNAP-Ed eligible adults reporting consuming fast food one or more times in a week. Additionally, according to data from the 2014 SNAP-Ed County Profiles, fewer than half (42.4%) of the children in Ventura County (2-11 years of age) reported eating five or more servings of fruits and vegetables, while only 27.8% of adults reported eating fruits and vegetables 3 or more times per day. The overall rate of food insecurity in Ventura County has shown some improvement, decreasing from 12.6% in 2014 to 10.4% in 2015, as per 2015 SNAP-Ed County Profiles data. Nonetheless, the rate of food insecurity among children continues to be over 20 percent (20.8%; 2015 SNAP-Ed County Profiles), meaning one out of five children in Ventura County go to bed hungry. In contrast to the high rates of food insecurity, over half of children and teens ages 2-17 (62.6%; 2015 SNAP-Ed County Profiles) report eating fast food one or more times in the past week, and in 2014, 29% in the same group reported consuming one or more sugar-sweetened beverages each day. According to the 2014 SNAP-Ed County Profiles, nearly half (48.7%) of all the restaurants in Ventura County were identified as fast food style restaurants, which is indicative of a food landscape where unhealthy and fast food is readily available, especially in low-income neighborhoods. Other data sources, such as the USDA Food Environment Atlas, confirm the grim picture; in 2012, the Fast Food Restaurant Density in Ventura County was 0.72, indicating that there were 0.72 restaurants per 1,000 population. Frequent consumption of fast food combined with low consumption of fresh fruits and vegetables, as data indicates above, increases the risk of overweight and obesity in populations of all ages.

Currently, people 60 years of age and older, make up 18% of the total population in Ventura County (Table 1). The rate of increase for the senior population is projected at 15% (2016-2020) while the total population is expected to increase by 2%. According to the California Department of Finance and U.S. Census data, there are nearly 160,000 seniors in Ventura County, and the number of those seniors needing food assistance is rapidly increasing. Ventura County Area Agency on Aging (VCAAA) has seen a 16.4% increase in clients needing Senior Nutrition Meals this past year (Table 2).

Ventura County **Rev. 5/23/2017**

Three-Year Integrated Work Plan FFY 2017–2019

Table 1. Ventura County Aged 60+ Population – Age Distribution by City (Based on U.S. Census American Community Survey 5-year estimates, 2010-2015)

Service Region	Total Population	Ventura County 60+ Population	Age 60+ % of Region Population
Areas Not Listed Below	72,853	13,528	18.6%
Camarillo	65,985	15,694	23.8%
Fillmore-Piru	17,281	2,369	13.7%
Moorpark	35,033	4,589	13.1%
Ojai-Mira Monte	28,681	7,573	26.4%
Oxnard	201,744	25,500	12.6%
Port Hueneme	21,949	3,709	16.9%
Santa Paula	29,990	4,439	14.8%
Simi Valley	125,699	22,262	17.7%
Thousand Oaks	128,126	29,040	22.7%
Ventura	108,449	22,163	20.4%
Totals:	**835,790**	**150,866**	**18.1%**

Table 2. Increase in Senior Nutrition Meals in the Last Year

	Congregate Meals	Home-Delivered Meals	Total Annual Meals	
Contracted Meal Counts – FY15-16	57,337	116,642	173,979	**16.4% Increase**
Approved Meal Counts – FY16-17	70,502	131,936	202,438	

In FY 2015-2016, 31.5% of participants of the senior congregate meal program had a high level of nutritional risk. According to Ventura County's SNAP-Ed County Profile, 63% of SNAP-Ed adults (including seniors) are overweight or obese, which aligns with the State's rate of 67%. Of the adult SNAP-Ed eligible population, 74% consumed fast food one or more times in the past week.

With respect to the physical activity environment in Ventura County, according to the 2014 SNAP-Ed County Profiles, the number or recreational facilities was 10.3 per every 100,000 residents, a disproportionate value based on the total population, thereby establishing an environment of limited and restricted access to suitable areas for individuals to safely engage in physical activity on a regularly basis. Additionally, only 30.6% of adults reported walking in the previous week, indicating that less than a third of the total adult population engages in this simple physical activity. A large number of adults, 17%, report not exercising at all in the previous month, and only 42% of children (5-11 years of age) reported being physically active at least one hour every day. Overall, the data shows that only a low percentage of residents in most age groups engage in regular physical activity, a practice that can impact an individual's ability to achieve an optimal state of health, especially related to managing a healthy weight. The data also supports the need for sustained nutrition education and physical activity related interventions, as well as the need to continue to build partnerships and collaboration across sectors to promote and support policy, systems, and environmental change at all levels and for all age groups.

4. **Community Assessment**

According to the recently released annual county health rankings, compiled by the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute, Ventura County ranked 8th among California's 57 counties for health outcomes. Previous years' rankings were 16th in 2012, 15th in 2013, 14th in 2014, and 14th in 2015. Some of the indicators that positively affect Ventura County's ranking in health outcomes and which are relevant to the SNAP-Ed efforts led in Ventura County include the adult obesity rate, currently at 21% as compared to 23% in the State, the Food Environment Index at 8.6, which is well above the State index of 7.7, access to exercise opportunities, showing that 98% of residents in Ventura County live reasonably close to a location for physical activity, as compared to 94% in California, and the percent of children under 18 years old living in poverty, at 16%, well below California's 23%. Although Ventura County is in the top one-third of California's counties, there is still much work to be done as data also indicates health disparities among low income population groups, and improvements are needed in several areas, including obesity and overweight rates among all age groups. VCAAA conducted a needs assessment for older adults age 60 and older who live in Ventura County. Assessment results for FY 2015-16 indicated 31.5% of participants of the senior congregate meal program are at high nutritional risk. The FFY 2017-19 Integrated Work Plan was developed using data and information from various sources, such as the data and information listed in the jurisdiction section, CX^3 community assessment results, local strategic and community improvement plans, various reports, input from partners, and experience gained from the Local Implementing Agencies (LIA's) providing SNAP-Ed nutrition interventions for over eight years in the county.

Our CX^3 data analysis showed us that the retail environment in low income neighborhoods fairs poorly compared with other areas in the county. Stores in low income neighborhoods often lack variety, quality and affordable fresh fruits and vegetables, as well as other healthy foods, for our SNAP-Ed population. Most residents in low income neighborhoods have limited or no access to supermarkets and largely rely on small corner and liquor stores, which are less likely to have a healthy food environment or offer healthy food options, to make daily food purchases for the family. The CX^3 results directed us to work with over 9 retailers in our 3 CX^3 neighborhoods, where we can have an opportunity to change the food landscape and have the greatest impact on the largest number or individuals and families. We were also able to compare and use the results from our CX^3 surveys with the results from the Healthy Stores for a Healthy Community survey from 2013.

In analyzing these data sources to assess the needs of our SNAP-Ed population in different communities, we are directed to focus our nutrition education interventions on children, teens, and adults. The focus will be on reaching children and teens (6-17 years of age) in the classroom and afterschool program settings. Adult interventions will target community settings where people live, shop and worship. In addition to data analysis, Policy, System and Environmental work has been guided by resident and partner input and support. Previous collaboration and resident supported efforts include working with local retailers in CX^3 neighborhoods to improve their food store quality scores, especially those located near public schools, as well as development and support of community gardens. The data also illustrates the need to strengthen our social marketing and media efforts such as messaging and education at community events, as a means to effectively engage large numbers of SNAP-Ed residents of all ages with messages that promote healthy eating and physical activity. Community events provide a means to communicate key messages to large audiences in a relative short period of time and with little effort and resources. In setting the course for the three-year FFY 2017-19 Integrated Work Plan, we recognize that our efforts to fight and reduce obesity and related chronic conditions need to be conducted on a broad spectrum and will require multisector collaboration and coordination, with partners from different areas of focus and expertise such as school districts, faith base and non-profit organizations, community leaders, residents groups, food banks, and local government agencies such as the welfare department.

5. **Community Change Goals**

Ventura County Public Health's (VCPH) new vision statement for Ventura County is to become the healthiest county in the nation (VCPH 2015-2020 Strategic Plan). In his message, our Public Health Director, reiterates his commitment to continue building and strengthening relationships to make this vison a reality, emphasizing that it will take collective efforts to transform the health of all residents and to make the healthy choice the easy choice for all residents. The strategic plan focuses on five priority areas: health equity, healthy and safe community environments, preventive health care, community driven partnerships, and public health infrastructure. Nutrition, obesity and physical activity have long been determined and continue to be priority areas of focus in Ventura County. As evidenced by the results of the past 5 years of County Health Rakings, Ventura County has continued to improve and focus on multiple areas that impact health outcomes of residents. Long term community goals for Ventura County also include improving birth outcomes and infant/child health outcomes, increase the number of adults and children who are in a healthy weight category and reverse the

trend of increasing diabetes rates, especially in high poverty areas, improve the wellness and quality of life for older adults, and decrease the proportion of individuals, especially children who experience food insecurity. The SNAP-Ed funded LIA's will focus their efforts on the needs of the SNAP-Ed eligible population of Ventura County and on SNAP-Ed allowable interventions and activities which align with the United States Department of Agriculture (USDA)-Western Regional Office (WRO) Evaluation Framework.

Based on population data, community needs assessment results, input from partners and resident groups, the local implementing agencies, Local Health Department and Area Agency on Aging, will collaborate to implement comprehensive multi-level nutrition education strategies moving toward positive change in the local food environment, focusing on healthy retail strategies, as well as school-based and community settings.

Ventura County LIA's will support long term community change goals by working with a wide-range of partners to identify strategic opportunities to convene county-wide, multi-sectoral coalitions to strengthen partnerships, build collaboration and support to improve the nutrition and physical activity environment; create a new environment and social norms that make the healthy food and beverage options the daily, easy choice; improve the availability, accessibility and affordability and increase the demand for healthy foods such as fruits and vegetables; increase and improve opportunities for physical activity and improve the physical and built environment around places and institutions that serve SNAP-Ed eligible population groups; develop and support targeted physical activity and nutrition social marketing interventions and provide evidence-based nutrition education focused on behavior change results; engage schools and build support for comprehensive nutrition and physical activity programs that help strengthen and achieve school wellness policies through nutrition education, increased access to physical activity and improved school environments; educate community/partners about policy/legislative changes that can help improve the retail environment; and work with partners to create an environment that supports healthy retail such as small corner stores, healthy mobile vendors, produce stores or farm stands, and develop an Incentive/Recognition Program to incentivize retailers to offer healthier food options.

Specifically, Ventura County SNAP-Ed LIA's will achieve the following three-year objectives:

1. By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 9 SNAP-Ed qualifying neighborhood retail stores, 45 food pantry/food bank distribution sites, senior centers, public housing facilities, and other SNAP-Ed eligible community-based locations through adopted and implemented policy and physical site changes;
2. By September 30, 2019, 25 low resource schools will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers; and
3. By September 30, 2019, 7 Early Childhood Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity environment for participating children.

These objectives allow the LIA's to focus on the larger community change goals within the established parameters of the SNAP-Ed goals and funds. The PSE strategies are detailed in each of the three-year objectives, and are closely related to our community change goals. Ventura County LIA's will focus on the following PSE strategies in the following settings:

- Healthy Retail Environment
- School settings
- Early Childhood Education settings

6. **Partnerships and Collaborative Efforts [County Nutrition Action Plan (CNAP) Partners or comparable]**

Ventura County's workgroup, the Partnership for a Healthy Ventura County, is a multisector coalition focused on creating and supporting environments that promote healthy eating, active living and obesity prevention. The coalition has been meeting for over four years on a monthly basis to exchange information, plan activities, and work toward improving the health and wellbeing of Ventura County residents by finding ways to maximize the group's collective impact in reducing and combating obesity across all ages groups, as well as creating and supporting policy and environmental changes to help residents eat healthier and lead active lives. The group consists of Food and Nutrition Service (FNS) funded and non-funded partners. Non-funded partners serve all county residents across the board, and the funded partners focus on serving SNAP-Ed eligible groups. The FSN funded partners include the LHD, AAA, CWD, Food Bank and Ventura Unified School District. Non-funded partners include Ventura County First 5, Dairy Council of California, Ventura County Office of Education, West Ventura Healthy Eating Active Living (HEAL) Initiative, Conejo School District, Livingston Memorial Nurses Association, Ventura YMCA and others. The Partnership's primary goals are 1) Work with partners to create and support environments across the county that are conducive to healthy eating and active living, 2) Enhance collaboration and coordination of nutrition education efforts, resources and initiative implementation, and 3) Work with local partners and external stakeholders to reduce food insecurity among the poorest and neediest population in the county, including children. The group works with partners to create and support an environment that is conducive to healthy retail including improved corner stores, healthy mobile venting, produce stores or farm stands, and to educate community/partners about policy/legislative changes that can improve the retail environment. The goal of the LHD is to provide infrastructure, coordinate local efforts, and collaborate with partners and stakeholders to maximize the impact of activities that address and promote healthy eating, active living, access to healthy food, obesity prevention, and prevention of other diet and physical activity related chronic diseases. The long term goal is to continue to build on the existing network of partners to create an environment for local families, in which the healthy choice is the easy choice for everyone. An example of ongoing collaboration at the local level, is the LHD's efforts shared with the WIC Program and other agencies such as the Parks and Recreation department with the City of Oxnard. The WIC program is part of most community events hosted by the LHD. In the past, our collaboration included providing taste testing at two of the local WIC clinics, and the goal is to continue collaborating at different levels. Additionally, our collaboration with the Oxnard Scholars Afterschool Program has been ongoing

for several years. This is one the City of Oxnard Parks and Recreation programs. We will rely on our non-funded partners to focus on other areas and aspects of our community change goals. Additionally, the LIA's will promote SNAP-Ed services by connecting with other agencies, such as County Welfare Departments, Catholic Charities, etc. The LIA's will work toward collaborating with the partner agencies to have a link added to their website of each of the respective LIA's, as appropriate, and will provide other means of promoting nutrition educations services, such as flyer and posters.

The LHD is also a partner in the West Ventura HEAL Zone Coalition. The goals of this coalition are similar to those of the Partnership, but rather than being county-wide, the HEAL Zone is focused on a specific community, The West Ventura Avenue, one of our 3 current CX3 neighborhoods, in the city of Ventura. The two coalitions are working to inform, educate, and empower residents of Ventura County to improve their health, as well as working to creating a sustainable environment that promotes health and wellbeing for all. One of the main goals of the two groups is to coordinate efforts to reach a broader portion of the population more efficiently by reducing duplication, and, thereby, achieving greater impact in the health and lives of the individuals and communities served. In many of the CX3 neighborhoods, including West Ventura, many retail markets and locally owned restaurants offer fast foods. Efforts will focus on working with owners and management of these establishments to provide tools and support in offering healthier options for consumers. Work with retailers of this CX3 neighborhood will continue to focus on creating demand for healthier food options by offering food demonstrations, healthy recipe tastings, and providing copies of healthy recipes and cookbooks at multiple retail market locations. By providing participants with healthy ingredient options, modifications to recipes, menu planning and cooking skills, they are more likely to select and prepare healthy meals for their families.

Other County partners include our tobacco and alcohol prevention programs. We will be working with them to combine our healthy retail strategies whenever possible.

7. **Key Messages**

	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners		Other *(specify):*

X	Lean Meat & Beans				
X	Sodium & Potassium				
X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All educational materials, resources, and curricula will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/), and/or FFY 2017-19 USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the California Department of Public Health - Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list.

Ventura County reviewed the approved integrated curriculum list provided by the state agencies to determine appropriate curricula for our target population. Curriculum, materials and resources were chosen to best reflect the needs of the population, as well as the selected SNAP-Ed three-year objectives.

9. **Intervention and Evaluation Plan Narrative Summary**

The implementing agencies in Ventura County, Ventura County Public Health (VCPH) and Area Agency on Aging (AAA), will collaborate to conduct nutrition education and obesity prevention services at SNAP-Ed eligible sites, reaching a large portion of the SNAP-Ed eligible population. The LIA's will be assisted by subcontractors and extenders who will support these efforts. The intervention plan includes activities that provide comprehensive education on proper nutrition and physical activity approaches, which when use in combination provide strong intervention strategies, with the primary goal of delivering focused nutrition education and physical activity (PA) utilizing trained staff and coordinated implementation strategies for direct care and education providers, food service providers, and other staff that interface with and impact children and adults in the multiple settings. Building upon relationships with elementary schools already established within the county, LIA's will continue to provide direct nutrition education and begin to provide physical activity training education. LIA staff will train and support teachers and after-school program staff as extenders to provide direct education in the classroom and in the after school programs. Additionally, based on available data and the 2014 SNAP-Ed County Profile, which show high obesity rates in school age children (24.8%) and adults (23.4%) in Ventura County, nutrition education will also be provided to the adult and older adult SNAP-Ed population groups that will focus on connecting shopping behaviors and choices to improved health outcomes as per MyPlate and Dietary Guidelines. Nutrition education activities are selected based on the identified needs of the population and the aim of supporting State level goals. The planned strategies will place emphasis on selecting target foods and beverages; increasing skills on label reading, menu planning and food budgeting; and increased knowledge of MyPlate recommendation and acceptance of new foods, especially for children in the ECE and school settings. These efforts will be accomplished through coordination and support toward positive change in the local food environment and comprehensive behavior-focused nutrition education and physical activity promotion utilizing evidence-based standards in education delivery, promoting environmental support through community engagement, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with Community Based Organizations (CBOs), and other partners throughout the county.

The interventions progress at the environmental level of the Social Ecological Model (SEM) through the inclusion of policy, system and environmental (PSE) change efforts which include supporting and promoting school wellness policies that promote access to healthy foods, beverages and physical activity. Support and implementation of healthy nutrition and physical activity policies and procedures will be promoted and implementation will be supported in early care and education settings, elementary schools, and after school program settings, which may include standards for all foods and beverages offered, opportunities for daily physical activity, limits on screen time, and quality nutrition education, garden-based and physical activity education, and marketing guidelines for materials posted or shared on site. PSE efforts will also focus on improving the school lunchroom utilizing the Smarter Lunchrooms Movement (SLM) principles and placement strategies. In addition, healthy food and beverage standards for purchase and donated foods collected and distributed at emergency food distribution sites will be implemented to support education efforts to improve nutrition and food resource management among the groups served. AAA will implement systems changes by establishing relationships with food banks and other food distribution organizations to secure new food distribution sites to support Ventura County older adults.

Progressing to the sector level of the SEM, LIA's will continue to work with strategic partners, the Partnership for a Health Ventura County, and other community-wide, multi-sector coalitions to improve nutrition and physical activity at all levels; conduct a community health needs assessment; and prioritize and select approaches unique to the needs of the population of Ventura County. Community partners and stakeholders will be educated about policy and legislative changes, emerging topics, as well as the Smarter Lunchrooms Movement (SLM) principles, which can help improved school lunchrooms and the retail environment, and support efforts in establishing zoning ordinances limiting marketing of less healthy foods and beverages.

An evaluation process will be used to assess effectiveness and improved services for all local objectives and intervention strategies. The evaluation plan includes formative, process, and outcome/impact evaluation activities using State developed tools and surveys. Evaluation results from previous years have been extremely helpful in informing the program and its effectiveness, and these strong efforts will continue. The locally developed Report of Activity Form (RAF) will be used to collect necessary supporting documentation and verify SNAP-Ed Activity Tracking Form. Education and Administration Reporting System (EARs), Activity Tracking Form (ATF), and Semi Annual Report results will be generated from the online ATF. Separate ongoing tracking of direct education by LIA staff and site staff trained by LIA's, such as teachers and after school program site leaders, will continue in an effort to better monitor progress and effectiveness. Impact Outcome Evaluation (IOE) and UC CalFresh approved direct education evaluation tools and SMART objectives, designed to measure change overtime in dietary and physical activity behaviors, food resource management and factors that affect these behaviors will be completed and data collected will be analyzed by LIA's. Participants engaged in Direct Education will be asked to complete evaluation surveys that address, but are not limited to, the following indicators from the Western Region SNAP-Ed Evaluation Framework; Nutrition, Physical Activity and Obesity Prevention Outcomes: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), Physical Activity Behaviors (MT3), and Fruit and Vegetable (LT2), Physical Activity Recommended Levels (LT7), and Entertainment Screen Time (LT8). At the environmental level, LIA's will also report as appropriate on following SNAP-Ed Evaluation Framework priority indicators: Identification of Opportunities (ST4), Partnerships (ST6), Nutrition Supports

Adopted (MT4), and Physical Activity Supports Adopted (MT5). An IOE Plan and Report will be submitted annually by the LHD, and in addition all PSE projects and interventions will be reported using the RE-AIM evaluation framework to assess Reach, Effectiveness, Adoption, Implementation, and Maintenance (RE-AIM). Reports generated from the database will be used to track, evaluate, inform and improve continued PSE program efforts in Ventura County.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	40		0 to 4 years old (Preschool):	600
Female	60		5 to 17 years old (School Age):	20,000
			18 to 59 years old (Adult):	7,800
			60 years old and over (Senior):	725
Total:	100			29,125

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**
By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 9 SNAP-Ed qualifying neighborhood retail stores, 45 food pantry/food bank distribution sites, senior centers, public housing facilities, and other SNAP-Ed eligible community-based locations through adopted and implemented policy and physical site changes.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Healthy corner stores
- Farm to fork
- Healthy food and beverage standards
- Community gardens
- Purchased/donated food

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**
1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, conduct an assessment of the retail environment in up to 3 selected SNAP-Ed qualifying neighborhoods.
    b. By Sept 30, 2017 develop a healthy retail recognition program to be implemented in Year 2 and Year 3 to include up to 5 selected SNAP-Ed qualifying neighborhoods.
    c. By September 30, 2017, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, provide twice yearly owner/retail staff education opportunities to at least 3 retail stores, provide support for one

Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at EBT-linked farmers' markets at up to 1 qualifying site.

d. By September 30, 2017 3 retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.
e. By September 30, 2017, provide food resource management education to adults at 10 community sites and promote the retail, emergency food, CalFresh and farmers' market opportunities to access healthy fruits, vegetables and beverages to class participants.
f. By September 30, 2017, implement approved SNAP-Ed nutrition education materials, resources and/or curriculum in 5 senior centers or public housing facilities, and at 10 other SNAP-Ed approved community-based locations.
g. By September 30, 2017, establish relationships with one food distribution organization in hopes of securing new food distribution sites for older adults and identify potential future distribution sites.
h. By September 30, 2017, establish relationships and meet with multiple stakeholders to discuss potential for new community gardens in up to one SNAP-Ed eligible community.
i. By September 30, 2017, facilitate and participate at multiple community events conducting indirect education at SNAP-Ed eligible communities.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By Sept 30, 2018, implement a healthy retailer recognition and incentive program in up to 3 selected SNAP-Ed qualifying neighborhoods.
   b. By September 30, 2018, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least 3 additional retail stores, provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at EBT-linked farmers' markets at 1 additional qualifying site.
   c. By September 30, 2018, 3 additional retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.
   d. By September 30, 2018, provide food resource management education to adults at 10 additional community sites and promote the retail, emergency food, CalFresh and farmers' market opportunities to access healthy fruits, vegetables and beverages to class participants.
   e. By September 30, 2018, implement approved SNAP-Ed nutrition education materials, resources and/or curriculum in 5 additional senior centers or public housing facilities, and at 10 additional SNAP-Ed approved community- based locations.
   f. By September 30, 2018, work together with one food distribution organization and establish 2 new food distribution sites at either senior centers or public housing facilities.

g. By September 30, 2018, establish 1 new community garden site in a SNAP-Ed eligible community, and continue to meet with partners and local stakeholder to plan and to find the necessary resources to start the garden.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By Sept 30, 2019, implement a healthy retailer recognition and incentive program in up to 2 additional selected SNAP-Ed qualifying neighborhoods.
   b. By September 30, 2019, provide healthy food and beverage merchandising materials, conduct quarterly taste testing of healthy food/beverage recipes, and provide twice yearly owner/retail staff education opportunities to at least 3 additional retail stores and provide support for one Fruit and Veggie Fest marketing event in at least one qualifying retail location and conduct indirect education at EBT-linked farmers' markets at 1 additional qualifying site.
   c. By September 30, 2019, 3 additional retail stores in SNAP-Ed qualifying areas will increase access and/or promotion of healthy foods and beverages.
   d. By September 30, 2019, provide food resource management education to adults at 10 additional community sites and promote the retail, emergency food, CalFresh and farmers' market opportunities to access healthy fruits, vegetables and beverages to class participants.
   e. By September 30, 2019, implement approved SNAP-Ed nutrition education materials, resources and/or curriculum in 5 additional senior centers or public housing facilities, and at 10 additional SNAP-Ed approved community-based locations.
   f. By September 30, 2019, work together with one food distribution organization and establish 2 new food distribution sites at either senior centers or public housing facilities.
   g. By September 30, 2019, establish, support and maintain 1 new community garden site in a SNAP-Ed eligible community.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Ventura County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):

By September 30, 2019, increase access to and demand for healthy fruits, vegetables, and beverages at 9 SNAP-Ed qualifying neighborhood retail stores, 45 food pantry/food bank distribution sites, senior centers, public housing facilities, and other SNAP-Ed eligible community-based locations through adopted and implemented policy and physical site changes.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Provide education and technical assistance sessions to 4-6 community partners, youth and/or residents to teach skills needed to conduct retail assessments.	( ) CED ( ) CEI ( ) MPR ( ) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X) Year 2: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X) Year 3: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X)	Sign-in Sheets; training documents; meetings log
1.2	Conduct baseline retail assessments at grocery stores, independent/corner stores, and food banks/pantries in 3 select SNAP- Ed qualifying areas that cater to eligible families.	( ) CED ( ) CEI ( ) MPR (X) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X) Year 2: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X) Year 3: Q1 ( ) Q2 ( ) Q3 (X) Q4 (X)	Retail assessments; Neighborhood boundaries surveyed

1.3	Review assessments and summarize findings. As relevant, incorporate findings from Healthy Stores Healthy Communities survey data. Identify retail partners within the qualifying neighborhoods to approach then develop, and implement Healthy Retail changes.	( ) CED ( ) CEI ( ) MPR (X) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 Q2 Q3 Q4 ( ) ( ) ( ) ( ) Year 2: Q1 Q2 Q3 Q4 X X X X Year 3: Q1 Q2 Q3 Q4 X X X X	Correspondence; Partner listing; Retail logs
1.4	Provide healthy marketing materials, which may include NEOPB Retail and Harvest of the Month signage, posters, newsletters, and NEOPB recipe cards to 9 SNAP-Ed qualifying retailers.	( ) CED (X) CEI (X) MPR ( ) C&C ( ) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 Q2 Q3 Q4 X X X X Year 2: Q1 Q2 Q3 Q4 X X X X Year 3: Q1 Q2 Q3 Q4 X X X X	Before and after photos; Retail logs
1.5	Educators will provide culturally appropriate indirect education at 9 SNAP-Ed approved retail locations and at 3 EBT-linked farmers' market sites in qualifying census tracts reaching a minimum of 125 adults.	( ) CED (X) CEI ( ) MPR ( ) C&C ( ) TTA	( ) CWD (X) LHD (X) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 Q2 Q3 Q4 X X X X Year 2: Q1 Q2 Q3 Q4 X X X X Year 3: Q1 Q2 Q3 Q4 X X X X	EARS reporting; ATF reporting; NEOPB progress reports; Informational flyers; photos

1.6	Educate 9 independent retailer managers/owners on the health importance of fruits, vegetables and healthy beverages.	CED: ; CEI: ; MPR: ; C&C: ; X TTA	CWD: ; X LHD; AAA: ; UCCE: ; CCC: :	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Sign-in sheets; Materials used
1.7	Educate 3 of independent retailer managers/owners on: proper fruit and vegetable storage and display protocol to help improve the quality and quantity of fruits and vegetables available to local SNAP-Ed-eligible residents. Provide training and technical assistance as needed.	CED: ; CEI: ; MPR: ; C&C: ; X TTA	CWD: ; X LHD; AAA: ; UCCE: ; CCC: :	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	EARS reporting; ATF reporting; NEOPB progress reports; Training agendas; Sign-in sheets
1.8	Plan and conduct 1 Fruit and Veggie fest celebration at one qualifying retail site annually	CED: ; X CEI; X MPR; X C&C; TTA:	CWD: ; X LHD; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 , Q2 X, Q3 X, Q4 X Year 2: Q1 , Q2 X, Q3 X, Q4 X Year 3: Q1 , Q2 X, Q3 X, Q4 X	EARS reporting; ATF reporting; NEOPB progress reports; On File: Informational flyers; photos

1.9	Provide leadership to retail partners to establish a "Healthy Retail Recognition Program" plan. Implement plan. The Healthy Retail Recognition Program will signal to area residents and families that healthy food and beverages are available at that retail location. Integrate resources and tools available through the Healthy Stores Healthy Communities program.	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Meetings log; Meeting minutes; Meeting agendas; Health Retail Recognition Program plan
1.10	Prepare and conduct education and/or present assessment results such as CX3 annually to county leaders on the importance of access to healthy foods and beverages as it relates to chronic disease and obesity prevention. Share assessment results and current research on best public health practices to achieve improved access.	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC: :	Year 1: Q1 , Q2 , Q3 , Q4 X Year 2: Q1 , Q2 , Q3 , Q4 X Year 3: Q1 , Q2 , Q3 , Q4 X	Meeting agendas; Meeting minutes; Presentation

1.11	Conduct post-intervention retail assessments at the 5 grocery and/or independent/corner stores receiving interventions to assess any changes in access to healthy foods and beverages.	( ) CED ( ) CEI ( ) MPR (X) C&C (X) TTA	( ) CWD (X) LHD ( ) AAA ( ) UCCE ( ) CCC	CWD: LHD: AAA: UCCE: CCC: :	Year 1 Q1 Q2 Q3 Q4 ( ) ( ) ( ) ( ) Year 2 Q1 Q2 Q3 Q4 ( ) ( ) ( ) ( ) Year 3 Q1 Q2 Q3 Q4 ( ) ( ) X X	Assessment results and summary
1.12	Educators will provide culturally appropriate series-based direct education at 30 SNAP-Ed approved community based locations. • In Year 1, Provide direct nutrition education using approved curricula through direct delivery to 2,800 unduplicated SNAP-Ed adult participants at approved community-based sites. • In Year 2, provide direct nutrition education using approved curricula through direct delivery to 2,500 unduplicated SNAP-Ed adult participants at approved community-based sites. • In Year 3, provide direct nutrition education using approved curricula through direct delivery to 2,500 unduplicated SNAP-Ed older adult participants at approved senior centers/public housing facilities sites. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**
By September 30, 2019, 25 low resource schools will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- School wellness
- Farm to school
- Healthy food and beverage standards
- School gardens
- Structured physical activity
- Smarter Lunchroom Movement (SLM)

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, at 25 low-resource school sites, LIA educators and 15 trained extenders (classroom teachers and afterschool staff) will reach 8,000 students with direct education and 8,000 parents with indirect education.
    b. By September 30, 2017, LIA staff will work with partners including school wellness committees or other similar groups to improve 3 of the 25 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
    c. By September 30, 2017 LIA staff will work with partners including school wellness committees or other similar groups to implement School Wellness Policies (SWP) and make nutrition and physical activity related environmental or policy changes at 5 of 25 of these sites.

d. By September 30, 2017, a new structured PA program such as CATCH will be implemented by 5 trained extenders such as after school program staff at 5 of the 25 low-resource school sites already receiving nutrition education.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, at 25 low-resource school sites, LIA educators and 20 trained extenders (classroom teachers and after school program staff) will reach 6,000 elementary students with direct education and 6,000 parents with indirect education.
   b. By September 30, 2018, LIA staff will work with partners including school wellness committees or other similar groups to improve 6 of the 25 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
   c. By September 30, 2018, LIA staff will work with partners including school wellness committees or other similar groups to implement School Wellness Policies (SWP) and make nutrition and physical activity related environmental or policy changes at 10 of 25 of these sites.
   d. By September 30, 2018, a new structured PA program such as CATCH will be implemented by 10 trained extenders such as after school program staff at 10 of the 25 low-resource school sites already receiving nutrition education.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, at 25 low-resource school sites, LIA educators and 25 trained extenders (classroom teachers and afterschool staff) will reach 6,000 elementary students with direct education and 6,000 parents with indirect education.
   b. By September 30, 2019, LIA staff will work with partners including school wellness committees or other similar groups to improve 9 of the 25 school environments by establishing or reinvigorating school gardens and/or adopting SLM strategies.
   c. By September 30, 2019, LIA staff will work with partners including school wellness committees or other similar groups to implement School Wellness Policies (SWP) and make nutrition and physical activity related environmental or policy changes at 15 of 25 of these sites.
   d. By September 30, 2019, a new structured PA program such as CATCH will be implemented by 15 trained extenders such as after school program staff at 15 of the 25 low-resource school sites already receiving nutrition education.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Ventura County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/23/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, 25 low resource schools will make changes to school policies, physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and teachers.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide direct nutrition education at 25 SNAP-Ed approved school sites using approved curricula either through direct delivery or by extenders: • Year 1, reaching 8,000 youth at 25 SNAP-Ed qualified schools. • Year 2, reaching 6,000 youth at 25 SNAP-Ed qualified schools. • Year 3, reaching 6,000 youth at 25 SNAP-Ed qualified schools. ****Time Frame: Year & Quarter:**

Year 1 (FFY 2017); Year 2 (FFY 2018); Year 3 (FFY 2019)

Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**
By September 30, 2019, 7 Early Childhood Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity environment for participating children.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**
- Develop and/or implement written site wellness policies and procedures to improve the nutrition and physical activity environment
- Increase access to healthy foods, beverages and opportunities for active play.
- Implement changes in the preschool environment that support healthy eating and promote physical activity.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30, 2017, provide nutrition education and physical activity promotion activities to reach 200 SNAP-Ed eligible preschool-age children their families with direct education; and will provide training and TA towards the exploration and development of site wellness policies at up to 7 ECE sites.
2. **FFY 2018 (Year 2) Objective(s):**
    a. By September 30, 2018, provide nutrition education and physical activity promotion activities to reach an additional 200 SNAP-Ed eligible preschool-age children their families with direct education at up to 7 ECE sites; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in 2 of these ECE sites; including making at least one new healthy site change per site to improve the nutrition and physical activity environment for participating children.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, provide nutrition education and physical activity promotion activities to reach an additional 200 SNAP-Ed eligible preschool-age children their families with direct education at up to 7 ECE sites; and will provide training and TA, as well as support the development and/or implementation of site wellness policies and procedures in 3 additional ECE sites; including making at least one new healthy site change per site to improve the nutrition and physical activity environment for participating children.

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):
By September 30, 2019, 7 Early Childhood Education (ECE) sites will develop and/or implement site wellness policies and procedures, including making healthy site changes to improve the nutrition and physical activity environment for participating children.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Establish relationships and meet with key contacts for organizations and agencies focused on serving young children and their families, including but not limited to local Child Care Resource and Referral (R & R) agency (ies); the First 5 Children and Families Commission (First 5); Head Start. 	Budget Adjustment: Add Delete Increase Decrease	Budget Adjustment: Last Amount Approved	Budget Item	Description/Justification	Cost per Item	# of Items	Total	Budget Adjustment: Budget Justification
1			Copying/Printing	Class materials, handouts, training materials, agendas, newsletters, flyers, etc.	$0.85	11000	$9,350	
2			Food Demonstrations	Food and supplies: ingredients, paper goods, kitchen utensils, small kitchen equipment, water dspensers, containers for storing and transporting food necessary to conduct food demostrations and education in the community. (Cost not to exceed $2.50 per participant.)	$2.50	4000	$10,000	
3			Materials	Materials and supplies for program interventions not to exceed $4.00 per participant.	$4.00	300	$1,200	
4			Garden-Based Education	Materials and supplies necessary to conduct garden-based nutrtion education at school and community venues, such as seeds, edible plants, small tools, planting soil, garden box construction materials, etc. Garden box construction materials are employed in the construction of raised beds and planters as part of promoting and establishing vegetable gardens and providing garden-based nutrition education. Garden boxes are especially important when working with population groups with physical limitations, such as seniors with mobility issues due to aging, children with special needs who are unable to stand and are wheelchair bound, and individuals with other physical dis-capacities. Additionally, schools, pre-schools and community sites with inadequate space or with concrete flooring where in-ground gardening is not possible, either due to the flooring material or contaminants present in the soil, pose a special challenges to building in-ground vegetable gardens and for which garden boxes are the best solution. In FFY 2017, the Nutrition Education and Obesity Prevention (NEOP) Program supported the start-up of vegetable gardens, by assisting with lumber and other allowable supplies, at the following approved sites: • Channel Islands High School in Oxnard raised garden beds – provided lumber to build six vegetable garden boxes. • Two Raised-bed planters built at the Camino del Sol Community Garden are used by seniors with physical limitations to grow vegetables for their families. • Children with special needs and limited mobility from the CCS Oxnard Therapy Unit have been able to participate in the garden-based nutrition education activities offered at the Camino del Sol Community Garden, due in part to the efforts from volunteers and staff in building a raised-bed garden box, designed specifically to allow wheelchair access.	$20.00	207	$4,140	
5			Purchase Orders	Purchase order requisition fees for materials and services ($850/quarter)	$850.00	4	$3,400

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yolo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

County Name: **Yolo County**

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension: University of California Cooperative Extension, Yolo)
X	California Department of Public Health: CDPH: (Local Health Department: Yolo County Health and Human Services)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.

- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

3. **Jurisdiction Description**

Yolo County lies in the heartland of the Central Valley. It is bounded on the south by the Putah Creek and Solano County; on the north by Colusa County; on the west by the Blue Ridge Mountains; and on the east by the Sacramento River. The county is mostly rural and has three larger cities: Woodland in the central region, West Sacramento by the Sacramento River, and Davis near Putah Creek. The city of Winters (near Putah Creek, west of Davis) and the town of Esparto (in the Capay Valley near the Cache Creek Valley Stream) make up the semi-urban areas. The main rural areas are as follows: Madison (in the western plain); Zamora and Dunnigan (in the Dunnigan Hills); Clarksburg and Knights Landing (near the Sacramento River); Rumsey, Guinda, and Capay (in the Capay Valley). Yolo County has 650,880 acres (1,013 square miles) of land, of which approximately 80 percent is flat and mostly agricultural. The land increases in elevation starting at the eastern boundary (the Sacramento River), below sea level in the delta area, to a height of 3,046 feet on the summit of Berryessa Peak in the western Blue Ridge Mountains.

The main transportation routes are Interstate 5, Interstate 505, Interstate 80, Highway 113, Highway 16, and Highway 45. The Yolo County Transit Authority's public transportation system connects West Sacramento, Davis, Woodland, Winters, Madison, Esparto, Capay, Dunnigan, Knights Landing, and the town of Yolo.

According to 2014 US Census Bureau data, the population is estimated at 207, 590 people. Of the total population, 21.7% is under 18 years of age, and 11.5% is over 65 years of age. The median age is 30.4 years of age but varies by region especially due to the large student population in Davis. Yolo County is comprised of 51.3% females and 48.8% males. Of 70,347 households, over 21,775 have at least one child under 18 years of age. Nearly 27% of these family households are led by single parents. There are nearly 5,400 households where a senior is living alone. It is estimated that there are 500 homeless persons in Yolo County, representing 0.2% of the populations. In addition, there are 23,445 undocumented immigrants living in Yolo County. Approximately 34% of the total population is SNAP-Ed eligible (76,104 residents), and this includes 17,657 children, 47957 adults, and 5,490 seniors.

Yolo County has a higher than statewide White population percentage and slightly lower Black/African American population than average. Approximately 31% of the total population is Hispanic/Latino and 35% of the population over the age of 5 speaks a language other than English at home, with 60% of this subset speaking Spanish. Nearly 20% of all residents report speaking Spanish at home. About 85% of residents report speaking English at least "very well."

From 2009 to 2013, the state median household income was $61,094, about 8% higher than the county median of $55,918. 2009-2013 data shows 19.1% of the population living in poverty, which is approximately 4% higher than the state average. The largest employers in Yolo County included the University of California Davis, the County of Yolo, and the Cache Creek Casino Resort. Unemployment rates have been trending downward in the past several years, and are currently at 6.5%. However, this rate is still slightly higher than the state unemployment rate of 5.8%, and higher than other nearby counties such as Sacramento and Placer. West Sacramento has the highest unemployment rate (7.3%) and Davis has the lowest (4.3%). There are 41 census tracks in Yolo County, but only 9 SNAP-Ed qualifying census tracks (qualified by all races). The qualifying census tracks are located mainly in West Sacramento with one in Woodland and Davis as well.

There are 61 schools, in 5 districts in the county, with 53.6% of students qualifying for a free or reduced price meal (FRPM). According to the California Department of Education, there are 29,345 students enrolled in K-12th grade in the county. Approximately 47% of students enrolled in public school are

Hispanic or Latino, 35.3% are white and 9.6% are Asian. County-wide, 21.6% of students are English language learners, and the range is 8.9% to 34.8%, depending on the district.

Obesity/overweight and chronic disease risks are a concern for Yolo County residents. According to the California Health Information Survey (CHIS) and the CDE, 53.7% of Yolo County residents are overweight or obese. Further, 23.7% of youth aged 12-17 are overweight and 12.4% are obese. The California Physical Fitness Report for students show that in the 2014-15 school year only 64% of 9th graders were in the healthy fitness zone for aerobic capacity. In children ages 2-11 years old, only 32.5% report being physically active at least an hour every day (CHIS data). In addition, 14% of adults over 20 reported having no leisure time physical activity whatsoever. Less than 5% of Yolo County residents walk or bike to work.

4. **Community Assessment**

According to the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institutes, Yolo County ranks 12 out of California's 57 counties for overall health. The county has slightly better than state averages rankings for obesity rates, smoking rates, and cancer rates, but a slightly lower than state index for food environments (7.3 compared with a California overall score of 7.5). Approximately 93% of residents have access to physical activity opportunities, and only 17% of residents report having poor or fair health.

In addition to these data listed above, a variety of additional data sources are used to determine the priorities outlined in the FFY17-19 Integrated Work Plan. These data sources include:

- Fitnessgram data from the California Department of Education (CDE)
- Yolo County Community Health Assessment (CHA)
- Yolo County Community Health Improvement Plan (CHIP)
- California Department of Public Health (CDPH) County Health Status profiles
- CDSS data on CalFresh participation (interactive web-based spreadsheet with County data)
- Hunger in America- Yolo County 2014 report
- First 5 Yolo needs assessment
- Children Now, California County Data Book Information
- Previous CX3 assessments and reassessments of participating retail outlets

Food security and access to healthy food are important issues in Yolo County. According to the 2014 Hunger in America Report, released by Feeding America, the Yolo County Food Bank reported that in 2013, 44,000 unduplicated individuals (approximately 14,800 households) accessed charitable food resources in the Food Bank service region. This indicates that 21% of the total population has utilized a food resource in the past year. Of those patrons, 91% report being food insecure and 70% are Hispanic. Only 39% of households reported receiving SNAP (CalFresh) benefits yet 33.6% of low-income parents experience food insecurity. Further, only 44% of agencies surveyed in Yolo County who provide food or meal distributions indicated that they also provide some type of nutrition

education resources (classes, literature, cooking demos, etc.). Yolo County SNAP-Ed programs continue working to increase this percentage by outreach and providing education materials to partner agencies, offering direct education classes at partner agency qualified sites, and by connecting community partners through the Community Nutrition Action Partnership (CNAP). Yolo County continues to struggle with its capacity to reach and enroll all SNAP eligible residents. The 2013 CA Food Policy Advocates report indicated that Yolo County ranked 56 out of 58 for Calfresh enrollment, however the county ranking has improved to 53 out of 58 in 2015. Performance is measured based on The Program Access Index (PAI). Yolo County's PAI dropped from .408 in 2014 to .387 in 2015 due to a new methodology for scoring. However, the PAI ranking is misleading. If you exclude the City of Davis from the Yolo County numbers then the PAI score would be .759. The PAI score for West Sacramento is .735 and for Woodland it is .844. This signifies a strong capacity to reach and enroll SNAP eligible residents. Concerted efforts to increase CalFresh enrollment have been underway over the past two years, and there is an upward trend in the number of participants, particularly at UC Davis. From fall quarter of 2014 to fall quarter of 2015 Calfresh applications increased 304% on the UC Davis campus, but still there is work to do. The Board of Supervisors has made food security a priority, and has been routinely gathering together agencies and organizations to work towards reducing the issue in the county. Together, these agencies have helped to further promote the CalFresh program and assist DESS with increasing participation. The efforts seem to be working. Data between fiscal year 14/15 and now shows upward trends in enrollment for all cities in Yolo County, with an 11% overall increase in the percentage of SNAP eligible residents enrolled. This suggests that outreach and retention efforts are improving. However, overall, the numbers exemplify the need for increased CalFresh outreach, particularly to the UC Davis student population and in rural areas, and the need for education on food resource management and nutrition, as well as more venues for residents to attain access to healthy foods, such as community or school gardens. The Community garden and retail PSE efforts, as well as the focus on environmental supports to promote SNAP-Ed messages in the community that are outlined the work plan below are one channel to address food access and food insecurity in Yolo County.

Similar to CalFresh, the Yolo County WIC program is working to increase enrollment and participation. Currently, approximately 4,300 clients participate in WIC. Caseload statewide and nationally has been dropping over the past few years, and although Yolo County WIC is funded to serve 5,290 clients, approximately 81% are currently coming in for services, the lowest we've seen in over 5 years. SNAP-Ed partners and CNAP partners collaborate with both CalFresh and WIC to increase visibility of the programs with the overall goal of increasing the number of eligible residents who participate and receive these benefits.

Food access for residents in all regions of Yolo County is a challenge. One issue in Yolo County is the proportion of the county that is considered rural and the proportion of housing that is not located proximally to a major food outlet. Approximately 18% of residents have "low food access" – meaning that they live over a mile from a large supermarket or grocery store in urban areas or 10 miles in rural areas. Yolo County is also largely agriculture, yet 98% of food grown in Yolo County is exported out of the county. Coordinated efforts around farm to school/fork, community messages to promote fresh produce consumption (such as Harvest of the Month), as well as school and community gardens and retail activities will increase the awareness and importance of consuming fresh, local fruits and vegetables, which will improve the health of the target population, and the economic viability of agriculture and food retail outlets.

Overweight and obesity are health concerns in Yolo County, as they contribute to diabetes and other chronic diseases, and may be associated with poor nutrition for those who are food insecure. The Community Health Assessment (described in the section below) indicates that residents across the county view obesity and diabetes as top health concerns. According to the California Health Information Survey (CHIS), 53.1% of adults are overweight or obese and 37% of

youth are overweight or obese (just 1% lower than the California average). Fitnessgram data indicates that only 56.8% of 5th grade and 64% of 9th graders are in the healthy zone for body composition. Food and beverage environments can contribute to obesity and overweight risks, with low-income residents and youth being disproportionately impacted by poor food environments and junk food availability and messaging. Only 30.8% of Yolo County adults reported eating 3+ fruits and vegetables on the previous day, and 21% of Hispanic/Latinos consume two or more sugary drinks within a day. Between 2012 and 2014 fast food consumption of in adults has declined. CHIS data indicate a decline of 13% in the number of adults who report consuming fast food twice a week and an increase of 26% of adults who report consuming no fast food in the past week. However, teen fast food consumption data has been relatively stable since 2012, with approximately 32.8% of teens reporting now fast food consumption in the past week, and 19.6% reporting fast food consumption twice in the past week. Finally, CHIS data for youth under 11 years old show that, while more youth are consuming fast food once per week (31.7% in 2014 compared with 12.9% in 2012), only 12% consumed fast food twice per week in 2014 (compared with 29% in 2012) and thrice weekly consumption dropped from 12.5% to 4.5% in the same period. These data may suggest that efforts underway over the past few years to encourage residents to reduce unhealthy food consumption (quantity and frequency) are having positive impacts.

A 2013 needs assessment conducted by Woodland HealthCare (described further in the next section) determined that the top 10 priority areas included access to affordable foods, health education and nutrition education, and safe places to be active. This data reaffirms that the activities and objectives outlined below in the work plan are priority needs in the community.

Because of the high rate of overweight and obesity in Yolo County, direct/indirect education and PSE supports known to reduce obesity risk are of high priority. Frequent fast food consumption is associated with higher BMI's. People need the skills to be able to prepare foods at home so that they do not rely on convenience foods. This has been shown to decrease added sugar, sodium and solid fats in the diet, while increase fruits, vegetables and whole grains

Overall in the community, there continues to be a growing need and interest in nutrition education and resources. A 2014 needs assessment performed by First 5 Yolo indicated that parents listed nutrition education as the second highest priority. The recent development of the Community Health Improvement Plan (CHIP), an effort lead by the Yolo County Healthy Yolo team after completion of the CHA, prioritized access to and improvements in consumption rates for fresh fruits and vegetables as a primary community goal over the next 5 years. The CHIP goals were set by a group of community stakeholders, including CNAP partners, medical professionals, County partners, and involved residents. The CHIP workgroups also expressed interest in developing policies and best practices that support a healthy food environment for all residents. Community and partner concern about food environments and the obesity and diabetes risks, coupled with the data presented above helped inform the sectoral level activities presented in this work plan.

Physical activity levels are correlated to obesity and chronic disease risk. While 79% of Yolo County resides live within ½ mile of a park (well above the state average), there is a need for improvement in the proportion of adults and youth regularly engaging in physical activity. Current efforts are underway to improve physical activity levels in youth in the Woodland Joint Unified School district (WJUSD), which is the largest district in the county and also the district with the lowest percentage of students in the healthy fitness zone. The county has recently embarked on a Safe Routes to School project with WJUSD elementary and middle school youth to increase the percentage of students who walk and bike to school (currently at 20% for walking and 2% for biking). A similar program is

happening in the Washington Unified School District (West Sacramento), the second largest district, and improvements of up to 30% have been seen in the number of youth who walk and bike to school at certain schools. The City of Davis also has as Safe Routes to School program, and data from this program show that about 1/3 of all elementary school youth walk or bike to school. The city is working to sustain these numbers while increasing community engagement in the program. The SNAP-Ed program will support these efforts through providing nutrition education messages/materials and technical assistance to school wellness committees and school stakeholders on how to link nutrition and physical activity. Additionally SNAP-Ed programs will support community-wide efforts to encourage physical activity such as the Woodland Commit2Fit program (engaging 600 participants annually) and through direct education using approved SNAP-Ed curriculum.

The retail environment is one source of challenges and barriers to healthy eating. Yolo County retailers are being evaluated by the LHD SNAP-Ed retail staff through the Communities of Excellence process (CX3), as well as the Tobacco Program's Healthy Stores, Healthy Community Programs. CX3 assessment data for 14 retail environments showed some common issues and discoveries that paint the picture of the food retail environment in qualifying census tracts:

- Over half of the retail food stores in each neighborhood are convenience stores that were rated either as poor or marginal quality.
- Convenient public transit limits the reach to supermarkets and grocery stores.
- Limited farmers market to access local produce.
- # of fast food outlets outweighs the number of supermarket/grocery stores.
- Most convenience stores either did not carry or had limited availability of fresh fruits or vegetables.
- Limited interior/exterior for healthy marketing.

In regards to the Healthy Stores, Health Community assessments, scientific surveys were conducted by health departments throughout California to assess product marketing and the availability of healthy and unhealthy options offered in stores that sell tobacco – the first time in California that tobacco, alcohol and food were analyzed together. In Yolo County, 96 stores were surveyed. This included convenience, supermarket, liquor, tobacco. Relevant data include:

69.8% of the stores have unhealthy exterior advertising (tobacco, alcohol or food)

- 17.7% had healthy exterior advertising
- 40% had low or non-fat milk as an option
- 77.1% had sugary drinks at the check-out compared to the statewide average of 56.9%. 63.3% of those with sugary drinks at check-out were also near schools.
- 56.3% had any fresh fruit or vegetable25.9% had a good selection of good quality fruits/vegetables
- When comparing low to not low income areas, 22.2% of the stores had a good selection of good quality fruits and vegetables in low income areas compared to 29.6% in no- low income areas2.5% accept CalFresh and sold a good selection of good quality fresh fruits/vegetables
- 65.6% accept CalFresh or WIC

Stores that participated in the CX3 and the Healthy Stores, Healthy Communities assessments will be reassessed in 2016. At this time the most current CX3 and Healthy Store, Healthy Community data informed the choice to continue our robust retail program. LIAs plan to augment the existing work by developing of a retail recognition program that will help elevate awareness about retailers who are working to improve the offerings of healthy food and beverages and the overall environment of their retail outlet as well as encourage residents to take advantage of the improved access to healthy foods.

5. **Community Change Goals**

Yolo County has several community change goal initiatives underway that are relevant to the work plan objectives and activities. A common theme among change goals includes chronic disease prevention/obesity prevention and access to healthy food and places to be physically active. These concerns inform the work of SNAP-Ed programs in Yolo County, and are discussed further below.

The *Healthy Yolo* program, led by the Yolo County Health and Human Services Community Health Branch, began working on community change goals in 2013, starting with community surveys/focus groups, and development of the Community Health Assessment (CHA) in 2014. Chronic disease prevention (particularly diabetes and obesity) was top of the list in all communities in Yolo County, and therefore one of three focus areas in the development of the Community Health Improvement Plan (CHIP). In addition to obesity prevention/nutrition education goals, there are several other pervasive concerns facing Yolo County residents and service providers. Mental health concerns, including hospitalization rates due to psychosis and/or substance abuse, the incidence of youth who may be at risk for suicide or self-inflicted injuries, and the cost of seeking mental health treatment are challenges to the community, according to the CHA and the 2014 Health Care Access Survey. Further, issues relevant to the aging population, such as transportation and access to service, food security, and access to safe and affordable housing for older adults are key priorities to address as well. Both the mental health concerns and the issues affecting older adults are prioritized as focus areas in the Yolo County Community Health Improvement Plan (CHIP), developed in 2015. Chronic disease prevention and management is the third focus of the CHIP, and SNAP-Ed work is highlighted in this focus area. Development of the CHIP involved 32 community partners and County agencies, several of which are also CNAP partners.

Although SNAP-Ed work focuses on strategies for obesity prevention, including physical activity and nutrition promotion, it is recognized among CNAP partners and the CHIP work groups that chronic disease prevention efforts also impact issues related to mental health, and that older adults are also impacted by chronic disease efforts, particularly in the area of improving food security and access to healthy, nutritious food on a consistent basis. Thus, SNAP-Ed LIAs feel strongly that the objectives outlined for FFY17-19 will also dovetail with the efforts underway to improve mental health resources and challenges facing the older adults in our county. The LHD NEOP staff are actively involved in the CHIP work groups and CHIP process, and therefore interfacing with partner agencies serving older adults to ensure that resources are available to them to serve their community.

The chronic disease prevention strategies outlined in the CHIP were strongly influenced by the work of SNAP-Ed partners. The objectives developed in the CHIP in this focus area include:

- Strengthening the support network for chronic disease prevention and management
- Increase the impact of community gardens
- Increase consumption of fruits and vegetables
- Decrease consumption of sugar sweetened beverages
- Increase the percentage of the population adhering to the recommended physical activity standards
- Increase access to preventive services
- Decrease youth access to tobacco products

LIAs will contribute to assessing progress toward achieving the goals listed above by consistently participating in CHIP work groups to share data that demonstrates progress on the goals and collaborating with partners to optimize the reach of SNAP-Ed programs to address the objectives. LIAs will also serve as subject matter experts to CHIP work group partners and can provide training and materials as needed.

Additionally, the sectoral level activities chosen by the LIAs also address some of the focus areas of the CHIP. Sugar-sweetened beverage consumption is a widespread concern among CHIP and CNAP partners, particularly with youth, and thus the LIAs will support efforts for one city in Yolo County to adopt a sugar-sweetened beverage ordinance that changes the default beverage available in kid's meals to milk/water/100% juice. Further, LIAs will develop a healthy retail recognition program that elevates the work of retailers who are improving the food and beverage environments of their stores to increase access to healthy foods and beverages for SNAP-Ed eligible residents, including improving access to fresh produce, reducing access to SSBs, and improving availability of WIC-approved foods. LIAs will also work in collaboration with the Yolo County Tobacco Prevention program to identify healthy retail recognition guidelines and awardees. The Tobacco program also has a retail program and will be reassessing stores in 2016 as part of the *Healthy Stores, Healthy Communities* state-wide program.

The Yolo CNAP, led by Community Health NEOP staff, is a thriving collaborative of over 20 partners working in the realm of healthy eating, active living. The CNAP has been meeting at least quarterly since 2006, when the first action plan was developed. The CNAP action plan was revised in early 2015 to reflect current concerns around healthy eating and active living. Many of the CNAP goals are echoed in the CHIP, as well as in the Woodland Healthcare needs assessment, outlined below. The CNAP goals are listed in more detail in the following section.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yolo County **Three-Year** **Rev. 5/24/2017**

Integrated Work Plan

FFY 2017–2019

1. Increase partnership and collaboration among CNAP partners
    a. Improve attendance at CNAP meetings
    b. Support CNAP initiatives through monthly emails and social media promotion
    c. Participation in CNAP partner events and activities
2. Increase participation in food assistance programs
    a. Promote CalFresh at partner events
    b. Educate partners about various food assistance programs/food distribution locations
    c. Promote fruit and vegetable consumption in venues where food distribution occurs
3. Encourage residents to following the dietary guidelines for Americans
    a. Offer assistance to school districts about wellness policy updates that include provisions for PA and Farm to School
    b. Provide nutrition education and resources to CNAP partners to help partners promote guidance in the Dietary Guidelines for Americans
    c. Coordinated efforts around core messages such as MyPlate, RYD, HOTM in various environments
    d. Support the Farm to School initiative in Yolo County (Sub-group of CNAP)
4. Actions to encourage active living
    a. Maintain a resource list of free or low-cost PA opportunities in the County
    b. Develop a coordinated message on PA based on the Dietary Guidelines
    c. Support Active Transportation Program (ATP) and SRTS initiatives in the County (sub-group of CNAP)

UCCE and the LHD will both play a key role in fulfilling the goals developed by the CNAP group. NEOP staff will continue to facilitate the quarterly CNAP meetings, which encourage collaboration and resource sharing, as well as data sharing among partners. Consistently we see that participation in CNAP leads to better informed partners who can share resources with clients, which improves residents' access to health care services, food, physical activity opportunities, and eligibility services. NEOP will also continue to provide training and technical assistance to CNAP partners to help them utilize the Harvest of the Month Campaign, Rethink Your Drink, and MyPlate tools and materials. Further, NEOP is working with 211-Yolo to develop a food resource management guide that will

be distributed among all CNAP partners and HHSA programs to help inform low-income residents about locations and times of food distribution sites throughout the county.

Also, in 2015 a CNAP sub-group that is facilitated by the LHD NEOP staff was developed to collaborate around issues related to promoting active transportation (ATP) in Yolo County. Active transportation includes promotion of walking, biking, carpooling, or otherwise reducing vehicle miles traveled. Partners include representatives from 4 cities in Yolo County, UC Davis, and Yolo County. The group is led by the CNAP facilitator, who is funded through both SNAP-Ed, and also through Caltrans to do Safe Routes to School. The goal of this group is to work collaboratively to reduce vehicle miles traveled, increase the number of youth who walk or bike to school, and to improve the safety of pedestrians and cyclists in the County. Recent data shows that in Woodland, approximately 20% of youth walk to school and 1.5% bike to school, and the goal is to increase this number by 10% over the next 2 years. Data for Davis show that approximately 37% of youth bike or walk to school, and the goal is to sustain that. Both LIAs will support ATP efforts by assisting with community events to promote walking and biking in Woodland, participating in Woodland's Commit2Fit during "May is Bike Month", and supporting updates to the district wellness policy for the Woodland Joint Unified School District that include a focus on improving nutrition resources as well outlining support for the Safe Routes to School and other physical activity programs. The CNAP/ATP collaborative coordinator also participates in the CHIP work group, linking together the goals of active transportation and chronic disease prevention.

Woodland Health Care (WHC), a Dignity Health member, completed a community needs assessment in 2014 that informed community change goals. WHC, serves all communities in Yolo County and is a CHIP workgroup member also. Their needs assessment revealed 5 "communities of concern", which had the largest unmet health and wellness needs. The City of Woodland, and the majority of West Sacramento were identified as the cities of concern, as were several rural communities such as Knights Landing. Woodland and West Sacramento are also the two priority communities to be focused on by SNAP-Ed LIAs over the next 3 years. The top 10 priority areas identified include access to affordable foods, health education and nutrition education, and safe places to be active. From the needs assessment an action plan was created, and stakeholders convene to address the issues and priorities in the action plan. The action plan proposed by WHC to address these concerns included increasing access to preventative care and chronic disease prevention programs, continuing the Farmer's market at the Woodland Health Care Hospital site in Woodland, partnering with the Yolo County HHSA Public Health programs, and CBOs such as the Center for Families (Family Resource Centers) to address obesity, and promotion of health education programs. These activities will serve as excellent compliments to the SNAP-Ed efforts, as well as the efforts of the *Healthy Yolo* and CNAP partners to address the common concerns around healthy eating and activity living. Further, recent relationships have been established between the LHD NEOP staff and WHC staff at the hospital in Woodland to promote HOTM in social media messaging and in the hospital cafeteria. We hope to grow this collaboration in future years.

As outlined above, LIAs are deeply embedded in the advancement of Yolo County's community change goals. The goals have informed the objectives for the next three years, will both enhance the work being done collectively in the county as well as fill gaps in services and resources needed. The Yolo County SNAP-Ed LIAs will achieve the following five objectives over the next three years:

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yolo County **Three-Year** **Rev. 5/24/2017**

Integrated Work Plan

FFY 2017–2019

1. By September 30, 2019 Yolo County SNAP-Ed programs will reach 27,700 SNAP-Ed eligible adults and youth with nutrition education, nutrition and physical activity resources, and environmental supports to promote fruit and vegetable consumption.
2. By September 30, 2019, Yolo County SNAP-Ed LIAs will provide food resource management skills education and improve access to healthy foods and beverages through classes, technical assistance, and environmental supports in one community garden, and at least 8 SNAP-Ed qualifying sites in three communities in Yolo County (Woodland, W. Sacramento, and Esparto) reaching up to 15,000 SNAP-Ed eligible participants
3. By September 30, 2019 SNAP-Ed LIAs will develop a healthy retail recognition program and will award the healthy retail designation to 2 retail outlets that work to promote healthy food and beverage consumption among SNAP-Ed eligible residents.
4. By September 30, 2019, LIAs will partner with community stakeholders to increase the number of cities in Yolo County that have adopted a sugar-sweetened beverage (SSB) ordinance that regulates the default beverage offered in kid's meals at chain restaurants by 100% from 1 to 2 ordinances.
5. By September 30, 2019, SNAP-Ed LIAs will provide training, technical assistance and leadership to at least 5 partner programs or collaborative for the advancement of healthy eating and physical activity initiatives that benefit SNAP-Ed eligible residents.

6. **Partnerships and Collaborative Efforts**

The Yolo County CNAP is comprised of 32 partners who meet quarterly and receive monthly updates, facilitated by the NEOP-funded CNAP coordinator. In a recent survey, 75% of responding CNAP partners indicated that they found the CNAP meetings and monthly emails useful to their work. The CNAP goals were listed above, but reiterated here:

- Increase partnership and collaboration through attendance at CNAP meetings
- Increase participation in food assistance programs
- Encourage residents to following the dietary guidelines for Americans
- Actions to encourage active living

The list of CNAP partners includes:

Yolo County NEOP, Yolo County Women Infants and Children (WIC), UC Cooperative Extension Nutrition Education, Yolo Food Bank, CalFresh, First5 Yolo, Food Service Directors in 5 school districts, Yolo County Children's Alliance, Yolo Food Connect, Elderly Nutrition Program, 211-Yolo, Head Start, Health Education Council, Yolo Farm-to-School, CommuniCare, RISE, Youth Resource Coalition, California Department of Education, , Dairy Council of California, Agency on Aging Area 4, Yolo Housing, Yolo County Agricultural Commissioner's office, Healthy Yolo, Food Literacy Program, Supervisor Don Saylor's office, Yolo Farm to Fork, Yolo County Office of Education, and Yolo County Safe Routes to School program.

In FFY17-19 CNAP partners will play a critical role in advancing some of the priorities, particularly around the sectoral level work of developing a healthy retail recognition program and also supporting the sugar-sweetened beverage ordinance affecting kid's meals at restaurants in one additional city (already passed in Davis, led by First5 Yolo – a CNAP partner). Further, NEOP staff will be working more closely with CalFresh and social services programs to provide training and technical assistance to staff in order to increase the reach of SNAP-Ed materials and messages to eligible clients being served by these programs. These partnerships were fostered significantly in FFY16 with the NEOP team and Calfresh program partnering on the FINI grant project to increase utilization of the "Bonus Bucks" among CalFresh recipients. Further, NEOP staff is providing nutrition education to CalWorks clients in FFY16 to support CalWorks clients' health and nutrition goals.

CHIP partners, several of which are also CNAP partners, will be integral in advancing the community change goals outlined above in the CHIP, and LIAs will continue to be the subject matter experts around nutrition education and obesity prevention for these endeavors.

LIAs will promote SNAP-Ed services and activities by connecting with other programs and agencies in Yolo County, such as county welfare and social service programs, and others which serve the SNAP-Ed eligible population.

7. **Key Messages**

X	Food Safety	X	Physical Activity	X	Fiber-Rich Foods
X	Whole Grains	X	My Plate-Healthy Eating Plan	X	Fat-Free & Low-fat Milk or Equivalent (& Alt. Calcium Sources
X	Fruits & Vegetables	X	Limit Added Sugars or Caloric Sweeteners	X	Other *(specify): positive child feeding strategies*
X	Fats and Oils	X	Food Shopping/ Preparation		Other *(specify)*:
X	Lean Meat & Beans				
	Sodium & Potassium				
x	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All education materials, resources, and curriculum will be approved through the USDA SNAP-Ed Connection website (https://snaped.fns.usda.gov/) and/or FFY2017-19 USDA approved California SNAP-Ed Integrated Curricula list.

Yolo County SNAP-Ed LIAs have reviewed the approved curriculum and materials list and have chosen the best curriculum and materials to support the three-year and annual objectives as well as meet the needs of the population. Data collected from SNAP-Ed program participants and partners in FFY16 has helped determine which curriculum and materials to utilize in FFY17-19. Curriculum is focused on adults with families and youth, as this reflects our focus discussed below and outlined in section C.

9. **Intervention and Evaluation Plan Narrative Summary**

In FFY2017-2019 Yolo County SNAP-Ed programs consist of the LHD and UCCE (UC Cal Fresh Nutrition Education). The LHD and UCCE have benefitted from a strong partnership over the past several years, and feel that this partnership is reflected in the coordinated efforts to meet the needs of SNAP-Ed eligible residents as outlined in the objectives and activities below. In order to optimize expertise and relationships established with community partners, the LHD will continue to lead the work done with the adult population, focusing primarily on adults aged 18-65 years and with focused efforts on families/adults in the child bearing years. UCCE will continue to use an extender model of education dissemination in schools, including early childhood education (ECE) programs and also parents of ECE students at qualified sites. They will conduct ongoing technical assistance and trainings on the use of approved curricula with extenders to ensure high quality education of children. Other unfunded community partners, such as the elderly nutrition program and the adult day center program will serve the

needs of the senior population, and SNAP-Ed resources and materials will be accessible to them as needed. This approach capitalizes on the expertise of each agency but also ensures that the reach of SNAP-Ed programs encompasses the lifespan as best as possible, with particular emphasis on families.

SNAP-Ed efforts in Yolo County will be concentrated in communities of high need and where relationships and momentum have been established. The cities of West Sacramento and Woodland will be emphasized, as they contain the most number of qualified census tracks, the schools with high proportions of students receiving free or reduced-priced meals, and there are long standing relationships with motivated community partners to enhance the impact of our work. The populations of these 2 cities also comprise 52% of the entire County population, thus making the impact of prioritizing work in these two cities robust. Further, the smaller communities of Esparto and Winters will be reached through activities in the schools but also through LHD work at the Health and Human Services Agency service centers. The service centers are located in four communities in Yolo County and are hubs for programs and resources that are available to the SNAP-Ed eligible populations. By focusing efforts in these centers the LHD is ensuring that the reach to SNAP-Ed eligible will be optimized and it also provides opportunities to integrate SNAP-Ed messages into other important services, such as CalFresh and MediCal.

The intervention strategies in Yolo County focus on quality education, environmental change supports, and system changes that impact the community at all levels along the socio-ecological spectrum. Parents, teachers, schools, organizations, agencies, and government all play a role in supporting this endeavor. Interventions that build understanding throughout the lifespan are crucial to improvements in behavior. Nutrition education and obesity prevention efforts will be implemented at all levels of the socioecological model.

At the individual level, direct education to SNAP-Ed eligible youth and adults will continue. Key messages will include support to consume fruits and vegetables, to create balanced meals as addressed in MyPlate materials, support to enhance food resource management skills and to optimize use of resources when grocery shopping or meal planning, and support to increase healthy beverage consumption and reduce unhealthy beverage consumption. Increasing fruit and vegetable consumption and reducing sugar-sweetened beverage consumption are priorities of the County of Yolo, so SNAP-Ed curriculum used in direct education will place particular emphasis on these messages. Also at the individual level will be indirect education initiatives to increase exposure to SNAP-Ed messages and materials to support eligible residents' capacity to make healthy food and physical activity behavior changes. Participating in activities such as health fairs, community-wide fitness initiatives, Kids' Farmer's Markets, food distributions, and promotion of national Public Health observances will continue throughout the upcoming 3-years. Emphasis will be placed on strategically selecting activities that reach the target audience who is additionally receiving SNAP-Ed information or education through other channels so that the "dose" of SNAP-Ed in enhanced. Direct education topics will address all five state-wide objectives, however emphasis will be placed on Goal 1 (Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages), and Goal 3 (Improve Food Resource Management). . UCCE will be providing a comprehensive after school Cooking Academy to increase food preparation skills, which are crucial to addressing a desired reduction in fast food consumption in the home and an increase in fruit and vegetable consumption (approved cooking curriculum will be used). As stated in the ADA report "The State of Family Nutrition and Physical Activity; Are we making Progress?" modifying favorite foods to improve diet quality is a key prevention strategy. As such, recipes used highlight commonly consumed food items, such as quesadillas and macaroni and cheese, but in healthful ways that meet the current Dietary Guidelines. These classes will support other PSE endeavors taking place in the schools, such as kid's farmers markets, school gardens, food distribution, smarter lunchrooms, and parent education. In this ADA report, it is also stated that family

routines are also highly correlated to health behaviors. In addition to this evidence, are numerous studies showing that child feeding practices significantly impact the weight and health of children. Therefore, one of the key intervention strategies with adults is to develop healthy routines and positive feeding practices at home (Happy, Healthy Families curriculum used).

Yolo County LIAs will also work at the environmental level to advance SNAP-Ed initiatives and goals. Environments that will be prioritized will include the retail environment (SHOP), the HHSA service center environments (LIVE), and the school environment. The LHD began work at the environmental level in FFY15 and FFY16, and will build upon that work in upcoming years. For example, the LHD retail program will continue in FFY17-19 and will expand to include a partnership with the WIC Local Vendor Liaison to help increase the number of WIC vendors in qualified census tracks. Further, the retail program will focus on environmental enhancements in stores, such as produce placement, integration of fresh/local produce, and promotion of Harvest of the Month. Already in FFY15 & FFY16 work with one retail site has yielded an increase of 40 points on the CX3 scorecard, which indicates that SNAP-Ed efforts in the retail arena have an impact. Community garden work will also continue in FFY17-19, which ties into the county-wide initiative to promote local produce consumption. While this is not a retail arena per se, community garden work increases access to fresh produce and the HHSA community garden has also served as an 'ad hoc' produce distribution site to WIC clients. In 2015 approximately 1,000 pounds of produce was distributed to 300 WIC clients and that project will continue moving forward. The garden is also a significant asset for Yolo County residents, particularly in Woodland, to receive free garden-based education and also to have access to a place to grow fresh foods. The Hanna and Herbert Bauer Memorial Garden continues to be the only true community garden in Woodland, and currently has 70 residents of all ages gardening there to grow food for their families. The garden will continue to be a venue for promoting SNAP-Ed messages, include integration of Harvest of the Month as well as MyPlate materials into garden activities. Further, LHD staff will provide technical assistance to CNAP partners working on garden endeavors, such as the Woodland Joint Unified School District's new "garden to cafeteria" project. Support for this endeavor will dovetail with the education UCCE will continue to provide in schools in the WJUSD (as well as others), and that the Ag Commissioners Farm to School project supports, hence layering the dose of nutrition messages to youth.

Additional environmental work will include participation in committees, collaboratives, and programs that support healthy eating and active living initiatives for low-income residents. The CNAP will continue to meet and focus on food access as consistent messaging among partners in venues where the target population congregates. A sub-group of CNAP working to tie in the Safe Routes to School efforts in Yolo County emerged in FFY16 and will continue over the next 3 years to help keep partners informed and connected to efforts underway to increase the walking and biking among Yolo County youth. Further, LIAs will support community-wide nutrition and fitness initiatives, such as Woodland's Commit2Fit. This initiative is an example of a program that layers the exposure of nutrition and physical activity opportunities and messages to the broad community that can enhance SNAP-Ed work in Woodland. LIAs will continue participation in school district wellness committees, food policy councils, and other collaboratives that strengthen the connection and collaboration among partners to advance SNAP-Ed and other nutrition initiatives.

In the HHSA service centers, the LHD will provide training and technical assistance to HHSA program staff that will be coupled with environmental supports in client areas to showcase nutrition messages. Environmental support strategies include adding healthy food and beverage and/or physical activity messaging to walls, classrooms and points of contact with staff (reception areas, etc.), as well as arranging the space to include nutrition and physical activity promotional

materials, activities, or resources that engage clients. It may also include providing technical assistance on space design to include resources, interactive stations or materials that promote nutrition and physical activity or provide healthy food options (ex: a station that provide garden produce to WIC clients weekly and also has nutrition materials). Environmental changes will also be couple with support to influence the culture of the service centers so that nutrition and physical activity promotion is integrated into other services as appropriate. These strategies are referred to as environmental supports in the work plan moving forward. The training and TA provided will empower HHSA program staff to integrate SNAP-Ed materials into client sessions when appropriate, which will augment the impact of messaging and environmental changes being witnessed throughout the service center building. Further, by working with the HHSA service centers, the LHD is educating over 500 County staff on nutrition messages and helping to change the culture of the HHSA to include healthy eating and active living in a more prominent way.

UCCE will support the school environment through participation in district wellness committees, particularly for the WJUSD. After school programs will continue to be recruited for the adoption of CATCH curricula and Cooking Academy. Choose Health curricula will be implemented for the first time to round out the offerings for 4-H/UC CalFresh joint afterschool programs. Furthermore, plans to improve school playgrounds with colorful paintings to promote physical activity (such as hopscotch and four square games) are underway. Coordination with the Dairy Council and Project Lean staff to provide technical assistance and training to help qualified schools with Smarter Lunchroom initiatives is desired. UCCE staff are also been involved in the Yolo Farm to School campaign, which endeavors to promote Harvest of the Month as a campaign to encourage fresh, local produce consumption in schools and in the community. UCCE's involvement with the Farm to School Campaign will continue so that linkages between nutrition education being delivered in the classroom, community-wide campaigns, and the nutrition promotion initiatives offered to the broader community being addressed by the LHD can be strengthened. Additionally, they are looking at making a systems change in the way the after-school programs are currently structured. A new approach that integrates the 4-H model is being explored and evaluated.

In FFY17-FFY19 environmental level work will focus on statewide Goal #2 (Increase Physical Activity), Goal #4 (Increase access to and/or appeal of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play or shop), as well as Goal #5 (Increase access to and/or appeal of physical activity opportunities for SNAP-Ed eligible populations). All five statewide goals will be addressed to some capacity with the environmental goals, but these three are emphasized.

Work at the policy and sectoral level in FFY17-19 will center around two large projects. The first will be creating a healthy retail recognition program and the second will be working to help one city in Yolo County (Woodland or West Sacramento) pass a sugar-sweetened beverage policy (SSB policy) that regulates the default beverage offered in kid's meals to include water or milk. This particular endeavor builds upon the momentum of the SSB policy passed in Davis last year. Regarding the healthy retail recognition program, the aim is to provide incentives in the form of increased community awareness and other tangible incentives (TBD) to retailers who are putting effort into changing the food environment for the better. CX3 and Healthy Stores, Healthy Communities data shared above indicate that there is room for improvement in the retail environment, particularly in small "corner store" retail sites and in retailers serving qualified census tracks or food desserts. The retail recognition program development will also involve non-traditional stakeholders, such as members of the business community and decision makers, which will expand the impact of SNAP-Ed initiatives into these sectors.

The SSB policy work was chosen because Yolo County communities already have precedence for setting guidelines about beverages offered to youth. Davis was the first city in the country to pass the SSB policy in 2015, and now many communities state-wide are working on similar policies. The power in this policy is that it allows stakeholders to come together and create a sustainable change in restaurant food and beverage environments. The SSB policy is also a method of communicating to the public and to decision makers the importance for making the healthy choice the easy choice in terms of healthy beverages. The LIAs role will be to educate decision makers about the links between SSB consumption and obesity, particularly in youth and disadvantaged communities, as well as to gather community input on how to prioritize this issue in Yolo County communities. Further, the LIAs will collaborate to engage at last one youth program that focuses on healthy communities so that the youth voice in expressing a desire for healthy beverage environments is heard by the community and decision makers. While the LHD is leading the effort on this, the LHD will collaborate with UCCE to identify a youth program and seek technical assistance on working with youth from UCCE, as they focus their activities primarily on youth. The sectoral activities presented above address State Level Goal 1, 3, and 4 (stated in detail above).

Both agencies will provide training and technical assistance to internal partners in their respective agencies, CNAP partners, and other groups in their target locations to promote the healthy food, beverage and physical activity messages that support the local objectives as appropriate. The allocation of specific activities led by each agency was based upon the agency's experience, expertise, populations served, and capacity to lead the activity. Activities are complimentary to one another so that each LIA is contributing to the overall goal in their unique way using their unique strengths.

Reaching the English- and Spanish-speaking target population in Yolo County is essential to the success of SNAP-Ed efforts, as a significant number of SNAP-Ed eligible residents are Spanish-only speaking. Both UCCE and LHD programs utilize bilingual staff and provide materials in both English and Spanish, when possible and appropriate. Efforts will be made to expand the availability of materials, classes, and messages in both languages.

The choice to include specific activities and objectives described below is evidence based. For example, data in a recent publication by Kaiser et. al. demonstrates that SNAP participants show an increase in food resource management skills by up to 54% and reduction in likelihood of running out of food after receiving a series of UCCE direct education classes. Further, FFY14 and FFY15 Impact Outcome (IOE) data for the LHD NEOP program shows that participants indicated improvements in behaviors related to consuming fruits and vegetables, and improved their scores related to confidence in their ability to read a food label, and in sugar sweetened beverage consumption, after attending the 5-class series. Also, 69% of IOE participants in FFY16 (to date) indicated that participating in the series has helped them improve their healthy eating behaviors and over 85% of participants found the information and classes to be useful. Also, last year WIC clients were surveyed to determine the impact of environmental enhancements that promote Harvest of the Month in WIC offices. There was a 37% increase in the number of clients who indicated that they have heard of HOTM, and of these, there was a 68% increase in those who stated that they heard about HOTM from WIC. This indicates that our indirect education efforts are making an impact, particularly when the message is constant and consistent. These data suggest that direct education that is supported with environmental and sectoral level endeavors is likely to result in a positive change in healthy food and beverage consumption, as well as capacity to make healthier food choices among participants.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yolo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

The Yolo County evaluation plan is as follows. LIA's will conduct formative, process and outcome evaluations as consistent with state guidelines. Participants will complete validated, standardized evaluation instruments as part of their educational experience. LIAs will utilize the Activity Tracking Form (ATF) and the Reporting Tools Workbook (RTW) to track and document all activities for each agency. Children will complete the UC CalFresh Taste Testing Tool when participating in food preparation and tasting experiences led by UCCE. Adults enrolled in classes where the Plan, Shop, Save and Cook curriculum is used, will complete the Intent to Change questionnaire to gauge outcomes. A sample of adults participating in general nutrition classes will complete the Food Behavior Checklist to gauge consumption behaviors of participants, even though the LHD will not be continuing with Impact Outcome Evaluation. Outcome evaluation for the Cooking Academy and the UP4it curriculum will be coordinated with the UC CalFresh State Office. Documentation of enrollment of participants will be conducted in accordance with state protocols. Policy, Systems and Environmental activities will be evaluated using the RE-AIM framework to assess Reach, Effectiveness, Adoption, Implementation, and maintenance. Each agency will collect and enter data for the participants they reach. Thus, UCCE will compile data for direct delivery to youth and their parents in school coordinated adult education classes. LHD will compile data for adults enrolled in direct education classes in community sites, indirect education efforts, and for PSE activities. Overall, participants will be requested to complete evaluation surveys that address the following indicators from the WRO SNAP-Ed Evaluation Framework: Nutrition, Physical Activity, and Obesity Prevention Outcomes: MyPlate Behaviors (MT1), Shopping Behaviors (MT2), and Fruit and Vegetables (TL2). The Fruit and Vegetables Shopping Practices Survey will be used by LHD staff to assess the food resource management skills of participants in retail store tours. For the LHD, CX3 reassessment data collected in late FFY16 will inform work in FFY17-19 and reassessment will occur as appropriate for the retail environment and timeline of the retail work. Results of reassessment will also be used to inform retail outlet owners/managers of improvements made during their participation in CX3 and the needs for future work.

All LIAs will convene annually to share data collected from the evaluation tools listed in the work plan and discuss approaches to future programming or to identify gaps in education topics or populations not being served in the community. Findings will be shared with CNAP partners as well, as appropriate.

When possible and necessary, materials and education will be provided in both Spanish and English to ensure access to information and opportunities for learning change for Spanish and English speaking residents.

SECTION B: Target Audience Description

1. Gender	%		2. Age	#
Male	35		0 to 4 years old (Preschool):	5535
Female	65		5 to 17 years old (School Age):	16,836
			18 to 59 years old (Adult):	89,491
			60 years old and over (Senior):	6538
Total:	100			**118,400**

3. Ethnicity/Race

Ethnicity

Total Percentage Hispanic/Latino	Total Percentage Not Hispanic/Latino	Total Percentage Ethnicity
66%	34%	100%

RACE	**Hispanic/Latino**	**Not Hispanic/Latino**
Black or African American	0%	3%
Asian	0.5%	6%
American Indian/Alaskan Native	0%	0%
Native Hawaiian/Other Pacific Islander	0%	0%
White	62.5%	22%

5. Projected Number of Low-Income Persons Reached

	FFY 17	FFY 18	FFY 19
Direct Education (estimated unduplicated):	3500	3300	3200
Indirect Education:	8400	10,000	11,000
Policies, Systems, and Environment (PSE) Change/Supports	7000	20,000	52,000

6. Intervention Sites

In Yolo County, many county services are co-located at service center sites. WIC, CalFresh, and CalWORKS are examples of programs that are collocated, and may be listed only once on the site list. If there is another program co-located, it is mentioned in the comment section on the site list entry. Additionally, WIC has offices at three additional, separate locations, also listed on the site list.

Site Setting	#	Site Setting	#	Site Setting	#
Adult Education and Job Training Sites	1	Food Assistance Site: Food Pantries	0	Schools: Students (Middle/Junior High)	8
Adult Rehabilitation Centers	3	Food Assistance Site: Soup Kitchens	0	Schools: Students (High School)	7

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):**

By September 30, 2019 Yolo County SNAP-Ed programs will reach 27,700 SNAP-Ed eligible adults and youth with nutrition education, nutrition and physical activity resources, and environmental supports to promote fruit and vegetable consumption.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Environmental supports: healthy eating and physical activity messaging, space modifications to integrate nutrition and physical activity messages, activities, healthy food and beverages, interactive nutrition/physical activity promotion resources, cultural changes among staff to integrate SNAP-Ed messages
- Partnerships and collaboration: technical assistance, education, resources to HHSA service centers and partners to enhance partner capacity to promote SNAP-Ed initiatives
- Community gardens: promote growing, utilization of and understanding of fresh produce
- Partnership and collaboration in schools: joint 4-H cooking projects, joint food bank/ UC Food Innovation Institute pilot project to glean crop waste, preserve, and distribute to food insecure parents of young children.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30 2017, LIAS will reach 2900 adults and youth with direct nutrition/physical activity (PA) education and 5500 adults and youth with indirect nutrition education that promotes fruit and vegetable consumption in schools, after school programs, and a minimum of four qualified sites that serve SNAP-Ed eligible adults

   b. By September 30 2017, LHD will provide environmental supports and staff training to the WIC program to encourage fruit and vegetable consumption among WIC participants at 4 Health and Human Services Agency (HHSA) service centers

2. **FFY 2018 (Year 2) Objective(s):**

   a. By September 30 2018, LIAS will reach 2900 adults and youth with direct nutrition/PA education and 6500 adults and youth with indirect nutrition education that promotes fruit and vegetable consumption in schools, after school programs, via mailings and social media presence, and a minimum of four qualified sites that serve SNAP-Ed eligible adults

   b. By September 30 2018, NEOP will provide environmental supports, training, and resources to WIC and CalFresh programs at up to 4 Health and Human Services Agency service centers to encourage fruit and vegetable consumption among SNAP-Ed eligible participants

3. **FFY 2019 (Year 3) Objective(s):**

   a. By September 30 2019, LIAS will reach 2900 youth and adults with direct nutrition/PA education and 7000 adults and youth with indirect nutrition education that promotes fruit and vegetable consumption in schools, after school programs and a minimum of four qualified sites

   b. By September 30 2019, NEOP will offer 2 annual trainings and ongoing technical assistance and resources to Health and Human Service Agency (HHSA) staff and programs serving the SNAP-Ed eligible population to help encourage fruit and vegetable consumption among families and adults who receive services at each of the 4 HHSA service centers.

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):
By September 30, 2019 Yolo County SNAP-Ed programs will reach 27,700 SNAP-Ed eligible adults and youth with nutrition education, nutrition and physical activity resources, and environmental supports to promote fruit and vegetable consumption.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	Provide direct education classes to a total of 450 unduplicated adults over three years. The sessions will be at least 30-minutes in length. Curriculum utilized will promote consumption of fruits and vegetables following the 2015 Dietary Guidelines for Americans recommendations. Lessons will integrate MyPlate, *Rethink Your Drink,* and Harvest of the Month concepts when possible as well.	X CED CEI MPR C&C TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF Class sign in sheets Materials List Enrollment Forms Photos

1.2	LIAs will participate in at least 4 community-wide events in FFY17, and 3 per year thereafter. The events will include health fairs, Farm Day, and promotion of nutrition-related themed days/months (Food day and National Nutrition Month) to promote fruit and vegetable consumption among SNAP-Ed eligible residents. In FFY17 the LHD will take a lead role in coordinating an annual health fair to be held at a partner agency site, and this fair will promote RYD messages at the NEOP booth. (Reach is approximately 1500, 1500, and 2000 in FFY 17, 18, and 19 respectively)	CED: ; CEI: X; MPR: X; C&C: X; TTA:	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF Materials List Photos Event flyers Recipes Registration Forms
1.3	LHD staff will provide monthly training to WIC staff serving the 4 HHSA service centers to promote fruit and vegetable consumption and promote the 2015 Dietary Guidelines for Americans messages among WIC participants; training will include HOTM, MyPlate, and other SNAP-Ed approved resources as well as technical assistance to WIC staff on how to integrate SNAP-Ed messages into WIC counseling sessions. Training will also include promotion of the FRESH TEXT/MARKET TEXT program that aims to increase residents' access to food at local food distributions around the county. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):**

By September 30, 2019, Yolo County SNAP-Ed LIAs will provide food resource management skills education and improve access to healthy foods and beverages through classes, technical assistance, and environmental supports in one community garden, and at least 8 SNAP-Ed qualifying sites in three communities in Yolo County (Woodland, W. Sacramento, and Esparto) reaching up to 15,000 SNAP-Ed eligible participants.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Community garden: messages and education to promote food resource management and access to healthy foods
- Food access: increase integration of resource sharing and promoting access to food distribution and food assistance programs
- Partnership and Collaboration in schools: joint food bank/ UC Food Innovation Institute pilot project to glean crop waste, preserve, and distribute to food insecure parents of young children.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. By September 30, 2017, 150 parents of qualifying school children and 150 SNAP-Ed eligible adults attending community garden classes or Yolo County Health and Human Services Agency program classes will receive food resource management, collaboration with CNAP partners, shopping on a budget, and local, seasonal produce consumption education and resources

   b. By September 30th, 2017, LIAs will promote utilization of food distribution, food assistance programs and community garden programs in Yolo County through monthly social media messages, indirect education reaching up to 4500 SNAP-Ed eligible residents, and quarterly collaboration with CNAP partners

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, 150 additional parents of qualifying school children and 100 SNAP-Ed eligible adults attending community garden classes or Yolo County Health and Human Services Agency program classes will receive food resource management, shopping on a budget, and local, seasonal produce consumption education and resources

    b. By September 30th, 2018, LIAs will promote utilization of food distribution, food assistance programs and community garden programs in Yolo County through monthly social media messages, collaboration with CNAP partners, indirect education reaching up to 5000 SNAP-Ed eligible residents, and quarterly collaboration with CNAP partners

2. **FFY 2019 (Year 3) Objective(s):**

    a. By September 30, 2018, 150 additional parents of qualifying school children and 100 SNAP-Ed eligible adults attending community garden classes or Yolo County Health and Human Services Agency program classes will receive food resource management, shopping on a budget, and local, seasonal produce consumption education and resources

    b. By September 30th, 2018, LIAs will promote utilization of food distribution, food assistance programs and community garden programs in Yolo County through monthly social media messages, collaboration with CNAP partners, and providing indirect education reaching up to 5500 SNAP-Ed eligible residents.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yolo County | **Three-Year Integrated Work Plan FFY 2017–2019** | **Rev. 5/24/2017**

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):

By September 30, 2019, Yolo County SNAP-Ed LIAs will provide food resource management skills education and improve access to healthy foods and beverages through classes, technical assistance, and environmental supports in one community garden, and at least 8 SNAP-Ed qualifying sites in three communities in Yolo County (Woodland, W. Sacramento, and Esparto) reaching up to 15,000 SNAP-Ed eligible participants

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	Provide at least 10 direct delivery nutrition education classes to low income parents of qualifying school children receiving nutrition education in their classes and at least 6 direct delivery nutrition education classes to adults in Health and Human Services Agency programs or public housing sites.	x CED CEI MPR C&C TTA	CWD x LHD AAA x UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 x, Q2 x, Q3 x, Q4 x Year 2: Q1 x, Q2 x, Q3 x, Q4 x Year 3: Q1 x, Q2 x, Q3 x, Q4 x	ATF Enrollment forms Materials List Photos Sign-in sheet
2.2	Offer at least 8 community garden classes annually to the community, at least two will include discussion of food resource management skills that integrate strategies to consume local, seasonal produce (cost savings strategy) (Reach = 80 participants annually) and offer nutrition-focused garden field trips for up to 4 school groups per year in partnership with local elementary schools (reach 100-400 students annually as indirect education). Qtr. 1 (Oct. 1-Dec. 31); Qtr. 2 (Jan. 1-March 31); Qtr. 3 (Apr. 1-Jun. 30); Qtr. 4 (Jul. 1-Sept.30)

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

By September 30, 2019 SNAP-Ed LIAs will develop a healthy retail recognition program and will award the healthy retail designation to 2 retail outlets that work to promote healthy food and beverage consumption among SNAP-Ed eligible residents.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:

- Healthy Retail: messaging to promote access and appeal for healthy foods/beverages, enhanced visibility of healthy foods and beverages, utilization of SNAP-Ed materials and campaigns to encourage healthy food and beverage purchasing, community recognition of healthy retail outlets

III. Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:

1. **FFY 2017 (Year 1) Objective(s):**

    a. By September 30, 2017, LIAs will collaborate with other county partners working in healthy eating and food access to establish guidelines, parameters, and incentives and process for awarding a healthy retail recognition to retailers working to increase access and availability of healthy foods and beverages

    b. By September 30 2017, NEOP will work with 3 qualified retail outlets to promote fruit and vegetable consumption among SNAP-Ed eligible families through store tours, taste tests, and technical assistance to increase the availability and promotion of healthy foods and beverages

2. **FFY 2018 (Year 2) Objective(s):**

    a. By September 30, 2018, LIAs will work with partners to nominate and select one healthy retail recognition program awardee, and will disseminate information through partners, social media, newsletters, and other communication channels

b. By September 30 2018, NEOP will work with 3 qualified retail outlets to promote fruit and vegetable consumption among SNAP-Ed eligible families through store tours, taste tests, and technical assistance to increase the availability and promotion of healthy foods and beverages.

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30, 2019, LIAs will work with partners, including one HHSA youth program, to nominate and select one additional healthy retail recognition program awardee, and will work with local media channels and city partners to enhance the visibility of the awardee.
   b. By September 30, 2019, LIAs will provide healthy retail recognition program information and technical assistance to partners or County jurisdictions who wish to enhance or extend the retail recognition program

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

By September 30, 2019 SNAP-Ed LIAs will develop a healthy retail recognition program and will award the healthy retail designation to 2 retail outlets that work to promote healthy food and beverage consumption among SNAP eligible residents.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
3.1	Host 2 grocery store tours annually for year FFY17 and FFY18 that promote healthy food and beverage purchasing, meal planning , label reading, and shopping on a budget (Total reach = 40 adults annually FFY17 and FFY18)	X CED CEI MPR X C&C TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X Year 2 Q1 Q2 Q3 Q4 x x x Year 3 Q1 Q2 Q3 Q4	ATF Sign-in sheet Materials list Photos Recipes
3.2	Provide technical assistance to 3 retail outlets in SNAP-Ed eligible census tracks in Woodland and West Sacramento. At least 2 retail outlets will be CX3 retail outlets. TA will include collaboration with the WIC Local Vendor Liaison to help retail outlets maintain or attain a WIC retail license as appropriate, strategies to increase visibility of and access to healthy foods for store patrons, as well as taste tests and promotional	CED X CEI x MPR X C&C X TTA	CWD X LHD AAA UCCE CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	ATF Materials List Photos Recipes

	events to bring community awareness to the improvements (Total reach = approximately 5000 annually for FFY17 and FFY18)				Year 3 Q1 Q2 Q3 Q4 	
3.3	Collaborate with a Health and Human Services Agency youth group or youth-based program to work with one retail outlet in a qualified census track to improve marketing and messaging that promotes fruit and vegetable consumption as well as to increase neighborhood awareness of environmental improvements in the retail outlet. Promotion activities may include can include taste tests, hosting a community event, Food Day celebration, newspaper article, or other event to engage the community with the retail site.	☐ CED ☒ CEI ☒ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 Year 2 Q1 Q2 Q3 Q4 X X Year 3 Q1 Q2 Q3 Q4 X X X X	ATF Meeting sign in Photos Recipes Materials list Flyers
3.4	Convene a Work Group monthly starting in FFY17 and continuing of FFY18, including SNAP-Ed funded agencies, to help develop healthy retail recognition program objectives, guidelines, best practices, and identify incentives to awardees (Work group may be a sub-group of the CNAP); Seek technical assistance about possible qualifying guidelines from the Tobacco Prevention Program, which will be working on the *Healthy Stores, Healthy Community* Initiative in Yolo County; Staff facilitating this work will also participate in the State-wide Healthy Retail Recognition Pilot Program Workgroup.	☐ CED ☒ CEI ☒ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X Year 2 Q1 Q2 Q3 Q4 X X Year 3 Q1 Q2 Q3 Q4 	ATF Meeting sign in Meeting Agendas Photos

3.5	Conduct key informant interviews with at least 2 qualified retail mangers to get feedback on what type of retail recognition program components would appeal to them and to educate them about the purpose and benefit of the program	CED: ; CEI: ; MPR: ; C&C: ; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 Q2 Q3 Q4 = ; ; ; x Year 2: Q1 Q2 Q3 Q4 = x; x; ; Year 3: Q1 Q2 Q3 Q4 = ; ; ;	ATF Meeting sign in Informant interview questions list
3.6	Identify a strategy and a process for selecting and awarding healthy retailers in FFY17 and FFY18. Work with local jurisdictions, CNAP partners, and other stakeholders to select a timeframe and a process annually for the award; educate stakeholders on the purpose and benefit of the program;	CED: ; CEI: ; MPR: X; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 Q2 Q3 Q4 = ; ; ; Year 2: Q1 Q2 Q3 Q4 = ; x; x; X Year 3: Q1 Q2 Q3 Q4 = X; X; X; X	ATF Meeting agendas Meeting sign in Promotion materials
3.7	Identify an approach and publically recognize (media campaign, event, etc.) to the Healthy Retail awardees annually in Year 2 and Year 3; generate press releases, social media posts, and engage local stakeholders to disseminate the information; provide healthy food and beverage promotion activities at the event (if applicable). The event may be linked to other nutrition promotion activities such as: Food Day National Nutrition Month National Public Health Week	CED: ; CEI: X; MPR: X; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 Q2 Q3 Q4 = ; ; ; Year 2: Q1 Q2 Q3 Q4 = ; ; x; X Year 3: Q1 Q2 Q3 Q4 = X; X; X; X	ATF Flyers Social media posts Press Releases Photos

3.8	Create a healthy retail recognition program toolkit for other Yolo County stakeholders to utilize or partner with; Toolkit will contain best practices, timelines, and examples based on the recognition program created in FFY17-19; distribute the toolkit among CNAP partners or other community partners. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):**

By September 30, 2019, LIAs will partner with community stakeholders to increase the number of cities in Yolo County that have adopted a sugar-sweetened beverage (SSB) ordinance that regulates the default beverage offered in kid's meals at chain restaurants by 100% from 1 to 2 ordinances

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Collaboration and partnerships: Mobilize community partnerships around healthy beverage promotion
- Environmental supports: provide materials and messaging that promote RYD and other healthy beverage messages
- Healthy Beverage standards: Sugar-sweetened beverage ordinance at local municipality, SSB policy with one partner agency

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):** By
   a. September 30, 2017, LIAs will provide direct and indirect education to 5000 youth and adults to promote healthy beverage consumption at schools, Health and Human Service Agency (HHSA) service centers, and in at least 2 additional SNAP-Ed eligible sites serving adults
   b. By September 30, 2017, LIAS will work with stakeholders to determine which city in Yolo County will pursue a SSB ordinance through key informant interviews, assessment of community awareness about SSB issues utilizing evidence-based evaluation and assessment meth
2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30, 2018, LIAs will provide direct and indirect education to 6500 adults and youth to promote healthy beverage consumption in schools, at Health and Human Service Agency (HHSA) service centers, and in at least 2 additional SNAP-Ed eligible sites serving adults

b. By September 30, 2018, LIAs will educate and inform residents and stakeholders of the SSB policy initiative using evidence-based policy intervention strategies in at least 3 venues, and will engage at least one youth –led program focused on community health in the education activities.

c. By September 30, 2018 LIAs will assist at least one CNAP partner or other community partner to develop a healthy meeting or healthy workplace policy that includes beverage standards

3. **FFY 2019 (Year 3) Objective(s):**

a. By September 30, 2018 NEOP will host at least one public campaign to promote healthy beverage consumption and reduce SSB consumption in collaboration with at stakeholder or partner agency and a youth program in the city proposed to adopt the SSB policy

b. By September 30, 2019 LIAs will promote awareness about the adoption of the SSB ordinance through evidence-based methods to inform the community and stakeholders about policy adoption

Three-Year SNAP-Ed Local Objective #4 (FFY 2017–FFY 2019):
By September 30, 2019, LIAs will partner with community stakeholders to increase the number of cities in Yolo County that have adopted a sugar-sweetened beverage (SSB) ordinance that regulates the default beverage offered in kid's meals at chain restaurants by 100% from 1 to 2 ordinances.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
4.1	Promote healthy beverage consumption messages, including use of *Rethink Your Drink*, during a total of 3 community or school-based events annually for FFY17 and FFY18. Focus will be on events in Woodland and West Sacramento for FFY17 and then the city identified to move forward with an SSB policy in FFY18. SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #5 (FFY 2017–FFY 2019):**
By September 30, 2019, SNAP-Ed LIAs will provide training, technical assistance and leadership to at least 5 partner programs or collaboratives for the advancement of healthy eating and physical activity initiatives that benefit SNAP-Ed eligible residents.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

- Collaboration and Partnerships: Mobilize community partnerships around healthy eating and active living, including physical activity programs and chronic disease prevention
- School Wellness Policies: improving access to physical activity and nutrition education opportunities for students
- Improve linkages among partner agencies to increase outreach, Consistent promotion of SNAP-Ed messages, and utilization of services by eligible participants

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**
    a. By September 30 2017, LIAs will participate in at least 3 relevant regional or school-based collaboratives, including CNAP, to assist with resource sharing, networking, and capacity building among partners; LHD staff will lead a strategic planning process to develop a 3-year focus with at least one FFY17/18 goal for the CNAP.

    b. By September 30 2017, LIAs will support at least 2 community-based physical activity initiatives in the City of Woodland to reach at least 500 participants.

2. **FFY 2018 (Year 2) Objective(s):**
   a. By September 30 2018, LIAs will participate in at least 3 relevant regional or school-based collaboratives, including CNAP, to assist with resource sharing, networking, and capacity building among partners; LHD staff will monitor progress on the CNAP goal, and help facilitate increasing the number of CNAP partners by 2 in FFY18.
   b. By September 30 2018, LIAs will support at least 2 community-based physical activity initiatives in the City of Woodland to reach at least 600 participants

3. **FFY 2019 (Year 3) Objective(s):**
   a. By September 30 2019, LIAs will participate in at least 3 relevant regional or school-based collaboratives, including CNAP, to assist with resource sharing, networking, and capacity building among partners; LHD staff will facilitate the development of one additional CNAP goal for FFY19 and will increase CNAP partnerships by 2.
   b. By September 30 2019, LIAs will support at least 2 community-based physical activity initiatives in the City of Woodland to reach at least 700 participants.

Three-Year SNAP-Ed Local Objective #5 (FFY 2017–FFY 2019):
By September 30, 2019, SNAP-Ed LIAs will provide training, technical assistance and leadership to at least 5 partner programs or collaboratives for the advancement of healthy eating and physical activity initiatives that benefit SNAP-Ed eligible residents.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
5.1	Host up to 4 CNAP meetings annually and send out monthly updates to CNAP partners to discuss progress on CNAP goals, objectives, and opportunities for collaboration on healthy eating, active living initiatives. Reinforce key nutrition messages prioritized by the partners during meetings and monthly emails; In FFY17 the LHD will facilitate a CNAP strategic planning process to identify goals and focus for the next three years. CNAP will outreach to potential partners to increase the number of partners annually (n = 20 partners FFY16, goal of 25 partners by FFY19)	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF Meeting Agenda Sign-in Copy of monthly emails

5.2	Participate in the Healthy Yolo Community Health Improvement Plan (CHIP) work groups; provide data updates related to chronic disease prevention objectives; provide training and technical assistance to CHIP work groups to ensure CHIP goals accurately reflect current SNAP-Ed and other program work; help increase the number of partners engage with Healthy Yolo (n = 32 partners in FFY16; goal of 35 partners by FFY19)	CED: ; CEI: ; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF Copy of CHIP Meeting Agendas
5.3	Promote SNAP-Ed projects, themed events, awareness about FRESH TEXT/MARKET TEXT, and nutrition and physical activity messages through annual newsletters (n = 229 in FFY16), updates to partners and collaboratives, and cross promotion of events and activities on partner agency social media channels	CED: ; CEI: X; MPR: X; C&C: X; TTA:	CWD: ; LHD: X; AAA: ; UCCE: X; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	Press releases Mailing lists Copy of newsletters Copy of Social Media posts
5.4	Provide technical assistance, nutrition and obesity prevention expertise and resources the Woodland Commit2Fit program annually (reach = 500 residents/year in FFY17, increases to-700 residents/year by FFY19)	CED: ; CEI: X; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: ; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 , Q2 , Q3 X, Q4 X Year 2: Q1 , Q2 , Q3 X, Q4 Year 3: Q1 , Q2 , Q3 X, Q4 X	ATF List of Resources Flyers Photos Meeting Agendas

5.5	Assist with Walk-or Bike-to school promotion activities in the City of Woodland through social media promotion, nutrition materials, newsletter articles, and technical assistance to integrate nutrition messages into events (reach = 500 youth annually FFY17-19)	CED: ; CEI: X; MPR: ; C&C: X; TTA: X	CWD: ; LHD: X; AAA: ; UCCE: x; CCC:	CWD: LHD: AAA: UCCE: CCC:	Year 1: Q1 X; Q2 ; Q3 X; Q4 Year 2: Q1 X; Q2 ; Q3 X; Q4 Year 3: Q1 X; Q2 ; Q3 X; Q4	ATF List of Resources Flyers Photos Meeting Agendas
5.6	Participate in conducting environmental scans/walking and biking assessments of physical activity environments around SNAP-Ed qualified schools participating in the Woodland Safe Routes to School program to help support the development of health food and physical activity choices in those schools. 	Total Federal Funds	**$160,690**	**$393,139**	**$315,179**	-19.83%

	Budget Categories	Justification For Greater Than 5% Difference From FFY 2017 Budget
1	Salaries/Benefits	The increase is justified because I am anticipating a 3% cost of living increase for staff. I will also be requesting a reclassification for 2 employees. The Supervisor will increase her time from 50% to 60%. Portion covered by carry in funds for FFY 17
2	Non-Capital Equipment/Supplies	Portion covered by carry in funds in FFY 17
3	Materials	
4	Travel	The increase is justified because there was a training opportunity promoted at the State forum that I think would be an excellent professional development opportunity for nutrition educators. It will continue the training received at the Statewide forum on stratifying interventions and providing targeted information to clients. The information states- "Join leaders and innovators to explore the latest evidence-based strategies and technologies for health behavior change. Leave with new allies, the latest research and compelling case studies across digital and social media, community outreach, technology, and evaluation to advance the field." I have added travel expenses for staff associated with this in-state opportunity. Portion covered by carry in funds for FFY17
5	Building/Space	
6	Maintenance	
7	Equipment and Other Capital Expenditures	
8	Contracts/Sub-Grants/ Agreements**	
9	Indirect Costs	Increase in expenses - same 25% rate

*Provide narrative describing all expenses.

**Retain copies on site.

***Provide assurances that the indirect cost rate is an approved rate (Financial and Cost Policy Supplement).

****Please note that funds cannot be carried over into the next Federal Fiscal Year if the funds are in the last year of their 2-year period of performance.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

County Name: Yuba County.

SECTION A: OVERVIEW

1. **SNAP-Ed Implementing Agency (counterpart local agency) Names**

	California Department of Social Services: CDSS: (County Welfare Departments: CWD)
X	University of California: UC CalFresh UCCE: (UC Cooperative Extension Yuba County: UCCE)
X	California Department of Public Health: CDPH: (Yuba County Public Health Department: LHD)
	California Department of Aging: CDA: (Area Agency on Aging: AAA)
	Catholic Charities of California: CCC: (Catholic Charities of California: CCC)

2. **State Level Goals and Objectives**

Overall State Level Goal and Focus

The California SNAP-Ed goal is to improve the likelihood that persons eligible for SNAP-Ed will make healthy food and physical activity choices within a limited budget consistent with the current *Dietary Guidelines for Americans* and *Physical Activity Guidelines for Americans*.

California SNAP-Ed focuses on preventing nutrition and activity-related chronic diseases and improving food security among persons eligible for SNAP-Ed by:

- Providing information and education to promote food resource management, healthy eating, and a physically active lifestyle, and
- Creating supportive food and activity environments in collaboration with community partners in order to make healthy choices easier where people eat, live, learn, work, play, and shop.

Behavioral Outcomes

Goal 1: Increase Consumption of Healthy Foods and Beverages and Decrease Consumption of Unhealthy Foods and Beverages

- **Objective 1a:** Annually improve the dietary quality of meals and snacks consumed by the SNAP-Ed eligible population consistent with the current *Dietary Guidelines for Americans*.
- **Objective 1b:** Annually increase consumption of fruits and vegetables among the SNAP-Ed eligible population.
- **Objective 1c:** Annually decrease consumption of added sugar from food and beverages among the SNAP-Ed eligible population.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Goal 2: Increase Physical Activity

- **Objective 2:** Annually increase physical activity among the SNAP-Ed eligible population consistent with the current *Physical Activity Guidelines for Americans*.

Goal 3: Improve Food Resource Management

- **Objective 3a:** Annually improve resource management behaviors [1] among the SNAP-Ed eligible population.
- **Objective 3b:** Annually increase food security [2] among the SNAP-Ed eligible population.

Physical & Social Environment Outcomes

Goal 4: Increase access to and/or appeal [3] of healthy dietary choices and decrease access to and/or appeal of unhealthy dietary choices where people eat, live, learn, work, play, or shop.

- **Objective 4a:** Annually improve [4] food environments at SNAP-Ed eligible sites.
- **Objective 4b:** Annually improve the proportion of healthy to unhealthy food environments in SNAP-Ed eligible communities.

Goal 5: Increase access to and/or appeal [3] of physical activity opportunities for SNAP-Ed eligible populations.

- **Objective 5a:** Annually improve [4] environments and opportunities for physical activity at SNAP- Ed eligible sites.
- **Objective 5b:** Annually increase physical activity opportunities and improved environments community-wide in SNAP-Ed eligible communities.

[1] Behaviors, such as reading labels, shopping with a list and comparing prices to maximize use of limited resources to support a healthy diet.
[2] Defined as not running out of food at the end of the month.
[3] Defined as availability, affordability, appropriateness to priority population, variety, quality, and marketing strategies such as placement, point of decision prompts, healthy defaults, and promotion.
[4] Defined as a combination of introducing healthy changes at new sites and deepening or maintaining changes at existing sites.

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

3. **Jurisdiction Description**

The information in this jurisdiction description comes in part from the 2014 and 2015 SNAP-Ed County Profiles prepared by the California Department of Public Health (CDPH) which includes county-level data from a variety of sources such as California Food Policy Advocates, the Centers for Disease Control, Prevention (CDC), the UCLA Center for Health Policy Research, American Communities Survey (ACS) five - year estimates, Department of Social Services CalFresh Annual Trends data, the California Health Interview Survey, Feeding American's Map the Food Gap and Food Insecurity in Your County. By utilizing a comprehensive set of assessment measures to inform the development of the work plan, Yuba County SNAP-Ed local implementing agency partnership (LIA partnership) has identified the populations and areas of highest need and designed a strategy to implement a coordinated set of interventions that address all levels of the socio-ecological model and provide long term benefit to the SNAP-Ed eligible population.

Yuba County is located in California's Central Valley, north of Sacramento with a population of 73,340 (74% urban, 26% rural) individuals. The 2008-2012 US Census Bureau data reported that there are 30,181 SNAP-Ed eligible individuals in Yuba County which constitutes 42.4% of the total population.

Based on the 2014 US Census Bureau data, the racial makeup of the SNAP-Ed eligible individuals in Yuba County is 79.4 % White, 27.2 % Hispanic, 7.3 % Asian, 4% African American, 3% American Indian/Alaska Native, 0.5% Native Hawaiian/Pacific Islander and 5.8% Multiracial. The primary spoken language is English followed by Spanish and Hmong.

Food insecurity rates are significantly higher in Yuba County with 19.3 % food insecure individuals compared to 17.4% state-wide. Similar trends are seen among children with 31% food insecure compared to 27.3% in California. In Yuba County, 19 % of the total populations corresponding to 13,517 individuals participate in CalFresh and 68.5 % of the students are eligible for free/reduced price meals.

Yuba County ranks 46th out of 57 California counties in health outcomes, based on the Robert Wood Johnson Foundation (RWJF) - County Health Rankings and Roadmaps. The county ranking has shown slight improvement compared to previous years when it was ranked 48th among the 57 California counties. According to the 2012-13 California Health Interview Survey (CHIS), 78 % of the SNAP-Ed eligible individuals are overweight/obese and 39 % are obese. Based on the 2010 Pediatric and Pregnancy Nutrition Surveillance System (PedNSS) data, 32.4% of children aged 2-4 years are overweight/obese and 16.3% are obese. The same data reveals that among 5-19-year-old children and teens, 39.3% are overweight/obese and 22.5% are obese.

The Robert Wood Johnson Foundation (RWJF) rankings data from 2014 also shows that Yuba County residents are more likely to be physically inactive compared to the rest of the state (25 percent vs.18 percent). This data also indicates that 24.6% of the adults (20 years or older) reported no leisure time physical activity. The 2011- 2012 California Health Interview Survey (CHIS) data shows that 30.8% of adults were engaged in regular walking and 50.3% of children aged 5-11 years were physically active at least 1 hour every day. The county also has a low number of recreational facilities (n=1.4) per 100,000 residents which might contribute to lower physical activity levels.

The fruit and vegetable consumption data from 2012-13 CHIS shows that 58.2 % of SNAP-Ed eligible children aged 2-11 consumed ≥ 2 fruits and vegetables. The 2011-2012 CHIS data for adults shows that 22.6% of adults consumed ≥ 3 fruits and vegetables. The sugar-sweetened beverage consumption among 2-17 year old children and teens shows that 30% consumed ≥1 beverage/day [1]. According to the 2011-12 CHIS fast food consumption data, 58.3% of SNAP-Ed eligible adults and 72.8% of SNAP-Ed eligible children/teens consumed ≥1 serving of fast food/day.

The percentage of low-income population that has limited access to healthy food is significantly higher than the state rate, 11.8% and 3.1%, respectively. Environmental and systems changes were also identified as a primary need for Yuba County residents, evident by minimal access to healthy foods. Twelve-percent of Yuba County residents have limited access to healthy foods, a rate that is four times higher than the state average (12% vs. 3%). Yuba County's inadequate access to healthy foods is partially due to a high ratio of fast food restaurants per capita (57 percent Yuba County vs. 48 percent California average). Yuba County SNAP-Ed has been working on establishing more community gardens and provision of Electronic Benefit Transfer (EBT) access at farmers' markets to help increase access to healthier food choices.

The need to establish EBT access at the farmers' markets was identified in the county in FFY2012 and was one of the SNAP-Ed goals in FFY2013-14. SNAP-Ed collaborated with the Ecology Center and EBT access was successfully established at the downtown Marysville Farmers' Market.

Continued efforts were also made to reach the farmers' markets in the foothills though our collaboration with Camptonville Community Partnership (CCP). The response from these markets regarding an intent to establish EBT access was not positive. SNAP-Ed will continue to reach out to these markets for potentially establishing EBT access in the future. Another potential site is the Marysville Flee Market; where a significant number of the SNAP-Ed population in the county shops for produce every Sunday. In FFY14-15 SNAP-Ed has worked on establishing a strong partnership with this site and also conducted a very successful Fruit and Veggies Fest at the market. In addition, SNAP-Ed has also conducted several outreach events in collaboration with CalFresh outreach. Preliminary talks are in progress with the market manager to help the market consider the benefits of establishing EBT access. This discussion is in the preliminary stages and we considered it prudent to include EBT access as our PSE in FFY2018 instead of FFY2017.

A Needs Assessment was completed in the Fall of 2012 using the template from SNAP-Ed Guidance. Data was gathered through a combination of direct surveying of citizens (over 200 surveys) in the community and epidemiological data available specific to Yuba County. The Needs Assessment clearly indicated there was a strong need for nutrition and physical activity change in the community for low-income school age children and low-income adults as evidenced by obesity and inactivity rates that exceeded the state average. In view of the overall data presented, Yuba County would stand to benefit from nutrition education, increased access to healthy food choices paired with physical activity related interventions.

SNAP-Ed County Profiles 2015. California Department of Public Health.

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

4. **Community Assessment**

Yuba County has exhaustive statistics exemplifying the need for improved health conditions. Third party research organizations including County Health Rankings by the Robert Woods Johnson Foundation and the Yuba and Sutter County Community Health Needs Assessment developed by Barbara Aved Associates, have helped demonstrate the health disparities that are prominent within the County. These health disparities contribute to the overall premature mortality rate, thus resulting in compounded years of potential life lost. Such results impact Yuba County's economy, spending on healthcare, quality of life, and overall community culture. Specifically speaking to the health status of Yuba County, in researching the information and statistics about Yuba County, chronic disease was a large factor in contributing to the premature death rate. The Community Health Needs Assessment conducted for Fremont-Rideout Health Group in 2013 by Barbara Aved Associates demonstrates congruent results by analyzing the county mortality statistics. Yuba County's years of potential life lost for 2008-2010 was 7,940.

The assessment identified five priorities based on the health status of Yuba County. Amongst the five focus areas was "Food and Nutrition" and "making healthy choice the easy choice" with a focus on improving the food environment. Examples for intervention included: Developing and maintaining community and school gardens and expanding the capacity of local food banks to offer high quality, fresh produce; offering nutrition education and cooking classes that are affordable, culturally acceptable and accessible, especially at times when people are off from work; and developing environmental change strategies that include nutrition policies, planning communities in a way that increases walkability, safe places to bike, and expanding access to fresh fruits and vegetables in neighborhoods. Another community health needs assessment conducted in July 2013 by North Valley and Sutter Surgical Hospital identified, offering nutrition education in schools as a primary focus activity to help improve community health. The report also emphasizes the importance of making environmental changes that are sustained through policy and system change. The data from these assessments was taken into consideration with great detail when developing the strategic integrated work plan for Yuba County. Our hope is that by addressing the five priorities that were identified in the Community Health Needs Assessment, we will be able to increase the likelihood that persons eligible for SNAP-Ed will be able to make healthier food and physical activity choices within a limited budget while remaining consistent with the current Dietary and Physical Activity Guidelines.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

5. **Community Change Goals**

Yuba County had multiple data sources that were utilized when developing the community change goals including the Community Health Needs Assessment conducted in July 2013 and the County Health Rankings by the Robert Woods Johnson Foundation. These data sources were utilized by the collaborative efforts of Yuba County's County Nutrition Action Plan (C-NAP) group also known as HEALTHY YOUba to develop the long term community change goals for Yuba County which include the following:

1. By **September 30, 2019**, improve the ranking for Yuba County on the Robert Wood Johnson Foundation county Health rankings **from the 46th rank to the 40th rank** by addressing the five priorities that were identified in the Community Health Needs Assessment.
2. By **September 30, 2019** based on the RE-AIM framework, LIA Partnership will assist a minimum of **three qualifying childcare centers** in Yuba County to self-assess and undertake improvements in healthy eating and physical activity policies including healthier snacks or meals, making water the primary beverage of choice, limiting the amount of screen time and adding/increasing the amount of physical activity to their curricula. In addition, LIA partnership will assist these sites in improving the physical environment, and institutional capacity to support improved nutrition and physical activity behaviors among students, parents, and staff. Through this activity the LIA partnership **aims to improve Nutrition and Physical Activity Self-Assessment for Child Care (NAP SACC) scores** at these sites compared to the baseline scores collected in FFY2016. This objective will address the **Early Care and Education (ECE) core setting** of the **Learn-A portfolio**.
3. By **September 30, 2019** members of the HEALTHY YOUba group (County Nutrition Action Partnership) including SNAP-Ed funded and non-funded partners such as; the LHD, Dairy Council of California, Marysville Joint Unified School District, UCCE 4-H Program and EFNEP will assist a minimum of **17** SNAP-Ed qualifying **schools** in Yuba County in assessing, updating and implementing their school wellness policies while improving the school physical environment and institutional capacity to support improved nutrition and physical activity behaviors among students, staff/providers and parents. Smarter Lunchrooms Movement, School Health Index and other relevant strategies will be incorporated in the classrooms, after-school programs and school cafeterias to achieve this outcome. This objective will address the **core setting (schools)** and **secondary settings (after-school programs)** of the **Learn-B portfolio**.
4. By **September 2019**, **increase** the number of school and community **edible gardens** in Yuba County **by 140 percent**. At the beginning of the school and community garden PSE, there were a total of five school and community gardens some of which were struggling to be maintained. The LIA partnership aims to establish new gardens and maintain existing gardens reaching **a minimum of 12 countywide**. This objective will address the **Live portfolio** at the **environmental level.**

6. **Partnerships and Collaborative Efforts**

LIA's will promote SNAP-Ed services and activities by connecting with other agencies, such as County Welfare Departments, Dairy Council of California, Family Resource Centers, etc. This proposed work plan will seamlessly integrate into and advance Yuba County's SNAP-Ed programming, which is coordinated through Yuba County's County Nutrition Action Plan (C-NAP) group, HEALTHY YOUba. Given the limited resources and players in this unique rural county, Yuba County Health and Human Services Department (YCHHSD) and its subcontractor Center for Healthy Communities (CHC) along with the UC CalFresh Nutrition Education Program have worked collaboratively for many years to collectively coordinate activities. Going forward, LIA's will continue promoting SNAP-Ed services and activities by connecting with other SNAP-Ed funded and non-funded agencies in Yuba County.

The C-NAP group in Yuba County identifies themselves as HEALTHY YOUba and is comprised of Food and Nutrition Service (FNS) funded and unfunded partners serving the population in the areas of increasing food access, nutrition education and physical activity promotion. Based on the various quantitative and qualitative needs assessments, Communities of Excellence in Nutrition, Physical Activity and Obesity Prevention (CX 3) data and county profile, HEALTHY YOUba has undertaken six main initiatives including:

- HEALHTY YOUba Schools
- HEALTHY YOUba Families/ Neighborhoods
- HEALTHY YOUba Workplace
- HEALTHY YOUba Faith-based organizations
- HEALTHY YOUba Retail (stores, food banks and farmers' markets)
- HEALTHY YOUba Media

HEALTHY YOUba aims to sustain and promote community partnerships that cultivate healthy lifestyles for Yuba County residents. The C-NAP group will meet at least four times per year. HEALTHY YOUba partners include: UC CalFresh, Yuba County LHD, Yuba County CWD, Women, Infant & Children (WIC), Marysville Joint Unified School District (MJUSD), Camptonville Community Partnership, Mercy Housing, Dairy Council, Yuba County Children's Council, MJUSD School Wellness Community, Marysville Farmers' Market, MJUSD School Readiness and other community stakeholders/members.

SNAP-Ed

SNAP-Ed currently collaborates with the CalFresh Outreach Prime Contractor for the Far North', housed in the Chico State Research Foundation. This contractor serves Yuba County along with several other counties in Northern California. The SNAP-Ed team along with the CalFresh outreach team identifies strategic sites/SNAP-Ed events (like food distribution sites and Farmers' Markets) that the CalFresh Outreach team can table at, with the goal of improving CalFresh enrollment. SNAP-Ed also collaborates with the Yuba County Health and Human Services' CalFresh Department. Our agencies regularly share activities and opportunities to collaborate/coordinate at the Yuba County Nutrition Action Partnership (CNAP) meetings and other phone/in-person meetings.

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Non-SNAP-Ed-Funded

Non SNAP-Ed funded, UC Expanded Food and Nutrition Education Program (EFNEP) is in 5 sites and assists limited-resource youth and families with children, through series based, behaviorally focused nutrition education. Participants learn how to eat healthier meals and snacks, stretch their food dollars, reduce the risk of food-borne illnesses, and to be physically active. EFNEP also contributes to participants' personal development and the improvement of their total family's diets and nutritional welfare. EFNEP is supported by USDA's National Institute of Food and Agriculture (NIFA) Smith-Lever funds. EFNEP adult program is eight lessons and provides education through the Promotora Model. The effectiveness of nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist and 24-hour food recalls) filled out by the participants. EFNEP youth participate in a series of educational lessons geared at helping them to eat better, be more physically active and wise use of their food dollars. EFNEP partners with community based organizations. Methods for program delivery include direct teaching in groups, training of volunteers to assist with direct teaching of adults and youth and educational materials to complement other teaching methods. EFNEP will collaborate with UC CalFresh, Yuba County LHD contractors and other non-SNAP-Ed funded partners to provide comprehensive multi-level behavior focused strategies and interventions which include nutrition education, physical activity, training and technical assistance to SNAP-eligible populations.

Together, these organizations have been working to create collective impact in the small rural county by advancing specific outcomes, and shared measurement systems, identified in the SNAP-Ed Integrated Work Plan for Healthy Food and Beverage Access, Policy, Systems and Environment and Food Security. In fact, HEALTHY YOUba has developed a collective common vision to guide the county's work. The vision of the HEALTHY YOUba C-NAP Group is to link programs within Yuba County and promote the consumption of fruits and vegetables and physical activity through partnerships and collaborative interventions. Guided by this vision and the principles of continuous communication necessary for collective impact, YCHHSD and its subcontractor CHC will coordinate the HEALTHY YOUba meetings and provide regular updates on the activities, gaps and findings of the SNAP-Ed programming in the county.

X	Promote Healthy Weight				

8. **Educational Materials, Resources and Curriculum**

All curriculum and materials used will be from the approved USDA SNAP-Ed Connection website, and/or **FFY 2016** USDA approved UC CalFresh, California Department of Aging, California Department of Social Services, Catholic Charities of California or the CDPH Nutrition Education Obesity Prevention Branch (NEOPB) Approved Nutrition Education Materials list. All curricula and materials will be defined and appropriate for the target audience identified in Section B: Target Audience Description of this document.

9. **Intervention and Evaluation Plan Narrative Summary**

This work plan will include multiple qualifying sites, collaborative partners, Smarter Lunchrooms Interventions, and sustainable strategies to create a collective impact in Yuba County. The Local Implementing Agency (LIA) partnership will build on existing community programs to coordinate nutrition education for SNAP-Ed eligible residents.

The implementing agencies (UCCE and LHD) in Yuba County will collaborate to provide comprehensive multi-level behavior-focused strategies and interventions which include nutrition education and physical activity promotion, community events, training and technical assistance, while also utilizing media and public relations and coordination/collaboration with partners throughout the county. The agencies will promote the current Dietary Guidelines and SNAP-Ed intervention strategies that have been proven to support behavior change.

The LIAs will conduct activities at the individual and interpersonal level of the Social Ecological Model. The LHD and UCCE will also incorporate the environmental approach which may address several or all elements of the socio-ecological model targeting interpersonal as well as organizational and community venues. The LIA's will address Training and Technical Assistance of their personnel or the community – and share training opportunities across agencies when possible. In addition, Community/Nutrition Education Direct and Community/Nutrition Education Indirect will be provided by both

the LIAs. Media, Social Media, Public Relations and Messaging will also be addressed by the LIA's. Coordination and Collaboration will be specifically addressed by both the LIAs collaboratively and with their individual service populations. SNAP-Ed funded partners have selected key messages and promotions during C-NAP meetings. Implementation will occur through a coordinated effort with C-NAP partners in effort to avoid duplication.

All LIAs will employ evidence- and practice-based interventions. Both LIAs will also include research-based interventions. The objectives and activities for the integrated work plan were derived from results obtained via each agency's community assessments, in addition to the data used in FFY15. Both the LIAs collaborated and coordinated to create the Work Plan so that objectives and activities will be done by the agency with the most experience and expertise in order to successfully complete the Work Plan Objectives.

This proposed work plan will build on activities/services accomplished by previous SNAP-Ed projects while also addressing unmet needs specifically in the early childhood setting. FFY 2017 will focus heavily on preschool children in low-income, ethnically diverse child care sites throughout the County. The early childhood population is underserved though the childcare settings and their partners are well poised for healthy change. This provides the perfect opportunity to nurture their current efforts and instill lasting improvements.

The purpose of this intervention is to assist child care providers to increase awareness and understanding of their nutrition and physical activity practices and policies. Providers will gain skills to enhance both quality and quantity of nutrition and physical activity instruction in child care. Additionally, assistance with sustainable Policy, System and Environmental (PSE) changes will be provided through training and technical assistance within the early childcare setting. This intervention will utilize NAP SACC. NAP SACC is an evidence based tool, proven to transform policies and environments in early care settings.

This LIA partnership work plan will build on existing county assets to create a sustainable program that empowers preschools, schools and the community at large to take action and build a sustained healthy environment.

The key purposes of the early childhood intervention are to:

1. Improve the capacity of providers in Child Care sites to implement tailored nutrition education, healthy meal planning and healthy food preparation via the implementation of a five-step comprehensive approach to assess, address, and evaluate policy and/or environmental changes.
2. Provide Child Care providers with the most up-to-date nutrition education information; and engage preschool children, their providers, their families and community members to improve health outcomes for low-income families throughout Yuba County.

Key educational messages will emphasize the 2010 Dietary Guidelines for Americans (using MyPlate and promoting increased fruit/vegetable consumption), access to healthy foods and beverages, increasing physical activity and decreasing the consumption of sugar sweetened beverages via education and environmental support. The LIA's will use innovative and evidence-based practices that effectively engage rural low-income families. With this multi-level approach, the following interventions will be implemented:

State Level Objective 1, centered on increasing consumption and access to healthy foods, will be addressed in all the local objectives. Local Objective 1 is focused on empowering preschools to take action and build a sustained healthy environment. Local Objective 2 focuses on school wellness policies and the healthy eating environment at school sites

State Level Objective 2, addressing the consumption and access to healthy beverages, will be considered in Local Objective 2 – the objective around school wellness policies and the healthy eating environment in schools.

State Level Objective 3, addressing Physical Activity and Sedentary Behavior, will be addressed in all the local objectives. For Local Objective 1 and 2, the school wellness policies directly relate to increasing opportunities for physical activity in all parts of the school day and beyond.

Environmental Supports for Nutrition Education and/or Physical Activity, **State Level Objective 4**, will be addressed in Local Objectives 1, 2 and 6. Local Objective 2 will provide support and technical assistance to 17 schools Yuba County for updating their School Wellness Policies and healthy eating environment. UCCE will work closely with the Marysville Joint Unified Food Service Director to incorporate Smarter Lunchrooms Movement strategies into Elementary, intermediate and High School cafeterias.

UCCE

UC CalFresh will utilize multiple delivery methods and intervention strategies to reach low-income elementary school students, their parents, and school educators and administrators. UC CalFresh will focus on direct education to eligible elementary school students utilizing approved curriculum. Education will be offered in multiple locations, but with the greatest intensity at schools in the priority neighborhoods where we intend to saturate our efforts. Staff will provide teacher training at school staff meetings, STARS after school program meetings and grade level meetings. Nutrition education resources will be available to teachers on a checkout basis. Additional meetings with teachers will occur throughout the year and in conjunction with planning school-wide events focused on healthy living. UC staff will provide at least two lesson demonstrations to teachers within each school year to support comprehensive classroom nutrition education. In addition to lesson demonstrations, school based programming will extend from classroom nutrition education into school food service programs (Smarter Lunchrooms), school gardens, and wellness committee work. Parent Teacher Association or Organizations (PTA/Os) will be targeted for recruitment of adults and families for series based nutrition education. End of the year school wide nutrition events will occur at school sites to emphasize the connection between nutrition and physical activity and to practice goal setting for positive health behaviors.

School-based programming will extend beyond the classroom in an effort to change the school environment. UC CalFresh educators will work collaboratively with the school food service at a minimum of three elementary schools to make environmental changes to school lunchrooms using Smarter Lunchrooms principals. Additionally, UC CalFresh will continue to work towards supporting and expanding a school garden at a minimum of two elementary school sites to implement and/or support environmental changes. UC CalFresh will assist in the development and implementation of at least

one school wellness policy and continue to support the efforts of Parent Teacher Organizations to change school environments. Family-centered approaches will be used to help students achieve a healthy lifestyle through role modeling; engaging children in food preparation; changing current eating and shopping habits. Eat and Play Together curricula activities including goal setting will be implemented for family centered nutrition education. Results from previous Youth Taste Testing Tool evaluation data will inform approaches about foods that will be offered for taste tests in FFY16. UC CalFresh will use a policy, systems and environmental (PSE) approach to create structures that enhance the environments where our target populations tend to live, work and play. These approaches will include Smarter Lunchrooms, school gardens, playground stenciling etc. and they will work hand-in-hand to further inspire environmental changes by way of a policy or system change being implemented. This PSE approach will seek to uncover strategies for impact that are sustainable. PSE efforts may accelerate the adoption or implementation of effective interventions by effectively integrating approaches into existing infrastructures.

Evaluation

Process evaluation reporting will document the range of SNAP-Ed services provided in Yuba County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated) and indirect education (duplicated) will be documented in the ATF/EARS and compared to original reach targets. The actual number of SNAP-Ed eligible individuals reached by PSE change activities will also be compared to targets and sites that showed high performance in terms of reach and multi-intervention strategies will be identified and considered for replication.

Outcome Evaluation will be implemented to document and assess the Cooking Matters series impact to the participants' individual behavior changes and dietary practices. The LIAs will use a series of process evaluation protocols and fidelity measures will be used to assess the technical training and assistance. Effectiveness of training of nutrition and physical activity will be measured. Post survey will be used for measure effectiveness of trainings. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings.

Policy, system and/ or environmental changes at early childhood and community/school garden sites will be documented using RE-AIM indicators. The RE-AIM indicators will be evaluated on an annual basis to inform future strategies and potential enhancements for greater impact. If necessary, PSE strategies will be adjusted to address challenges.

UCCE will be working with UC CalFresh state office to align, as appropriate, evaluation tools and results to the Western Regions SNAP Ed evaluation framework. Process evaluation reporting will document the range of SNAP-Ed services provided in Yuba County, the locations of services, and the specific SNAP-Ed eligible audiences reached. The actual number of SNAP-Ed eligible individuals reached through direct education (unduplicated) and indirect education (duplicated) will be documented in the ATF/EARS and compared to original reach targets. The actual number of SNAP-Ed eligible individuals reached by PSE change activities will also be compared to targets and sites that showed high performance in terms of reach and multi-intervention strategies will be identified and considered for replication.

The LIAs will use a series of process evaluation protocols and fidelity measures will be used to assess the technical training and assistance. Effectiveness of training of nutrition and physical activity will be measured. Post survey will be used in every training. Ongoing results from this evaluation will inform subsequent nutrition trainings and technical assistance activities. The evaluation results will be used to revise and improve future trainings.

Policy, system and/ or environmental change to promote healthy policy at schools and community sites will be documented using RE-AIM indicators. The RE-AIM indicators will be evaluated on an annual basis to inform future strategies and potential enhancements for greater impact.

The PSE change to promote school wellness policy, CX3 and farmers will be reported using the Western Region SNAP-Ed evaluation framework. The RE-AIM indicators will be evaluated on an annual basis to provide at a minimum the core RE-AIM indicators for that strategy. If necessary, PSE strategies will be adjusted to address challenges.

- UC CalFresh will utilize the Teacher Tasting Tool (TTT) evaluation tool to gather data on food-tasting behaviors. It will be used in the classroom during nutrition education lessons when students receive their tastings. The tool will evaluate students' previous exposure to the target food and willingness to try the food again.
- UC CalFresh will utilize the Adult Tasting Tool (A/TTT) evaluation tool to gather data on food-tasting behaviors. It will be used during nutrition education lessons when adults receive their tastings. The tool will evaluate adults' previous exposure to the target food and willingness to try the food again.
- The Teacher Observation Tool (TOT) evaluation tool will be used to gather data from teachers regarding behavior change in regards to nutrition and physical activity within the classroom. Teachers will report both qualitative and quantitative data including narratives about observed behavior change amongst students.
- The effectiveness of UC CalFresh adult nutrition education lessons is evaluated by the changes in the baseline questionnaires and post-intervention questionnaires (Behavior Checklist, Intent to Change, and Demographic data collected will be used to measure reach).
- To evaluate PSE changes, UC CalFresh will utilize the REAIM framework to monitor reach, effectiveness, adoption, implementation and maintenance of SLM strategies and new garden development in schools.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019):** By **September 30, 2019** based on the RE-AIM framework, LIA Partnership will assist a minimum of **three** qualifying childcare centers in Yuba County to self-assess and undertake improvements in healthy eating and physical activity policies. In addition, LIA partnership will assist these sites in improving the physical environment, and institutional capacity to support improved behaviors among students and their families. This objective will address the **Early Care and Education (ECE) core setting** of the **Learn-A portfolio**.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategies that support the Three-Year SNAP-Ed Local Objective listed above:**

Early Care and Education (ECE)

Strategy: Increase access to healthy eating and physical activity.	**Policy:** Childcare centers enrolled in the USDA Child and Adult Care Food Programs are required to provide nutrition education, including an overview of regional food security resources to staff.
	Systems: Qualifying childcare centers offer food access, healthy eating and physical activity resources as a part of parent enrollment packets.
	Environment: Qualifying centers engage parents or services in building edible gardens for the young children.

Reference: CDPH PSE Compendium: Definitions.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:** The progression of these objectives in the following three years is matched with the funding allocation and the decrease in participant reach through direct education is a consequence of the decline in funding. The LIA partnership will heavily focus on building site capacity and intervention sustainability through increased PSE changes and provider trainings as outlined below.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

1. **FFY 2017 (Year 1) Objective(s):** By September 30, 2017, at a minimum of **three** ECE sites, LIA partnership will: 1) assist PSE action plan development 2) provide technical assistance for policy development and implementation 3) deliver a minimum of **four** provider trainings reaching at least **15** unduplicated early child care providers 4) provide **six** direct education classes reaching a minimum of **65** parents and 5) provide a minimum of **five** direct education lessons to a minimum of **50** children aged 2 to 4 years.

2. **FFY 2018 (Year 2) Objective(s):** By September 30, 2018, at a minimum of **two** existing ECE sites, LIA partnership will: 1) deliver a minimum of **three** provider trainings reaching at least **10** unduplicated providers 2) provide **five** direct education classes reaching a minimum of **50** parents 3) provide a minimum of **four** direct education lessons to a minimum of **30** children aged 2 to 4 years. Technical assistance for PSE action plan annual review/update and policy development/implementation will be provided in all **three** sites chosen in FFY 2017.

3. **FFY 2019 (Year 3) Objective(s):** By September 30, 2019, at a minimum of **one** ECE sites, LIA partnership will: 1) deliver a minimum of **two** provider trainings reaching at least **six** unduplicated providers 2) provide **three** direct education classes reaching a minimum of **30** parents 3) provide a minimum of **two** direct education lessons to a minimum of **20** children aged 2 to 4 years. Technical assistance for PSE action plan annual review/update and policy development/implementation will be provided in minimum of **three** of the sites that were chosen in FFY2017, where NAPSACC and PSE pre-assessments were initially conducted.

4. In addition, **NAP SACC post data** will be collected in FFY2019 and analyzed to evaluate improvements compared to the baseline data collected in FFY2016.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #1 (FFY 2017–FFY 2019): By **September 30, 2019** based on the RE-AIM framework, LIA Partnership will assist a minimum of **three** qualifying childcare centers in Yuba County to self-assess and undertake improvements in healthy eating and physical activity policies. In addition, LIA partnership will assist these sites in improving the physical environment, and institutional capacity to support improved behaviors among students and their families. This objective will address the **Early Care and Education (ECE) core setting** of the **Learn-A portfolio**.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
1.1	**Networking and communication with key contacts:** Maintain existing communication channels and establish new networks with childcare center leaders and administrators with a focus on augmenting and/or implementing current wellness policies. The FFY 2016 NAPSACC assessment baseline data will be utilized as a springboard for further improvement.	CED CEI MPR X C&C TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: CSUC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 x, Q2 x, Q3 X, Q4 X	On File: Contact list Submit: ATF, Quarterly Reports
Environmental Level: Improve the food, beverage and physical activity environment in settings where people go to LEARN through organizational changes, policies rules, marketing, and access.						
1.2	**PSE action Plan Development:** Based on needs identified in the FFY 2016 NAPSACC assessment baseline data, assist a minimum of three early child care sites to create a realistic action plan with measurable objectives to improve policies, systems and environments with regards to the quality of nutrition and physical activity practices and education. The action plan will be site specific and reviewed/updated annually.	CED CEI MPR X C&C X TTA	CWD X LHD AAA X UCCE CCC	CWD: LHD: CSUC AAA: UCCE: CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X	On File: RE-AIM plan and/or site-specific action plan Submit: ATF, Quarterly

	In **FFY 2017**, LIA partnership will assist PSE action plan development at a minimum of **three** ECE sites. Integrated Work Plan
FFY 2017–2019

Sector Level (Communities): Community and public health approaches.

1.11	Enhance coordination with CalFresh Outreach (CFO) to increase CalFresh enrollment. SNAP-Ed currently collaborates with the 'CalFresh Outreach Prime Contractor for the Far North', housed in the Chico State Research Foundation. This contractor serves Yuba County along with several other counties in Northern California. The SNAP-Ed team along with the CalFresh outreach team identifies strategic sites/SNAP-Ed events (like food distribution sites and Farmers' Markets) that the CalFresh Outreach team can table at, with the goal of improving CalFresh enrollment. SNAP-Ed also collaborates with the Yuba County Health and Human Services' CalFresh Department. Our agencies regularly share activities and opportunities to collaborate/coordinate at the Yuba County Nutrition Action Partnership (CNAP) meetings and other phone/in-person meetings. Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019):** By **September 30, 2019,** LIA partnership will collaborate with members of the HEALTHY YOU group (County Nutrition Action Partnership), to assist a minimum of one school district with **17** SNAP-Ed qualifying **schools** in Yuba County in assessing, updating and implementing their school wellness policies while improving the physical environment and institutional capacity to support improved nutrition and physical activity behaviors among students, staff/providers and parents. Smarter Lunchrooms Movement, School Health Index and other relevant strategies will be incorporated in the classrooms, after-school programs and school cafeterias to achieve this outcome. This objective will address the **core setting (schools)** and **secondary settings (after-school programs)** of the **Learn-B portfolio**.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

II. **PSE Strategies that support the Three-Year SNAP-Ed Local Objective listed above:**

School Wellness

Strategy: Establish model wellness policies that include after-school and meet or exceed the USDA minimums.	**Policy:** SNAP-Ed qualifying schools and/or districts establish model wellness policies that exceed the USDA minimums, such as establishing rules for nutrition education, moderate to vigorous physical activity, or after-school programs, without supplanting USDA requirements for its categorical programs.
	Systems: Qualifying schools sign up for Let's Move! Salad Bars to School, or USDA's Healthier U.S. Schools Challenge. Or, after-school programs self-assess and institute best practices from Changing Lives, Saving Lives, the Healthy Behaviors Initiative.
	Environment: Youth and their adult allies in low-resource schools secure resources to help establish hydration stations to offer all students fresh, cold and free water. A Policy, systems and environmental (PSE) approach will be used to create structures that enhance the environments where our target populations tend to live, work and play. These approaches will include Smarter Lunchrooms, school gardens, playground stenciling etc.

Reference: CDPH PSE Compendium: Definitions.

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

School and Community Gardens

Strategy: Establish model wellness policies that include after-school and meet or exceed the USDA minimums.	**Policy:** Park, school or city/county officials establish an Inter-Agency Agreement with the Extension's Master Gardener Program to provide technical support and education for gardens being established in low-resource communities or schools. Or, land use policies are established by county, district, or city agencies to support gardens at low-resource locations.
	Systems: Gardening groups in qualifying venues join with others to support education, community engagement, and maintenance of vibrant gardens.
	Environment: Local health department staff facilitate adding rain barrels to community garden sites.

Reference: CDPH PSE Compendium: Definitions.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objectives:**
   a) By **September 30, 2017**, at a minimum of **ten** school sites, LIA partnership will: 1) assist in PSE action plan development 2) provide a minimum of **30 direct education** lessons to a minimum of **1000** students 3) provide comprehensive nutrition key messaging through the School Wellness Nutrition Theme Calendar 4) participate in a minimum of **three indirect school events** including school breakfast week, school health fair and employee wellness day 5) provide technical assistance (TA) for: a) policy development and implementation b) transitioning Harvest of the Month and c) integrating SNAP-Ed key messages.

b) By September 30, 2017, with an aim to improve school environment, LIA partnership will provide support through strategies such as Smarter Lunchroom Movement intervention, Youth Engagement and Safe Routes to Schools and continue efforts to support sustainable implementation of physical activity through murals/stencils and edible gardens.

2. **FFY 2018 (Year 2) Objectives:**
   a) By **September 30, 2018,** at a minimum of **five** existing school sites, LIA partnership will: 1) assist in PSE action plan development 2) provide a minimum of **20 direct education** lessons to a minimum of **800** students. 3) provide comprehensive nutrition key messaging through the School Wellness Nutrition Theme Calendar 4) participate in a minimum of **three indirect school events** including school breakfast week, school health fair and employee wellness day 5) provide technical assistance (TA) for: a) policy development and implementation b) transitioning Harvest of the Month and c) integrating SNAP-Ed key messages.
   b) By September 30, 2018, with and aim to improve school environment, LIA partnership will provide support through strategies such as Smarter Lunchroom Movement intervention, Youth Engagement and Safe Routes to Schools and continue efforts to support sustainable implementation of physical activity through murals/stencils and edible gardens.

3. **FFY 2019 (Year 3) Objectives:**
   a) By **September 30, 2019**, at a minimum of **five** school sites, LIA partnership will: 1) assist PSE action plan development 2) provide a minimum of **20 direct education lessons** to a minimum of **800** students 3) provide comprehensive nutrition key messaging through the School Wellness Nutrition Theme Calendar 4) participate in a minimum of **three indirect school events** including school breakfast week, school health fair and employee wellness day 5) provide technical assistance (TA) for: a) policy development and implementation b) transitioning Harvest of the Month and c) integrating SNAP-Ed key messages.
   b) By September 30, 2019, with and aim to improve school environment, LIA partnership will provide support through strategies such as Smarter Lunchroom Movement intervention, Youth Engagement and Safe Routes to Schools and continue efforts to support sustainable implementation of physical activity through murals/stencils and edible gardens.
   c) By September 30, 2019 LIA partnership will provide training and technical assistance and education on the implementation of the current MJUSD Wellness Policy in a minimum of four qualifying schools reaching a minimum of 50 staff/administrators.
   d) By September 30, 2019 in collaboration with the MJUSD Wellness Committee Coordinator, LIA partnership will develop a way to disseminate the information in the MJUSD Wellness Policy in a minimum of four qualifying schools reaching a minimum of 50 staff/administrators, 500 parents and 500 students.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #2 (FFY 2017–FFY 2019): By **September 30, 2019,** LIA partnership will collaborate with members of the HEALTHY YOUba group (County Nutrition Action Partnership), to assist a minimum of one school district with **17** SNAP-Ed qualifying **schools** in Yuba County in assessing, updating and implementing their school wellness policies while improving the physical environment and institutional capacity to support improved nutrition and physical activity behaviors among students, staff/providers and parents. Smarter Lunchrooms Movement, School Health Index and other relevant strategies will be incorporated in the classrooms, after-school programs and school cafeterias to achieve this outcome. This objective will address the **core setting (schools)** and **secondary settings (after-school programs)** of the **Learn-B portfolio**.

Activity Number	Activity Description	Intervention Categories*	Responsible SNAP-Ed Agency(ies)	Subcontractors	Time Frame: Year & Quarter**	Documentation
2.1	**Networking and communication with key contacts:** Maintain existing communication channels and establish new networks with school leaders and administrators with a focus on augmenting and/or implementing current wellness policies. The FFY 2016 school wellness policy evaluation data will be utilized as a baseline for further improvement. **Local School Wellness Policy (LSWP) Meetings:** LIA's will coordinate the MJUSD LSWP committee coordinator to obtain annual meeting schedules and attend quarterly Wellness Meetings as scheduled.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: CSUC AAA: UCCE: UC CalFresh CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X Year 3: Q1 X, Q2 X, Q3 X, Q4 X	ATF Form Quarterly Report Communication log
Environmental Level: Improve the food, beverage and physical activity environments where people go to LEARN through organizational changes, policies rules, marketing, and access. These improvements will aim to enhance environments such as; lunchrooms, school gardens, and playgrounds via incorporation of stenciling and/or murals.						
2.2	**PSE action Plan Development:** Based on needs identified in the FFY 2016 school wellness policy evaluation data, LIA's will assist a minimum of **eight** school sites in **FFY 2017** to create a realistic action plan with measurable objectives to improve policies, systems and environments with regards to the quality of nutrition and physical activity	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: CSUC AAA: UCCE: UC CalFresh CCC:	Year 1: Q1 X, Q2 X, Q3 X, Q4 X Year 2: Q1 X, Q2 X, Q3 X, Q4 X	PSE Report

	practices and education. This action plan will be site specific and reviewed and updated annually. In **FFY 2018**, a minimum of **five** additional school sites will be assisted with developing an action plan. In **FFY 2019**, a minimum of **four** additional school sites will be assisted with developing an action plan. This activity will be carried out in close collaboration between Yuba LHD, UCCE and Dairy Council along with the school food service director to avoid duplication and to maximize reach of services to a total of **17** schools.				Year 3 Q1 Q2 Q3 Q4 X X X X	
2.3	**Technical Assistance (TA) for Policy Development and implementation:** Collaborate with school administrators, staff and parents, to establish policies and programs for ongoing effective nutrition education and physical activity. Provide a minimum of four trainings and/or technical assistance sessions for successful implementation of wellness policies.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: CSUC AAA: UCCE: UC CalFresh CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	ATF Form Quarterly Report PSE Report
2.4	**TA for transitioning Harvest of the Month and encourage local procurement in the school settings:** LHD will be provide TA to the food service directors at SNAP-Ed approved school sites, to facilitate the development of systems change strategies to increase procurement of locally sourced foods.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☐ UCCE ☐ CCC	CWD: LHD: CSUC AAA: UCCE: CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	ATF Form Quarterly Report

	In adaptation to the declining funding levels, LHD will provide TA and material support to the food service directors to continue the Harvest of the Month program in the future. LHD has existing connections with the local farmers and experience in procuring produce for the HOTM program. LHD plans to build upon and strengthen these relationships with the local farmers along with encouraging schools to incorporate local produce in their cafeterias and feature monthly Harvest of the Month tastings.				Year 3 Q1 Q2 Q3 Q4 X X X X	
2.5	At the beginning of the school year, cafeteria managers at a minimum of 15 intervention sites will receive a kit to help implement the Smarter Lunchrooms Movement intervention.	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TT	☐ CWD ☐ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: AAA: UCCE: UC CalFresh CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X Year 3 Q1 Q2 Q3 Q4 X X X X	Quarterly Report UC CalFresh Reporting Tools Workbook Smarter Lunchrooms Scorecards Smarter Lunchrooms Observational Summary Report Pictures
2.6	**Resources and TA to help integrate SNAP-Ed key messages:** In FFY17-19, with an aim to integrate SNAP-ED key messages into ongoing school lessons, provide approved curricula, support materials along with training and technical assistance at a minimum of **ten** school sites to facilitate school wellness policies and/or enhance identified environmental supports such as smarter lunchrooms, nutrition education, physical	☐ CED ☐ CEI ☐ MPR ☒ C&C ☒ TTA	☐ CWD ☒ LHD ☐ AAA ☒ UCCE ☐ CCC	CWD: LHD: CSUC AAA: UCCE: UC CalFresh CCC:	Year 1 Q1 Q2 Q3 Q4 X X X X Year 2 Q1 Q2 Q3 Q4 X X X X	On File: Site contact list, agendas, training materials, evaluations Submit: ATF, RTW

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Sector Level (Communities): Community and public health approaches.						
2.9	Enhance **coordination with CalFresh Outreach** (CFO) to increase CalFresh enrollment. SNAP-Ed currently collaborates with the 'CalFresh Outreach Prime Contractor for the Far North', housed in the Chico State Research Foundation. This contractor serves Yuba County along with several other counties in Northern California. The SNAP-Ed team along with the CalFresh outreach team identifies strategic sites/SNAP-Ed events (like food distribution sites and Farmers' Markets) that the CalFresh Outreach team can table at, with the goal of improving CalFresh enrollment. SNAP-Ed also collaborates with the Yuba County Health and Human Services' CalFresh Department. Our agencies regularly share activities and opportunities to collaborate/coordinate at the Yuba County Nutrition Action Partnership (CNAP) meetings and other phone/in-person meetings. FFY 2017–2019

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):**

a. By September 30, 2019, LIA's will provide nutrition and physical activity **direct education**, designed to increase knowledge and improve related behaviors with an emphasis on consumption and access to healthy foods, consumption and access to healthy beverages, and physical activity. In **FFY 2017** direct education will be provided to a minimum of **500** unduplicated **adult SNAP-Ed participants** and in **FFY 2018-19**, the reach will be **250 adults** annually at community sites.

b. By September 30, 2019, provide nutrition and physical activity **indirect education**, designed to increase knowledge and improve related behaviors with an emphasis on consumption and access to healthy foods, consumption and access to healthy beverages, and physical activity. In **FFY 2017** indirect education will be provided to a minimum of **5000 unduplicated adult SNAP-Ed participants** and in **FFY 2018-19**, the reach will be **4500 participants annually**. This objective will address community sites such as: **places of worship, community organizations, SNAP offices and public housing core setting** of the **Live portfolio**.

SNAP-Ed State Goals:

X	**Goal 1:** Food and Beverages (Behavioral)
X	**Goal 2:** Physical Activity (Behavioral)
X	**Goal 3:** Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices(Physical and Social Environmental)
X	**Goal 5:** Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

II. **PSE Strategy that support the Three-Year SNAP-Ed Local Objective listed above:**

Community Gardens

Strategy: Establish model wellness policies that include after-school programs to meet or exceed the USDA minimums.	**Policy:** Park, school or city/county officials establish an Inter-Agency Agreement with the Extension's Master Gardener Program to provide technical support and education for gardens being established in low-resource communities or schools. Or, land use policies are established by county, district, or city agencies to support gardens at low-resource locations.
	Systems: Gardening groups in qualifying venues join with others to support education, community engagement, and maintenance of vibrant gardens.
	Environment: Local health department staff facilitate adding rain barrels to community garden sites.

Reference: CDPH PSE Compendium: Definitions.

III. **Annual Objectives to support the Three-Year SNAP-Ed Local Objective listed above:**

1. **FFY 2017 (Year 1) Objective(s):**

   a. In **FFY 2017 c**onduct a minimum of **50 single and/or series** nutrition, garden, physical activity, and/or food resource management **direct education** sessions to reach a minimum of **500 unduplicated** SNAP-Ed eligible **adults** at specified community sites. Taste testing may be included.

   b. In **FFY 2017**, promote the consumption of healthy food and beverages and increased physical activity and/or improved food security through **indirect education** by reaching a minimum of **5000** of the county's SNAP-Ed eligible population through a minimum of **five** community events and/or dissemination of pertinent information and resources. Taste testing may be included.

2. **FFY 2018 (Year 2) Objective(s):**

   a. **In FFY 2018 c**onduct a minimum of **20 single and/or series** nutrition, garden, physical activity, and/or food resource management **direct education** sessions to annually reach a minimum of **250** unduplicated SNAP-Ed eligible **adults** at specified community sites. Taste testing may be included.

b. In **FFY 2018**, promote the consumption of healthy food and beverages and increased physical activity and/or improved food security through **indirect education** by reaching a minimum of **4500** of the county's SNAP-Ed eligible population through a minimum of **three** community events and/or dissemination of pertinent information and resources. Taste testing may be included.

3. **FFY 2019 (Year 3) Objective(s):**

a. **In FFY 2019 c**onduct a minimum of **20 single and/or series** nutrition, garden, physical activity, and/or food resource management **direct education** sessions to annually reach a minimum of **250** unduplicated SNAP-Ed eligible **adults** at specified community sites. Taste testing may be included.

b. In **FFY 2019**, promote the consumption of healthy food and beverages and increased physical activity and/or improved food security through **indirect education** by reaching a minimum of **4500** of the county's SNAP-Ed eligible population through a minimum of **three** community events and/or dissemination of pertinent information and resources. Taste testing may be included.

Supplemental Nutrition Assistance Program Education (SNAP-Ed)

Yuba County

Three-Year
Integrated Work Plan
FFY 2017–2019

Three-Year SNAP-Ed Local Objective #3 (FFY 2017–FFY 2019):

a. By September 30, 2019, provide nutrition and physical activity **direct education**, designed to increase knowledge and improve related behaviors with an emphasis on consumption and access to healthy foods, consumption and access to healthy beverages, and physical activity. In **FFY 2017** direct education will be provided to a minimum of **500** unduplicated **adult SNAP-Ed participants** and in **FFY 2018-19**, the reach will be **250 participants annually at community sites**.

b. By September 30, 2019, provide nutrition and physical activity **indirect education**, designed to increase knowledge and improve related behaviors with an emphasis on consumption and access to healthy foods, consumption and access to healthy beverages, and physical activity. In **FFY 2017** indirect education will be provided to a minimum of **5000 unduplicated adult SNAP-Ed participants** and in **FFY 2018-19**, the reach will be **4500 participants annually**. This objective will address the **places of worship, community organizations, SNAP offices and public housing core setting** of the **Live portfolio**.

SECTION C: INTERVENTION PLAN

I. **Three-Year SNAP-Ed Local Objective #6 (FFY 2017–FFY 2019):** By **September 30, 2019**, increase opportunities for healthy eating by assisting in the development and/or continued support of a minimum of **five** community/residential/school gardens. This objective will address the **Live portfolio** at the **environmental level.**

SNAP-Ed State Goals:

	Goal 1: Food and Beverages (Behavioral)
	Goal 2: Physical Activity (Behavioral)
	Goal 3: Food Resource Management (Behavioral)
X	**Goal 4:** Access to and/or appeal of dietary choices (Physical and Social Environmental)
	Goal 5: Access to and/or appeal of physical activity opportunities (Physical and Social Environmental)

II. **PSE Strategy(ies) that support the Three-Year SNAP-Ed Local Objective listed above:**

School and Community Gardens

Strategy: Establish model wellness policies that include after-school and meet or exceed the USDA minimums.	**Policy:** Park, school or city/county officials establish an Inter-Agency Agreement with the Extension's Master Gardener Program to provide technical support and education for gardens being established in low-resource communities or schools. Or, land use policies are established by county, district, or city agencies to support gardens at low-resource locations.
	Systems: Gardening groups in qualifying venues join with others to support education, community engagement, and maintenance of vibrant gardens.
	Environment: Local health department staff facilitate adding rain barrels to community garden sites.

Rev. 8/15/2017

Section D: Assurances

Template 5: SNAP-Ed Plan Assurances

State Agency completion only: To assure compliance with policies described in this Guidance, the SNAP-Ed Plan shall include the following assurances. Mark your response to the right.

SNAP-Ed Plan Assurances	Yes	No
The State SNAP agency is accountable for the content of the State SNAP-Ed Plan and provides oversight to any sub-grantees. The State SNAP agency is fiscally responsible for nutrition education activities funded with SNAP funds and is liable for repayment of unallowable costs.	X	
Efforts have been made to target SNAP-Ed to the SNAP-Ed target population.	X	
Only expanded or additional coverage of those activities funded under the Expanded Food and Nutrition Education Program (EFNEP) are claimed under the SNAP-Ed grant. Approved activities are those designed to expand the State's current EFNEP coverage in order to serve additional SNAP-Ed individuals or to provide additional education services to EFNEP clients who are eligible for the SNAP. Activities funded under the EFNEP grant are not included in the budget for SNAP-Ed.	X	
Documentation of payments for approved SNAP- Ed activities is maintained by the State and will be available for USDA review and audit.	X	
Contracts are procured through competitive bid procedures governed by State procurement regulations.	X	
Program activities are conducted in compliance with all applicable Federal laws, rules, and regulations including Civil Rights and OMB circulars governing cost issues.	X	
Program activities do not supplant existing nutrition education programs, and where operating in conjunction with existing programs, enhance and supplement them.	X	
Program activities are reasonable and necessary to accomplish SNAP-Ed objectives and goals.	X	
All materials developed or printed with SNAP Education funds include the appropriate USDA nondiscrimination statement and credit to SNAP as a funding source.	X	
Messages of nutrition education and obesity prevention are consistent with the Dietary Guidelines for Americans.	X

FFY 2018 CDA Alternative Methodology 10 Proposal

The California Department of Aging (CDA) would like to request to have blanket approval to use Methodology 10 during the Federal Fiscal Year (FFY) 2018 for the Site Change Process. This would mean all site change requests from Area Agencies on Aging (AAAs) using Methodology 10 would only go through CDA for approval. For "Methodology 10: Use of surveys to qualify sites," AAAs use intake records (CDA Method 3) and surveys (CDA Method 4) through the Title IIIC-1 intake forms and SNAP-Ed Site Eligibility Verification Forms to qualify their sites with Methodology 10 and show their low-income senior populations are stable (see screenshot below for Methodology 10). CDA has included using Methodology 10 in their State Level Project for the FFY 2017−2019 State Plan (see CDA's section below from the FFY 2017−2019 State Plan).

The California Department of Social Services (CDSS) is processing alternative methodology site change requests twice per year and does not want to limit CDA's/AAA's ability to provide services to their older populations. Without this blanket approval, this means the AAAs will wait approximately two months from the due dates as a result of processing time before they can provide services. Because CDA/AAAs rely heavily on Methodology 10, CDSS is proposing CDA to have blanket approval for Methodology 10 to use during FFY 2018.

Please review and approve this proposal.

#	Methodology Name	Description
10.	**Use of surveys to qualify sites** **Use in very limited circumstances** **Approval will be given on a case by case basis.** **Please NOTE: Methodology #10 is Approved for AAAs ONLY for FFY 16 (CDA approval required).**	May be done in **very limited** circumstances. Documentation must accompany the request that state *the site **cannot** be qualified using traditional methods; but that you have evidence to suggest that they are an important partner.* • **California Department of Aging (CDA) – Specific —Title IIIC Intake Forms and Congregate Meal Site Participant Income** ○ CDA SNAP-Ed site(s) that do not meet approved alternative methods (CDA Methods 1 or 2 as noted in the SNAP-Ed Site Eligibility Verification Form) may use one of the following alternative methods (CDA Methods 3 or 4): ▪ **Approach 1 (CDA Method 3): Intake Records -** 50% of congregate site participants have incomes below 100% of the Federal Poverty Guideline (FPG), as determined by income levels from the Title IIIC intake forms found on the CDA Title III Intake Forms Guide. ▪ **Approach 2 (CDA Method 4): Survey -** 50% of congregate site participants must have incomes below 185 percent of the FPG. Participant income is determined by individual participant queries conducted at the congregate meal site. (*The queries may be completed on the day of largest attendance.*) ○ For approaches 1 and 2, the SNAP-Ed Site Eligibility Verification Form must be fully completed, signed, and dated per instructions on the form. Complete one form per eligible site. SNAP-Ed site eligibility must be evaluated annually and the documentation must be kept on file at the contracting agency. ○ The population must be stable *(meaning the same people live, work, or pray at the site on a regular basis),* such as retired or senior populations on fixed incomes.

Rev. 8/15/2017

FFY 2018 CDA Alternative Methodology 10 Proposal

CDA will administer Supplemental Nutrition Assistance Program-Education (SNAP-Ed) activities through AAAs at eligible Title IIIC Congregate Nutrition sites and other venues such as, low-income senior housing sites, farmers' markets, community centers, Title IIIC home-delivered meal participants and other areas where SNAP-Ed eligible older adults congregate. Eligible sites must meet one of the following U.S. Department of Agriculture, Food and Nutrition Service (USDA, FNS) approved SNAP-Ed site eligibility methodologies:

- **CDA Method 1. Income Targeting Data:** The congregate site address is within an eligible low-income census tract. The congregate site address is within an eligible low-income census tract. (Greater than 50 percent of residents have incomes below 185 percent of the Federal Poverty Guideline [FPG].[2]) For more information on census tract data, please refer to Methodology 3 in the USDA/WRO Targeting Methodologies Summary Document found on CDSS' SharePoint SNAP-Ed Resources Web page at https://snaped.dss.ca.gov/resources/Resource%20Documents/FFY%202017%20USDA-WRO%20Targeting%20Methodologies%20Summary%20Document%20Rev%2012-28-16.pdf.

- **CDA Method 2. Means-Tested Setting:** The setting is qualified based on the population it serves and not its physical location (e.g., public housing, Commodity Food Distribution sites, etc.). For more information on means-tested settings, please refer to Methodology 1 in the USDA/WRO Targeting Methodologies Summary Document found on CDSS' SharePoint SNAP-Ed Resources Web page at https://snaped.dss.ca.gov/resources/Resource%20Documents/FFY%202017%20USDA-WRO%20Targeting%20Methodologies%20Summary%20Document%20Rev%2012-28-16.pdf

- **CDA Method 3. Intake Records:** Fifty percent of congregate site participants have incomes below 100 percent of the FPG[1], as determined by income levels from the Title IIIC intake forms found on the CDA Title III Intake Forms Guide.

- **CDA Method 4. Survey:** Fifty percent of congregate site participants must have incomes below 185 percent of the FPG[2]. Participant income is determined by individual participant queries conducted at the congregate meal site. (Queries may be completed on the day of largest attendance.)

Federal Poverty Levels (2016): 100% FPG $11,880[1] and 185% FPG $21,978[2]

Table 1:

FFY 2018 SNAP-Ed Methodologies

25	CDPH	Orange	4	State staff calculated the average size of SNAP-Ed households and working pattern of low-wage workers in California using data from the American Community Service, Bureau of Labor Statistics, and the State Agency's report on characteristics of SNAP households. California staff proposed setting the eligible worksite wage at $13.79/hour, which is the equivalent yearly income for supporting a 2-person household at 185% of the FFY 13 FPL. The analysis revealed that a worksite would qualify for participation in the Worksite Program if 50% or more of its employees are paid an hourly wage less than or equal to $13.79; this equates to no more than 185% FPL for FFY 2013 for a household size of 2. Worksites would be required to complete a form verifying the site's eligibility using this method. The form is attached.	Craftech Corporation	2941 E. La Jolla St. Anaheim, CA 92806	Yes (See Attachment 3)
26	UC CalFresh	Fresno	5	CEP Eligible Districts	Fresno Unified School District (79 Sites listed)	2309 Tulare Street, Fresno, California 93721	Yes (See Attachment 4)
